FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

NUMBER OF UNEMPLOYED DOCTORATE HOLDERS IN U.S. GROWS

OW110824 Beijing XINHUA in English 0810 GMT 11 Sep 80

[Text] New York, September 11 (XINHUA)--The total number of doctorates awarded in the United States last year was 31,200, an increase of 328, or 1.1 per cent, from the 30,872 awarded in 1978. At the same time, the rate of unemployed doctorate recipients was also on the increase, according to a report published recently by the U.S. National Academy of Sciences.

According to the report, the proportion of women doctorates reached an all-time high of 28.6 per cent in 1979. The current number of 8,921 is now five times greater than the 1965 total. About two-thirds of the 1969 to 1979 increase in women doctorates were registered in the fields of education and social sciences.

From 1978 to 1979, there was an increase in the number of doctorates awarded to men in the physical sciences (mathematics, physics and astronomy, chemistry, and earth sciences), engineering, and the life sciences, the first growth in these fields in eight years. However, the total number of men doctorates decreased 1.2 per cent.

The report shows that of the five racial/ethnic groups, black doctorate recipients have the highest proportion of women doctorates, with 37.9 per cent, followed by whites (26.9 per cent), American Indians (28.5 per cent), Hispanics (24.4 per cent) and Asians (17.0 per cent). [As received]

Meanwhile, the report also shows that between 1969 and 1979, the proportion of doctorate recipients still seeking employment at time of doctorate increased from 17.7 per cent to 20.6 percent in mathematics, from 18.7 per cent to 21.6 per cent in agricultural sciences, from 13.4 per cent to 21.3 per cent in political sciences, from 10.3 per cent to 14.7 per cent in economics, and from 19.3 per cent to 25.9 per cent in education. The largest increase in proportion of doctorate recipients still seeking employment has been in the humanities fields (history, English and American literature, and foreign language and literature). In 1979, the proportion of the unemployed doctorate recipients in these fields was around 32 to 38 per cent.

GOVERNMENT TO SALVAGE JAPANESE WARSHIPS SUNK DURING WORLD WAR II

OW061315 Tokyo KYODO in English 1253 GMT 6 Sep 80

[Text] Beijing, Sept 6 KYODO--China has decided to salvage Japanese warships which sank in China's 12-mile territorial waters during World War II.

China will start the work on its own at an early date to prevent trouble the submerged Japanese ships may cause to navigation and fishing within its waters.

China will allow Japan to salvage other Japanese warships which went down outside its territorial waters during the war. China is ready to help Japan in the work.

This decision was disclosed Friday by Chinese Vice Minister of Communications Peng Deqing to Japanese Dietman Seiichi Takagawa, leader of the New Liberal Club now visiting Beijing.

About two years ago, Tagawa asked for China's cooperation in salvaging such Japanese ships.

Following the new Chinese decision, the Japanese side will have to work out its steps quickly for salvaging these ships and collecting the remains of Japanese still aboard these ships.

According to Tagawa, more than 240 Japanese warships with a total tonnage of 800,000 tons sank in waters ranging from Bohai Bay to the South China Sea during World War II.

He estimated that the remains or bodies of 3,000 to 4,000 Japanese are still untouched on board the submerged warships. More than half of them may be under waters outside China's territorial sea, Tagawa said.

The Chinese vice minister also told Tagawa that China recently completed an investigation of the Japanese repatriation ship Awa Maru which sank on April 1, 1945 after being attacked by a U.S. submarine in the Taiwan Straits on its way home from a repatriation mission to Southeast Asian islands.

The minister said that no rare metals were found in the investigation of the 11,249-ton Japanese ship.

NEWSLETTER DISCUSSES VISIT TO EC HEADQUARTERS

HK070523 Beijing RENMIN RIBAO in Chinese 27 Aug 80 p 7

[Newsletter from Belgium by Xin Shufan [6580 2885 5603]: "Advancing on the Road of Unity--A Visit to EC Headquarters"]

[Text] The EC headquarters is a modern X-shaped building located in the Rue de La Loi near the center of Brussels, capital of Belgium. In order to commemorate Robert Schuman, the proposer of the EC and former French foreign minister, people named the circle in front of the building after him.

As soon as this reporter arrived in Brussels, he managed to find time to visit the EC headquarters. During talks, people from the EC said to the reporter in a satisfied tone: "When economics is concerned, we have fulfilled three great tasks over the past 20 years. Despite the slow progress, there is no state or grouping in the world today that can do what we do."

First of all, the EC instituted a customs union. They practiced tariff unity outside the community and on the other hand, abolished mutual tariff inside it. They also instituted free circulation of capital, labor force and labor affairs, thus forming a united market.

Second, they fundamentally practiced a common agricultural policy. They unified the prices of principal agricultural products, achieved free circulation of agricultural products inside the community and set up common agricultural funds. The implementation of the common agricultural policy has played a very important role in the development of agriculture of the EC.

Third, after so much discussion and many setbacks over the past years, the "European monetary system" which is called the most important stage in the joint history of Western Europe was set up and made effective since last March.

Although this was my first visit to EC headquarters, their achievements in joint economy gave me a very deep impression: tariff-free commodites of EC member countries were found everywhere and enterprises and there were many shops run by West Germany, France, the United Kingdom, Italy and so on. People could enjoy the use of different consumer products from different countries. Citizens of EC member countries could freely enter or leave other member countries without a valid visa.

The economy of the EC has greatly developed since it has obtained great achievements in industry and agriculture and in currency links between these two. The gross national income of the nine countries in 1979 amounted to $2,380.4 billion, higher than that of the United States ($2,349 billion). The volume of foreign trade of the nine countries was nine times that of the Soviet Union and three times that of the United States. It is the greatest trade zone in the world.

Economic growth also raised the international status of the EC and greatly changed the setup of international relations. This enables the EC to play a more important role in maintaining peace and security in Europe and throughout the world. An important aim of these nine countries in their political coordination is to oppose the threat of hegemonism. This is the path that the EC has pursued over the past 20 years.

From the very beginning, the EC tended to oppose control and domination by the superpowers. As far back as in the period of drafting the treaty of Rome, members of the EC basically agreed to prepare for political alliance as soon as they reached a certain stage in economic unity. Due to different political situations and imbalance in economic development and in addition, misunderstanding between the nations created by history, a political alliance is still far from being achieved. However, political coordination has speeded up since Soviet hegemonism exerted threats and pressure on Western Europe and its periphery. Of course, there is bound to be some disharmony sometimes on the path of political coordination.

At the end of 1973, at a meeting of the heads of the nine EC member states, the "European identity" was declared. It soundly proposed that "Europe must gradually come to speak with a unanimous voice." At the 1974 meeting of the heads of the nine member states, the community decided, starting from 1975, to hold three meetings of heads of member states each year to strengthen political coordination and harmony in foreign policy. In the past few years, on a number of important foreign policy issues the nine states carried out discussion and consultation through the channel of political coordination, and publicized joint declarations.

It is worth pointing out that the EC not only has speeded up unity and coordination within Western Europe, but also gradually strengthened relations and coordination with the Third World. This is a positive factor in the current anti-hegemonic struggle. Currently, (Tone) chairman of the Council of Ministers of the community is visiting the Middle East on behalf of the community, aiming to make contributions on the Middle East issue.

Of course, all is not a bed of roses here. There are a lot of thistles and thorns facing the EC. The greatest problem of all is the economic problem. Jenkins, chairman of the community commission predicted at the beginning of the year that 1980 would be a "grim year" for the community. The materials that the community headquarters provided to this reporter indicated that in the wake of the acute economic recession in the United States, the member states of EC also faced difficulties in the first half of the year with demand reduced, industrial production stagnating or falling, inflation increasing and foreign trade deficit growing. On the whole, the number of unemployed now in Western Europe has reached its postwar peak. In the future, the EC will continue to slowly advance on the winding path of two high (high increase rate of commodity price and high rate of unemployment) and one low (low rate of economic growth).

CSO: 4005

ASEAN PRESS DISCUSSES UN SEAT FOR KAMPUCHEA

OW101849 Beijing XINHUA in English 1833 GMT 10 Sep 80

[Text] Hong Kong, September 19 (XINHUA)--Malaysian, Thai and Singapore newspapers carried editorials or articles recently calling on the international community to safeguard the legitimate seat of Democratic Kampuchea at the United Nations.

In an article on September 8, the Malaysian press SIN CHEW JIT POH said, to expel the delegation of Democratic Kampuchea from the United Nations would mean legalization of Hanoi's occupation of a neighbouring country or voting for any country to attack its neighbour whose policies it resents. "In the past, this behaviour was regarded as colonialism. At present, it is still colonialism," the paper added.

Another Malaysian paper SING PING YIT PAO, in an editorial on September, [as printed] pointed out if Viet Nam does not pull its troops from Kampuchea, the war in Kampuchea could not come to an end, there would be no political solution to the disputes in that country, no peace in Indochina and security of Thailand could hardly be guaranteed and the stability and neutrality of Southeast Asia might be undermined at any time.

Commenting on Hanoi's draft resolution on "Problem of Peace and Security in South East Asia," NANYANG SIANG PAU of Malaysia said in an article on September 7, Viet Nam attempts to mislead the public. Its purpose is obviously to legalize the reality in Kampuchea which it created by using force, thus setting up a mini East Europe in Indochina.

The article noted that since important principles in the international relations were involved in the Kampuchean issue, it is natural for the ASEAN countries to take a clear-cut stand on it. To accept a fait accompli was to connive at aggression. Therefore, the ASEAN countries must constantly state the facts, preventing people from being confused by Hanoi and the Soviet Union.

The Thai paper TONG HUA YIT PAO said in an editorial recently, to uphold the legal seat of Democratic Kampuchea at the U.N. is an act of fighting against hegemonist aggression and expansion and defending peace in South East Asia and of the world as well.

It pointed out that if the Soviet Union and Viet Nam succeed in their scheme to place the Heng Samrin regime in the U.N. it would encourage their hegemonist ambitions for expansion. This would not only set up a dangerous precedent by conniving at a foreign power defying international law and using force to shatter another country's independence and sovereignty. It also means tearing the U.N. Charter to pieces.

In an editorial on September 8, Singapore newspaper SIN CHEW JIT POH noted that at the current U.N. General Assembly session, to continue the fight against power politics and the Heng Samrin regime in its attempt to replace Democratic Kampuchea has become an "urgent diplomatic task" for the ASEAN countries.

It said so long as the friendly countries continue their support for the ASEAN's just position, as they did in the past, it is impossible for Hanoi to change the U.N. decision last year to keep the seat for Democratic Kampuchea.

CSO: 4020

JAPANESE ECONOMIC RELATIONS WITH ASEAN STATES REVIEWED

OW090222 Beijing XINHUA in English 0104 GMT 9 Sep 80

[Text] Hong Kong, September 7 (XINHUA)--The economic relations between the ASEAN states and Japan have rapidly developed in the past few years. Export of the ASEAN states to Japan increased to 16,300 million U.S. dollars in 1979 from 7,700 million in 1976, registering an annual increase of 30.1 per cent. Their import from Japan went up to 9,600 million U.S. dollars in 1979 from 6,100 million in 1976, averaging an annual growth of 16.4 per cent. Japan's investments in these countries, which stood at 4,300 million U.S. dollars in 1976, last year reached 6,100 million, accounting for 33 per cent of the total foreign investments in the region.

In the period of 1975-1979, the Japanese Government extended 2,000 million dollars in direct aid to these nations, which accounted for 34.1 per cent of its total economic aid for foreign countries.

Moreover, Japan and the ASEAN states have become political partners in what is noted as another salient point in their relationship. Since Viet Nam was condemned by the ASEAN states because of its occupation of Phnom Penh in January last year, Japan firmly supported the joint statement adopted by the special session of the ASEAN foreign ministers calling for the withdrawal of all foreign troops in Kampuchea. It wanted to see the earliest possible restoration of peace and stability in the region in accordance with the principles of national self-determination and noninterference in the internal affairs of other countries. At various international conferences, the Japanese Government invariably expressed support for the ASEAN's position on the Kampuchean issue and reaffirmed its recognition of the Government of Democratic Kampuchea. The recent Vietnamese invasion of Thailand was also sharply condemned by Japan, which has since been closely following developments in Southeast Asia and Kampuchea. More recently Japan has taken closer economic cooperation with the ASEAN states as a part of its overall security policy.

But relations between ASEAN and Japan are not void of disagreements. The ASEAN nations have complained about Japan's slow pace in developing economic cooperation. They demand the entry of more ASEAN products into

Japanese market and hope for more financial and technical aid from Japan. Some countries criticized Japan for being "too protective of itself" and "elusive in making concrete commitments" on certain major international issues. The ASEAN countries are also unhappy about Japan's conditional, "temporary halt" to economic aid to Viet Nam.

Nevertheless, ASEAN and Japan are working hard to develop their cooperation in view of their fundamental common interests.

Southeast Asia is important to Japan not only as a market, a raw material supplier and an area for investment, but also for the sea passage through the Strait of Malacca which is regarded as a "life line" to Japan's economy. Japan's 80 per cent of oil and 50 per cent of copper and iron have to be transported through the strait and it is imperative for Japan to defend peace and stability in Southeast Asia. ASEAN countries on their part also need Japan's economic aid and political support to speed up economic development and to upgrade their capability for regional defense in the presence of the threat of Soviet and Vietnamese aggression.

BRIEFS

TRADE UNIONISTS IN DENMARK--Copenhagen, 25 Aug (XINHUA)--A delegation of the All-China Federation of Trade Unions headed by its vice-chairman Kang Yonghe left here for home today after a 12-day friendly visit to Denmark. During their stay here, the Chinese guests met with Danish Minister of Labor Svend Auken, Minister of Education Dorte Bennedsen and Minister for Social Affairs Ritt Bjerregaaad as well as leaders of the Danish trade union on separate occasions. The Chinese trade union delegation studied the system of social insurance and vocational training in Denmark, visited public institutions and various vocational schools, some factories and workers' families. [Text] [OW301215 Beijing XINHUA in English 1510 GMT 25 Aug 80]

TURKISH ARMED FORCES DAY--Beijing, August 30 (XINHUA)--A reception in honour of Turkish Armed Forces Day was given here today by the Turkish military, naval and air attache, Colonel Ilhan Akoguz and Mrs. Akoguz. Among the guests were Liu Kai, assistant chief of general staff of the Chinese People's Liberation Army, Xi Mingde, deputy chief of staff of the Chinese P.L.A. naval forces, and Yang Fuzhen, deputy chief of staff of the Chinese P.L.A. air force. Military attaches of various embassies and other members of the diplomatic corps were present. [Text] [OW310524 Beijing XINHUA in English 1509 GMT 30 Aug 80]

JAPANESE DELEGATION IN NEI MONGGOL--At the invitation of the China-Japan Friendship Association, a nine-person Japanese goodwill delegation headed by the director of the Japan-China Friendship Alliance of (?Artisans) visited Nei Monggol 6 September in the company of (Xiao Luhua), member of the board of directors of the Chinese people's association for friendship with foreign countries. Kong Fei, chairman of the Nei Monggol regional people's government, hosted a banquet in honor of the delegation. Present on the occasion were (Jin Hailu), deputy secretary general of the regional people's government; (Wang Yumin), vice chairman of the foreign affairs office of the regional people's government; and (Zhang Changgong), deputy mayor of Hohhot Municipality. The delegation left Nei Monggol for Beijing 8 September. [SK111144 Nei Monggol Regional Service in Mandarin 1100 GMT 9 Sep 80]

RESHUFFLING OF GOVERNMENT OFFICIALS REPORTED

HK091147 Hong Kong HSIN WAN PAO in Chinese 8 Sep 80 p 4

[Unattributed "New Talk" Column: "Big Reshuffle in the Chinese State Council"]

[Text] The Chinese Government carried out an unprecedented big reshuffle this week. What made the reshuffle so unprecedented was that in the same government, the premier was changed, and seven vice premiers--nearly half of the total 18--resigned from their offices; while Vice Premier Zhao Ziyang was promoted to become the new premier.

The highest leaders of the State Council resigned from their offices for three reasons. Hua Guofeng resigned from his office as premier in order to implement the principle of division between the party and government and to concentrate his efforts on handling party affairs. Wang Renzhong resigned from his office as vice premier for the same reason. Vice premiers Deng Xiaoping, Li Xiannian, Chen Yun, Xu Xianqian and Wang Zhen resigned from their offices because they are all old. Their action broke the past traditional life-tenure of leading cadres. Chen Yonggui was removed from his office as vice premier by approval because he made a mistake. This has demonstrated that no matter how senior an official may be, whenever he makes a mistake and arouses people's indignation, he will be removed from office.

Therefore, the government reshuffle this time is not just a personnel change. In fact it has far-reaching significance and has carved a new road for the Chinese Government in realizing modernization. A new government which is capable, responsible, efficient and close to the masses will be formed.

In his resignation speech, Hua Guofeng put forward the grand goal of building an unprecedentedly superior government in history. At the same time, he also analyzed at great length the problem of bureaucratism and put forth specific methods of overcoming it, winning the applause by the people's delegates. This will certainly win praise throughout the country.

The personnel change in the State Council has demonstrated that the Chinese Government has actually decided to institute reform and to thoroughly eliminate bureaucratism. It is a difficult task which has never been achieved in the history of mankind. It certainly merits the concerted efforts of the people throughout the country. The progressive people throughout the world have actually placed their hope in its successful accomplishment.

NEED TO PUNISH EVIL-DOERS ASSOCIATED WITH JIANG QING EMPHASIZED

Beijing RENMIN RIBAO in Chinese 20 Aug 80 p 3

[Article by Wang Yongsheng [3769 1661 5116]: "On Being Strict or Lenient in Enforcing the Law"]

[Text] Newspapers have recently reported some court rulings on persons who were found guilty of violating party discipline and state laws, rulings which have received warm support from the masses. Commenting on these rulings, the masses have regarded some sentences as either too severe or too lenient. Some comrades who prefer laws that carry heavy penalties against crimes contend that too lenient sentences handed down by the courts may render the laws ineffective in preventing future crimes. Other comrades who advocate leniency in enforcing the laws and who are aware that our country has gone through a long period without any semblance of laws warned against any drastic changes in the enforcement of laws, arguing that too severe punishment of people may backfire by disrupting stability and unity.

I feel that the laws represent the will of the ruling class in society; before it is put into effect--no matter whether it carries heavy penalty or not--it should take into account the needs of society to maintain stability and progress. In Chinese history, as far as the enforcement of laws is concerned, severity has been alternated with leniency; debate over their merits has taken place on several occasions.

When Liu Bang, first emperor of the Han Dynasty, triumphantly entered Xianyang and overthrew the Qin Dynasty in the third century B.C., he promulgated a three-article provisional law stipulating: "Murderers shall be sentenced to death. Robbery and other offenses that inflict bodily injuries on persons shall be punished according to the law. All laws promulgated by the Qin Dynasty which carry death penalty against slanderers and their relatives and which stipulate public execution for rumor-mongers are henceforth declared null and void." This correct measure received a favorable response from the people immediately after its promulgation. In the years that followed, it also played an important role in defeating the enemy of the Han Dynasty and in unifying the country.

When Zhu Geliang [6175 5514 0081] helped Liu Bei establish a kingdom with Chengdu as its capital, he called for strict measures against offenses for the reason that the administration under the former ruler Liu Zhang was politically corrupt and was inept in enforcing the law. At that time, an important official named Fa Zheng [3127 2973] suggested to Zhu Geliang that "laws of leniency" be promulgated to placate and cheer up the suffering people just as Liu Bang had done before him. But Zhu Geliang turned down his suggestion following a thorough analysis of the two historical events--Liu Bang's triumphant entry to Xianyang and Liu Bei's conquest of Chengdu, pointing out: "If Liu Bang did not nullify the Qin Dynasty's laws deeply hated by the people for their harsh penalties and replaced it with his own laws of leniency, he would be unable to restore the normal life and to promote stability and the development of production in society. The State of Shu now faced a different situation. Under the prolonged rule of the former king, law and discipline had been neglected and there was no distinction between those meriting commendation and those deserving punishment. Consequently, a bad lifestyle prevailed over society. Only by strictly enforcing the law could the State of Shu bring about order across the land." Zhu Geliang strictly enforced the law and tallied his speeches with his actions. He never reneged on his word. Nor did he want to put himself above the law. For failing to defend Jieting, a strategic point guarding the State of Shu, he tearfully ordered a responsible general and his intimate aide Ma Shu [7456 6204] to be executed along with a self-denial request for his own demotion both in rank and position and for a cut in his pay. As a result of the implementation of these correct measures, the Kingdom of Shu soon became strong and prosperous again, thus forming a balance of power with two other kingdoms in China at that time.

Today, the problem we face is more complicated than at any time in history. When Lin Biao and the "gang of four" were in power, their critics, and writers opposing them were wrongly charged and sentenced to death. Some false charges even got their victims' relatives and friends involved and incriminated. While rehabilitating these victims, we must guard against the revival of such corporal punishment and torture as called for in the laws enforced by Lin Biao and the "gang of four," and must draw lessons from historical experiences so as to prevent the repetition of similar tragedy in the future. In dealing with the victimized persons, we must be lenient in enforcing the law. On the other hand, many people have committed crimes with the encouragement and connivance of Lin Biao and Jiang Qing and company. These serious offenders and evil-doers who once rode roughshod over others in their native places under the influence of Lin Biao and Jiang Qing and company still feel no regret and remorse even to date for what they have done. Severe punishment must be meted out to them within the framework of party discipline and the laws of the land. We must make public some typical criminal cases handled by the court. Only in this way can we educate the people and win their confidence in the integrity of our laws and discipline and inspire them to consciously and responsibly defend the socialist legal system and help those wrongdoers learn from their past mistakes in order to avoid the future ones and prevent others from offending the laws. This policy is essential to the maintenance of stability and unity in our country.

The people demand the socialist legal system under which laws will be continuously enacted and observed by the people and their offenders will be punished; all citizens including ordinary and leading cadres shall be dealt with according to the due process of the law once they are found guilty of crimes. Gone are the days when the officials stand above the law. Cadres, especially leading cadres, must accept the supervision of the masses. The legal concept of everyone being equal before the law should no longer be regarded as merely an empty slogan and should be applied to everyone in society. If every commanding general acts like Zhu Geliang who upheld the law by tearfully executing his beloved general, who else would dare disobey the law and abuse his authority?

GOVERNMENT OFFICIALS KANG SHIEN, CHEN YONGGUI CRITICIZED

HK110803 Hong Kong HSIN WAN PAO in Chinese 9 Oct 80 p 1

[Article by our reporter: "Kang Shien Has the Effrontery To Cover Up a Corrupt Official; Xia Yi Urges Dealing With Chen Yonggui According to Law"]

[Text] Xiong Fu, member of the CPPCC National Committee and former chief editor of HONGQI, accused vice premier of the State Council Kang Shien of covering up violations of law and discipline involving Yang Yibang, a vice minister of chemical industry (the Ministry of Chemical Industry was formerly known as the Ministry of Petrochemical Industry), in doing business with businessmen from Hong Kong. Many CPPCC members, who have been engaged in cultivating friendly relations with foreign countries, have also viewed the matter in an unfavorable light. According to informed sources, the matter was brought to light last year.

Xia Yi, a veteran writer and vice chairman of the All-China Literary Association, accused Chen Yonggui of squandering state funds in the region of tens of million yuan by unveiling a project for "shifting water from the west to the east," a project which was considered "false, big and empty." He insisted that Chen Yonggui be dealt with according to law. Since similar scandals have been found in various places, they merit our close attention.

Some people have pointed out that Chen Yonggui's son who often behaves outrageously has been nicknamed "Chen Yanei."

Cao Diou, widow of Kang Sheng, was castigated by those attending CPPCC's group discussions. Some people demanded that she be expelled from the NPC Standing Committee.

According to allegations, she is suspected of framing people. After her sister committed suicide, she immediately had more than 70 people arrested. She and Kang Sheng took possession of many cultural relics kept in the imperial museum, writing her own name on some of them. After Kang Sheng died, she did not vacate the houses she has occupied, nor has she returned quite a good number of rare Chinese classics. She has even damaged some of them.

Some NPC deputies and CPPCC delegates were not satisfied with the replies of Tang Ke, minister of metallurgical industry, with regard to problems of the Baoshan Iron and Steel Complex in Shanghai. His answers were considered irrelevant to the issues raised and were so ambiguous that they sounded unconvincing. According to Liu Jingfan, vice minister of civil affairs, the Baoshan complex is not close to either minerals sources, deep water harbors, coal or water sources. He said it is inconceivable that such a huge steel mill should have been constructed at all. He added that this project should have been put off until a later date.

Some people likened shipping minerals at high charges from areas outside Shanghai, which lacks mineral resources, to eating beancurd but paying the price of meat.

Aging and retiring Vice Premier of the State Council Xu Xiangqian said: Older people like us should step down to make way for younger people. Only by doing this can the leadership be strengthened and improved, collective efforts brought into play and the four modernizations achieved at an early date.

Wang Guangmei, widow of the late PRC Chairman Liu Shaoqi, believes that both the aged and the inept should be retired. Some cadres, she noted, are neither qualified nor morally acceptable and have not made meritorious contributions. She thinks such people should resolutely step down and be removed. The important thing, she said, is to promote talented and morally acceptable people and those having organizing ability, even though they are not party members, to be state cadres. Party members are not the only ones who should necessarily become government officials.

PERSONALITY CULT SYMBOL REMOVAL CRITICIZED

OW101720 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT
9 Sep 80

[Text] Four years have passed since the demise of Chairman Mao. Some earth-shaking events have taken place in China during these 4 years. Particularly since the latter half of this year, the entire nation has covertly or overtly criticized the mistakes committed by Chairman Mao. Chairman Mao's portraits, inscriptions and quotations, and monuments built in his memory, have been removed or torn down. Even Chairman Mao's remains stored in the Memorial Hall have not been properly taken care of by regular application of preservatives. As a result, there is a danger that Chairman Mao's remains may decompose. In view of this situation, his remains should no longer be kept in the Memorial Hall. They should be buried at the Babaoshan Cemetery or some other place.

The situation has changed. Four years ago, who could imagine what is happening today? Generally speaking, the people in China advocate the elimination of the symbols of the personal cult. The removal of these symbols would at least vent the resentment of the broad masses of China who have suffered so much during the past 20 years. However, we must always remember that to remove the symbols of the personal cult is only a way to remove something on the surface without touching the inside. So far as the whole party, the entire army and all the people in the nation are concerned, the real danger of the personal cult is that it leads to erroneous line. Therefore, the key does not lie in removing portraits and monuments. The main task is to totally abandon the erroneous line. However, very little has been done in this regard. Many signs in the party, in the army and in the country at present have substantiated that in certain fields, there have been some changes in implementing the line and policies, but in some other fields there are practically changes.

If we review the reports and resolutions of the recent NPC session objectively, we will find that there have been some real changes in certain fields, that efforts have been made to explore new ways of doing things, foster a new style of work and bring about a new spiritual outlook, and that progress has been made in these fields. However, in certain fields, the line remains the same. No one dares to tackle problems left over from the past. For many years there has been no progress in these fields where the pernicious influence of the old line still prevails.

In short, in many spheres there are practically no changes. The erroneous line, bad style of work and the spiritual shackles of the past still play the predominant role. These spheres at present are no better off than they were 4 years ago. The pernicious influence of the old line still stifles new, emerging things. If we speak more frankly about the dangerous nature of the personal cult, we should point out first that within our party there still exists a feudal, autocratic and patriarchal style of work. To eliminate all this, we still need to wage acute struggles to destroy the foundation of the personal cult. However, even at this date, we have just started to remove the symbols of personal cult. At the same time, there is already someone who tries to develop and consolidate the supreme power he has already seized and to revive the system of feudal, autocratic dictatorship.

Chairman Mao died 4 years ago, and his remains at the Memorial Hall have started to decompose. However, the pernicious influence of the old line still prevails and will continue to harm the whole party, the entire army and all the people in the country.

CRITICISM, SELF-CRITICISM MUST BE RESTORED

Chengdu SICHUAN RIBAO in Chinese 14 May 80 p 3

[Commentary by Chen Zhiyi [7115 1807 3015]: "A Communist Party Member Must Have the Courage To Criticize Erroneous Words and Deeds"]

[Text] To criticize erroneous thinking and a bad work style is the normal democratic life within the party and is an effective method of strengthening and improving the party's leadership and of increasing the party's fighting capacity. After the "gang of four" was smashed, and especially since the Third Plenum of the 11th Party Central Committee, our party's fine traditional style of criticism and self-criticism work has been basically restored. However, due to the serious havoc wreaked by Lin Biao and the "gang of four," our party has not recovered from damage suffered during the 10-year turmoil, and until now the phenomenon of having not the courage to criticize and of being afraid of ideological struggle is still relatively widespread in our party.

Why don't they have the courage to criticize erroneous thinking and bad trends, and the courage to engage in struggle? It is said that they are a bit afraid of something, and mainly they are afraid of offending the leadership, especially their immediate superior, lest they wear small shoes [to be admonished or punished later by that superior]. They are afraid of disclosing problems related to cadres on the same level, lest that affect their relationship. They are afraid of combating problems concerning old colleagues and old friends, lest they lose their friendship and injure personal fellings. We should know that to engage in revolution, we have to offend some people. For these people, criticizing their defects and mistakes means showing our concern about them and helping them. This is not a bad thing but a good thing. Every one of our Communist Party members must stand firm on our party's principles. He should criticize, with confidence in the strength of our being right, those works and deeds that are detrimental to the proletarian revolutionary cause. He should not be afraid of offending somebody, not be afraid of losing his friendship, and not be afraid of suffering any blow. Only in this way is it possible to overcome and correct various kinds of nonproletarian thinking within the party. Without criticism, without prohibition, and without struggle, it is likely that mistakes will expand, grow and spread, thus eroding the party's organization, damaging the party's prestige, and seriously weakening the party's fighting capacity. This would show that Communist Party members lack party spirit.

Comrade Liu Shaoqi pointed out in his book "On the Self-Cultivation of Communist Party Members: "It is not right to take a liberalistic and bureaucratic attitude toward various defects, mistakes, and bad phenomena within the party. We must expand criticism and self-criticism and conduct a correct struggle within the party so as to work against all the bad phenomena in the party and overcome differences within the party. Only in this way is it possible for the party to consolidate, expand, and progress." In order to pursue more thoroughly the spirit of the Fifth Plenum of the 11th Party Central Committee in building our party into a party which is full of vigor and vitality, has an upright work style, has a solid and strong organization, and is stern and impartial in discipline, forever maintaining the characteristics of an exemplary proletarian vanguard team, every Communist Party member must take up the courage to engage in an uncompromising struggle with all erroneous thinking and bad work styles. He should never adopt the liberalistic attitude of being wise enough for personal survival.

Certainly, the criticism that we advocate is a responsiblity of the party. An obligation for comrades, is beneficial, does not constitute irresponsible criticism and argument, and is not false or unrestrained criticism. Criticism of comrades who have made mistakes should follow the principles of "learning a lesson from the past and avoiding future mistakes," "curing illness and saving people from danger," and "unity--criticism--unity." It means being good to people and convincing people of what is right, thus attaining the purpose of clarifying thinking and uniting comrades. Such thinking as building up crimes, "ruthless struggle, and relentless blows" are the evil effect and influence of Lin Biao and the "gang of four," and should be thoroughly suppressed.

LESS PUBLICITY FOR INDIVIDUALS ADVOCATED

OW051255 Beijing XINHUA Domestic Service in Chinese 1132 GMT 4 Sep 80

[RENMIN RIBAO 4 September article by Yu Jinan: "Consciously Follow the Principle of 'Less Publicity for Individuals'"]

[Text] Beijing, 4 Sep--Recently the party Central Committee issued a directive on adhering to the principle of "less publicity for individuals" and laid down concrete stipulations. Our task is, on the basis of in-depth ideological education, to adopt positive and appropriate measures to get down to realities in conscientiously implementing the principle of "less publicity for individuals."

Since the 3d plenary session of the party's 11th Central Committee, through setting things right on the major issue of principle, "to give more praise to the worker-peasant-soldier masses, the party and the revolutionaries of the older generation and give less publicity to any individual," gradually there are more things propagating historical materialism; fewer things propagating historical idealism; more publicity for the achievements of workers, peasants and intellectuals in working for the four modernizations; and less publicity for the unimportant activities and speeches of individual leaders. The once prevailing situation of "giving prominence to individuals" has begun to change. However, we must also see the other side of the question. In activities commemorating proletarian revolutionaries of the older generation, too much prominence is still given to their individual roles and the approach is not realistic enough. The commemorative ways have seriously become mere formalities, to the extent that various forms of commemorative activities are held in the birthplaces of leaders who are still living, or in the schools where they once studied, places where they once worked or on articles they once used. These practices manifest a lack of political dignity. They not only cause extravagance and waste and alienate the masses, but in themselves are colored with the view that individuals are the makers of history. They are neither conducive to carrying out Marxist education inside and outside the party, nor are they helpful in eliminating the influences of feudal and bourgeois ideologies.

Why is it that the principle of "less publicity for individuals" still cannot be conscientiously implemented in some places and units? An important reason is that the influence of historical idealism "to give prominence to individuals" has not been eliminated. Our country came through several thousand years of feudal rule and more than 100 years of semifeudal and semicolonial rule, and feudal ideology is deep-rooted. Patriarchal ideology, the idea of imperial authority, the idea of religious authority and other pernicious feudalistic influences have seeped into the party and become a stubborn spiritual force. In addition, for years in the past, Lin Biao and the "gang of four," out of their counterrevolutionary needs, vigorously pushed a "deification movement" with ulterior motives. They described the revolutionary leader as an omniscient and omnipotent god, denied that the masses of the people are the makers of history and for a period indeed confused a considerable number of party members, cadres and the masses. People often unconsciously attribute all our victories and achievements to an individual and place all their hopes and their destiny on an individual, thereby magnifying the role of the individual.

Of course, Marxism never denied the historical role of great figures, and considered it a fairly big role. Without a number of the most influential and experienced leaders, it is impossible for the proletarian political party to lead the revolution and construction to victory. Mao Zedong, Zhou Enlai, Liu Shaoqi, Zhu De and other proletarian revolutionaries of the older generation made immortal contributions to the Chinese Communist Party, the Chinese people and the Chinese revolution. Making a realistic appraisal of them and conducting some appropriate and unexaggerated commemorative activities are necessary, both for historical studies and for educating future generations. But, if various forms are misused to improperly exaggerate the role of individuals, it will lead to the opposite. Is not the painful lesson in modern superstition vigorously pushed by Lin Biao and the "gang of four" deep enough? We must never again do such foolish things.

Some comrades do not support "giving prominence to individuals," but, when handling concrete issues, they often avoid expressing their attitude or turn the contradiction over to their superiors, for they are afraid that "accounts will be settled after the autumn harvest." Such thinking and misgivings are not without cause. When Lin Biao and the "gang of four" were on the rampage, whether or not one "gave prominence to individuals" was taken as one's "expression of political attitude." Those who did this vigorously could win such good names as "highly conscious," "closely following," "holding high," and so forth, and thereby make rapid advances in their careers. Those who were unwilling to do so could hardly escape being labeled "against the leader" to "counterrevolutionary" and subjected to attacks and persecution. Therefore, everyone feared for his own safety and was afraid to violate the "forbidden area." It was like people turning pale at the mere mention of the tiger. To thoroughly correct this kind of disgusting conduct which violates the guiding principles for inner-party political life is in itself meant to eliminate the pernicious influence of Lin Biao and the "gang of four."

Now, the "guiding principles for inner-party political life" has explicitly stipulated: "publicity in relation to leading members should be realistic and no unprincipled glorification of them is allowed. It is impermissible to praise leading members of the proletariat in the sycophantic terms used by the exploiting classes, nor is it permissible to distort history or cook up facts in publicizing the contributions of leading members. There should be no celebration of the birthdays of leading members, nor should they be sent gifts or congratulatory messages. No memorial hall should be built for any living person, and not too many such halls should be built for late leaders. Streets, places, enterprises or schools should not be named after leading members of the party. Except on diplomatic occasions, when a leader is away on official business it is forbidden to organize welcomes and send-offs, put up slogans, beat drums and gongs and hold banquets in his honor." Anyone who violates the above-mentioned stipulations and resists implementation of the principle of "less publicity for individuals" on the pretext of "expressing a political attitude" is not to be tolerated by party discipline. We must have the courage to take a clear-cut stand to oppose all words and deeds giving prominence to individuals.

Some people use their "profound proletarian feelings," as justification to argue for "giving prominence to individuals," as if "giving less publicity to individuals" means having no or very little "feelings." This is another manifestation that the influence of "deification of the individual" has not been eliminated. Communists never talk about feelings in abstract terms. They always place their proletarian feelings under Marxist principles, and do not substitute "feelings" for principles. If we accept the materialist conception of history, we certainly recognize that the victory and achievements of our country's revolution and construction should be attributed primarily to the hard struggle of the masses of people and the party's leadership, not to just one or several individuals. Obviously without the party organization, how could there be leading members of the party? Without hundreds of millions of unknown heroes, how could there be the few known heroes? The principle "to give more praise to the worker-peasant-soldier masses, the party and the revolutionaries of the older generation and give less publicity to any individual" put forward by our party exactly embodies this spirit. If we on the one hand loudly claim to ardently love the leaders and on the other hand look down on the masses of the people; pay no attention to the sufferings of the masses and do not even hesitate to pull down factories and people's homes in order to erect memorial halls, museums, pavillions and monuments and "give prominence to individuals," people will have reason to doubt if these are real proletarian feelings. It is understandable and beyond reproach if the vast numbers of party members, cadres and masses, out of their ardent love and memory for late leaders and revolutionary martyrs, call for some necessary memorial installations. On this question, the party principle is clear-cut: there should be such installations, and they should be well-kept. However, to ardently love and cherish the memory of leading members, the important things are not the formalities, but concrete actions. Through recalling and learning from the revolutionary thinking and revolutionary practice of the revolutionaries of the older generation to carry on the communist cause for which they fought all their lives and strive to make more contributions to the four modernizations--this is the most meaningful.

At present, to implement the party Central Committee's specific stipulations of "giving less publicity to any individual," it is necessary to vigorously carry out ideological education in historical materialism, do away with all kinds of ideological obstacles and create a new practice of consciously not giving prominence to individuals inside and outside the party. This is of great significance in improving democratic life in the party and the country and in speeding up the four modernizations program.

CADRES, PEOPLE ARE TO BE HELD EQUAL BEFORE THE LAW

Beijing GONGREN RIBAO in Chinese 23 Jul 80 p 5

[Article by Lawyer Ma Rongjie [7456 2837 2638]: "Cadres Who Break the Law Must Be Held Just as Guilty as the People"]

[Text] In order to earnestly protect the citizens' rights and legal benefits and to consolidate and expand the stable and unified political situation, it is necessary to strengthen democracy and the rule of law. Any citizen who commits a crime and breaks the law should be punished; everyone is supposed to be equal before the law; no special privileges should be permitted. Relevant organizations in certain places have taken inadequate measures with regard to cadres--especially leading cadres--who have broken the law and committed crimes. Some have received disciplinary action by the party instead of sanctions imposed by national laws, so as to evade public opinion. There have been some cases of tolerance and accomodation, with [cadres] pardoned and sheltered. This actually means that the cadres were protected as "special citizens." The result has been a very bad effect on upholding the benefits of all citizens and upholding the dignity and authority of the law.

There have been many cases which have showed that cadres who break the law are not held as guilty as the people. Li Lianfu [2621 6647 1381], vice secretary of the party committee of the Songshu town mine of the Tonghua Mining Bureau and concurrently director of the mine, and Li Yunsong [2621 0336 2646], assistant director of the mine, seriously violated rules and regulations by forcing the workers to take risks in their work; the result was a gas explosion accident, with 52 workers dead and 6 severely injured, and serious economic damage to the nation. For their grave responsibility for such an accident, the local court sentenced Li Lianfu to only 3 years' penal servitude and 4 years' probation, and Li Yusong to 2 years' penal servitude and 3 years' probation. From the investigative report of the accident by a GONGREN RIBAO reporter (see GONGREN RIBAO of 4 July) and the disclosures and petitions of the relatives of the victims (see GONGREN RIBAO of 14 July), it can be seen that the aftermath of this accident, in which many were killed or injured, was very serious, and the whole episode was very vicious. According to Article 114 of the criminal law, the sentence should be 3 to 7 years' penal servitude, with no conditions applicable to probation. Why did the court include a sentence of probation? In another place, a female worker was a boiler attendant, and because the boiler was old and in poor condition, and because she was negligent while she was on duty, an accident occurred with no casualties. But the female worker was sentenced to 8 years' penal servitude. By comparison, although the aftermath was serious in the first case, the sentence was rather light (probation), whereas in the second case, although the aftermath was far from being as serious as that of the first case, the sentence was heavy (8 years). Why? Is it because cadres were involved in the first case and a common worker in the second? If such is the case, how unequal it is before the law!

Wang Fu [3769 3940], vice chairman of the Yunnan Province's Trade Union and member of the party organization, beat up car driver Shu Tiancai [5289 1131 2088] of the same unit, causing a "traumatic puncture of the eardrum with a complication of deafening" in Shu's left ear. Wang Fu only received a serious admonition within the party (see GONGREN RIBAO of 16 May 1980). As stipulated in Article 134 of the criminal law: One who harms a person's body on purpose, resulting in a severe injury to the person, shall be sentenced to 3 to 7 years' penal servitude. Wang Fu showed off his power as a big official and fiercely slapped the face of driver Shu Tiancai, making Shu's "two ears thunder and two eyes blur" and resulting in a "punctured eardrum." Why was he not sentenced by criminal law? Somebody wondered how serious it would have been if it were the car driver who had beaten up the vice chairman of the Provincial Trade Union and deafened him. The sentence would have been from at least 3 years' to at most 7 years' penal servitude. This supposition has definite logic.

The above facts explain that some cadres of the party and political organizations do not have a strong conviction about the rule of law, are not clear enough about the principle that everybody is supposed to be equal before the law, and are intentionally or unintentionally partial to leading cadres, causing a very bad effect among the masses. It is only natural that some people have reflected: "A common people who breaks the law can never run away; a cadre who breaks the law will be bailed out by whatever authority." This is worthy of our deep thinking.

The fact that cadres who break the law cannot be held just as guilty as the people is due mainly to the evil effect and influence of feudalistic thinking. The idea of special privileges is still relatively serious among certain party and political cadres and judicial cadres, and thus the concept that everybody is supposed to be equal before the law is only a hollow slogan to them. The laws of our nation are designed to realize the will of the working class and the vast majority of the laboring people. All acts that damage the revolutionary rule of law, endanger the benefits of the laboring people, damage the socialist economic foundation, and harm productivity are acts that break the law and commit crimes. Violations of the law will be investigated. If a crime is committed, it will be punished no matter who committed it. Everybody is supposed to be equal before the law. This is the principle which must be observed by the various peoples of the whole nation, by all Communist Party members, and by all revolutionary cadres. It is the ideological weapon for opposing anyone who makes use of special privileges. For cadres who break the law not to be held as guilty as the people actually endangers the benefits of the whole people and especially endangers seriously the rights and legal benefits of victims in specific cases. Such a situation will not be trusted by the people. It will diminish the dignity and authority of the law, and directly affect the enthusiasm of the masses in engaging in the four modernizations with the same heart and the same mind.

Our nation is a nation in which the people are the masters of their own house. Each and every cadre is a public servant of the people, an orderly of the people, and also an ordinary person. They are not supposed to be granted any special privileges above the law. Party discipline cannot replace the laws of the nation. Criminal activities cannot be lessened or made exempt from judicial measures because of party disciplinary action. Chairman Ye Jianying pointed out at the Second Plenum of the Fifth National People's Congress: "The laws of the nation must be observed by everybody. All citizens, no matter whether they are within or outside the party, of the upper level or the lower level, whatever their social standing and social component, must be equal before the law. All legal acts will be protected by law, and all illegal acts will be investigated by law. Leading cadres at all levels, no matter how high their positions, are public servants of the people. They have only the obligation of earnestly and assiduously rendering service to the people. They will never be permitted to have special privileges above the law. Leading cadres among the Communist Party membership should particularly make themselves serve as examples to others, act as models in observing the laws of the nation, and accept the supervision of the masses." Every Communist Party member, every cadre of the nation, and especially the judicial cadres bear the heavy responsibility of upholding the law. They must suppress the evil effects and influence of feudalistic thinking, firmly establish the concept that everybody is supposed to be equal before the law, have a high political sense of responsibility, and be concerned about the sufferings of masses. They should think the masses thoughts and be concerned for the masses' concerns. They must uphold with an undaunted spirit the dignity of the socialist rule of law and work hard to earnestly protect the citizens' right and legal benefits, striving for the promotion and safeguarding of the construction of the four modernizations.

LEGAL STATUS, ROLE OF PROCURATORIAL ORGAN REVIEWED

Beijing FAXUE YANJIU [STUDIES IN LAW] in Chinese No 3, 23 Jun 80 pp 26-29

[Article by Zeng Longyao [2582 7893 6460]: "The Legal Status and Role of the Procuratorial Organ in Criminal Procedure"]

[Text] Article I of "The Organic Law of the People's Procuratorate of the People's Republic of China" examined and passed by the Second Session of the Fifth National People's Congress clearly stipulates: "The People's Procuratorate of the People's Republic of China is the organ of the state for legal supervision." It is through the prosecution of criminal cases that the procuratorial organ maintains the correct application of the law and the uniformity of the legal system of the state. When participating in criminal law procedure, the procuratorial organ takes Criminal Law and the Law of Criminal Procedure as its basis and, through its entire range of activities, strikes at the enemy, punishes criminal conduct, protects the people, strengthens the legal system, and protects the socialist revolution and the smooth progress of socialist construction work.

The functions and powers that the state confers on the procuratorial organ are important and extensive. Article III of our Law of Criminal Procedure stipulates: "In criminal cases...the approval, the arrest and prosecution (including investigation), and the indictment are the responsibility of the People's Procuratorate." In the conduct of criminal law procedure, the People's Procuratorate participates in the entire process of case establishment, investigation, indictment, trial, and ultimate adjudication and execution. At the same time, in order to carry out its function, the People's Procuratorate at different procedural stages of the litigation in a criminal case also participates respectively or concurrently with the status of investigator, state's prosecutor, and legal supervisor in the litigation. This is the characteristic by which a procuratorial organ differs from a public security organ and a people's court.

Carrying Out Investigation of Cases Directly Accepted; Conducting Supervision of Investigations

At the stage of investigative proceedings in criminal law procedure, the deputies of a procuratorial organ (abbreviated procuratorial personnel, hereafter) participate in litigation activities with the double status of investigative personnel and legal supervisors. Procuratorial personnel have the right to conduct an investigation and decide on an indictment in those cases which are directly accepted by a procuratorial organ for disposal; to conduct a supplementary investigation in cases which are under investigation by public security organs; to examine and decide according to law whether or not to approve the arrest of people whom public security organs have asked to be arrested in the course of the investigation of their cases; to examine and decide according to law whether to prosecute or to forgo prosecution in cases in which public security organs have concluded their investigation and which have been sent forward for prosecution; and also to decide whether, in their investigative activities, public security organs have violated the prescriptions of the law. Their specific functions and responsibilities are reflected in:

1. Conducting an investigation and deciding whether to prosecute in those cases which are directly accepted by a procuratorial organ for disposal.

Article XIII of our law of Criminal Procedure prescribes: "In cases of the crime of corruption, the crime of encroachment on citizens' democratic rights, the crime of dereliction of duty, and other cases which the People's procuratorate deems necessary for it to accept directly for disposal, the People's Procuratorate shall take such cases and decide whether or not to initiate indictment." That is to say, the procuratorial organ, upon receiving the accusations and charges with respect to the above-mentioned cases, should quickly conduct an examination; where it considers the facts of the crime to be present and the ascription of criminal responsibility necessary, it should immediately take on the case and carry out, according to the prescriptions of the law, the questioning of the defendant, the consulting of witnesses, searching, detaining, examination, arrest, and relevant investigative activities. When the facts of the crime have been clearly investigated and the criminal responsibility of the defendant is to be scrutinized according to a sure recognition on the basis of the provisions of the law, an indictment should then be drafted and submitted to the people's court which has relevant jurisdiction. If the defendant's conduct does not constitute a crime, or even if it constitutes a crime but conforms to conditions exempting it from prosecution and punishment according to Provisions of the law, so that an adjudication according to party discipline or government discipline needs to be administered, he should then be turned over to the party's discipline inspection department or government department for disposal.

The fact that the law provides for the above-mentioned cases to be handled directly by a procuratorial organ is closely related to the nature of the latter's function of legal supervision. According to the stipulations of our Law of Criminal Procedure, the investigation of most criminal cases is to be conducted by public security organs, but because the crime of corruption, the crime of encroachment on citizen's democratic rights, and the crime of dereliction of duty are all crimes committed by working personnel of the state or collective units who take advantage of the convenience of their offices, and because the procuratorial organ "exercises procuratorial authority to ensure observance of the Constitution and the law by state organs, working personnel of state organs, and citizens" (Article 43 of the Constitution) and is thus responsible for conducting a struggle against illegal and undisciplined behavior and for carrying out legal and disciplinary porsecution and economic prosecution, it is very necessary for the strenghening of the socialist legal system and defense promotion of the four modernizations to struggle, through the handling of such cases against misuse of office, serious misdeameanors, and especially certain individual privileges, to genuinely protect citizens' legitimate rights and interests and the interests of the state and the collectives from encroachment.

2. Examining and Approving Arrests

According to the provisions of the law, in cases under investigation by public security organs, whether the adoption of the coercive measure of arresting a defendant is required, a submission must be made to have the people's procuratorate conduct an examination and decide whether the arrest is to be made. In this process of carrying out the criminal law procedure, after the procuratorial organ receives from the public security organ the case in which the arrest of criminal personnel is to be approved, it must seriously proceed to carry out an examination, following the strict legal provisions regarding the conditions and time limits concerning the arrest of such personnel, and render a decision of approval or disapproval of arrest or return the case to the public security organ for additional investigation. For a case which requires additional investigation, the procuratorial organ itself may conduct such additional investigation.

Examining and approving arrests is an important work of the procuratorial organ in the activities of carrying out the criminal law procedure. The execution of arrest of persons in criminal law procedure is a limitation of personal freedom applied against the persons whose main facts of crime have already been clearly investigated, who are likely to receive a sentence of imprisonment or greater, and whose arrest is necessary. Arrest is only one coercive measure and not the only coercive measure; nor is it a required process in litigation as prescribed by law. Its purpose is to prevent persons matching the above-stated conditions from escaping investigation, destroying criminal evidence, fabricating proofs, and committing new crimes, as well as the occurrence of unexpected incidents. Meanwhile, in the early stage of investigation in the criminal law procedure, it is still impossible to affirm the defendant's crime. It is a very complicated task to struggle against crimes, and hence it is necessary to guard against making mistakes and injuring the innocent. Therefore, when a decision on the application of the coercive measure of arresting a person is to be made, strict control and great caution are necessary. From this, we can see that the meaning of the procuratorial organ's work on examining and approving arrest is, on the one hand, to adopt the necessary coercive measure against a defendant whose conditions of arrest match the legal provisions, to combat criminal activities in a timely manner, and to ensure the smooth progress of continued, deepening investigation of the case in question; and, on the other hand, to prevent the possible arrest of a person whose conditions are at variance with the provisions of the law, to avoid making an arrest which should not have been made, and hence to allow neither injustice nor permissiveness. Through such work of examining and approving arrests, it is also possible to discover other possible practices in violation of legal porvisions and thereby afford timely rectification and protect the defendant's rights in the litigation accordingly.

3. Submitting Indictment

Indictment is a litigation submitted to the people's court by the procuratorial organ as the state prosecutor; it is the result of the procuratorial organ's examination of a complaint. Article XCV of the Law of Criminal Procedure provides: "All cases requiring indictment or exemption from prosecution are determined through examination by the people's procuratorate." This provision explains that all cases of indictment--except for cases which are accepted only when complaints are registered according to relevant provisions of the law, and except for light criminal cases which require no investigation so that, as self-initiated cases under such circumstances, they are brought about by the plaintiffs themselves and directly accepted by people's courts for disposal--all other criminal cases, at the conclusion of investigation by public security organs, must be transmitted to the people's procuratorate for examination and a decision on whether to indict or to exempt from prosecution. The people's procuratorate is the only organ which exercises the indictment authority prescribed by the law.

In the process of submitting an indictment, the people's procuratorate must first of all conduct its work of examining for possible prosecution those cases that the public security organs have finished investigating and sent forward for prosecution. In doing so, the people's procuratorate proceeds, on the basis of its status as legal supervisor, to follow legal provisions and to decide, in the cases thus forwarded, whether the facts and situations concerning the defendant's alleged crime are clear, whether the proofs are genuine and sufficient, whether the determination of criminality and crime is correct, whether or not criminal responsibility should be scrutinized, whether there are any overlooked crimes or other persons whose criminal responsibilities should also be scrutinized, whether there are any attendant civil procedures involved, whether or not there have been any violations of legal provisions during the investigation of the cases. On the basis of the results of such examination, the following decisions are respectively made: where facts concerning the defendant's crime are already clearly investigated, proofs are genuine and sufficient, and criminal responsibility should be scrutinized according to law, a decision to prosecute must be made, an indictment must be drafted, and the defendant must be sent for trial to the people's court which has relevant jurisdiction; where the defendant's conduct constitutes a crime but there is a situation which, according to the provisions of Criminal Law, is exempt from punishment, a decision to exempt from prosecution must be made; and where the defendant's conduct does not constitute a crime, or even though it does so but the law provides that his criminal responsibility should not be scrutinized, a decision not to prosecute must be made. When supplemental investigation is found to be necessary in the course of the examination, the people's procuratorate may conduct such supplemental investigation itself or make a decision to require supplemental investigation and return the case to the public security organ to carry it out.

The work of the people's procuratorate in deciding on prosecution occupies an important place in criminal law procedure. In contrast to its work in examining and approving arrests, its task, in addition to concluding the investigation of a case, is to make certain substantive decisions and thereby to give full scope to the procuratorial organ's function in legal supervision and to assure the correct, thorough execution of pertinent provisions of Criminal Law. These decisions are mainly reflected as follows: (1) through a comprehensive examination of the facts and proofs concerning the defendant's crime, the making of a legal determination as to crime or no crime, light crime or heavy crime, and the nature and designation of the crime; (2) with respect to the defendant in a case in which a decision is made to indict, his transmission for trial, so that due legal punishment is meted out to him; (3) with respect to cases in which a decision of no prosecution or exemption from prosecution is made, the termination of proceedings in order to demonstrate the policy and legal spirit of combining varied treatment, punishment with leniency, and protection of citizens' legitimate rights and interests; and (4) where unmistakable violations of the law are discovered in the investigative activity, and the quality of the case is thus affected, the rendering of a corresponding decision so as to maintain the solemnity of the legal system.

The work of the people's procuratorate in examining and approving arrests and deciding on prosecution must be carried out according to the principle of taking facts as the basis and the law as the norm. The facts concerning a crime are the objective basis for ascribing and punishing that crime. Sufficient facts and reliable proofs must be obtained in the determination of a defendant's crime. At the same time, the [procuratorate] must also abide by the provisions of Criminal Law and the Law of Criminal Procedure to make a decision on adopting the coercive measure of arrest and ascription of criminal responsibility with respect to any defendant. For this reason, in the course of its work in examining and approving arrests and deciding on prosecution, the people's procuratorate should actively carry out a series of activities such as questioning the defendant, consulting with witnesses, conducting a practical investigation, verifying proofs, and conducting a supplemental investigation in the face of a part or a large part of the facts concerning the crime, etc., and not just passively "examine the data," and still less merely handle the legal procedures. Meanwhile, in its handling of the approval of arrests and cases of prosecution, the procuratorial organ implements a system of having experts look at the files, conducting collective study, and seeking the ultimate approval of the procurator; major cases must be determined through discussion by the procuratorial committee. Cases of approval of arrests and of prosecution are handled separately. With respect to cases of approval of arrests, after a determination is made by the procuratorate at the basic level, the system of submitting it to the procuratorate at a higher level for reference and examination is also practised. It is through such measures, which have been applied with results, that the quality of the cases is assured.

Attending Court Sessions in Support of Indictment; Carrying Out Trial Supervision

Whenever criminal cases enter the stage of trial in process--except when the defendants' crimes happen to be relatively light and, with the consent of the people's courts, procuratorial organs may not have to attend the court sessions--they should send personnel to attend the court. Procuratorial personnel attending the court have a dual task--i.e., to support indictment, on the basis of their status as prosecutors of the state; and to carry out supervision as to the legality of the trial activities in progress, on the basis of their status as legal supervisors.

The main tasks of procuratorial personnel attending the court in support of indictment are: by reading the indictment and, with the permission of the trial judge, questioning the defendant, by consulting with witnesses, by submitting proofs, and by elaborating on the indictment and debating with the defendant, to expose and prove the defendant's criminal act from facts, proofs, and legal bases, to analyze and point out the essence of his criminal act and its consequences and social harm, and to indicate due legal responsibility, so as to have [the crime] duly punished by law and thereby to maintain the legal system and protect the interests of the state and the people from encroachment. Supporting an indictment and submitting an indictment are mutually related, yet are different from each other. Submitting an indictment is the premise and basis for supporting an indictment; supporting an indictment is the continuation and development of the submission of an indictment. The two are consecutive and at the same time are procedural activities in two different procedural stages of the procuratorial organ and have different contents. As has been stated above, submission of an indictment occurs when the procuratorial organ, at the stage of indictment before a case is tried by a court in open session, and through its work on the examination of prosecution, submits a complaint to the people's court and turns the defendant over to the court for trial; support of an indictment occurs when the people's court decides to hold a session to try the case--i.e., when the case enters the stage of trial in process, procuratorial personnel attend the court to read the indictment, elaborate on the indictment, and carry out relevant activities so as to defend and support the indictment submitted by the procuratorial organ and have the case correctly abjudicated.

The duties of the procuratorate in trial supervision are reflected in its: (1) carrying out supervision as to whether a court's trial activities are in accord with the provisions of legal procedure and, when encroachment of the defendant's procedural rights and similar situations are discovered, proffering rectification; (2) submitting a protest in accordance with procedures on the appeal of a trial--that is, in case the sentence or abjudication of the case in the first trial is considered erroneous with respect to the determination of facts or the application of law, submitting a protest to the superior court of the court of the original trial within the time limit for appeal as provided by law; (3) submitting a protest according to procedures on trial supervision--that is, submitting a protest when a sentence or adjudication of the people's court which is already legally in effect is discovered to be genuinely in error; this kind of protest is not subject to any time limit, but such power is exercised only by a superior people's procuratorate limit, but such power is exercised only by a superior people's procuratorate in relation to a lower people's court, or by the Supreme People's Procuratorate in relation to the people's courts at all levels.

In all cases against which the procuratorial organ submits a protest according to procedures for appeal against a preliminary trial or procedures on trial supervision, it must send personnel to attend the court. The difference in practice from their attendance at the court of first trial is that, because the submission of a protest only determines an error in the senence of the people's court, the attendance of procuratorial personnel at the court this time no longer carries the task of indictment but only serves to exercise their legal supervisory duties as representatives of the procuratorial organ, and to express an opinion of protest concerning the discrepancy recognized with regard to the facts of the crime or to misapplication of the law, so that, through a retrial by the people's court, the case can be given a correct sentence. With respect to a second trial resulting from an appeal by the defendant himself, the procuratorial personnel attending the court still have the dual task of supporting the indictment and exercising trial supervision. This is because, although the process of the first trial has already been concluded, the trial of the case must proceed because of the defendant's appeal, and therefore the task of indictment on the part of the procuratorial organ is still not complete and hence requires continued attendance at the court to support the indictment (e.g., by refuting the defendant's reasons for submitting his appeal according to facts and the law, etc.) and to uphold the sentence of the original trial. Of course, if there are sound bases and pertinent reasons for the defendant to submit his appeal, the procuratorial personnel must change the prosecution of the original case in part or totally.

Supervising Execution of Sentence and Adjudication, Carrying Out Inspection of Prisons and Detention Centers

In criminal proceedings, the last procedure is the execution of sentence and adjudication taking legal effect. At the stage when this procedure is executed, the people's court turns its sentence or adjudication over to the executive organ--supervisory or labor reform unit--to administer. The executive organ carries it out in its entirety according to law and on the basis on the content of the sentence or adjudication. To carry out this executive work in a down-to-earth way is of great significance to the final completion of the tasks of the criminal proceedings. Moreover, only by guaranteeing the correct, timely, and complete execution of the sentence and adjudication can the solemnity of the law be exemplified and the goal of effective punishment and reform of the criminal be attained. For this reason, Article CLXIV of the Law of Criminal Procedure provides: "The people's procuratorate exercises supervision over the legality of activities of prisons, detention centers, and labor reform units. If illegal situations are discovered, executive organs should be notified so that these may be corrected."

At this procedural stage, the procuratorate proceeds to fulfill its legal supervision duties in two aspects.

One aspect is to supervise and inspect conditions surrounding the execution of sentence and adjudication of criminal cases and, when illegal situations are discovered, to proffer correction. The main activities in this regard are: with respect to a criminal given death penalty which is to be immediately carried out, to send, as it should, personnel to the execution ground to supervise; through the inspection of prisons, detention centers, and labor reform organs, to ascertain whether, with respect to criminals given the death penalty which is to be carried out only after a delay of 2 years, or given various terms of imprisonment or other punishment, the criminals are turned over to labor reform units within legally prescribed time limits and procedures, or their sentence and adjudication are carried out in other manners; to ascertain also, with respect to criminals who receive a verdict of not guilty or who are exempt from punishment, whether to have those free of guilt or exempt from punishment immediately released; and likewise to consider, with respect to criminals whose period of punishment is up, whether to have them released in a timely manner or to have their punishment canceled altogether.

The second aspect is to carry out inspections as to the legality of activities at detention centers, prisons, and labor reform units (this is the people's procuratorate's prison and detention center inspection work). As everyone knows, our socialist legal system does not just mete out punishment to the criminal elements but places even greater emphasis on the application of labor reform, so as to transform the segment of forces harmful to society into forces useful to society, and to turn negative factors into positive factors. This is the characteristic of our socialist legal system, and also our experience in achieving great successes. Therefore, from the standpoint of criminal litigation procedures, the execution of a sentence indicates the conclusion of litigation activities. However, a definite period of punishment is to be enforced in the case of criminals given penalties other than the death penalty which is to be immediately carried out. Furthermore, there is always the process of adopting correct principles, policies, and methods to apply labor reform, management, and education to them in order to enable them to turn away from evil and toward good, and to change into new persons with definite labor talents. In this sense, the execution of a sentence is also the beginning of the work of transforming criminals and of inspecting procuratorial organ's prison and detention centers.

When the procuratorial organ inspects the prisons and detention centers, its overall task is to protect the correct execution of the state's policies and laws concerning the transformation of criminals, and its goal is to better promote the transformation of those criminals. In prison and detention center inspection work, some procuratorial organs are still likely to encounter litigation problems; this part of their work belongs to the realm of criminal law procedure and needs to be solved according to the processes of such procedure. For instance, in the case of criminals committing additional crimes during the period when they are serving their sentences, or in the case of discovery of crimes that had not been discovered when the criminals started serving their present sentences, there would be a need for the procuratorial organ to carry out an investigation and submit an indictment. In the case of errors being discovered in the original sentences, then procedures of trial supervision should be followed in the submission of protests. Another aspect of prison and detention center inspection work does not touch on litigation problems but belongs in the realm of correcting law violations--such as inspecting detention centers, prisons, and labor reform units to see whether they have correctly carried out the principles and policies concerning the transformation of criminals, whether they have mistreated or abused prisoners, etc. If problems are found, corrections must be proposed so as to promote the work of transforming the criminals.

To sum up all the above, the people's procuratorate follows the provisions of Criminal Law and the Law of Criminal Procedure, accurately examines the facts concerning crimes, correctly applies the law, effectively punishes the criminals and transforms the criminals, protects citizens' personal rights and democratic rights from encroachment, and guarantees the legitimate rights and interests of the participants in litigation. Therefore it occupies an important place in criminal law procedure. We must do a good job of summing up and improving our procuratorial work from our business paractices or legal theories, in order to have our procuratorial system develop increasingly toward perfection and give better scope to the function that it should perform in criminal proceedings.

JIANGSU PARTY OFFICIAL ASKS OLD CADRES TO STEP ASIDE

Nanjing XINHUA RIBAO in Chinese 10 Jul 80 p 1

[Article: "Jiangsu Province Selects Leaders Among Young and Middle-Age Cadres"]

[Text] At a meeting of secretaries of district and municipal committees, department heads of party organizations, and cadres at the provincial level or above, Comrade Xu Jiatun [6079 1367 1470] pointed out the following: In order to accelerate and guarantee the success of the four modernizations, bold efforts must be made to select and recruit distinguished young and middle-age cadres who have the correct political ideology, expertise in specialized knowledge, and growth potential. They should be given responsible positions which enable them to make decisions and to develop their talents and abilities.

From 21 June to 1 July,the provincial party committee convened a meeting on personnel reorganization. Secretaries of district and municipal committees, deputy secretaries of divisional organizations, department heads of party organizations, and cadres at the provincial level or above participated in the meeting and heard related reports. Responsible organization comrades on the provincial committee related the purpose and spirit of the Party Central Committee at the meeting. At the beginning and end of the meeting, Comrade Xu Jiatun delivered a speech. Comrades who participated in the meeting held discussions and studied the issues.

Comrade Xu Jiatun mentioned in his speech that, over the past 3 years since the smashing of the "gang of four," we have achieved a great deal of objectives and made a lot of contributions in organizational work. However, with regard to the first 2 years of our efforts toward realizing the four modernizations, our organizational work has not been appropriate. The composition and structure of our cadre system, especially the nature of our leadership, are unsuited to the tasks of the four modernizations. According to Comrade Xu, the average age of many of the leaders in charge of the four modernizations is still high, their level of education is low, and few of them have expertise in specialized knowledge. In order to accelerate and guarantee the success of the four modernizations, efforts should be made to reorganize the leadership. New viewpoints and standards should be adopted for leadership reorganization. Strong, distinguished, young and middle-age cadres who have the correct ideology, leadership talents, and expertise in specialized knowledge should be boldly selected and recruited to handle responsible positions. We should continue to eliminate the poisonous remanents of the leftist line of Lin Biao and the "gang of four" and insist on considering intellectuals as a major force in the four modernizations--a force which the party can rely on and which is part of our country's leadership. Intellectuals who have leadership talents should be boldly selected and recruited for responsible positions. Cadres with peasant and factory backgrounds as well as cadres from educated families are equally precious property of the party and the state. Workers, peasants, and intellectuals alike are the masters of our state and our socialist system, and they are the major force in our efforts to realize the four modernizations. We need their cooperation and close alliance in order to succeed in our efforts to fulfill the tasks of the four modernizations.

Comrade Xu Jiatun stressed that the use of educational criteria in the selection of cadres not only will influence the activism of workers and peasants but also will encourage the whole people to diligently study scientific and cultural knowledge. The latter will raise the level of scientific knowledge and education of the entire body of cadres and the whole people. Some comrades wonder whether young cadres and cadres with specialized expertise can handle leadership responsibilities. Examples in some places have shown that they are able to handle responsible positions. They can shoulder important duties, and they can do a good job. Of course, it is possible that some of the young cadres are lacking in experience and organizational abilities when they first start work. But this is not crucial. Generally speaking, a person has to go through a transition period when he is promoted from a lower position to a higher position. We need to acknowledge the necessity of a transition period. Meanwhile, we should adopt a positive attitude and give them appropriate support. When young cadres start work in their new positions, people tend to use high standards and various angles to evaluate them, and they often find more problems than if they do not adopt such an attitude. Therefore, in selecting distinguished young and middle-age cadres, we should uphold the three conditions suggested by Comrade Ye Jianying in conjunction with age and education criteria. We should focus on their major role and growth potential and not find fault with them for not being perfect. In considering their age and expertise, we should not overlook their political attitude. In order to maintain ideological purity among leaders, we must admonish cadres whose ideological orientation is incorrect, who are at odds with the party or resist the party's lines, goals, and policies, and who insist on fostering factionalism, breaking rules, and committing offenses.

There are also some comrades who do not have an adequate understanding of the issue of leadership reorganization and its implications and urgency. This is particularly true today. Quite a few of our veteran cadres are in their late years. We cannot resist nature. If we do not make use of the valuable time of the old cadres, when they are still healthy, to resolve the issue of leadership succession and related problems, we will ruin an important task. We must make use of this time to come to grips with the task because we can ensure, through leadership reorganization, the continuity of the party's ideology and the state as a whole.

Personnel reorganization is related to the question of transition and leadership succession. It involves reforming the structure of our cadre system, particularly those cadres who will be leaders in the four modernizations. It is a strategic measure applied by means of personnel reorganization for the maintenance of a correct political ideology. Therefore, our planning must be comprehensive, practical, meticulous, and efficacious. The task of selecting a large group of young and middle-age cadres is important and most urgent. The fundamental issue of personnel reorganization is that of succession. Our emphasis should be on boldly selecting and training distinguished young and middle-age cadres. From now on, this task should be performed systematically and according to plans. Cadres who possess the right credentials and growth potential should be considered for promotion, and the process should be continuous and systematic. Party committee members should pay special attention to training and educating young and middle-age cadres. They must employ all possible means and avenues to do a good job.

Comrade Xu Jiatun also stressed that accommodating the large number of old and weak cadres is a positive and long-range measure of the party during the new period, and an important cadre policy that has to be adopted on a long-term basis. Our province has relatively more old cadres than do other provinces. In the course of their long-continued and loyal service for the sake of the revolution, these old cadres have worked very hard to make contributions to the party and the people. They have accumulated a great deal of experience. They are the precious property of the party, the core leaders of our organizations, and the pioneers of the four modernizations. However, our old cadres are advanced in years and their energies are limited. If they stay on the front line, they may have difficulties in carrying out their complicated and heavy duties in the same way as they did in the past. We have to examine their individual situations and make proper accommodation for old and weak cadres so that we can utilize their positive role. Many of our old cadres are experienced and skilled. If they do not hold leadership positions, they can review the successes and failures of the history of the party and conduct comprehensive research. They can write books or express their opinions on major issues pertaining to the development of our situation. We should respett them politically and take good care of them materially. When we talk about the role of old cadres in facilitating leadership succession, we refer not only to a few individuals but to the entire new generation. Only by so doing can we really pay them the respect they deserve. All party organizations and units should make proper and practical arrangements for the material welfare of old cadres.

According to Comrade Xu Jiatun, we should resolutely, actively, and boldly put into practice our task of reorganizing and building a new leadership, but the task should be performed realistically, systematically, and in a concrete way according to plan. This is a policy based on a positive attitude and pragmatic measures. On the one hand, the result of our work is to ensure political stability and unity with a view to mobilizing the enthusiasm of various sectors, and on the other hand it is to meet the demands of the Party Central Committee for proper personnel management suited to the needs of the four modernizations. For this purpose, we must grasp the following tasks: First, we must widely launch propaganda in this regard in order to actively change the mentality of people. Second, we must strengthen the work of investigating the nature of our task. Third, we must base our plans on a clear understanding of current conditions. Fourth, we must follow the mass line. We must adopt the method of integrating leadership with the masses, and let the masses know about and discuss our needs for leadership reorganization and related goals. Based on the opinions of the masses, the relevant party organizations should conduct investigations, and the party committees will collectively discuss issues and make decisions.

PARTY AND STATE

COUNTY PARTY SECRETARY IN JIANGSU OFFERS RESIGNATION

Voluntary Resignation

Nanjing XINHUA RIBAO in Chinese 10 Jul 80 p 1

[Article by Cheng Jingming [4453 2533 2494]: "Jiangsu Permits County Party Secretary To Turn Over Post to Younger, Stronger Cadre"]

[Text] Haian County Party Committee Secretary Comrade Yuan Guangwen [5913 1684 2429] wrote a letter on 8 June to the provincial party committee voluntarily requesting resignation from his position. The provincial party committee recently granted him his request, allowing him to resign from his position as Haian County party committee secretary and chairman of the county revolutionary committee.

After the Fifth Plenary Session of the 11th Party Central Committee, Comrade Yuan told responsible comrades on the Nantong District Party Committee that he planned not to serve any longer as county party committee secretary, so that he could let a younger and stronger comrade to take over his responsibilities. In his letter of 8 June addressed to the provincial party committee, he wrote: "I totally support the spirit of the Fifth Plenary Session of the 11th Party Central Committee. To be practical, there should be young and strong leaders on the county party committee who can shoulder the demanding tasks of the four modernizations. I am now 62 years old, and sometimes I feel unable to handle my duties. I voluntarily resign from my position on the county party committee to show that I am a good Communist Party member and continue my struggle for the sake of the party and the revolution." In a speech on 28 June at a meeting of organization leaders and secretaries of district and municipal committees, Comrade Xu Jiatun [6079 1367 1470] highly commended the action of Comrade Yuan Guangwen. He said that Comrade Yuan, Haian County party secretary, was a veteran of the revolution who was diligent at his work, strict with himself, supportive and exemplary of the fine traditions and character of the party,and highly praised by cadres and the masses. Comrade Xu Jiatun pointed out that old comrades like Yuan care for the good of the public, and, for the sake of the party and the people, have voluntarily submitted requests to "relinquish their positions to talented young people," and retreat to the second or third front. In so doing, they have expressed their noble spirit and lofty revolutionary character.

Comrade Yuan Guangwen was born in Rugao County. He joined the revolution in 1943 and the party in the same year. In the course of the resistance against the Japanese and during the civil war, he made many contributions in the name of the revolution, and at risk of death. During the 1950's and the 1960's, Comrade Yuan Guangwen served on the party committee of Haian County and as county magistrate. After the "gang of four" was smashed, he served as deputy secretary, secretary, deputy chairman, and chairman of the county revolutionary committee. During his tenure on the committee, Comrade Yuan Guangwen was a serious and responsible worker. His style was meticulous, and he worked very hard for the revolution and for economic construction in Haian County. This is particularly true with regard to his support of the fine traditions of the party. He maintained a simple living while working very hard. He cared for the people and never attempted to assume special privileges. He has left a deep impression among the overwhelming majority of cadres and the masses.

Action Praised

Nanjing XINHUA RIBAO in Chinese 10 Jul 80 p 1

[Article: "A Noble Revolutionary Stand"]

[Text] "Struggle forever for the sake of communism!" This is the oath of our Communist Party members. In the course of long-continued struggles, many of our old comrades have fought relentlessly for the party and at the risk of death. It is with such an altruistic spirit that they have faithfully performed what they swore when they joined the party and in the course of revolutionary work.

Everybody knows that communism as a noble goal depends for success on the hard work of many generations and not just one or two generations of people. Therefore, our experienced and farsighted old comrades feel deeply that in order to ensure the continuous development of the tasks of the party, they need to think of the whole situation, look at matters from a broad perspective, and resolve the task of leadership succession in a timely fashion. The farsighted leaders on the Party Central Committee have built their sincere hopes upon the whole party, especially the old comrades, pointing out that the task ahead is a solemn historical responsibility. Like other old comrades, Haian County Party Committee Secretary Yuan Guangwen [5913 1684 2429] showed exactly this kind of lofty communist sense of responsibility. For the sake of the four modernizations and the long-term benefit of the party, he expressed to the party his intention to retreat to the second front so that young. energetic, and distinguished young and middle-age cadres can take over leadership positions and shoulder more important tasks. He also expressed to the party that he would continue to struggle for the sake of the revolution for the rest of his precious lifetime, and to be a qualified Communist Party member. Their devotion to the party and the people, expressed in limitless magnanimity, is a reflection of all the people, expressed in limitless magnanimity, is a reflection of the very precious revolutionary spirit of old cadres.

Cadres are the treasure of the party and the state, and experienced old cadres are particularly precious. After accommodating them on the second front, all party organizations should consider the specific conditions of individual old cadres in order to develop their positive role, so that the experience they have accumulated over the years, as well as their fine traditions, can be passed along and propagated. This is particularly the case with regard to old cadres who have rich experiences in leadership roles. After they relinquish the heavy day-to-day work, they can reach even more cadres and people and devote their energy and attention to research and to reflecting on important long-range issues for the sake of the party and the state.

Our party founded the country. Among our old cadres, some experienced the first civil revolutionary struggle,while others went through the war again against the Japanese and the war of liberation. They took part in the founding of the state. As time goes by, some of them will gradually retreat to the second or third front. With regard to these old cadres who have contributed to the state and to the people, we must abide by the decisions of the party to respect them politically and look after their material needs, so that they can live a long life and continue to struggle for the sake of communism.

GUANGDONG FIRST SECRETARY ADDRESSES FORUM ON DISCIPLINE

Guangzhou NANFANG RIBAO in Chinese 15 Jul 80 p 1

[Staff report: "Strengthen Construction of the Discipline Inspection Ranks and Shore up the Party's Working Style in a Down-to-Earth Way; First Secretary of the Provincial Party Committee Comrade Xi Zhongxun Receives Members of the First-Term Rotational Training Class for Discipline Inspection Cadres and Also Gives Speech"]

[Text] For the purpose of meeting present needs in rectifying our party style and party discipline, the Discipline Inspection Commission of the Chinese Communist Party's Guangdong Provincial Committee and the party school of that provincial committee jointly sponsored the first-term rotational training class for discipline inspection cadres. At the conclusion of this training class, Comrade Xi Zhongxun received members of the entire class and also gave a speech on the question of how to carry out the "guiding principles," shore up the party style, and strengthen the construction of the discipline-inspection ranks.

Comrade Xi Zhongxun pointed out, first of all, that the Discipline Inspection Commission is an important working department of the party committee, and the most important task of the Discipline Inspection Commission is to grasp the party's working style. During the 2 years and more since its establishment, the Discipline Inspection Commission of the provincial party committee has done a great deal of work and its achievements have been quite conspicuous. These achievements include the work done by discipline inspection commissions at various levels. But we must further perceive the importance of such discipline inspection work and clearly recognize that it is necessary for the discipline inspection commissions at various levels to help the party committee shore up the party's working style. He said: The Fifth Plenum of the 11th Party Central Committee proposed strengthening and improving the party leadership and uplifting the party's fighting stamina. Shoring up the Party's working style, promoting stability and unity, and accelerating the four modernizations are an important aspect of strengthening and improving the party leadership and uplifting the party's fighting stamina. This is a task for the whole party and also is the principle task of the discipline inspection commissions at various levels; this work is very important.

In direct reference to problems which exist in our work in the countryside today, Comrade Xi Zhongxun pointed out: A very important reason why some places cannot do their work well is that the party organizations in those places are not strong, lack fighting stamina, and exemplify a bad style. Of course, we need not tense up right away once any problem is found, or even have any doubts as to whether the party's policy for the countryside has been a mistake--and hence whether we might not be "rectifying the wrong thing." But there are people who remain indifferent to the problems discovered in their places, who do nothing and let them spread; this is also wrong. He said: Before the Cultural Revolution, our party style was good; later it was subject to the serious sabotage of Lin Biao and the "gang of four," and so we now need to do our best to restore it. As long as our comrades can learn to do mass work, learn to handle contradictions among the people, guide the masses to closely use their own experiences and lessons, such problems are bound to be solved and the masses are bound to listen to the party.

Speaking of how to grasp the party style well, Comrade Xi Zhongxun also pointed out: In order to grasp the party style we must at present especially make a point to grasp well the study of the "Guiding Principles for Inner-Party Political Life," adopt the approach of a minor rectification by making comparisons through practical inspection in the course of this study, and thus consciously rectify ourselves. The "guiding principles" are a powerful weapon for making our party discipline strict and rectifying our party style, and we must earnestly and repeatedly study them in a deepening way. Meanwhile, we must also grasp party style questions that affect the whole situation; we must be determined, adopt measures, and carry out solemn punishment against those who seriously violate our party discipline. Of course, with respect to the great majority of our party members, the question is one of education. But with respect to very bad individuals who refuse to change even after repeated education, and about whom the masses hold rather strong critical opinions, then whoever they may be, we must solemnly punish them and handle them according to our party discipline and the laws of the state. At the same time, we must energetically exalt the good types of personality. Between reward and punishment, the emphasis should be on reward; between criticism and self-criticism, the emphasis should be on self-criticism.

Speaking of the Discipline Inspection Commission's enforcing pertinent discipline, Comrade Xi Zhongxun pointed out: The Discipline Inspection Commission must emancipate its thinking and not do things according to old conventions in the disposal of certain cases, nor should the commission copy without changes methods used elsewhere. Conditions in various parts of the country are different; conditions in various parts of each province also are different. In carrying out the party's policies, we must proceed from the actual situation in a given locality. He said: We cannot substitute our emotions for policy; in carrying out a policy we must proceed from the fundamental interests of the party and the masses of the people, and combine with the specific conditions of the given locality. Discipline inspection commissions at various levels must have a feeling of sharing breath and destiny with the masses, always go out and go among the masses, and go deep into the countryside, factories and mines, and schools to investigate and understand the situations there if they are to insist on the party's principles and do things according to the party's policies. Only in this way can they really do their work well.

Comrade Xi Zhongxun pointed out: On the ideological front we must not only oppose bourgeois ideologies but also criticize feudalist ideologies in a deepening way. Many devious working styles often have to do with feudal ideas, and they have permeated all spheres. The period of China's feudal society was very long and its influence very deep. Our party has led the people of the whole country to overthrow the "three big mountains" imposed on the heads of the Chinese people, but it has failed to carry out a penetrating or systematic criticism of feudalist ideology. For instance, the life tenure which actually obtains with respect to a cadre's office, individual superstition, nepotism, rule by the voice of one man alone, servility and fawning, privilege-seeking, etc., etc., all remain. Some individual leaders are attempting to build so-called Secretaries Edifices on Standing Committee Members Street. Most recently someone wrote to me to note that in trying to pass the entrance examinations of a school, some have tried to enter through the back door again. I ask the concerned departments to exert themselves and grasp this problem with determination. Whoever may be involved, whatever seniority they may enjoy, and however high their offices may be, once such cases are discovered, they must solemnly be brought to book.

Speaking of strenthening the construction of the discipline inspection ranks, Comrade Xi Zhongxun pointed out: Work on the four modernizations is a very complicated struggle; the workteams of discipline inspection commissions at various levels must be strengthened, and their cadres must be well selected and assigned. They must pay heed to transferring old cadres with a strong party character, who are fair in their handling of affairs, to the leading groups of the discipline inspection comissions; some of them may serve concurrently as inspectors. Party committees at various levels must strengthen their leadership over the discipline inspection commissions. He also encouraged discipline inspection cadres to be strictly impartial in their work, daring to struggle without being afraid of attack or revenge, and daring to insist on principles and to maintain party regulations and party laws. Each discipline inspection cadre must do his best to fully absorb the spirit of the Fifth Plenum of the 11th Party Central Committee and the spirit of the "guiding principles," follow them, and carry them out in an exemplary manner.

In conclusion, Comrade Xi Zhongxun pointed out: We must have complete confidence in our ability to shore up our party style; we must believe that the overwhelming majority of our party members are good or relatively good, and that the vast ranks of the masses of our people do follow our party. Since past history has proved this point, future history will also prove this point.

NANJING SYMPOSIUM DISCUSSES CRITERIA FOR TRUTH

Nanjing XINHUA RIBAO in Chinese 4 Jul 80 p 2

[Report by Zhai Bin [5049 2430]: "Explore the Question of Practice as the Criterion for Truth in a Deepening Way; Nanjing Philosophical Society and Provincial Marxism-Leninism-Mao Zedong Thought Study Association Convene Academic Symposium"]

[Text] In order to further rectify their ideological line, sweep away their ideological obstacles, resolutely and unswervingly carry out the party's political line, and explore the question of practice as the criterion for truth from both theoretical and realistic aspects, the Jiangsu Provincial Marxism-Leninism-Mao Zedong Thought Study Association and the Nanjing area Philosophical Society jointly convened an academic symposium in Nanjing from 23 to 28 June. Attending the symposium were theoretical workers and comrades of departments of practical work in the organs and schools of the Nanjing area and regions and municipalities of the whole province, plus theoretical cadres of schools of the People's Liberation Army stationed in the Nanjing area; altogether there were more than 90 [participants]. Comrades from units such as the Hubei Provincial Academy of Social Sciences participated in the symposium. During the symposium period, Comrades Sun Gengfu [1327 5087 1133] and Xing Fensi [6717 6321 1835], deputy directors of the Philosophical Institute of the Chinese Academy of Social Sciences, were invited to speak to the comrades in attendance.

The symposium was of the opinion that the great liberating effects of the renewed perception that practice is the only criterion for testing truth and the effort to restore the dignity of practice during the past 2 years and more have already been proved by practice. In the meantime, comrades attending the symposium also analyzed various ambiguous perceptions still prevailing among the cadres and masses as to the question of the criteria for truth. For instance, some leading comrades turned "practice is the only criterion for testing the truth" into an empty formula; what they said was "practice as the criterion," but what they were doing still pointed to "power as the criterion." Some people took "practice as the criterion" as a shield behind which they actually were practicing utilitarianism. Some people put practice as the criterion of the truth in opposition to the four basic principles. Some people put implementation of the spirit of the Third Plenum of the 11th Party Central Committee and "uniting together to look forward" in opposition to the summing up of our historical experience on the basis of seeking truth from facts. And a few people also had some doubt about practice as the criterion for truth. Theoretically speaking, there have been no small number of arguments concerning the question of practice as the criterion. Hence, comrades attending the symposium consistently held that launching such a discussion on the question of practice as the criterion for truth in a deepening way--thus further applying practice as criterion in the realm of the four modernizations on the one hand and exploring this question theoretically in a deepening way on the other hand--should continue to help people emancipate their thinking and insist even better on the ideological line of dialectical materialism.

At the symposium, the comrades joined in the summing up of historical experiences and connected them to realistic problems, while emphatically exploring certain questions from a theoretical angle. For instance, there was the question of the connotation, essential elements, characteristics, scope and classification of practice; there was the question of the nature of practice as the "only" criterion; etc. They engaged in a heated debate especially around questions like whether the purpose of a person's actions is an essential element of practice, and whether practice is the "only" or "ultimate" criterion for testing the truth.

Under the guidance of the principle of "letting a hundred schools contend," those at this symposium, whether they were theoretical workers or comrades of departments of practical work, whether they were old generals or new soldiers on the theoretical front, and whether they were comrades from Jiangsu itself or from other provinces--all laid bare their thinking and engaged in debating different opinions on the basis of the spirit of exploring the truth. During the symposium, different points of view joined battle; after the symposium, all got together in friendly chats and sought to learn from each other. Everybody spoke only honest words, sought only true knowledge, explored only the truth, and engaged only in comradely discussion. Thus a good example of study and meeting together was duly exemplified.

Through this symposium, comrades generally felt that the study of the question of the criterion for truth, like the study of other philosophical questions, must be connected to reality. But at the same time there were also large numbers of abstract questions which required exploration in a deepening way. From now on, we need not only to acquire new understanding in connecting our discussion to realities but also to achieve a breakthrough in exploring the depths of theory.

VALUE OF MONEY TO SOCIALIST SOCIETY DEBATED

Editor's Note

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Ideological Forum: "What Is the Correct Philosophy of Life To Be Followed?"]

> [Text] Editor's Note: On 19 June, this newspaper carried an article by Comrade Gu Shuhua [7357 3219 5478] entitled "Money Brings Happiness." Since then, an animated debate has ensued. Comrade Gu Shuhua's views have been endorsed by some readers and rejected by others. Some comrades have even gone so far as to bring up new problems for discussion. Today, published here are a number of selected articles which represent a cross-section of views valuable to the readers--views which deserve further scrutiny,
>
> We hope that future contributors to this column on the philosophy of life will base their views on their personal experiences or what has come to their attention, and will convince people with facts and reasoning.

Positive View of Money

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Article by Hong Hai [3163 3189] of the Beijing Municipal Dyed Textile Industry Company: "It Is Necessary To Treat Money Correctly"]

[Text] I can hardly calm the waves in my mind after reading Comrade Gu Shuhua's article entitled "Money Brings Happiness." Can money really bring happiness? I consider this question to be an issue of great importance worthy of attention.

Some people seemingly hate for others to talk about money and often link money with the rotten bourgeois ideology. This attitude is wrong. Can we get anything we need from the market without money under our current social system? Few can imagine how happy Comrade Gu Shuhua was when she used 0.05 yuan to buy a pencil with an eraser attached.

Our party also hopes that people will have more money to spend. During the past few years, the party and state have overcome many economic difficulties in raising wages for workers several times, in giving them bonuses, and in adding 5 yuan to each worker's regular pay as a compensation for an increase in the price of nonstaple foods. Are all these measures designed to give workers more money to spend? When they have more money in their pockets, they can buy television sets and electric fans and raise their standard of living. A higher income for each worker is also a recognition of his greater contributions to the country and people and a measure of higher standards of living for him. Can money bring happiness? Yes.

Nonetheless, we must take a correct attitude toward money, which is lifeless and classless, and which can be owned and controlled by anyone. Money in the coffers of the working class can be used to create happiness for mankind and to improve the people's standard of living. But money in the hands of the bourgeoisie can be converted into capital to exploit and oppress the workers. In our society, money remains a common medium of exchange in trade for commodities; it must be used to buy food, clothes, homes, cars and services. But we must also not forget that in our socialist society, money sometimes does not talk or perform magic because it cannot be used to buy many other things, notably, honors of heroes and model workers, virtues of mutual trust, and mutual respect among comrades--things that are happily treasured by people in our society. In my opinion, money itself spells neither happiness nor disaster. If it is used to pay normal labor and services, it undoubtedly spells happiness. If it is used by people to break laws and engage in other illegal activities aimed at acquiring more money, it certainly spells disaster. It is really necessary to treat money correctly. We must refrain from "pursuing profit and making money as the only aim in our career." True, money can bring happiness. But no one should be obsessed with money, because in doing so one may end up ruining oneself and one's country. More often than not I have heard people ask, before they have received an assignment handed down by higher authorities, "How much bonus are we supposed to get?" How hard they will work and how much they will accomplish depend on the amount of the bonus. Work will not start until the bonus is ready. These comrades have misplaced the position between people and money in much the same way as a carriage driver puts the cart before the horse. In other words, they want to make themselves slaves rather than masters of money. This practice sounds really funny. Just as Comrade Gu Shuhua has pointed out, some comrades have abused their authority and practiced bribery to get money. It is a shame to acquire such "dirty money." Worse is the fact that for the sake of money, some people have taken a reckless course and committed crimes. Not long ago, the Beijing Municipal Middle People's Court tried a bank robbery case. The case involved two gun-toting youths who, during bright daytime, held up a bank and escaped with over 1,000 yuan in Renminbi. During the holdup, they also inflicted injuries on some people with gunfire. It was money that drove them to commit such a terrible crime. a tragedy indeed!

We must take the correct attitude toward money. We must emulate some good examples set by many comrades in this respect. Among them are examples set by comrades Fang Zhimin [2455 1807 2404], and Jiang Jie [3068 1195], who preferred to sacrifice their own happiness and lives for the sake of the party's cause rather than accept the enemy's offer of high positions and emoluments. Comrade Lei Feng [7191 6912] donated his many years' saving of 100 yuan to a people's commune. Such comrades are not lacking even in our society today. An example is a factory director in our company. For over 20 years, he has deliberately passed on to other comrades his opportunities for promotion and subsequent pay hikes. Does anyone doubt that he is not aware money would bring him a happy life? I don't think so. I understand that he knows another kind of happiness based on moral beliefs; if he acquires money in betrayal of such moral beliefs. he will feel unhappy.

Today, we should no longer publicize "poverty as a virtue." On the contrary, we should proudly call on people to build a happy life on the basis of their normal and regular income and compensation for their labor. We must also remind them of the need to take a correct attitude toward money. Only in this way can they convert money into genuine happiness instead of disaster.

Money Is Useful

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Article by Wang Saishi [3769 6357 2514] of the Weifang Diesel Engine Plant, Shandong: "The Truth That Money Brings Happiness Is Irrefutable"]

[Text] Comrade Gu Shuhua has perceived of money as a source of happiness. She bases this perception on her personal experiences. So far, the average income of ordinary workers in our country is low. They deeply believe that money will enable them to raise their standard of living, to solve their marriage problems, settle family disputes, and bring them joy and happiness. Without money, they will face difficulties and troubles. This view is shared by almost all low-income workers. Nevertheless, does this view conflict with the proletarian philosophy of life? How can those revolutionaries who have devoted themselves to defending the truth reconcile their views to this perception of money as a source of happiness? I feel that a correct answer to this question can be derived from a realistic evaluation of our current living and economic conditions.

I feel that man's demands for food, clothing, shelter, and other daily necessities must first be met before he can take part in any social activities. Only after his basic daily material needs are satisfied can be engage in social activities. If his basic material demands are not met, all social activities will cease to exist. In popular language, man can do nothing unless he is well fed and well clothed. I have read some articles entitled "Struggle Is Happiness," "Learning Is Happiness", and "Serving the People Is Happiness." I am sure that their writers must first solve their problems of food and clothing before they are able to go ahead with their writing. When a man lives in starvation and trembles with cold, the first things that come to his mind must be food and clothing rather than other activities, including writing and scientific research. True, the proletarian philosophy of life emphasizes the need to serve the people and the struggle for the communist cause rather than profiteering. But we must be aware that the proletariat is not a robot which does not need food. Every human being must be provided with basic daily material needs. The grand objective of the revolution is to take care of the people's interests. Each person has a natural desire to lead a happy life.

Furthermore, there still exists in our country a system of commodity exchange; under this system, money remains a common medium of exchange for daily necessities. This inevitable stage of history is determined by the laws governing the development of society. Normally, whether a worker can enjoy a relatively decent life in material terms depends on his income. In a certain sense, money is a cult of worship which stimulates people to work for additional pay in the form of bonuses, and for promotions and pay hikes. This does not mean that they are selfish. In order to eke out a living, they have to work hard. This is why those relatively low-income workers regard "money as a source of happiness." This should be viewed as a normal desire or demand rather than as a form of bourgeois ideology--a desire beyond reproach. Many people regard money as a source of happiness. As long as they earn their living through regular labor, and as long as they break no law, they should be treated like honest citizens because they have done nothing disgraceful to our society.

Are there any elements in our society today who do not regard money as a source of happiness but believe in serving the people as a source of happiness? Yes. A typical example was Lei Feng. He often placed public interest above self interest and regarded serving the people as a source of happiness. He even donated his years' saving to victims of a natural disaster. Although his donation was small, his workstyle was commendable. Although such communist spirit is worthy of emulation by every revolutionary, people like Lei Feng in our society today are rare, and their philosophy of life is only a lofty example which claims no large following. Under the objective economic conditions, the majority of the people in our country will still have to work hard to eke out a living. Everyone must work for survival rather than for recreation as the first priority of life.

Power Is Better

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Article by Liu Xingmin [2692 6821 3046] of the Changsha Municipal Herb Medicine Wholesale Department: "Political Power Brings Happiness"]

[Text] Political power is indispensable to a happy life. Experience tells us that political power is the soil that engenders happiness, or a source of happiness.

Now let me tell everybody how a commune party committee secretary in Changsha County, Hunan Province, has wielded his power for the benefit of his family. His family is located in another commune. For the sake of his son's future, the secretary used his authority to transfer his boy from that commune to his commune's farm machinery station, whereupon he was enrolled in a driving class. His decision to transfer his son was inspired by the following popular saying: "Once you can drive, you can enjoy everything, including food, clothing and recreation." As soon as the boy graduated from driving class, the county public security bureau wanted to recruit a driver. With the help of his father's friend in the county labor bureau, he was soon hired as the public security bureau's driver. His next step was to ask Miss Cao, a radiobroadcaster of his commune, to be his daughter-in-law because she was supposed to be a good friend of his son. After receiving this proposal, she told her future father-in-law of her desire to eat marketable grain and get a job in the nearby city. The secretary said unhesitatingly: "No problem. It's a deal!"

Six months later, a municipal harbor authority circulated a notice looking for new recruits. As soon as this notice came to his attention, he recommended his future daughter-in-law for a position with the harbor authority. Now both his son and daughter-in-law are employed. With their father's backing, the young couple enjoy a happy life. If they came from a family of an ordinary commune member, they could never expect to have such golden opportunities. For this reason, may I say that political power is indispensable to a happy life?

Money Spells Disaster

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Article by Hu Hanhuai [5170 3352 2037] of the Wuhan General Grindstone Plant: "Money Cannot Bring Happiness"]

[Text] Does money bring happiness? I don't think so. True, money is indispensable to life. When I have money, I can buy good food and beautiful clothes and enjoy many other good things. I can marry a lovely girl and have a lovely family of my own, present gifts to my parents, and help others with donations. In other words, money is a material condition indispensable to life. But money sometimes cannot get you everything you want. Nor is it a source of happiness. Experience proves that although a penniless person is certainly not happy, he is not necessarily happy when he becomes rich, either. For example, money did not bring happiness but tragedy to that millionaire lady in the film "Tragic Death on the Nile." Although Yu Yongze [0151 3057 3419], a leading character in the novel "Song of Spring," is rich, he still cannot make his lover Lin Daojing [2651 6670 7234] happy. In real life, happiness purely based on material wealth cannot endure too long.

Those who consider money a source of happiness really don't know what the term "happiness" really means. The true value of happiness cannot be gaged by money. Happiness built on the basis of money resembles a house built on sand near the seashore which sooner or later will be washed away by the rising tide.

Famous Quotations on Happiness

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Text] If we choose a career that can best serve to enhance man's economic well-being, we can withstand any pressure and endure any sacrifice in the service of all mankind. When that time comes, what we sense is not merely a pitiful joy but happiness which belongs to millions of people. We will feel that our cause is not shortlived but an eternal glory; in the face of our ashes, those noble persons will mourn us with warm tears. --Karl Marx

History will honor those noble and great souls who devote their entire lifetime to the public interest. Experience proves that the happiest persons are those who can make the majority of the people happy. --Karl Marx

Some people say that the happiest persons in the world are those well-fed, well-clothed, and merrymaking people. But I personally feel that the happiest persons in the world are those who work diligently and work hard to create wealth with their own hands, and who devote themselves to the liberation of all mankind and to the realization of communism. --Lei Feng

We will forget our own unhappiness when we can make others live comfortably. We will be pleased to see others live in happiness. --Lu Hsun

Feeling able to serve the people is the greatest happiness in the world -- Guan Xiangying [7070 0686 2019]

Material Wealth Not Important

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Article by Jin Xin of the Beijing Yuanming Garden Duck Farm: "The Happiness I Cherish"]

[Text] To me, so-called happiness is a sublime happy feeling that derives from the realization of a certain cherished ideal. People usually are obsessed with two aspects of life--material and spiritual well-being. I disagree with the notion that only material wealth can bring happiness. The kind of happiness I cherish differs in many ways from that preached by Comrade Gu Shuhua in her article entitled "Money Brings Happiness." Although I cannot deny that material wealth and money are essential to the sustenance of life, neither money nor material wealth can bring or buy happiness.

I love literature. My interest in literary writing began during my third year in middle school when my first article was selected as the most outstanding work of my class. As time goes on and my knowledge about the world grows, I have decided to choose writing as my lifelong career. I am looking forward to becoming a writer capable to portraying and extolling people. This ideal has pressured and inspired me to work hard. At the same time, it has also become the root cause of my agony. I do not care much for the material aspects of life. Nor do I pay any attention to them. At present I still do not have the slightest feeling of happiness although I don't have to worry about my daily provisions. On the contrary, I still feel an increasing strain at not being able to turn my ideal into reality. For over 10 years, I have found that neither material affluence nor money can relieve me of that painful feeling of being unable to realize what I wish to do. I don't think I will feel ecstatic or happy until someday I turn my cherished ideal into reality and until I am recognized as an established writer. This is the kind of happiness I always cherish.

Excerpts on Happiness

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Excerpts of article by Zhang Xinling [1728 1800 7227] of the Suining County Broadcasting Station, Jiangsu Province]

[Text] Genuine happiness derives from the realization of an ideal and a wish, from success in a career, and from a feeling of satisfaction with the successful performance of labor. All this cannot be bought with money.

[Excerpts of article by He Xiaoming [0149 2556 2494] of the general construction group of the Nanjing Military Region]

[Text] Our happiness is closely connected with the destiny of our country and the future of our nation. It is contingent on the social condition of stability and unity, and on whether the destiny of the country is controlled by the people and production can be organized in good order.

[Excerpts of article by Cai Xiang [5591 5046] of the Nanpi County Health Immunization Station, Hebei Province]

[Text] Ten years of catastrophes have turned me into an ignorant person. Today, what I need is not money but knowledge. Genuine happiness will not come to me until I become a knowledgeable intellectual capable of making contributions to the motherland and people.

[Excerpts of article by Hou Shuwen [0186 2885 2429] and Li Xiaobai [2621 2556 4101] of the auto repair and assembly plant of the Heilongjiang Provincial Savings Bureau]

[Text] Once a person comes to believe in an ideal, he will regard his success in realizing it as the greatest happiness of his life. Karl Marx's wife was born of a rich and noble family. But she married Marx against the wishes of her parents, and spent several decades together with her husband leading a difficult life of exile. To some people, hers was not a happy life at all. However, she felt very happy at being able to work together with Marx to create the scientific communist theory.

[Excerpts of article by Liang Chang [2733 7022 1494] of Beijing]

[Text] Man must eat and have clothes to wear. For this reason, the ascetic life is unacceptable to any class. Man must also make constant efforts to satisfy his demands to improve his material well-being. If this demand is met, he will feel happy. But viewing human life this way is far from complete. As everyone knows, man differs from animals in that the former must make efforts to meet his daily needs both in material and spiritual terms. His spiritual life covers a wide range of interests. Among them are culture, morality, ideals, struggle, inventions, friendship, and love. In addition to enjoying material amenities, man must try his best to enrich and expand his colorful spiritual dimensions.

Road to Happiness

Beijing GONGREN RIBAO in Chinese 3 Jul 80 p 4

[Article by Du Zhe [4648 2124] of Wuhan: "Happiness Means Doing Whatever One Wishes"]

[Text] I believe that happiness means doing whatever one wishes. For example, I will feel happy if I can become a leading cadre who will be in a position to entertain a great number of friends or foreign guests at a banquet, just as our state leaders have done, and who can afford to fly a jumbo jet around the world,to marry a pretty wife, and to eat and do what I want. I also want to tend crops, raise ducks and dogs as pets, and drive a car. In other words, if the dimensions of life I enjoy become wider and broader, I will feel happier.

SOCIALIST DEMOCRACY, ITS RELATIONSHIP WITH LEGALITY OUTLINED

Beijing FAXUE YANJIU [STUDIES IN LAW] in Chinese No 3, 23 Jun 80 pp 5-8

Article by Han Mingli [7281 6900 4539] and Guo Yuzhao [6753 1342 2507]: "Democracy Is a State System--Also Discussing Its Relationship with Legality"]

[Text] The term "democracy" is often used in different ways by people, such as, the people's democratic rights, the democratic method to solve the internal contradictions within the people, the democratic style of the leading cadres, etc. All these are doubelessly referring to democracy. However, if one should say that these expressions, or one of them, constitute the fundamental meaning of democracy, one will run the danger of misinterpretation, because they are merely some concrete manifestations of democracy, not its fundamental meaning. Basically speaking, democracy is a state system. Without a democratic state system, there can be no democratic rights and democratic methods. Only by understanding democracy in terms of the state system will one truly master its true significance and connotations.

What is called the state system is the unity of the class essence and the management pattern of a given state. In other word, it is the system which determines the positions of the various social classes in the state (controlling or controlled) and the pattern used by the controlling class to exercise its control. Lenin once pointed out: "Democracy is a form of state, a pattern of state. Therefore, similar to any kind of state, it also organizationally and systematically use force, which is one aspect. In the other aspect, democracy signifies the recognition of the equality of citizens, the recognition that everyone has equal rights to determine the state system and manage the state."* In other word, when discussing democracy, primarily we must not forget that it is also a kind of state political power. Next, as a pattern of control by the state, it is distinguishable from countries under dictatorship.

First, we must understand that democracy is still a sort of state political power. On this point, similar to dictatorial countries, it remains a tool for class control and a systematic organization of force. The term "democracy" came from the Greek word "demokratia," which means the government of the populace. It was a system of government created in Athens after the victory of the citizens in their struggle against the aristocrats in the 6th century BC. Democracy can only be the democracy of a certain class, and signifies dictatorship over the hostile classes (or class enemies). Until now, all state political regimes which once existed in history or which are in existence today are a combination of democracy and dictatorship. All exploiting countries are countries which follow democracy for the minority of exploiters and exercise dictatorship over the broad exploited. A socialist country is completely different; it is a state where the proletariat and the broad laborers enjoy democracy and which exercises dictatorship over the minority of exploiters and their remnants. Lenin called it "a /new type/ of democracy (democracy for the proletarians and the poor in general) and /new type/ of dictatorship (dictatorship over the bourgeoisie)."** It is because the broad laborers headed by the worker class have become the masters of the state and the social production means. Only under such conditions can the people enjoy unprecedented broad true democratic rights. Precisely as pointed out by Comrade Hua Guofeng in his "Government Work Report" at the second meeting of the Fifth People's Congress, "the socialist democracy, or people's democracy, is the supreme power enjoyed by all the people to manage the state on the foundation of the rights of ownership and control over the production means in different forms."

Democracy and dictatorship are the two inseparable aspects in the unity of the state political power. The relationship between them is both antagonistic and united. By antagonism, it means that democracy is only applicable within the people while dictatorship is only applicable to the enemy, and the two must not be confused or turned upside down, for otherwise it will signify a change in the character of the state. By unity, it means that democracy and dictatorship mutually serve as the premise of their existence, and will mutually convert under certain conditions. Without the people's democracy, there can be no effective exercise of dictatorship over the enemies. On the other hand, without dictatorship over the class enemies and the undesirables endangering the people and disrupting the socialist construction cause, the people's democratic rights will lose their safeguard. Therefore, democracy and dictatorship mutually condition each other, and one cannot exist without the other. The second meaning of the unity of democracy and dictatorship is that, under certain conditions, a conversion of their positions may occur. When the objectives of dictatorship, after a long period of reform, have definitely relinquished their reactionary standpoint and become self-supporting laborers, they may transform from the objectives of dictatorship to those of democracy. On the other hand, when individuals within the people, influenced by the exploiting class ideology, commit outrages and antagonize the people, they may transform from the objectives of democracy to those of dictatorship. The situations of both aspects are found in real life. The complete theoretical understanding of the dialectic relationship between democracy and dictatorship will guide us to consciously and correctly distinguish and handle the two different kinds of contradictions and alert us, when developing democracy, to watch out for the destructive activities of the class enemies. When suppressing the destructive activities of the class enemies, we must concretely protect the people's democratic rights. We must not stress one aspect and overlook the other. Meanwhile, the principle of the dialectic relationship between democracy and dictatorship will also direct us to strengthen the political-ideological work within the people and prevent individuals in the people from degenerating into enemy elements. In addition, we must also be skillful in performing the work of converting the enemies, making them change their reactionary standpoint and come to the side of the people. It will benefit the consolidation of the people's political power and the construction of socialism. In the 30 years since the founding of the nation, both the positive and the negative experiences have proved that only by correctly understanding and handling the dialectic relationship between democracy and dictatorship will our socialist state truly produce the effect of protecting the people and suppressing the enemies and attain the goal of continuously expanding the people's strength and undermining, until finally eliminating, the class enemies.

---

* "Selected Works of Lenin," vol 3 p 257

** Ibid., vol 3 p 200

Next, we must understand that there is a distinction between the countries following the democratic system and those following the dictatorial system. The fundamental distinction between the two kinds of political systems is whether the democratic principle of the minority obeying the majority is followed in creating state organs and exercising state powers. The basic principle of the democratic system is the minority obeying the majority. Therefore, Lenin, in "the State and Revolution," called such a state "the state where the minority obeys the majority." It must be pointed out that the principle of the minority obeying the majority is applicable only within the controlling class, and not between hostile classes. In the past, Kautsky applied it to the relationship between the exploiting and the exploited, and Lenin sharply denounced it as a mediocre bourgeois liberal viewpoint in violation of Marxism. However, in states under the democratic system, it must be followed within the controlling class in organizing its own political power and exercising state management. Its concrete application in a socialist state is democratic centralism.

A socialist state is a state where the broad masses serve as the masters under the leadership of the worker class (through the communist party). It is incompatible with any individual arbitrary action or the ultra-democratic decentralism. Therefore, fully developing democracy within the people in order to enable them to exercise their rights as masters is the source of consolidating and reinforcing the strength of a socialist state, while only a high degree of centralism on a broad democratic foundation will assure the party's and the state's centralized and unified leadership. Our experiences in the 30 years since the founding of the nation show that, whenever democratic centralism was correctly implemented, the people's positivity rose and the socialist revolutionary and construction cause flourished; whenever democratic centralism encountered destruction, the people's positivity suffered suppression and the socialist revolutionary and construction cause ran into setbacks and losses. Therefore, whether democratic centralism is correctly implemented in the state is linked with the momentous issue of whether the socialist revolutionary and construction cause will develop, whether the entire society will have a stable and united political situation and whether the political power of the socialist state will consolidate.

Democracy and centralism are also a kind of unity of opposites. Democracy is to recognize the equal rights of everyone to express his opinions and manage the state; centralism requires certain obedience. The two aspects mutually condition each other. Within the people, only by fully developing democracy will it be possible for the masses to exercise their democratic rights as masters and to concentrate their wisdom and strengths on the proper management of the state; only thus will it be possible to correctly adjust the relationships within the people, especially between the leaders and the masses, and strengthen the people's internal unity, thereby guaranteeing the victory of our cause; only thus will it be possible to unify everyone's understanding to the correct ideology, i. e., to attain true centralized unity. Otherwise, when the people's opinions have not been fully expressed, and the correct and the incorrect, the right and wrong, have not been clarified, the so-called "centralism" will be mostly false, empty, and even erroneous. After undergoing the disaster created by Lin Biao and the "gang of four," people have realized more profoundly that the absence of the people's democracy will furnish an opportunity to conspirators and careerists like Lin Biao and the "gang of four," and that the principle that the people are the masters will become an empty phrase. However, this kind of democracy has leadership, organization, and a clear goal and direction. Without the leadership of the communist party, without an organized and disciplined revolutionary contingent, and without the clear socialist and communist direction pointed out by Marxism-Leninism, the proletariat, as the leading class, will lose its organizational essence and its fighting power, making it impossible to guarantee a stable and united political situation and difficult to pursue a large-scale socialist construction. During Lin Biao and the "gang of four's" rampage, the practice of "kicking aside the party committee to make revolution" and "smashing the public security organs, procuratorial organs and people's courts" was widespread in the entire country, shutting down the plants at will, suspending communication, "beating, smashing, robbing, searching, arresting and killing." It was very "democratic!" But as a result, the democratic rights of the broad cadres and masses were trampled underfoot, many superior party cadres and innocent people lost their lives, and a perfectly good socialist state was almost ruined. The lesson was extremely painful, and the people will never permit a repetition of the tragedy. Therefore, when following the democratic system, the dialectic unity of democracy and centralism must be upheld, and stressing either while overlooking the other will be erroneous.

We must realize that the bureaucratic tendency of absolutizing centralism and the anarchist tendency of absolutizing democracy are both gigantic obstacles to the implementation of democratic centralism and incompatible with the class essence of a socialist state. Bureaucraticism is a product of the state bureaucratic structure of the exploiting class. Breaking down the old bureaucratic structure, abolishing the old bureaucratic system, and abrogating all special privileges enjoyed by the old bureaucrats, and replacing them with public servants of society elected by the people, subject to dismissal at any time and responsible to the people, constitute a basic condition for building a socialist state. The old bureaucrats and the new model proletarian state political power are incompatible with each other. However, though the old bureaucratic structure and system have been abolished, the bureaucratic practice and influence have not vanished along with them. Some people fail to see the fundamental distinction between the cadres of our socialist state and the old bureaucrats, consciously or unconsciously confusing themselves with the old bureaucrats, feeling that, with power in their hands, they can ignore the people, take arbitrary actions, and even turn their power of office into special privileges for private gain, acting like tyrants and oppressing the people. For a revolutionary cadre, such evil bureaucratic practice is the height of disgrace. Though this phenomenon applies only to a handful of our cadres, it cannot be ignored. There are also some people who think that the party's centralized and unified guidance and the proletarian dictatorship are opposed to the full development of the socialist democracy, consciously or unconsciously placing themselves opposite to the party and the state, feeling that democracy signifies absence of restraint, turning the spearhead upward, and freedom from responsibility for their words and deeds. It actually is not socialist democracy, but a reflection of the anarchist trend of thought with the individual as the center. The anarchism of absolute personal freedom, doing away with government and leadership and opposing any authority and any obedience, is the anti-Marxist petit bourgeois thinking. Engels, in "On Authority," made a profound analysis and criticism of it, pointing out that one only had to observe the economic relationships which constituted the foundation of the modern society to discover the tendency that the individual dispersed activities were being replaced more and more by joint activities. Joint activities indicated organizing, but there could be no organizing without authority. Those anti-authoritarians either failed to understand their own words and spread muddled ideas, or intentionally betrayed the proletarian movement.* The facts were precisely thus. When Lin Biao and the "gang of four" advocated "great democracy" and incited an anarchist trend, their goal was to disrupt the proletarian dictatorship and seize power in the chaos. The evil influence created by them has not been thoroughly purged even today. If such thinking is permitted to spread freely, it will disrupt our state, which is what the "gang of four's" remnants and other class enemies crave. We must maintain a clear mind toward this. However, we must also realize that, as our socialist society emerged from the womb of the old semi-feudal and semi-colonial society where the small peasant economy predominated, the two erroneous tendencies discussed above have a profound social source. Therefore, clarifying in our mind the meaning of democracy and the fundamental boundaries among democratic centralism, bureaucraticism and anarchism will benefit our long struggle against bureaucraticism and anarchism, the two erroneous tendencies.

---

* See "Selected Works of Marx and Engels," vol 2 pp 551-554

To understand completely and accurately the entire meaning of socialist democracy will help us correctly comprehend its relationship with socialist legality. The relationship between socialist democracy and socialist legality is the relationship between the state system and the legality of a socialist democracy. Such relationship is a dialectic unity. However, different from the opposite yet unified relationship between democracy and dictatorship and between democracy and centralism, it is the dialectic unity of the concretely manifested content and form. Socialist democracy is the content, the basis. Without it, there can be no socialist legality. The socialist legality is the form, embodying and protecting the socialist democracy. Without socialist legality, the socialist democracy can neither be embodied, nor protected. As the content and the form, the two are interdependent and mutually restrictive, forming a relationship of dialectic unity.

As the socialist democracy is the content of socialist legality, if the legal system fails to embody the requirements of the socialist democracy or to act according to the law embodying the requirements of the socialist democracy, it is not socialist legality. Only by acquiring democracy and creating a socialist state political power will the proletariat be able to embody its own will into law and attain the systematization and legalization of the socialist democracy (or people's democracy). Only by adapting to the demands of the socialist economic foundation, creating a socialist democratic political system, and recognizing the equal rights of citizens in state management will the proletariat be able to thoroughly abolish the special privileges beyond the law enjoyed by individuals and act strictly according to law. The socialist democracy is the premise and foundation of socialist legality; therefore, socialist legality must take the socialist democracy as its content. However, we must point out that the socialist democracy, as the content of socialist legality, includes the aspect of democratic rights enjoyed by the people and full democracy within the people and the aspect of dictatorship over the class enemies and the party's and state's centralized and unified leadership, and neither aspect may be used singly as the content or the premise or socialist legality. Some people consider developing the socialist democracy an antithesis to upholding the four fundamental principles and to cracking down on the disruptive activities of the class enemies and serious criminals. It is a one-sided interpretation of the socialist democracy. As proved by the facts, if democracy is not developed and the people have no democratic rights to manage the state, socialist legality cannot be established and realized. However, if the party's centralized and unified leadership is not strengthened and dictatorship is not enforced over the class enemies and the criminals disrupting the social order and endangering the interests of the state and the people, socialist legality likewise cannot be created and safeguarded.

When we say that socialist democracy is the content of socialist legality, we mean that the requirements of socialist democracy must be embodied and protected through socialist legality. The socialist law reflects concentratedly the common will of the broad masses led by the proletariat, and acting according to law provides a greater guarantee than acting according to the will of any individual that the activities of state organs conform to the interests and wishes of the people. As the socialist law is permeated with the principles of democracy and socialism, acting according to law will safeguard the people's status as masters, fully activate their positivity, and guarantee the development of the political, economic and cultural activities of the state along the socialist path. As the socialist law is the summation of the experiences of the broad masses in the production and class struggles and reflects the objective patterns of the socialist economic and political developments, acting according to law will avoid confused and arbitrary orders and ensure observance of the objective patterns. The socialist law serves as the guideline of concrete conduct, stipulates the relationship of the rights and obligations between people, and unequivocally tells people what do do and what not to do, how to do and how not to do. Acting according to law unifies people's understanding and action, serves as an effective means to reinforce centralized and unified guidance, and safeguards and consolidates a stable social order. Therefore, socialist legality is the most effective form to embody and safeguard socialist democracy. It must be pointed out that, as the embodiment and safeguard of socialist democracy, socialist legality itself is also a unity of democracy and dictatorship and of democracy and centralism. To feel that socialist legality is a part of dictatorship and centralism, or that it serves only to safeguard democracy is to explain its role of protecting socialist democracy in one aspect only, not in its complete sense.

In short, the complete concept of socialist democracy is that it is the unity of democracy and dictatorship and of democracy and centralism. Understanding in theory the entire connotation of the concept of democracy will help us correctly handle in practice the dialectic relationships between democracy and dictatorship and between democracy and centralism, and further consolidate and reinforce the socialist state system. It will also help us understand comprehensively and correctly the dialectic relationship between socialist democracy and socialist legality, further develop socialist democracy, reinforce socialist legality, and rally the people of the whole country in the common struggle to build China into a modern socialist power.

LETTERS TO EDITOR DEPLORE 'STUPID' PROJECTS

Divert Water

Beijing RENMIN RIBAO in Chinese 9 Aug 80 p 2

[Letter from Jiazhuang People's Commune, Jingxing Mining Area, Shijiazhuang Municipality: "Pingding Should Also Learn Its Lesson in Handling the Project To 'Divert Water From East to West'"]

[Text] Looking at Pingding's project to "divert water from east to west" from the example of Xiyang's project to "divert water from west to east," we think that the former, like the latter, is also a project which ignores natural conditions, puts no premium on economic results, snatches the sources of other people's water, tires people out, and wastes financial resources for nothing; it should be halted immediately.

This project to "divert water from east to west" was designed to force the water from Mian River several hundred meters higher by the use of electric power through a series of engineering measures. The river, which originates in Niangziguan and flows eastward, would thus be diverted westward into Pingding County in Shanxi Province. This huge project was undertaken under the guiding ideology of "think of new things, undertake large projects." It has already been in operation for 4 or 5 years and has exhausted a large amount of labor and a huge investment without yet yielding any benefits.

Originally, Jingxing County and the Jingxing mining area of Hebei Province, which rely on the Mian River for water, as early as 1958 opened up four channels--Mianzuo, Mianyu, Renmin and Minzhu--for the purpose of ameliorating their production conditions. After many years of extension and continued construction work, they already have a well-integrated network complete with the Zi, Dou, Nong and Mao branch channel systems. For over 20 years this network has been irrigating the more than 200,000 mu of land in these two areas and has preliminarily changed the past poor outlook, in which [the people] suffered 9 years of drought out of every 10 and took chaff and vegetables as their provisions half of each year. Since the volume of water of the Mian River is limited and the area it irrigates is very large, the river water supply cannot meet the demand; hence our area is irrigated only once every 20 days or more by rotation. When there is drought, water use becomes even tighter. Under such circumstances, even if only one-half or one-third, let alone all, of the water were to be diverted by Pingding County, the existing water conservancy works in our area would completely cease to function, with all previous efforts wasted, the originally irrigated paddies would become dry fields, and our agricultural production would also be seriously affected.

When it was decided to stop construction on Xiyang's project to "divert water from west to east," the masses applauded with pleasure. We earnestly hope that construction of Pingding's project to "divert water from east to west" also is stopped immediately.

Flatten Mountaintops

Beijing RENMIN RIBAO in Chinese 9 Aug 80 p 2

[Letter from Tian Zhoulin [3944 0719 2651], Agriculture and Forestry Office, Revolutionary Committee of Changning County, Hunan Province: "What Justification is There for Flattening Mountain Peaks Just To Open Up Rice Paddies?"]

[Text] When the decision to fold up and stop construction on Xiyang County's project to "divert water from west to east" was made, people readily hailed its wisdom. Because of the influence of the ultraleft line in recent years, people tended to "think of new things, undertake large projects," and they set out to work on projects in a foolhardy way. Hence, stupid undertakings in violation of natural laws, such as the project to "divert water from west to east," have become rather common in many places. For example, the Shanqiao Brigade of Xingyuan Commune in our county is situated deep in the forest area; on the average, everybody has 11 mu of forest area but less than half a mu of arable land. For many years, however, the leaders in charge have partially stressed the necessity to struggle for self-sufficiency in foodgrain supplies, and hence they choose to work on destroying forests so as to plant crops. Under the repeated urging of some leading comrades, this brigade took out a loan from the credit cooperative of the commune and handed it on to the production brigade. It thus raised capital of more than 20,000 yuan and bought a bulldozer. A plan was made to flatten five mountain peaks in order to open up 200 my of land. Within but half a year (less the time when the bulldozer was sent out to support other units and was under repair), expenses for explosives to break up the hills and rocks and loosen the mounds, plus expenses for fuel oil and repairs for the plough, required a total disbursement of more than 8,700 yuan. Up to this day, less than one-third of the planned work has been done. It is said that in order to level this mountain and turn it into rice paddies, another 3 years will be called for. If machinery depreciation funds and rewards for labor are added, the claiming of each my of land will be extremely expensive.

Recently I asked the local cadres whether or not they planned to close down the project; their reply was that until the land is claimed, they will never give up. So today this project is still going on.

With a forest area production brigade of slightly more than 500 persons working on such a project, which tires people out and wastes financial resources to the extreme, with losses far exceeding gains, the opinion of the local masses can easily be imagined. People say that once the bulldozer entered the mountains, all accumulations were spent and debts were incurred to the whole brigade. Everybody hopes that the bulldozer will get out of the mountains as early as possible so that the burden of the masses can be reduced and the development of forestry production can be facilitated.

I am of the opinion that all stupid undertakings similar to the project to "divert water from west to east" which have still not ended should without exception immediately stop their operations and fold up, when they are within or beyond plans, and no matter what level made the decisions on them. I suggest that the concerned departments should organize special forces to inspect and supervise such projects, and that those personnel who, after education, still refuse to treasure and use sparingly the people's sweat and blood should be solemnly criticized until they are duly chastised by the discipline of the party and the laws of the state.

Common Occurrences

Beijing RENMIN RIBAO in Chinese 9 Aug 80 p 2

[Letter from Wang Kexun [3769 0344 8113], Sheepbreeding Farm, Luxi County, Hunan Province: "WHy Does This Kind of Stupid Thing Become a Common Occurrence?"

[Text] A stupid thing along the lines of Xiyang's project to "divert water from west to east" has not been peculiar to Xiyang, nor has it occurred just in the 1970's. If we look further back, things like this began to occur as early as 1958, the year of the Great Leap Forward. By the time the ultraleft line of Lin Biao and the "gang of four" held sway, they became even more prominent. Why have such stupid things prevailed for over 20 years and not been effecitvely stopped? I think we must search for the causes from certain shortcomings in some of our systems:

1. Concerning the system of democratic centralism, at certain times and in certain times and in certain places and units it becomes a mere formality and is not actually carried out. When economic construction is attempted, decisions are often made on the basis of a few people's subjective will. How then can stupid and strange things be prevented from occurring? In order to avoid or reduce stupid things like the project to "divert water from west to east," we must genuinely respect the rights of people's representatives as masters of the house. On major construction projects related to given districts and units, leading government organs at various

levels must submit detailed reports to people's congresses at corresponding levels and their standing committees (including programs of design and operation, natural conditions, economic results, investment figures, sources of capital, etc.), give full scope to democracy, open up wide channels for comments and suggestions, appraise the possible advantages and disadvantages and gains and losses, and then make the final decision. On certain stupid things along the lines of the project to "divert water from west to east," people's congresses at various levels have the right to veto them."

2. Economic construction must operate according to economic laws and natural laws. Economic results should be taken as the only criterion for measuring a construction project, and no premium should be placed on any so-called "political needs." But "political" projects in the past always put the political needs of certain leaders in the place of first importance, completely ignored economic results, and hence turned solemn economic construction of the state into the political capital of individuals who were seeking to win a reputation, establish a record, or achieve higher office. Political projects of this kind often violated objective laws and could not but eventually become subject to punishment. In the end, certain individuals reaped benefits, the state sustained injuries, while the people suffered disasters. From now on, we must fundamentally seek to change this state of affairs.

3. We must work out good economic legislation and establish organs to exercise economic supervision. Since the founding of our state, we have formulated "Regulations on the Punishment of Corruption," but we have failed to come up with a corresponding law to constrain those who waste the state's capital. In the case of those who caused large amounts of waste, legal responsibilities and administrative responsibilities were seldom traced. Some only took a light approach by producing a self-examination in order to have their cases set aside. Thus, certain leaders were objectively tempted to issue blind commands, eyeing only their own face and so-called political needs, while ignoring the interests of the state and the people and unscrupulously wasting large amounts of the state's financial resources and the people's labor. The masses have reflected: "When they use the money of the big boss, they feel no pain whatsoever"; this hits the nail right on the head, indeed.

Today we have already entered a period of economic construction with the four modernizations as its central concern; the scale of the state's construction work has become larger and larger, and investments have become greater and greater. To work out good economic legislation, prevent and reduce the practice of wasting large sums of the state's capital, and give full scope to the economic results of investment have already become urgent tasks. Apart from this, we also need to establish economic procuratorates at the various levels and confer upon them duties and powers similar to those of people's procuratorates at the various levels, so that they can specifically supervise and inspect various measures related to economic construction, accept the people's disclosures, exposes and accusations, and render corresponding adjudications.

Irrigation Canal

Beijing RENMIN RIBAO in Chinese 9 Ag8 80 p 2

[Letter from Huo Baozhong [7202 1405 0022], Jiaocheng County Party Committee, Shanxi Province: "It Is Also Foolish for Jiaocheng To Build Ganquan Irrigation Canal"]

[Text] After the story on the suspension of Xiyang's project to "divert water from west to east" was publicized in the newspaper, it aroused a drastic reaction among Jiaocheng County's cadres and masses. The standing committee of the county party committee and responsible persons of various departments, together with secretaries of various communes, studied and discussed the PEOPLE'S DAILY editorial, and comrades of the water conservancy department held a forum. Everybody was of the opinion that the editorial said what everybody had wished but dared not to say for a long time, as the "Ganquan Irrigation Canal" newly built by Jiaocheng was also a project, worked out under the influence of the ultraleft line, which tired the people out and wasted financial resources for nothing.

The "Ganquan Irrigation Canal" was originally an old irrigation project in Jiaocheng County; it had already had a history of several hundred years. After later expanded construction it should, according to plan, irrigate 400,000 my of land, but in reality it irrigated on 20,000 mu. The source of water was never sufficient; yet efforts were blindly made for the abandonment of the old canal in favor of the construction of a new one.

The new canal was designed and built halfway up the hills; it runs from west to east through four hilltops with four separate channels. It was necessary to dig 9 li of tunnels and build a canal winding along the hill slopes for 40 li, known altogether as "50 li of gan quan [sweet fountain] flowing along the hill slopes." According to preliminary auditing, it was necessary to construct more than 1.1 million of earth/rock blocks, put in more than 1.1 million man/workdays, invest more than 5.2 million yuan of capital, and, according to plan, do 3 years' work in 2. Work began in December 1977 and finished at the end of June 1979. Today, less than 20 percent of the total work has been accomplished, more than 520,000 man/workdays have been put in, and more than 2.45 million yuan of funds have already been spent. If the whole project is to be completed, much more money will have to be spent, but in reality the [new canal] will not irrigate more land than the old one.

How did such a project, which has tired out the people and wasted financial resources to the extreme, ever get started? In the spring of 1977, the Jiaocheng county party committee readjusted its ranks; comrades from Xiyang came to Hiaocheng to preside over the task, wishing to transplant Xiyang's experience intact to Hiaocheng. At the time, some leaders looked upon themselves as saviors; soon after their arrival, instead of doing any investigating as to the actual situation with the Ganquan Irrigation Canal or developing any respect for the opinions of the technical personnel and local irrigation cadres, they paid no attention as to the required size of the investment and went straight ahead to make the subjective, blind decision to dig tunnels and build the canal halfway up the hills. During the period when work first got started, some comrades expressed some opinions, but some leaders of the county party committee could accommodate not even half a point of a different opinion.

As for the guiding ideology on the design and operation of the project, plans were laid out according to imagination, efforts were aimed at creating scale and a foreign outlook, and decorative work was attempted. For instance, when the section of the construction job from Shibi Channel to Shishu Channel was designed, the requirement was inserted that it be done as a project for the benefit of visitors; thus, apart from the channel to be dug, a visitors' road for car traffic must also be built. A bridge therefore was added above the viaduct so that cars could be driven on the bridge, and it was also required that people in the cars should be able to see the noisy running water. All this consequently incurred the unnecessary additional consumption of manpower and material and financial resources, and the waste caused by the project became shocking.

At a recently convened meeting of commune and production brigade cadres, responsible comrades of the county party committee spoke of the lessons from this project, indicating that we should take it as a warning. This was welcomed by the attending comrades.

FROM PROLETARIAN DICTATORSHIP TO PEOPLE'S DEMOCRACY

Hong Kong ZHENMING in Chinese No 34, 1 Aug 80 p 4

[Unsigned commentary: "A Suggestion -- The System of State Should be Changed from 'Proletarian Dictatorship' to 'People's Democracy' "]

[Text] Within the month, the Third Plenum of the Fifth National People's Congress will open and be under close watch from all quarters. Rather than present any perfunctory views, we wish to offer a suggestion:

Article One of the First Section of the Constitution stipulates the Chinese system of state. Henceforth, this should be correctly named a "people's democracy" rather than a "proletarian dictatorship."

There are five reasons for suggesting this change.

1. The term "proletarian dictatorship" came from abroad. It is true that both the Paris Commune and the world's first soviet state were created by the proletariat and invloved the proletarian task of overcoming the class enemies.

However, conditions in China were different, several classes joined together in revolution and the dictatorship is exercised by several classes. Although both the revolution and the dictatorship have proletarian leadership, nonetheless, such leadership does not alter the form or substance of the revolution and the new nation. In the past Mao Zedong adopted a "low key" to benefit the united front by intentionally changing "proletarian dictatorship" to "people's democratic dictatorship." This change was actually quite correct, because the term "people's democratic dictatorship" is more closely in accord with actual conditions in China.

2. This is so even for developed capitalist states which undergo revolution and establish proletarian dictatorship. According to the theories of Manx-Leninism, when these countries enter the first stage of communism (socialism) and the class struggle has basically subsided, there is no particular need to emphasize proletarian dictatorship. "After the revolution any provisional state structures will require a dictatorship." (MA-EN QUANJI [COMPLETE WORKS OF MARX AND ENGELS] Vol 5, p 474. Author's emphasis.) "There is absolutely no difference between...the concept of proletarian dictatorship and overcoming capitalist resistance." (LIENING QUANJI [COMPLETE WORKS OF LENIN] Vol 25, p 49) Obviously, after "capitalist resistance" has effectively been overcome and repressed, there is a steadily decreasing need for proletarian dictatorship. In Yugoslavia under Tito, where the level of Marx-Leninism was relatively high, within a few years after establishing the new government it was announced that a system of socialist self-rule would be established, that there would be no more "proletarian dictatorship," and that the substance of self-rule would be the people's democracy. This experience is worthy of consideration.

3. After the new China was established the citizens of this state were composed of the worker class, the peasant class, the petty bourgeoisie and the national bourgeoisie all of whom had equal political status, and among the people there were no relationships of dictators and those under a dictatorship. After completion of the three great transformations and the basic destruction of the exploiting classes, there was even less need for the terms "proletariat" and "proletarian dictatorship" in the questions regarding the state system.

4. In the political life of a socialist state, democracy is the main feature of and is also the prerequisite for dictatorship. "The first step in a worker revolution is to elevate the proletariat to be the ruling class and fight for democracy." (MA-EN QUANJI, Vol 4, p 486) "If victorious socialism does not implement full democracy it will not be able to hold on to victory." (LIENING QUANJI, Vol 23 p 70) During the Enlarged Central Committee Work Conference of 1962, Mao Zedong said: "Without democracy there is no way to mobilize the people and there is no way to oversee the people, so it would be impossible to exercise effective dictatorship over reactionary elements." Although China is engaged in a class struggle at present, the target of this struggle itself is decreasing day by day, and the struggle itself is becoming milder day by day. It is abundantly clear that in the question of whether democracy or dictatorship should take precedence, the term "proletarian dictatorship" is obviously out of keeping with the times. The term "people's democracy" suits the basic features of the

nation's political life as its connotations encompass the dictatorship over or repression of the extremely small minority of reactionary and criminal elements.

5. The saying "If the names are incorrect then the words will be unsuitable" can be supplemented with: If the words are unsuitable then the actions will be incorrect. For the past 30 years, some people in power have been putting "proletarian" hats on themselves and have sought to be superior to others by labeling all those they wish to attack as "bourgeois" and by carrying out a "dictatorship." On the one hand this confuses the two types of contradictions and sees the people as the enemy and on the other hand it overturns the relationship between democracy and dictatorship even to the point of only speaking of dictatorship and not discussing democracy. Under such conditions, the intellectuals, who as a group were always labeled "bourgeois" were constantly encountering calamities, and during the "cultural revolution" even the old and middle-aged cadres suffered deep harm. It is obvious that in this present stage, calling our system of state by the incorrect term "proletarian dictatorship" gives advantages to the improper acts of plotters and ambitious persons and perpetuates the unnecessary disasters suffered by our people and the nation. This historical lesson must be absorbed, now is the time to rectify names.

From the above five points it ought to be clear that to call our system of state a "proletarian dictatorship" is impractical and unrealistic and transgresses against the principles of Marx-Leninism. Therefore, it must be rectified and replaced with the term "people's democracy." This of course is not merely a question of concepts, but has practical significance:

This change is beneficial to the establishment of a true people's democracy.

This change is beneficial in eliminating the intellectual's lingering fears and fears for the future.

This change is beneficial in mobilizing mass enthusiasm for building the four modernizations.

This change is beneficial in opposing feudalism, bureaucratism and privileged behavior.

We hope that the Communist Party, the people's representatives and the people's congress will give consideration to this suggestion, and also hope our readers will express their own opinions.

WANG DONGXING AND CENTRAL COMMITTEE MEMBERSHIP ELECTIONS

Hong Kong ZHENMING in Chinese No 34, 1 Aug 80 p 14

[Article by Miao Shuo [5379 3617]: "Wang Dongxing is a Candidate for Party Central Committee Membership"]

[Text] Before leaving Hong Kong I had heard news that the Chinese Communist Party would convene the 12th Party Congress either late this year or next spring. All my Hong Kong friends who are concerned about Chinese affairs were discussing the matter.

"Who will be elected to the Party Central Committee this time?"

"Which people will fall from power?"

"Will this congress produce any new resolutions or reforms?" and so on.

In short, this particular congress was drawing a great deal of attention.

When I arrived in Beijing, I discovered that the people there were thoroughly indifferent about it, no one was discussing or even interested in the congress. At present, most people are particular about material benefits and give no thought to political matters. I spoke to a young worker about this, he shrugged his shoulders saying: "Its the same no matter who is elected. It just those few people trading places. Anyway, I'll never be elected, so why should I care? Its better to pay some attention to when I'll get a salary increase and when I'll get some bonus money."

The words of this young worker reflect the attitude of a portion of the people.

However, there still are some people in Beijing who are concerned about politics and the current situation. Perhaps some are unconcerned, but those who are concerned generally have relatively accurate information, so a discussion with them can really open one's eyes.

Wang Dongxing, Chen Xilian [7115 6932 5114] and Wu De [0702 1795] are all candidates for Party Central Committee membership in the 12th Party Congress. This startling news was given to me by an "informed source."

I wondered at this: "Didn't the resolution of the Fifth National People's Congress eliminate their leadership positions and responsibilities in the Party and the government? Why are they permitted to be candidates for membership?"

"This is precisely where the highest authorities are showing their skills. To let them be candidates in the mass election and fail is really to deprive them of power. And won't they emerge in such a bad light that they will have to be completely submissive?"

"Will they lose for sure?"

"Just as long as it is not a limited candidate election they will surely lose. In the past Chinese elections were always limited candidate elections, so the number of candidates and the number of people elected were exactly the same, and there really was no room for choice as all the candidates were elected. There have been some recent changes; election to the Central Committee Secretariat of the Fifth National Congress was not by limited candidate election, but rather was an unlimited candidate election. Calculations are that the 12th Party Congress won't be having a limited candidate election either."

Does Wang Dongxing still live in Zhongnanhai?"

"No, he moved out of there two months ago."

"Is that imposing home he was building finished yet? What is it used for now?"

"Its finished, and is used by the Central Committee Propaganda Department. They worked out of the Diaoyutai before, but have now moved into Zhongnanhai."

The very mention of Wang Dongxing's change of residence stirred those friends to angrily tell me that the moving operation was really "imposing," requiring two days just to move his belongings.

"Huh, when we ordinary citizens move it takes but a three-wheeled cart and a couple of hours to finish the job, we certainly have no property such as his!"

This hatred of special privileges is common to both those concerned and those unconcerned with politics. Their common hope is that the cadres will limit their own privileges and provide more benefits for the people.

CRITICISM OF MAO DISCUSSED

Hong Kong ZHENMING in Chinese No 34, 1 Aug 80 pp 28-29

[Article by Wei Feng [1550 1596]: "The Dangers of Chinese Communist Criticism of Mao"]

[Text] Recently, a cable from abroad reported that the Chinese communists had drafted a document criticising Mao Zedong and that it might be given internal circulation.

Could this be true? Or is it false?

All the way from Hong Kong to Beijing this is the most pressing of questions.

Friends who are in the know say that it is half true and half false.

There definitely is a document in draft form, but the main content is not critical of Mao Zedong. Instead, it is concerned with such historical topics as the Great Cultural Revolution, criticism of Lin Biao and Confucius and criticism of Deng Xiaoping. However, it definitely does touch upon the topic of an evaluation of Mao Zedong. The document is a draft resolution in preparation for discussion during the Sixth National People's Congress and passage by the 12th Party Congress, though perhaps it might even first be passed by the Sixth National People's Congress. The claim made in the foreign cable that the document had been circulated internally is premature.

According to friends, the Sixth National People's Congress is to take place before too long. However, the 12th Party Congress, originally scheduled for the end of this year, might not be held before next spring. "This was mentioned by Hu Yaobang [5170 5069 6721] in late June during a report on the problems of middle-aged and young cadres.

Why is the Truth yet Untold?

Why should the Chinese communists wish to make a resolution concerning a historical problem? The reasons are said to be complex. The immediate cause for this matter was the 16 May 80 RENMIN RIBAO editorial titled "Restore the Original Mao Zedong Thought -- A Discussion of the Rehabilitation of Comrade Liu Shaoqi," Which stirred up conflicting feelings throughout the nation. One common opinion was:

Since Liu Shaoqi is to rehabilitated, why should the truth remain untold?"

What made people dissatisfied was the editorial's attitude of covering up for Mao Zedong.

Wang Renzhong Makes a Deletion

It is said that the RENMIN RIBAO editorial originally contained a brief section which evaluated Mao Zedong, and the remarks viewed Mao in the spirit of dividing one into two. However, Wang Renzhong [3769 0117 6850], Director of the Propaganda Department, deleted this whole section.

In order to placate mass feelings, the Party Secretariat then decided to quickly draw up a draft resolution regarding certain historical questions, and this document was to evaluate Mao Zedong's successes and failings and rights and wrongs. They even immediately notified the whole country that this resolution would be passed at the Sixth National People's Congress or the 12th Party Congress.

Hu Yaobang First Leaks the News

Just at his time, when speaking with a YUGOSLAV NEWS AGENCY reporter, Hu Yaobang made some appraisals of Mao Zedong. The General Secretary said: "Mao Zedong made enormous contributions to the Chinese revolution and the Chinese Party. But he also committed errors, especially in his later years. These errors brought misfortune to the Chinese Party and the people. Chairman Mao and other leaders bear the responsibility for the abnormal conditions which developed during the Cultural Revolution." On 21 June 80, the YUGOSLAV NEWS AGENCY broadcast the remarks Hu Yaobang had made to their reporter, and the XINHUASHE compilation "CANKAO XIAOXI -- NEWS REFERENCES" quickly translated and reprinted them.

Friends in Beijing say that Hu Yaobang's remarks were in the tenor of the Central Committee document evaluating Mao Zedong.

In Peeling Bamboo Shoots One Encounters Resistance

I have the feeling that in broaching the subject of criticism of Mao Zedong, the Chinese communists are adopting an approach like that of peeling bamboo shoots, which is to peel first one layer and then another, and at a slow tempo. Why are such slow movements necessary?

One important reason is that there is resistance.

This is to say that some people are opposed to or not greatly in agreement with criticism of Mao Zedong. They either wish to safeguard his image or wish to safeguard their options to cover themselves. Because of this, even though there is an ongoing struggle it primarily is in the realm of ideology.

The question of a memorial service for Liu Shaoqi revealed this struggle. On October 14th, the GONGREN RIBAO published an article by Wang Guangmei [3769 0342 5019] titled "In Memory of Comrade An Ziwen"[1344 1311 2429], which reported that An Ziwen,(former Director of the Central Committee Organization Department, a powerful assistant to Liu Shaoqi, and, after the fall of the "Gang of four," Vice President of the Central Committee Party School) on the eve of her death said: "Rehabilitation of Comrade [Liu] Shaoqi would be a victory, but not a complete victory, as the poisons of Lin Biao and the "gang of four" have not yet been liquidated, so be careful...."

Incomplete Victory

During the Fifth National People's Congress held this February, there was a decision to rehabilitate Liu Shaoqi and hold a memorial service for him; the service was held in April, but with some unexpected turns so it is imaginable that the result of the struggle was victory, "but an incomplete victory," and that one must "be careful" in the future. This shows the complexities of the matter.

Posters Reading "Smash Liu Shaoqi"

The memorial editorial for Liu Shaoqi in the RENMIN RIBAO said that in order to rehabilitate Liu Shaoqi the Central Committee took "certain dangers" upon itself. Why should redressing such a great injustice pose any dangers?

The answer is that some people are opposed to it, are opposed to any negation of the "Great Cultural Revolution," and are opposed to revealing any of Mao Zedong's failings or errors. These people of course are not the "small gang of four" of

Wang Dongxing [3076 2639 5281] and the rest. When An Ziwen said to "be careful," she obviously had not meant the "small gang of four" because they had already been smashed when she spoke.

Here, my dear readers, I want to report to you an arresting sight I personally saw. In the neighborhood of the Beijing Zoo there appeared two posters with large letters saying, "Smash Liu Shaoqi." Unfortunately, I did not have a camera with me to record this sight. However, this gave me the very deep impression that although those opposed to Liu Shaoqi and Deng Xiaoping are a very small minority they do exist and are active.

Western Reporters Overlooked Two Matters

Those holding power in the Central Committee are taking a serious approach to the possible development of any of those "certain dangers." During the Liu Shaoqi memorial service on May 17th, the foreign reporters overlooked one situation which was that outside of the Great Hall of the People where the services were held, there were gathered many groups of people who expressed their sorrow, all the while noting who did and did not attend the memorial services. Another situation which made people take notice but which was overlooked by the Western journalists was that two days after the memorial services the "Mao Zedong Memorial Hall" was reopened. For a period of time this memorial hall was not open to the general public, so that the Chinese had no opportunity to view Mao's remains. However, on May 18th, all Beijing units issued tickets to individuals, small groups and collective viewers to enter the memorial hall. Could it be that the reopening of the memorial hall and the memorial service were an entirely unrelated timely coincidence? Of course not. It certainly was timely, but a timely arrangement and no coincidence at all. It is not hard to fathom the thought process of those in power. They had calculated beforehand that a Liu Shaoqi memorial service might stir up some people into making trouble and causing a reaction against either Liu or Mao, so they made precautions on both sides, the main action being the opening of the Mao Zedong Memorial Hall the day after the memorial service for Liu Shaoqi. This let people know that to rehabilitate Liu was not to oppose Mao or to be anti-Maoist.

A Balanced Strategy Overcomes Dangers

Those in power were very careful to use a balanced strategy. The evidence of this policy could also be seen in the wording of the memorial speech.

The purpose of this balanced strategy was to blunt anyone's feelings and eliminate any dangers.

The result was a victory. There were winds but no danger and an alert with no harm.

Of course, it is just like An Ziwen said: "It still cannot be counted as a complete victory as the poisons of Lin Biao and the "gang of four" have not been eliminated, so be careful...."

However, after the campaign to rehabilitate Liu Shaoqi, Mao's image no longer seemed to be quite the same image.

Do Foreigners See Things Correctly?

Some people overseas believe that the May 16th RENMIN RIBAO editorial "Restore the Original Mao Zedong Thought" was not appropriately titled. These opinions hold that in those years it was Mao Zedong who "bombarded"" the "headquarters" of Liu Shaoqi. Mao's thought was meant to overthrow Liu Shaoqi's "revisionism," and to rehabilitate Liu at this time is to affirm that he was a great Marxist, which is to negate Mao's thought and actions. Therefore, the use of "restore" in the RENMIN RIBAO editorial becomes a humorous contradiction, a statement which simply cannot be justified.

A few intellectuals that I ran into in Beijing had differing views on the appropriateness of the title "Restore the Original Mao Zedong Thought." They said that the Chinese communists believe that Mao's thought has two major features: The first is that it is the crystallization of collective wisdom rather than a "work of genius" by Mao alone. The second is that it is a "scientific system," and only that which is precise and scientific is considered Mao Zedong thought. In the last 10-odd years Mao Zedong thought has been distorted beyond recognition and cut up and broken so that right and wrong are indistinguishable. In his old age Mao himself often violated Mao Zedong thought, so that there were contradictions between the thinking of Mao Zedong the man and the Mao Zedong thought of the crystallization of collective wisdom and the scientific system. This problem must now be clarified, which is to say that it is necessary to "Restore the Original Mao Zedong Thought." So the practical and realistic move to rehabilitate Liu Shaoqi is also a result of the move to restore the original Mao Zedong thought. Therefore, the RENMIN RIBAO ran the editorial on this "restoration."

This writer believes that their view of the matter is not mistaken. This writer also believes that although there is nothing wrong with the title of the RENMIN RIBAO editorial, it can lead to misunderstandings. It is possible, however, to understand the mental construct of the RENMIN RIBAO and the highest authorities: You say that for me to praise Liu is to blame Mao? OK, I'll just say that to rehabilitate Liu is to "Restore the Original Mao Zedong Thought." In this way the opposition has difficulty in finding a handhold to take any action.

RISE OF CHEN YONGGUI, FRAUD OF DAZHAI

Hong Kong ZHENGMING in Chinese No 34, 1 Aug 80 pp 50-52

[Article by Chin Jin [4440 2516]: "The Chen Yonggui [7115 3057 6311] I Know"]

[Text] Wrapping a white towel around his head and wearing a peasant suit, Chen Yonggui, with an honest and sincere expression, traveled from Shanxi's Dazhai to Beijing, became a member of the Party Central Committee, joined the Central Politburo and served as a vice premier of the State Council. When he, with the status of a vice premier, led delegations abroad, received foreign visitors and inspected the rural villages in the various provinces of the country, the comments were many. Some people said: Chen Yonggui's style of hard work and simple living remains unchanged. Others said: Chen Yonggui should stay in Dazhai to "defend the flag." What qualifications does he have to become a vice premier? Still others remarked: For a vice premier with his kind of appearance, feigning poverty and playing dumb, it damages China's prestige.... The comments were many. Whether right or wrong, the writer was also confused. However, it happened that the writer, during the middle period of the Cultural Revolution (1969 to 1974), worked for several years in a local organ in Central Shanxi and had some knowledge of Chen Yonggui.

Special Titles

Chen Yonggui's entry into the Central Politburo of the Chinese Communist Party occurred during the 10th Party Congress in 1973, while his selection as a vice premier of the State Council happened at the 4th People's Congress in 1975. However, the Chen Yonggui prior to that was no longer just a secretary of the Dazhai brigade party branch. As early as 1967, upon the formation of the Shanxi provincial revolutionary committee, he became its vice chairman (Liu Geping [0491 2706 1627] was chairman). Subsequently, he served concurrently as the chairmen of the Central Shanxi regional and the Xiyang county revolutionary committees. After 1971, he became secretary of Shanxi provincial, Central Shanxi regional and Xiyang county party committees. After his promotion to Beijing, he still retained all the titles. In view of such special titles, one cannot help but believe in his success, his skill and his bureaucratic fortune. From the secretary of the most basic level party branch, the Dazhai brigade, to a member of the supreme Central Politburo, he indeed enjoyed many official posts!

Between the "Local Tyrant" and the "New Warlord"

Chen Yonggui's bureaucratic star rose during the Cultural Revolution. However, what was amazing was that, while others promoted factionalism and fought factional wars and were badly battered and injured in the process, Chen Yonggui "benefited from the misfortunes" and won promotions.

Between 1968 and 1969, factionalism turned heaven and earth upside down in Shanxi. After the formation of the provincial revolutionary committee, the "local faction" under Liu Geping, its chairman, and the "army support-leftwing faction" under Zhang Riqing [1728 2480 3237], its vice chairman, competed against each other. The Zhang Riqing faction called Liu Geping the "local tyrant of Shanxi" (a Yan Xishan-type figure), while the Liu Geping faction reviled Zhang Riqing as a "new warlord." Both factions resorted to "pen and force" in their strife. From Datong in the north to Zhongtiao Mountain in the south, from the provincial capital of Taiyuan to Dazhai brigade, they were locked in fierce battles. In the summer and fall of 1969, both factions, infuriated in their struggles, mustered forces and prepared for a final decisive battle in Taiyuan, the provincial capital. Fortunately, the central government became aware of the situation in time and issued an "announcement" banning armed struggles, and Taiyuan was saved from the fate of destruction. What was the role assumed by Chen Yonggui at this time? He also became factional, took Liu Geping's side, incited the masses to support Liu, practiced fraud, ran around campaigning, and produced a bad effect. However, after banning armed struggles in Taiyuan, at the "study class" for Liu, Chen, Zhang and others called by the central government, Liu Geping and Zhang Riqing were dismissed from their posts, while Chen remained unscathed, because he made a "profound" self-criticism and concealed his "bureaucratic aspirations," which were the source of his factionalism, by calling it an issue of understanding. Thus, he retained his bureaucratic position (he already became a member of the Party Central Committee at the "9th Congress" of the Chinese Communist Party in April 1969) and rose ever higher. Nevertheless, after the struggles, people began to gain a new understanding of Chen Yonggui. At least, the people of Shanxi found that he was merely one of those!

However, as the red flag of Dazhai was personally erected by Mao Zedong, and as Jiang Qing also took a fancy to Dazhai in the 1970's, frequently coming to Dazhai for a spin and taking pictures, Chen Yonggui well understood the intricacies and knew how to curry favor with "Mama Jiang," while the latter also saw him as a utilizable signboard, thus paving the way for his promotions. If we visualize the grand and spectacular sight of Dazhai, Chen's hometown, in the 10 years of the Cultural Revolution, we will realize that he was very skillful in bending with the wind; if we recall how he "wished he could swallow Jiang Qing alive" (general idea), we will have no difficulty to see that this individual was good at telling lies and playing dumb.

"New Stuffs"

It was where the problem was. Originally, after the liberation of the Central Shanxi region in 1945, Chen Yonggui, in leading the people of Dazhai to reform the natural environment and develop production, indeed made some achievements, resolutely turning a poor mountain hamlet of "7 ditches, 8 ridges and 1 slope" into a fairly well-to-do new rural village. Dazhai's grain output per mu in 1953, for instance, was only 250 jin, but increased to 543 jin by 1958. Dazhai could be considered one of the advanced models in the construction of socialist new rural villages in the 1950's, or, to put it more accurately, one of the advanced models in mountain area rural construction. Chen Yonggui was indeed a good branch secretary. However, after Mao Zedong issued the appeal to "learn from Dazhai in agriculture" in 1964, Dazhai gradually took on a mystical hue. As the party branch secretary of the Dazhai brigade, Chen Yonggui was raised to an improper height and became the "prototype" of China's peasants, the "model" of rural cadres, and an "omnipotent talent." During the Great Cultural Revolution, to demonstrate that Dazhai was a "paragon of continuous revolution under the proletarian dictatorship," that its people "attacked without cessation," and that it had "new stuffs" year after year, and to cater to the need of the then spreading "leftwing" line in accordance with the different political climate, Chen Yonggui began to "create new patterns" and learned how to brag and exaggerate.

In rural economic policy, besides "workpoint evaluation according to politics" and "the brigade as the basic accounting unit" (the rural people's communes in the whole country generally used the production team as the basic accounting unit), Chen Yonggui advocated "shutting down market trading," "abolishing family plots, "eradicating household sidelines," etc., and, with these as capital, he bragged about and spread them everywhere. From 1972 on, he traveled to Guangdong, Shaanxi, Guizhou, Gansu, Shandong, Liaoning, Xizang, Guangxi, Fujian, Jiangxi, Zhejiang and Shanghai to make inspections and "imparted experiences" at the meetings to learn from Dazhai in agriculture held in such areas.

On the political-ideological front, he portrayed the Dazhai people as experts in the class struggle and true rebels in the Great Cultural Revolution, and flaunted them as the "vanguard" in seizing power from the capitalist roaders, the "pathbreakers" in criticizing Lin Biao and Confucius, the "brave men" in "counterattacking the rightwing reversal trend," and the "indomitable heroes" in struggling against Lin Biao and the "gang of four." Whenever the delegates of the various trades and professions throughout the country crowded below Hutou Mountain to "observe and learn," Chen Yonggui and Guo Fenglian [6753 7685 5571] (succeeding him as the Dazhai branch secretary) peddled such "new stuffs."

During the Cultural Revolution, the "gang of four" vigorously advocated the theory that even the basic level cadres, especially the "heroic models," " must not only lower their heads to pull the cart, but also raise their heads to see the way." It was actually asking them to embrace the "leftwing" line. With a tacit understanding of the point, Chen Yonggui was good at "raising his head to see the way." The "new stuffs" advocated by him proved the height of his "line awareness," which suited the "gang of four's" taste. The "ultraleftwing" line needed people like him in order to gain publicity with bravado, while Chen Yonggui hoisted the flag with the wind and shouted for everyone to advance.

A Phoney Thing; a Stupidity

Naturally, it was not easy to keep producing the "new stuffs" without interruption, especially for Dazhai. Dazhai first emerged as a red banner on the national agricultural front and Xiyang became famous as the first Dazhai county in the country. Their persuasiveness depended on the grain output. Meanwhile, the proof of the theory that "once the class struggle succeeds, production will automatically improve" also depended on the grain output. Thereupon, Chen Yonggui began to falsify and tell lies.

Xiyang county encountered an unusually severe drought in 1973. Chen Yonggui thought that, as he had served as the number one man of the county for 2 years already, this was a good chance to make a showing. At a meeting of commune secretaries, he personally took charge to "inspire" the commune secretaries to falsify the grain output. Seeing the intent of the superior, the commune secretaries complied. Reportedly, the total grain output of the county for that year was only 140 million plus jin, while the Xiyang county party committee headed by Chen Yonggui, on the basis of the "reports" of the commune secretaries, actually decided to make it 239 million jin, a discrepancy of almost 90 million [sic] jin. Once the figures were submitted to the superior level, the miracle of the "unprecedented severe drought, unprecedented vigorous effort, and unprecedented big bumper harvest" "created" by Xiyang county was immediately published in SHANXI RIBAO and picked up by RENMIN RIBAO, and the national campaign to "learn from Dazhai and catch up with Xiyang" acquired a new content. However, it gave the people of Xiyang a hard time. Since a "big bumper harvest" was reaped in a year of severe drought, besides the grain ration of an average year for the commune members, the remainder must be partly surrendered to the government as public grain and partly purchased by the state in support of construciton, and the commune members had to tighten their belts to make up the shortage. When the writer discussed this instance and Chen Yonggui's entry into the Politburo with a friend in the propaganda group of the Xiyang county revolutionary committee, he recited two lines of a poem: "Talk not about government appointments; the fame of one general cost 10,000 lives." When I asked him what he meant, he replied: "When one person becomes famous and wins promotions, cries of discontent are heard everywhere. I never thought Chen Yonggui was so good at lying, causing the hunger of the people below!"

Ever since Chen Yonggui started lying about the grain output in 1973, Xiyang county made false reports year after year. Even in 1977, after the downfall of the "gang of four," the discrepancy was 60 million plus jin. The total discrepancy of the 5 years was 272 million plus jin, almost 24 percent more than the actual amount. As reports were padded every year, many communes and brigades suffered grain shortages every year. In those years, Xiyang county enjoyed a high reputation in the nation, and who could have imagined that its people suffered so severely for the fraud!

Not only thus, but Chen Yonggui, after his promotion to Beijing, continued to exert "remote control" over Xiyang county and exercised "patriarchal" rule. In 1975, he participated in planning the project to "shift the water in the west to the east," wasted several million yuan of state money and performed a stupidity.

"Shifting the water in the west to the east" was a stupidity which wasted money and manpower. From the day of its planning, it ran into the opposition of the cadres with insight and the engineering and technical personnel. At that time, there was a public outcry in the county, and a violent dispute occurred between the correct and the incorrect views. Chen Yonggui and certain leaders of Xiyang county--Central Shanxi region--Shanxi province rejected the correct views, attacked their advocates and created an unjust case.

falsifying the output and "shifting the water in the west to the east," Chen Yonggui was responsible for the phoney deed and the stupidity in Xiyang county, and he owed its people a debt.

The "Whatever" in the Agricultural Policy

After the downfall of the "gang of four," Chen Yonggui, the dishonest peasant who was in luck during the Cultural Revolution, still wanted to hold on to the red banner of Dazhai.

In the early period after smashing the "gang of four," Chen Yonggui promptly "turned his weapon around and struck." Assuming the role of a victim, he vociferously discussed how Jiang Qing opposed Dazhai, how she smeared its red banner, how he and its people resisted, and how they struggled against the "gang of four."

However, with the movement to expose and criticize the "gang of four" and to bring order out of chaos, the pragmatists headed by Deng Xiaoping wanted to implement the economic policies and purge the "gang of four's" remnant ultraleftwing poison on the economic front, yet Chen Yonggui, Ji Dengkui [4764 4098 1145] and others who were in charge of agriculture desperately held on to the "gang of four's" stuffs and tightly grasped the red banner of Dazhai, blocking the implementation of the industrial, as well as the agricultural, policies. Chen Yonggui felt that his slogan that "vigorous criticism promotes vigorous effort; vigorous effort promotes great changes," his system of "workpoint evaluation according to politics," and his methods of "eliminating capitalism" and "poor transition" were 100 percent socialism, and that "the Dazhai experience attacked without interruption." However, the pragmatists waged a pinpointed struggle against his views. The newspapers and periodicals criticized false socialism, and the masses resisted it by practical actions and demanded true socialism. Thereupon, Chen and Ji Dengkui, resorting to their special skills, created such big labels as "anti-Dazhai" and "chopping down the red banner personally erected by Chairman Mao" and attached them everywhere. Anyone stressing household sidelines was growing a capitalist tail; anyone advocating market trading was restoring capitalism; anyone upholding the socialist principle of distribution according to labor was resisting "workpoint evaluation according to politics." If anyone criticized "poor transition," they countered that it was necessary and that only it would bring wealth. If anyone proposed diversification, they accused him of opposing "grain as the key link." The Chen Yonggui of this period actually followed the "whatever" principle in everything. However, without much theoretical knowledge, he did not dare to say much at the several important meetings of the Chinese Communist Party, and was not given much attention.

Time to Step Down!

One may say that the Chen Yonggui after the mid-1960's was tied to the war chariot with the "leftwing" line by the "gang of four" and used as a gun. Therefore, the "whatever" of those years was inevitable.

After the downfall of the "gang of four," Chen Yonggui's political star dimmed. With the intensification of the discussion on the criterion of truth, the loss of power of the "whatever faction," and the practical negation of the Dazhai experience, people predicted Chen Yonggui's certain downfall.

However, Chen Yonggui did not step down along with the "minor gang of four"--Wang Dongxing [3076 2639 5281], Wu De [0702 1795], Chen Xilian [7115 6932 5114] and Ji Dengkui. It was reported that, in the past year or 2, he was mainly engaged in self-criticism--doing so in the central government and returning to Shanxi province--Central Shanxi region--Xiyang county to do so.

Self-criticism is absolutely necessary. Chen Yonggui's issue is not a general one. His mistakes damaged the country and harmed the people. But just self-criticism alone seems to be inadequate. According to the writer's view, with his lack of ability and character, Chen Yonggui is not qualified to serve as a leading party and government cadre. He should be dismissed from his posts of vice premier of the State Council and member of the Central Politburo of the Chinese Communist Party and returned to Dazhai.

SITUATION OF DAZHAI AGRICULTURAL MODEL EXAMINED

Hong Kong ZHENGMING in Chinese No 34, 1 Aug 80 pp 53-54

[Article by Meng Ren [5536 0088]: "From 'Agricultural Model' to 'Political Model'"]

[Text] By July 1980, people finally learned through official channels how Xiyang misrepresented its output and undertook the large project of "shifting the water in the west to the east" which failed to benefit production but only wasted money and manpower, thereby fully clarifying the true situation of the artificial "Dazhai county" unknown to outsiders for many years. People also thereby realized that, to the leaders in Beijing, removing the "Dazhai model" was indeed not a light decision. However, to act according to the spirit of "seeking the truth from the facts" and solve the practical problems in China's socialist construction, it would have been difficult to progress if the truth of Dazhai was not made known, because the will of the superior to "learn from Dazhai in agriculture," like a 1,000-jin load, pressed down on the heads of China's peasants, and their misery and loss all these years were incalculable!

Today, from the results of "practical inspections," most artificial "models," be they "model plays" or agricultural and industrial models, were found to be wanting. The reason was because such "models" were not formed naturally by the law of development of things themselves. To put it more concretely, all the unsuccessful "models" were created to serve politics, to serve the ultra-leftwing line. In terms of Dazhai, after the failure of the 1958 "great leap forward," those who created and stubbornly adhered to the ultraleftwing line refused to admit their mistakes (forced by the situation, they did once casually admitted the mistakes, but immediately reneged). After launching the "anti-rightwing" movement to crack down on the good cadres in the party such as Officer Peng [1756] who had the courage to tell the truth, they vigorously fostered the cadres who "bent with the wind" and withheld the truth, and continued to defend the practice of boasting and the communist style. The Dazhai brigade headed by Chen Yonggui [7115 3057 6311] was thus chosen as the "agricultural model" and given aid in manpower (the PLA) and material (state funds), and artificially made into a false example of continuous "leap forward." In 1964, the song "Our Good Branch Secretary Chen Yonggui" was widely circulated! Thereafter, the "supreme directive" to "learn from Dazhai in agriculture" was published in the entire country.

Thousands and tens of thousands of rural cadres from all areas in the country were sent daily to Dazhai to observe and learn the spirit of of "hard work and energetic work" displayed by the Dazhai people in their "night battle at Langwozhang" and "chopping open Hutou Mountain." Barely freed from the 1958 great leap forward of "eating out of the same large cauldron," "camping in the field" and "3-foot deep plowing," the people were pushed into the new movement to "learn from Dazhai." The peasants could slow down, but the cadres must "produce achievements," for otherwise they would face dismissal and be accused of "rightwing opportunism," implicating even their wives and children! Thus, projects were started everywhere blindly and aimlessly, and the manpower and material of the production teams transferred without compensation. Everyone was exhausted, and normal agricultural production was held up. When the people complained, the leading cadres could only say: "We must do the political accounts, not just the economic accounts!" Whether to learn from Dazhai became an issue of "whether to be revolutionary," and no one dared to object! The "learn from Dazhai" movement of 10 plus years sapped the energy of the peasants in the whole country and dissipated their morale! Dazhai continued to welcome the peasant delegates of the whole country to come and observe, and its people were unable to conceal their exhaustion from the long-term excessive labor and the very low living standard of "coarse bread and pickles" throughout the year. What did they say to the visitors who had come to observe? Secretary Guo Fenglian [6753 7685 5571] informed the visitors that the basic experience of Dazhai was "vigorously promoting the class struggle... vigorously criticizing capitalism and vigorously promoting socialism," and that, "if the capitalist path is not blocked, socialism cannot stride forward!" What fine words! You come to Dazhai, and this is what you learn! (As for what is "capitalism" and what "socialism," the Dazhai cadres may not know what they mean even today.) The agricultural model of Dazhai thus turned into a political model, and one can imagine that the falsification of output became inevitable. Was it conceivable that the cadres got together to tell lies "to the party and Chairman Mao" when all areas falsified their output during the 1958 great leap forward? Were they not forced to suffer in silence?

Creating models and acting according to the will of the superior completely violate the objective economic laws. The 1958 "great leap forward" created the tragedy of starvation, but, as this tremendous mistake of the subjective idealist line was not exposed and criticized, it continued to harm the people by transforming itself into the "learn from Dazhai" movement. A "deity" was doing mischief in people's mind, and continued to do so for a period after the downfall of the "gang of four."

As small production was helpless against major natural disasters, the peasants of China, for thousands of years, had the negative idea of "submitting to the will of Heaven and resigning to fate." Therefore, the spirit of self-reliance demonstrated by Chen Yonggui and a group of Dazhai people, working hard and refusing to submit to the will of Heaven or resigning to fate, was very valuable. However, one must realize that such spirit was still founded on small production. There were different attitudes toward it. By extolling it, permitting it to "work vigorously and hard," and sublimating it endlessly to the stage of severance from the material conditions and deification in isolation, it was led astray, and actually wasted! The spirit of the "Foolish Old Man removing the mountain," as a whole, is good, and serves to improve morale. However, if it were not the Heavenly Emperor who was touched by such spirit of hard and rash work, but the snake god were sent to carry away the two big mountains, the harm to future generations would have been unimaginable. Today, are not half excavated hills seen everywhere in the country, because people were so exhausted that they oculd not complete the job? "Man will triumph over nature" is not a very scientific statement. Triumph over nature can only be accomplished by acting according to the laws of "nature." In the "learn from Dazhai" movement, the old saying that "man will triumph over nature" was made into an "incantation," the "theoretical" basis to issue blind orders and work rashly!

Stopping the Dazhai movement, permitting China's peasants to rest and recuperate, acting according to the economic laws, "bringing out the good points and avoiding the defects" constitute today the feasible means to develop China's agricultural production. While adopting the timely measures, the subjective idealism of issuing arbitrary orders must be vigorously and thoroughly criticized, beginning with the "people's commune" and the "great leap forward." No construction without destruction, for otherwise there can be no progress.

MAO ZEDONG'S MERITS, MISTAKES ASSESSED

Hong Kong ZHENGMING in Chinese No 34, 1 Aug 80 p 54

[Article by Fang Wen [2455 2429]: "How Should Mao Zedong's Merits and Mistakes Be Proportionated?"]

[Text] Who should be the ones to assess Mao Zedong's merits and mistakes? The 1 billion people of modern China are the ones most directly concerned. By their own experience and their personal gain or loss, they are the most effective witnesses and the best critics.

On Mao Zedong's merits and mistakes, some people suggest "70 percent (or better) to 30 percent," while others think that it should be "30 percent (or less) to 70 percent." As the views are many, no conclusion can be drawn. Some men of goodwill worry that new contradictions may result from the assessment and lead to confusion, detrimental to stability and unity and to the realization of the four modernizations. I feel that the simple use of figures is unscientific and worrying about getting into trouble and affecting the four modernizations superfluous. On the contrary, clarifying the right and wrong is most beneficial. Mao Zedong's tremendous merits before the founding of the nation cannot be obliterated, but nor can he be relieved of responsibility for the new ultraleftwing line formed after the founding of the nation and the resulting calamities and disasters. Therefore, a prompt and matter-of-fact assessment of all his activities and deeds, be they correct or erroneous, is called for. Clarifying the issue will benefit stability and unity and encourage the people to realize the four modernizations. Mao's merits and mistakes exist objectively in history. From the historical materialist viewpoint, stressing or overlooking either is not fair. From the dialectic viewpoint, the greater the achievements and the higher the prestige to start with, the stronger will be the effect afterward. On the issue of merits and mistakes, everyone must uphold the principles that "mistakes must be amended by merits" and that "mistakes cannot be offset by merits." A person who has made mistakes should be encouraged to repent and to render new meritorious service to the people, making amends for their mistakes by their merits. But a person who does evil on the strength of his merits and bullies others with his power must not be tolerated, because the people trust him for his merits and it becomes easy for him, with his prestige, to do evil, and the detrimental consequences will be inestimable. Therefore, to offset or conceal subsequent evil deeds with past merits will not do. It is even more impermissible for a person who, "once with power in his hands, issues orders indiscriminately," utilizing the power and prestige granted him by the people to do whatever he pleases, defying laws human and divine. If so, what is the use for the people to ask him to establish merits? Therefore, the principle that "mistakes cannot be offset by merits" means that today's mistakes cannot be offset by merits of the past. Past merits are past; today's mistakes belong to today.

Therefore, on the issue of Mao's assessment, it will be meaningless if we depart from the principles discussed above and argue about the mathematical percentages. We must make a comprehensive, historical and objective assessment, seeking the truth from the facts and refraining from sophistry and overpowering, so that different opinions and views are permitted expression, presenting the facts, giving the reasons and convincing people with facts and reasons.

The purpose of assessing Mao is to learn a lesson. It is hoped that the Chinese Communist authorities will not play coy, evading and equivocating, but speak frankly and activate the people to participate in the undertaking. The organs concerned should furnish the facts and information which can be furnished, so that the work of assessment can be launched concretely. Only thus will it be possible to thoroughly purge the remnant poison of the "ultraleftwing" line. It will indeed be the good fortune of the state, the good fortune of the nation!

DELETION OF 'FOUR BIGS' FROM CONSTITUTION CRITICIZED

OW100945 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT 8 Sep 80

[Text] The delegation of Article 45 of the Constitution has already been decided upon. Vice Premier Deng has insisted on banning the four big freedoms at various meetings since 1978. He has finally achieved his goal.

However, as was pointed out by some deputies at a meeting of the Presidium of the current NPC session, it is justified to correct past mistakes in practicing the "four bigs," but it is wrong to completely deprive the people of the democratic rights they have exercised for several decades.

At the Presidium meeting, three persons spoke one after another, saying that the past inclusion of the four big freedoms in the Constitution was forced by the "gang of four." This argument is extremely ridiculous. When the new Constitution was adopted in 1978, the "gang of four" had long since become stinking political mummies. The overwhelming majority of the people now sitting in the Presidium raised their hands than to support the including of the four big freedoms in the Constitution.

The allegations that in the past some people used the four big freedoms to attack party and state leaders, undermine stability and unity, create disorder in their units and so forth simply cannot be used as reasons to deprive the people of the four big freedoms. Any right, system and measure, when improperly applied, can cause mistakes and problems. We cannot give up eating for fear of choking. We cannot deprive 1 billion people of these rights because some people have misused them.

In the past 5 years, including the 4 years after the downfall of the "gang of four," we have failed to smoothly fulfill any national economic construction plan in any year. Because of imbalances caused by mistakes in planning, we have had to suspend construction of nearly 100 heavy industrial enterprises and so forth. If we are to act according to the principle of seeking truth from facts, does it mean that from now on we should not make plans and should not act according to them?

Moreover, since Comrade Deng Xiaoping criticized in 1978 the past policy of self-reliance and proposed the policy of actively importing advanced technology and equipment to speed up the four modernizations, the country has imported several billion yuan worth of foreign technology and equipment, a lot of which was bought with loans with high interest rates. However, some central leaders can only issue instructions and cannot make economic calculations. As a result, a lot of the imported equipment has become a burden because of a shortage of raw material and electric power, our inability to operate and repair them and lack of spare parts. The foreign exchange earned by the people, who work hard and economize on food and clothing, is thus wasted for nothing. Does it follow that because of what has happened our country will stop importing foreign machinery and equipment? Of course not. Why, then, are the four big democratic rights completely abolished just because some people have misused them?

Our party and army have the fine tradition of accepting supervision by the masses. Leading party, government and army cadres, particularly top leaders, should consciously place themselves under the supervision of the masses inside and outside the party. Only thus can subjectivism, bureaucracy, feudal autocracy and actions harmful to the interests of the masses be reduced to a minimum. But, instead of improving, perfecting and strengthening the people's democratic rights, we are blackening these rights wholesale and flagrantly depriving the people of these rights. This amounts to undermining the fine tradition of our party and army to accept supervision by the masses. Instead of warmly supporting and encouraging the proper growth of the traditional form of mass criticism and supervision, we are finding all kinds of excuses to vilify, check and eliminate them. This attitude is extremely wrong.

BRIEFS

PERSONNEL REORGANIZATION--The NPC will hold a plenary session this morning to vote on the reorganization of personnel of the NPC Standing Committee and the State Council. Voting will be by secret ballot. It is expected that the nomination of Zhao Ziyang as premier will be approved without difficulty. Later, Zhao Ziyang will put forward the list of newly added vice premiers. There is a great deal of speculation about Huang Hua, Zhang Aiping and Yang Jingren being nominated as vice premiers today. Huang Hua has been minister of foreign affairs for many years. Zhang Aiping is now chairman of the science and technology commission for national defense. Yang Zingren is chairman of the nationalities affairs commission. Their appointments as vice premiers will strengthen the leadership of the State Council in various areas. Because the reorganization of the personnel of the NPC Standing Committee and the State Council is voted on by secret ballot, the opening of the plenary session scheduled for this morning has been advanced 0830 and a computer will be used to count the votes. To avoid interference, those observers who do not have a vote, including CPPCC members, will all be seated on the 1st floor. Foreign correspondents and diplomatic envoys will be allowed to attend the closing ceremony this afternoon. [Chang Yun-feng] [Text] [HK100640 Hong Kong WEN WEI PO in Chinese 10 Sep 80 p 1]

GUANGDONG LEADERSHIP CHANGE--The governor and vice governor of Guangdong Province Xi Zhongxun and Yang Shangkun most probably will be appointed as vice chairmen of the NPC Standing Committee. The last day of the third plenary session of the Fifth NPC is 10 September. Changes in the personnel of the State Council and the NPC Standing Committee will be published in the morning and the closing ceremony will be held in the afternoon. Xi Zhongxun and Yang Shangkun are expected to be elected as additional vice chairmen. Besides them, Pang Chong, Ban Shan and Su Yu are also expected to be elected. These five people have already been nominated by the Presidium and if they are elected at the NPC session on 10 September, there will be changes in the Guangdong leaders. However, Xi Zhongxun probably will stay in Guangdong while Yang Shangkun will be transferred to Beijing. [Cheng Yun-feng] [Text] [HK100626 Hong Kong WEN WEI PAO in Chinese 10 Sep 80 p 1]

BRIEFS

EX-KUOMINTANG RADAR SPECIALIST--Beijing, 24 Aug (XINHUA)--Zheng Naisen, formerly a Kuomintang captain and assistant research fellow at a radar research institute under the Kuomintang's national defense ministry, has been appointed deputy chief engineer of a research institute by the PLA Air Force headquarters. He is now leading efforts in designing a new type radar equipment. Zheng Naisen, 56 years of age, graduated from Zhejiang University in 1946, served in the Kuomintang army for 2 years and returned to his hometown when Nanjing was liberated. On learning that the PLA had taken over the radar institute, he returned to the institute to give technical instructions. In the past three decades or so Zheng Naisen has been engaged in conducting radar research for the PLA Air Force. He was admitted into the CCP in 1978 and has been commended many times for his achievements in research work. [OW291331 Beijing XINHUA Domestic Service in Chinese 1211 GMT 24 Aug 80]

'RENMIN RIBAO' COMMENTATOR DISCUSSES TRAINING YOUNG PEOPLE

OW061325 Beijing XINHUA in English 1307 GMT 6 Sep 80

[Text] Beijing, September 6 (XINHUA)--Whether China can educate more young people and dare to promote them is vital to the success or failure of the country's modernization, says a today's PEOPLE'S DAILY commentator's article.

China's modernization, to a large degree, depends on the younger generation, says the article. "We should do away with backward and conservative ideas and reform many systems, including examination system, employment system and promotion system."

The article gives as an example of open mindedness the Chinese Academy of Sciences enrollment of 13 young people for graduate studies though they did not have college diplomas. There are many young people with great potential and the thing to do is to discover them and help them.

The article laments the fact that some leading comrades do not feel the urgency of finding people of great promise for the country's modernization. They either do not feel the need or else complain that there are none. Most young people want to study and accomplish something. They need encouragement and help.

However, the article goes on, some leading comrades, instead of caring for them and educating them, try to stifle them. They fear that giving working time to study may affect production. They set production against education, and are blind to the fact that without raising the workers scientific and cultural level, productivity cannot be raised. The article tells how a Zhengzhou factory put all kinds of obstacles in the way of a young worker who wanted to take T.V. courses.

The commentary urges leading comrades to create favorable conditions for talented young people to learn and mature.

MORE YOUTH TRAINING OPPORTUNITIES NEEDED

OW071305 Beijing XINHUA Domestic Service in Chinese 1223 GMT 6 Sep 80

[RENMIN RIBAO 6 September commentator's article: "Create Conditions for Young People To Become Persons of Ability"]

[Text] Beijing, 6 Sep--In his opening speech at the third session of the Fifth CPPCC National Committee, Comrade Deng Xiaoping pointed out: building China into a modern, powerful socialist country with a high degree of democracy and civilization calls for great efforts to bring into play the superiority of China's socialist system. Organizationally, we must do our best to discover, train and promote people who are qualified for the work of modernization, opening all avenues so that competent people can fully use their talents.

An important task confronting us is none other than training more young people to become persons of ability and selecting a large number of talented persons from among youth. People have different answers to such questions as "how should we treat the youth of this generation?" "Are there able young people around?" and "Can a large number of qualified personnel be trained from among youth?" Before we answer these questions, let us take a look at some examples.

Shen Youtang, age 28, of the Shukuang Hospital, affiliated to the Shanghai College of Traditional Chinese Medicine, graduated from a junior middle school in 1967. For a long time, he painstakingly studied the way to determine the output of an impeded heart [zu kang xin 7091 2123 1800]. He has achieved a great deal in his studies, filled a gap in China's medical science in this field and aroused international interest. Some foreign medical experts have asked him for relevant research papers. The international angiology committee offered him membership. In 1979 Shen Youtang was promoted a lecturer of the Shanghai College of Traditional Chinese Medicine.

Chen Ling, age 25, graduated from a junior middle school in Beijing in 1972. He has learned English, German, French and Russian in 8 years of hard self-study. He took part in the examination for linguists sponsored by the Bureau of Higher Education and came out fourth in the

English test among more than 100 competitors. Recently the No 1 branch of the Beijing Industrial University has hired him as a foreign language material clerk.

Su Yongiong, 31, was a worker of the Zhoudong County Brewery in Heilongjiang Province. For many years he has seriously learned vocational skills and made achievements in improving the quality of wines. HEILONGJIANG FAXIAO [HEILONGJIANG FERMENTATION] journal has published four research papers he wrote and hired him as a member of its editorial committee. One of his research papers is entitled "An Introduction to the Distillation of White Wine." He has been director of the brewery since 1979.

Zhang Yuanzheng, 30, is an educated youth who has settled in the Dongsheng production team of the Zhenzhu production brigade in the Changan commune in Arun banner of Nei Monggol Autonomous Region. Since he became leader of the production team in 1978, he has led the commune members in working hard and brought about great change in the team. Per-capita income among team members has increased by 100 yuan yearly in the past 2 years and 60 percent of the team's farming has been mechanized.

Zhou Jiwu, 30, of the data room of the Zhuzhou Municipal Electronics Research Institute in Hunan Province has translated more than 400,000 words over the past 4 years. With remarkable ability in organizing information collection, he is one of the sponsors for China's miniature computer information network. Recommended by four electronics experts in Zhuzhou Municipality, he has recently been made an exception in personnel regulations, being promoted engineer.

The above-mentioned examples are only a small portion of what has recently been reported by the press. In fact, many outstanding young people like them exist of various fronts throughout the country. Most of them were born in the 1950s and were indeed adversely affected by the 10-year turmoil. Nevertheless, many of them did not neglect their studies even in those turbulent years in which they could not receive adequate school education. They seized every minute and second and redoubled their efforts particularly after the downfall of the "gang of four." Therefore, they have made outstanding achievements on their workposts.

Facts show that youths now in the 20's or early 30's are not of a "collapsed generation" or "lost generation," although they were adversely affected by the turmoil. There are many persons of ability among them. It is important that we should take a broader view, know how to distinguish them and dare to select and promote them once we decide that they show great promise.

The Sichuan Provincial CYL Committee has helped Wang Yinju, a parttime worker, become an editor of theoretical materials which is an enlightening example indeed.

A senior middle school student interested in social sciences, Wang Yinju meticulously collected reference materials and wrote an article "The History of Communist Alliances," a subject on which few people at that time did any systematic study. However, for this article, he was considered "presumtuous" and "a dangerous element" and was forced to leave school. During the "Great Cultural Revolution," he was designated "ideologically reactionary" for the same reason and was put in jail on fabricated charges. Released in 1972, he became a parttime worker. In 1979 he appealed to the authorities concerned. Determined that Wang's was a wronged case and that he himself was a young man of great promise, the committee wholeheartedly helped solve his problems. It assisted the public security department to redress and rehabilitate him, and return his manuscripts to him, recommending him to the Sichuan People's Publishing House where he became an editor in the theoretical editorial room. This highly reponsible attitude of seeking, discovering and fostering people of great promise should indeed be encouraged.

Contrary to this example, some comrades do not feel it urgent that a great number of talented people are needed in the modernization drive. With plenty of cultivable talent around, these comrades just do not show concern for them, train them or use them. They even repress, stifle and ruin them with all sorts of excuses. A young man of Lanxi County, Zhejiang, named Li Zixian, was quite good at raising bees. Since 1975 he had published over a dozen commendable articles on the theory and practice of beekeeping in the magazine CHINA APICULTURE. Simply because he had an undesirable family background, he was driven out of the bee farm and was forced to work at a foodstuff center. Terribly pained by the separation from the bee farm, he has appealed several times to be sent back. The problem is not yet solved. Cases like this--cherishing no talents, not putting their strong points to use but putting them in a difficult situation and even unreasonably repressing them--can be found in many places and units. Leading cadres at all levels should take note of these cases as food for thought.

Some cadres always lament the shortage of talent but make no efforts at all to cultivate it. To cultivate young people of promise means helping a great number of them make up for lost time, time they have been forced to lose. Nowadays, many young people are keenly enthusiastic about study and eagerly want to acquire some knowledge by all possible means. This is something valuable. Leading cadres should do their best to facilitate their study and create conditions for it so as to train more talent. Some leading cadres are only concerned about immediate production tasks and are terribly afraid of letting young people have some time to do study lest "production be affected." Thus, they set production against education, not knowing that without raising the workers' scientific and educational level, it is impossible to raise production efficiency and even impossible for them to handle the advanced equipment and master advanced technology. This is shortsightedness, unable to perceive the long-term benefits. What is more serious is that some leading cadres not only refuse to give support to but go out of their way to obstruct or even abuse young workers who are keenly interested in attending television or spare-time universities. Quite a number of young people have sent letters to newspapers complaining against this situation. Recently HENAN RIBAO published a letter from Zhang Qinghua, a worker of the experiment plant affiliated to the Zhengzhou Machine Manufacturing School under the First Ministry of Machine Building, saying: He became a full-course television university student last year after obtaining approval of the leadership and passing an examination, studying in daytime and doing production work at the work shop at night. Later, the party committee demanded that he fulfill the monthly work-hour quota. Knowing that it was difficult to carry out this order, he was willing to do half the work and have his wages cut by half. Not long afterwards, the party committee disqualified him as a television university student, saying that he had not worked enough. To fulfill the quota of work hours, he asked his wife to work at the workshop with him, leaving their baby in the locked house. Even then, the party committee sent people to the classroom to drag him out. He insisted on attending the class. The party committee held a number of meetings to criticize and denounce him by name and ordered the workshop to organize meetings to do the same. Later, his wages were withheld for 8 months and he was given a warning on the pretext that he could not do day-shift work and it was impossible to give him another assignment. "I really do not know what crimes I had committed by choosing to be a television university student and why should I be dealt such a blow!" This is a problem and complaint the young man has put to society. Is this tolerable in our socialist country when the party Central Committee has called for raising the scientific and cultural level of the whole nation?

Fortunately, this case has been correctly handled by leading organizations concerned. Outstanding examples like this are not very many of course. However, it is quite common that young people are "stifled" and not allowed to have more opportunity to acquire education. We hope leading cadres at all levels pay more attention to this problem and correct any wrong practices.

Today's younger generation is called "the generation of the next century." To a great extent, success of China's modernization depends on them. Therefore, whether or not we can train more young people as useful persons and whether or not we can boldly select and promote talented persons from among the young people is an important matter concerning the success of our modernization. In this matter, we have to totally eliminate various backward and conservative ideas and reform our systems. Systems of examination, employment and promotion for workers and cadres and so on must all be conducive to young people's advancement through more education. We must resolutely emancipate our minds and dare to break old conventions. This year the Chinese Academy of Sciences enrolled 193 research fellow, 13 of them middle school or technical school graduates. According to regulations, applicants as research fellows must be graduates of regular universities. Not sticking to any single stipulation, the academy enrolled some young people who, although lacking regular schooling, acquired comparable knowledge and gave a good showing in examination. It is fine to break through this "stipulation." This attitude is also desirable in using and promoting cadres. For instance, granting of titles such as technicians, engineers, agronomists, medical doctors in charge, editors, reporters, lecturers, professors and research fellows should not be based on schooling alone. People without adequate schooling but having comparable knowledge should be granted commensurate titles and appropriate jobs. There are now plenty young people of great promise or great ability. If leading cadres at all levels adopt a fervent attitude and adhere to the correct policy and principles, they can certainly discover more people of great promise. This is entirely necessary for the acceleration of the four modernizations.

PARTY VETERAN CALLS FOR RETURN TO TRADITIONAL TEACHING

Shanghai WEN HUI BAO in Chinese 25 Jul 80 p 2

[Article by Duan Zhen [3008 6966], Shanghai municipal party commissioner of Communist Youth League: "Traditional Method of Teaching Defended; Remembering How the Underground Party Led Us in Youth Work"]

[Text] I support the exploring spirit advocated by teacher Feng Enhong [7458 1869 3164]. To bring up a new generation in socialism and to establish Chinese-style socialist education, we need not only "explorers" but also "innovators."

Exploration is for innovation, but innovations cannot be isolated from history. Progress requires reform, but only those stale and backward ways that are in the way of new growth should be removed. The good traditional methods of education distilled from our long experience in political educational work must not be discarded.

The present problem in dealing with traditional educational methods is not so much the "nostalgia on the part of quite a few comrades for traditional educational ideas and methods," as described by some comrades. On the contrary, it lies in some comrades' failure to understand the excellent educational traditions formed in the practice of political ideological work and their failure to understand how to inherit, make use of, and develop those traditional experiences. Some comrades even mistake the kind of feudalistic and ultraleftist educational methods pushed by Lin Biao and the "gang of four"--which consist of nothing but mythical and superstitious restraint, simplistic and crude repression, boring and vacuous teaching, glib deception, and denial of character and emotion--as the "traditional educational ideas and methods of our party." Therefore, I consider it an important task at present to redress what was wrong--that is to say, to revive the good traditional educational methods that were damaged and defiled by Lin Biao and the "gang of four," and to enable them to attain new development in the new era.

Further the Mass Line Tradition of Conscientious Work

I have engaged in mass political work since the mid-1940's. At that time, what methods did the underground party organization use to guide us in ideological work among the youth? In sum, there were two items: conscientious work, and the mass line. At that time, special emphasis was placed on trusting the masses, caring about the masses, and depending on the masses. Starting from the realities of the masses, we led them in self-education and self-liberation through practice. Under the reactionary rule of the Kuomintang, it was common to find young people unable to attend school and schoolteachers in abject poverty. Thus the underground party organization led the masses in the "learning aid movement," the "tutor movement," and the "honor-the-teacher movement." From their own practice, the masses realized that the root of poverty was the reactionary rule of Chiang Kai-shek's traitorous dictatorship, and they also came to understand the power of unity and organized forces. Their revolutionary consciousness was therefore raised, and sympathy for the people and thoughts and feelings for the people's welfare were gradually cultivated among them. These were the bases for a philosophy of revolutionary life. The party also instructed us that political propaganda work for young people must cater to their interests and must approach their intellectual level through rich and varied forms of mass activities. Activities, such as summer camps, campfires, summer evening parties serving watermelon and mungbean soup, and field trips, which enjoy great popularity among young people today, were pretty well developed in the youth movement in preliberation days. Mass concerts and theater were also effective ways of uniting and educating the masses. Today, many of the middle-age cadres received their first enlightenment through songs like "Yellow River Chorus," "Wonderful Place Beyond the Mountain," "Teahouse Ballad," and "Stumbling Is Nothing," and mortality plays such as "Put Down Your Whip" and the "Match-Vending Girl." Propaganda at that time emphasized realism and image; a variety of interesting and lively methods were preferred to boring and empty teaching. The resulting methods were attractive, effective, and persuasive. We also emphasized the individual approach: we organized pingpong teams to bind together those who liked sports; we built libraries and organized reading clubs for those who like to read. We taught children who like to watch "peepshows" the "peepshow song" in Shanghai dialect: "Look inside and peep inside/ Shanghai is truly a bustling city/. Neon lights are bright/ Rich people eat and eat/ Poor people cry cold and hungry." We also led them in "relief movement" in ghettoes and made "little reporters" and "little teachers" out of them to visit the poor, so as to be exposed to class education.... Until the 1950's, following the good tradition of preliberation days, and adapting to the new situation and new characteristics of the 1950's, the broad political education workers created many new working experiences. Educational activities, such as "birthday parties," were initiated and popularized by the summer camp of the Pioneers. A series of principles on youth ideological education extracted and refined from the rich traditional educational experiences at that time included "combine ideology with knowledge and interest," "education through entertainment," "one key to open one lock," "little by little, change and influence imperceptibly, "like fine carving, penetrate deeply and skillfully," "patient persuasion and active leadership," "integrate with the masses and be their intimate friends," "snowballing", etc. We still find those scientific educational experiences and traditional methods of ideological education heartwarming and refreshing, because they are close to reality and meet the demands of the present. We must make an effort to clean up the remaining evils of feudal education and the ultraleftist educational methods which have become rampant since the Cultural Revolution, and develop further the good educational traditions of the past.

Some comrades believe that the traditional revolutionary method of comparing is no longer appropriate. Some specialists on juvenile problems also subscribe to this view. I do not concur, however. We must not forget that one of the characteristics of youth in the new era is their lack of historical knowledge and experience. To teach them patriotism, don't we need to tell them something about modern Chinese history? Don't we need to say something about the suffering of old China, and how new China emerged from struggles? If one knows only to compare material culture and creature comforts with the capitalist countries, without understanding the original bases of our motherland, without understanding the exploitation and repressions suffered by our grandparents, without understanding the achievements and the progress our country has made, and without understanding the social evils of the capitalist countries, how can he understand socialism? Without comparison, there will not be strong likes and dislikes or a distinction between good and evil, and there will not be knowledge gained from facts. This kind of traditional revolutionary educational method is needed not only today but also in the future. Failure to use this method means putting our youth in danger of forgetting about our motherland and our history.

What are we to do when some young people are not responsive to the remembering and comparing method of education? This question requires specific analysis. Responsiveness is not dependent on the method itself but on its application. Method is at the service of object and content. Of course, there should be new content and new forms for the new objects of the new era. Nowadays, many schools encourage students to read "Lovely China" written by Fang Zhimin [2455 1807 2404], listen to stories told by Zhang Qiong [1728 8825] the motherly revolutionary, watch "stars twinkle tonight," and appreciate musicians playing good music created in different periods. The Pioneers also engage in "comparing childhood with grandpa and grandma." Aren't these "remembering and comparing" activities lively in image, informative in content, and varied in form? Aren't they popular among the young people who embrace them enthusiastically? The comparison method was abused during the time of the "gang of four." At that time, the life of the people was going from bad to worse, but the masses were required to appreciate the so-called paradise where "birds chirp and swallows dance" through "remembering bitterness and reflecting on sweetness." The masses became even more exasperated through recalling bitter memories. Who would be responsive to this stuff? Playing on ultraleftism, the "gang of four" made remembering and comparing simplistic and vulgar. For example, following the theory of expanding class struggle, they pushed "monthly comparison, daily comparison" and invariably adopted the same mode of "an old worker's bitter memory," which became endlessly repetitive and trite. The masses naturally found this distasteful. The so-called "remembering bitterness meal" was the worst of all. Before eating mooncake at the Mid-Autumn Festival and dinner on New Year's Eve, one first had to eat "bran dumplings and wild grass gruel." The more one ate, the "higher" the level of awareness. Should you have a stomachache or toothache and thus be unable to swallow or chew, you would be accused of "bourgeois thinking" and "forgeting your past." This was not only formalism but making a fool of the masses. Although the "gang of four" has been smashed for 3 years, the harmful effects of this superficial, stifling, and simplistic approach still remains in education. No matter how good an educational method has been, once affected by any of these diseases it produces only "resistance" among those being educated. We must clean up the pollution of ultraleftism, revive and popularize the good tradition of political ideological work, and defend the "remembering and comparing" method.

At present we are in a great transitional age. Educational ideology and methods must aim at "the future" while planting our feet in "the past." We must inherit creatively and create from our inheritance. We must have the courage to change and to innovate--to change feudalism and the outmoded educational methods which are unequal to the demands of socialist modernization, and create new educational experiences in the new era of socialism. Let me share this thought with the "explorers."

SOCIOLOGICAL, EDUCATION AND CULTURE

'BEIJING RIBAO' LETTERS ON YOUTH, CULTURAL LIFE

OW060837 Beijing XINHUA in English 0819 GMT 6 Sep 80

[Text] Beijing, 6 September (XINHUA)--"Young people are not robots, they like to play. After 8 hours of work, they need recreation, education and companionship. They are forbidden to do certain things, yet no attention is paid to their lives outside of work." A young worker wrote this in a letter that appeared in today's BEIJING DAILY.

He wrote: "What's wrong with having a party and dancing, wearing pretty flared trousers or high heels?" The society is progressing and times are changing. Old habits will eventually be replaced by new ones. "Some cadres and older people tend to be old-fashioned. Anything they are not used to they think is bad. I don't think this attitude is correct."

He urged the Communist Party, Youth League and trade unions to pay attention to young people's lives.

Two textile workers, in another letter, were in favor of dancing at parties. Their textile mill held six dances this year and they livened up the workers cultural life, and some new friendships were made. They think that dances are good as long as the people don't wear weird clothes or act indecently. They suggest that dances should be for about two hours.

In the same column the Youth League Committee of a printing plant suggests that the young people's lives need to be more interesting. The committee has organized outings, mountain climbs, boating, dances, performances, summer camps, and contests on international affairs, literature, music and others. The young workers at the plant have been very enthusiastic about the activities. The letter said that it is the duty of the Youth League to care for the young workers.

'BA YI RADIO' ON INSUFFICIENT FUNDS FOR EDUCATION

OW081351 Ba Yi Radio (Clandestine) in Mandarin to China 1400 GMT 7 Sep 80

[Text] The day after three deputies from Shanghai criticized the 1980 national budget and the 1981 national budget estimate, deputies from Guizhou, Anhui, Gansu, Qinghai and Guangxi Zhuang Autonomous Region, at a panel discussion of the Third Session of the Fifth NPC, expressed their views on funds for education. In light of the limited educational funds and the excessively small percentage of such funds in the national budget, scores of deputies from various provinces and municipalities had submitted a 7-point proposal.

It is really not strange that the NPC deputies showed great concern over the educational funds. Half of China's young people are under 21 years old. That means the issue of education involves every family and person. At present, about 60 percent of the people in the countryside in a number of provinces in China such as Guizhou, Anhui, Gansu, Nei Monggol and others are illiterate. Some 48 percent of the rural cadres in these provinces are illiterate. In some national minority areas, more than 90 percent of the people are illiterate.

Militarily, China is the most powerful nation in Asia, ranking fourth in the world. In terms of military aid for foreign countries, China ranks third in the world. But in terms of the number of college students in relation to population, China ranks 131st among 141 countries in the world. At present, 150 million people in China are illiterate.

At a presidium meeting, Tan Zhenlin, chairman of the budget committee, quoted the words of Yao Yilin and Wang Baingquan. They explained at a panel discussion that the main reason for China's low educational funds is because of the nation's efforts to spend more funds for national defense and capital construction projects in the fields of industry and agriculture and to catch up with the advanced countries of the world. This explanation is foolish. To limit educational funds to increase national defense expenditures is tantamount to "cutting out a piece of one's flesh to cure a boil."

9

Practice has proven that it is impossible to achieve the four modernizations without enough experts who have the necessary professional skills and without engineers, technicians and technical cadres, let alone catching up with advanced countries of the world. At present, educational funds in the United States and Japan account for 7.4 to 7.5 percent of national income, but China's funds earmarked for education only accounted for 2 percent of national income last year. Let us take the example of the Ministry of Farm Machinery, an important organization for the realization of agricultural modernization. Only 30.9 percent of the cadres have studied agriculture. The situation is even more serious in other farm mechanization departments. Only 5 percent of the cadres have mastered agricultural skills. The situation in various other organizations is also deplorable.

The problem concerning professional cadres remains very serious. At the same time, China's institutions of higher learning can only admit 4 percent of the senior middle school graduates in the country. Our army also needs cadres with professional knowledge. Therefore, funds for education, culture and public health, particularly funds for education, contained in the 1980 national budget and the 1981 national budget estimate should be revised on the basis of the proposal put forward by many NPC deputies.

BRIEFS

BEIJING VOCATIONAL CLASSES--Beijing, 2 Sep (XINHUA)--More than 4,000 senior students gathered at a ceremony at the Beijing gymnasium today and pledged to study hard and contribute to China's modernization drive. The ceremony marked the opening of 110 senior vocational classes for junior middle school graduates. The classes are being run at 50 senior middle schools and 57 factories throughout Beijing. The schools provide the classrooms and teachers for academic subjects and the factories provide funds and teachers for vocational subjects. Speaking at today's ceremony, the vice-mayor of Beijing, Bai Jiefu, called for more vocational schools to provide the skills needed for China's modernization drive. Students will attend the vocational classes for 3 years and on graduation will be given high school diplomas and selected for employment based on examination results. They will also be eligible to take university entrance exams. [Beijing XINHUA in English 1500 GMT 2 Sep 80 OW]

BEIJING WORKERS THEATRICAL FESTIVAL--Beijing, 2 Sep (XINHUA)--The Beijing Workers' Theatrical Festival organized by the municipal trade union council and the municipal culture bureau, opened at the Theater of the Beijing Workers' Club today. Taking part in the festival are more than 5,000 amateurs from all parts of the city. They will give 40 performances with 500 items, including music, dances, folk art forms and dramas. These pieces were all created by the workers themselves. The festival will last 25 days. The best items will be chosen for citywide presentation. [Text] [Beijing XINHUA in English 1511 GMT 2 Sep 80 OW]

GUANGXI CULTURAL GATHERINGS--The Regional Conference on Cultural Relic Work, the Regional Forum of Cultural Hall Directors and the Regional Conference of Library Work pointed out that their work is to realize the four modernizations. These three gatherings were held simultaneously in Nanning from 20 to 25 August. He Yiran, director of the Regional Propaganda Department of the Regional CCP Committee and vice chairman of the Regional People's Government; and (Zheng Shaodong), deputy director of the propaganda department of the Regional CCP Committee, attended the gatherings and spoke. The participants pointed out that it is necessary to launch propaganda work on protecting cultural relics so that the people can understand that protecting cultural relics is the responsibility of everyone. It is necessary to further strengthen the building of cultural halls, restore the masses' art halls, rectify, consolidate and improve the commune cultural stations, run commune cultural centers on a trial basis and strengthen cultural work in the revolutionary bases and among the minority nationalities. [Nanning Guangxi Regional Service in Mandarin 1130 GMT 26 Aug 80 HK]

JIANGSU BROADCASTING, TELEVISION UNIVERSITY--The Jiangsu Provincial Broadcasting and Television University started on 1 September. The Central Broadcasting and Television University held its inauguration ceremony for the 1980 academic year on 30 August. Some 28,000 faculty members and students of the Provincial Broadcasting and Television University as well as of its 14 branches watched the live relay of the ceremony. The broadcasting and television university is an important means of developing higher education, training more competent personnel to work for the four modernizations and raising the people's scientific and technological level. The university's faculty members are determined to improve their teaching methods so as to give better instructions to the students in this coming academic year. [Nanjing Jiangsu Provincial Service in Mandarin 1100 GMT 1 Sep 80 OW]

JILIN TEACHERS TO XIZANG--According to the decision of the central authorities, Jilin Province has dispatched 24 teachers to work at Xizang Teachers' College. These teachers have been selected from a dozen or so colleges, universities and parties concerned in Changchun, Jilin and Siping municipalities. They all have good teaching credentials. Before their departure on 29 August, leading comrades of the provincial CCP committee and departments concerned received them and encouraged them to, under the leadership of local authorities, do a good job in teaching Tibetan people. [Changchun Jilin Provincial Service in Mandarin 1100 GMT 29 Aug 80 SK]

NEI MONGGOL ENROLLMENT--China's key universities and colleges have enrolled 1,475 students from Nei Monggol Region this year. Among them 288 are of minority nationalities. Nei Monggol University admitted 432 and Nei Monggol Normal University admitted 419 students. The enrollment for nonkey universities and colleges is to be completed in the near future. [UK040933 Hohhot Nei Monggol Regional Service in Mandarin 1100 GMT 1 Sep 80 SK]

SHANDONG SUPERSTITITIONS AT BURIALS--In view of the increasing superstitious activities at burials and the increasing practice of burying the dead instead of cremating them, the Jining Prefectural Administrative Office, Shandong Province, recently formulated 10 regulations reforming the burial ceremony. [SK041219 Jinan Shandong Provincial Service in Mandarin 2300 GMT 2 Sep 80 SK]

TIANJIN TEACHER TRAINING COURSE--Sponsored by the Tianjin Educational Institute, a full-time training center for middle school teachers began its first course on 29 August. Attending the opening ceremony were leaders of the Tianjin Municipal CCP Committee and the municipal people's government, including Liu Gang, Bai Hua and others. This training course, attended by some 250 students, will cover the Chinese language, mathematics and foreign languages. It will last 2 years. Those who apply to study at this center must have a highschool education or its equivalent and must take an entrance examination. During 2 years' schooling, they will learn cultural and professional knowledge and will attain the standards of junior college graduates. In addition, this institute helped six districts in Tianjin to institute part-time teacher training courses. Two full-time teachers' training centers had been established in Nankai and Hongqiao districts. Through the opening of teachers' training courses, it is hoped that the cultural knowledge and teaching capability of most teachers in Tianjin will improve in 2 to 5 years. [SK011259 Tianjin City Service in Mandarin 1430 GMT 29 Aug 80 SK]

XINJIANG STUDENTS CONGRESS--The First Congress of the Xinjiang Regional Students' Federation concluded in Urumqi after 5 days in session. The congress participants summed up the work of students' associations of institutes of higher learning in Xinjiang, discussed the tasks for the federation in the new historical period and formulated guiding principles for the work. The participants pledged to uphold the four fundamental principles, foster lofty aspirations of communism, study hard to master modern science and culture needed for the modernization program and implement the party's nationality policy in order to strengthen unity among students of all nationalities in Xinjiang. A chairman and several vice chairmen of the federation were elected at the congress. [OW030523 Urumqi Xinjiang Regional Service in Mandarin 1300 GMT 30 Aug 80]

XIZANG MINORITY STUDENTS--Lhasa, 30 Aug (XINHUA)--Universities and colleges in the Xizang Autonomous Region will admit 234 students this school year, 168 or 71.8 percent of whom come from minority nationalities. Altogether 416 young men and women from Tibet will enter colleges as freshmen in all parts of the country in September; 214, or 51.4 percent, are from minority nationalities. Of these, 43 will enter the country's top rated universities. In Xizang, 1,199 highschool graduates sat for college entrance exams this summer; 25 percent passed and will enter college in the autumn. [OW301715 Beijing XINHUA in English 0940 GMT 30 Aug 80 OW]

XIZANG PICTORIAL--The People's Fine Art Publishing House of Xizang Autonomous Region and the Joint Publishing Company of Hong Kong have decided to cooperate in editing and publishing a large-size color pictorial XIZANG. The joint photographing team composed of personnel of both sides has begun working in Xizang. The pictorial features both words and pictures to introduce Xizang's natural scenery, customs and habits of the people of minority nationalities, world famous temples and monasteries, Xizang's culture and arts and its socialist construction achievements. [OW010049 Beijing Domestic Service in Mandarin 0900 GMT 28 Aug 80 OW]

CENTRAL RADIO, TV UNIVERSITY--Beijing, 30 Aug--An opening ceremony for the 1980 class of the Central Radio and Television University was held in Beijing on 30 August. This year, the radio and television universities in Beijing, Jiangsu, Liaoning, Jilin, Heilongjiang, Nei Monggol, Henan and Shandong have enrolled 15,000 students. The 1979 and 1980 classes of such universities throughout China enrolled a total of 420,000 students. Education Minister Jiang Nanxiang spoke at the opening ceremony, promising to expand facilities and enroll more students. Zhang Xiangshan, director of the Central Broadcasting Affairs Administration Bureau, also addressed the ceremony. [OW312350 Beijing XINHUA Domestic Service in Chinese 1203 GMT 30 Aug 80]

XINJIANG FOLK STORIES FILMED--Beijing, September 9 (XINHUA)--"The Effendi," one of the best loved heroes in Xinjiang folk literature as well as in the Muslim world, is to be put on screen by the Beijing Studio. All the roles will be played by minority nationality actors and actresses from Xinjiang. A clever and resourceful figure, industrious, brave, optimistic and humorous, Xinjiang's "Effendi" denounces feudal rule and ridicules hypocrisy. The Tianshan Film Studio in the Xinjiang Uygur Autonomous Region is producing two new color feature films. "Nightingale and Rose," based on the Uygur epic "Alip and Saynam," tells how a king's daughter Saynam and her friend Alip fight against feudal intrigues to usurp the throne. Justice and true love prevail. "Aselbec" concerns tsarist Russian expansionism and shows the patriotism of the Kazak herdsmen. Filmmakers are currently shooting on location on the northern Xinjiang plateau. [Text] [OW090816 Beijing XINHUA in English 0801 GMT 9 Sep 80]

RURAL EDITION OF 'BEIJING RIBAO'--Beijing, 6 September (XINHUA)--The first issue of the rural twice-weekly edition of the BEIJING DAILY will be published on October 3. Man Yunlai, one of the editors, said that the new four-page edition is intended to furnish news and views to the people in Beijing's rural areas. The paper will have special stories for peasants on agricultural science, technology and management. It will also report on the party's agricultural policies and introduce agricultural news from other parts of the country. The peasants are being asked to make suggestions about the coverage. "We'll do our best to make the paper meet the peasants' needs," he added. The paper will be published on Tuesday and Friday each week and be circulated in China only. 'XINHUA' CORRESPONDENTS VIEW ZIMBABWE'S AGRICULTURE

OW120956 Beijing XINHUA in English 0933 GMT 12 Sep 80

[Text] Salisbury, September 11 (XINHUA correspondents)--Zimbabwe's agriculture, the mainstay of the country's economy, has bright prospects. This is the conclusion drawn by these correspondents after visiting the Salisbury agricultural show which ended here recently.

Zimbabwean Prime Minister Robert Mugabe praised the exhibition, the first of its kind since the country's independence, as the showcase of the country's agriculture.

On display were products of agriculture and animal husbandry, and agricultural machinery, which attracted some 170,000 visitors.

At the show, visitors also saw high-quality maize and wheat, beans and peanuts, red sorghum and millet, in which Zimbabwe is now self-sufficient.

Zimbabwe is one of the few central southern African countries which enjoys a high level of agricultural development. The country produces an average of three million tons of grain per year, of which one-third is exported.

Normally, farm products account for 45 per cent of the country's total exports.

Despite a drought last year, agricultural output was valued at 523 million Zimbabwean dollars, accounting for 12.5 per cent of the country's GNP. Net income from grain exports reached 190 million Zimbabwean dollars, 30 per cent of the country's foreign exchange earnings.

The grain on the markets in Zimbabwe mainly comes from the 5,400 farms throughout the country. But individual farmers have been producing more and more grain.

It is reported that the reason why Zimbabwean farmers have stable and high yields of maize, the country's staple food, is that they keep breeding seeds of good strain.

On display at the show were also a dozen varieties of maize cultivated by the Zimbabwean Maize Seeds Association.

The 145 members of the association breed and test various kinds of maize seeds on their farms and sell them after strict examination.

Besides grain, Zimbabwe also produces cash crops such as tobacco, cotton, sugarcane, fruit and coffee.

Although the history of cultivating apples and citrus fruit is not long in Zimbabwe, large quantities of these fruits are now produced, with a surplus for export after meeting domestic demands.

Leaving the exhibition hall, we went to a large tract of lawn where sheep, cattle, pigs and poultry were on display. The mere number of pigs and cattle shows that animal husbandry is thriving in the country.

The section of the agricultural development department drew special interest from the visitors.

There, people were informed of the work done by the departments concerned to resettle refugees and restore agricultural production.

An official of the show said that up to now, 75,000 bags of seeds of maize, peanuts, cotton and vegetables have been distributed to 280,000 refugee families. This ensures that the 1.2 million refugees in the country will be ready for the first post-independence spring sowing before the October monsoons.

RESOLUTION ON MILITARY CONFLICT IN EL SALVADOR NOTED

OW071634 Beijing XINHUA in English 1617 GMT 7 Sep 80

[Text] Beijing, September 7 (XINHUA)—The confrontation within the Salvadoran armed forces has been solved for the time being, according to Western news agency reports quoting Salvadoran military sources from San Salvador.

The Salvadoran five-man ruling junta met with the military garrison commanders on September 5 over the recent crisis in the armed forces. With the mediation of the three civilian junta members, the commanders agreed at the meeting to stand by the reassignment order which triggered off the confrontation a few days ago. But they pointed out that similar decisions to be made in the future would be ineffective without the signature of all the junta members.

The order, signed only by junta member Colonel Jaime Gutierrez and Minister of Defence Guillermo Garcia, would strip the troop commands from the supporters of moderate junta member Colonal Adolfo Majano, thus provoking the moderates' strong reaction. The two sides had placed their troops on a virtual state of alert.

Observers in El Salvador believed that the two sides' compromise had brought about an end to the crisis on the surface, but had not eliminated the root cause of the crisis.

According to a UPI report, at present the Gutierrez loyalists control 10 garrisons, while Majano supporters command five barracks, with eight commanders reportedly neutral.

INTERNATIONAL CONFERENCE ON NAMIBIA OPENS IN PARIS

OW120302 Beijing XINHUA in English 0250 GMT 12 Sep 80

[Text] Paris, September 11 (XINHUA)--A 3-day international conference in solidarity with the struggle of the people of Namibia opened at the UNESCO House here this afternoon.

Paul J. F. Lusaka, president of the United Nations Council for Namibia and permanent representative of Zambia to the U.N., said in a statement that "South Africa has intensified the militarisation of the territory. The concentration of troops which now reaches some 75,000 to 100,000 men, aims at intimidating the Namibian people and launching armed assaults against independent African states, particularly Angola and Zambia."

He pointed out: "By pretending to negotiate under the sponsorship of the five Western powers, South Africa has attempted to change international perception of the character of its actions in Namibia." He declared that "the United Nations will never allow its solemn commitment to the people of Namibia, to be jeopardised by the false initiatives of the Pretoria regime."

In his address, Sam Nujoma, president of SWAPO of Namibia, expounded the situation in southern Africa. He declared that "our resolve remains firm and our commitment stronger than ever to persevere in the struggle until Namibia's total liberation is achieved."

He said that SWAPO is ready to cooperate in the implementation of the U.N. plan for Namibia, to sign a cease-fire, and even to meet directly with the South African regime in face-to-face talks. However, he strongly rejected "the idea of an 'all parties constitutional conference' where SWAPO is being asked to meet with South Africa's puppets and other non-representative elements in Namibia, or attempts to side-step the U.N."

He demanded that the Western countries and their multi-national companies cease their support for racist South Africa and implement comprehensive and mandatory sanctions against it.

INTERNATIONAL AFFAIRS

BRIEFS

FRENCH OFFICIAL RECEIVES JOURNALISTS--Paris, September 10 (XINHUA)--"The recrudescence of Soviet hegemonism worries us very much and, under such circumstances, united action of the great powers in the world should be organized," declared Jacques Chirac, mayor of Paris, here today. He was receiving a visiting group of Chinese journalists who arrived for a two-week tour in France at the invitation of the Frency Ministry of Foreign Affairs prior to President Giscard d'Estaing's visit to China. Calling to mind Sino-French relations, he noted, "We have every interest to form closer ties. China can supply a great deal to France and France can contribute to the economic development of China." He was prepared, the mayor said, to accord "exceptional welcome" to the mayor of Beijing who is expected to pay an official visit to the French capital in mid-October. BELGIAN VIEWS NATO COMMITMENT--Brussels, September 11 (XINHUA)--"It is necessary to honor the commitments to the collective defense system of the Atlantic alliance. Any other attitude is harmful," Belgian Prime Minister Wilfred Martens said in a recent interview with the Belgian paper LE SOIR. The interview was published by the paper today. Belgium has not yet made a decision on the deployment of cruise missiles on its soil because of internal disputes over NATO's decision of last December on the installation of 572 cruise missiles and "Pershing II" missiles in Western Europe from 1983 onward. The prime minister said, "Belgium should and is able to play a role in the European Community and in the alliance." He added, "If we truly want the negotiations with the Soviet Union to be a success, we must show that we are firm." [Text] [OW120758 Beijing XINHUA in English 0741 GMT 12 Sep 80]

SINGAPORE OFFICIAL ON USSR, REFUGEES--Islamabad, September 11 (XINHUA)--"It is the Soviet Union which is responsible for the sad conditions both in Kampuchea and Afghanistan," and "this is an evil force," Mr S. Rajaratnam, deputy prime minister of Singapore, told the Afghan refugees near Peshawar this afternoon. Addressing them during his visit to their tentage village, Mr. S. Rajaratnam paid high tribute to their morale and urged the Afghan refugees to forge unity in their ranks. With unity they could fight even the biggest power successfully, he said. He told the Afghan refugees that their struggle is not only for themselves, but is also for the Singaporeans. He assured them that the people of the countries of this area, including Thailand, Singapore and Kampuchea, had full sympathies for them. Pakistan President Mohammad Ziaul Haq and Deputy Prime Minister S. Rajaratnam exchanged views in depth here yesterday afternoon about the global situation in general and the situation in Southwest and Southeast Asia in particular. There was a complete identity of views on these questions. Rajaratnam is winding up his two-day visit today. [Text] [OW111752 Beijing XINHUA in English 1744 GMT 11 Sep 80]

PUPPET TROUPE IN U.S.--New York, 9 Sep (XINHUA)--The Fujian Puppet-show Troupe ended its performance here today. The four shows presented by the troupe in the auditorium theater of the American Museum of Natural History attracted an audience of nearly 2,000. In the plays, all derived from legend and Chinese classics, the singing, dancing, acting and acrobatics were combined so well that the puppets seemed alive on the stage. Every show received a long-standing ovation. The spectators praised the troupe as one of the best Asian art performance group. At the invitation of the U.S.-China Peoples Friendship Association and the Asian Society, the Fujian Puppet-show Troupe, the first one touring U.S., arrived in Boston on 29 August and gave a performance there to celebrate the annual national convention of the USCPFA. The troupe will leave here tomorrow for Washington D.C., Houston, St. Louis, Los Angeles and other U.S. cities. It will also visit Toronto and Montreal in Canada. [Beijing XINHUA in English 0220 GMT 10 Sep 80 OW]

SWISS MILITARY BAND--Guangzhou, 10 Sep (XINHUA)--A capacity audience of 1,500 warmly applauded the Swiss "Landwehr" (National Defense) Music Corps of the state and the city of Fribourg at its Chinese premiere here this evening in the Guangzhou Friendship Theatre. Under the baton of composer Jean Balissat, the Swiss musicians presented Swiss, Chinese and compositions from other countries. Present at the concert were Huang Jingbo, vice-governor of Guangdong Province, Luo Peiyuan, vice-chairman of the Guangzhou Revolutionary Committee, and the corps leader, Mr. Pierre Glasson. The "Landwehr" artists arrived in Guangzhou from Hong Kong by train yesterday afternoon. A reception in their honour was given the same evening by the cultural bureau of Guangdong Province. The corps will leave here for Beijing on 12 September after 1 more concert here tomorrow. [Beijing XINHUA in English 1638 GMT 10 Sep 80 OW]

NEPALESE GOVERNMENT PRESENTS RHINOCEROS--Int Kathmandu, 10 Sep (XINHUA)--A female rhinoceros was presented by his majesty's government of Nepal as a gift to the Chinese Government recently. The 11-month-old rhinoceros weighing about 500 kilos was transported to Rangoon by a Nepalese charter flight on 26 August. It will be taken to Beijing by a special Chinese plane today. Supervisor Muktinarayan Shrestha and rhino caretaker Bishnu Bahadur of the Nepal Zoo left for Rangoon to hand over the rhinoceros to two responsible workers of the Beijing Zoo who were already there. Meanwhile, the Nepalese Government presented a pair of rhinos to the Burmese Government. According to the Nepal national park and wildlife preservation office, rhinos had been made gifts with a view to increasing friendship and goodwill with friendly countries. [Beijing XINHUA in English 1500 GMT 10 Sep 80 OW]

ACROBATS PREMIERE IN ADELAIDE--Adelaide, South Australia, 9 Sep (XINHUA)--The first performance by the Nanjing Acrobatic Troupe of Chine here this evening was applauded over 120 times by 2,000 spectators. K. Seaman, governor of the state of South Australia watched the performance and went backstage to greet the Chinese acrobats. He said, "The audience loved every minute. You are great ambassadors of the people." Adelaide is called "Festival City." "The Adelaide Festival" is held annually and a lot of international artists come to visit and perform here. The troupe arrived here on 7 September after a performance tour of Perth. [Text] [Beijing XINHUA in English 1821 GMT 9 Sep 80 OW]

ACROBATIC TROUPE IN RWANDA--Kigali, 9 Sep (XINHUA)--The Shaanxi Provincial Acrobatic Troups of China left here for Mauritius this afternoon after a 10-day visit to Rwanda. During its stay, the troupe gave six performances in the capital and other cities. The performances were praised by spectators who said they had never seen such wonderful performances before. Thanks to the meticulous arrangements of the Rwandan Government, the troupe's visit was a complete success. Rwandan artists performed national dances to entertain their Chinese colleagues. The Rwandan Ministry of Youth and Sports gave a farewell reception in honour of the Chinese acrobatic troupe. [Text] [Beijing XINHUA in English 1300 GMT 9 Sep 80 OW]

MINORITY TROUPE IN TOGO--Lome, 9 Sep (XINHUA)--The Xinjiang Song and Dance Ensemble of China gave its premiere here this evening to the warm welcome of over 2,000 spectators. Watching the presentation, which included 14 items of songs, instrumental music and national dances, were Togolese Minister of Youth, Sports and Culture Voule-Frititi and diplomatic envoys of various countries here. The Chinese ensemble arrived here yesterday.[Text] [Beijing XINHUA in English 0357 GMT 10 Sep 80 OW]

AUSTRALIAN-FRENCH NUCLEAR AGREEMENT--Canberra, September 11 (XINHUA)--Australia and France have decided to strengthen their cooperation in resources area including nuclear transfers, announced a joint statement issued here today. The statement by visiting French Industry Minister Andre Giraud and Australian Deputy Prime Minister and Minister for Trade and Resources Doug Anthony said that a joint Australian-French resources committee would be formed to explore the potential for closer collaboration between Australia and France in the area of resources trade and development. In regard to uranium, the statement said, officials of the two countries have agreed on a draft nuclear transfers agreement which is now being submitted to both governments for ratification. It is provided, among other requirements, that Australian uranium would not be used for military or explosive purposes. At a press conference, Andre Giraud said that France will need approximately 10,000 tons of uranium a year by 1990. [Text] [OW111910 Beijing XINHUA in English 1902 GMT 11 Sep 80]

GUATEMALAN UNREST--Beijing, September 6 (XINHUA)--A high-powered bomb exploded in front of the National Palace in Guatemala City yesterday, killing seven people and injuring over 50 others, according to a report from Guatemala City. According to an official report, the bomb planted in a car parked outside the building of the National Palace went off at 9:45 a.m. At least 30 cars were destroyed. Guatemalan President Romeo Lucas Garcia was not in his office when the blast occurred but some government employees were injured. Security forces blockaded the spot immediately after the explosion and made investigations. The blast could have been aimed at scaring the general public from attending a rally scheduled for September 7 to show support for the Guatemalan Government, official sources said. On the same day, two other explosions took place in the city, but no damage or injuries were caused. The Red Cross Society and fire brigade had received anonymous telephone calls warning that more explosions would be set off in the city. Guatemala has been under military rule since 1954. Social contradictions and acts of violence had increased in recent years. In the past two years, about two thousand people lost their lives because of incidents of political violence. ROMANIAN MILITARY EXPENDITURES CUT--Bucharest, September 10 (XINHUA)--The executive political committee of the Central Committee of the Romanian Communist Party at a session yesterday decided to cut down the country's military expenditures for 1980 by about 2,000 million lei, administrative and other expenditures by 4,000 million lei in order to boost the programmes of national development and higher living standards for the people, according to the Romanian AGERPRES News Agency. Yesterday's session also approved the principles governing Romania's participation in the forthcoming 35th U.N. General Assembly session and its proposals. The session also ratified some bills including one of development of small industrial enterprises. [Text] [OW101218 Beijing XINHUA in English 1204 GMT 10 Sep 80]

SEYCHELLES DELEGATION IN JIANGSU--The delegation of Seychelles People's Progressive Front led by Guy Sinon, general secretary of the front and minister of administration and political organization, arrived in Nanjing, Jiangsu, on 3 September, greeted at the railway station by Hu Hong, secretary of the Jiangsu Provincial CCP Committee. The same evening, Hu Hong hosted a banquet in honor of the guests from the Seychelles. Having toured Nanjing, the delegation left for visit to Wuxi on 4 September. [Nanjing Jiangsu Provincial Service in Mandarin 2300 GMT 4 Sep 80 OW]

BURMESE DELEGATION IN JIANGSU--The Burmese agricultural delegation led by U Kyaw Htain, vice minister of agriculture and forests, arrived in Nanjing on 8 September for a visit to Jiangsu Province. During its stay in Nanjing, the delegation visited the provincial academy of agricultural science and experimental plots for paddy and cotton and had discussions with experts concerned. On 8 September, provincial vice governor Li Zhizhong met and feted the Burmese friends. Provincial agriculture and forestry department deputy director (Zhu Tongwen) and deputy director of the provincial alien affairs office (Bai Xizhi) were present on this occasion. The delegation left Nanjing for visits to Zhenjiang and Wuxi on 9 September. [Nanjing Jiangsu Provincial Service in Mandarin 2300 GMT 8 Sep 80 OW]

CPPCC PERSONNEL CHANGES REPORTED

HK120429 Hong Kong WEN WEI PO in Chinese 12 Sep 80 p 1

[WEN WEI PO special correspondent Chang Yun-feng's long-distance call from Beijing early 12 September: "CPPCC Session Closes Today--There Will Be Changes in the Leading Personnel"]

[Text] A closing ceremony of the third session of the current CPPCC National Committee will be held this afternoon. During the closing ceremony, the nomination of eight people as CPPCC vice chairmen will be put to the vote and approved. Following are the names of those nominated by the CPPCC Standing Committee: He Changgong, Xiao Ke, Cheng Zihua, Yang Xiufeng, Sha Qianli, Bao Erhan, Zhou Peiyuan and Qian Changzhao. Since they have been selected through full consultations, it is expected that today's session will vote for the nomination.

CPPCC vice chairmen Wei Guoqing, Peng Chong, Zhao Ziyang, Song Renqiong, Yang Jingren and Bainqen Erdini Qoigyi Gyaincain will resign their positions as vice chairmen because they have taken up leading posts of the State Council, the NPC and the party Central Committee. Their resignations will be approved at today's session. Hong Kong's well-known Henry Fok (Huo Yingdong) has been nominated CPPCC Standing Committee member. The nomination of him and other people as CPPCC Standing Committee members will also be put to the vote and approved at today's session. The current CPPCC session opened on 28 August and will close today, thus lasting 15 days. In line with the spirit of telling all, CPPCC members at the current session have expressed many critical opinions and put forward many proposals. Their speeches have been carried in the CPPCC session's bulletins. Moreover, some national newspapers and journals including RENMIN RIBAO have also carried many of their speeches.

LIU SHAOQI'S ROLE IN POSTWAR NEGOTIATIONS WITH CHIANG RECALLED

Beijing LISHI YANJIU [HISTORICAL RESEARCH] in Chinese No 2, 15 Apr 80
pp 33-46

[Article: "Refutation of the Slander by Liu Biao and the 'Gang of Four' Against Comrade Liu Shaoqi on the Topic of 'A New Phase of Peace and Democracy'"]

[Excerpts] Early in 1967, Comrade Liu Shaoqi fell victim to a false charge framed by Lin Biao and the "gang of four," who accused him of "pursuing a capitulationist line in the name of 'a new phase of peace and democracy.'" In the years that followed, they continued to sling mud at this eminent revolutionary leader who had devoted over 40 years to the cause of the proletarian revolution and who enjoyed high popularity with our party. After suffering from telling blows and cruel torture, he died in November 1969 without getting his name cleared. Over 10 years have passed since the death of Comrade Liu Shaoqi, who was known as a great Marxist. Nevertheless, "no one can avoid being judged by history" ("Collected Works of Marx and Engels" Vol 12, p 5). Nor can anyone tamper with it. Today, we must restore history to its true face by citing historical facts to expose how Lin Biao and the "gang of four" conspired to take advantage of the "new phase of peace and democracy" to create a political fraud. First, it is necessary for us to review how those historical scums framed charges against Comrade Liu Shaoqi.

During the 1960's, the first man who accused Liu Shaoqi of "pursuing a capitulationish line in the name of 'a new phase of peace and democracy'" was Qi Benyu [2058 2609 4416], a self-styled "leftist" and a historical clown.

On 8 January 1967, in a speech to representatives of the mass organizations, he framed charges against Comrade Liu Shaoqi on the basis of the latter's report entitled "A New Phase of Peace and Democracy." On 1 April 1967, he published an article entitled "Patriotism or National Betrayal?" In that article, he said: "As soon as China won the war over Japan, Liu Shaoqi became panicky in the face of aggression launched by U.S. imperialism and its lackeys. Taking a gloomy and dismal view of the future of the Chinese revolution, he spared no effort to sell his capitulationist line to the party in the name of 'a new phase of peace and democracy.'"

On 13 April 1967, that self-styled "theorist," who had never published any theoretical work, told the enlarged session of the Military Commission: "In the wake of the victory in the war of resistance against Japan, Liu Shaoqi was frightened by war and the revolution, and was obsessed with peace. His capitulationist line was presented against this historical background. On 1 February 1946, he delivered a report entitled 'A New Phase of Peace and Democracy.' In that report, he portrayed the Kuomintang and Chiang Kai-shek as a dove, preached class capitulationism, emphasized struggle through parliament, and denounced the armed struggle. He also urged the party to give up its leadership over the armed forces and to place the people's revolutionary armed forces under the unified command of the Kuomintang." Qi Benyu added that "the famous speech entitled 'The Situation and Our Policy After the Victory of the War of Resistance Against Japan' delivered by Chairman Mao on 13 August 1945 is a criticism of the capitulationist line within the party." Since then, under the direct command or influence of Lin Biao and the "gang of four," people have often seen similar articles published in newspapers and journals. Among their representatives were "Bankruptcy of The 'Assertion of Struggle Through Parliament' in China" originally written by the editorial departments of Shanghai WEN HIU BAO, JIEFANG RIBAO and ZHIBU SHENGHUO [BRANCH LIFE] and reprinted by RENMIN RIBAO on 12 August 1967, and two other articles entitled "A Reactionary Capitulationist Program--Refuting the So-called 'A New Phase of Peace and Democracy' Proposed by China's Khrushchev" and "A Variety Show Performed by Liu Shaoqi and Chiang Kai-shek--exposing the Counterrevolutionary Nature of 'A New Phase of Peace and Democracy.'" These two articles were published in RENMIN RIBAO on 19 September and 1 December 1968 respectively.

Comrade Liu Shaoqi once remarked: "China is in a new stage of peace and democracy." This remark was a subject of continuing criticism by Lin Biao and the "gang of four" who called it the essence of his "capitulationist line." For example, Liu Shaoqi was criticized in the draft political report to the Ninth Party Congress, and in the articles: "The History of the Two-line Inner-party Struggle" and the "Commemoration of the 50th Anniversary of the Chinese Communist Party--Two Masterpieces of the Lin Family." Comrade Liu Shaoqi was also a subject of systematic criticism even in the "educational instructions on the history of the Chinese Communist Party" compiled by the former writing group of the Shanghai Municipal Party Committee, a group of hack writers hired by the "gang of four," and published on the eve of their downfall.

In this connection, Lin Biao and the "gang of four" distorted history, and confused merits with demerits and right with wrong.

We must repudiate all asburdities concocted by Lin Biao and the "gang of four."

I. On the Problem of Merging Our Army With the "Nationalist Army" and Militia Units With the Self-Defense Corps

In the wake of the victory in the war of resistance against Japan, there was a proposal to merge our army with the "nationalist army" and militia units with the self-defense corps. A perusal of the "Double-Tenth Agreement" shows that this was not Comrade Liu Shaoqi's idea but a decision by the CCP Central Committee. But ironically, this proposal was finally rejected by the Kuomintang. The struggle between our party and the Kuomintang over the future of the people's armed forces was a long story. The CCP Central Committee and Comrade Liu Shaoqi had never agreed to hand over our people's armed forces without conditions attached. The proposal for "a coalition government" adopted by the Seventh Party Congress pointed out: "The moment a new democratic coalition government comes into being in China, the Liberated Areas of China will hand their armed forces over to it. But all the Kuomintang armed forces will have to be handed over to it at the same time." (Selected Works of Mao Zedong," combined edition, p 974) In dealing with the question of the armed forces, our party has followed these two principles: First, the armed forces can be nationalized only under the democratic government system; second, it is necessary to reorganize the Kuomintang-controlled army as the first step in nationalizing the armed forces throughout the country. By sticking to these two basic principles, our party not only foiled the reactionary Kuomintang group's conspiracy to annex the people's armed forces and suppress the revolution but also effectively won over to our side the middle-of-the-road elements. A review of Comrade Liu Shaoqi's speeches and statements revealed that he had never deviated from these two principles. On the basis of these two principles, the CCP delegation presented "a draft of the program to build the country by peaceful means." On the basis of an agreement to reshuffle the Nationalist Government and the Military Commission, it also suggested that "all armed forces which took part in the war of resistance against Japan be recognized as elements of our nation's army; reasonable steps be taken to regroup the armed forces throughout the country." As a result of hard work, the Chinese People's Political Consultative Conference (CPPCC) adopted two resolutions—one on the democratization of the country and the other on the nationalization of the armed forces--resolutions which call for the formation of a three-man military commission to continue the search for specific measures to regroup the armed forces through negotiations. Although the principles concerning the military affairs set forth in the resolutions were at variance with our party's principles for building up the army, our party approved of them on the condition that millions of the Kuomintang-controlled soldiers disavow their allegiance to the fascist forces and that relevant terms contained in the resolution on the democratization of the country be carried out to the letter. Our party promised to hand over its armed forces to a democratic coalition government as soon as the Kuomintang did the same following the shakeup of the Nationalist Government. We must understand that the handing over of our armed forces did not mean converting them into an army against people bxt reorganizing them and the Kuomintang-controlled soldiers into an army serving the people's interests.

On 19 February 1946, Comrade Zhou Enlai flew to Yanan from Chongqing to deliver a report to the CCP Central Committee on progress in negotiations on the regrouping of the armed forces. He returned to Chongqing from Yanan on 20 February. On 25 February, he signed for our party a "basic proposal on the regrouping of the armed forces and the overall reorganization of the CCP armed forces into the Nationalist Army." On 27 February, JIEFANG RIBAO published the text of this basic proposal. On 5 March, JIEFANG RIBAO front-paged a statement by Chairman Mao Zedong saying: "I want to take this opportunity to reaffirm that the CCP will do everything possible to resolutely and thoroughly implement the three agreements (the armistice agreement, the CPPCC resoltuions and the proposal to regroup the armed forces throughout the country)."

On 12 October 1945, the CCP Central Committee issued the following inner-party instruction: "Even after regrouping, our side still can devise ways to keep its military strength intact." In other words, we would never hand over the people's armed forces to the reactionary group in betrayal of the principles we stand for. Yet, this does not mean that we could not adopt a flexible policy to reach a certain agreement with the Kuomintang in the people's interests. The CCP Central Committee's strategy at that time was to combine the firm principles the proletariat stood for with a flexible policy. But in disregard of the aforementioned fact, Lin Biao and the "gang of four" described this correct strategy adopted by the party as a capitulationist line promoted by Liu Shaoqi. In order to deceive the people, they falsely accused him of "ganging up with the reactionary elements of the International Communist Movement in laying down guns."

II. On the Problem of Being Officials in the Kuomintang Government

Lin Biao and the "gang of four" said: "Liu Shaoqi wanted our party to hand over its army and revolutionary base areas to Chiang Kai-shek, to send a few men to "be officials" in the Kuomintang government and to "join the U.S.-Chiang reactionary group in building the country." Was this a kind of national betrayal? Those who did not know history could be easily deceived by them.

As far as the talk about being officials in the Kuomintang government was concerned, Comrade Liu Shaoqi always shared the same view with the party. CCP members have never vowed not to be officials. Before becoming officials, we must make sure what kind of officials we are going to be. Col David D. Barrett, head of the U.S. Army Observer Group in Yanan, once said to Chairman Mao Zedong: "You should listen to Hurley and send a few men to be officials in the Kuomintang government." Chairman Mao Zedong replied: "It is no easy job to be an official bound hand and foot; we don't do it. If we become officials, our hands and feet must be unfettered, we must be free to act, that is, a coalition government must be set up on a democratic basis." ("Selected Works of Mao Zedong," combined edition, p 1031) This statement clearly tells us that we can agree to become officials in a coalition government under the democratic system. This was precisely what Comrade Liu Shaoqi once said.

The problem of being officials was closely connected with the problem of a coalition government. A dispute over official appointments to the coalition government came after the CCP acted in the people's interests in proposing to set up a coalition government on a democratic basis. A fierce struggle erupted over this issue during a CPPCC session. During that struggle, the CCP fought hard in order to win enough seats in the proposed coalition government for the proletariat and the broad masses, while the Kuomintang did everything possible to keep the interests of the big landlords and the bourgeoisie intact. The struggle was in essence a debate over whether or not the Kuomintang dictatorship should be nullified.

Chiang Kai-shek resolutely prevented us from joining the government. At that time, on the basis of an understanding between the CCP and the Kuomintang, the Nationalist government had to undergo a reshuffle as soon as the CPPCC session closed. Our party insisted on reshuffling the National Government. In order to preserve his dictatorial rule, Chiang Kai-shek reneged on his promise to allocate 14 out of 40 Cabinet members to the CCP and the People's Democratic League in order to stall the proposed reshuffling of his government. On 2 October 1946, Chiang Kai-shek sent a memorandum to George Marshall, informing the latter of his decision to apportion 13 Cabinet-level positions instead of 14 as he had promised earlier to the CCP, the China Democratic League and "a democrat without party affiliation recommended by the CCP." In his memorandum to George Marshall dated 9 October 1946, Comrade Zhou Enlai sternly pointed out: "According to a principle agreed upon by both sides, 14 Cabinet members out of 40 or a little over one-third of the total are allotted to the CCP and the China Democratic League as a garantee to prevent the other side from unilaterally changing the program to build the country by peaceful means. Now the apportionment of 13 Cabinet members to the CCP and the China Democratic League as proposed by the Kuomintang government cannot give this guarantee. Furthermore, counting that lone Cabinet member allotted to a democrat without party affiliation as part of our representation in the government is inconsistent with the resolution adopted by the CPPCC session."

The outcome of this dispute over 14 or 13 seats reserved for the CCP and the China Democratic League in the government would determine whether or not the two parties could retain their veto power and whether or not the nullification of the Kuomintang or one-party dictatorship could be guaranteed. While falsely accusing Comrade Liu Shaoqi of seeking an official position for himself in the government, and echoing the voice of the international revisionist line, Lin Biao and the "gang of four" never mentioned the proposed coalition government and relevant facts. Would such charges anger the Marxists and gladden the Kuomintang reactionary group?

III. On "Three Nations, Three Political Parties and Three Categories of People"

The hack writers of the "gang of four" said: the "essence" of Liu Shaoqi's capitulationist line was a call for "cooperation among three nations, three political parties and three categories of people in introducing democracy to China." From 1967 to 1976, they repeatedly criticized this "essence." Their efforts proved ineffective because the "essence" they criticized represented the correct political line of the CCP Central Committee.

On 11 February 1945, the Soviet Union, the United States and the United Kingdom ended their Crimea (Yalta) conference with a communique opposing the civil war and favoring the formation of a coalition government in China. This proposal was endorsed by Comrade Mao Zedong in an editorial he wrote for XINHUA. ("Selected Works of Mao Zedong," combined edition, p 1049) On 26 August 1945, the CCP Central Committee issued an inner-party circular saying: "At present, the Soviet Union, the United States and Britain all disapprove of civil war in China." ("Selected Works of Mao Zedong," combined edition, p 1051) On 15 December, U.S. President Truman made a statement opposing the civil war and favoring the convention of a national assembly represented by the major political parties in China. On 27 December, the foreign ministers of the Soviet Union, the United States and the United Kingdom issued a joint communique indicating that the Nationalist government should absorb democrats, the civil war in China should be stopped and that the three countries had no intention of interfering in the internal affairs of China. On 30 December, a spokesman for the CCP Central Committee issued a statement "warmly welcoming" the agreement reached by the three foreign ministers. Years later, a footnote explaining this situation was added to the "Selected Works of Mao Zedong." This footnote was inserted as an explanation of the following sentence: "At present, the Soviet Union, the United States and the United Kingdom all disapprove of civil war in China," contained in the "Selected Works of Mao Zedong." On 28 August 1945, in his "Report to Comrades Going To Work in Northern China," Comrade Liu Shaoqi pointed out that the United States had never stopped serving the interests of the bourgeoisie.

The "three political parties" refer to the Communist Party, the Kuomintang and the China Democratic Party. At that time, any coalition government without the Kuomintang's participating was an idiot's day dream. The "double-tenth agreement" was an agreement between the Kuomintang and the CCP, while the CPPCC resolutions were mainly a result of cooperation between the two parties. Our party never regarded Chiang Kai-shek as an "angel of peace." In this connection, Comrade Liu Shaoqi said in his "report on the situation" on 1 February 1946: "It seems that the Kuomintang or Chiang Kai-shek is very reluctant to introduce democracy to China. Therefore, the path to democracy in China is still marked by twists and turns. In the future, the possibility of violence and of scrapping agreements to introduce democracy to China still cannot be ruled out." He concluded this report by calling Chiang Kai-shek a representative of "forces against the people and democracy." (Please draw your own conclusion on whether this is a capitulationist line!)

After the CPPCC adopted those resolutions, the talk about cooperation between the Kuomintang and the CCP had to go on as a part of the political struggle. Our party undoubtedly had to secure the cooperation of the China Democratic League in this connection. An assessment of the aforementioned quotation from Comrade Zhou Enlai's memorandum to George Marshall also reminded us of the need to achieve close unity between the CCP and the China Democratic League in order to retain their veto power in a coalition government. "Cooperation between the two parties (plus the Democratic League)" was also mentioned in the inner-party circular of the CCP Central Committee. ("Selected Works of Mao Zedong," combined edition, p 1051) As a matter of fact, the China Democratic League was willing to cooperate with our party at that time.

The "three categories of people" refer to the working people, the national bourgeoisie and part of the big bourgeoisie. Cooperation among the three categories of people was mentioned in such historical documents as the "double-tenth agreement" and the CPPCC resolutions. The Kuomintang's repeated reneging on its promise eventually led to the cancellation of its cooperation with our party. Could we deny the non-violent aspect of the revolution?

During the liberation war, the revolution advanced triumphantly at an unprecedented pace. This was a victory for our party's political line and a triumph of the revolutionary strategy over the counterrevolutionary strategy. Although the military struggle is important, the importance of the political struggle should not be underestimated. Only by achieving successes on these two fronts could our party attain the aim of winning the all-out support of the people throughout the country to completely isolate the Chiang Kai-shek reactionary group until he was defeated and new China came into being.

During the liberation war, the so-called "capitulationist line" was non-existent. The September 1948 meeting of the CCP Central Committee concluded: "Since the Seventh Party Congress held in April 1945, the Central Committee and the leading cadres of the whole party have displayed even greater unity than during the war of resistance against Japan." ("Selected Works of Mao Zedong," combined edition, p 1236) What were Lin Biao's and the "gang of four's" motives behind their criticism of the "new phase of peace and democracy"?

A review of their absurd criticism reveals that in order to overthrow Comrade Liu Shaoqi, they could call a stag a horse, confuse right with wrong, and adopt dirty tactics to frame charges against the victim without looking into the CCP Central Committee documents and without taking into account historical facts. Their aim was to overthrow not only Comrade Liu Shaoqi but also a large number of old cadres and to topple our party; their unreasonable opposition to peace and democracy was a manifestation of an ultraleft trend of thought.

According to their logic, talking about peace means practicing revisionism and a towering crime. Under their influence, such phrases as "the party struggles for peace and democracy" were obliterated from the instructions on the history of the party in schools. People were even prohibited from publicizing and conducting research on achievements by Communist Party members in the Kuomintang-controlled areas. According to a strategy based on the ultraleft trend of thought promoted by Lin Biao and the "gang of four," the CCP should have started a civil war and openly proposed such slogans as "struggle to prepare for war" "down with Chiang Kai-shek and liberate all of China!" as soon as China won the war over Japan. They neither analyzed historical events in concrete terms nor observed all forms of struggle in history from the historical point of view. They were only good at mechanically copying such dogmatic terms as "we are believers in the inevitable victory of the revolutionary war." In this way, they trampled under foot Marxism.

Lenin once said: "Marxism holds that all forms of struggle should be adopted." ("Collection of Lenin's Works," vol 11, p 196) "Marxism calls on us to adopt a historical attitude toward all forms of struggle. Only those who did not know dialectical materialism would discuss such matters without taking into account the historical background." ("Collection of Lenin's Works," vol 11, p 197) During the Democratic Revolution in China, the war was the primary form of struggle, which had to be accompanied by secondary forms of struggle. A review of the long history of our revolution shows that war is a solution to problems. Just as Comrade Mao Zedong said, under specific circumstances, the form of armed struggle must be changed to a peaceful form of struggle. ("Selected Works of Mao Zedong," combined edition, pp 242-243) It is entirely wrong to deny all peaceful forms of struggle. After the victory in the war of resistance against Japan, there was a stalemate in peace negotiations between ourselves and the enemy because either side could not wipe out but was actively prepared to wipe out the other. The political form of struggle became very important at a time when the people demanded peace and we had to respond in kind. But we must always bear in mind the objective of our struggle. On 17 August 1958, Comrade Mao Zedong said in this connection: "The new phase of peace and democracy will provide time and opportunity for us to capture the national political power."

On 15 September 1956, Comrade Liu Shaoqi delivered a "political report to the Eighth Party National Congress on behalf of the CCP Central Committee." In that report, he said: "The Seventh Congress of our party adopted a policy calling on the Kuomintang to form a coalition government with the participation of all democratic forces throughout the country. After the war of resistance against Japan was over, our party had held a series of peace negotiations with the Kuomintang in hopes of avoiding the civil war and realizing the social and political reforms in China by peaceful means. In the quest for peaceful reforms, our party had neither lowered its guard nor given up the people's armed forces. Our policy was: If the Kuomintang wanted peace and were willing to carry out reforms for the benefit of the people, we would try our best to do our part. But we must realize that whether peace could be achieved or not depended on the ruling class at that time rather than on us. If the Kuomintang reactionary group wanted to impose war on the people, we were also fully prepared to mobilize the people's forces to defeat it and make its starter taste its own bitter fruits.

Our party had adopted a revolutionary line which led to the birth of the People's Republic of China." ("Documents of the Eighth CCP National Congress," p 13, People's Publishing House, 1957) This political report of the Party Central Committee was adopted by the Eighth Party Congress. The aforementioned quotation is a conclusion drawn from history.

REPORT OF TANGSHAN SYMPOSIUM ON EVIL PRACTICES

Beijing GONGREN RIBAO in Chinese 30 Jul 80 p 2

[Symposium Report: "Courageously Carry Out in Uncompromising Struggle Against Evil Practices; Report of a Conference of Concerned Comrades Held at Tangshan To Expose and Resist the Mistakes of Guo Huichuan and Others"]

> [Text] Editor's Note: To strictly enforce party discipline and promote justice, the Tangshan Municipal Party Committee recently convened a conference to publicize the punishment of Guo Huichuan [6753 1920 1557] and others and commended the concerned comrades of the party committee and league committee at the Huaxin Textile Plant in Tangshan and the Lubei District Public Security Bureau. On the morning of 22 July this newspaper invited those comrades to a symposium and asked them to discuss the situation of the struggle against the mistakes of Comrade Guo Huichuan the others and to discuss their own feelings. Below is a report of that symposium.

Trade Unions Should Dare To Speak for the Workers

Liang Yufeng [2733 3768 1496] (cadre from the Tangshan Huaxin Textile Plant Trade Union): "After GONGREN RIBAO published our letter exposing the mistakes of Comrade Guo Huichuan and the others, it was broadcast by the Central People's Broadcasting Station early that morning and the workers discussed it a great deal. Some said I had let the cat out of the bag and were anxious for me, concerned that we might suffer the "expected retalization." But I felt that speaking for the workers is the unshirkable responsibility of a trade union cadre. Later, RENMIN RIBAO, ZHONGGUO QINGNIAN BAO, and TANGSHAN LAODONG BAO reprinted it one after the other, and the Hebei Provincial Party Committee and the Tangshan Municipal Party Committee organized a joint investigation team to look into it. HEBEI RIBAO also ran a report and published an editorial. This increased our courage and confidence in the struggle against evil tendencies. The mistakes of Comrade Guo Huichuan and the others were finally punished. We feel very happy. From the punishment decided by the municipal party committee, one can see that, though it is not death by beating or overlenient, they can learn from past mistakes to avoid future ones and cure the sickness to save the patient. We hope that in the future the press will grasp questions of evil practices and strive to correct party style."

In Struggling With Mistaken Tendencies, One Cannot Fear Retaliation

Jiang Shun [3068 7311] (secretary of the party branch at the Huaxin Textile Plant Repair Shop): "The Tangshan Municipal Party Committee dealt severely with the mistakes of Guo Huichuan and the others, and embodied the principle that no matter how high a party member's office, everyone is equal before party discipline. This shows the greatness and hope of our party. If we can maintain this hold, then the will of the people will incline toward the party, spirits will be happy, the work will be vigorous, and the four modernizations will be carried out well. Guo Huichuan's son Guo Zhonglin [6753 1813 2651] works in our shop, and when we exposed the problem concerning father and son, someone said we had better be careful. I said that if one is a communist, he cannot fear retaliation. He definitely cannot turn a blind eye toward evil tendencies and not do something about them."

Enforce the Law and Don't Be a Muddled Official

Wang Peng [3769 2590] (head of the Lubei District Public Security Bureau): "Last year I went to a police substation on an investigation and the substation chief told me that Guo Huichuan's son had a girlfriend from Baoding who was living with him and was demanding that he marry her. The section committee (at the time, Guo Huichuan was head of the section committee) planned to send a car and demand that the police substation dispatch two policemen to run the girl out of town. Once I had carefully thought about the matter, I understood that Guo Huichuan wanted to cover up for his womanizing son. I said that we couldn't help a bad man do bad things, nor could public facilities be used for this sort of thing. Later, Gu Jian [6253 0256] (deputy head of the Tanshan Revolutionary Committee) and a deputy secretary of the Lubei District Party Committee came looking for me, and on the pretext of maintaining social order they wanted me to let the police substation get rid of the girl. They also pointed out that human life must be treated with respect and if there was an accident the police substation would bear the responsibility. I said that the girl who had gone to Guo Huichuan's home was not an object of social concern and we would not take her in. Thus, if anyone caused an accident, they would bear the responsibility and the police substation would not be responsible. The deputy secretary of the district party committee said as well: 'Old Wang, if you can help, then help; but you can't help, and you can't violate principles, either.' Gu Jian could only leave in disappointment. The third time, Gu Jian brought Guo Huichuan's wife to the police substation with a story that the Guo family had lost a watch, and they framed the girl for stealing it (actually, the watch had not been lost at all), but we concluded by rejecting that story, too. Gu Jian and the others kept looking for us, making up stories to deceive and scare us, and if we had been the least bit negligent, we too would have made a mistake. This time we did not lose our heads. From now on we should heighten our vigilance and firmly clarify the true facts. In enforcing the law we should be strict and fair, upright, and outspoken, and not be muddled public security bureau chiefs."

Bai Huanzhang [4101 3562 4545] (deputy chief of the Lubei District Public Security Bureau): "The crime rate of our cadre brothers is very high now. Our cases sometimes involve the detention of the children of leadership cadres, and some people frequently attempt, through a variety of means, to 'go through the back door,' demand leniency, and make trouble in the conduct of cases. This shows that the party work style is not right and that the problem some leadership cadres have in being unable to control their children is serious. These evil practices are not good. If we do not first of all stop these evil practices within the party, the four modernizations will be just idle theorizing. Old cadres fought the revolution for many years and should discipline their children and definitely not be so lenient."

We Cannot Be Tolerant of the Errors of Old Comrades in Arms

Tian Zhong [3944 0022] (head of the Huaxin Textile Plant and second secretary of the plant party committee): "Guo Zhonglin, with the connivance of his father, committed serious mistakes, and his punishment was entirely appropriate. But a responsible comrade from the municipal revolutionary committee personally came looking for me and demanded that we remove the punishment from Guo Zhonglin's file without a trace and release Guo Zhonglin. I thought that with old comrades in arms we should do things even more in accordance with party principles, so with justice on my side, I criticized his mistake and advised him not to meddle in this matter again. The second secretary of the municipal party committee for inspection of party discipline also came running to put pressure on me, but we resisted.

"From the above events, I understood that as a grassroots-level cadre, whatever one does one should keep an eye on conforming to party principles. From now on we should take the lead in maintaining party principles, strengthen the establishment of party committee team ideological work style, and improve the ranks of staff and employees to make appropriate contributions to the four modernizations.

COUNTY OFFICIAL CHARGED WITH MISUSE OF AUTHORITY

Beijing GONGREN RIBAO in Chinese 30 Jul 80 p 2

[News Report: "Liu Mingqi Abuses His Position of Authority To Advance Personal Interests With Ill Effects"]

[Text] XINHUA reporter Zhao Derun [6392 1795 3387] reports that Liu Mingqi [0491 7686 1477], deputy head of the County Revolutionary Committee and the County Standing Committee of Feixiang County in Hebei, brought his son, his daughter, and his son-in-law into the party between December 1979 and April 1980--a period when he was in charge of organization work. His wife's application to join the party was also approved by the county party committee's organization section and formally reported to the county standing committee for examination and approval.

Some of Liu Mingqi's relatives had applied for party membership previously, but they were not approved because they did not meet enough of the conditions to be members of the Communist Party. After Liu Mingqi was put in charge of organizational work, he asked the party organizations of his children's and relatives' units to "grasp the training" of his relatives and "send up a report." He pressed the organization section to expedite matters, and he personally chaired the working session of the county party committee's organization section "to study and approve" it.

In March 1980, Liu Mingqi's wife was transferred from the Planned Parenthood Office and given the position of deputy head of the County Public Health Bureau. Less than 2 weeks later, Liu wanted the party organization at the Public Health Bureau to conduct "key point training" of her. Then he called the comrade from the county party committee's organization section who was responsible for recruiting new party members to come to his house for a chat. He "told about" how his wife's "work was good," and "if organizational questions were resolved he could live a little longer," etc. His wife had been punished for committing an error, and so Liu Mingqi also asked a deputy secretary of the county party committee to hurry up the matter of her entry into the party. Under these circumstances, the party organization of the Public Health Bureau did not call a meeting of the party branch to discuss the matter, but just sent Liu Mingqi's wife's application for party membership on to the upper-level party organization. Later, the party branch held a supplementary meeting of party members and an introducer read the application for party membership but concealed the facts of her punishment and hastily passed her application for party membership. When the county party committee's organization section held a work session to discuss this matter, it was chaired by Liu Mingqi personally, and the matter was approved.

Liu Mingqi's son-in-law had already gotten into the party. He had gone to work in the county supply and marketing cooperative in 1976. The masses had many views on his work and his work style. Liu Mingqi had personally sought out the responsible persons from the supply and marketing cooperative's party general branch for a chat and had asked this responsible person to send his son-in-law's application materials for party membership to the county party committee's organization section. In less than 2 weeks, the organization section had approved his application. Then Liu Mingqi approved the organization section's transfer of his son-in-law to the county wages adjustment office and planned to assign him to the county human affairs bureau, which was just being set up.

Not long before, Liu Mingqi had given a report on the study of "Certain Guiding Principles of Political Life Within the Party" to agency cadres in the county party committee's auditorium. After hearing this report, cadres said angrily that this was a mockery! They demanded that the party organization section discipline Liu Mingqi for violating party rules and regulations.

In accordance with the demands of the broad party membership, the Hubei Provincial Party Committee and the Handan District Party Committee have conducted an investigation of Liu Mingqi's and others' use of positions of authority for personal gain, their efforts to hoodwink the organization, and their behavior destructive of the norms of party life, and are prepared to deal with them.

'CLASS STRUGGLE' SAID TO STILL EXIST AMONG THE PEOPLE

Shenyang LIAONING DAXUE XUEBAO--ZHEXUE SHEHUI KEXUE BAN [LIAONING UNIVERSITY JOURNAL--PHILOSOPHY AND SOCIAL SCIENCES EDITION] in Chinese No 2, 1980 pp 25-26

[Article by Ran Zongfu [0373 1350 4395]: "Class Struggle Still Exists Among the People at the Present Stage"]

[Text] At the present stage of our country, while the exploiting class has been abolished, does class struggle still exist among the people? The answer ro this question must be in the affirmative. Comrades Gao Guang [7559 0342] and Li Zhenxia [2621 2182 7209], however, gave a negative answer to it in their article "At the Present Stage of Our Country, Class Struggle Does Not Exist Among the People" (LIAONING UNIVERSITY JOURNAL, 1979, Vol 6). They felt that contradictions and struggles among the people resulting from the influence of the ideology of the exploiting class are problems of ideology and awareness, and that they cannot be directly summed up as class struggle among the people. I think this view needs further deliberation.

With regard to the question of the definition of class struggle, authors or Marxist-Leninist classics have expounded that, in general, it is a struggle between two sharply contrasting classes--the oppressor and the oppressed. However, we must not derive from this that class struggles and contradictions between ourselves and the enemy are identical, and thereby deny that class struggle does exist among the people. Authors of Marxist-Leninist classics have also expounded on this. Lenin pointed out prior to the October Revolution: "Marx has consistently and ruthlessly been opposed to the fantasies of the petty bourgeoisie, which suggest that the 'people' are unanimous and that class struggle does not exist among the people." ("Selected Works of Lenin," Vol 1, pp 620-621) Since the victory of the October Revolution, Lenin not only called a class struggle the struggle between the proletariat and the small farmers who sold grain on the blackmarket and engaged in speculative activities, as well as the struggle between the force of habit of the petty bourgeoisie and anarchistic trends of thought, but he also pointed out that class struggle exists among the working class. He said: "In order to protect the interests of the working class, doesn't the struggle during the period of transition from capitalism to socialism oppose that small minority of workers, workers' groups and strata of workers which uphold capitalist traditions (customs) and continue to use old standards to judge the Soviet nation (wanting to do less and worse work for 'it' and wanting to drag more money out of 'it')." (Collected Works of Lenin," Vol 28, p 82) Comrade Mao Zedong's theory on the existence of class struggle among the people is identical with that of Lenin's. He not only regarded class struggle between the working class and the national bourgeoisie both during the democratic revolution and prior to the basic completion of the socialist transformation as class struggle among the people, but he also called the struggle against the well-to-do middle peasants during the Agricultural Cooperative Movement a class struggle among the people. At that time, "the well-to-do middle peasants said: 'The pauper wants to operate a cooperative! Never before has it been seen that chicken feathers can fly high.' Yet chicken feathers have unexpectedly flow high. This is precisely the struggle between the socialist road and the capitalist road." It has also been said: "In the rural areas of China, one important aspect of struggle between the two roads is manifested through peaceful competition between the poor and the lower-middle peasants and the well-to-do middle peasants." ("The Climax of Socialism in China's Rural Areas," Vol 2, p 777) What is pointed out here is the struggle between the two roads, which of course has the nature of a class struggle. Comrade Hua Guofeng continues the basic concept of Comrades Lenin and Mao Zedong regarding the existence of class struggle among the people. He explicitly pointed out in his "Report on the Work of the Government" to the Second Session of the Fifth National People's Congress: "The influence of bourgeois and the ideology of the feudal class will continue to exist for a long time among the people and, to control this influence, protracted struggle and education must still be carried out. He called on us to "continually carry out class struggle economically, politically and ideologically in a correct way" at the same time as we devote our major efforts to developing social productivity.

At present, it is a fact that class struggle is mainly a struggle waged against the "six different elements" and the "two remnants." Meanwhile, there is no inner organic link among these elements and remnants to rebuild an exploiting class. Therefore, it is also a fact that a struggle against them is a class struggle without the exploiting class, which makes it a class struggle different from its original meaning. However, the realities of life in our country prove that in the course of socialist construction and development, various kinds of contradictions and struggles exist, and that among them are factors which are antagonistic to and conflict with the basic interests of the people. There are some people whose behavior objectively represents the interests and desires of the abolished exploiting class, and this thereby becomes class struggle among the people. For instance, at present there are people who engage in graft and embezzlement, speculation and profiteering, and undermining of socialism, all of which are detrimental directly or indirectly to the socialist economic foundation. These activities are comparatively prevalent in their manifestation and are serious in their nature. Some young people blindly worship Western democracy. They regard the outworn concepts and deceitful philosophy of the capitalist class and all exploiting classes within our country and abroad a "treasure" and do their utmost to give lavish praise and high commendation to it. They combat the leadership of the party and attack the socialist system. There are also some cadres who are seriously imbued with a bureaucratic style of work and a "special privilege" mentality. They engage in legitimizing their special privileges and try to bring evil trends into the open. They therefore do not enjoy popular support and have damaged the relationship between the party and the masses of the people, and so forth. All of these are absolutely not ordinary problems of ideology or awareness but are reflections and manifestations of class struggle among the people, having the nature of class struggle itself. If we deny that this is class struggle and do not recognize that class struggle exists among the people, but believe that only the struggle waged against the "six different elements" and the "two remnants" can be called class struggle, it seems that enacting laws and a penal code as well as strengthening the legal system are not absolutely necessary at the present time, since the abovementioned people are already very few in number and will pass away in not too many years. The date when class struggle will no longer exist can be set. It is obvious that this does not conform to reality.

Comrades Gao and Li regarded that under given conditions, contradictions among the people will transform into antagonistic contradictions, which will turn into contradictions between ourselves and the enemy, and then this can be called class struggle. This approach does not start from objective reality to study problems. Certainly we do not mean that contradictions among the people constitute class struggle but that class struggle does exist among the people. If the understanding of both Comrades Gao and Li is accepted, then 90 percent or even more of the offenders in our country are criminals among the people, and only a few counterrevolutionaries whose political rights have been removed and offenders who have committed serious crimes comprise the contradictions between ourselves and the enemy. There is the problem as to the kind of struggle the remaining offenders, whose political rights have not been deprived, are part of. Do all of them constitute an ideological problem or a cognitive problem? Can this merely be called "a critical ideological struggle having factors of class struggle?" I am afraid that they cannot.

Comrades Gao and Li are also worried that if class struggle is regarded as still existing among the people, the same old ways of Lin Biao and the "gang of four" in going all out to magnify class struggle among the masses of people will be reinstated. Actually, intensification of class struggle is not due to the recognition of the existence of class struggle among the people, but results from the line adopted during class struggle. Only when we have committed the mistake of being "left" and broadening the scope of class struggle subjectively will there be the problem of intensifying class struggle. Lin Biao and the "gang of four," in carrying out their ultraleft line, confused the problem of ideological awareness of the masses with class struggle among the people, and also confused class struggle among the people with contradictions between ourselves and the enemy. They went all out for a "total dictatorship" and eventually brought about a great calamity. Now, since Lin Biao and the "gang of four" have been smashed, if we can take note of the distinctions mentioned above and adopt correct ways for handling them, we shall not commit mistakes that will intensify class struggle. If class struggle is regarded as only creating contradictions between ourselves and the enemy, it will inevitably result in intensifying all problems of class struggle into contradictions between ourselves and the enemy, and thereby intensify class struggle. At the same time, class struggle, which itself is a problem among the people, can probably be treated wholly as a general problem. All that needs to be handled has not been handled; all that needs to be grasped has not been grasped; and all that needs to be punished has not been punished. This is very detrimental to strengthening stability and unity, consolidating the proletarian dictatorship and the socialist system, and accelerating the four modernizations. We can avoid committing mistakes of being "left" or right only by correctly recognizing the objective existence of class struggle among the people at the present stage.

MARXISM AND EMANCIPATION OF MIND

Beijing RENMIN RIBAO in Chinese 8 Aug 80 p 5

[Article by Wang Ruoshui [3769 5387 3055]: "Marxism and Emancipation of the Mind"]

[Text] There is a theory that an excess of emancipation of the mind tends to lead to rightism which in turn leads to a negation of Marxism. In order to avoid an excessive emancipation of the mind, it is necessary that we do not lose sight of the over-riding importance of Marxist ideas when we strive for the emancipation of the mind. For this reason, in order to uphold Marxism, certain limits must be set to the emancipation of the mind.

I wish to express certain views on this subject.

What is it that we seek to emancipate when we talk about emancipation of the mind? First, we must seek to emancipate our minds from the latter-day superstitions and ultra leftist ideas promoted by Lin Biao and the "gang of four" over a period of years. Next, we must seek to emancipate our minds from all forms of superstitions, dogmatism, stereotyped writing, forbidden zones, outdated modes of thought, hackneyed bigotry and false conclusions born of limited experience, all forms of idealism and metaphysics. All these mental shackles prevent us from seeing the truth and must therefore be shattered.

The object of emancipating the mind is to find the truth, and the only criterion of truth is practice. So long as we recognize this fact, the problem of going overboard will not arise. The problem arises only when we smash to pieces what should not be smashed and give affirmation to something which should not be affirmed. As to what should be smashed and what should be affirmed, we must let practice be our guide. Why should we not smash something to bits when actual practice has proved that it should be smashed and why should we not affirm something when actual practice has proved that it should be affirmed? Of course, when there is a lack of sufficient practice, we should withhold our conclusion as to what is right and what is wrong.

When the Third Plenary Session of the 11th Party Central Committee called for emancipation of the mind, it was not concerning itself with that alone. Rather, it was stressing the fact that truth can only be found when we take practice as the criterion for determining what is true and what is not. That, in short, underlines the need to eschew the bigotry which prevailed in 1958. In that year, we shouted to the high heavens to "emancipate the mind and get rid of superstitions." That slogan led us to set our sights too high, to issue orders without rhyme or reason, to make a fad of communism and boastfulness, all of which are undesirable from an objective point of view. However, the fault did not lie with the slogan itself, but rather with the fact that we did not have a full understanding of the slogan and that we did not go about publicizing it in a proper manner. When we talked about superstitions at the time, we were referring to superstitions from abroad, superstitions in the so-called experts and superstitions in the printed word. In the process of demolishing these superstitions, we also demolished science and the need to make a conscientious effort in getting things done. At the same time, in our propaganda work, we created superstitions in our infallibility and superstitions in our subjective points of view. That gave rise to the superstitions that "the amount of production is determined by the extent of our courage" and that "we don't need to fear what cannot be done, only to fear what we fail to realize in thinking." It seemed as if the more arrogant boasts a man made, the more emancipated he was in his mind. "Eradication of superstitions" became eradication of science and "emancipation of the mind" resulted in outlandish way of thinking. Those who indulged in outlandish thoughts, while appearing to be highly emancipated, were actually the least so. Their thoughts were tightly bound by their subjective "views of the authorities," by their own petty-bourgeois fanaticism and by their selfish personal considerations. They were afraid not of unthinkable thoughts, but only of seeking truth from facts. At that time, it was fashionable to make "high-sounding claims," however irresponsible they might be. The truth of the matter is that it takes real courage to face the facts and to withstand the tremendous political and ideological pressures. The truly emancipated person is not one who spews forth patent lies to please the authorities. He is one who speaks the truth at the risk of being labelled a "rightist and conservative." When the Communist Central Committee advanced the policy of "readjustment, restructuring, consolidation and improvement," it called for the emancipation of the mind. For this reason, the slogan "emancipation of the mind" is not to be taken only as being opposed to rightism and conservatism, but also to unreasoned adventurism as well.

In short, so long as an error is allowed to become fashionable or a trend or "the views of the authorities" or a policy or a line, the human mind becomes shackled and an obstacle is placed in the emancipation of the mind. During the Great Cultural Revolution, Zhang Zhixin [1728 1807 2450] and Shi Yunfeng [0670 0061 1496] were the true heroes in the realm of mind emancipation. Although physically in chains, their minds were liberated and they were truly exemplary protagonists of Marxism.

Marxism, far from shackling the mind, emancipates the mind. In fact, Marxism itself is the product of the emancipation of the mind. Adherents of communism must make a clean break with conservative ideas. They must throw off the shackles of bigotry and narrow-mindedness represented by the enslavers, the landlords, the bourgeoisie and small producers. Does that not represent complete emancipation of the mind? Today, some young people are such ardent admirers of Western capitalism that they are completely enamored of the dregs of capitalistic culture. That is not emancipation of the mind. It is superstition. We seek to work on their minds not to stymie their thinking, but to help them to liberate themselves from their superstitions.

Marxism has also dealt a crucial blow to the fantasy cherished by thinkers in the past, namely, that they had found the "ultimate truth." In the history of philosophy, it was Hegel who first propounded the idea that the thoughts of all the thinkers of the past were the products of the time period in which they lived, that they represented but a stage in the absolute and undonditional development of the mind, that they had found only one phase of the ultimate truth, and that despite their contributions to and their stature in the history of philosophy, they had no right to lay claim to having exhausted the search for the absolute truth. Nevertheless, Hegel considered himself the only exception, claiming that he himself had finally found the absolute truth. In his critique of Hegel, Feverbach made it clear that Hegel himself was a product of his particular era. That being the case, Hegel had no right to claim that Hegelianism represented the ultimate in the search for the absolute truth. In like manner, we should also regard Marxism in the same light. "Marxism-Leninism has in no way exhausted truth but ceaselessly opens up roads to the knowledge of truth in the course of practice." ("On Practice")

One important contribution made by Marx is that he made practice the foundation of knowledge and the criterion of truth. In the past, divine revelation served as the criterion and the standard was set by the authorities (such as saints and the churches). These and other factors served as shackles of the mind. During the 18th century, the French school of enlightenment made "reason" the sole judge for all beings: "all must defend themselves for their existence or give up their right to existence at the court of reason." (Engels: "Anti-Duhring") Does that represent emancipation of the mind? Does that mean that "reason" is so all-important that it should be above examination? Marxism makes practice the sole judge of knowledge. According to Marx, all theories must be subjected to the test of practice. That applies not only to "reason" as espoused by the proponents of enlightenment, but also to Marxism itself. No theories are above the test of practice. Thus, all superstitions and dogmas will be shattered.

Through the test of practice, Marxism must be continually supplemented, revised and further developed. Otherwise, it will cease to exist and

Marxism will become dogmatism. Dogmatism not only is no Marxism, but is the opposite of Marxism. Although Marxism originally has the effect of emancipating the mind, it may, in its development, be turned into dogmatism by certain people. Thus, a tool for the emancipation of the mind may be turned into a shackle that holds the mind in bondage. If I may be permitted to use an unfamiliar philosophical term, that is tantamount to the "dissimilation" of Marxism.

We are, of course, opposed to revisionism. We must, however, have a clear idea as to what "revisionism" means. To oppose revisionism does not mean to oppose all forms of revision. If we do not permit the revision of Marxism, are we then not guilty of dogmatism? By revisionism, we mean the revision of the basic principles of Marxism. We must not lose sight of that when we talk about revisionism. For instance, is it revisionism to oppose "the persons in power traversing the capitalistic road"? It is not, because that has nothing to do with the basic principles of Marxism, not to mention the fact that that idea does not stand up to the test of practice.

The most basic Marxist principle is the unification of theories and practice. So long as we keep that in mind, we are the adherents of the basic principles of Marxism. Both revisionism and dogmatism are opposed to that principle.

In short, emancipation of the mind is in complete consonance with Marxism. If it is true that thought emancipation is predicated upon a strict adherence to Marxism, it is even truer to say that Marxism itself demands the emancipation of the mind. Adherence to Marxism requires that we develop the ideas of Marxism and the development of Marxist ideas requires that we emancipate the mind. Otherwise, strict adherence to Marxism will come to mean strict adherence to dogmatism. So long as we have a correct understanding of thought emancipation and Marxism, a strict adherence to Marxism not only does not hamper thought emancipation, and emancipation of the mind will not lead to the negation of Marxism.

PRINCIPLE OF CONFORMITY ASSAILED

Jinan DAZHONG RIBAO in Chinese 10 Jul 80 p 3

[Article by Lu Yanyu [7120 1484 1502]: "Persist in Differentiation and Oppose Indiscriminate Uniformity"]

[Text] All things have some universal and some individual traits. In other words, they have something in common with one another as well as something that sets them apart from one another. This concept is one of the most important points in Marxist epistemology. Comrade Mao Zedong elaborated on this subject in great depth in his philosophical treatises and evolved from it a scientific method of reinforcing universality with individuality and of enhancing individuality with universality. Today, the importance of studying Marxist epistemology and applying a scientific method to our endeavors to achieve the four modernizations cannot be overemphasized.

"In considering each form of motion of matter, we must observe the points which it has in common with other forms of motion. But what is especially important and necessary, constituting as it does the foundation of our knowledge of a thing, is to observe what is particular to this form of motion of matter, namely, to observe the qualitative difference between this form of motion and other forms. Only when we have done so can we distinguish between things." (On Contradiction) The particularity of a thing comes from within itself. It stems from its innate specialty, singularity and individuality.

These qualities constitute the particularity that sets one thing apart from another. This particularity forms the scientific basis for our preception of the world. If we look at the processes of the mind in establishing knowledge, we will realize that the mind recognizes the individual traits of things first and then, through generalization, perceive their common traits. In other words, it is a process of going from particularity to universality. We say that particularity is a component of universality. However, the former cannot substitute for the latter. By the same token, when we say that universality is the sum of particularity, we do not mean that universality is the sum of particularity, we do not mean that the former cancels out the latter. For example, the guidelines and policies of the CCP

Central Committee are formulated on the basis of a summing-up of a host of practical experiences and from an overview of the national situation. They reflect the objective laws in general and chart a general course for the nation. They are the sum of the common and universal traits of things. They are the outcome of the process of reducing particularity down to universality and letting the latter speak for the former. Lenin said in his article "On Dialectical Questions" that "Generalization only roughly describes individual traits of all things. However, no individual trait can be represented in its entirety in any generalization." ("Philosophical Notes" by Lenin, page 409) By the same token, the party's guidelines and policies, while they serve as a guide on what to do under particular circumstances, cannot cover all contingencies and may not suit every circumstance. This gives rise to the need to study the special conditions as exist in our locale and at our work unit, to adapt the party's guidelines and policies to those conditions through dialectically meshing universality with individuality, and to implement the guildelines and policies of the CCP Central Committee in a way suited to local conditions. It does not mean making all feet fit the shoe.

We must treat each case on its own merit. Failure to do so means a lack of policy. This may sound simple, but it is easier said than done. Some leading cadres exercise their leadership in disregard to the particularity of contradictions. Forgetting that different contradictions require different solutions, they practice indiscriminate uniformity in all matters, like "cutting things uniformly with a knife." When they see the party's guidelines and policies or receive instructions from their superiors, they merely copy them as they are, forward them as they are, and quote them as they are. They are content to be mere "mail rooms" and "message forwarding centers." They look upon advanced experiences as set formula and all they want to do is to repeat them. When required to do a project, they require strict conformity, to one standard and to one style. Practicing "cutting things uniformly with a knife" they are encouraging the spread of formalism, to the detriment of our party and the people. For example, when they hear "taking grain as the key link," they would have grain crops planted everywhere, whether it is a high mountain, or a beach, or a forest, or a grassland. They require cotton growers to grow food for themselves. They deny vegetable growers access to commercially available grain. In this way, they want to turn agriculture into a one-crop economy. When they hear that "pigs rank first among all domestic animals," they would allow people to raise only pigs to the neglect of other domestic animals and poultry, thus reducing animal husbandry to a one-animal activity. When they hear "agricultural mechanization," they would set the same timetable for every production brigade regardless of its financial status. As a result, the better-off brigades fail to mechanize and the poor brigades sink in debt. Similar examples defy enumeration.

How has this indiscriminate practice of "cutting things uniformly with a knife" come about? There are three reasons.

One reason is that some comrades have failed to free themselves from the mental shackles imposed by the "gang of four." When Lin Biao and the "gang of four" were riding roughshod over the nation, idealism held sway and metaphysics spread unchecked. They messages were "to be forwarded before the night is out." Their instructions were "to be followed to the letter." Their orders were "to be carried out whether they were understood or not." Only those who did their bidding in such a manner were considered their "close followers" with "unquestionable loyalty." Anyone who took local conditions into consideration and displayed some initiative of his own would be considered rebellious and head into trouble. Those who were at their "beck and call" could stay out of trouble or, even win their favors. Thus the practice of "indiscriminate conformity" was born out of necesity if one were to survive under the "gang of four." It has been 4 years now since we smashed the "gang of four." It is time that we abandon our "survival philosophy" of the days of the "gang of four."

The second reason is blind obedience to instructions from a higher authority. Some people are content to relay the messages from their superiors word by word without any attempt to find out through investigation and study whether the instructions are suited to existing conditions and without any thought as to how to carry them out. While they themselves believe they are obedient, they are actually neglecting their duties.

The third reason is opportunism. Some people work for appearances only for their own benefit. They have no intention of doing a conscientious job as long as they can please the public and their superiors. They insist upon the indiscriminate practice of "cutting things uniformly with a knife" for no other reason than to make themselves look good. They do not care whether they are doing the right thing or the wrong thing or whether their action will benefit or harm the people. Now that we know why some people demand indiscriminate conformity, we can see that with some people it is an epistemological problem and with others it is a problem with their way of thinking and their way of doing things. To solve these problems, we must also treat each case on its own merit and prescribe a specific medicine for a specific illness.

We must study dialectical materialist epistemology. As we are faced with the historic task of realizing the four socialist modernizations and the numerous new situations and new problems that come with it, we will do well to avail ourselves of the "telescope" and "microscope" of Marxist dialectical materialism for a closer observation of things to help us solve problems. With such Marxist aids, we will be able to pinpoint the particularity and individuality of each and every problem. This is the best medicine to treat the ill of "cutting things uniformly with a knife."

We must also persist in investigation and study. There is a saying: "Once we see things clearly, we can work with great determination and use the right methods." "Seeing things clearly" is the prerequisite to "working with determination" and "using the right methods." For example, one of the most important principles guiding our economic operation is to use our strong points to their best advantage, to do what we are good at and to avoid what we are not good at, and, to pursue economic benefits and to avoid economic disadvantages. If we are to use our strong points to their best advantage, we must make investigation and study to determine what our strong points are from one locality to another. Unless we know our strong points and weak points, we cannot make the right choice between what to do and what not to do. Unless we are sure of the advantages and disadvantages, we cannot decide what will bring benefits and what will bring disasters. Otherwise, we can say all we want to say and we can write all we want to write about "using our strong points to their best advantage: and accomplish nothing. In this context, investigation and study is an effective method to overcome bureaucratism, objectivism, indiscriminate conformity and the habit of "cutting things uniformly with a knife." We must adhere to the mass line. "What comes from the masses goes back to them." What this means is that we must sort out and systemize all the individual, scattered and unsorted experiences from the masses into theories, guidelines, policies and measures of broad application. Next we must apply these theories, guidelines, policies and measures to real-life problems so as to test them out, correct them, supplement and improve them among the masses. The process is precisely the same as combining individuality with universality and leadership with the masses. To follow the mass line means that we must respect the creativity of the masses and always keep the benefits of the masses in mind. It is not right to act according to one's personal preferences and instincts. We know that some leading comrades at certain localities are acting purely on their personal likes and dislikes when assigning responsibilities to various production units. They are wielding their "knife" to cut this and to chop that. These comrades are advised to go out and mix with the masses and to find out what the masses are thinking and doing, what they like and what they dislike. The boundless creativity of the masses will offer a cure for the nasty illness of "cutting things uniformly with a knife."

The lofty task of achieving socialist modernization has never been attempted before. Therefore, without a pioneering spirit and an ability to adapt to new conditions, it is impossible to blaze a trail toward a Chinese-style modernization. As we are embarked on a new long march, it is necessary for us to give free reign to our imagination, to be pragmatic, to dare to try new ideas and to explore new avenues. Only thus can we create a colorful and heroic world of our own.

LISTENING TO TRUTH IS AS IMPORTANT AS SPEAKING TRUTH

Jinan DAZHONG RIBAO in Chinese 10 Jul 80 p 3

[Article by Zhao Jinliang [6392 6930 5328]: "Pay Attention to Hearing the Truth"]

[Text] Lately there has been a good deal of discussion on the importance of speaking the truth. Newspapers have also published articles on this subject. It is, of course, very important that we all speak the truth, not untruth. Here I wish to add that it is just as important to promote the habit of listening to the truth as that of speaking the truth.

What makes people lie and why are lies so prevalent? The problem is just as much a fault of the speaker as the habit of certain comrades, particularly certain leading comrades, who do not listen to the truth, who like to be told the untruth and believe in the untruth, and who let the liars benefit from their falsehood. If we are to encourage the telling of truth, we must not only encourage the truthful speakers but also find an audience for them. In a sense, unless our party is all ears for the truth, there is no way we can revive and develop the virtue of truthfulness.

Truthfulness has two meanings: one is to tell it as it is, to call a spade a spade. There is no exaggeration of our achievement, there is no hiding of our faults. There is no distortion of facts, just a presentation of facts as they are. The other is to speak one's mind. It means honesty and candidness in expressing one's true feelings about certain people, certain things and certain problems. The words come straight from the heart. Our souls are completely bared. When we listen to the truth, it means opening our ears to the plain statement of facts and to the words from the heart. Some comrades only listen to what they like to hear and make a judgement on the basis of their personal likes and dislikes. They often mistake lies for truth and sneer at truth as lies. This is totally wrong. What is music to the ear is not necessarily the truth. The truth is not always pleasant to hear. Some comrades are all ears when there is talk about achievements, about advancements, about smooth performance, and about successes. They close their ears to any mention of shortcomings, backwardness, hardship and problems however true they may be. Some comrades enjoy listening to those who agree with them, and who compliment them and flatter them. They get upset and refuse to listen to unfavorable comments, criticism and complaint. Obviously this is not the right attitude. We must realize that constant good news, constant reports of success, sweet talk and flattery, no matter how pleasant they may be for the ear, are often unreal. On the contrary, straight talk may be unpleasant to the ear but is good for the soul. Some sharp and unpleasant words are needed when presenting certain facts. This is because the facts of life are not always gratifying, therefore the words that speak those facts cannot always be appetizing. Everything has two sides, a good side and a bad side, a bright side reflecting progress and a dark side reflecting backwardness, a side showing smooth performance and a side showing difficulties and obstacles. If we want the whole truth, we must lend our ears to both sides of a story and to both pleasant and unpleasant words.

Straight talk does not necessarily mean complete truthfulness. For one reason or another, a person's opinion may be totally correct, partially correct, or totally incorrect. Straight talkers like to get things off their chest, with no pretending, no beating around the bush, no bragging and no cheating. They say what is on their mind. There is nothing wrong with them. In fact, we must encourage them to speak out by listening closely to what they have to say, regardless of whether they make sense or not. This way we can understand their way of thinking and their true feelings. If we refuse to listen to them, how can we formulate a program of ideological education that will suit the public? If we will listen only to correct opinion and not incorrect opinion, and if we reject an incorrect opinion outright and take the speaker to task for expressing it, we will only discourage the straight talkers from speaking their mind and turn them into "evasive talkers."

When we listen to the truth, we must not stop at listening. We must also think and observe. If there are truth and untruth in real life, we as listeners must have the ability to distinguish between them. First, we must think it over and determine whether the speakers are being factual and truthful. It is not right to accept a one-sided story as truth and readily act upon it. From time to time we must get a second opinion or hear the other side of the story, or even do some investigation and study on our own, before we make a judgment. Second, we must match words with deeds. Confucius said: "Listen to what one says and then watch what he does." These words still ring true today. Some people say nice things, talk big, and promise this and that, but they do not mean what they say and have no intention of keeping their words. Even if what they say makes sense, it is still a deception. These people must not be trusted. In fact, they should be subjected to severe criticism. It is important for every comrade, especially those in leadership positions, to develop the habit of listening to the truth. The importance is two-fold: on the one hand, our listening enables us to understand the true feelings of our cadres and the masses as well as the facts as they are. With such understanding, we can make the right plans, carry them out properly, and accomplish what we set out to do. On the other hand, once the leaders prove themselves to be upholders of democracy, good listeners and champions of truth, the cadres and the masses will feel free to speak out and to report the facts as they are, and their willingness to speak the truth will grow. Otherwise, if the leaders are bureaucratic and isolated from the public, ready to listen to and accept untruth, and generous in dispensing favors to those who speak untruth, they are in fact penalizing truthfulness and indulging falsehood. Certain self-serving and unscrupulous individuals, seeing this weakness in their leaders, will say only what their leaders want to hear, make up stories and use flattery to mislead their leaders into one blunder after another. There were many such cases in history as well as in real life. Therefore, the importance of listening to the truth is no small matter. It is a vital issue that affects the image of our party and our execution of the "Guidelines on How to Achieve the Four Modernizations."

INTELLECTUALS' WAGES, STATUS MUST BE RAISED

Beijing RENMIN RIBAO in Chinese 7 Aug 80 p 4

[Article by Li Chun [2621 2504]: "It Is Necessary To Show Concern for the Livelihood of Intellectuals"]

[Text] Since the smashing of the "gang of four," the party's policy toward the intellectuals has gradually come into force. Many intellectuals feel extremely grateful, and have instantly enhanced their sense of responsibility as masters of society. Quite a number of them are working diligently day and night, determined to devote themselves to the sciences and to the four modernizations.

However, there are still a number of problems. For instance, with respect to training the intellectuals, managing their affairs, and employing and taking care of them, things have not turned out entirely as one would have wished. Recently, during a conversation with some intellectual friends, they discussed with me quite a number of problems to be solved. They said that though they are now "red No 3," they are still "poor No 3." Is this not like "Feng Huan [7458 7536] tapping the hilt of his sword and singing--poor but waiting for an opportunity to advance in life"--to reach out for a yard after taking an inch? In my opinion, this is not the case.

In complaining about being "poor," they were talking mainly about their livelihood. The livelihood of intellectuals, especially of the middle-aged, is truly fairly "poor." First, their wages are low and their income is scanty. The actual income of most intellectuals is often about one-third less than that of workers of the same age. The wage readjustments made on several occasions in recent years were not applicable to the intellectuals, mostly because of their short duration of service. (For people who are the same age, the longer their length of schooling, the shorter must be their length of service.) Even for those with longer years of service, since they were not engaged directly in material production they were looked upon as "having made no clear contributions" and were not given promotions. The majority of them have parents to support and children to take care of, so they have never been able to make ends meet. Secondly, their living conditions are too poor. Their living quarters are crowded, many people go very far to work and cannot return home during the noon break, and the offices where they work have no accommodations for them to rest after lunch. Very often they voluntarily work overtime and thus have no time to do their household chores, buy food from the market, or cook meals. They cannot eat and drink properly, and live in hunger and cold. Thirdly, they have difficulties in their work. Most of them do not understand, nor do they have time to study, the "art of establishing ties," which is very prevalent these years. When they are handling affairs without any "person of common interest," they will always run into snags and be foiled everywhere.

As regards "poverty," the overwhelming majority of intellectuals can face the situation squarely. They understand the difficulties of the state, see correctly the realities of society, cautiously restrain themselves, and would rather be like a cnadle burning to ashes than seek comfort, wealth, respect, and glory. Many of the intellectuals, such as Chen Jingrun [7115 2529 3387], become more determined by poverty without losing their aspirations. Others, such as Li Siguang [2621 0934 0342], are old but vigorous and always think about making greater achievements. There are even some people who, for China's good cause, are willing to give up excellent working and living conditions abroad, overcome their difficulties, travel far across the ocean, return to the motherland, and devote themselves to the four modernizations. How admirable are these noble qualities of our intellectuals, who suffer hardship in poverty, strive selflessly, but never utter a word of complaint!

However, those who are the leading comrades of all departments and units at all levels should show close concern for and deal carefully with the problems of the livelihood of intellectuals. At present, they should first do a good job of propaganda work with a view to straightening out public opinion and correcting concepts concerning intellectuals in all quarters. Secondly, they should do a solid and concrete job of the work of organization and logistics, and help the intellectuals solve their specific difficulties. They should encourage all quarters to serve the scientific, cultural and educational workers, fully use the facilities and actively create more such facilities, and try by all means to help them improve their livelihood. Thirdly, they should study and change certain current irrational policies and replace them with scientific policies that will encourage people to learn and progress. Doing so will help the intellectuals to concentrate their energy and, with undivided attention, to make a success of their vocational work, and it will also help to bring about the social fashion of "admiring learning" and to attract more people to scale and peaks of science and culture. In a word, this helps to produce talents and results quickly. If [it is a case of] the more the knowledge, the "poorer" the livelihood; the longer the years of study, the lower the wages, then it almost means advocating ignorance and encouraging illiteracy. If things go on like this, certainly it will be difficult to produce talented people and difficult to get results, and it will be hopeless for the four modernizations.

It has always been true that one's status is linked with one's role, and that rights go along with duties. It should be all the more so under the socialist system. In order to give play in socialist construction to the role of intellectuals as persons to guide and command (this is the viewpoint of Lenin and Stalin), it is necessary to give them the social status they should have. To get them to take up the duties of fostering and promoting the modernization of science and technology, it is necessary to give them corresponding political and economic rights. If we talk only about their role and duties but not about their status and rights, turn a blind eye to the poor plight of the intellectuals, and turn a deaf ear to their proper demands, it will almost be like "making the horse run without allowing it to graze." To quote a statement by Han Yu of the Tang Dynasty: "Whip a horse without any good reason, feed a horse without making the best possible use of it, and loudly urge on a horse without knowing its language." ("Miscellanies, No 4") In this case, though there is a famous horse, it "has not enough to eat, becomes weak, cannot show its ability and beauty, and will not be equal to even an ordinary horse. It can hardly be expected to run a thousand li in a day!"

Although the Party Central Committee has repeatedly laid stress on the issue of intellectuals, especially on questions of their rights and status, there are still some comrades, especially some leading comrades, who have not yet truly straightened out their thinking and understanding. Take wages and remuneration as an example. After bringing order out of chaos on the question of distribution some comrades now are not afraid of workers becoming well-to-do and also are not afraid of peasants becoming well-to-do. However, if someone suggests raising the wages and remuneration of intellectuals to help them also become well-to-do, these comrades will be stunned. Either they are unwilling or they dare not do so. Among those who are unwilling, some people say that the work of intellectuals is "light and leisurely" and not as heavy as that of workers and peasants, and so their wages are already good enough. Others say that if their remuneration is high, they will easily become "intellectual aristocrats." As a matter of fact, they don't understand the hardship and complexity of the mental labor of intellectuals, and they even harbor the prejudices of despising knowledge, looking down upon science, and discriminating against intellectuals. Those who "dare not" are afraid of taking on the bad name of "fostering intellectual aristocrats" and relying heavily on the service of "bourgeois intellectuals" and "reactionary academic authorities." This proves that the pernicious ultraleft influence of Lin Biao, Jiang Qing, and like ilk in trampling on and persecuting the intellectuals is still far from being liquidated, and that the task of emancipating thought remains very great. In a certain sense, this is the key to giving full play to the role of the intellectuals, and it cannot be treated lightly.

BRIEFS

XIZANG CPPCC DELEGATION--The 36-member Xizang Autonomous Regional CPPCC Committee visiting group with Cui-ke Dun-zhu-cai-ren, vice chairman of the regional people's congress Standing Committee and member of the regional CPPCC committee Standing Committee, as its leader and Sengqen Losang Gyancan, vice chairman of the regional people's congress Standing Committee and vice chairman of regional CPPCC committee, and Jiang-zhong Zha-xi-duo-ji, vice chairman of the regional CPPCC committee, as deputy leaders returned to Lhasa recently after winding up visit and study tour to Chengdu, Nanjing, Shanghai, Fuzhou, Xiamen, Tianjin and Beijing. On 1 September, the regional CPPCC committee Standing Committee held a discussion meeting to hear reports on the tour. Responsible comrades of the regional CCP committee, people's congress Standing Committee and people's government were present to report. [OW111411 Lhasa Xizang Regional Service in Mandarin 1100 GMT 4 Sep 80]

GANSU NATIONAL DAY DELEGATION--A 25-person Gansu provincial national day minority study-visit group headed by (Sa Yuxu), chairman of the Gansu Provincial Nationalities Affairs Committee; (Jia Side), chairman of the Standing Committee of the Linxia Hui Autonomous Prefectural People's Congress; and (Ma Jicheng), vice president of the China Islamic Association, departed Lanzhou for Heilongjiang, Jilin and Beijing on 1 September. This study-visit group is composed of cadres, technicians and commune members of 9 minority nationalities from 10 prefectures, autonomous prefectures and municipalities in the province. Before their departure, Wang Bingxiang, Standing Committee member of the Gansu Provincial CCP Committee and provincial deputy governor, received all group members. [SK072128 Lanzhou Gansu Provincial Service in Mandarin 1125 GMT 4 Sep 80]

GANSU PERSONNEL AFFAIRS CONFERENCE--The Gansu provincial personnel affairs conference was held 21-30 August in Lanzhou. This was the first conference of its kind in 15 years. The conference contended that with the shift in the emphasis of party work, personnel departments should help party organization departments reform the cadre structure so as to establish a force of professional, competent cadres who uphold the socialist road. Many problems persist: ossified thinking, the one-sidedness of metaphysics, a feudal ideology, conventional thinking and inhibitions and the force of habit. Personnel work is beset with irregularities such as personal connections and backdoor dealings, overemphasis on hiring those with personal connections and the exclusion of persons with professional knowledge and special skills. These irregularities must be resisted and corrected. Cadres in charge of personnel work must heed party discipline and state law and eliminate these practices. [SK062305 Lanzhou Gansu Provincial Service in Mandarin 1125 GMT 5 Sep 80]

LIAONING YOUNG CADRES--As of early August, Liaoning Province had promoted 3,868 young and middle-aged cadres to leading posts at or above county-level organs. It is anticipated that by the end of 1980, about 1,000 persons will be selected to reinforce the leading bodies above county-level organs; 346 persons have already been selected. It has been decided that about 16 counties in the province will have one or two cadres under 45 years of age serving in the first and second leading posts by the end of this year. [Shenyang Liaoning Provincial Service in Mandarin 2200 GMT 4 Sep 80 SK]

LIAONING CCP COMMITTEE DELEGATION--The Liaoning Provincial CCP Committee delegation led by Zhang Zhengde, secretary of the provincial CCP committee, and (Li Zhongye), first secretary of the Anshan Municipal CCP Committee, returned to Shenyang by train 4 August after completing its friendly visit to North Pyongyan Province, DPRK. [SK052045 Shenyang Liaoning Provincial Service in Mandarin 2200 GMT 4 Sep 80]

LIAONING RECEPTION--On 7 September leading comrades from the Liaoning provincial and Shenyang municipal party, government and army organs as well as from the Shenyang PLA units, including Chen Puru, Zou Yan, Shen Yue and Zhang Tiejun, cordially received the heads, deputy heads and representatives of various minority nationalities from minority delegations which are visiting Liaoning Province. These visiting minority delegations are from the Xizang Tibetan Autonomous Region and from Sichuan, Yunnan, Guizhou, Zhejiang, Fujian, Jiangxi, Hebei and Henan provinces. During the reception, Chen Puru, secretary of the Liaoning Provincial CCP Committee and governor of the provincial people's government, extended warm welcome to the visiting comrades on behalf of the Liaoning provincial and Shenyang municipal CCP committees, the Standing Committees of the provincial and municipal people's congresses, the provincial and municipal people's governments, the provincial and municipal CPPCC committees, the Shenyang PLA units and the provincial military district. [Shenyang Liaoning Provincial Service in Mandarin 2200 GMT 7 Sep 80 SK]

JILIN PEOPLE'S CONGRESSES--Changchun Municipality in Jilin Province completed the elections of deputies to county and district people's congresses on 4 September. A total of 3,222 deputies were elected by secret ballots. [SK090045 Changchun Jilin Provincial Service in Mandarin 1100 GMT 7 Sep 80]

HUNAN URBAN WORK CONFERENCE--From 16 to 23 August, the Hunan Provincial CCP Committee and the provincial people's government held a conference on urban work to sum up and exchange experiences and study how to further improve urban work and management. The participants said that to reaffirm urban planning, it is necessary to first formulate the scale of urban developments and follow the principle of developing more small cities and townships. Generally, the population of the cities and townships should be around 200,000. The scale should be formulated from the very beginning, so as to avoid blind planning. It is necessary to be economically rational and technologically advanced, pay very serious attention to saving electricity and speedily develop the cities in accordance with the plans and proportions. It is also necessary to base things on existing foundations, give play to the strong points and avoid the weak ones, make better use of local resources and increase production by relying on tapping potential and technical innovation. [Changsha Hunan Provincial Service in Mandarin 1100 GMT 29 Aug 80 HK]

HUNAN NEWSPAPER READERS' LETTERS--In accordance with the instructions of the Hunan Provincial CCP Committee, the general office and propaganda department of the provincial CCP committee issued a notice on seriously handling the people's letters that appear in the party newspapers. The notice revealed that most units are now handling such matters solemnly and seriously. However, some units still have not paid serious attention to it and cannot handle it correctly. With cases which should be solemnly dealt with, some units failed to do so, while others avoided doing so and some even covered them up. In some cases, the writers were being retaliated against, causing definite damage to the party's work and giving it a bad image among the masses. The party organizations at all levels must seriously handle the people's letters and appoint a person to be specifically responsible for them. The leadership must be personally concerned about it. The results of handling these letters which were openly published in newspapers must also be published in newspapers. [Changsha Hunan Provincial Service in Mandarin 2315 GMT 27 Aug 80 HK]

HUBEI RURAL CYL CONFERENCE--The Hubei rural CYL work conference ended in Huanggan County on 28 August. The participants pointed out that the implementation of the economic policy has speeded up development in the countryside. It is necessary to do CYL work in the basic-level units, persist in reforms and fully enliven the scientific research work in the countryside. In launching the activities to be the shock troopers in the new long march, the young people in the countryside must persist in such activities. However, they must not engage in formalism. The numerous junior and senior middle school graduates who have returned to the countryside must have jobs. The CYL organizations must also be concerned about their growth. It is also necessary to help the young people to solve the problems of families, marriage and love. During the conference, Wang Qun, deputy secretary of the provincial CCP committee, spoke. [Wuhan Hubei Provincial Service in Mandarin 1100 GMT 30 Aug 80 HK]

HUBEI LEADER MEMORIAL SERVICE--Li Minghao, member of the Fifth National CPPCC Committee and vice chairman of the Fourth Hubei Provincial CPPCC Committee, died of illness on 25 August 1980 in Wuchang, aged 83. A memorial service was held at the hall of the provincial CPPCC in Wuchang on 30 August. [Wuhan Hubei Provincial Service in Mandarin 1100 GMT 31 Aug 80 HK]

HENAN DISCUSSION MEETING--The Standing Committee of the Henan Provincial People's Congress held a discussion meeting on 3 September to discuss the provisional PRC regulations on lawyers. It was attended by some of the Standing Committee members, the responsible persons of the provincial judiciary and civil affairs departments and the representatives from the relevant units and departments. The participants pointed out at the meeting that the promulgation of the regulations is important for strengthening the legal system and judiciary work and will play an important role in the people's political life. [OW111427 Zhengzhou Henan Provincial Service in Mandarin 1100 GMT 5 Sep 80]

SICHUAN AIR FORCE UNIT TRAINS FIRST GROUP OF TIBETAN PILOTS

Chengdu SICHUAN RIBAO in Chinese 6 Aug 80 p 3

[Article: "First Group of Tibetan Pilots Trained"]

[Text] A certain air division of the PLA air force stationed in Sichuan recently announced some good news that the first group of Tibetan pilots has successfully completed their last training course of flying in four kinds of weather conditions which consist of flying in daytime, nighttime and in clear and adverse weather conditions, and they have achieved all-weather operation and combat standards.

The average age of this group of Tibetan pilots is 25 years old and they are a part of a larger group of minority pilots recruited through the beloved Premier Zhou's suggestion when he was alive. After their arrival to the air force unit stationed in Sichuan, the party committees at various levels organized them to study the basic principles of Marx-Leninism and Mao Zedong Thought, and the unit made special efforts to write teaching materials on aviation theories for them and selected instructors with rich experiences to direct them in study and training. Moreover, with respect to the customs and practices of various nationalities, the unit created fine conditions for them in their study and livelihood.

Tibetan pilots Luo Ga, Liu Jian and Liu Dongjiu said: "We absolutely cannot disappoint the premier's hopes and the party's concern and must become able pilots to win honor for the Tibetan people." They conscientiously and diligently studied the Chinese language and aviation theories and rigorously trained in flying skills, devoting themselves wholeheartedly to the cause of flying. By virtue of their diligent studies and success in overcoming one obstacle after another, all of them have chalked up 100 percent in high quality and safe flying days. On one occasion, Luo Ga was flying in adverse weather conditions when suddenly his radio contact was cut off. Flying in poor weather conditions with only 2 to 3 kilometers of visibility, he nevertheless remained calm and flew the fighter aircraft safely back to base under the situation of having no ground command and guidance. On one occasion, Liu Jian was flying in adverse weather conditions at night when the left engine of his plane suddenly stopped. It was hard to control the plane lopsided. He and the instructor coordinated their efforts and flew the plan through the cloud and fog and used one engine to land safely. He was awarded a meritorious citation, third class.

SHENYANG PUBLIC TRIAL--On 4 September the Shenyang Intermediate People's Court, Liaoning Province, held a public trial to pass a death sentence on (Zhao Baoyu), a murderer who killed a shopkeeper in the course of an optical shop robbery on 18 October 1979. The Liaoning provincial public security organ cracked this robbery case on 11 July 1980 and convened a public trial. More than 1,000 observers attended the trial. [Shenyang Liaoning Provincial Service in Mandarin 1100 GMT 4 Sep 80 SK]

HUBEI SOLDIERS FLOOD RESISTANCE--The Wuhan PLA units, the air force of the Wuhan PLA units and the Hubei military district have mobilized their units and militia to fight floods and insure the safety of the people's lives and properties. In the past few days, leaders of these units have gone to embankments in Changjiang to investigate the flood situation. At the same time, the soldiers have actively supported the people in the affected areas to prevent flood and drain the waterlogged land. The Wuhan PLA units have helped the people in Hanyang County recover 2 million jin of maize. [Wuhan Hubei Provincial Service in Mandarin 1100 GMT 31 Aug 80 HK]

FIRST PUBLIC OPINION POLL CONDUCTED IN SHANGHAI

Shanghai JIEFANG RIBAO in Chinese 8 Jul 80 p 2

[Article: "Shanghai Workshop Sponsors First Public Opinion Poll"]

[Text] What is your present most urgent need? Your answer must be one of the six alternatives listed as follows: 1) education; 2) an ideal job; 3) pay hike; 4) an ideal companion; 5) a home; 6) a complete set of new furniture.

This was one of six questions contained in the first public opinion poll conducted by the branch of the Chinese Communist Youth League of the workshop no 2 of the Shanghai no 2 battery plant. The five other questions were: What is your faith? Do you believe that the four modernizations can be accomplished? What objectives are you trying to achieve during the 1980's? Do you have any complaints to make? Respondents to this poll were CYL members and were not required to sign their names at the end of the questionnaire, so that they could feel free to answer it as sincerely as possible. Some CYL members even brought the questionnaire home so that they could think it over carefully. Their answers to this poll represented a cross-section of the genuine view of our younger generation on the current situation, after having suffered 10 years of disorder.

This poll was conducted not to sample public opinion alone. Its primary aim was to inspire the youngsters to tell what they really have in their minds. Another aim was to help them raise their political consciousness, achieve a common understanding of the current situation, and arrive at a correct answer to the problems they face today. Their original answers to the questions have been carefully analyzed and grouped into 10 thought-provoking questions as subjects of further discussion by youngsters at the workshop. The CYL branch has also organized the respondents to the poll to study these 10 questions and to answer them one by one in their own equitable way.

The 10 questions have become subjects of animated debate among the members of the CYL branch, thus introducing an exciting element into their daily activities. In order to seek truth from facts, many youths have debated one another not only at their group discussion meetings but also at their workshop and dining tables.

One day, the CYL branch scheduled a discussion meeting for 4 pm, 2 hours after the close of their workshop. They came to the meeting immediately after taking showers. The central theme of discussion at that meeting was the question: Since communism cannot be realized in the immediate future, what should we do now? A young lady said: "As individuals, we should be realistic and should not be fooled by promises that cannot be delivered." This remark immediately drew fire. Dong Qinkuang [5516 0530 0562], a youth who spent 7 years in the Da Xingan Ling forest area, disagreed with this "selfish way of thinking." He said: "Since the revolutionaries of the older generation had sacrificed their lives for the sake of our country, we must work hard to accomplish the four modernizations. In cherishing the memory of their achievements in creating happiness for us, we should try our best not to hand a disaster down to the generations to come."

Some youngsters said: "Because we cannot count on the support of our fathers, we must stand on our own feet in raising families of our own. To sustain our own families, we must work hard 8 hours a day in hopes of winning more bonuses, and we must devote spare time to sideline production in order to supplement our regular income." Some young opponents of this idea held that youngsters should aim high to foster lofty ideals; they should not allow the idea of building "small cozy families" and self-interest to prevent them from thinking and doing something big. A lively debate produced this consensus: Everyone has a legitimate right to seek a better and more comfortable life. But it is a shame to envy a bourgeois way of life. Only by accomplishing the four modernizations can we bring a better life to the generations to come. At this time, Wang Minjuan [3076 2404 1227], secretary of the CYL branch and female worker of an equipment maintenance group, urged youngsters to plant and grow more shady trees to shield the younger generation. In this connection, she said: "As members of this generation, we are fortunate to be able to enjoy the shady breeze under those tall socialist trees cultivated by many revolutionary martyrs. They displayed a revolutionary spirit and sacrificed their lives for the communist cause when they were younger than we are. Today, we youngsters should emulate this revolutionary spirit of self-sacrifice by planting and growing more trees and make contributions to the development of the four modernizations and the communist cause."

This public opinion poll has received a favorable response from CYL members and youngsters. They described this activity as a step in broadening the vision of their future, and in cultivating new ideals. Some CYL members have pledged to study science and technology and to do a good job in production. This activity has also stimulated a newly recruited young worker to apply for CYL membership. This public opinion poll marks only a good beginning. The CYL branch is prepared to lead CYL members and youngsters to further discuss problems reflected in the poll. Only in this way can the CYL gradually arm its members with the communist philosophy of life and inspire them to serve the great cause of the four modernizations.

BRIEFS

YUNNAN VILLAGE LIBRARY--Kunming, 4 Sep (XINHUA)--The Heshun library, the largest village library in China, has played an important role in raising the educational and cultrual level of the peasants of Heshun people's commune, situated in the southwestern corner of Yunnan Province. The commune has a population of 5,000. Ninety percent of the adult members have an educational level of junior middle school. The commune has produced several hundred college students. Only 77 people are illiterate. The library, established in 1928, has a floor space of more than 1,000 square meters, with four rooms housing the stacks and two reading rooms. It has more than 40,000 books which include rare ancient books, local historical records from the Qing Dynasty, and contemporary books and journals. It has made a speciality of collecting Chinese journals published between 1911 and 1949. The government has allocated funds for maintenance of the library and provided it with some books. [Beijing XINHUA in English 1249 GMT 4 Sep 80 OW]

YUNNAN EDUCATION MEETING--On 31 August, the Yunnan Provincial CCP Committee held a meeting on education work to discuss the issues of education and science and technology. The participants demanded that the party committees at all levels include education work in their important daily agenda. They pointed out that education work must conform with socialist modernization and strive for a great development in the 1980's. Education and science must have long range plans. It is necessary to pay very serious attention to building the ranks of teachers. The locations of ordinary middle schools must be properly readjusted. It is also necessary to strive to run the technical secondary schools and enhance the cultural and scientific levels of the staff and workers. [Kunming Yunnan Provincial Service in Mandarin 1100 GMT 2 Sep 80 HK]

TIANJIN UNIVERSITY FIRE--A conflagration broke out at Tianjin University 2 September. Tianjin mayor Hu Qili, who was attending the third session of the Fifth National People's Congress in Beijing, rushed home to help fire victims solve housing and living problems. [Tianjin City Service in Mandarin 2330 GMT 4 Sep 80 SK]

BEIJING TOURISM COLLEGE—Beijing, 3 Sep (XINHUA)--Beijing No 2 Foreign Languages Institute's branch school in East Beijing is to be expanded into a college of tourism as part of a plan to train personnel for China's fast growing tourist industry. This was revealed at the inaugural meeting of the preparatory committee for the Beijing college of tourism held at the workers stadium here this afternoon. The 550 students now studying languages at the branch school will also select subjects relating to tourism, including management of the industry, guide and interpreter services, and economics. Zhang Zhongshi, director of the Beijing administration, told today's meeting that the number of foreign and overseas Chinese visitors to Beijing had almost doubled in the past few years and the capital's tourist industry fell far short of their needs. "In order to make the tourist industry a major undertaking in the capital, we must build more tourist hotels and train more competent personnel," he said. [Beijing XINHUA in English 1226 GMT 3 Sep 80 OW]

QINGHAI PRIMARY EDUCATION—Qinghai Province has set up a number of key primary boarding schools in minority areas this year. The provincial party committee has solicited opinions regarding expanding primary school education in minority areas at an enlarged standing committee meeting held earlier this year. Afterwards, Ma Wanli, deputy provincial governor, presided over a conference of responsible persons from departments concerned to discuss minority education. The provincial authorities have appropriated 3.2 million yuan on two occasions this year for the six autonomous prefectures to set up or expand over 30 boarding primary schools. These schools can accommodate a combined enrollment of some 3,000 minority children. [Xining Qinghai Provincial Service in Mandarin 1100 GMT 5 Sep 80 SK]

HUBEI TOMB FIND--Wuhan, 11 Sep (XINHUA)--Fifteen Persian silver coins of the Sassanids have been found in a 1,300-year-old tomb in Hubei Province. Peasants digging a well in Anlu County chanced on the tomb. It was built for the wife of a prince of Wu named Li Ke, third son of Tai Zong (627-649) in the early Tang Dynasty, according to the inscription of the stone tomb tablet. The multi-chamber brick tomb in a large vertical earthen pit that is 34.4 meters north-south, 6 to 8 meters east-west and 4.5 meters deep consists of a main chamber, side chambers with funerary objects, the entrance passage and corridors. An integrated sewer conduit runs through various chambers. Archeologists also found more than 400 gold and silver objects, pottery and porcelain, bronzes, pearls and jade objects. [Beijing XINHUA in English 0747 GMT 11 Sep 80 OW]

SHANGHAI TV PROGRAMS--Shanghai, 5 Sep (XINHUA)--Beginning New Year's Day next year, Shanghai television station will broadcast additional television programs on Channel 20. For this purpose, Shanghai's television industrial departments, with support from the Fourth Ministry of Machine Building and the State Bureau of Broadcasting and Television Industry, are producing the all-channel television sets which can receive television programs on Channel 13 and above. The older existing models, too, are being remodelled so that they can receive television programs on the new channel. A 12-inch all channel (Channel 1 to Channel 48) black and white television model produced by Shanghai will soon be on the market. [Beijing XINHUA Domestic Service in Chinese 0112 GMT 5 Sep 80 OW]

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

PARTY AND STATE

LEADING CADRES FOLLOW 'GUIDING PRINCIPLES'

County Party Official

Beijing RENMIN RIBAO in Chinese 16 Aug 80 p 3

[Report by Li Chunze [2621 2504 3419]: "New Workstyle of a New Leader; Principal Responsible Comrade of Zunhua County Party Committee Takes the Lead in Rectifying Party's Workstyle"]

[Text] The principal responsible person of the reorganized Zunhua County Party Committee in Hebei Province, in carrying out the "Guiding Principles for Inner-Party Political Life," has taken the lead in rectifying the working style of the party. This is in clear contrast to the example of the principal responsible person of the old county party committee, who in previous years reigned high above the masses and did his best to seek feudal privileges. Below is a discussion of a few small things in this regard.

After County Party Committee Secretary Zhu Changxin [2612 7022 2946] arrived in Zunhua, the first problem he encountered was housing. He has five members in his family (counted as five according to household, but the actual number of his family members is nine), which comprises four generations from great grandmother to great grandson: above him he has an old mother, and below him he has children and grandsons. Going by the housing level of ordinary cadres and workers in Zunhua, it would have been nothing special if he occupied four or five rooms. Comrades wanted to make more spacious arrangements for him, but he would agree to have nothing of the sort and insisted on moving into a place that has only two bedrooms and one corridor-hall--i.e., a flat three-room house.

In previous years, if the former county party committee standing committee members felt ill, it was a routine practice to telephone for doctors to come. The original responsible person on the county party committee was provided with his own special personal physician who practiced both Chinese and Western medicine and stood ready to carry out his assignments at all times, and who hence was called "the imperial doctor." If he was going out of his residence for treatment, then subordinates had to surround him to see him off. Today, this kind of decadent practice has been eliminated. Not long ago, Comrade Zhu Changxin had colonitis, with blood and pus in his stool and continued diarrhea, and he needed an enema. Comrades thought of the frequent trips required for the enema he had to take because of diarrhea and his attendant need to lie in bed and rest, and so they suggested calling the doctor to come to the office to adminster the treatment to him; he declined this in solemn words. They thought of sending him to the hospital by car; he did not agree with that, either, but insisted on walking to and from the hospital. The medical personnel observed: This county committee secretary asks no privilege for himself whatsoever.

As a matter of fact, it has been well known that Zunhua County has many cars; there are more than 20 small jeeps, alone. In the past, leaders in the county would ride in a car whenever they had any excuse to do so Whenever they went out to inspect production, there would be even more uninterrupted processions of passenger cars on the road with pomp. The masses had this to say about them: "They ride in passenger cards, look out through their glass windows, have lunch [at the inspection site] at noon, and go right back to the county seat in the evening." When Comrade Zhu Changxin came to Zunhua, he was determined to start with himself as an example and take the lead in rectifying this common practice. At the beginning of last year, he led comrades of the agricultural, forestry and water conservancy departments on an inspection tour of the mountainous districts in the north. They made visits to 14 communes and 110 production brigades along the Great Wall in more than 2 months, and in the course of their travels, totaling more than 1,000 Chinese li, they rode only bicycles or walked all the way; no car was ever ridden. During the three-summer period this year, the county organized trade union committee members and commune secretaries to inspect the wheatfields and the growth of late autumn crops; they arranged for 4 "130" trucks. County Party Committee Deputy Secretary Li Qing [2621 7230] let old and weak trade union committee members and commune secretaries ride in the driver's cab, while he himself and others stood in the rear sections where the covers were lowered.

The party's working style in Zunhua County suffered serious sabotage in the past, and the masses had pretty drastic reactions. Today, the principal leading comrade of the county party committee is taking the lead in carrying out the "guiding principles." This has brought hope and confidence to people.

Mine Bureau Chief

Beijing RENMIN RIBAO in Chinese 16 Aug 80 p 3

[Xinhua dispatch from Beijing: "Leading Cadre of Beijing Mining Bureau Seriously Follows 'Guiding Principles' in His Operations; Sets Example for Basic-Level Cadres"]

[Text] Not long ago, the chief of the Beijing Mining Bureau, Zhang Ruihua [1728 3843 5478], twice led cadres of his organization to Wangping village and Muchengjian mine to inspect work. Unlike the practice of the past, they did not ride in passenger cars to go there but took the ordinary workers' commuter train. This event was praised by the workers. Not a few workers said: When the bureau leader takes the lead to change the workstyle and sets an example for us, we too must make strict demands on ourselves.

In reality, an event like this was but one of the many new phenomena that have come about since this bureau started to lead the cadres in studying and carrying out the "Guiding Principles for Inner-Party Political Life."

The Beijing Mining Bureau is situated relatively far from the Beijing municipal area, and it is also some distance from the various mines. In the past, the leading cadres of this bureau regularly required passenger cars to take them back and forth whether they were handling public or private affairs, and they took this as a treatment they should enjoy. Hence, although the bureau had 15 trucks and passenger cars, these were found to be still not enough, and drivers often could not rest even on Sundays. In May of this year, party members were organized by the Bureau Party Committee to study the "guiding principles." Many leading cadres examined [their conduct and activities] against the "guiding principles" and hence recognized that theirs was a style of particularization. If this style was not changed, practices at the mines and in the local society would be very hard to correct. From then on, whenever they went to the city on private errands or when they sent off relatives and friends, they usually tried to use these publicly owned passenger cars as little as possible. When they really required the use of the organization's passenger cars because of special circumstances, they usually applied first at the Bureau Office according to regulations, and they also paid the fees after such use according to regulations. When they went to the city to hear reports, attend meetings and handle public affairs, or when they went to the mines to work, they usually refrained from using passenger cars but generally rode in trucks or buses together with other cadres and workers in the organ.

Through study and checking against the "guiding principles," this bureau also succeeded in stopping devious practices such as using public funds to entertain guests or buy gifts. And when the bureau convened meetings for ordinary work, no meal subsidy would be granted.

Recently, leading cadres of this bureau also took the initiative to suggest that the past practice of using public funds for each leading cadre of the bureau to subscribe to a few newspapers and journals be rescinded, and that the leading cadres subscribe to them with their own money.

PARTY AND STATE

TRADE UNIONS EXHORTED TO USF 'GUIDING PRINCIPLES' IN THEIR WORK

Beijing GONGREN RIBAO in Chinese 14 Jun 80 p 3

[Article by Huang Minwei [7806 3046 0251]: "Uphold the Party's Mass Line, Do a Good Job in Trade Union Work During the New Period; Learn From 'On Certain Principles of Political Life Within the Party']

[Text] After "On Certain Principles of Political Life Within the Party," formulated by the Fifth Plenary Session of the 11th CCP Central Committee was made public, it received the enthusiastic support of cadres from the entire party and trade unions throughout the country and from the broad masses of workers and staff members. This very important document has very important significance for the comprehensive restoration and development of the party's excellent work style, for the improvement and strengthening of party leadership, for carrying out comprehensively the political, ideological and organizational lines formulated since the Third Plenary Session of the 11th CCP Central Committee. It is a "magic weapon" for guiding the hundreds of millions of the people in the country to build the socialist modernizations in the new period with one heart and mind. There is absolutely no question but that this "magic weapon" has very important guiding significance for strengthening our trade union construction, and is a powerful weapon for the trade unions to organize and mobilize the broad masses of workers to carry out the modernizations in the new period.

One of the basic elements of the "Guiding Principles" is the demand that party organizations at all levels and each party member uphold the mass line and keep close ties with the masses. This point is extremely important for us to do a good job in trade union work during the new period. Comrade Mao Zedong clearly pointed out in his political report at the party's Seventh Congress that keeping close ties with the masses is one of the clear signs of the difference between the Communist Party and other political parties. In wholeheartedly serving the people one cannot depart from the masses for a moment. Everything starts with the interests of all the people and not from the interests of the individual or a small clique. The coincidence of being responsible to the people and being responsible to the party is our party's point of departure. In his report on revising the party charter at the Seventh Congress, Comrade Liu Shaoqi said the mass line is the fundamental political line and organizational line of our party. Marxism has long recognized that the masses of the people are the creators of history and the masses of the people are the masters of history. Proceeding from this fundamental viewpoint, we Communist Party members in trade union work must uphold the party's mass line and establish the ideology of serving the people wholeheartedly.

In serving the people, first of all, the fundamental interests of the broad masses of the people should be represented politically, and a political line which conforms to the will and demands of the broad masses of the people should be carried out. Comrade Mao Zedong has said: all correct missions, policies and work styles are those which conform to the demands of the masses at that time and place and which keep close ties with the masses; all incorrect missions, policies and work styles are those which do not conform to the demands of the masses at that time and place and are divorced from the masses. All words and deeds of Communist Party members must take as the highest standard conformity to the greatest interests of the broad masses and what is supported by the broad masses of the people. At the present time, in speaking of serving the people, first of all, the party's general mission and general line during the new period, i.e., the political line "to unite all peoples in the country to build a modernized, highly democratic, highly cultured socialist nation and develop a socialist economy single-mindedly, in a planned and proportional fashion, quickly and economically," should be carried out. This line fully embodies the highest interests of the broad masses of the people and reflects the will and demands of all the people of the country. To talk about serving the people divorced from the party's political line during the new period can only be empty talk.

Serving the people, the relationship between Communist Party members and the masses of the people should be set to rights. That the masses of the people are the masters and that Communist Party members, no matter what their rank or position, are public servants and servants of the masses of the people should be accepted. Communist Party members have only the task of serving the people diligently and conscientiously and do not have any other special rights to do things for themselves in politics or their private lives. Privileged party members lording it over the people and acting as lords and masters should be resolutely opposed.

Serving the people is to struggle hard and share the joys and sorrows of the people. The evil practices of not distinguishing public and private, using public office for private gain, using various excuses or pretexts to seize and squander the property of the state and the collective has always been unpopular, and the masses of the people are fed up with these evil practices. If we want to mobilize the initiative of the masses to engage in the four modernizations single-mindedly, we must develop the glorious tradition of bitter struggle and sharing the joys and sorrows of the masses of the people.

In serving the people, the immediate interests of the masses should be of concern. Do what the masses plan, think what the masses think, be anxious about what the masses are anxious about, listen to the voice of the masses, be concerned about the life of the masses, show consideration for the sufferings of the masses and pay attention to the feelings of the masses. Resolutely oppose the aristocratic work style of turning a deaf ear to the voice of the masses and being unconcerned about the sufferings of the masses. Just as Comrade Mao Zedong said: we communists should talk less idle talk, "all idle talk is useless, the people must be given visible material benefits." (MAO ZEDONG XUANJI [SELECTED WORKS OF MAO ZEDONG] Beijing shudian, May 1958, p 876)

Uphold the mass line and keep close ties with the masses, in addition to ideas of serving the people discussed above, ideas of having faith in the people and relying on the people, i.e., the idea that the masses can liberate themselves, should be firmly established, too. Revolution is a matter for the thousands and millions of the masses. The liberation of mankind can only be done by mankind itself, and not by any "immortal," "emperor" or "saviour." All the victories we have won in revolution and construction were the result of unified struggle of the broad masses of the people under the leadership of the party. That we can win out over the destruction and disruption of enemies both domestic and foreign, is also the result of the heroic struggle of the broad masses of the people under the leadership of the party. Similarly, the mistakes we made in work can only be corrected promptly and completely by relying on the criticism, supervision and help of the masses. Every time all levels of leadership and the broad cadres can be intimately concerned with the interests of the masses, listen carefully to the voice of the masses, experience and observe the feelings of the masses deeply, listen sincerely to the criticism of the masses, we commit fewer mistakes in our work, i.e., it makes the mistakes committed, even if they are severe ones, easier to correct.

In summary, the party's mass line is an important feature of the difference between the Chinese Communist Party and other political parties and organizations. For the party to realize the great objective of the socialist modernizations, it must firmly maintain this important feature and strive to develop and embody this excellent work style and glorious tradition.

Upholding the party's mass line and developing the glorious tradition of keeping close ties with the masses has very important significance in terms of the mass organizations and trade unions of our worker class. As the mass organizations of the worker class, the trade unions are first of all, the "bridge" between the party and the worker masses. In Lenin's words, it is the "transmission" between the party and the broad masses of workers. Lenin pointed out that if we did not have this kind of "'transmission' to link up" the vanguard and the masses of workers "we would be unable to realize dictatorship," and "if the 'transmission' (trade unions) between the Communist Party and the masses were poorly established or made mistakes in its work, then our socialist construction would of necessity meet with disaster." (LIENING XUANJI [SELECTED WORKS OF LENIN] Vol 4, p 404, 489) Close ties with the masses are the basic condition of the trade unions doing their job well. Many years of practical experience proves that the vitality of trade union work lies in keeping close ties with the masses. But keeping close ties with the masses also requires the adoption of appropriate measures and systems. That is, to get into actuality and into the grassroots level constantly. The grassroots is where the masses gather and is the first line of production. The most vital and lively first-hand material is at the grassroots level, and the richest experience is at the grassroots level. Trade union cadres at all levels need only place themselves among the masses of workers and at the grassroots level to be able to put trade union work truly into operation in production and to get to the masses and thus make trade union work full of sound and color and lively; only then can they learn true capabilities and make a new contribution to the four modernizations.

The trade unions are an important representative of the broad masses of workers, so trade unions should certainly work with initiative and independent responsibility and coordinate with the concerned agencies, and at the same time certainly should firmly uphold the interests of the masses they represent, actively resolve the personal problems in their daily lives and oppose bureaucracy, which is not concerned with the sufferings of the masses. That is to say, for the trade union to be the representative of the masses and aside from setting an example, keeping close ties with the masses, being concerned with the masses and doing a good job, at the same time, it should also dare to present the masses, speak for the masses, truly make the trade union "the worker's family," protect the legitimate political and economic interests of the masses of workers and dare to struggle with all evil tendencies which harm the interests of the masses. To struggle with all evil tendencies which harm the interests of the workers, especially struggle with bureaucracy, the broad trade union cadres must further liberate thinking, smash the spiritual cangue of "welfarism," "economism" and "syndicalism" which Lin Biao and the "gang of four" forced on the trade union. The vulgar work styles of "I know very well that it's wrong, but it's best if I don't say much," "better to offend the masses than dare to offend the leadership," "I'm not afraid of being divorced from the masses, I'm just afraid of offending the party committee" must be corrected and the autocratic work style of using trade funds for the personal benefit of a minority must be resolutely opposed. On the surface these comrades seem to have a strong party concept, but in actuality they only play with the interests of the masses of workers, they put their responsibilities to the party and their responsibilities towards the masses in opposition to each other, and this in itself is a bad work style which is divorced from the masses. If this is not overcome, not only will it be impossible to develop the organizational and helping functions of the trade union, but instead of helping, it will harm keeping close ties between the party and masses.

The formulation of the "Guiding Principles" was a great victory in the rectification of party style and party discipline in the new period and a revolution in the political life of our party. But just talking about the "Guiding Principles" is one thing, to carry them out thoroughly and conscientiously in party life is another. We certainly should get in close touch with actuality, combine the "Guiding Principles" we studied with the "Guiding Principles" we implement, and in the spirit of "starting now," "starting with me," "starting with each thing done" everyone should use the "Guiding Principles" as a rule and compass, inspect himself according to the "Guiding Principles," get more results, overcome deficiencies, become a proletarian advanced soldier who is up to standard and charges forward to realize the four modernizations.

PARTY MEMBERS IN GUANGDONG UNIT UPHOLD 'PRINCIPLES'

Guangzhou NANFANG RIBAO in Chinese 28 Jul 80 p 3

[Article: "Study 'Guiding Principles'; Strengthen Unity"]

[Text] Since "Certain Guiding Principles Regarding Political Life Within the Party" (draft) was issued last spring for the benefit of all party members, members of the party committee of the armed unit of Puning County have made a conscientious effort to live up to the principles, with a view to strengthening unity within the party and achieving better results in all areas of work undertaken by the armed unit. From being one of the more backward units in Guangdong Military Region, the armed unit has progressed to being one of the most advanced. Its experiences and methods may be summarized as follows:

The secretary and deputy secretary of the party committee of the armed unit took the lead in promoting friendship, mutual understanding, and cooperation. Neither Zhao Xuezhong [6392 1331 1813], party committee secretary and political committee member, nor Zheng Jiuhe [6774 0046 0678], party committee deputy secretary and department head, spared themselves in setting personal examples in studying the principles and promoting mutual respect with a view to strengthening "group" unity. Toward the end of last year, Zhao Xuezhong was given the responsibility of signing up recruits for the armed services in the Lihupien area. At that time, a young man who answered the call for military service suffered a bout of depression because he had failed to pass the physical examination. When Zhao Xuezhong learned of the incident, he was so concerned that he decided to see what he could do. Zheng Jiuhe, knowing that Zhao's visit to the military units had been a brief one and that he therefore was not too familiar with the local situation, volunteered to take upon himself the responsibility of finding a satisfactory solution to the problem. Zhao was very much moved by this thoughtful gesture on the part of Zheng Jiuhe. Both the secretary and deputy secretary were mindful of the need to handle problems according to the principles of the party, to preserve the good name of other people, and to fulfill their responsibilities in a creditable manner. Shortly after Zhao Xuezhong was given the assignment, he heard that it was the opinion of certain cadres that Zheng

Jiuhe was too brusque in criticizing people. On the one hand, he urged these comrades to accept the criticisms made by the department head in the right spirit. At the same time, when he had the opportunity to engage Zheng Jiuhe in conversation, he pointed out to him in an earnest manner his shortcomings, hoping that in the performance of his duties Zheng would try to inspire a positive attitude in the cadres, and that he would come to realize his own shortcomings and to overcome them. Because of the personal example set by the secretary and the deputy secretary, they were able to promote mutual support, mutual understanding, and a spirit of cooperation between the members of the lower and upper echelons of the armed unit.

Supporting collective leadership and decisions made by the Communist Party Committee. Through their experience, members of this party committee came to realize that in order to strengthen unity and establish an identity of purpose, it was important to keep in mind the interests of the public, to conduct themselves according to the rules of discipline and to make a conscious effort not to tolerate any action that smacked of sycophancy and toadyism. Once, when 2 percent of the cadres were due for promotion ahead of schedule, the party committee, acting in accordance with decisions of the higher-ups, and in deference to public opinion, unanimously passed a resolution promoting a leading cadre ahead of schedule. Later, a comrade came to the home of Chen Zhengzhong [7115 0524 1813] and told him that because of his low wages, he would recommend a promotion for him instead. Feeling that the cadre was out of line, Chen told him that any decision collectively made by the party committee should be final, and that the comrade was wrong in keeping silent at the meeting and then talking after the meeting was over. This action on the part of Chen in upholding Communist Party principles served as a lesson for the cadre.

Keeping lines of communication open. The party committee of the armed unit has made it a rule to call a meeting every quarter to review the life and living conditions of the people and to engage in criticism and self-criticism. On one occasion, Zhang Mingdai [1728 2494 0108], deputy chief of the unit, rather unjustly criticized Liu Qingxiang [2692 1987 4382], chief of the political section. Feeling he had been wronged, Liu was for a time not on speaking terms with Chang. Later, at a meeting for an airing of views, the atmosphere was cleared when both of them made their views known in an amicable manner. It was Comrade Chang who took the initiative in criticizing himself. All misunderstandings were dispelled, and unity was strengthened.

TREND TO USE STATE PRODUCTS AS PRIVATE PROPERTY EXPOSED

Beijing GONGREN RIBAO in Chinese 26 Jul 80 p 1

[Article by Tang Daiqing [0781 0108 3237] and Wang Yuan [3769 3293]: "Sichuan Provincial Discipline Inspection Commission Calls for Resolutely Checking the Tendency of 'Trial'"]

[Text] The Sichuan Provincial Party Committee's Discipline Inspection Commission recently issued a circular calling on all prefectures and departments to resolutely stop government offices and individuals from taking possession of the products of state-owned enterprises without pay, on the pretext of "trying them out," or demanding lower than market prices for these products following a trial. This circular was issued in response to a similar circular issued earlier by the [Central] Commission for Inspection of Discipline.

Since the beginning of this year, the Sichuan Provincial Party Committee's Discipline Inspection Commission has conducted an investigation into this problem in Chongqing and Chengdu municipalities, in Mianyang Prefecture, and at light industrial enterprises throughout the province. Its findings constitute a warning that this malpractice has become serious, because many units and individuals have taken possession of merchandise without pay, on the pretext of "trying them out," and then have come back many days later with demands for an unreasonable lowering of their prices. From 1971 to the end of 1979, central, provincial, and municipal departments or individuals have taken 466 television sets to their offices or homes "on approval" and watched them before buying. These television sets were trial-produced by the Chongqing No 3 radio plant, the Chongqing Bashan instrument plant, the Chengdu No 1 radio plant, and the Mianyang plant No 780. An inventory has showed that thus far, some 48 of these television sets worth 30,000 yuan are still being watched by units or individuals in their offices or homes on a trial basis. Of those television sets that were returned, some 54 could not be sold as new products because of the prolonged tryout by potential buyers. They eventually had to be sold at reduced prices, with a loss of over 10,000 yuan to the state. Similar serious cases have also been reported by the manufacturers of brocade bedspreads and high-quality cigarettes and other light industrial products.

The Sichuan Provincial Party Committee's Discipline Inspection Commission has called on all prefectures and departments concerned to resolutely stop this practice from spreading--a practice aimed at turning the products of state-owned enterprises into private property and at pursuing private interests under the guise of official duties. All units and individuals that have taken possession of such products without pay, on the pretext of "trying them out," should voluntarily return them to the enterprises concerned or buy them at the market price. Leading organs and leading cadres are not permitted under any pretext whatsover to take possession of these products without pay, or to demand to buy them at lower than market price. Nor are production units permitted to sell their products to leading organs and leading cadres at lower than market price or present them as gifts.

SECURITY CHIEF PRAISED FOR FOLLOWING RULES, REFUSING GIFT

Guangzhou NANFANG RIBAO in Chinese 28 Jul 80 p 3

[Article by Lin Denan [2651 1795 0589] and Li Qilin [2621 9706 7207]: "Implement 'Guiding Principles'; Do Not Accept Gifts"]

[Text] The Yangchun County Party Committee recently issued a public notice lauding Comrade Zhong Wenfeng [6988 2427 6912], chief of the Public Security Bureau, for observing rules and regulations in refusing to accept gifts. It called on Communist Party members throughout the country to emulate Comrade Zhong, who, by his exemplary conduct, took the lead in implementing the "guiding principles."

On 29 April 1980, when Zong Wenfeng, chief of the Public Security Bureau of Yangchun County, returned home from a stay in the hospital, his wife took a large heavy envelope from a desk drawer and handed it to him. When Zhong opened the envelope, he found a large stack of 10 yuan bills totaling 500 yuan. Also enclosed was a letter which in effect asked the bureau chief to accept the 500 yuan and to give his early approval to the sender's application for an exit permit so that she could take her family to Hong Kong. The letter was signed by a Mrs Liao [1675] of a certain overseas Chinese logging station. After having read the letter, Zhong said, "It is a violation of 'Certain Guiding Principles Regarding Political Life Within the Party' to ask me to abuse my authority by permitting her family to leave for Hong Kong." Thereupon he demanded to know how the letter was delivered. His wife told him that on 20 April, an overseas Chinese woman whom she had not previously met had come and asked to see him. Told that he was in the hospital, Mrs Liao handed her the envelope and asked her to give it to him. In compliance with her husband's standing order not to allow anybody to read his mail, she had put the envelope in the drawer.

Upon being told the circumstances, Comrade Zhong instantly made a report to the county party committee with his personal comments and, at the same time, turned the money over to the concerned department of the Public Security Bureau. He pointed out to the comrades of the party committee of the Public Security Bureau that what the overseas Chinese woman did was wrong, since applications for permission to leave for Hong Kong should be handled according to certain set policies. He further suggested that the overseas Chinese woman should be made to understand the importance of observing rules and regulations and that, in the performance of their duties, it was the practice of communist cadres to adhere to party principles. He also recommended that the money be returned to her. Originally, Comrade Zhong had intended to talk to the woman himself, but since circumstances did not permit him to do so, he asked his comrades on the bureau's party committee to do so on his behalf.

FEUDALISTS ATTITUDES TOWARD CHILDREN MUST BE ERADICATED

Guangzhou NANFANG RIBAO in Chinese 28 Jul 80 p 3

[Article by Huang Suzhen [7806 4790 6297]: "Cadres Must Adopt Correct Attitude Toward Relatives"]

[Text] Everyone has his own family and children. Whether or not one adopts a correct attitude toward one's children is not just a minor personal family matter, but one which has an important bearing on the healthy development of future generations of revolutionaries, the relationship between the party and the masses, and the prestige of the party itself. For this reason, all members of the Communist Party, particularly cadres in positions of leadership, must adopt a correct attitude in the treatment of their relatives and children.

The ultimate objective of Communist Party members is the realization of the goal of communism. The task is not one which can be accomplished during our own lifetime, but one which takes generations of effort. Members of the Communist Party should not, therefore, consider their children merely as just their children but as future carriers of the torch in the proletarian revolution. To insure the healthy development of their children, it is the duty of all Communist Party members to inculcate in their children the communist ideology and the communist code of conduct so that they may turn into dedicated servants for the public good and lifelong warriors in the cause of communism. On the other hand, Communist Party members must not instill in their children feudalistic ideas and feudalistic concepts of morality or imbue them filial piety toward their families and parents. Parents must demand that their children be trained to brave the storms and high seas and to derive their sustenance from the party and the masses in their development. For the same reason, parents must not "raise" them with a view to chalking up a plus in their credit book. Moreover, they must not give them special privileges and unearned rewards.

Many veteran proletarian revolutionaries in our party regard their children as future torchbearers in the revolution and demand that they not be accorded a share of their own honors and privileges. In this respect, Comrade Zhou Enlai set an excellent example. He made heavy demands on his children and his nephews and nieces, and absolutely refused to let them capitalize on his "name" to obtain special privileges. He forbade them to list their relationship to him when filling out biographic sketches and application forms for Communist Party membership or membership for other organizations, for fear that they might be accorded special treatment and that they might come to acquire a sense of superiority, which is not conducive to progress. At the same time, however, he demanded that, in conducting their affairs, they be constantly mindful of their relationship to him and that they refrain from acts of negligence which would be prejudicial to the interests of the party and the people and would damage the prestige of the party.

There are not a few Communist Party members and cadres in positions of leadership who exemplify the best traditions of the party in adopting the correct attitude toward their relatives and children. However, we cannot close our eyes to the fact that certain comrades are remiss in this regard. These comrades tend to look upon their children as the apple of their eye, lavish on them excessive love and permissiveness, and use their positions to obtain special privileges for them. When their children run afoul of party discipline or the laws of the land, instead of restraining them they try to cover up their wrongdoings and absolve them of their crimes, thus encouraging them to flaunt the law and even to pursue a criminal career. These comrades should stop and think and ask themselves whether or not such an attitude toward their children and relatives is in line with the basic position of Communist Party members. Such an attitude will not only ruin their children's future, but will also jeopardize the task which the party has set for itself.

According to feudalistic ideas on morality and ethics, children are the private property and the inheritors of the special privileges of their parents. Those among our comrades who fail to adopt a correct attitude toward their children may be said to be consciously or subconsciously under the influence of feudalistic ideas of morality and ethics. For this reason, in order to adopt a correct attitude toward our relatives and children, we must eradicate the influence of feudalistic ideas and adopt a worldwide outlook according to the tenets of proletarianism. We must teach our relatives and children the socialist and communist moral concepts and standards, we must insist that they strictly adhere to the principles of the party in their work, their life and their dealings, and we must refrain from according them special privileges. If we can set an example for the masses in adopting a correct attitude toward our relatives and children, we can eliminate the evil practices prevalent in the treatment of relatives and children and restore the excellent traditions and style of the party.

SMUGGLING RING RUN BY CHILDREN OF CADRES BROKEN

Beijing RENMIN RIBAO in Chinese 16 Aug 80 p 3

[Report: "Chaoyang Public Security Subbureau of Beijing Breaks Smuggling Ring"]

[Text] Recently, the Chaoyang Public Security Subbureau of Beijing Municipality investigated and broke a smuggling and doubledealing ring organized by the children of cadres. The culprits in this case, Xia Jingping [1115 2529 1627], Wu Jijun [0702 4949 6511] and Han Dongwei [7281 2639 0251], were arrested on 14 August according to the law, after the approval of the people's procuratorate of the Chaoyang District, Beijing Municipality. Among the members of the ring, 7 were sentenced to labor education and forced labor, 8 were given the punishment of detainment and 21 were subject to criticism and education by public security organs, ordered to return the stolen funds, and turned over to the units where they were stationed for further disposal.

Since June 1979, this smuggling and doubledealing ring connived with merchants in Hong Kong and opportunists and doubledealing elements inside the country, and spread to big cities such as Beijing, Tianjin, Guangzhou, Huhehot, Baoding, etc., where they engaged in smuggling and doubledealing activities. By February of this year they had smuggled 43.75 grams of gold, 11 television sets, 43 radio-cassettes, 283 small electronic calculators, 80 imported watches of various kinds, 519 assorted garments and 127 jin of rare Chinese herbs with a total value of more than 100,000 yuan. The profits after their devious sales were more than 10,000 yuan.

In breaking the ring, the Chaoyang Public Security Subbureau insisted in this case on the principle of everybody being equal before the law, and determined to handle it according to the law. During the early period when this case of the ring was being investigated, the Chaoyang Public Security Subbureau first detained culprits Wu Jijun and others. After only a few days, the Defense Division, the unit where criminal Wu's father was stationed, dispatched some people to the Chaoyang Public Security Subbureau with a letter of introduction to look up the

leaders concerned and express their wish to be informed of the situation and to review pertinent data regarding the case. This request was immediately refused. The visitors again pointed out that criminal Wu was the son of a leading cadre, and they expressed the hope that he would be dealt with in a relatively light manner. The personnel receiving them replied firmly: "We do things according to law; please tell his parent accordingly." From investigation to final uncovering of this case, there were more than 20 instances of parents of members of the ring coming to the Chaoyang Public Security Subbureau to plead for leniency on their behalf, but they were all firmly rejected by the comrades at the subbureau.

LENGTHY DELAY IN INVESTIGATING CAPSIZING QUESTIONED

Beijing RENMIN RIBAO in Chinese 16 Aug 80 p 1

[Article by Qianhong [0578 4767]: "A Discussion Beginning with the Notion 'Under Investigation': Thoughts on the Disposal of the Incident of the Capsizing of Oil-Drilling Rig Bohai No 2"]

[Text] A letter from the reader published on page 1 of the 24 July issue of RENMIN RIBAO said that, concerning the major incident of the capsizing of the oil-drilling rig Bohai No 2, no report was seen until 8 months thereafter; "This is perhaps a rare case even in the world history of journalism." The reader must have his reasons for criticizing the newspaper on this matter, and he should certainly have called the attention of journalism workers to it. But I feel that just to criticize the newspaper, just to ask the newspaper to make a timely report, is still not enough. Please note certain things which have happened since the occurrence of the capsizing:

This major incident occurred in the early morning of 25 November last year. It was not until 5 months later, on 21 April of this year, that the Labor Bureau of Tianjin Municipality filed a complaint before the municipal people's procuratorate. Let us consider that if a man is struck and killed by a car on the street and his relatives are going to lodge a complaint against the driver, they perhaps can't wait even for 5 days, or even 5 hours, let alone 5 months. Naturally, a major incident involving the death of 72 persons is fár more complicated than a fatal accident involving one person; but is it not astonishingly slow when a complaint is not lodged for as long a period as 5 months?

After another 16 days, on 7 May, the people's procuratorate of Tianjin Municipality accepted the complaint submitted by the Municipal Labor Bureau. From submission to acceptance of the complaint, between 1 act and another, 16 days were spent; this speed was also shockingly slow, indeed!

After still another 2 months, it was then learned from the newspaper that the matter had been "examinad and registered, and is now under investigation." How much more time this "investigation" will require, it is very hard to tell; people can only wait patiently.

Our march toward the four modernizations is symbolically called the "new long march." Then there is no harm in our comparing it with that "old long march." The Long March of the Red Army had to fight against being encircled, pursued and cut off by several hundred thousand enemy soldiers, to overcome inconceivable difficulties caused by natural conditions such as the snowy mountains and grasslands, and to walk 25,000 li, and yet they only took 1 year. But a capsizing incident, after a lapse of 8 months, is still "under investigation." During the well-known Haui Hai battle, more than 500,000 enemy soldiers were killed; including the 20 days for resting and regrouping on the battlefield, our army spent only 65 days. But the investigation of a capsizing incident has already taken nearly 4 times the period of 65 days and the matter is still "under investigation." Surely there can be no possibility whatsoever for us to say that this is because it is more complicated and difficult than the Huai Hai battle! Where does the problem lie in this case?

In a socialist country, when an incident occurs, even if just one single person has died, no one should remain unmoved. When as many as 72 persons have died, one should become even more concerned with a burning heart and attempt with the urgency of a shooting star to investigate and clarify the situation, and hence attend as quickly as possible to rehabilitation and the summing up of lessons. Every day earlier the lessons are summed up is one day less that such a tragic drama could be repeated. It has already been 8 months since the capsizing incident occurred. If during this process of "investigation" a similar incident should occur, how would one explain it to the people?

The two reporters of GONGREN RIBAO pointed out that there were four lessons in this capsizing incident. I think another one should be added, and that is why the investigation and disposal of the incident this time have been so slow. What lesson is there in this for the people?

Comrade Deng Xiaoping has suggested that since we wish to realize the four modernizations in 20 years, we must not misuse a single day. Yet today, some units are still using this pretext and that, dragging their feet on things they should have handled and done well earlier, and not showing the slightest concern if a day, a week, or a month is misspent, or feeling nothing unusual if perhaps even a year is misspent. In such places, many people are carrying out to make contributions to the four modernizations but cannot hear their steps in the march toward the four modernizations.

I think it would be best if all trades and all professions, every time they do something, were to propose the question of how they can uphold their responsibility to the people and improve their efficiency. Those who are responsible and efficient should be rewarded; otherwise, they should be punished. If they drag their feet on everything, with a delay of a few days, a few months or even half a year or a whole year, then no person who is enthusiastic about the four modernizations can tolerate them!

ECONOMIC RESPONSIBILITY PUTS END TO 'BUYING THINGS CHEAP'

Beijing RENMIN RIBAO in Chinese 16 Aug 80 p 2

["Countryside Miscellaneous Talk" by Gao Shan [7559 1472]: "The Responsibility System Stops the Practice of 'Buying Things Cheap'"]

[Text] When the season to pick spring tea leaves began this year, there were once again several passenger cars driven to a certain production brigade with the intention, as in past years, to buy "high-grade cheap tea." But this year was not the same as past years. When the honking of the horns was heard, commune members who were picking tea leaves and baking tea leaves all came out and surrounded the cadres of the production brigade, expressing their opinions as if in a contest: "If the guests are going to be entertained, you had better stretch your hands into your own pockets, but don't show your generosity by making a gift of the tea we have produced as part of the contracted output quota!" "No matter what kind of leaders come here to buy tea, our tea must be priced according to its quality, and payments must be made according to such prices."...Seeing this situation, the people in the cars had simply to drive away [emptyhanded].

In past years, whenever the tea-baking season was at hand, and thus the fragrance of tea was spreading from the tea hills, big cars and small cars would drive here in crowds to buy "cheap tea." In order to rectify this devious practice, concerned departments repeatedly issued documents and posted notices of warning and reprimand, but to little avail. This year, the tea farms and tea production brigades established their own responsibility system. Now that the masses have risen to protect their own interests, anyone who wishes to continue to buy "cheap tea" encounters a relative amount of difficulty. This not only spares the cadres of the communes and brigades a great deal of trouble, but it is also in the interest of the state, the collectives and the commune workers.

The fact that some cadres dared to consume and take the sideline products and indigenous and special products of the collectives without compensation was closely related to Lin Biao and the "gang of four," who for a long time sought to ruin the working style of our party; such a practice made the arms of some cadres unusually long and their mouths exceptionally avaricious. But, on the other hand, the approach of eating "from the common pot" also made some commune members indifferent toward the property of the collectives, as if there was always a difference between what belongs to the "public" and what belongs to "oneself." Even though everyone knows that what is in the pot is nothing more than what is distributed to the bowls, when encroachment upon collective interests was encountered few would speak out and act differently. Some occasionally even tended to calculate this way: "If someone took away a basket of peanuts from the brigade, how many individual shells would that mean to me? If someone hooked a fish from the brigade, how many fishscales would that mean to me?" This indicates that if the practice of eating "from the common pot" is not changed, we are more likely to have those who stick to their own affairs, like "Xiwang" [0823 2489], than to have those who would defend the collective interest, like "Li Shuangshuang" [2621 7175 7175].

Ever since the practice of connecting awards to production quantities and other forms of the responsibility system were put into effect, the sense of responsibility on the part of the commune members has been strengthened, their enthusiasm has been further mobilized, collective interests and individual interests nave become more closely combined, and hence "someone taking tea from the brigade makes one's heart ache, just the same as someone taking away a chicken from one's own home." As a result, commune members have been prompted, from the standpoint of their economic interests, to love their communes just like their own homes, and thereby to have the practice of people banking on "buying cheap tea" accordingly stopped.

WORKER AT WRISTWATCH PLANT BECOMES EXPERT TECHNICIAN

Beijing CONGREN RIBAO in Chinese 26 Jul 80 p 1

[Article by Yang Jun [2799 6511]: "Guo Xinfang Changes from Amateur to Expert"]

[Text] Guo Xinfang [6753 2946 5364], secretary of the party general branch of the Tianjin No 2 Wristwatch Plant, has devoted the past year or more to assiduously studying electronic wristwatch manufacturing technology. As a result, he has converted himself from a nonprofessional in this field into an expert capable of dealing with foreign businessmen, organizing production, and solving technical problems.

Guo Xinfang is a 38-year-old retired serviceman. He was transferred from active duty to the political work group of the Tianjin No 2 Wristwatch Plant in 1969. In May 1979, at the plant's request, he led a team of 10 workers and technicians to study fourth-generation electronic wristwatch assembly technology at the Jialin Wristwatch Company in Hong Kong. While each of the other comrades who accompanied him could learn to master only two steps in the process, Guo Xinfang distinguished himself by quickly acquiring the entire technological process with equanimity. Since his return to Tianjin, he has passed on what he acquired in Hong Kong to 130 other wristwatch assembly workers at his plant, whose monthly output now totals 100,000 wristwatches. Not long ago, a foreign businessman complained that electronic wristwatches assembled by this plant vibrated a second faster a day. In response to this complaint, some workshop comrades absolved themselves from any blame by saying that this was caused by the poor quality of electronic watch components provided by foreign plants. But a careful analysis of the regulating mechanism in some of these watches by Guo Xinfang and other experts revealed that, poor quality notwithstanding, the problem was caused mainly by an improper connection between the battery and the quartz vibrator. He then called on assembly workers to strengthen their sense of responsibility and to try their best to overcome their shortcomings in order to make the watches keep time more accurately. According to some foreign businessmen, the electronic watches assembled by the Tianjin No 2 Wristwatch Plant are now being well received by consumers in the United States.

Guo Xinfang is not satisfied with what he has achieved. He has taken a step forward in systematically learning basic electronic theory. Because he knows wristwatch manufacturing technology relatively well, many foreign businessmen now prefer to confer with him on production and management problems. But he still needs an interpreter in communicating with them. One day, when he met with a foreign businessman to discuss the purchase of components and equipment in the absence of an interpreter, he created a lot of misunderstandings with his counterpart. This experience has reminded him of how important it is to learn foreign languages. To overcome this shortcoming, he is now persistently and conscientiously studying English over the radio.

LEADING CADRES URGED TO STEP UP STUDY

Hangzhou ZHEJIANG RIBAO in Chinese 6 Aug 80 p 3

[Article by Shi Bi [2457 4310]: "Leaders Must Study Widely"]

[Text] I have two classmates who are now the number-one leading cadres of a factory. One of them, who is in charge of production, is interested neither in reading nor in anything else. But he often becomes nervous and panicky in the face of problems. This has prompted workers to call him a cadre without stratagems and ideas at his fingertips. The other person is entirely different. A versatile, talented person, he is interested in almost everything. He is also the most frequent visitor to libraries and is so knowledgeable that workers often call him a think-tank. Apart from all these talents, he is also very good at promoting production.

These two examples tell us that every leader needs knowledge. The more one learns, the more intelligent and effective one becomes in solving problems and handling all kinds of work.

When reminded of the need to increase their knowledge, some leading cadres often contend that learning is a job that should be reserved solely for youngsters, adding: "We are too old to learn but we are proud of our long record of service, which has enabled us to acquire a lot of basic skills." They ask: "Do you think that people like us are required to learn more?" This conservative way of thinking is clearly wrong. The ancients said: "Learning bears a striking resemblance to a boat struggling upstream. It will certainly go downstream if it fails to keep moving forward." Today, as science and technology develop at an incredible pace, and the cycle of their renewal becomes shorter, the horizon of knowledge is expanding on a larger scale than ever before. It is estimated that some sciences and technologies now should be renewed once every 5 or 10 years. Unfolding before us today, are countless new sciences never heard of before. Among them are lasers, computer science, infrared technology, and genetic engineering. Under such circumstances, if we fail to keep abreast of these developments, we will certainly lag far behind others. Furthermore, the number of chemical elements has increased from 103 to 107 as a result of new discoveries. If a chemist is unaware of this change, he will also trail behind others in this field. On the other hand, we must keep ourselves well informed of progress made by other countries in scientific research. If we don't, we may start projects that will waste money and time. Professor Qian Sanqiang [6929 0005 1730] once said: "Whether a student can continue to make progress depends mainly on whether he can always learn something new on top of his basic academic achievements in school." This remark reflects that a student must study matters of interest spontaneously. Only in this way can he keep abreast of the latest developments.

Some leading cadres contend: "Bridgebuilders don't have to get involved in the construction of the highways; a professional worker is required to know his own department well, but not unrelated areas." This idea is also wrong. As everyone knows, all truths are interrelated. For example, natural science and the social sciences and their branches now grow like trees and are intertwined with one another. By means of grafting, they have reaped good fruit. A single specialty will never lead to invention. Today, all leading comrades must keep themselves widely informed about what has taken place in the world. As early as the 1950's, this awareness prompted Comrade Mao Zedong to advise leading comrades at all levels to take courses in natural science, technology, philosophy, political economy, history, law, literature, grammar, logic, and foreign languages.

Facts show that almost all persons with outstanding achievements both in ancient and modern times were scholars in many fields of endeavor. In Chinese history, Zhu Geliang [6175 5514 0081] was known as an embodiment of wisdom, which he drew from books. He was also a military expert. He once placed straw soldiers on boats so as to draw arrows from enemy positions in foggy weather and thereby help his army solve a shortage of this weapon. This fact reflected that he was a good student of meteorology. On another occasion, he resorted to a bluff in order to single-handedly turn back an advancing enemy army at a time when he could not quickly muster enough troops to defend the city in which he lived. This story tells people that he also knew psychology well. Zhu Geliang once said: "A general who knows nothing about astronomy, geography, philosophy, maps showing the deployment of troops, astrology, or war games should disqualify himself as a soldier." Zhu Geliang was talking about warfare in ancient times. Does anyone doubt that we need a wide range of knowledge in carrying out the four modernizations?

It is true that life is too short to learn everything in the world. For this reason, we must take courses with purpose in mind. In other words, we must try our best to acquire useful knowledge in a scientific way. Only in this way can we reap good fruits from learning.

FURTHER ATTENTION TO PROPOSALS FROM EXPERTS URGED

Beijing GONGREN RIBAO in Chinese 30 Jun 80 p 1

[Article by Zhou Zhen [6650 5271]: "We Must Dispense With Empty Talk in Tackling Urgent Tasks in Four Modernizations"]

[Text] At the recent Second Conference of the Scientific and Technical Societies in Beijing, many scientific and technical experts took strong exception to the bureaucratic practices on the part of those in leadership positions, pointing out that such practices were a hindrance to the free and full development of scientific and technical personnel at the present time.

When is empty talk going to stop in the face of the pressing need to implement the four modernizations? Many delegates at the conference expressed impatience over the tendency to indulge in empty talk on the part of the concerned parties without really seeking to find solutions to problems. In recent years, with respect to the pollution problem in Beijing, projects of municipal reconstruction and matters affecting the living conditions of the people, many experts have made a long list of proposals, sometimes over and over again, but these proposals have vanished without a trace. As an example, the situation regarding the supply of vegetables in Beijing has reached crisis proportions due to a sharp decline in production as a result of faulty plans regarding sowing, methods of production and the management system. Although scientific and technical personnel in the field of truck gardening have repeatedly come forward with proposals to remedy the situation, these proposals have been ignored and the problem remains unsolved. Although the planting of trees is vital for environmental protection and the health of the people, the rate of reafforestation in Beijing not only lags far behind international standards, but also falls below that of many of our provinces and cities. The Beijing Forestry Society on two occasions advised the concerned departments what measures they should take, and although Professor Fan Jizhou [5400 3444 3166], executive secretary of the Beijing Forestry Society, had personally written to the concerned authorities, nothing further has been heard. It is known that although many of the 540-odd proposals made by the Second Conference of Scientific and Technical Societies had been made, they have not been seriously studied and acted upon. An old scientist in his seventies said to a reporter, "We don't expect the authorities to know everything or to be able to find an instant solution to every problem. We only hope that they will give some consideration to our views. Our only hope is that we may be permitted to make some concrete contribution to the four modernizations in our lifetime. Many things can no longer be put off."

Another problem voiced by the delegates was that those holding responsible positions are not given any authority and that the experts have no power to make decisions. The heads of some organizations have yet to have technical cadres on their staffs. Out of 20-odd factories under the industrial bureau of a certain county, not one has put a technical cadre in a leadership position. One expert pointed out that out of the 16 people working under him, not one meant what he said. On the contrary, because scientific and technical personnel are accustomed to speaking their minds in a forthright manner, they have incurred the displeasure of the authorities who do not happen to appreciate their opinions.

When one has reached middle-age, one is likely to be faced with many difficulties. Large numbers of middle-aged scientific and technical workers, who are at the peak of their productive years, are burdened with problems as regards their remuneration and working conditions. Oftentimes, they get no recognition or acceptance for their achievements. A young scientific and technical worker, conversant in 14 foreign languages, had compiled a dictionary on physics in five languages. The 50 veteran scientists who volunteered their services in reviewing and proof-reading his work were greatly impressed with his dedication and erudition. Although this work had won their approval, it was ignored and shelved by the concerned department for 3 years.

These problems point to the fact that some of the cadres in positions of authority have yet to appreciate that the productive potential is dependent on the solution of scientific and technical problems and that they have yet to have full confidence and trust in scientific and technical personnel. On the contrary, they have served to highlight the problems existing in the system and the structure relating to cadres. Some scientists have pointed out that in order to make worthwhile proposals, one must have a scientific attitude and a certain knowledge of science, that in order to understand these proposals, one must also have a scientific attitude and a certain knowledge of science, and that it is virtually impossible for an outsider to evaluate and adopt such proposals. For this reason, measures must be taken for the development of cadres and for revising the structure of the cadre system.

At the conference, many delegates called for the development of young scientific and technical talents and the full utilization of those in the scientific and technical field. They also called for the solution of the problems in the academic field and the publication of scientific and technical works so that more young and middle-aged scientific and technical workers may have a platform to express their views and that they may be enabled to break the "barrier" that hampers their full development.

ELIMINATION OF IMPROPER PRACTICES IN RECEPTION WORK URGED

Beijing BEIJING RIBAO in Chinese 29 Jun 80 p 1

[Text] The Chinese Communist Party Commission For the Inspection of Discipline recently issued a directive calling on concerned parties to put an end to improper practices in reception work.

According to the directive, since the central government issued certain documents relating to the tightening of party discipline, members of Communist Party committees of various levels have conscientiously heeded the instructions and many cadres in leadership positions have won the praise of the masses for setting personal examples in complying with the instructions regarding reception work. However, there are still many who, on the pretext of entertaining cadres in leadership positions, touring groups, inspection teams, academic missions, comfort missions and delegates to various conferences, are not above going to inordinate lengths in wining and dining the visiting parties and in presenting them gifts at public expense to cultivate their good relations. In the name of providing security, sentry boxes have been set up and even traffic has been diverted. Many of those engaged in reception work use the pretext of entertaining visitors to seek personal favors by devious means.

The directive pointed out that such base and corrupt thoughts and practices run counter to "Certain Standards Governing Political Life within the Party" and that they did serious damage to the excellent traditions of our party, that they hurt the credibility and prestige of the party and party cadres in positions of leadership, that they spoil the good relationship between the party and the masses and that they dealt a serious setback to the positive participation on the part of the masses in the implementation of the four modernizations.

The directive called on those in leadership positions at various levels to seriously address themselves to these problems and to take what action is necessary to correct such evil practices instead of letting them continue to spread and fester.

The directive called for the following:

1. Cadres in leadership positions, especially those in senior positions, must set personal examples in strictly complying with "Certain Standards Governing Political Life within the Party" and regulations concerning the remuneration of senior cadres. Members of their party are not permitted to use their status as cadres in leadership positions to indicate to those engaged in reception work that they expect treatment over and above what they are entitled to receive. Cadres in leadership positions and members of their group must resolutely refuse to accept acts of hospitality on the part of those engaged in reception work not in keeping with stipulations issued by the Central Committee and the State Council.

2. Under no circumstances are the various regions, the various departments and the various cadres to be permitted to run up inordinate expenses under the pretext of having to entertain visiting dignitaries or to meet the needs of extraordinary circumstances. The financial and accounting departments must not approve expenses not in keeping with stipulations provided by the Central Committee and the State Council. The committees responsible for maintaining discipline at the various levels and the comptrollers in the financial departments must exercise their duty in identifying the culprits guilty of violations and to make those who permit such violations or are guilty of such violations make monetary restitution for the amounts incurred.

3. Cadres in leadership positions in the different regions and departments who are not entrusted with reception work are not to take part in welcoming or sending off visitors or to organize the masses for such activities.

4. The guest houses and hostels must accept payment from leading cadres and members of their group for their accommodation, food and transportation. Such expenses are to be the responsibility of the parties concerned. No subsidy is to be paid the visitors by those engaged in reception work.

5. No departments or individuals are permitted to dip into public funds for entertaining guests or for buying gifts. They must pay for their meals. Aside from what they receive for lodging and incidental expenses according to regulations, they are not permitted to receive subsidies from the guest houses and hostels.

6. Those who are engaged in reception work must be strictly supervised. Those responsible for security, in taking the necessary security measures, must be sensitive to the reaction of the masses. The practice of enforcing overly tight security measures must be discontinued.

7. The Communist Party discipline inspection committees at the provincial, municipal and prefectural levels must, under the leadership of the Commission For the Inspection of Discipline and in cooperation with the financial and public security departments, review the reception work in their areas in accordance with stipulations concerning the treatment of senior cadres and regulations promulgated by the Central Committee and the State Council.

ALL VESTIGES OF FEUDALISM MUST BE ELIMINATED

Hangzhou ZHEJIANG RIBAO in Chinese 1 Aug 80 p 1

[Article: "Eliminate the Pernicious Influence of Feudalism; Improve the Party's Leadership"]

[Text] On the afternoon of 31 July, Comrade Li Fengping [2621 0023 1627], secretary of the Zhejiang Provincial Party Committee, presented the second party lecture for party members in provincial-level agencies.

Almost 2,000 party members from provincial-level agencies and party member leading cadres of the provincial Standing Committee and the various provincial level commissions, offices, departments, and bureaus heard this party lecture.

The subject of Comrade Li Fengping's lecture was "Eliminate the Pernicious Influence of Feudalism; Improve the Party's Leadership." He discussed this subject in terms of three separate problems: the first is the clear recognition of the various manifestations of the pernicious influence of feudalism within the party; the second is the deep historical roots of feudal ideology in society; and the third is the leading role that Communist Party members must play in eliminating feudalistic concepts and resisting all nonproletarian ideology.

As soon as Comrade Li Fengping began, he pointed out that "Some Guiding Principles for Political Life Within the Party," which was prepared and published by the party Central Committee, and the study and discussion of the draft revision of the party constitution throughout the party are penetrated by a single basic spirit, and that is to uphold and improve the party's leadership, increase the party's combat strength, and make our party capable of undertaking the heavy responsibilities of leading the socialist modernization of a strong country. If we are to improve the party's leadership, we must not only clear away the influence of the ultraleftist line in politics, but we must also eliminate the ideological influence within the party of feudal consciousness and every kind of nonproletarian thinking.

Comrade Li Fengping said that the pernicious influence of feudalism has had a great effect in the political life, economic life, and social life of our party and nation, and is a serious obstacle to the realization of the four modernizations. Our party was born in the tempest of anti-imperialism and antifeudalism, and it was our party that led the Chinese people in personally burying the feudal system. However, the history of feudal society in China was very long and feudal-thinking is deep rooted, so eliminating the influence of feudal consciousness within our party will still be one of our combat missions for a long time. Our purpose in proposing the elimination of the pernicious influence of feudalism is to make the whole of our party even more healthy and to make the thinking and work-style of the broad party members more appropriate to the nature of a proletarian political party.

Comrade Li Fengping said that Communist Party members, and especially the leading cadres of the party, must take the lead in eliminating feudal consciousness and in consciously opposing all nonproletarian ideology, which means breaking with the bourgeois ideology and the traditional ideas of the petty bourgeoisie, as well as a complete break with traditional concepts of feudalism. In that case, if we want to eliminate feudal consciousness, where should we apply our efforts? We must develop ideological education, study history, integrate with practice, summarize experience, draw clear lines of demarcation between socialism, capitalism, and feudalism on the basis of a combination of theory and practice, raise our consciousness in the elimination of and opposition to feudal thinking and bourgeois thinking, uphold the policy of one education and two reforms, and not pursue this and that movement with great puffery, but emphasize doing, not talking. We must uphold collective leadership and oppose giving prominence to any individual; important questions must all be decided in collective discussion and not left to what one person says; and the relationship between party secretary and committee members should be between persons each having votes, and not between the leader and the led. We must fully develop democracy within the party and people's democracy, and earnestly guarantee the democratic rights of the party members and the people. Whoever violates these rights must suffer the punishment of national law and party discipline. We must strengthen the concept of the legal system; everything that we do should be governed by laws that can be followed; and violations of law must be investigated. We must focus our strength on the four modernizations, strive to develop our economic and cultural advancement, constantly raise the level of our productive force, and create a material foundation for the annihilation of the remnants of feudalism.

CADRES MUST NOT THINK THEY HAVE LIFELONG POSITIONS

Jinan DAZHONG RIBAO in Chinese 31 Jul 80 p 3

[Article by Zhang Ruisheng [1728 3843 3932]: "Liberate Thinking; Be Able To Go Up and To Go Down"]

[Text] Abolition of the system of lifetime cadre positions that exist in reality will make our cadres feel that they are able to go up and go down, able to advance and able to get out, able to be an "official" and able to be an ordinary civilian. It expresses the law of social developmnt and the will and requirements of the four modernizations and an urgent need. We cadres must all liberate our thinking, eliminate biases, and treat this new problem with the correct attitude.

Basically, party cadres, whether their positions are high or low, are servants of the people, and all authority is given them by the people. Changes in position, either up or down, are ordinary occurrences. However, why should there be some cadres who only can move up and not down? At bottom, what is it that determines their movements and makes them forget the moral character and style that a Communist Party member ought to have, moreover making leadership positions a thing to be pursued for their advantage? This is a question about which we must clarify the rights and wrongs, come what may.

The view that "if you have authority, you have everything" and the phenomenon itself are great obstacles to cadres' being able to move up and not move down. This view and phenomenon are fallacies left over from the period of feudal privilege. In the feudal society, "When a man gets to be an official, even his pets may ascend to heaven." Thus, being an official is to have everything--to enjoy glory, splendor, wealth, and rank. This is what our Communist Party members resolutely oppose. In the Cultural Revolution, Lin Biao and the "gang of four" used this pernicious influence of feudalism to advocate "happiness for those in authority and suffering for those without authority." They induced the cadres to forget their identities as servants of the people and to become alienated from the welfare of the party and the people, to seek private advantage and seize individual power, and to use this power to seek personal advantage and practice favoritism. Under the effects of this pernicious influence, some people showed very little concern for the future of the party and the country or for the hardships of the people. They blindly desired only to move up and not down, wanted to have the first position and not that of the deputy, wanted to be in the front rank and not the last, wanted the city and not the rural areas and, in short, wanted their positions to be a little higher, their authority a little greater, their work a little lighter, their connections a little broader, and their lives a little better. These improper tendencies have undermined the fine traditions of our party and damaged the party's high prestige among the masses, creating undeserved losses to party affairs.

Related to this, the phenomenon in society of "when a person is present, so are human sensibilities, but when a person is not present, human sensibilities fly away" also is a reason for cadres' being able to go up and not go down. The force of this deep-rooted feudal practice originally exerted a very wide influence in society, and it was further aggravated by Lin Biao and the "gang of four" adding fuel to the flames. Some people regard other people according to their authority and assess them according to their influence, so that someone with neither authority nor influence need not be yielded to in any situation. It is just as the people say: If you are an official and have something to do, someone will help you, but if you are not an official and have something to do, your heart will be broken. The result is that some cadres not only can go up and not come down; furthermore, since they have failed to finish their own work, they ought to retire but do not.

The foolish idea that "to be an official until old age is a natural thing" is also a stumbling block for cadres to be able to go up and not come down. People always get old; this is a natural law that cannot be defied. When people get old they decline physically, they haven't much energy, they really cannot keep up with ordinary work, and they consciously turn over the heavy burdens to those relatively outstanding comrades who are strong and in the prime of life. This is the kind of broadmindedness that revolutionaries ought to have. However, some comrades feel that Communist Party cadres are "lifelong officials," and that as long as they don't make any errors, they can serve into old age. Comrades who think like this are fundamentally influenced by the feudal concept of "once you become an official, you can receive a lifelong salary."

Circumstances concerning the realization of the four modernizations have placed the new problem of cadres being able to go up and go down squarely before us. It requires that each of our cadres, and particularly leading cadres, conscientiously liberate thinking and eliminate old ideological frameworks. They must have the correct attitude in dealing with changes in duties. Our Communist Party members don't want to be officials; they want to make revolution. This is the aim of the party and the pledge of Communist Party members. With regard to our Communist Party members, they do not have individual authority, but only the authority to uphold truth and principles. Not considering the revolutionary situation as paramount, but only viewing "up" and "down" in terms of individual gains and losses, goes against the will of the people and the times and should not be.

If we want cadres truly to be able to go up and go down, the most important thing is to carry out education in the traditions of the party's good ideology and good workstyle, to make the cadres deal with changes in their job assignments properly and with the correct attitude. At the same time, we must also gradually improve those systems that are not compatible with the four modernizations. We must transform the cadre practice of simply depending on superiors to make appointments and establish a perfected complete system for cadre selection and system of appointments and removals. We must carry out a rational reform of the system of material remuneration of the various grades of leading cadres and draw up rules and regulations preventing and opposing special privileges. Only when the position they occupy no longer brings people any special privileges will being able to go up and go down become natural. We must place our cadres under the supervision of the party, and especially under the supervision of the masses, and transform those circumstances in which there is no discrimination between right and wrong, no clarification between rewards and punishments, and where doing well and doing poorly are both the same.

Cadres' being able to go up and go down is a new idea and is independent of the people's will. We hope that our leading cadres of various grades and comrades of the organization and personnel departments will liberate their thinking, get things started, adapt to the new situation, study the new problem, and strive to establish a new form of cadre system appropriate to the four modernizations.

FRAMED PARTY OFFICIALS IN HEBEI REHABILITATED

Beijing RENMIN RIBAO in Chinese 23 Jul 80 p 3

[Article by HEBEI RIBAO reporter Wang Yulu [3769 5940 6922] and Hebei radio station reporter Li Chunze [2621 2504 3419]: "Completely Redress All Cases of So-Called 'Usurping Power and Restoring the Old Order'"]

[Text] On 10 July, the Zunhua County Party Committee, in accordance with the decision of the Tangshan Prefecture Party Committee, called a county-wide broadcast conference to completely redress the case of the so-called [attempt] by county party committee deputy secretaries Wu Duanquan and Li Huayi and Standing Committee member Chen Shizeng [7115 1102 1073] to "usurp power and restore the old order." The conference was enthusiastically endorsed by the broad masses and cadres throughout the county.

During the 10 years of turmoil, democratic life within the party in Zunhua County was seriously damaged. The principal responsible persons of the former county party committee placed themselves above the higher level party committees and instituted a "family head system" and "one person laying down the law"--a violation of party discipline and national law that created many unjust and erroneous cases. Between May 1975 and September 1977, they created the case of the [attempt by the] so-called Wu-Li-Chen clique to usurp power and restore the old order--the most serious unjust case in the county. At that time, the principal responsible person on the county party committee had said at a meeting of the Standing Committee that the leadership of the prefectural party committee had sought him out to talk with him and was preparing to assign him to work on the prefectural party committee, leaving the work of the county party committee to Comrade Wu Duanquan. When news of this got out, some of the cadres on county party committee organs commented that for this responsible person to be transferred and for Wu Duanquan to take over all the work would be a happy event for the 580,000 people of the county. When this word got around to the responsible person on the committee, he blew up and said that this was "creating public opinion for counterrevolution and seizure of power" and that "if someone puts forth counterrevolution, he must want to take charge of counterrevolution!" He immediately called an emergency meeting of the county Standing Committee and organized a special team to conduct a close investigation. During the investigation it was subjectively assumed [that what was said was true], and an exaggerated case was framed against Wu Duanquan, Li Huayi, and Chen Shizeng as "careerists," "capitalist roaders," and "bourgeois elements within the party." Personnel arrangements resulting from formal research and discussions within the organization were framed up to be "plotting to seize power and restore the old order." They transposed true and false, cooked up charges, and framed the charge that Wu Duanquan had "opposed the 'pauper' [4522 2761 1311] red flag personally set up by Chairman Mao," and had "maliciously attacked the great leader Chairman Mao." Criticism and struggle were carried out against Wu Duanquan and the other comrades throughout the county for a long time. Later, comrades Li Huayi and Chen Shizeng were each sentenced to 20 years' punishment, nominally for their crimes, and Comrade Wu Duanquan was detained under investigation for almost 2 years. They also used dictatorial tools, acted on hearsay evidence, arrested people arbitrarily, and isolated themselves and opposed the province in carrying out an investigation throughout the county of people and affairs connected with the Wu-Li-Chen case, further expanding this erroneous case. From the administrative organs to the factories, the commune held a large number of "study classes" that employed methods of "first play the tune, then collect the data," and "have the existence of something in mind, and then find a firm foothold for it," causing torment and physical deterioration by forcibly obtaining confessions and then giving them credence. More than 140 persons throughout the county were directly investigated, processed, and implicated, and of these, 4 were found guilty of crimes, 2 lost their party membership and public office and were labeled bad elements, 36 lost their party membership and public offices and were given other punishment, and 2 were driven to commit suicide. many comrades sustained unredressed political wrongs and serious physical and mental harm, with very grave results.

The broad masses and party members of Zunhua County have written many letters to the higher party organizations relating the true facts of this case. In 1978, the organizational department of the Central Committee, the Hebei Provincial Party Committee, and the Tangshan Prefectural Party Committee sent a joint workteam to reinvestigate and to submit a report of the reinvestigation on redressing the case of "usurping power and restoring the old order." Following this, although there was a certain rectification and correction for the comrades who had been oppressed and implicated, the policy was not conscientiously carried out and there was no thorough resolution of the problem. On 3 July of this year, the Tangshan Prefectural Party Committee issued a formal resolution that the case of the Wu-Li-Chen "seizure of power and restoration of the old order" would be completely redressed and the good names of the principals restored. All comrades who had been implicated in this case have uniformly received redress and the restoration of their reputations.

COUNTY IN SHAANXI STRENGTHENS COLLECTIVE LEADERSHIP

Beijing RENMIN RIBAO in Chinese 23 Jul 80 p 3

[Article: "Collective Leadership Upheld by 'Team Leaders' Not Acting as 'Family Heads'"]

[Text] According to reports in SHAANXI RIBAO, the Baihe County Party Committee in Shaanxi Province conscientiously studied the "guiding principles" in integrating with practice, reviewed and summarized the lessons of experience in upholding collective leadership, correctly dealt with the relationships of the division of work and responsibility between the collective leadership and individuals, and further strengthened the collective leadership of the party, promoting the development of various items of work.

For the past few years, the relationship between the "team leader" and committee members of this county party committee was not handled well enough, resulting in the phenomenon of "one person laying down the law" and operations "dancing to the same tune." After the breakup of the "gang of four," and especially since last year, although there had been some changes in the workstyle of the county party committee, there was no deep comprehension of the proper meaning of collective leadership. As a result, the principal leading members of the committee were afraid that others would say their methods were not democratic, so all matters, great and small, were taken to the standing committee, where everyone discussed and decided on them. Following publication of the "guiding principles" (draft), the county party committee organized "the members" to review the portion of the "guiding principles" concerned with "upholding collective leadership and opposing individual arbitrariness" and to review the lessons of experience up to that time, so that the division of work and the responsibility relationships between the collective leadership and the individuals could be properly recognized and handled.

To implement correct collective leadership, the principal leading comrades of the county party committee required of themselves that they act as ordinary members, and, when discussing important questions, that they let everyone speak without inhibition and express his views, rather than act individually and arbitrarily. When differences of opinion occurred, they conscientiously listened to the opinions of all sides, and if the matter could not be resolved on the first round, they discussed it again, fully developing the wisdom and usefulness of each member. In August 1979, when the county party committee was discussing implementation of the production policy proposed by the prefectural party committee, some people suggested acting in accordance with the proposal and letting it go at that. County party committee secretary Liang Shangmou and several comrades felt that they should begin with the actual facts and propose production policies appropriate to the conditions in their own area. With two sets of opinions before him, Comrade Liang Shangmou did not use simple measures and pass his own proposal, but went separately with several Standing Committee members to look into circumstances in the rural villages, investigating things at more than 10 communes and teams and listening extensively to the ideas and demands of cadres and commune members. Thus he came to understand a large amount of data and conditions. Following three separate discussions, the Standing Committee finally formulated a policy comparatively well suited to the actual conditions in their county.

In strengthening collective leadership, the "members" of the county party committee did so by taking care that the "team leader" not become a "family head" and that the committee members not act as his foil, and by requiring that each leading member, in the course of dividing work and responsibility, divide the work not by dividing the family but by preserving mutual support and making mutual allowances.

VOCATIONAL TRAINING OPPORTUNITIES FOR CADRES EXPANDED

Beijing RENMIN RIBAO in Chinese 23 Jul 80 p 3

[Article: "Hubei Province Adopts Many Ways To Train On-the-Job Cadre"]

[Text] Reporter Shi Delian [4258 1795 6647] and news researcher Xing Pingan [6741 1627 1344] report: All levels of party and government departments in Hubei Province have adopted many ways to train on-the-job cadres and are striving to establish a corps of cadres with professional knowledge for the four modernizations.

The first thing was for Hubei Province to pay attention to developing the usefulness of the vocational schools. At present there are 7 higher level schools and colleges and 17 secondary vocational schools that have cadre training classes associated with them. These training classes are not uniform but start from the actual circumstances at each school. If the school has potential qualified teachers and potential space, an on-campus class is established; if there are potential qualified teachers but a shortage of space, a day-student class is established; if there is potential space but a shortage of qualified teachers, the department concerned will assign someone to teach and will operate the class jointly with the school. Through training classes for on-the-job cadres and correspondence instruction, etc., the finance and economics and the politics and law departments of the Hubei College of Finance and Economics has already trained more than 22,000 on-the-job cadres. Beginning the second half of last year, the Huazhong [Central China] Agricultural College has held training classes attended by agricultural leading cadres of county level or above, with rich and vivid content and the integration of theory with practice. The length of the class term is more than 4 months. Students declared that studying truth is very "thirst-quenching" and has caused them to understand problems that were confusing to them before.

Hubei Province has also paid particular attention to encouraging the activism of various systems and units operating their own cadre training classes. On the basis of their own actual circumstances, the main Wugang Machinery Plant operated secondary vocational classes, college professional classes, television university classes, and foreign-language classes that were participated in by almost 2,000 persons who were given time off or partial time off. They referred to teaching materials from colleges and professional schools and combined them with actual operations of the plant to write teaching materials for the on-the-job cadres, going easily from basic to advanced. The grades of those participating in the training was entered into their records as one basis for determining technical job titles and promotion recommendations.

One characteristic of Hubei Province's training of on-the-job cadres was to follow "study what you are working at and supplement what you are lacking," and the avoidance of "cooking everything in one pot" and "irrigation to flooding and overflowing." The training classes operated by the vocational schools and by the various units themselves all paid attention to teaching the materials and combining the study contents with the students' jobs, with an eye to their application. Last year the Second Automobile Manufacturing Plant set up universal training for leading cadres of scientist grade or above, stressing the study of professional knowledge and enterprise management for automobile plants. With a view to product quality, they also held a class in quality management. That plant completed its year's production tasks 98 days ahead of schedule and turned over more than 46 million yuan in profit. There was a close relationship between this achievement and training cadres and raising the level of management.

NEED FOR FOUR MODERNIZATIONS STRESSED

Nanjing QUNZHONG LUNCONG [MASS FORUM] in Chinese No 1, Jan 80 pp 1-8

[Article by Gong Shiqi [7895 1102 0368]: "On the Need for the Party to Shift the Focus of Its Work"]

[Text] At the Third Plenum of the 11th Party Central Committee, it was decided that the focus of the entire party's work be shifted to socialist modernization. This decision was made according to the objective demand of our historical advance and the urgent desire of the people throughout the country so as to continue the unfinished task of Comrades Mao Zedong, Zhou Enlai, and the other proletarian revolutionaries of the older generation at their behest. It has won the wholehearted support of the whole party and the people of various nationalities throughout the country and strengthened their determination, confidence and militant will in carrying out this task. In his "Report on the Work of the Government" delivered at the Second Session of the Fifth National People's Congress," Comrade Hua Guofeng further expounded the necessity of the shift of the party's work and indicated that conditions in our country were ripe for this task. We firmly believe that under the leadership of the Party Central Committee, we can basically end our country's present poverty and backwardness and build China into a powerful and modernized socialist country.

With political power in the hands of the proletariat and the task of suppressing the resistance of the exploiting elements virtually completed, the party must shift the focus of its work to socialist economic construction. In theory, this task was systematically elaborated by Lenin long ago.

Beginning with the change of the basic task of the proletarian revolution, Lenin described the necessity of the shift of the party's work in his article "The Immediate Task of the Soviet Government." He pointed out three basic tasks for the proletarian party: To convince the broad masses of the correctness of the program and policies of the communist party; to seize political power and to suppress the resistance of the exploiting classes; and, after seizing political power, to concentrate all forces on socialist economic construction. The ultimate purpose of the first two basic tasks for the proletarian party, as cited by Lenin, was to liberate the productive forces, raise labor productivity, and gradually improve the people's material and cultural life in the course of building socialism. Socialist economy cannot be produced in a capitalist society. Therefore, the proletariat must first seize the political power before it can talk about building socialism. The seizure of political power itself is not the end, but rather the means for building socialism and communism.

Then after the socialist October Revolution and the suppression of the resistance of the exploiting classes, what were the new conditions and new problems in Russian history on the basis of which Lenin set these new historial tasks?

First, there was a fundamental change in the position of the Russian proletariat. After the October Revolution, the proletariat became the leading force in the country and the enterprises were owned by the whole people as masters of the state. The proletariat is not only the most progressive, most resolute and most thoroughgoing revolutionary force, but also the main force in building socialism. It must shoulder the responsibility of leading and organizing the workers in not only new social construction, but also in building socialism along with the transformation of the old society. Otherwise, it could not fulfill its historical mission of defeating the bourgeoisie, building a worldwide socialist society and ultimately emancipating itself. Therefore, it would be in the best interest of the proletariat to carry out socialist economic construction.

Secondly, according to the law of correspondence of the relations of production to the productive forces, the proletariat holding political power had changed the old relations of production, emancipated the productive forces and was in a better position to develop productive forces. At the same time, after the establishment of a state under the dictatorship of the proletariat and the socialist economic system, particularly in an economically backward country, there was an imperative need to build a strong material foundation. As Lenin pointed out, it would be basically impossible to speak of socialism without a rapidly developing, large-scale industry. This statement is all the more true for a country where small peasants predominated. For Russia in those days, it was absolutely necessary to strengthen the economic relationship between industry and agriculture; to defeat the spontaneous forces of the petty bourgeoisie; to consolidate the dictatorship of the proletariat; to bring about an economic recovery after the severe havocs wrought by the civil and foreign wars; to end the extreme suffering of the broad masses of workers and peasants; and to be prepared for foreign invasion at all times.

Thirdly, there were important changes in the class relations and the principal contradictions in Russia. Lenin pointed out the existence of three class forces: The first was the proletariat which then held political power. The second was the peasants. The work-peasant alliance was then the foundation of the Soviet political power. However, in view of the serious damage to the national economy after overthrowing the landlord class, the petty bourgeoisie with its spontaneous forces became stronger. The third force was the landlord and capitalist classes. Politically, their dominating positions had been smashed, and economically, their possessions had been thoroughly expropriated. According to the figures announced by Lenin in 1921, 15-2 million landlords and capitalists had been exiled. Although they were virtually exterminated in the country, they had become an outwardly invisible force. Based on these three conditions, Lenin held that the petty bourgeoisie with its spontaneous force was the principal enemy to socialism at that time. The state could certainly be able to deal with the spontaneous capitalist forces of petty peasantry--manifested in profiteering and so forth--in various ways. As for the peasantry, particularly the peasants, however, neither exproporation, exile nor suppression was possible. The only way was to carry out socialist remolding on them. To do this, however, there should be a certain material foundation. Lenin said: "It will take generations to remold the small farmer, and recast his mentality and habits. The only way to solve this problem of the small farmer--to improve, so to speak, his mentality--is through the material basis, technical equipment, the extensive use of tractors and other farm machinery and electrification on a mass scale. This would remake the small farmer fundamentally and with tremendous speed."[1]

The struggle between the proletariat and the spontaneous tendency of the petty bourgeoisie was still essentially a struggle between the proletariat and socialism on the one hand and the bourgeoisie and capitalism on the other, because it was also a struggle to eradicate capitalism and the conditions for the birth of capitalism and the bourgeoisie. Therefore, before the completion of socialist remolding of the petty peasantry economy, the struggle between the two classes and the two roads was still the principal contradiction in the society. However, class struggle at that time had already developed to a new stage and the form of struggle had changed, because, instead of landlords and capitalists, the petty bourgeoisie with its spontaneous force was the enemy directly confronting the proletariat. The task of class struggle had been completed in many respects, and this makes it not only possible, but also necessary, for the focus of party work to be shifted to ecnommic construction. As Lenin pointed out, after breaking the resistance of the capitalists, destroying all that needed to be destroyed and reducing to ruins what should be reduced to ruins, the foundation has been laid for the important task of building socialism.

Lenin's thesis on shifting the focus of party work onto economic construction after the proletariat's seizure of political power is universally applicable, although this shift may required different conditions and take different forms according to the concrete circumstances of different countries under the dictatorship of the proletariat. Comrade Mao Zedong applied this universal truth in the light of China's reality and raised this question way back in the Second Plenum of the Seventh CCP Central Committee. He said: "From the very first day we take over a city, we should direct our attention to restoring and developing its production," and let the other work in the cities "revolve around and serve the central task, production and construction." In 1952, when the party put forward the General Line for the Transition Period, he again pointed out that it was a general line with industrialization as the main body and the socialist transformation of agriculture handicraft and capitalist industry and commerce as the wings. In 1954, Comrade Zhou Enlai said in his "Report on the work of the Government": "The work of economic construction has already occupied the foremost position in the entire national life." At that time, the contradiction between the proletariat and the bourgeoisis was the principal contradiction. The main purpose of the party's General Line for the Transitional Period was to change the system of ownership of the means of production and the various relations of production based on the system of private ownership. However, the class relations in our country were different from those in Russia. We had already overthrown the main component of the bourgeoisie, being comparatively weak, was powerless to resist the general trend, particularly because of the correct policies we adopted in dealing with it. Therefore, the transformation of capitalist industry and commercial was carried out fairly smoothly. Our party had a firm foundation for its work in the countryside. Our land reform was very thorough, and the political superiority of the poor and lower-middle peasants and been established in the countryside. Since the land reform, the petty bourgeoisie, despite its spontaneous forces, has never been the proletariat's arch enemy. It was thus possible for us to carry out large-scale socialist construction while conducting a large-scale socialist transformation of the system of ownership of the means of production and a socialist revolution on the ideological and political fronts. At that time, our party adopted the policy of simultaneous revolution and construction along with simultaneous industrialization and socialist transformation of agriculture, handicraft and capitalist industry and commerce. Comrade Mao Zedong pointed out: "We must on no account regard industry and agriculture, socialist industrialization and the socialist transformation of agriculture as disconnected or isolated things, and on no account must we emphasize the one and play down the other."[2] "The social and economic features of China will not be completely changed until the socialist transformation of the social and economic system is completely accomplished and, in the technical field, machinery is used in all possible branches and places."[3] By 1956, the socialist transformation of the means of production had been basically completed, and only remnants of the bourgeoisie existed. Although class struggle had not ended, the principal contradiction in our society was undergoing a fundamental change. This change was expounded in our Eighth National Congress of the CCP which advocated a shift in the focus of the whole party's work in order to "change our backward agricultural country into an advanced industrial country." In 1957, in his article "On the Correct Handling of Contradictions Among the People," Comrade Mao Zedong pointed out that the large-scale, turbulent class struggle of the masses characteristic of times of revolution had in the main come to an end, and that our basic tasks had changed from the unfettering of productive forces to protecting them in the context of the new relations of production in order to carry on the battle with nature. In 1958, Comrade Mao Zedong again unequivocally advocated the shift of the focus of party work onto technical revolution. Later on, according to the directions of the Party Central Committee, Comrade Zhou Enlai put forward the lofty goal of accomplishing the four modernizations within this century at the Third and the Fourth NPC. It is obvious that the historical mission of accomplishing the four modernizations was based on the change of the principal contradiction in our society.

In the first part of his "Report on the Work of the Government," Comrade Hua Guofeng succinctly described the present situation of classes and class struggle in our country, which is of great significance in both theory and practice. The Report pointed out that since the exploiting classes in our country have been eliminated, our society is now composed of socialist workers, peasants and intellectuals, although class struggle has not yet ended, in view of the two different types of contradictions which still exist. In theory, it showed that there cannot be any more large-scale, turbulent class struggle in our country. The people are hoping that the political stability and unity can be permanently preserved and that the socialist democracy and the socialist legal system can be quickly developed and implemented. Neither the expansion of class struggle nor the lack of vigilance against trouble conforms with objective reality and both are wrong. It was precisely on the basis of this analysis that the Report further demonstrated the principal contradiction in our present society and the necessity as well as possibility for the shift of the focus of the party's work.

In my personal opinion, Comrade Hua Guofeng's analysis of the present principal contradiction in our country indicates the following: First, after the basic resolution of our contradiction with the exploiting classes, the principal contradiction in the socialist society is no longer class contradiction or class struggle. Secondly, the development of social productive forces is on the one hand brought about by the innate contradictions of the productive forces, such as the continued scientific and technological development and the continued replacement of old technology by new technology, and, on the other hand, promoted by the change of the relations of production and the superstructure which do not correspond with the productive forces. At present, the main aspects of the principal contradiction in our society is to raise our backward productive forces up to a modern level in order to accomplish the four modernizations. Thirdly, the objective demand of the basic socialist economic law is to satisfy the constantly increasing material and cultural needs of the society. To satisfy the social needs, it is necessary to maintain the growth and improvement of production on the basis of an advanced technology. The people want to promote the development of productive forces and to strengthen the motive force in the change of contradictions between the productive forces and the relations of production and between the economic base and the superstructure. Therefore, to sum up, the principal social contradiction at present is the contradiction between the people's material and cultural needs and the backwardness of the productive forces.

The principal social contradiction at a certain historical stage is the main basis for our party to determine its historical mission. Our most basic historical mission at present is to accomplish the four modernizations.

In the above, we have studied the necessity for the shift of the focus of the party's work from a theoretical point of view. Now let us study this necessity from the practical point of view based on our socialist revolution and construction. In the 27 years from the founding of New China to the downfall of the "gang of four," we have on the whole achieved great success in our socialist construction, although we have also suffered severe setbacks as a result of taking the wrong path. Specifically, our economic development has gone through three different stages: First, in the first 8 years following the founding of New China and in the 3 years after 1962, the development was fairly rapid. Secondly, in the 3 difficult years after 1958, our national economy experienced a serious upheaval. Thirdly, from 1966 to the smashing of the "gang of four," our socialist economy suffered serious disruptions and was brought to the brink of collapse.

What do these three stages show? First, after the proletariat came to power, particularly after the basic completion of the socialist transformation of the system of the ownership of the means of production, the focus of party work should have been shifted onto socialist construction, as long as there was no foreign invasion. During the first five-year plan, despite the movement to transform the system of ownership and other political and ideological movements on a large scale, our production developed rapidly along with the improvement of the people's living conditions, because we adopted the correct policies and paid close attention to economic construction. If the party still failed to shift the focus of its work, and this was exactly what happened because of the disruption by Lin Biao and the "gang of four," our national economy would suffer severely. Secondly, for the focus of the party's work to be shifted onto economic construction, we should observe the socialist economic laws. Although the focus of the party's work did not deviate from economic construction during the second five-year plan, we failed to follow the objective economic laws and the shift of the focus of work was not really accomplished.

Judging from our past experiences, we can see that our failure to shift the focus of work and to promote our national economy had something to do with the following theoretical problems, which we had not been able to clarify for a long time, and which became even more confusing during the rampage of Lin Biao and the "gang of four."

First, we must proceed from reality, acuurately appraise the situation of class struggle and correctly and objectively handle the principal contradiction in different historical periods before the shift of our work focus can be smoothly accomplished. When the socialist transformation of the system of private ownership of the means of production had been basically completed and only remnants of the bourgeoisie existed after 1956, we still laid increasing stress on class struggle, which continued to assume serious dimensions. For many years, one political movement followed another with increasing violence. Because of the ultra-leftist line pushed by Lin Biao and the "gang of four," a large number of party and state leading cadres were struck down, and the broad masses of revolutionary cadres and people suffered untold misery. In the "all-out civil war," the party became estranged from the masses and suffered unprecedented outrage.

Why was class struggle so unrealistically stressed? The opinions of some of our comrades were as follows:

1. The theory that the basic contradiction in a class society is directly manifested as class struggle was mechanically applied to a socialist society. Although classes and clsas struggle exist in a certain stage of historical development, a socialist society is no longer a class society. However, we did not modify our theory in the light of objective reality, and still held that the basic contradiction in a socialist society was as a rule manifested as class struggle and that class struggle was the principal contradiction in a socialist society. In this respect, that notorious "advisor" played a most diabolic role. He openly declared that the socialist society, in its independent social form, was a class society in which classes, class struggle and class contradictions permanently exist. This is a reactionary "socialist theory," because, in fact, no exploiting class can exist in a socialist society. As Lenin pointed out, socialism means the abolition of classes, or the abolition of not only the exploiting classes but also the class difference between workers and peasants, so that all people should become workers. If anyone thinks that exploiting classes have all along existed in a socialist society, then it would be impossible to build socialism. In an effort to look for exploiting classes when these classes had already been basically eliminated, this "advisor" again advanced the fallacy that people's class status should be classified according to their political and ideological mentality. Marxism teaches us that the basic indication of class difference is the people's position in social production or their relations to the means of production. Class classification in isolation from the social relations of production is obviously a violation of Marxism. This was only a tactic for persecuting the broad masses of revolutionary comrades and to slap on them "bourgeois" labels. Comrade Mao Zedong said: "With the overthrow of the landlord class and the bureaucratic-capitalist class, the contradiction between the working class and the national bourgeoisie has become the principal contradiciton in China."[4] This statement was made in 1952 when the socialist transformation of the system of ownership of the means of production had not yet been carried out. After 1956, however, when the objective conditions had already changed, this theory, formerly correct, was replaced by a new theory, and we should not stick to an outdated theory. According to the objective laws of class struggle in a socialist society, the exploiting classes have been gradually eliminated in our country. Our first step was to remove the landlord class and the bureaucratic-capitalist class from their dominating political and economic positions, confiscate their landlords' land, and expropriate or nationalize the means of

production and other properties of the bureaucratic capitalist class. Our second step was the socialist transformation of agriculture, handicraft and national capitalist industry and commerce with a view to gradually reducing the difference between workers and peasants and eliminating the conditions for the birth of capitalism and new exploitation. Our third step was to basically abolish the class difference between workers and peasants, to gradually eliminate the remnant and the new exploiters. From this, we can see that when the socialist transformation of the system of the ownership of the means of production has been basically completed, the system of private ownership is replaced by that of socialist public ownership; the exploiting classes are abolished; and the bourgeoisie is also basically eliminated. Therefore, class contradiction has been relegated from the primary to the secondary position in our social life.

2. In his article "On Correctly Handling Contradictions Among the People," Comrade Mao Zedong made an important contribution to Marxism with his theory on the basic contradiction in a socialist society. However, we were not quite clear about the correspondence as well as the contradiction between the productive forces and the economic base on the one hand and the relations of production and the superstructure on the other. We usually described correspondence in absolute terms and set correspondence and contradiction against each other in the belief that where there is correspondence , there can be no contradiction, and vice versa. On the one hand, we refused to believe that there can be contradictions in the correspondence between the productive forces and the relations of production and between the economic base and the superstructure, and to accept the theory that there is always some contradiction in the course of all developments. On the other hand, whenever we discovered certain contradiction between the relations of production and the productive forces, we thought that the relations of production were inconsistent with the productive forces, and then changed the relations of production. For example, we have twice abolished the piecework system and many times abolished private lots, family sideline occupation and country fairs. We seemed to feel that our action in changing the relations of production was fully justified and cited several instances to support the charged that the former relations of production had obstructed the development of productive forces. Yet, these repeated abolitions have been futile. It shows that our relations of production have been basically consistent with out actual level of productive forces. Yet whenever we made unnecessary changes to certain aspects of the socialist relations of production, we based our action of the same viewpoint as we did during the land reform and the transformation of capitalist industry and commerce--the viewpoint that the change of the relations of production would as a rule encounter the obstruction and sabotage by decadent classes and that therefore, class struggle was necessary. This viewpoint is basically untenable. Under the socialist system, the working people constitute the main productive forces as well as the main component of the socialist relations of production, and there are no representatives of the decadent class forces of the old relations

of production, there may be contradictions between the advanced and the backward among the people, as well as conflicts of interests among the state, the collectives and the individuals. However, these are contradictions among the people, and most of them are attributed to the problem of understanding. The interests of the state, the collectives and the individuals are basically identical; therefore, problems of this type can be properly adjusted and solved. In handling these problems, we should not mainly resort to the method of class struggle. The viewpoint behind these methods was probably used as a pretext to suppress democracy so that anyone disagreeing with the arbitrary change of the relations of production could be repudiated as representatives of the decadent classes. This is a very dangerous viewpoint.

3. The law that the relations of production must correspond with the nature of the productive forces is applicable to all forms of society. Under the socialist system, when the contradiction between the productive forces and the relations of production becomes acute, the relations of production have already obstructed the development of the productives and must have to be changed. However, when the contradiction between the productive forces and the relations of production is in a state of relative rest, the latter, on the whole, still corresponds to the former and can help in the former's development, despite certain unfavorable effects. In this case, the relations of production should not be changed. Failure to observe this principal will handicap the development of productive forces and violate the law that the relations of production must correspond with the nature of productive forces. In fact, this failure means a rejection of the decisive role of productive forces on the relations of production. For a long time, the problem with us was that we neither devoted efforts on the construction of the material and technological foundation, nor tried to find out to what extent had the contradiction between the relations of production and the productive forces developed. We invariably tried to find solutions from the relations of production and the superstructure in the belief that a change of the relations of production and the superstructure would promote the development of productive forces. We were always over-eager in carrying out a transition, a "pauper's" transition to higher stages of collectivization, which demanded that the productive forces should keep pace with the development of the relations of production. Our movement of agriculture cooperation was quite successful and was a contribution to the Marxist treasury. But were our steps too quick? The excessive speed of transformation of cooperatives from the preliminary to the advanced stage produced some side effects, such as the death of some farm animals. From 1956, when the cooperatives of the higher stage were formed, to 1958, no experiment had been carried out according to the objective requirements of the developing productive forces before people's communes were set up throughout the country. Such a high speed of development had its obvious problems. In 1958, there was the "communist wind" and the "pauper's" transition, mainly intended for the abolition of the system of collective ownership as soon as possible. The system of collective ownership is a socialist economy and has strong vitality under the present conditions

in our country. Development of the urban and rural economy was of great significance in developing our industrial and agricultural production, in satisfying the requirements of people's daily life and in providing job opportunities. The two different forms of public ownership should coexist for a long time to come, and the way for the transition of the system of collective ownership to the system of ownership by the whole people should be based on practical experiences. We must not act rashly in this matter.

In my personal opinion, our failure to clarify this theoretical issue has been one of the important causes of the frequent political movements and changes of the relations of production, and the constant attack on "rightism" instead of "leftism" in all political movements. In the absence of socialist democracy and a legal system, political movements were frequently used as a means of settling intra-party differences and paving the way for economic changes. This certainly has an adverse effect on political stability and unity. The struggle against the so-called "rightist opportunism" in 1959 was obviously an instance of such political movement. During the rampage of Lin Biao and the "gang of four," when all sorts of fallacy about class struggle were in circulation, there was even no stability and unity or the shift of the focus of the party's work to speak of. It must be pointed out that what I have mentioned here is by no means a general appraisal of the changes of the economic system and of the many political movements since 1957. These experiences should be carefully reviewed on the basis of information in minute details. What I intend to say is only that there have actually been problems in this respect which should be taken as a warning.

Secondly, under the socialist system, there should be a combination of the respect for the objective economic laws and the development of people's subjective initiative. This is the objective demand in the development of socialist economy. For a long time, however, we usually overlooked the objective economic laws and over-emphasized people's subjective initiative. In 1958, for example, some people said" "The earth will yield good harvests provided people have great courage" and "as long as we can think of something, we don't have to worry about doing it." This is a sign of subjective idealism. Under the socialist system, people have for the first time a full opportunity to understand economic laws, and to meet the objective requirements of socialist economic laws through such conscious activities as economic planning. But we must never have the mistaken idea that with our strong political power and a socialist economy in addition to our indomitable spirit, we can act as we please regardless of the objective laws. Authority and courage are ineffective in dealing with objective laws. We must honestly proceed from reality and act according to objective laws so that our subjective understanding will conform to the objective laws. Only thus can we attain the expected result in our work.

Thirdly, the correct handling of the relationships between politics and economics and between revolution and construction is an indispensable condition for insuring stability and unity and for shifting the focus of party work onto economic construction. During the first five-year plan, we handled this problem fairly well. But we failed to follow up and the many fallacies created by Lin Biao and the "gang of four" further confused the people's minds.

1. They reversed the relationship between politics and economics and refused to recognize economics as the foundation of politics and the primary source of all things. Babbling that politics determines economics, they spread the "theory that superstructure decides everything."

2. They refused to admit that proletarian political movements are only the means to attain economic benefits, and claimed that political movement itself was an end because it meant the seizure of political power. (For the present, we will not touch on their reactionary goal of seizing power from the proletariat.) They vigorously criticized the so-called "theory of the unique importance of productive forces" and tried to separate proletarian politics from the current socialist economic construction and from the economic interests of the broad masses of people. Such action was also extremely reactionary. Marx pointed out: "The economic emancipation of the working class is the great goal to which all political movement should serve as a subservient tool." Before the proletariat won political power, the purpose of proletarian political movements was to liberate itself from its subservient position; after seizing political power and the basic transformation of the private ownership of the means of production, the main purpose of proletarian politics is to serve socialist construction.

3. They regarded politics as class struggle and persistently stressed the politics of class struggle, while basically negating the politics of economy. Marxism taught us that when the proletariat had come to power, and the party had shifted the focus of its work, the meaning of politics as a concept changed. Speaking of this concept when the Civil War was about to end in 1920, Lenin pointed out that there were two aspects to the political struggle: On the one hand, it was for "foiling the repeated attempts of the whole bourgeoisie to crush the Soviet state," and, on the other hand, "for the politics of state organization" and "economic policy." He further pointed out: "Our main policy must now be to develop the state economically, so as to gather in more pools of grain and mine more pools of coal, to decide how best to utilize these pools of grain and coal and preclude starvation--that is our policy." At that time, it was not enough and may even be wrong to interpret politics as only class struggle. At that time, many people in the Russian Communist Party had been for a long time in the habit of interpreting politics in terms of class struggle, and did not understand that restoring and developing economy were also politics. Lenin sharply pointed out to them: "How is politics to be understood? If politics is understood in the old sense, one may fall into a grave and profound error."

4. They distorted the theory that, compared with economics, politics should occupy the first place and insisted that the party should focus its

work on class struggle all the time. When the exploiting classes had already been basically eliminated, it was quite obvious that the party should not focus its work on class struggle. There should be a united and complete interpretation of the primacy of politics and the shift of the focus of work onto economic construction. After the shift of the focus of the party's work, the theory of the primacy of politics should still be valid. Our striving for the four modernizations now is still consistent with the theory of the primacy of politics, because the most fundamental and most long-lasting benefits for our people lie in the complete elimination of exploitation and of all class differences, the final triumph over the bourgeoisie and the establishment of the indispensable material basis. Therefore, the accomplishment of the four modernizations is the biggest politics now and will remain so for a fairly long historical period hereafter. Thus the so-called primacy of politics should mean, first, that politics should serve economics; second, that in economic construction, we should look at problems from the standpoint of politics in order to insure that economic construction has a socialist orientation. Precisely as Comrade Deng Xiaoping pointed out, we should firmly uphold the socialist road, the proletarian dictatorship the party's leadership and Marxism-Leninism-Mao Zedong Thought in striving for the four modernizations.

After all, the relationship between politics and economics is one of the unity of opposities. This unity is manifested in three different respects: First, a direct unity. Under certain conditions, politics means economics and economics means politics. Our four modernizations are the biggest politics at present. Second, the unity of means and end; and finally, the mutual infiltration and mutual transformation of politics and economics. Under certain conditions, the economic aspect of politics can and must become the main aspect of politics. However, it must be noted that when we talk about the unity of politics and economics, we do not mean that politics and economics are one and the same, and that they can be equated with each other. When we say that accomplishment of the four modernizations is the biggest politics and the most fundamental revolutionary task, we cannot ignore or overlook the aspect of class struggle in politics or the need for political and ideological work in economic construction simply on this account.

Fourthly, in order that the focus of party work can actually shift onto economic construction, we should, besides clarifying the several theoretical problems about class struggle as mentioned above, first of all follow the basic socialist economic law, develop the national economy in a planned and proportionate way, and so forth, in carrying out socialist economic construction. For example, to attain a high speed in economic construction, we should first cater to the people's material and cultural needs, and then carry out economic construction in a planned and proportionate way. This is a truth we have learned at great expense in 1958. At that time, we were striving for high speed and raised the slogans of "taking steel as the key link" in order to double steel output, and "letting one horse take the lead so that 10,000 horses will follow in full gallop" without the slightest regard for people's needs or for agriculture as the foundation. The target for steel production exceeded the comprehensive production capacity, and this naturally led to a serious imbalance among all sectors of the national economy. At that time, we did not pay much attention to proportionate planning and had the mistaken notion that balance was only relative while imbalance was absolute. Originally, developments are always not balanced, but the relative balance of things is also the basic condition of their development. Engels pointed out: "The possibility of a body being at relative rest and the possibility of temporary states of equilibrium are the essential conditions for the differentiation of matter and hence for life."[8] The development of national economy is unbalanced; however provided the proportionate relationships among various sectors of the national economy or a relative balance is preserved, development will be possible. This is the objective requirement for economic development. The task of national economic planning is to attain an overall balance and to solve the problems of imbalance in the course of economic development. There are now serious dislocations in our plans; this is entirely contrary to the objective laws of proportionate planning, and can cause great damage to our national economy because of the imbalance among various sectors.

It is now necessary for our party to shift the focus of its work as proved in both theory and practice. The Party Central Committee has decided to devote 3 years time to the readjustment of the entire national economy, and adopted the policy of readjustnent, restructuring, consolidation and improvement in order that there can be a sustained high speed for the development of our national economy and thus an acceleration of the four modernizations. All conditions in our country are favorable for the implementation of this policy. In order that our national economy can be improved, we must strive for the four modernizations with renewed spirit, with concentrated energy, and with one heart and one mind. Our immediate task is to firmly implement the eight-character policy formulated by the Party Central Committee and to fight this battle well.

HARD STUDY PAYS OFF FOR SAM BATTALION COMMANDER

Beijing BEIJING RIBAO in Chinese 1 Aug 80 p 1

[Article by Liu Feng [0491 1496], Xiao Shan [5135 1472], and Cai Shanwu [5591 0810 2976]: "How Did He Become an Expert?"]

[Text] Recently, in the suburbs of the capital we visited Comrade Yan Shizhong [7346 0013 1813], commander of a certain air force surface-to-air guided missile "heroic battalion." This man, praised by the cadres and soldiers as an "expert guided missile battalion commander," said modestly: "What I have done is still far from meeting the requirements of the party and the people. Henceforth, only by studying even harder will I be able to do my job well."

Yan Shizhong had just finished the second year of upper middle school when he came to this surface-to-air guided missile unit in April 1968. This is an heroic unit that grew to maturity under the loving care of Chairman Mao, Premier Zhou, and Commission Chairman Zhu. The battalion he was in had, while engaged in antiaircraft battles in both the north and south of our territory, performed the military exploit of shooting down five enemy high-altitude reconnaissance aircraft of various types, thus defending the sacred airspace of our great motherland. In 1964, the Ministry of National Defense bestowed upon it the honored title of "heroic battalion." Yan was determined to carry on the glorious tradition of this unit, mastering modern military techniques and becoming a qualified soldier.

A surface-to-air guided missile is a modern weapon with complicated technology, and it is required of those personnel who engage in this technological work that they possess a high educational level. After starting work he felt that his scientific education and knowledge was too deficient. He did not believe what was advocated by Lin Biao, viz, "by giving prominence to politics everything else will be sorted out." Borrowing books on radio and electrical engineering from a veteran technician, he tenaciously attacked them. He finally mastered the technology of testing and repairing radio instruments and became a radio repair technician.

In February 1976, the unit's party committee sent Yan to a certain military technical school for study. At that time the "gang of four" was indulging in unbridled propaganda for "blank examination paper heroes." Some of his fellow students were infected by the virus of the "theory that knowledge is useless," and as a result were slack in their studies. Yan thought to himself: "Without knowledge how can a complicated guided missile be launched into the sky to knock down an elusive enemy aircraft?" He fully valued this opportunity to study, and not only completed the courses prescribed by the school, but also, under the guidance of a teacher, studied on his own higher mathematics, basic radio, pulse techniques, and other higher level courses, taking more than 700,000 Chinese characters of study notes. In his graduation examinations, he was among the best of the successful candidates and achieved excellent results.

In April 1978, the party committee of the unit, basing itself on Yan's outstanding results in studying at that school, appointed him to be deputy commander of the 1st Company in the "heroic battalion." Yan felt that he didn't understand how to operate, safeguard, and fix weapons, and that this would be a great difficulty for him in organizing company training. Therefore, he went down to the squads and platoons and attended lessons given by technicians on how to operate the weapons, seizing every opportunity to study. Not long afterward, the company commander was transferred and the higher level authorities appointed Yan to take his place. In order to become familiar as quickly as possible with the theory, operational essentials, and repair of the weapons in the company, he and the company's political instructor Yan Juqi [7051 1446 1142], did research on how to further strengthen the cadres' own studies. At Yan Shizhong's proposal, activities of mutually teaching and learning from each other were launched. Owing to Yan's assiduous study, in 1 year as company commander he mastered the principles of all the weapons and the actual operational techniques of most of the weapons in the company. During this year he and all of the cadres and soldiers of the company took part in the divisional and regimental examinations and were rated overall as outstanding. At the end of the year, the 1st Company was judged by the party committee of the division to be an advanced company in learning from the Hard-Boned 6th Company.

In October of last year, Yan was appointed commander of the "heroic battalion." He recognized that his promotion to this post certainly did not mean that his ability had been enhanced, and that only by persisting in untiring study and practice would he be able to shoulder the heavy burden of being battalion commander. In order to become familiar with every specialty of the battalion, besides using his spare time to read all sorts of weaponry teaching material, he studied in training classes. When taking part in a company's training, he carefully watched the movements of every operation, asking the comrades to explain the functions of the equipment and the essentials of its operation. He also firmly grasped the detailed rules and regulations for safeguarding guided missiles, took part in guided missile training tests and, together with the cadres and soldiers clarified the sequence and requirements of these tests. After tenacious study, Yan was fairly familiar with every specialty in the battalion and had skillfully mastered combat operations at the battalion level. Since the beginning of this year, he and the other cadres in the battalion have organized 49 combat drills of every type that were basically accurate in operation. By efficiently completing its missions, the unit has become the best trained battalion in the division.

POPULATION CONTROL VITAL TO ECONOMIC DEVELOPMENT

Chengdu SICHUAN RIBAO in Chinese 10 Jul 80 p 3

[Article by Zhou Zhenhua [0719 2182 5478]: "Population Control and the Four Modernizations"

[Text] Our country has a large population with a small amount of cultivated land. With such a poor foundation to start with, in order to being about the four modernizations we must consider population control an extremely important strategic task.

Bringing about the four modernizations means using contemporary advanced scientific technology to equip the various branches of the national economy to break free from backward economic techniques and come up to advanced world standards. A comprehensive criterion for measuring a nations economic strength and size is the per capita gross national product [GNP] and the national income: This index hinges on two factors. One is the GNP and the total amount of national income. The other is the number of people. If the GNP and the national income increase rather quickly while the population increases slowly, then the strength of the economy will increase constantly. Conversely, if the GNP and national income increase slowly while the population grows very quickly, then the strength of the national economy will correspondingly weaken.

If we look at the absolute value of our GNP and national income, then the value is not very low. However, for a population of 970 million people it is very low. For example, our gross output value for industry and agriculture in 1978 reached 569 trillion yuan. Converted into U.S. currency, this comes to $336.8 trillion, trailing only America, the Soviet Union, Japan, West Germany, and France, and occupying the number six position in the world. However, in per capita GNP, America averages $7,890; West Germany, $7,380; France, $6,550; Japan, $4,910; and England, $4,020. Our country only averages $345. Our per capita GNP is only a fraction of that of the developed nations. Therefore, we are one of the most impoverished and backward nations in the world today. Impoverished in what way? We are in one respect because our production level in industry and agriculture is so low. Another aspect is the large size of the population base and the speed with which it grows. Our country has 970 million people, accounting for a quarter of the world's population. We are the most populated country in the world. However, we have only 1.4 billion mu of cultivated land, which is only one-fourteenth of the area under cultivation throughout the world. In terms of cultivated land per capita, we have one of the smallest areas in the world. During the past 30 years our rate of population increase has been over 2 percent, for a total increase of 65 million; this averages out to over 20 million births per year. Therefore we cannot avoid running into sharp contradictions between rapid population increase and realization of the four modernizations.

Because our population rate increases so quickly, the strengthening of the economy has been seriously hindered. According to the calculations of some experts, if the population has a new increase of 1 percent, then the rate of national income should also have a corresponding decrease of 1 percent. Conversely, if the existing population rate decreases by 1 percent, then the national income rate will have approximately a 1-percent increase. What this means is that the rate of population increase and that of national income are of inverse proportion. In order to raise our per capita GNP from the present figure of over $300 to the level of $1,000 by the end of this century, we must not only work hard to develop agricultural and industrial production, but we must also work hard to control our population growth rate. According to calculations made by departments involved, if the total number of people in our country neither increases nor decreases, then our GNP will show a yearly increase of 6.8 percent, enabling us to reach a per capita figure of $1,000 by the year 2000. If every woman of childbearing age gives birth to an average of 1.5 children, then our population at the end of the century will be 1.125 billion, and we will need a yearly increase of 7.6 percent in order to achieve a per capita figure of $1,000. Or, if every woman of childbearing age gave birth to an average of 2 children, then our population by the end of this century would be 1,217 billion, and we would need an average yearly increase in GNP of 8.1 percent in order to reach a per capita figure of $1,000. Should our population continue to increase unchecked, we will find ourselves in a long-term backward and impoverished condition, with the danger that the four modernizations will fail.

Owing to the rapid increase in our population, accumulation of funds for modern capital construction and improvement of the people's lives have been hindered. According to present price calculations, a child from birth until the age of 16 will require a yearly average of 2,500 yuan just for minimum living expenses. There were 650 million people born in the past 30 years and 1.625 trillion yuan has been spent, the equivalent of one-third of the national income for this period. What this means is that an average of one-third of the national income has been consumed by the increase in the number of births. Under these conditions, how can we ever accumulate funds for use in modern construction? In addition, how can we ever accumulate a large amount of funds for use in improving the people's lives? If the population born after liberation had been just one-half of the actual total, we could have had available over 800 billion yuan. Of this sum, half could have been used for accumulation and half for consumption. Therefore, yearly funds for accumulation and consumption could have increased by over 1.3 billion yuan. Compared to the actual situation of the past, this would have been much better for development of national construction and improvement of the people's lives.

Owing to the overly rapid increase of our population, we are faced with the contradiction of having too many people with too little cultivated land. The contradiction between increasing labor productivity and bringing about the full employment of the labor force seems especially prominent. During the 1980's we will have a yearly average of over 23 million people reaching working age. Of this number, approximately 20 million workers will engage in agricultural production, sharpening the contradiction between too many people and too little land. We will also have over 3 million people seeking work in the towns and cities, and this will cause the contradiction between [efforts to] raise labor productivity and bring about full employment in the cities to become more and more intense.

It is easy to see that the number of children born and raised certainly is not merely the private business of an individual or one family. It can affect the success or failure of the four modernizations, whether or not national construction will be able to develop and whether or not we will be able to improve the lives of the people overall.

Engels said: "The determining factor in history, in the final analysis, is the scale of expansion of the production of the means of livelihood. However, production has two types. One is production of the means of livelihood: food, clothing, and housing as well as production of the necessary tools. The other type is human reproduction. ("Selected Works of Marx and Engels," Vol 4, p 2) The size and density of a population are important factors for the condition of material well-being in society. They can either speed up or delay the development of productive forces. Therefore, a definite proportionate relationship should be maintained between human reproduction and the production of material goods. Once the population situation is in harmony with the development of the national economy, then all the various aspects of social economic relations will be well coordinated. We will then be able to push forward the development of productive forces and advance the strengthening of the new social system. When the population situation and the development of the national economy are not in harmony, the development of productive forces may be slowed up or even blocked, affecting the strengthening of the new social system. The failure to balance rapidly increasing population with the realization of the four modernizations and the development of the national economy is the most serious imbalance of all. At the same time, we must not lose sight of the fact that the period for reproduction of the population is longer than that for material goods. During any period of time, a continuing rapid increase in population will seriously affect production and living, not only now but also for several generations to come. Usually, the various sections producing material goods and the serious imbalance between various industries can be initially corrected after undergoing 3 to 5 years of adjustment. However, a serious imbalance in the proportion between the production of humans and that of goods may take anywhere from 60 to 70 years, maybe even 100 years, before being rectified. We strongly advocate family planning as a means of controlling population growth in order to regulate the critical imbalance between human reproduction and the production of material goods. If we do not adjust this imbalance, then the cause of building the four modernizations will be harmed.

Recently, several scientists utilized modern cybernetic methods to predict trends in the development of our population 100 years from now. If every couple has three children, our population will reach 1.414 billion people in the year 2000 and 4.26 billion in the year 2080. If every couple has two children, our population in the year 2000 will be 1.217 billion people and 1.539 billion in 2052. The two situations described above are not suitable to the demands of the four modernizations. If, starting this year, the rate of population growth decreases year by year and we reach an average of one child per couple by 1985, and we continue to maintain this rate afterward, then our population will be 1.054 billion by 2000 and 960 million by 2028. This is an ideal plan, and it has raised new demands for the work of population control. The focus of our work must be on advocating one child per couple.

In his "Report on the Work of the Government" given at the Second Plenary Session of the Fifth National People's Congress, Comrade Hua Guofeng pointed out: "The advance toward reducing the population rate will be of great strategic significance in speeding up the realization of the four modernizations and enhancing the health and welfare of our entire people. We cannot slacken in the slightest. All quarters throughout the country must earnestly do their best in the work of ideological education, public health, and infant health care, so as to enable the masses willingly, safely, and effectively to carry out family planning." These words brilliantly clarify the dialectical relationship between population control and the four modernizations.

In short, we must place population control in an extremely important position in the construction of the four modernizations. We must maintain a firm grasp of these two types of production. One way will be to investigate roads to modernization that are suitable to conditions in our country, using any and all means to raise industrial and agricultural production. Another way will be to successfully advance the work of population growth. Only if we firmly grasp these two means and achieve practical results will we be able to put into effect a Chinese-style modernization in this century.

SHORTAGE OF BOOKS CAUSES CONCERN, HARDSHIPS

Readers' Complaints

Beijing ZHONGGUO QINGNIAN BAO in Chinese 19 Jul 80 p 1

[Article: "Youths Ask, Why Is It So Difficult to Buy Books?"]

[Text] Recently, over 200 readers have written letters to this paper appealing for a quick resolution of the problem of finding nourishment for the mind while we are on this new long march. According to the letters which we have received, there are three aspects to the present urgent need of young people for books and the inability to buy them:

There is a lack of reference books. Young people from Hunan, Sichuan, Jilin and over 10 other provinces have reported: The "Xinhua Zidian" ["Xinhua Dictionary"], the most basic of the liberal arts reference books, is a matter of being "a one-day best seller and then unavailable for a hundred days" in many small and medium-size towns and cities. It's impossible to locate even a copy of "Gu Hanyu Changyongzi Zidian" ["Ancient Chinese Dictionary of Common Characters"] or the "Shuowen Jiezi"["Dictionary of Etymology"]. [A reader from Minggang, Henan Province, wrote to us saying: The Xiandai Hanyu Cidian ["Modern Chinese Dictionary"] and other reference books are extremely scarce, and there is no way to relieve our concern over self-education.]

The supply cannot meet the demand for good works in classical and modern literature. Liu Fangning [0491 5364 1337] of the second transportation team in Fuyang, Anhui Province, said: I like literature and I plan to study liberal arts intensively during my spare time. In the study of liberal arts we rely mainly on books. However, famous literary works in Chinese and foreign languages are all grabbed up as soon as they come out. According to Li Rongtang [2621 2837 1016] of Lingbi County, Chengguan Zhen: I still have not been able to buy even one of the 25, award-winning short stories from 1978 that were published last year. I recall that Gorki once said that in seeking knowledge, one should be like a starving man pouncing upon a piece of bread. However, there are no books for us to pounce upon.

The demand for books on science and technology cannot be satisfied. Cheng Shengli [4453 516B 0448], of the Dong Mu Commune in Macheng County in Hubei Province, reported: Rural youth account for over 80 percent of the total youth of China; books issued for these youths are way too few! "Nongcun Qingnian Zixue Congshu" ["Rural Youth Self-Study Series"] cannot be bought anywhere. Some young people wanting to learn how to operate tractors are unable to purchase "Tuolaji De Weixiu Han Baoyang" ["Tractor Maintenance and Upkeep"]. Others who want to achieve higher rice and cotton output are unable to buy books dealing with cultivation techniques in these two areas. Zhang Ronghao [4545 2837 3185] of Xuyi County, Jiangsu Province, said: In order to buy books dealing with radios, I made visits to a total of 10 small and large cities and counties, and I still have not managed to buy one.

Gu Xinli [7357 2459 4539], of the People's Park in Siping Municipality, has written saying: I am a young worker who raises flowers and plants. Each time I see these exquisitely beautiful, bright-colored, fragrant flowers, my love for my work deepens and I resolve to master the necessary techniques. I urgently need books on planting and growing flowers and plants. I've been to every bookstore in the city and I have been to Changchun and Jilin, but I still have not found one book.

Several young people from outlying districts and remote mountain districts who are studying on their own have written in expressing the hope that their problem will not be overlooked in the distribution of books.

Remedial Measures

Beijing ZHONGGUO QINGNIAN BAO in Chinese 19 Jul 80 p 1

[Article: "Responsible Personnel from Bookstores and Bureau of Publications Discuss Books"]

[Text] Taking the questions raised by young people concerning the difficulty in buying books, we interviewed responsible comrades from the State Publications Administration Bureau and the Peking distributors for the Xinhua Bookstore. They explained to us the situation concerning the publishing and distribution of books:

Students and workers taking tests to gain entrance to schools and jobs, and the wide number of young people studying diligently, have revealed the contradiction concerning the inability of supplies to meet the demand for all types of books. In order to turn around the "book shortage," publishing departments have exerted a great deal of effort. In 1979, the type and number of books had doubled in comparison to 1971. However, we are still far from satisfying the sharp increase in the wide-ranging needs of the vast number of readers. In addition, the poor job done in issuing books has created a situation in which those who are in need of certain books are unable to buy them, while other books are overstocked. Also, the paper shortage has had an effect on the large amount of books being issued.

In order to alleviate this "book shortage," the Bureau of Publications has decided to give priority to the publishing of Chinese and foreign-language reference books. They have already allocated paper and organized the publishing houses concerned to make reprints in order to guarantee the availability of important books, as well as a variety of other books. They also plan to help bookstores maintain a standing supply of dictionaries. Printings of "Ci Yuan" ["Etymology"] (Vols I & II), "Xinhua Zidian" ["Xinhua Dictionary"], "Xiandai Hanyu Cidian" ["Modern Chinese Dictionary"], "Xiandai Hanyu Xiao Cidian" ["Modern Chinese Pocket Dictionary"], "Hanyu Chengyu Xiao Cidian" ["Pocket Dictionary of Chinese Idioms"], "Xin Ying-Han Cidian" ["New English-Chinese Dictionary"], and "Ri-Han Zidian" ["Japanese-Chinese Dictionary"], as well as of other books, have all been increased and will be supplied this year in succession, with a small amount coming out during the first quarter of next year. During this year Beijing and Shanghai will publish over 80 literature and art books for rural areas. Republication of Chinese and foreign literary classics, such as "Hong Lou Meng" ["Dream of the Red Chamber"], "San Gwo Yanyi" ["Romance of the Three Kingdoms"], "Xi You Ji" ["Journey to the West"], "Gangtie Shi Zenyang Lianchengde" ["How Steel Is Meshed"], "Anna Karenina," etc., is also planned.

At present, aside from committee publishing organizations under the Party Central Committee and the State Council, 13 provinces and municipalities have already established technical publishing houses. In 1979, there were 4,199 technical books published in 258.62 billion volumes. Generally speaking, the supply should not be tight. Beijing and Shanghai have "Keji Xin Shumu" ["List of New Science and Technical Books"] in tabloid form. These can be subscribed to at local post offices. They help people learn about developments in technical books and periodicals, and make it convenient to place orders.

Readers in outlying districts wishing to buy books may do so through mail order. At present, the Xinhua Bookstores in each province and municipality have established mail order departments. Several publishing houses have opened mail order businesses one after another so readers can contact bookstores and publishing units directly.

INSTITUTIONS OF HIGHER LEARNING TO FURTHER DEVELOP TALENTS

Shanghai JIEFANG RIBAO in Chinese 4 Jul 80 p 2

[Article: "Six Viewpoints on Training of Talents by Institutions of Higher Learning"]

[Text] The talents research department of the Shanghai Higher Education Research Association held a discussion on June 25 and 26 to discuss how institutions of higher learning should go about developing talents. The participants enthusiastically took the floor to express their views, many of which were most commendable. These views may be summarized in the following six points:

1. The lack of planning in the admission of students and in the assignment of jobs after their graduation has created an anomalous situation. It is the opinion of many comrades that the selection of students is similar to the selection of seeds. The quality of the seeds determines the quality of the product. The present practice of determining whether a student should or should not be admitted on the basis of the result of one examination leaves something to be desired. There is no question but that this practice has dealt a blow to middle school education in that it has failed to provide guidance and encouragement to the students in their over-all development. The proposal was made that in the selection of students, institutions of higher learning should in the future take note of their middle school records. Those in positions of responsibility in the institutions of higher learning should be allowed to go directly to the middle schools to scout and select prospective students. Middle schools, on the other hand, should be allowed to recommend the admission of highly-qualified students into the universities. It was also noted that the present standards governing the admission of students to institutions of higher learning are not really based on any admission policy and that the number of students admitted to certain courses is not based on the needs of the nation, but, rather, on the educational facilities available at the various institutions of higher learning. This practice has resulted in a surplus of certain special talents who are unable to find suitable jobs and in an inadequate number of certain special talents to meet the needs of reconstruction in the four modernizations. While suffering from a serious shortage of talents on the one hand, our nation finds itself in a situation where there is a serious waste of talents on the other. For instance, graduates in public health in medical colleges have been sent to the factories to do such janitorial work as cleaning open ditches. Graduates in medicine have been assigned to dispensaries to work as druggists. Graduates in ship designing

in engineering colleges have been assigned to do electric welding in factories. This situation has been brought about by three factors. First, there is a lack of planning in the admission of students. Secondly, those responsible for personnel management, lacking an adequate knowledge of the operations of their outfit, are incapable of assigning the right jobs to the right people and making full use of their services. Thirdly, there is no fixed rate of remuneration and university graduates are being traded without consideration of the question of compensation. Since the outfit in question is able to get hold of a university graduate without having to spend an extra cent, it is not very particular about what job to assign to him. These problems must be rectified in order to eliminate the waste of talents and to make adequate use of them.

2. The ratio of the different categories of talents is not related to actual needs. Although we need all categories of talents in our four modernization movement, we tend to over-emphasize physics and engineering at the expense of arts and agriculture. The shortage of agricultural experts is particularly acute. According to our comrades in the Shanghai Agricultural College, there were in 1979 a total of 70,000 students enrolled in agricultural and forestry colleges throughout the nation, or 6.8 percent of the total number of college students, whereas, in the United States, there were 100,000 agricultural and forestry students, not to mention the 1 million students enrolled in agricultural schools. At present, one farm worker in the United States is capable of producing enough food to feed 59 people, whereas a farm worker in our country is capable of producing enough food to feed only three people (including the farm workers themselves). The success in the agricultural sector in the United States is due to the abundance of agricultural scientists and technicians while our country, which coined the slogan "Leave agriculture to old farmers," is negligent in the development of agricultural talents. This obsolete idea must be eradicated. To solve the problem of feeding 1 billion people and to make a success of the four modernization movement, we must increase our efforts towards the development of agricultural scientists and technicians. It has been suggested by some comrades that in order to encourage students to enroll in agricultural colleges, agricultural colleges should be allowed to accept students ahead of other colleges, that those admitted should be given free board, and that the pay for graduates should be no lower than that for graduates in other special courses.

3. We must change the prevailing composition or structure of courses offered university students. Different courses should be offered students in the universities and those in trade schools. For example, trade schools should place more emphasis on application than on basic theories. At the present time, however, the teaching materials used in trade schools are basically similar to those used in the universities. Then, too, insufficient emphasis is placed in the trade schools on practical training. This system cannot but produce students who fail to come up to the level of the main course graduates of the universities and who, at the same time, lack the agility and dexterity associated with graduates of trade schools. Main course students in the universities tend to confine themselves to their special fields. Students of physics know little of art or engineering. Students of engineering know

little of art and physics. Students of art know little of physics and engineering. For this reason, they fail to meet the needs of modern scientific and technological development which calls for the synthesis and interlocking of different fields of knowledge. It was the opinion of many comrades that the main courses in the universities should reduce the number of compulsory courses and to increase the number of elective courses so that the students may acquire a wider range of knowledge. They pointed out that the purpose is not to expand the field of knowledge without rhyme or reason, but to enable the students to take, as a matter of necessity, some courses outside their main courses.

4. Attention should be paid to the development of the students' abilities. Some students do extremely well in school, chalking up top grades in every subject, but are incapable of working independently in a job after their graduation. Many comrades are agreed that rather than to develop "book worms," we should develop talents capable of doing creative work. It was pointed out that the present method of teaching in the universities is riddled with shortcomings. Some teachers are only concerned with instilling knowledge without teaching the students the method of acquiring knowledge. They tend to cram knowledge down the students' throats and to impose too tight a schedule. Sometimes, main-course students are subjected to 30-hour weeks (or 80-hour weeks including work outside the classroom), leaving the students little time to study independently or to participate in extra-curricular activities. Examinations are designed to test the ability of the students to retain what they have learned in the classroom and not their ability to apply what they have learned or to analyze and solve certain given problems. There is also too little practical work. The ratio of classroom lectures and practical work is 8 to 1 in engineering colleges (the ratio is 1 to 1 in some British universities). This system is not conducive to developing the abilities of the students and corrective steps must be taken.

5. The standard for teachers and the quality and quantity of teaching materials must be raised. The quality of teachers and teaching materials has a direct bearing on the development of talents. Many of the present crop of young and middle-aged main-course teachers have failed to measure up to the standards of older teachers. So limited is their range of knowledge that many teachers are capable of teaching only one single subject or even half a subject. We must have a plan for the development of young and middle-aged teachers by assigning them specific jobs or specific responsibilities. Those who have failed to quality should be assigned other jobs. It has been said by not a few of the comrades that teaching materials are sub-standard because they are compiled to meet an emergency situation. At the expense of not neglecting the schools concerned, all teaching materials compiled by them are put to use without discrimination. Some of these teaching materials are so out-dated that they give no indication of the latest developments and achievements in the field of science and technology. It would be futile to expect to develop talents for the 1980's by using teaching materials dating back to the 50's and 60's. It was suggested by some comrades that encouragement should be given individuals to compile textbooks so that the shortage of reference books may be alleviated. In certain subjects, use should be made of original foreign

teaching materials. The teaching manual "The Dynamics of Materials" produced by Chiaotung University in Shanghai, for instance, is based on the English original. The use of English also helps main-course students to familiarize themselves with the English language.

6. It is not necessary for the government to monopolize the education of university students. At the present time, university students are taken care of entirely by the government. They do not have to pay tuition or for room and board. Their medical expenses are taken care of and they are awarded fellowships (75 percent of the students). After graduation, the government is responsible for assigning them jobs. The advantages of this system are that large numbers of students from labor and farm families are afforded the opportunity to enter universities. However, since the liberation 30 years ago, the standard of living of the people has been substantially raised, and certain changes should be made to place the right students in the right jobs. Some students who diligently applied themselves while in middle school slack off dramatically once they have been admitted to universities because, irrespective of their scholastic standing, they are paid 48 yuan upon graduation. Some students show little self-discipline and squander the subsidy paid to them. It was suggested that the system of awarding fellowships should be adopted and that the practice of paying subsidies should be curbed. Boarders should have to pay for water and electricity while day students should be paid a transportation allowance. A tight rein should be held on expenditures. Those students who do poorly should be made to drop out. The rate of remuneration should also vary for different graduates.

It was agreed among the comrades attending the discussion that middle schools play a vital role in the development of talents. In recent years,since only some 4 percent of middle school graduates go on to the universities, we should give serious study to the development of high quality talents from this minuscule number of university students. It was unanimously agreed that the subject should be further explored. It was also suggested that a meeting should be held in September to hear research reports on the development of talents in institutions of higher learning.

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

INDEPENDENT JUDICIAL FUNCTIONS, PARTY LEADERSHIP RELATIONSHIP DISCUSSED

Beijing FAXUE YANJIU [STUDIES IN LAW] in Chinese No 2, 23 Apr 80 pp 27-28, 22

[Article by Zhang Jinqing [1728 2516 3237] and Xie Bangyu [6200 6721 1342]: "Independent Administering of Justice and the Leadership of the Communist Party"]

[Text] The principle of independent administering of justice is basically an inherent requirement for the state judical organs to perform their duty of exercising proletarian dictatorship. It is an indispensable component of the proletarian democratic system. In order to effectively suppress the enemy and protect the people, the people's court must be faithful to the law and the legal system, faithful to the people's interests, and faithful to facts. This naturally brings up a very important question, namely, how to resolutely preserve the dignity and prestige of law and how to follow law to the letter. The dignity of law demands that the judicial organs should accurately ascertain the facts of the case, correctly interpret and apply the law, and persistently raise the ideological and vocational levels of the judical workers. The prestige of law demands that the judicial organs should enjoy due independence. In other words, in exercising their judicial authority within the sphere of law, they should be free from external interference and influence, and need only follow the laws. Provided there is a unity of the dignity and the prestige of law, the people's court will be able to guard against prejudice and mistakes in court trials and be actually protected in its execution of law. We emphasize the need for independence in the administration of justice only for the sake of preserving the prestige of the legal system so that the state's judical authority will be exclusively exercised by the people's court, which, in turn, will try all cases according to law, and no other organ or individual, no matter what they may be, can have the right to illegally interfere. As proved by experiences in the past 30 years after the founding of the People's Republic, this is an important legal system for protecting socialist democracy as well as a very important measure for our party to provide leadership over judical work.

Some people have set "independent administration of justice and obedience to law alone" against party leadership, claiming that stress on independent trials means "asserting independence from the party." This view is obvious wrong. Since the people's judicial organs are formed under party leadership "independent administration of justice" is an integral judical principle which has actually been formulated under party leadership instead of being divorced from it. As a form of state judical activities, "independent administration of justice" means that the whole trial process should be conducted independently, because it is impermissible for the state's judicial authorities to be shared or in any way influenced by any other organs or individuals. In other words, no external interference or influence is permitted. "Obedience to law alone" as a prerequisite for the people's court in conducting independent trials, means that in the trial of cases, the law court must scrupulously uphold the principle of following the law and meting out punishment only according to law instead of the direction of any other organ or individual. The organic combination of "independent administration of justice" and "obedience to law alone" means that judicial organs should maintain due independence from other organs or individuals in their duty performance or other activities, and should at the same time be absolutely obedient to state laws. We consider absolute obedience to laws as a prerequisite for independent administration of justice because our laws are formulated under party leadership according to the basic state system, on the foundation of extensive democracy and through the legislative process as approved by the National People's Congress. Law embodies the will of the proletariat, represents the basic interests of all the people, and is a concentrated expression of the party's lines, principles and policies. Lenin said: "Dictatorship of the proletariat means proletarian leadership over policies."[1] Law, as the embodiment of the state's will means the finalization of party policies in the form of a set of articles. Therefore, obedience to laws means obedience to the people's will and the party's policies. Any viewpoint which does not respect law or the functions of the judicial organs are erroneous and damaging to the party's leadership and prestige.

The CCP is the core of our state leadership. As a state organ under the dictatorship of the proletariat, the people's court must be under party leadership in conducting trials independently. This should be beyond question; otherwise the people's court will not be able to perform its duty of suppressing the enemy, protecting the people, and consolidating the dictatorship of the proletariat. Practice has proved that party leadership is the basic guarantee for the efficient and independent administration of justice by the people's court as well as its freedom from illegal interference from any organ or individual. Any tendency toward the weakening of party leadership will lead to the instability or weakening of the dictatorship of the proletariat.

But how shall we uphold party leadership over judical work? It must be understood that the party committees and the judicial organs have separate duties which are not interchangeable and cannot be confused at any time. Stalin once said that the party was the core of state power, but the party and the state are not, and cannot be, the same. The party provides leadership over the state, but we can never mix the party with the state and regard the function of party leadership and the dictatorship of the proletariat as the same thing. According to the Marxist view, the function of party leadership over the state does not mean that the party can directly issue orders to the state. Instead, the party should rely on the work of the party organizations and party members in the state organs to help the state organs carry out the party's lines, principles and policies. The party's leadership over the judicial organs should be directly manifested as protection for the judicial organs in the exercise of their duties according to the state constitution and laws. The handling of a case from investigation to prosecution and then the final verdict is a very complex process and involves a series of procedures, all requiring in-depth and meticulous work. If the party committee gets involved in the actual administration of justice, regardless of the seriousness of each case, its energy will be dispersed and its attention will be diverted from the major policies concerning judicial work. Thus the party's leadership over judicial work will be weakened instead of strengthened. At the same time, if the party committee has to directly participate in the actual administration of justice and to comment on every case, the judicial workers may tend to rely on the party committee to "guard the pass" and neglect their own duties, resulting in their poor work performance. Furthermore, the leading comrade of the party committee assisting in judicial work, no matter how thoroughly he may know about law and how well experienced he may be in dealing with cases, can have only a partial understanding of the whole procedure because he does not personally attend to the case. If his comments are only based on his perusal of files or reports, the verdict may turn out to be a wrong one. Therefore, under no circumstance can we confuse party leadership with the specific duty of the judicial organs. We must overcome the idea of undivided party-government or undivided party-judicial authority.

Comrade Dong Biwu said: "The correct function of the party in relation to the state organs should be: (1) To provide correct guidance on the quality and orientation of the work of state organs; (2) to enforce party policies through the state organs and their work departments, and to exercise supervision over their activities; and (3) to select and promote loyal and capable cadres (party as well as nonparty members) for work in the state organs."[2] A restudy of venerable Dong's views, expressed shortly after the founding of the People's Republic, is still of great significance to us in strengthening party leadership over judicial work.

Party leadership over judicial work is mainly the leadreship in the implementation of principles and policies, or political leadership, organizational leadership, and leadership over the state legal system. Therefore, we must resolutely overcome and change the practice--the outcome of a very incomplete socialist legal system--of substituting the party for the government, substituting some people's statement for law, failing to observe laws, and displacing judicial work wholesale. We must include the work of strengthening the socialist legal system in our agenda, and, based on the party's tasks at different periods and on the actual situation of struggle, promptly issue instructions on the correct methods to implement policies and to enforce laws. We must keep ourselves informed of the conditions of judicial work, carry out periodical investigations on the work of the people's law courts, direct the judicial organs in conducting analyses on enemy activities and on the social and other related situations, and help them determine the focus of their work and solve their real problems. We should also conduct timely inspections of the way the people's law courts are implementing the party's lines, principles, policies and state laws, and help them sum up experiences, improve their work style, develop their achievements, correct their defects and mistakes, and combat unlawful acts.

In providing party leadership over the people's law court, the relationship between party leadership and the enforcement of law must be well handled. The party should change the method of supplanting the people's court, and, more important still, should find some way to preserve the independence which the people's law court should enjoy. We should constantly carry out education on the legal system and adopt suitable systems and measures to insure that the people's court can handle their cases independently according to law and without interference from any other organs, groups or individuals. The party committee should also exercise careful supervision over the people's courts so as to be sure that the people's court will strictly abide by state laws. At the same time, the party committee should see to it that outer units and individuals concerned should give unqualified support for the verdicts and decisions reached by the judicial organs and based on laws. Should there be any disagreement with the verdicts or decisions, the units and individuals concerned should strictly follow the legal procedures of appeal, to be handled by the responsible judicial organs. Thus the party committee will more effectively free the people's court from external interference and influence.

In providing leadership over the law court, the party should organizationally assign to the judicial organs competent cadres of high integrity and with the courage to uphold the legal system. The party should also strengthen the political and ideological education as well as education on the legal system among the judicial personnel so as to set right their ideological and political lines and raise their ideological and vocational levels. It should also help restore and develop the fine traditions and style of our judicial work so as to insure that they will always be able to apply laws correctly.

After all, the most important condition of party leadership is to protect the execution of laws and the constitution and to give full scope to the role of the judicial organs. However, the way for party committees at various levels to provide leadership over the work of the people's courts is still a problem requiring careful study and solution. The party committees at various levels must conscientiously instead of perfunctorily and vaguely sum up their experiences by linking theory with reality and really emancipate their minds before they can consciously uphold the dignity of the legal system and energetically help the judicial workers enhance their own sense of responsibility. In this way, the important principle of "independent administration of justice by the people's court and obedience to law alone" will be strictly upheld.

PARTY AND STATE

FEATURES OF NEW ELECTION LAWS DESCRIBED

Beijing FAXUE YANJIU [STUDIES IN LAW] in Chinese No 2, 23 Apr 80 pp 12-15

[Article by Li Zaizao [2621 0961 5678] and Chen Jinluo [7115 6855 5012]: "A Talk on the Fundamental Spirit of Election Laws and the Significance of Direct Election of People's Congresses at the County Level"]

[Text] The "Election Laws of the People's Republic of China for the National People's Congress and Local People's Congresses at All Levels" (hereinafter briefly referred to as New Election Laws) approved at the Second Session of the Fifth NPC have become effective as of 1 January 1980. This is an important event in our political life attracting worldwide attention.

The new election laws, as proved in the experiments of direct election carried out in 66 county-level units (including counties, autonomous counties, districts under the jurisdiction of a municipality, and municipalities not divided into districts) in the second half of 1979, fully embody the people's will and amply safeguard the people's democratic rights. That is why they are warmly supported by the broad masses.

I. What Is the Fundamental Spirit of the New Electional Laws?

Our election laws are socialist election laws, and the established system of election is a socialist election system. The new election laws are based on the requirements of the new socialist period for developing socialist democracy and strengthening the socialist legal system with the unity of democratic essence and democratic form as their main objective in the light of reality. In many respects, including principles, organized leadership, procedures and the methods of election, these laws, according to their stipulations, are intended to help the people exercise their power as masters of the state.

The fundamental spirit embodied by our election system has been determined by the socialist character of our country. The Constitution stipulates that our country "is a socialist state under the dictatorship of the proletariat led by the working class and based on the alliance of workers and peasants." People are the masters of the state, and "all power in the People's Republic of China belong to the people. The organs through which the people exercise state power are the National People's Congress and the local people's congresses at various levels."

In his "Report on the Work of the Government" delivered at the Second Session of the Fifth National People's Congress, Comrade Hua Guofeng pointed out: "Socialist democracy is first of all a question of the state system in socialist countries." All the people can exercise their supreme power in managing state affairs through the people's congresses; this is the immutable principle of the socialist system. According to this principle, there should be in our socialist country democracy of a broader and higher form than any ever experienced before, or democracy in name as well as in fact for the overwhelming majority of people. This form of democracy is unprecedented in our history. Lenin aptly pointed out: "All citizens must take part in the work of the courts and in the government of the country. It is important for us to draw literally all working people into the government of the state. It is a task of tremendous difficulty. But socialism cannot be implemented by a minority, by the Party. It can be implemented only by tens of millions when they have learned to do it themselves." ("Collected Works of Lenin" Vol 27, p 123) The new election laws stipulate the principles, procedures and methods for the people to exercise their right to vote and to supervise or recall their deputies. The fundamental spirit behind this whole process is to further develop socialist democracy; to demonstrate that people are the masters of a socialist state; to provide safeguard in the form of laws for the people's supreme right to manage state affairs; to effectively supervise the work of state organs; and to urge the state personnel to serve the people faithfully and to lead the people in the struggle to accelerate our socialist modernization.

II. What Are the New Stipulations in the New Election Laws?

The election laws of 1953, based on reality soon after the founding of the People's Republic, already embodied a practical system of democratic election. The fundamental spirit behind them are still applicable today. However, because of the 10 years of severe destruction by Lin Biao and the "gang of four," people's democracy and the legal system were trampled underfoot. Yet they took advantage of certain weak links in the 1953 election laws. For example, they used the system of listing as many candidates as the number of deputies to be elected and the method of nominating candidates from the top down as a means of excluding the cadres who were faithful to the people and the advanced exemplary workers from the list of candidates, while their sworn follows, the backbone elements of their faction, and the "smashers and grabbers" were pulled into the people's congresses at various levels and placed in charge of various state power organs. The final list of candidates was worked out by them only for the masses to endorse. Democratic election was turned into a means of fooling the people and defiling public opinion. The fundamental principle and spirit behind the election methods were thus scattered to the winds. The new election laws are based on the requirements for developing socialist democracy and strengthening the socialist legal system as put forward by the Third Plenum of the 11th Party Central Committee. In these new laws, we have inherited and carried forward the democratic spirit of the 1953 election methods, discarded the weak links which had been taken advantage of by the "gang of four," and added some new contents based on the developments and changes of the objective conditions in the previous 26 years. The new stipulations are mainly as follows:

(1) The direct election of deputies to the people's congresses is extended to the county level. This is an important change in the election system and an important measure for enlarging people's democracy.

(2) The system of nominating as many candidates as the number of deputies to be elected is replaced by that of nominating more candidates. In other words, the number of candidates should be greater than that of deputies to be elected. The number of candidates for the directly elected deputies should exceed that of the deputies to be elected by 50 to 100 percent. By this means, the voters can choose the best ones after careful comparisons and freely exercise their right to vote, and the defects of nominating as many candidates as the number of deputies to be elected, and of preparing the list of candidates at the higher levels to be endorsed at the lower levels, can be avoided. It will also prevent undesirable elements from worming their way into the state apparatus.

(3) The procedure of nominating candidates for deputies is improved. In addition to those jointly or separately nominated by the CCP, the various democratic parties, people's organizations and so forth, it is further stipulated that any voter or deputy (when seconded by no less than three others) can nominate his candidate. If, after repeated discussions and democratic consultations from the bottom up and from the top down several times, the number of candidates turns out to be excessive, then a preliminary vote is taken by secret ballot, and the list of official candidates will be decided by the majority of voters. The list of official candidates should be publicized 5 days prior to the election day so as to give the voters sufficient time to consider their final choice. Practice has proved that the key to an efficient nomination of candidates lies in a firm belief in the masses and a respect for the voters' democratic rights. The practice of taking things out of the voters' hands must be opposed.

(4) The division of electoral districts is based on a combination of the production units, establishments and work units on the one hand and the location of the voters' residence on the other. In the division of electorial districts, the stipulations of the new election laws are different from those of 1953 when the method of division was purely based on the location of the voters' residence. This new method is more convenient

for the voters' participation in election activities and the organizational work for election; more convenient for the voters to know more about the deputies and for the deputies to maintain their contacts with the voters; and more convenient for the voters to exercise their right in supervising and recalling the deputies.

(5) The method of secret ballot is now exclusively used. This will eliminate the defects of voting by a show of hands. At the same time, it is stipulated that "the illiterates and those who are sick or disabled, and therefore cannot write, are allowed to ask others to write for them."

(6) The new election laws stipulate the number of ballots required for a deputy to be elected. According to the election laws of 1953, a candidate would be elected provided he won just a simple majority of ballots cast. The new election laws stipulate that the candidate to be elected must win ballots exceeding one half the total number of electorate. This method insures a broader representation by the deputy.

(7) The voting rights of the minority nationalistes are more effectively protected. A supplement to the laws stipulates that all minority nationalities' own languages is permitted.

(8) There is a special chapter dealing with the right of supervision over the deputies and their recalls, as well as the legal procedure for their recall. Our former election laws also included some articles concerning the right to recall the deputies, but the legal procedure for such recall was not clearly spelled out, and therefore could not be easily followed. The new election laws specifically stipulate the legal procedures for people to exercise their right of recalling their deputies, and thus guarantee the right of supervision to be exercised by the people.

III. The Profound Significance in Implementing the New Election Laws

In his "Report on the Work of the Government" delivered at the Second Session of the Fifth National People's Congress, Comrade Hua Guofeng pointed out: "We shall continue to improve and consolidate our socialist state system and the political system of democratic centralism, so that no minority will ever be able, by any means, to impose their will on the majority, but will have to obey the majority and submit to their interests and will." The new election laws were made precisely to "improve and consolidate our socialist state system and the political system of democratic centralism. They are the legislation for "improving and consolidating" They are the legislation for "improving and consolidating" this basic system; the laws for plugging the loopholes whereby the small number of conspirators can plot counter-revolutionary restoration; and the laws for safeguarding the people's democratic right in managing state affairs and placing the state apparatus, the people's government at various levels, and the state cadres under the people's supervision.

Adoption of the new election laws and the setting up of a democratic election system will enable the state apparatus at various levels (the people's congresses and their standing committees) and the administrative organs (the people's government) to truly practice democratic centralism. They will be formed through democratic election, be responsible to the people and be under the people's supervision. There should be regular re-elections so that the power in the hands of those who are incompetent and unsatisfactory to the people can be taken away from them and transferred to the newly emerging advanced elements. In this way, the leading bodies of the state apparatus at various levels will constantly preserve their vitality; serve as powerful militant command posts to lead millions upon millions of people, united as one, in striving for the four modernizations; and continually advance the cause of socialist revolution and construction. This is an important event in our people's political life as well as a mandatory task for our party and our state.

IV. The Importance of Direct Election at the County or Autonomous County Level

The new election laws extend the scope of direct election by voters from the people's communes, towns, municipal districts and municipalities not divided into districts, to the counties and atuonomous counties, is an important measure for expanding the people's democracy as well as an important change in our election system. Direct and indirect elections are two different forms for the people to exercise their democratic rights. Both forms have been used during the building of our proletarian political power. Our election laws of 1953 stipulated indirect election at and above the county level. In 1957, Premier Zhou pointed out that the systems of direct election at and above the county level was a fairly good form of democracy and was suitable for the conditions in our country at that time. But he did not rule out the gradual extention of direct election to the county and higher levels when conditions are ripe for so doing. At present, important changes have taken place in our political, economic, cultural and other fields; the people's political consciousness and cultural level have been raised; and the material conditions including the conditions of communications have been greatly improved. At the same time, after 30 years' tests and comparisons, the broad masses in the counties have generally gained a better understanding of the state apparatus and the state personnel. The timely extention of direct election to the county level is not only practical but also necessary.

Political power at the county level occupies a very important position among various levels. Its position is in between the province on the one hand and the people's communes and towns on the other, and serves as a link between the higher and lower levels as well as a key to the implementation of party policies and state directives and the improvement of agricultural production in the countryside. Direct election at the county level is an important measure for strengthening the county political power through a democratic system and by giving a broader scope to its leading role.

Direct election of the county deputies by the people and the election of the standing committee and the people's county government by the county deputies will place the county political power completely under the supervision of the broad masses of people. Since such a form of county leading body is elected by the people, it can count on the confidence and support of the broad masses, and will be in a position to arouse mass enthusiasm in the implementation of party and state lines, principles and policies throughout the county and in the successful fulfillment of various socialist undertakings in construction in the county. The strengthening of the county political power will lay a solid foundation for the political power at not only the provincial, but also at the national level in addition to setting a good example for the people's commune and towns in political power building.

In his "Report on the Work of the Government" delivered at the Second Session of the Fifth National People's Congress, Comrade Hua Guofeng called on people throughout the country to "firmly uphold the guiding ideology of taking agriculture as the foundation and concentrate all forces on promoting agriculture." This is a major issue for people throughout the country, and the central task for the state power with a close bearing on the immediate interests of all peasants. The county political power is the command post directly responsible for the fulfillment of this task. The purpose of direct election at the county level is precisely to strengthen and to give full scope to the leading role of the county political power in developing agriculture. Through the establishment and improvement of the direct election system at the county level, we will be able to effectively handle the job of political power building in more than 2,000 counties throughout the country and further implement the various economic policies in the countryside. This will greatly arouse the socialist activism and creativity of the 800 million peasants and speed up agricultural modernization, and then the development of the entire national economy and the four modernization.

V. Emancipation of the Mind Is the Key to Smooth Election Work

In December 1979, the Ministry of Civil Affairs held a meeting for the exchange of experiences in direct election at the county level throughout the country. A preliminary review of the experiences of the experimental counties was carried out as a preparation for election work throughout the country. The initial impression gained from these experiments indicated that the key to the smooth proceeding of election work lies in the emancipation of minds and a serious approach to the problem of ideology and understanding among the cadres.

Our country has been under feudal rule for a long time and lacks a democratic foundation. Before the liberation, the working people had hardly any democratic right to speak of. Despite the fairly through political and economic revolution against feudalism after the liberation, ideas of autocracy, patriarchal behavior, seeking privilege and so forth still exist among some cadres. Lin Biao and the "gang of four" in particular wantly distorted Marxist-Leninist theories on democratic election, and confused democratic election of the proletariat with that of the bourgeoisie. They called democracy a purely bourgeois trait and created many perplexing ideas. For example, anyone talking about democracy was accused by the "gang of four" of propagating bourgeois democracy and working for "capitalist restoration." He might even be attacked for "competing with the party for democracy" on behalf of the landlords, rich peasants, counterrevolutionaries, bad elements and rightists. Such pernicious influence is still fettering some of our cadres' minds, with the result that they are always hestitant, over-cautious, and afraid of getting into trouble. The most deceptive means used by Lin Biao and the "gang of four" was that, in the name of consolidating the dictatorship of the proletariat, they only stressed democracy as a "means" but never mentioned that dictatorship too was a "means" instead of an "end." They deliberately created this confusion in order to mislead the people into believing that "dictatorship alone is important and democracy does not count," and so forth.

The masses are the makers of history and the masters of the state, while our cadres and the people's public servant and their attendants. This is the basic tenet of historical materialism. When we speak of democracy, democratic system and the election laws, we are guided by these basic viewpoints which our cadres too must always bear in mind. The idea and work style of distrusting the masses and not daring to develop democracy are basically contrary to this viewpoint. For example, some county leading cadres, whose minds have not been emancipated, still think that "democracy is a means and centralism is an end." Thus in directing an election, they stressed centralism and followed the old pattern by setting up rules to limit the number of candidates. In the stage of nomination of candidates from the leadership before the electoral district had time to discuss about the nomination. Sometimes, when certain electoral districts nominated more candidates than were necessary (and this is quite natural), the leading cadres would impatiently cross out the names at will on the ground that "the masses nominate candidates, but the leadership makes the decision." If effect, this is a typical example of "the list of candidates being put up by the authorities for voters to endorse," which turns election into a mere formality and leads to mass dissatisfaction.

Some county leading cadres still complain that "there is only democracy but no centralism" in the new election laws. This is an incorrect view and the outcome of a fettered mind. In directing election work, these comrades are still sticking to the old pattern. For example, in the division of electoral districts, they insist on division by areas; in registering voters, they insist on using the voters' permanent address; and in the nomination of candidates, they insist on using the "from the top down" method. After all, they distrust the masses, dare not uphold democracy, and are afraid that the masses do not elect their favorites.

Election is a type of work involving all the people. Experiences in the experimental counties have proved that provided the cadres have gained a better understanding of the work, adopted a correct attitude, formed the concept of democracy and legal system, and mastered the spirit, principles, methods and requirements of the election laws, it will be possible to launch an extensive and intensive propaganda campaign among the masses, and the people will be able to dispel whatever misconception they may have about election. In the process of election by the masses, we must encourage them to gradually deepen their understand of socialist democracy and the socialist legal system, to have a keener sense of responsibility as masters of the state, to learn the correct way to exercise their rights of election and recall as a means of supervising the state apparatus and the work of the cadres and to actively participate in the management of state affairs. They will then be able to make the people's congresses a success, perfect the system of these congresses and give full play to their role on stability and unity and the acceleration of the four modernizations. The election work will help produce fine results for the four modennizations.

KANG SHENG'S RELATIONSHIP WITH MAO ZEDONG REVIEWED

Hong Kong ZHENGMING in Chinese No 34, 1 Aug 80 pp 42-47

[Article by Du Feng [2629 3536]: "Kang Sheng and Mao Zedong"]

[Text] Looking back at the political life of Mao Zedong and Kang Sheng, we can discover an interesting law: whenever Mao Zedong insisted on a correct direction and made contribution to the Chinese revolution, Kang Sheng was usually not around; but when Mao Zedong made mistakes and caused losses to the Chinese revolution, Kang Sheng was always there participating, and also cooperating actively with him.

Background as Member of Mao Zedong's Opposition Faction

During the period of the second revolutionary civil war (1927-1937), Mao Zedong opposed the erroneous leftist line on three occasions. The most powerful and most damaging [of these lines] to the Chinese revolution was the third left opportunist line of the "Internationalist Faction" represented by Wang Ming. Their error made the Red Army lose its southern base and hence forced it to undertake the Long March in a shift to the north. When it reached northern Shaanxi, the Red Army had only 30,000 men left; the losses were excruciating. Relying on its close relations with the Soviet Union and the Communist International, the "Internationalist Faction" was very cocky in its conduct, and Mao Zedong was thus at a special disadvantage in the face of their exclusion and attack.

When Mao Zedong suffered through this period of exclusion and attack because he insisted on the correct line, Kang Sheng, however, was an active supporter of the "Internationalist Faction."

Very few of the Chinese communist leading cadres who prospered during the Cultural Revolution had a background as members of Mao Zedong's opposition faction. Only Kang Sheng was an exception.

In 1931, Kang Sheng was sent to Moscow to study organizational and intelligence work. Among the many leaders of the Chinese Communist Party, Wang Ming enjoyed the greatest support and respect of the Soviet Communist

Party and the Communist International; Moscow was thus Wang Ming's world. After Kang Sheng arrived in Moscow, he immediately became intimately involved with the "Internationalist Faction."

A great meritorious task that Kang Sheng performed in Moscow on behalf of Wang Ming was to help him launch sectarian attacks. As one specifically selected to go to the Soviet Union to study "organizational work and intelligence work," Kang Sheng was naturally endowed with the talent of dealing with people through intelligence agents. After he had been in Moscow for only 1 year, he had already helped overthrow Chen Yu [7115 6735] (who at one time served as chairman of Guangdong Province prior to the Cultural Revolution), who did not listen to Wang Ming. The latter was suspended from party membership and given the penalty of hard labor at a factory in Stalingrad. Subsequently, when Stalin resorted to an expansion of his suppression of counterrevolutionaries, Kang Sheng once more murdered many Chinese Communist Party members studying in the Soviet Union on the pretext of opposing Trotskyites.

On the matter of Kang Sheng's active support of Wang Ming while in the Soviet Union, there is some mention in a writing left behind by Wang Jiaxiang: "Before they returned to China, Wang Ming and Kang Sheng met with Comrade Stalin...and Comrade Dimitrov was also present. Comrade Stalin asked me about our party's situation and also asked how many men our Red Army still had left. I replied that when we reached northern Shaanxi, we had only about 30,000 left. Wang Ming immediately interjected: there were still 300,000 men. Kang Sheng supported Wang Ming.... At this time Wang Ming again harbored evil intentions. Taking advantage of this opportunity of meeting with Comrade Stalin, he resorted to personal vengeance by alleging that Zhou Dawen [0719 6671 2429] and Yu Xiusong [0205 4423 2646] were bad characters, and he also reproached the Marxist-Leninist Institute's Kazanova before Comrade Stalin for having attempted to protect the two. Earlier, Wang Ming had been troubled by having no opportunity to pull down Zhou and Yu. Soon after this, Zhou and Yu were arrested, and Kazanova was also dismissed from his post." This passage of seemingly insignificant writing not only illustrates the relationship between Kang Sheng and Wang Ming, but also describes their special characteristic of being good at taking opportunities to attack those with inclinations different from theirs.

Kang Sheng closely followed Wang Ming on the one hand and also did his best to fawn over Stalin. Hence, he not only gained Wang Ming's favor but also became important in the eyes of Stalin and others. As a result, Kang Sheng began to serve as the Chinese Communist Party's representative to the Communist International and was also elected candidate member of the latter's executive council.

The Wedding of Mao and Jiang, and a Turning Point

In 1937, the anti-Japanese war broke out in full force, and Kang Sheng and Wang Ming returned to China together from the Soviet Union. The Central Committee of the Chinese Communist Party at this time had become already greatly different from what it had been 6 years earlier, when Kang Sheng first went to the Soviet Union.

After the Zunyi Conference of 1935, Mao Zedong had gained the leadership over the whole party, while the influence of Wang Ming's faction had already been greatly weakened. In the face of such a change of the power alinement inside the party, what choice should Kang Sheng make after following Wang Ming for 6 years?

At precisely this juncture, Kang Sheng met Jiang Qing again. In the spring of 1938, Jiang Qing came to Yanan from Xian. Both Kang Sheng and Jiang Qing are natives of Shandong. Kang Sheng's original name was Zhang Shaoqing [1728 4801 0615]; he was born in 1903 to a landlord family of long-standing wealth and influence in Jiaonan County, Shandong. At 17 he went to Shanghai to study, entering the Chinese Communist Party's Youth Corps while at the middle school attached to Shanghai University. When he later attended Shanghai University itself, he was formally transferred to membership in the Chinese Communist Party. He always engaged in underground work, participating in Shanghai workers' uprisings three times in 1927. Jiang Qing is a native of Zhucheng County, Shandong; her family situation was relatively humble. Her original name was Li Yunho [2621 7189 7729]. She joined the Shandong Provincial Experimental Theater to learn Beijing Opera when she was only 14; once she actually participated in performances in Beijing. In 1933, she went to Shanghai to seek her fortune; she changed her name to Lan Ping [5663 5689] and entered the movie circles. In the spring of 1938, she came to Yanan.

When Mao Zedong decided to marry Jiang Qing, he met opposition from many high-ranking Chinese communist cadres. This was because Jiang Qing's background was not very clear, and when she was in the movie circles of Shanghai her political relationships were also rather complicated. Also, in October 1934 she was arrested by an intelligence organ of the Kuomintang and got out of jail only through her confession and a reversal of her stand. Among Yanan's high-ranking cadres, Kang Sheng was the one who most actively tried to see this proposed marriage through. He volunteered to become Jiang Qing's go-between and provided a guarantee for Jiang Qing, so that Mao Zedong could marry without a hitch. For Kang Sheng's service in this regard, both Mao Zedong and Jiang Qing were very grateful.

From then on, Kang and Jiang Qing began to maintain a special kind of relationship. During the Cultural Revolution, all those who had opposed Mao Zedong suffered their fate, but Kang Sheng, whose early background was as a member of Mao Zedong's opposition faction, somehow became alone a red hot personality turning almost purple. This special kind of relationship played a role, indeed.

First Time Cooperation--Rectification in Yanan

Since Kang Sheng had rendered a service to the marriage of Mao Zedong and Jiang Qing, not long thereafter Mao Zedong began his political cooperation with Kang Sheng for the first time: this was the rectification movement in Yanan.

There are several relevant articles on this rectification movement in Volume 3 of "Selected Works of Mao Zedong." From these articles, it appears this movement was to rectify ideology and working style. But in reality, this was far from being the case. At that time, this rectification movement was turned into a cruel movement whose purpose was to try the cadres and persecute the people. From a certain sense, this was a mixed movement, between a cultural revolution and Stalin's suppression of counterrevolutionaries and party purges, while Kang Sheng was the specific person responsible.

Kang Sheng's duty in Yanan was still his old trade--organizational and intelligence work. He served in succession as minister of the Chinese Communist Party's Central Cadres Department, minister of the Social Affairs Department, minister of the Intelligence Department, president of the Party School, chairman of the Workers Movement Commission, deputy secretary of the Organizational Commission, chairman of the Enemy Area Work Committee, secretary of the Central Secretariat, etc.

Rectification of working style and trial of cadres were precisely a combination of organizational and intelligence work. Kang served as vice chairman of the Central Study Committee at the time, and hence he was in charge of many specific tasks during the rectification movement.

The Cruel "Rush-Save Movement"

In 1943, Kang Sheng developed the rectification movement into a "Rush-Save Movement." He wrote an article entitled "Rush-Save the 'Fallen.'" The so-called "fallen" people were none other than those who had joined the intelligence organizations. But he treated as "fallen" people all those who had come to the liberated areas from Japanese-occupied areas and Kuomintang-ruled areas, and he wanted to "rush-save"--i.e., rectify, all of them.

On 15 August 1943 the Chinese Communist Party, under Kang Sheng's active planning, passed a "Decision" on the trial of cadres. The very beginning sentence of this "Decision" was: "There being so many intelligence agents is not strange." And then there immediately followed: "Therefore, there being so many intelligence agents is a worldwide question of mass character." This approach of expanding the target area of attack was really very much the same as that of picking out rebels, intelligence agents, and capitalist-roaders at random during the Cultural Revolution, or of Stalin's expansion of his suppression of counterrevolutionaries.

The "Rush-Save Movement" at the time also adopted the form of a mass movement. Since there were too many intelligence agents picked out, it would not do to simply rely on trials and dispositions by the dictatorial organs alone. All units were therefore given the power to try and dispose of relevant cases. The aforesaid "Decision" prescribed: "Of those persons under question, the ones charged to ordinary organs for disposal--that is to say, to various party, government, army, civilian, and school organs--make up about 80 percent; the ones sent to deliberative organs, such as the Northwest Public School and the Public Administration Institute, for disposal make up about 10 percent; the ones sent to defense organs, such as the Social Affairs Department, the Security Department, and the Bureau of Military Law, for disposal constitute about 10 percent.... In the case of intelligence agents and suspects sent to ordinary organs and deliberative organs, most of them will remain as usual at their original stations of study and work. Only for the protection of secrets and prevention of suicide are certain persons transferred to other work or placed under observation. Various organs and schools will all tightly organize their own self-defense units to enforce curfews at fixed periods. With the exception of reliable personnel carrying authorized passes who are free to come and go, all persons under question are temporarily deprived of their individual freedom to come and go and are allowed to follow only the collective activity of the whole body." It seems that practices customarily adopted during various postliberation political movements (especially the Cultural Revolution), such as prescription of a percentage of persons to be picked out, the exercise of mass dictatorship, were all first invented by the "Rush-Save Movement," whereas those deliberative organs--the Northwest Public School, etc.--were actually the prototypes of the "cowshed study class" of the Cultural Revolution period.

Kang Sheng's senior disciple Wu De [0702 1795] was put in the charge of the Northwest Public School at the time. This school was really a concentration camp in disguise. All those locked up in this place were organized into classes and groups, and then everybody took turns taking care of his problems. During the process of trial, cruel corporal punishment and personal abuse were frequently administered in forms such as having people kneel down, having tall hats attached to them, having them lie prostrate like a turtle, etc., or even having them hung up and beaten viciously. In order to exhibit his own enthusiasm, Kang Sheng often personally administered the vicious beating of cadres under trial.

To follow an ultraleft line during the rectification of working style and trial of cadres was the first error committed by Mao Zedong after achieving the authority of leadership over the whole party. This error was inseparable from Kang Sheng.

The ultraleft practice adopted during the trial of cadres was resented by, and met the opposition of, many Chinese communist leaders. Under Zhou Enlai's later sponsorship, the Chinese Communist Party Central promulgated "nine principles" for the trial of cadres; only then was the calamity of such "cruel struggle and relentless attack" prevented.

Period of Dissatisfaction

The period from 1947 to 1956 was most dissatisfactory to Kang Sheng. But this happened to be precisely China's thriving "golden era" and also a period in which Mao Zedong led the Chinese Communist Party to the achievement of greatest successes.

Because of the ultraleft line promoted by Kang Sheng, and especially the adventurism he practiced in his white area work in 1947, Chinese communist intelligence work organizations in the white areas were subject to great destruction. Hence he was criticized within the party and left central office. He was later sent to work in Shandong.

During those days when he was exiled to Shandong, Kang Sheng mainly engaged himself in the activity of forming his clique and striking up a working relationship with other people's factions. Among the personalities who came to the fore in demonstrative roles during the Cultural Revolution, not a few were those drawn into the pale by Kang Sheng himself. Relevant examples were Guan Feng [7070 6912] of the department of philosophy and social sciences, Li Guangwen [2621 1684 2429] of the senior party school, Zhou Jingfang [2719 2529 5364] of Beijing's new municipal party committee, Wang Xiaoyu [3769 2400 4416] of Shandong, etc.

In 1955, the Chinese Communist Party came up with the "Gao-Rao Incident." Good at climbing the social ladder by crushing others, Kang Sheng immediately seized upon this opportunity. In March of that year, the Chinese Communist Party convened a National Congress in Beijing to discuss this question of the "Gao-Rao clique." Kang Sheng participated in this congress, and his statements were more dramatic than those of the others. Since he had learned not a few profound Marxist-Leninist theories in Moscow in the earlier years, he now utilized those theories to dress up and decorate his statements and make them look very "profound" indeed and different from those of the others.

Kang Sheng's performance earned Mao Zedong's appreciation and trust; he was transferred from Shandong to the central office to serve as secretary of the Central Secretariat.

But the good times turned out to be ephemeral, because at the Chinese Communist Party Central at the time, the influence of Mao Zedong to make decisions singlehandedly was far from predominant. Other people's opinions still had certain strength, and Kang Sheng's conduct and ultra-left rhetoric alienated other people. Hence, at the Eighth National Congress of the Chinese Communist Party, convened in September 1956, Kang Sheng was not only not promoted but even demoted from a member to a candidate member in the Political Bureau.

Cooperation Again, and Rise Again

At the end of the 1950's, contradictions between China and the Soviet Union deepened further and further and ultimately developed into "anti-revisionist polemics." During the course of these polemic exchanges, Mao Zedong and Kang Sheng cooperated with each other more.

Following the failure of the Great Leap Forward in 1958, Mao Zedong retreated to the second line to mainly attend to theoretical work. Mao Zedong had never had very good feelings toward the Soviet Union: before liberation he was subject to the exclusion of the "Internationalist Faction" supported by the Soviet Union, and after liberation he again became subject to browbeating by Soviet chauvinism. A series of slogans and measures like "opposition to personal superstition," etc., proposed by the 20th Congress of the Soviet Communist Party ran even more counter to his ideology, which was colored by feudalism. Hence he was determined to oppose the Soviet Union and determined to unfold a great anti-revisionist debate.

Although Kang Sheng was on the side of the Internationalist Faction during the 1930's, times were now very different. Good at standing on his chances, Kang Sheng would naturally know how to observe the direction of the wind and make new decisions accordingly. A graduate of Shanghai University and a returnee from Moscow, Kang Sheng also had assets of his own in theory, and now was just the time for him to make use of them. Thus he became a principal character in the antirevisionist debate.

In 1960, Kang Sheng went to Romania to attend the Bucharest meeting, at which he made statements vehemently scolding Khrushchev; this performance earned him instant recognition, and he thus became known as an "antirevisionist warrior."

From then on, many of the antirevisionist articles published by the Chinese Communist Party were planned or drafted by Kang Sheng. Mao Zedong thought very well of him, and his status in the Chinese Communist Party's leading strata became higher and higher. The points made in these antirevisionist articles for the most part later became the theoretical basis of the ultraleft line during the Cultural Revolution, and they played great havoc in China.

Kang Sheng's Slogans Designed To Placate Mao Zedong

The 10th Plenum of the Eighth Party Central Committee, held in 1962, was a very important meeting in the history of the Chinese Communist Party. At that meeting Mao Zedong proposed the famous slogan "Never Forget Class Struggle," which laid the foundation for an expansion of class struggle.

In coordination with this slogan of Mao Zedong's, Kang Sheng suddenly presented the question of the "antiparty novel 'Liu Zhidan'" and started in to work on a sneak attack and struggle against Xi Zhongxun [5045 0112 8113] and others. As Xi Zhongxun recalled: "In the summer of 1962, the Central Committee convened a meeting at Beidaihe, while I stayed in Beijing to preside over the National Medium Industrial Cities Forum; Enlai let me finish the session and then go to Beidaihe for a rest. I went there and rested for 2 days and then returned to the capital to participate in the 10th Plenum of the Eighth Party Central Committee. That certain person who looked upon himself as a 'theoretical authority' (meaning Kang Sheng) suddenly launched an attack against me. At the plenum he made use of circumstantial data supplied by still another certain person to frame me, alleging that I had 'connived' with Liu Zhidan's younger brother, Liu Jingfan [0491 2529 5400], and the latter's wife, Li Jiantong [2621 1619 1749], and had given them the hint to fabricate the 'antiparty novel' 'Liu Zhidan' in order to reverse the verdict on Gao Gang [7559 1511]. [Kang Sheng] accused me as 'a person in search of a command,' as some 'big antiparty plotter and great ambitionist.' That 'theoretical authority' also wrote a note to Chairman Mao at the plenum: 'Carrying out antiparty activity by way of a novel is a great invention.' Chairman Mao only read the note at the plenum, but that 'theoretical authority' later attributed his statement to Chairman Mao as being a quotation from Chairman Mao, and spread it far and wide." In this passage of his memoirs, Xi Zhongxun made a very conspicuous point to save Mao Zedong's face. Mao Zedong himself had never read "Liu Zhidan," and he reached his conclusion only on the basis of Kang Sheng's briefing. The fact that that note was collected as a formal quotation from him and spread far and wide was not necessarily unknown to Mao Zedong; we cannot say that it was forcibly attributed to him.

According to Xi Zhongxun, those who became implicated because of the "Liu Zhidan" incident, "those leading cadres of the party, government and army who were persecuted as a result, numbered more than 300, the number of ordinary cadres and masses who were hurt was even greater."

A Great Invention

After the "Liu Zhidan" incident, Kang Sheng was very pleased with his great invention--"making use of literary works to carry out activities aiming at attacking others." He began to engage in even more extensive activities of the kind.

At this time, the liaison dealings between Kang Sheng and Jiang Qing became even more frequent than before. From Jiang Qing, he learned for sure Mao Zedong's intention to develop a struggle in the cultural realm; hence, he immediately prepared for close coordination.

Kang Sheng looked up his old warrior friend Ke Qingshi [2688 1987 2457] (first secretary of the Shanghai Municipal Party Committee) and proposed the slogan that, in literature, "We Must Write About the 13 Years" (i.e., the 13 years after liberation). This was undertaken in the vain hope of fabricating some criminal designation through the slogan so that it could be imposed upon those writers who failed to write about the 13 years, thereby delivering a blow against them and at the same time raising his own status.

Later, Kang Sheng struck up a partnership with Jiang Qing to work on "modern revolutionary operas." Ordinarily, Kang Sheng was very fond of the old operas. He saw "Li Huiniang" once and later wrote a letter to author Meng Chao [1322 6389] to praise him as "the number one person in the operatic world" of contemporary China. Kang Sheng also wrote a letter to the author of "The Peachflower Fan" to say: "I am a native of Shandong, and I have some special feelings toward Kong Shangren [1313 1424 0117]." In the old days, Kang Sheng often wanted to listen to the old operas, requesting specific titles from the repertoire. For instance, when Zhao Yanxia [6392 3601 0204] once came to wish him Happy New Year, he personally played the Chinese violin and asked Zhao Yanxia to sing the yellowed old opera "18 Random Associations" for him. But at the August 1964 closing ceremony of the joint performance of modern Beijing operas sponsored by Jiang Qing, Kang Sheng suddenly made a furious 180-degree turnabout. He gave a speech and trotted out several of "our own folk," and thereupon criticized by name Tian Han's [3944 3352] "Xie Yaohuan," Yang Hansheng's [7122 5060 3932] "The Death of Li Xiucheng," Meng Chao's "Li Huiniang," etc. This blatantly antagonistic speech made Kang Sheng a red-hot leftist promoting "literary revolution."

At the time, one criticism movement after another was aroused in the realms of the upper structures such as philosophy, history, literature, drama, movies, etc. These criticisms were actively planned by persons like Mao Zedong, Kang Sheng and Jiang Qing; they were also the harbingers and preparations for the Cultural Revolution.

Three Bases

At the same time, Kang Sheng also carried out certain activities in the areas of personnel and organization. On the one hand, he accompanied Jiang Qing to Shanghai many times and, through Ke Qingshi, made his connections with Shanghai's "leftists" Zhang Chunqiao, Yao Wenyuan, and others. On the other hand, he also set up three bases in Beijing, namely: the Philosophical Institute of the Study Department, the Department of Philosophy of Beijing University, and the Central Party School.

At the Philosophical Institute of the Study Department, Kang Sheng gained control through Guan Feng over Lin Lushi [2651 5124 2514], Wu Fuqi [0702 0265 0796], Zhou Jingfang, and others. Later, Qi Benyu [2058 2609 4416] also joined this clique.

At the Department of Philosophy of Beijing University, Nie Yuanzi [5119 0337 2737] was his "groom."

At the Central Party School, he fostered the influence of Li Guangwen [2621 1684 2429], Zhao Jibin [6392 4767 1755], and others.

Thus in control of these three "theoretical battlefields," Kang Sheng's ability to manipulate theory and public opinion was greatly enhanced. During the Cultural Revolution, the troops at these three bases became the handy auxiliaries of Kang Sheng and the "Central Cultural Revolution Group."

The Trap of the "February Proposal"

After such careful, tightly arranged preparations of public opinion, by the time the Shanghai WEN HUI BAO published Yao Wenyuan's "A Critique of of the New Historical Drama 'The Dismissal of Hairui'" the fuse of the Cultural Revolution was already lit.

As to how Mao Zedong was going to work on the Cultural Revolution, Kang Sheng already had some specific ideas in mind. At the time the Cultural Revolution leading group was the "Five-Man Group" headed by Peng Zhen. Although Kang Sheng was also one of the five members, he knew that this group was not entirely in accord with Mao Zedong's plans. Hence, he accordingly sprang a trap, and this trap was none other than the "February Proposal."

At that time, Peng Zhen and others held a different view from that of Mao Zedong on the series of criticisms and struggles that were taking place in the cultural realm. They did not agree to registering academic struggles as political struggles without limitation, and they did not agree to infinitely expanding the struggles in the cultural realm. Hence, in the "February Proposal" Peng Zhen suggested: "Everybody is equal before the truth." He also demanded that criticisms be limited to the realm of "academic discussion."

When Peng Zhen first wrote his "February Proposal," Kang Sheng was not necessarily unaware of it. But he breathed not a word and purposely let Peng Zhen go ahead with the writing and let him make the mistake of falling into the trap. After Peng Zhen had finished writing the "February Proposal," Kang Sheng immediately reported it to Mao Zedong in secret, alleging that Peng Zhen had drafted it behind [Mao's] back, and vehemently claiming that by turning "political struggles" into "academic struggles" the "February Proposal" was meant to protect Wu Han and others. Consequently, the "Five-Man Group" was dissolved, and the "Central Cultural Revolution Group," headed by Chen Boda and Jiang Qing, came into being. The four other persons of the "Five-Man Group" all suffered their fate, and Kang Sheng alone became a consultant to the "Central Cultural Revolution Group."

Jointly Drafting the "16 May Circular"

While the "February Proposal" was being criticized, Mao Zedong and Kang Sheng formulated the "16 May Circular" at the Hangzhou meeting. At the very beginning this circular declared the party Central Committee's decision: Dismiss the "February Proposal"; dismiss the "Five-Man Cultural Revolution Group"; establish a new Cultural Revolution group; and criticize Peng Zhen by name. This circular also called on everybody to "hold high the banner of the proletarian cultural revolution, thoroughly criticize the bourgeois reactionary stand of those antiparty and antisocialist so-called 'academic authorities,'" and expose those "bourgeois representatives who have sneaked into the party, the government, the army and various cultural realms." "Some of these people have already been spotted by us, but some have not yet been spotted; some are being trusted by us and trained to become our successors; they are people like Khrushchev; they are sleeping beside us today; party committees at various levels must pay full attention to this point." This circular was issued to county party committees, party committees of cultural organs, and army party committees at the regimental level. These bodies were asked to discuss and study it in contrast to Peng Zhen's "February Proposal."

Gathering Data on Coup for Lin Biao

Two days after the issuing of the "16 May Circular," Lin Biao gave a famous speech at an expanded session of the Central Political Bureau in which he extensively discussed "the history of court coups" of the past and modern times, of China and foreign countries, pointing out that China today must guard against the outbreak of revolutionary coups. He also explained that liquidating Peng Zhen, Lu Dingyi, Lo Ruiqing, and Yang Shangkun meant preventing coups. This speech by Lin Biao was drafted with the help of Kang Sheng, and those stories on court coups were all gathered and supplied by Kang Sheng.

After the issuance of the "16 May Circular," Kang Sheng further proceeded to plan the appearance of "the country's very first big-character poster."

On 18 May, Kang Sheng sent his wife Cao Yiou [2580 6522 2962] to Beijing University to carry out liaison work with Nie Yuanzi and let her write a big-character poster opening fire on the Beijing University Party Committee and the Beijing Municipal Party Committee. On 25 May, Nie Yuanzi's famous "Marxist-Leninist big-character poster" was posted. In the beginning, nobody responded to her at Beijing University, and no small number of persons even indicated their opposition. On 1 June, following the arrangements of Mao Zedong and Kang Sheng and others, RENMIN RIBAO published this poster, added a commentator's article, and also issued an editorial. Thereafter, the decision on the reorganization of the Beijing Municipal Party Committee was promulgated. Only then was the red-hot Cultural Revolution finally aroused.

Intimate Cooperation: the Peak Period

The Cultural Revolution period was the peak period in Kang Sheng's political life. At the Eighth Congress, before the Cultural Revolution, Kang Sheng had been demoted to candidate membership in the Political Bureau. At the Ninth Congress, convened during the Cultural Revolution, he jumped two grades to become a member of the Standing Committee of the Political Bureau (at the time there were only five members on the Standing Committee of the Political Bureau: Mao Zedong, Lin Biao, Zhou Enlai, Chen Boda, and Kang Sheng). By the 10th Congress, he jumped further to become a vice chairman of the party Central Committee. This was also the period when Kang Sheng was most intimately associated with Mao Zedong.

As soon as the Cultural Revolution got started, Kang Sheng, through the lieutenants he had earlier placed at the three bases, gained control over many Red Guard rebel groups. These rebel groups became powerful instruments for them to deliver blows against political enemies. At that time, members of the Central Cultural Revolution Group were active everywhere; they received the Red Guards, and they gave various seditious speeches. At Beijing University, Kang Sheng wrote a note in support of the "18 June" incident in which people were beaten; at Qinghua University he again supported Kuai Dafu [5566 1129 1381] to seize Bo Yibo and not let him go. After Mao Zedong wrote "Bombard the Headquarters--My First Big-Character Poster" and received the Red Guards on "18 August," the Red Guard rebel movement became even more cocky. The "five great student leaders" (Nie Yuanzi, Kuai Dafu, Tan Houlan [6223 0624 5695], Han Aijing [7281 1947 2533], and Wang Dabin [3769 1129 6333]) trained by Kang Sheng and others became the core leaders of the Red Guards. The Central Cultural Revolution Group regularly gave them various hints and directives and let them pick out this one or struggle against that one.

The "two newspapers and one journal" under the control of Kang Sheng and others now controlled public opinion and propaganda throughout the country. The magazine HONGQI issued editorials in rapid succession instigating the rebel movement throughout the country. Countless organs became paralyzed; countless cadres were picked out for struggle; and the whole country was in chaos.

By February 1967, a few old generals and vice premiers subject to the impact could bear it no longer; they carried out a small rebellion at Zhongnanhai, namely the so-called "February adverse current." At a discussion session they convened at Huairen Hall, the old generals took great exception to "messing up the whole country," "messing up the whole army" and "struggling against old cadres at random." They made many suggestions. Chen Yi also mentioned rectification in the Yanan area, saying: "When rectification was going on in Yanan, many old cadres were rectified; the Rush-Save Movement also mistakenly wronged many people. We were also subjected to attacks. Was not the premier himself subjected to attacks? We must remember this lesson." Chen Yi's words stabbed at Kang Sheng's sore spot, but he showed no emotion at the time.

After the conclusion of the rap session, Kang Sheng immediately instigated Zhang Chunqiao, Yao Wenyuan and Wang Li to go to Mao Zedong to make a complaint. The question of the rectification in Yanan touched his deep-seated hatred, so he wanted to arouse Mao Zedong's ire on the pretext of this question, too. Exactly as he had expected, Mao Zedong listened to the briefing quietly at first, but he abruptly became angry when he heard that Chen Yi had mentioned the rectification in Yanan, exclaiming with heated breath: "What? Was the rectification in Yanan wrong? Does he want to reverse the verdict? Does he want to invite Wang Ming back?" From Mao Zedong's anger, the Cultural Revolution faction gained support, whereas those old generals and vice premiers were condemned as lieutenants of the "February adverse current."

People Who Died at the Hands of Kang Sheng

During the Cultural Revolution, Kang Sheng, as consultant to the "Central Cultural Revolution Group," served as head of the Central Organization and Propaganda Group and singlehandedly wielded great authority over organizational work, cadres' work, the party Central Committee's external liaison work, propaganda work, and Central Party School work. This was truly the peak period of Kang Sheng's power.

Next, he wielded the power to try cadres; this again gave him an opportunity to attack others. He kept a little notebook in which he registered black notations of all sorts against others; with these materials he could at any time attack those whom he deemed unsatisfactory. During the Cultural Revolution, countless high-ranking cadres were persecuted by him. Liu Shaoqi's case was also handled by him.

In order to attach a renegade's hat to Liu Shaoqi, Kang Sheng had several times forced or induced An Ziwen, former minister of the Chinese Communist Party's Organization Department, to write out false testimony. In April 1967, when An Ziwen was overthrown and put under house arrest, he sent two persons to An Ziwen to talk to him, saying: "If you can write up something about Liu Shaoqi's being a great renegade, you can immediately go to Diaoyutai to talk with the central leader. The car is waiting for you at your door." An Ziwen asked: "Is this central leader Kang Sheng?" The two nodded their heads in agreement. An Ziwen took this rather resentfully, saying: "I have worked in the Central Organization Department for 21 years, but I have never heard that Liu

Shaoqi was a great renegade, nor have I seen any material indicating that Liu Shaoqi exhibited any reneging conduct. I have been to Diaoyutai; I have also ridden in a Red Flag car; but I do not wish to go at this time. Nor do I wish to see Kang Sheng." At the beginning of 1968, when An Ziwen was formally arrested and put in prison, Kang Sheng sent someone to look him up and say to him: "By proving Liu Shaoqi to be a great renegade, you can render a great service, and this will also be of great benefit to yourself. You know very well what kind of place this is. You can come, and you can also go. Can it be that you are unwilling to be reunited with your wife and children?" An Ziwen said: "Not only do I wish to be reunited with my dear ones, but I wish even more to work for the party. But what I do not know I cannot relate at random." The man then pointed out: "If you don't know, I can tell you." An Ziwen smiled with contempt, saying: "I know nothing; since you already know everything, you can go ahead and write it yourself. I cannot write." On the eve of the convening of the Ninth Congress, in 1969, Kang Sheng for the third time sent someone to the prison to look up An Ziwen. The man said: "Let me tell you some good news. The Ninth Congress is soon to open. If you can prove Liu Shaoqi to be a great renegade, you will never be ill-treated. Naturally, it is impossible for you to continue to serve as minister of the Central Organization Department, but it is still possible to remain a member of the Central Committee." An Ziwen said: "I really do not understand. If I did, I would have reported this to the party Central Committee and to Chairman Mao when I was working in the Central Organization Department. Please ask me no more about this matter from now on." The man again said: "Please consider it again; this is your last chance." An Ziwen replied: "Skip it. I don't know!"

Although Kang Sheng and his ilk were unable to obtain any proof from An Ziwen as to Liu Shaoqi's being a renegade, they did still make use of various false proofs to denounce Liu Shaoqi as a "renegade, traitor, and scab." When Liu Shaoqi's crime was being fabricated, Kang Sheng still denounced the 61 persons, such as An Ziwen, Bo Yibo, etc., as the "clique of 61 renegades." To betray Zhou Enlai, Kang Sheng and the others adopted a similar approach. They denounced as renegades a contingent of Chinese communist cadres whom warlord Sheng Shicai [4141 0013 2088] had detained in Xinjiang prisons. Among them, some, such as the third secretary of the Northeast Bureau, Ma Mingfang [7456 2494 2455], were persecuted to death.

The cases of injustice created by Kang Sheng during the Cultural Revolution were indeed even more sophisticated than those of the Rush-Save Movement.

Hard To Escape the Meshes of the Law

Kang Sheng died at just about the right time. It was just slightly more than a half year before Mao Zedong died that he met his timely death. Hence, his cremated ashes were still able to be squeezed into Babaoshan, and even to remain there for a rather long time. Compared to his old friends Chen Boda, Jiang Qing, etc., he was far luckier, indeed.

However, a beautiful scene usually does not last very long. Recently, the Chinese Communist Party has already started criticizing Kang Sheng. At first his name was not mentioned; he was only called "that theoretical authority." Later, however, his name was finally unceremoniously publicized. An exhibit on Kang Sheng's criminal activities was even held in Beijing. The people's resentment against this fellow who gained his fortune by harming others has been extremely great. Because too many have suffered at his hands, the people's hatred toward him has proven far greater than that toward some of the other overthrown persons.

Although Kang Sheng has died, before the impersonal judge of history he will hardly escape the meshes of heavenly law in the end.

PARTY AND STATE

GAINS MADE IN REHABILITATING UNJUST, FRAMED-UP CASES

Beijing RENMIN RIBAO in Chinese 2 Aug 80 p 3

[Article: "Strengthen Stability and Unity, Promote Prosperity in All Fields; Guangdong Province Scores Significant Achievements in the Rehabilitation of Unjust, Framed-up, and Misjudged Cases"]

> [Text] Editor's Note: The Guangdong Province Committee has spent over 2 years correcting and rehabilitating unjust, framed-up, and misjudged cases, and followup work has been done very well. Their experience proves that if leadership teams at all levels will firmly and thoroughly carry out the party's policy and dare to expose questions, and if leadership comrades will penetrate the grassroots level to investigate and supervise, personally grasp some class examples, analyze and study, and promptly discover and resolve questions, within a short period of time it will be possible to complete the rehabilitation of unjust, framed-up, and misjudged cases efficiently.
>
> Rehabilitating unjust, framed-up, and misjudged cases and implementing policy are important for the strengthening of stability and unity, the promotion of prosperity in all fields, and the achievement of long-term public order. Party committees at all levels should certainly see this work through well so as to mobilize the initiative of the people better to promote the four modernizations with all their strength.

Reporter Lei Lixing [7191 0500 5887] reports that the large-scale rehabilitation of unjust, framed-up, and misjudged cases, begun by Guangdong Province in 1978, has made significant achievements, and throughout the province a general situation of stability, unity and prosperity in all fields and a very good situation has appeared.

To heal the wounds left by 10 years of disruption and to resolve a series of urgent political and social questions, the Guangdong Provincial Party Committee began a rectification campaign in June 1978 and started working to rehabilitate unjust, framed-up, and misjudged cases and implement various policies on a provincial scale. For 2 years now, the Guangdong Provincial Party Committee has grasped this work firmly, carried out supervision and promotion promptly, and adopted effective measures to make the work proceed step by step. Now the overwhelming majority of unjust, framed-up, and misjudged cases in the province, no matter which first-level organization or which leadership group is involved, have been basically rehabilitated and corrected by seeking truth from facts. Over 600 framed-up cases involving collectives of over 50,000 people have all been corrected. Counterrevolutionary cases judged while Lin Biao and the "gang of four" were running rampant have all been réinvestigated, and over 9,000 cases among them which were unjust, framed-up, or misjudged have all been rehabilitated. Of the more than 8,000 unjust, framed-up, or misjudged cases which came about because of "overseas relations," 93 percent have been rehabilitated. During the 10 years of disorder, a large group of cadres in the province were put on record and investigated, incorrect conclusions were drawn with regard to many cadres, and many were punished mistakenly; however, they have now been reinvestigated, the incorrect conclusions have been corrected, and over 7,100 of them who were dismissed from their positions, expelled from the party, or expelled from public office have had their punishment voided or reduced.

The so-called "strategic dispersal" of September 1966 and the "two withdrawals and one insertion" of 1970 (forcing cadres to withdraw from office, to withdraw from employment, and to go and settle in the countryside) forced over 29,000 cadres to withdraw from office and disperse. For the past few years this has been undergoing correction, so that now those who are able to work have been brought back and work has been found for them. Of the more than 4,000 cadres who were mistakenly punished and ordered to resign after the "four clean-ups movement," over 80 percent have already been recalled.

Investigations have been conducted everywhere of the cadres who met unusual deaths because of the fascist dictatorship, the "down with everything," and the "comprehensive civil war" incited by Lin Biao and the "gang of four," with the result that new conclusions have been drawn regarding 99.5 percent of the deceased. Work to rectify the cases of those who were mistakenly termed rightwing elements in the province has already been completed, and many useful, talented people once again have secured employment. Last year, throughout the province, the removal of labels from the four kinds of elements who have reformed was comprehensively completed.

To see to it that policy is implemented well, in May of this year the organization section of the provincial party committee held a conference on implementing cadre policy, in which responsible comrades from local, municipal and provincial organs participated to compare the supervision of policy implementation, to discuss 13 classic cases of failure to implement policy, to mobilize everyone to look for places untouched by the movement, to raise questions, to look for causes, and to demand that everywhere within a month or two--after reexamining cases which are still designated as contradictions between the enemy and us and involve expulsions from public jobs and the party--a very careful attitude be adopted and, one by one a comprehensive examination be carried out again in accord with the demands of the Central Committee.

Now throughout the province they are still stepping up the conclusion of policy implementation. The key point of the work is to reexamine the over 370 cases and over 2,200 persons who, after investigation, were still declared cases of contradictions between the enemy and us and were expelled from public jobs and the party. Each case will be "reconsidered" and reexamined. The Guangdong Provincial Party Committee emphasizes that we should certainly learn the correct handling of contradictions among the people and absolutely not allow confusion of the boundaries between the two kinds of contradictions, and that we should certainly treat correctly those cadres who have made mistakes.

IMPORTANCE OF THE PARTY AFTER THE REVOLUTION EXPOUNDED

Beijing GUANGMING RIBAO in Chinese 26 Aug 80 p 4

[Article by Dai Xueji [2071 1331 4402]: "On 'the Revolutionary Army Rises; the Revolutionary Party Vanishes'"]

[Text] "The revolutionary army rises; the revolutionary party vanishes" was a slogan which once produced a considerable influence. Reportedly it was originated by Zhang Taiyan [4545 1132 3508] after the Wuchang Uprising, but the truth was never clarified.[1] At a speech on 10 October 1933 in Suzhou, Zhang Taiyan openly declared: After the Wuchang Uprising, when Huang Xing [7806 5281] was in Hanyang, he "consulted me on expanding the Tongmeng Association. I answered him with: 'The revolutionary army rises; the revolutionary party vanishes.' Keqiang [0344 1730] did not accept it."[2] One may say that it was the strongest evidence to attribute the slogan to Zhang Taiyan.

Zhang Taiyan was in Japan during the Wuchang Uprising. A little more than a month later, in the latter part of the 9th month of the lunar calendar (mid-November, solar calendar), he returned to Shanghai. Huang Xing arrived in Hankou on the 7th day of the 9th month (28 October) to take charge of the war. On the 12th day of the 9th month (2 November, solar calendar), the Qing army fought its way into the urban area of Hankou, and the revolutionary army retreated to Hanyang. From then until the 7th day of the 10th month (27 November, solar calendar), during the 20 plus days when Hanyang was in enemy hands, Huang Xing remained in Hanyang in command of the revolutionary army. It should be at this time that Huang Xing consulted Zhang Taiyan on "expanding the Tongmeng Association." Zhang Taiyan, by replying that "the revolutionary army rises; the revolutionary party vanishes," advocated abolishing the Tongmeng Association which led the Revolution of 1911.

Not long thereafter (between 5 days and 1 month), on the 12th day of the 10th month, lunar calendar (2 December, solar calendar), in his telegraphic reply to Tan Renfeng [6223 0086 7685] and others in Wuchang, Zhang Taiyan reiterated the slogan and his views. The full text of the telegram is as follows: "Military governor of Wuchang and Messrs Tan Renfeng and others: Received your telegram. The revolutionary army rises; the revolutionary vanishes. The country belongs to the people. Only thus will the difficulties be overcome. According to your telegram, by rallying the revolutionary party members with the revolutionary party members, you wish to organize the government with one party. If you adhere to this view, popular support will disintegrate. If you can fight, fight. If not, do not disrupt the overall situation with party views. Zhang Binglin [4545 3521 7792]. Wen."[3]

It was not a personal communication, but a telegram in plain code, and published in the newspapers. Therefore, it produced a great influence. The feudal bureaucrats and politicians rose up and responded. Zhang Jian [1728 6190], a leadership figure of the Constitutionalist faction, wrote Huang Xing and declared arrogantly: "In short, it is urgent to unify military affairs, and the most important premise for doing so is to abolish the name of the party as proposed by Zhang Taiyan. This requires confidential planning between you and Mr Sun Yat-sen, to be formally announced by Mr Sun and you."[4] It was rare for a leading figure of the Constitutionalist faction to make such an open demand to a leader of the revolutionary faction to "abolish the name of the party," i. e., to dissolve the organization of the Tongmeng Association. One can imagine the rampancy and arrogance of this force in society at that time.

Not long thereafter, on 25 December 1911, Sun Yat-sen arrived at Shanghai from abroad. The moment he landed, he immediately sensed the gravity of the atmosphere. He said: "I arrived in Shanghai in December, and I sensed an odd atmosphere. What was it? It was the saying that 'the revolutionary army rises; the revolutionary party vanishes' spread by certain bureaucrats and revolutionary party members. At that time, the idea permeated the environment and raised an echo everywhere, and was unbreakable. I was indeed baffled."[5] At that time, the headquarters of the Tongmeng Association had moved from Tokyo, Japan, to Shanghai and emerged from underground. To boost the revolutionary morale and clarify the fighting goal, the association, under the leadership of Sun Yat-sen, held discussions, formulated a provisional constitution and made a declaration. Pinpointing at the situation discussed above, the declaration stated: "Hanyang has now fallen again, and the enemy troops are still in evidence. The outcome is unpredictable.... Yet the cowardly in our party spread the saying that 'the revolutionary army rises; the revolutionary party vanishes' and openly published it in the newspapers.

It is most odd. Not only failing to understand the pros and cons, but they are ignorant of the principles upheld by this association .... Like a cornered tiger, the prime culprit has not been exterminated, and the success or failure cannot be foreseen. Even if successful, would the responsibilities of our party end here?.... Our party does not uphold just nationalism alone."[6]

Without naming names, but only mentioning "the cowardly in our party," it was actually referring to Zhang Taiyan's telegram which was "openly published in the newspapers." At this time, Zhang Taiyan had left the Tongmeng Association and joined the Constitutionalists and the old bureaucrats. His views actually reflected the demands of the conservative forces and suited the needs of the old bureaucrats and the Constitutionalists. Sun Yat-sen was a sincere democratic revolutionary. He adhered to the Three People's Principles, struggling for them until the final end. Meanwhile, he paid serious attention to the active role of the revolutionary political party, and felt that "party affairs are the originating cause of the revolution; before the success of the revolution, the party must serve as its life; after its success, the party must absolutely be used to maintain it .... Running the party is more important than anything else."[7] Therefore, he strongly opposed the slogan that "the revolutionary army rises; the revolutionary party vanishes" and the view represented by it. Until the end of his life, he gave serious attention to the building and reinforcement of the revolutionary political party organization. In the important speeches in his late years, time and again he stressed that the revolutionary party was the root of the state. "We must pay special attention and properly cultivate the root." Once more he opposed the slogan that "the revolutionary army rises; the revolutionary party vanishes," pointing out its grave dangers to the revolutionary cause. In his speech entitled "We Must Create a True People's Republic of China" of 16 May 1920, for instance, he said: "I feel that, no matter at what time, when the revolutionary army rises, the revolutionary party must not vanish."[8] In his inauguration speech at the first national congress of the Chinese Guomindang held in Guangzhou on 20 January 1924, he again said: "What kind of deception did we suffer from the Qing bureaucrats? The mind of the comrades in general was too simple. They saw that, after the Wuchang Uprising, all the provinces unanimously supported the revolution, and the bureaucrats who had opposed it also endorsed it. Therefore, the revolutionary party, a minority, was encircled by the large number of bureaucrats. Those bureaucrats said: 'The revolutionary army rises; the revolutionary party vanishes.' The revolutionary party at that time also endorsed this view. Thereupon, everyone agreed in unison. Today, we have only the world of the warlords, but not the achievements of the revolutionary party. Therefore, the revolutionary party remains unsuccessful even now. It is the main reason for our failure."[9] Here, though Sun Yat-sen mistook the Qing bureaucrats as the originators of the slogan, the lesson of failure of the 1911 Revolution summarized by him was significant. In other word, after the Wuchang Uprising, the revolutionary party members, under the influence of the slogan, rashly compromised with the bureaucrats, warlords and politicians, who were the representatives of the feudal force.

Zhang Taiyan was the originator of the slogan. That it won the support of a considerable number of the people in the revolutionary faction and became a tool of the bureaucrats, politicians and Constitutionalists was not incidental. By refusing to accept it, Huang Xing indicated that he did not endorse it. Realizing its error and danger, Sun Yat-sen immediately took charge of the meetings of the headquarters of the Tongmeng Association, made known of his attitude in his statements, and repeatedly warned against it. It indicated that, though Sun and Huang, as representatives of the bourgeois democratic revolutionary faction, were unable to emancipate themselves from the weaknesses and the tendency toward compromise inherent in the class represented by them and made various mistakes, on the momentous issue of the revolutionary political party leading the revolutionary cause, a fundamental split occurred between them, especially Sun Yat-sen, and Zhang Taiyan. It was also an important factor for their parting of the ways later on, the former progressing continuously and remaining revolutionary from beginning to end while the latter becoming ever more conservative and regressive and reverting to the old ways.

PARTY AND STATE

RESPONSIBILITY SYSTEM, OWNERSHIP SYSTEM DISCUSSED

Beijing RENMIN RIBAO in Chinese 21 Jul 80 p 2

[Article by Zhang Guangyou [1728 1639 0645]]

[Text] Not long ago, I accompanied a responsible comrade from the Chu County Party Committee to the countryside. Explaining conditions, he said that there is a knack in inspection work. Wherever you go, there is no need to ask around, because you would know how the responsibility system is working as soon as you look at the fields. Where do you look? First, you look at the quality of the farm work. For example, are the people there milling around in groups, doing half-hearted work, leaning on their hoes and watching the fun wherever it comes from? Then you know without question that they are "working in a sloppy manner." Conversely, if there are relatively few people working in a sullen mood, and when a car passes by, it is ignored by many who continue their work without raising their heads, then you know without question that the responsibility system is working well there. Bearing in mind the experience of this leading comrade, I visited a number of communes and brigades, and found that he was right.

The facts prove that today, under conditions where primarily manual labor is used, if a division of responsibility is implemented, the same farm task will generally be carried out with higher efficiency and better quality if it is done separately rather than collectively. The more specific and clear-cut the responsibility system, the better the results. Nevertheless, some people often fail to distinguish between the scope of the ownership of the means of production and the scope of labor organization in production, taking them as one and the same. For these people, it seems that the more people work together, the more advanced the farming system is, and a division of responsibility calling for fewer people working together is a "retrogression." That is an important reason why a number of localities have been unable to overcome "working in a sloppy manner" in production over a long period of time. Actually, the size of a labor organization in production, such as a team, a household, or a person, should be determined by the need to boost labor efficiency and by the farming requirements as well as the technical and equipment factors. For example, while weeding and thinning work in corn fields may be done individually, sowing should be done collectively. Furthermore, results of sowing by draft animals and by machines are different. The scope of production organization should therefore be different according to farming and production conditions and be determined by production requirements. Therefore, the size of a production labor organization and the number of people involved are by no means indicative of an advanced or backward way of farming. The higher the level of automation in industrial production, for instance, the fewer the workers. But one can't refer to automation as retrogression to individualism. It takes two people to operate an ox-drawn plow (one to lead the ox and one to hold the plow), quite a few people to operate a human-drawn plow, but only one person to drive a tractor. Which is the more advanced way of farming?

Division of labor and cooperation reflect the superiority of collective economy. The reason why the socialist system is superior is that the means of production are under public ownership and production can be organized based on the needs of production. If there is no clear-cut division of labor and a responsibility system, then work is done in a "sloppy manner," and in the manner of "a swarm of hornets," making it impossible to bring into full play the superiority of a collective economy. "Working in a sloppy manner" and in the manner of "a swarm of hornets" are the results of the ultra-left line in rural areas. They have produced serious and disastrous results in production. The masses have long been utterly disgusted with them, condemning such practices with the following verses: "Riding in a fancy boat, beating a big drum, when the drum is broken, it is at collective expense," and "In starting work, one waits for others, in the course of work, one watches others, and in quitting work, one beats others," and so forth.

The division of labor and individualism are two totally different concepts. However, a number of comrades often are accumstomed to looking at the surface of a problem, taking "doing work in a sloppy manner," and in the manner of "a swarm of hornets" as being "large in size and collective in nature," while referring to the division of labor as "working based on individualism." In the past, a few photographs and movies in reflecting the vigor of the masses in production usually showed a sea of people running with baskets on poles, and it seemed that if this wasn't the case then there was no reflection of the vigor of the masses. Actually, that was just a show to impress the audience. If any consideration is given to economic results, in no way should real production be done in that manner.

LIVING CONDITIONS OF SANSHAN PRODUCTION BRIGADE FISHERMEN IMPROVED

Beijing RENMIN RIBAO in Chinese 21 Jul 80 p 2

[Article by correspondent Liu Heng [0491 5899]: "The Sorrow and Joy of Fishermen at Sanshan Production Brigade"]

[Text] The fishermen of the Sanshan Production Brigade in Echeng County, Hubei Province, often used to recall the suffering of the old society and think over the source of their present happiness. Now they recall the sadness of "reclaiming lake bottom land for crop use," and think over the joy of adapting methods to local situations.

Arduous but without Building an Enterprise

There are more than 480 households consisting of more than 2,730 people in the Sanshan Production Brigade. During the 10 years of the Great Cultural Revolution, young girls would think of marrying and going away even before they were old enough to marry, and only slightly more than 10 males were able to find a wife. Girls from other places were unwilling to marry into the area. They said, "We don't dislike your men, and we don't dislike your homes, but we do dislike going to Sanshan and becoming mired in the mud!"

Sanshan had once been an island in a lake where one saw mountains immediately upon coming out of his door and where one had to take a boat to go anyplace. The people did not have a single fen of fields or a single mu of land; all they had was 100,000 mu of water surface. Generation after generation depended on the water for wealth and on fishing for a living. Before Liberation, the Sanshan Lake was forcibly occupied by "lake owners." "The waters of Sanshan are very, very deep. The Sanshan fishing island is a hell. With broken boats and rotten nets, it is difficult to pay one's debts. Nine out of 10 households are heartbreakingly hungry." Following Liberation, the fishermen made a new start in life and their livelihoods became better. For every mouthful of fish, they had a mouthful of rice. Without fish, they would not eat rice, and without cakes they would not drink tea. In 1962, they caught more than 1.16 million jin of fish for an average of about 500 jin per person.

But as everyone knows, good situations do not endure for long, and in 1965 a gust of wind came blowing. "Rivers and lakes are no good for growing grain. This is not learning from Dachai!" The fishermen were forced to tear down hills to build dikes, and the fishing boats were obliged to haul rocks and dirt. By 1969, 7 hills had been hauled away, 3 mountain tops cut off and 7 truckloads of piles driven. The south dike was 16 li long, 5 meters wide and 4 meters high, and then construction of the north dike began. But the fishing nets became nests for rats, and the fish hooks became like rusty nails. More than 270 of the more than 380 fishing boats were destroyed. The fishermen could only swallow their sadness and say: "The brigade is really finished by the blind blocking of the lake. A dike taking 3 years has been built; the boats have been smashed and capital lost!"

The old fishermen who sighed at the times--those who could tell how deep the water by looking at its color, or how numerous the fish by listening--never dreamed that the day would come when they would have to till the fields. Standing before these several thousand mu of newly made fields, heroes with no place to display their prowess, they did not know what to do with their hands and feet. The sesame was planted on 15 March, and both the early and late rice were planted at the same time. Stones rolled around and seedlings were pulled from a handful. The early rice ripened early, and the barnyard millet grew into something that looked like gaoliang. Later on several wives from the grain belt were brought in to take charge of brigade affairs, but this was still of no help.

The mud lay so deep in the lake fields that neither machines nor oxen could be used to plow them. Instead, people had to drag the plows and pull the harrows. Men sank into the mud above their knees, so all they could do was crawl on all fours. Saddest of all was in July 1975 when the great dike ruputured, drowning the early rice crop and filling the fields with madly jumping fish. A person representing the higher authority said, "Can fresh fish take the place of rice? It is better to grow grain!" "If grain is not raised to a higher plane, nothing else matters!" They pressed the fishermen in this way to drain the water away and plant a mid-season crop of rice. The fish fell dead everywhere and stank for several months. The fishermen cried within their hearts: "Firewood that has been fetched for a thousand days is burned in a single blaze; the travail of a thousand years is washed away by a single surge of water. Beating ducks to get them to roost is like having one's heart cut with a chopper." One dark night, Yuan Jinzhou [5913 6855 3166] and fishermen from 8 households slipped away in a boat when no one was aware, fleeing to the aquatic products breeding farm at Pengze County in Jiangsi Province. Later on another seven families also fled.

Who knew of the sadness of the fishermen from Sanshan? In 1969, the deeds of the fishermen from Sanshan appeared in the newspaper. The newspaper praised them as models for "building an enterprise through arduous effort." The fishermen didn't know whether to laugh or cry. "The newspaper told only half the truth! Arduous we were indeed! But it was arduous without building an enterprise. Instead, it was the destruction of an enterprise--the destruction of the fishing enterprise of our forefathers that has been followed for several generations!"

Restoration of the Forefathers' Enterprise and the Growth of the Forefathers' Enterprise

As of September 1978, the fishermen of Sanshan made another new beginning and had another liberation. The old secretary of the brigade, Li Xiangqian [2621 0686 0467] said, "Because of the climate, the productivity of the soil and the will of the people, the County CCP Committee has decided that we should be fishermen primarily. 'Anyone who has water but does not drink it, preferring to move a mountain instead, or anyone who has gold and does not dredge for it but smelts copper instead is a big fool.'"

The entire brigade became very spirited at once and people spoke out one after another. Everyone wanted not only the restoration of the ancestral enterprise but growth of it as well. Formerly they had only fished but did no breeding. Now they both fish and breed. Formerly they did nothing but fish and did not farm. Now they both fish and farm. The better fields have been brought to maturity and after more than 10 years of flailing around, quite a few people have learned to farm. "Having turned one big corner, they are unable to turn still another big corner."

Old fisherman, Yuan Zhisheng [5913 4249 4141] had stayed at home for several years. He said, "Learning to play a bugle at 80 years of age. Nothing doing!" Now he has returned once again to pulling the oars on a boat. More than 50 old men in the brigade who had not gone to work for many years have come out to pitch in, giving their strength and donating their knowledge to the fishing industry. They say, "Now that the road is straight and the winds smooth, the will will come." Fourteen of the 15 households that fled with Yuan Jinghou have returned.

The production brigade has prescribed scientific farming and the breeding of fish according to plan. On high ground there is farming; in shallow places lotus is grown, and in low places fish are bred. Fish breeding stock farms, pearl propagation farms and fields for the growing of fish food are being operated, and ponds for raising superior quality fish have been dug. The production brigade and 10 small teams have set up a fishing organization. Avenues for production are numerous. Those who can make beams make beams, and those who can make pillars make pillars, with everyone having some place to display his talents. Within a year's time, the old vitality has been restored. Within 10 years one will be unable to see a single poor fisherman. Last year average per capita income was 154 yuan. Additionally, they have cleared up 100,000 yuan in debts. More than 30 families have built new houses. In last year alone, more than 50 couples were married, and there will be more than that this year. On even-numbered days, people frequently marry and invite everybody to see a movie. Formerly the fishermen would not be able to see more than three or four movies a year. Now they see three of four movies a month when people invite them to marriages plus when the brigade has screenings.

"The reclamation of lake bottom land for the growth of crops was overdone." It was not just the Sanshan Brigade alone that suffered this sorrow. There are 1,000 lakes in Hubei Province, and as of 1977 only a lake-surface area of 4.3 million mu remained, a decrease of 8.1 million mu since the 1950's, accompanied by a major decrease in the amount of aquatic products. Authorities concerned in Hubei Province are in process of taking vigorous measures to correct these mistakes and some preliminary results are already apparent. The Sanshan Production Brigade is one example. It is believed that in the not too distant future, through the Wuchang Fish Production Site, Hubei Province will become in fact as well as in name a land of fish and rice.

NEW MILITIA COMPANY COMMANDERS MUST REPLACE OLD ONES

Hangzhou ZHEJIANG RIBAO in Chinese 26 Jul 80 p 3

[Letter to the editor from Xia Zhenhong [1115 6966 3163] of the People's Armed Forces Department of Dongtou County: "Militia Company Commanders Must Also Be Reelected"]

[Text] Comrade Editor:

When we went down to the basic level to help reorganize the militia companies, we discovered that the company commanders of some units had been in their posts for a long time, that there had been few reelections, and that some comrades had held their posts since the company was first formed, over 20 years ago. When questioned as to the reason for this, the reply was that the company commanders had not made any mistakes and that change was undesirable.

For the time being we will not discuss whether or not older men should be selected to be militia company cadres. What is said here is that there need be no reelection if the company commander has not made a mistake. This is incorrect. The great majority of the broad ranks of our militia cadres on the first line of battle are good and they make few mistakes. If we were to wait until a mistake is made before having a reelection, then wouldn't the leading group in our party's armed forces become an old folks' home? Again, from the viewpoint of armed forces work, the militia company commander who in a future war would directly lead the militiamen must accomplish his battle mission under all sorts of complex conditions, and if he is not a sturdy young man he will not be qualified to do so. For this reason, we hope that young men who love militia work will be selected to be company commanders as quickly as possible, in order to meet the requirements of the four modernizations and of opposing a future war of aggression.

MILITARY AND PUBLIC SECURITY

EDUCATION ON 'HOW TO BE A GOOD MILITIAMAN' LAUNCHED

Hangzhou ZHEJIANG RIBAO in Chinese 26 Jul 80 p 3

[Article by Wang Huayou [3769 5478 0645]: "Militia Company of Guangming Production Brigade Launches Education on Being a Good Militiaman"]

[Text] The armed militia company of the Guangming production brigade, Shijiao commune, Dinghai County, has launched an educational campaign on "how to be a good militiaman." Its methods are:

Starting from reality and making rational dispositions. The company holds separate meetings for its cadres and key members in which the ideological state of the militiamen and the current situation in production is conscientiously analyzed. Starting from the actual conditions, viz, busy production, many sideline occupations in peasant households, and tight time schedules, the company, considering both the interests of the collective and of the individual, makes the following concrete dispositions: 2 evenings are set aside every 5 days, 1 for class and 1 for discussion. Neither of these two activities exceeds 1.5 hours, and this satisfies all parties and is supported by everybody.

Keeping in contact with reality and solving problems. During peacetime a small number of militiamen are not enthusiastic about taking part in militia activities, fearing that their household sideline production will be adversely affected. In this educational campaign, the company leads the militiamen to correctly deal with the relationship between the interests of the revolution and the interests of the individual, making everyone understand that to be part of the militia and defend the motherland is the sacred duty and necessary obligation of every revolutionary youth, and that it cannot have an economic price tag. Countless martyrs have heroically given their precious lives for the liberation of the Chinese people and for the reconstruction of their country. By learning from the revolutionary martyrs' unselfish and fearless spirit, the militiamen will have aspirations and ideals, will love and defend the motherland, and will strive hard to make many contributions to building it into a great and powerful motherland. Squad leader Fang Yangguo [2075 7402 9048] makes use of the time during morning and evening when he is at home to make unfired bricks, and this sideline gives him a profit of 1 yuan a day. But he correctly handles affairs and makes appropriate arrangements so that he can vigorously take part in all militia activities.

Taking forms of many kinds, being vivid and lively. 1) The education is linked on a regular basis to political and ideological work. In the classroom facts are laid out, reasons presented, and enlightenment and guidance given. After class, there are separate heart-to-heart talks with militiamen who have ideological problems, and visits are made to households, and enlightenment and guidance are given. 2) The education is linked to the outlook on life, thereby increasing everyone's sense of honor and sense of responsibility in being militiamen. 3) The education is linked to learning from heroes and commending the advanced. Combining the education with the semiannual inspection of militia work, the company assessed six persons as being advanced militiamen, giving everyone examples to learn from and targets to shoot at. 4) The education is coordinated with the use of radio broadcasts and the teaching of revolutionary songs, thereby heightening everyone's interest and increasing results.

MILITARY AND PUBLIC SECURITY

BRIEFS

TRADITIONAL WARFARE TRAINING--Jiangshan County is located in a mountainous area of southern Zhejiang. It is along the railway line, has low mountains with gentle slopes, and has convenient communciations. In case war breaks out, it would be a strategic point where infantry and tanks could fight in coordination. Focusing on these features and on the militia's mission in opposing a future war of aggression, the People's Armed Forces Department in the county has paid much attention to training the militia in traditional combat methods. The department has organized a militia squad in the Xingfu production brigade of the Hecun commune to train at selected test points in laying mines and mounting ambushes. During the training the method of "studying theory, explaining the main points, demonstrating by actions, dividing the mission into parts, and summing up the actual practice" has been adopted. After a short period of study and training, the militiamen have become fairly proficient in theoretical knowledge and operational essentials. In an on-the-spot maneuver, they attained excellent results. After making an initial assessment and summation of the experience in launching this type of training, the department is preparing to combine it with production and gradually introduce it throughout the county. [Text] [Hangzhou ZHEJIANG RIBAO in Chinese 26 Jul 80 p 3] 9727

MILITIA CADRES MASTER WEAPONS--By strengthening self-training, the People's Armed Forces Department of Lishui County has mastered 12 weapons. The weaponry of this department is constantly being replaced and is of a great variety. The old cadres were unable to use the new weapons, and the new cadres were unfamiliar with the old weapons. Many cadres could not drill with their weapons or fix breakdowns in them, and this adversely affected militia work. The department's party committee, feeling that in order to give the militia good training, they themselves should first master the weapons, began to train with the weapons then available. The leaders of the department, along with everyone else, crawled, climbed, rolled, and attacked with these weapons, hand in hand teaching themselves. After a period of concentrated training in the first half of this year, they all understand the use and function of 12 types of weapons, were able to break them down and reassemble them, and in a live ammunition firing exercise achieved an overall appraisal of excellent with 8 types of weapons. HIGHER EDUCATION REFORM MUST MEET NEEDS OF SCIENCE

Beijing GUANGMING RIBAO in Chinese 5 Aug 80 p 2

[Article by Yu Chengzhou [5713 2110 3166], Feng Zhijun [7458 0037 3182], and Zhang Nianchun [1728 1819 7279] of the Natural Dialectics Scientific Studies Research Office, Shanghai Railway Institute: "Development of Modern Science and Technology and the Reform of Higher Education"]

[Text] Since the 1940's in the 20th century, science and technology have made great strides in development. How, in this scientific and technological revolution of unprecedented scale, higher education as a scientific potential should carry out necessary reforms is a very important question facing the people. Here we would like to provide a rudimentary exploration as to the direction of such reform of our higher education in conjunction with the developing situation with respect to science and technology.

1. The occurrence of "knowledge explosion" requires that higher education, on the premise of transmitting basic knowledge, place its emphasis on the training of the student's intellect.

The rapid and vigorous development of modern science and technology leads to a precipitous increase in scientific knowledge in a short period; this phenomenon is symbolically called "knowledge explosion."

This phenomenon of a "knowledge explosion" poses a serious challenge to the "warehouse theory" in pedagogy. The "warehouse theory" holds that "the brain is the warehouse for storing facts," teaching means filling up this "warehouse" with knowledge, and to learn is to harvest knowledge; the more facts one learns, the more knowledge one harvests, the more one becomes learned. Hence, the "warehouse theory" pays a great deal of attention to memory.

Scientific research indicates that the cerebrum has four functional areas: one is the receptive area, which receives sensual perceptions from the outside world; the second is the storage area, which collects and systematizes such sensual perceptions; the third is the critical area, which appraises the new information received; and the fourth is the imaginative area, which combines existing knowledge with the new information in accordance with the new mode. From this, we can see that the storage function is but a part of the cerebral functions; if we merely regard the cerebrum as a "warehouse for storing facts," we are likely to cause an exaggeration of its storage function and suppress its three other functions. But plenty of facts in the history of science prove that it is impossible for those who lack the critical and the imaginative faculties to make outstanding contributions to scientfic enterprises.

Even more important is the fact that this "knowledge explosion," with new knowledge surging forth in mountainous waves, makes it impossible for this "warehouse," the cerebrum, to accommodate such huge amounts of knowledge. According to the statistics of West German scholar (Hagen Beinhauer] "a scientist today, even if he works day and night, can only read 5 percent of the world's publications in his special field." Foreign data in psychology indicate that the amount a college student remembers from listening to an academic report is reduced to 30 percent after 6 days, and to only 20 percent after a month. Therefore, even if a college student puts his life on the line in studying, he still cannot study, or remember, all the knowledge he will need in his future work. Consequently, the simple transmission of knowledge is no longer the only function of higher education. It is necessary, along with the transmission of knowledge, to pay attention to training the student's intellect, to train the person receiving education to come up with a complicated structure of knowledge, and thereby help the person receiving an education to master the interrelationship between various kinds of knowledge, effectively control his knowledge, and make it useful. Simply put, the purpose of education is not to proffer "gold" to the student but to teach the student the "golden touch." To train a student's intellect is mainly to train his ability to think, his ability to express himself, and his ability of organization and management.

The ability to study by oneself includes the ability to read academic works and scientific and technological journals, the ability to search for documentary data and scientific and technological journals, the ability to search for documentary data and scientific and technological information, and the ability to use many kinds of study tools with dexterity. To train college students to study by themselves today is equivalent to raising the efficiency of scientific research tomorrow. The ability to conduct research includes the ability to observe objective things and documentary data and analyze them, the ability to carry out basic experiments, and the ability to come up with pertinent designs. The ability to think includes the ability to appraise, the ability to create, the ability to imagine, and the ability to summarize and generalize. Ability of expression means ability of oral expression, ability of written expression, ability of expression by curves and charts, and ability of expression by mathematical calculations. And the ability to organize and manage includes the ability to draft plans, the ability to make decisions, and the ability to provide direction and control. Practice in scientific research has proven that if a researcher lacks the specific ability to draft plans, to make decisions, and to provide direction and control, he will be incapable of undertaking scientific research.

In a word, modern higher education should, along with "transmission of knowledge," put emphasis on training the student's intellect and, in the process of educational reform, carry out exploration in a deepening way in respect to such areas as how to strengthen basic training, select choice teaching materials, guide the students in methods of study, strengthen scientific experiments, etc.

2. The acceleration of the "knowledge-obsolescence cycle" requires that higher education strengthen basic theoretical education, continuously refurbish its programs, and stress "lifelong education."

Since the beginning of the present century there has been a rapid increase in new scientific and technological achievements. Some people in foreign countries think that the new discoveries and new inventions in science and technology since the 1960's have been more numerous than those of the past 2,000 years combined; in the field of space technology alone, more than 12,000 kinds of new products and new techniques which never existed before have appeared. Because of the rapid increase in the new achievements of science and technology, because of the reduction of the cycle from scientific invention or discovery to application, and because of the acceleration of the speed of obsolescence of new techniques and new products, the obsolescence cycle of scientific knowledge has also been correspondingly accelerated. According to available statistics, the knowledge-obsolescence cycle in the 18th century was 80 to 90 years; from the 19th to the 20th century it was reduced to 30 years; during the past 50 years it has been further reduced to 15 years; and today the knowledge-obsolescence cycle in some fields has been still further reduced to 5-10 years.

The acceleration of this knowledge-obsolescence cycle makes new demands on higher education. First of all, it is necessary to energetically strengthen basic theoretical teaching. Only by letting students master broad and profound basic theories and basic knowledge will it be possible for them to adapt more smoothly to the daily changing new situations after graduation. Secondly, it is necessary to continue to refurbish programs and renew the contents of teaching materials so as to enable students to master the newest scientific and technological knowledge.

Because of the accelerated development of science and technology and the concomitant acceleration of the obsolescence cycle, it is necessary to promote lifelong education. There are those in foreign countries who think that a college student can obtain only about 10 percent of the knowledge he needs while in school, and all the remaining 90 percent of knowledge can be obtained only if he continues to learn in his work. Therefore, to rely merely on what one can learn in school--that is to say, the concept of "one-time education"--is already out of date. We should advocate "repeated education," "lifelong education," and "learn as long as one lives"; otherwise, even if one excels with brilliance at one particular time, one cannot avoid eventually becoming "exhausted in one's talent" someday. Insofar as the educational departments are concerned, the duty of the teacher is to continue to bring the information on new technological achievements to the students; only thus can "a famous teacher foster highly talented students." Hence, the lifelong education of teachers in schools of higher learning is of important concern to us.

3. The high degree of differentiation and high degree of subject combination is one of the important characteristics of the development of modern science and technology. In the case of earlier natural science, the classification of subjects was relatively simple, but the classification of modern natural science has become more and more minute, and branches have become more and more numerous. In addition, subjects have come to penetrate and overlap with each other to produce many marginal subjects. At present, the classification of subjects numbers as many as 2,000. According to statistics of the U.S. National Research Commission and the U.N. Education, Scientific and Cultural Organization, today's basic science already has more than 500 principal specialties, and today's technological science provides 412 fields of specialization.

But nature is a unified whole--a multilayered, multistructured, multiseries, complete network. Along with the continued deepening of perception, the tendencies of comprehensive combination and general convergence of science and technology are becoming more and more conspicuous. Such developing tendencies require that the structure of higher education develop in the direction of a comprehensive combination and that it pay attention to the establishment of a "cross-subject" structure of scientific research and teaching. It must take advantage of the beneficial conditions of multiple subjects, versatile manpower, and complete equipment at the universities to energetically develop a multidepartmental organizational form, break down the historical barriers between individual departments and subjects, carry out comprehensive research, and solve together advanced scientific research projects which we can hardly conquer by relying on a single subject. Today, our higher institutions have also started to establish multidepartmental scientific research and teaching organizations, such as biomedical engineering departments, environmental science institutes, etc. Practice proves that establishing various comprehensive "cross-subject", or multidepartmental, organizational forms is one of the important measures in the reform of higher education.

Another research issue brought to higher education by the developing trend of the comprehensive combination of science and technology is how to treat the relationship between the training of "generalists" and the training of "specialists," and, along with the training of "specialists," what emphasis to put on the grasping of "generalist education." The so-called "generalist" means a talented person who has one or two special fields of knowledge but whose general knowledge is broad and foundation likewise solid. "Specialty" is real talent and genuine knowledge; "generality" is also real talent and genuine knowledge. The United States has done a five-year survey of the dissertations, achievements, and promotions, etc, of 1,311 scientists and discovered that not very many of them were "specialists" who were good only at single specialties, and that most of them got where they were by general talent and knowledge. Today, among the Nobel Prize winners not a few are "generalists" who are engaged in comprehensive studies. At present, higher institutions in foreign countries pay a great deal of attention to generalist education. In order to train "generalists," many universities stress the importance of comprehensive subjects when formulating their teaching plans, and strengthen "interdisciplinary" research. In the provision of programs, they stress the mutual penetration and overlapping of the arts and sciences, so as to make the contents of subjects comprehensive. In order to promote the mutual overlapping of the arts and sciences, they seek to reduce the number of credit hours of required subjects and increase those of elective subjects.

The provision of programs in our higher institutions was deeply influenced by the practice of the Soviet Union in the 1950's, with the arts separated from the sciences, and schools of the sciences separated from the schools of engineering. Areas of specialization were usually narrow, subjects numerous, and classifications too trivial. In order to accelerate the pace of reform in our higher education, it is necessary to organize "multi-departmental" teaching and scientific research institutions, strengthen the effort to make the contents of subjects comprehensive, experiment with the adoption of a credit system, increase the number of elective courses, and make arts and science subjects penetrate each other so as to train fine talents who are well adapted to the developing situation of science and technology.

4. Along with the continued expansion of the scale of scientific research and enterprise management, a demand is also made of higher institutions that they strengthen their instruction of knowledge of management and stress the training of management talent.

First of all, from the scale of scientific research, it can be seen that early scientific research work all consisted mainly of individual research, or required at most the participation of a few necessary assistants, and then everything could be carried out. In the latter half of the 19th century, along with the increase in subject classifications and the development of electric power industries, it had already become impossible to solve major scientific and technological problems by relying on the research of individual scientists. There thus emerged certain collective modes of research, which got scientists together for given research objectives; there also emerged research on a national scale and even research on an international scale. Because the scale of scientific research became larger and larger, there was a need to plan, to coordinate, to manage, and foretell [the need for] such research by scientific methods. For instance, what to research? what to develop? how to research? how to expand?... A series of questions like these requires the very service of management science. If management is well done, indeed, the results achieved may be twice as great as the effort put in, and sizable economic effects may also be brought about.

Next, from the continued expansion of the scale of enterprise management, it can be seen that the scale of early enterprises was relatively small and their structure was likewise rather simple. After an evolution and development of several hundred years, the enterprise scale of modern large-scale production is huge and its structure is complex. Hence, management science becomes increasingly important. Some scholars in foreign countries think that if the 19th century was the peak time for talented economists, then the 20th century has become the time for talented management personnel. They generally think that management is a kind of economic resource, and they call science, technology, and management the three legs of the tripod of modern civilized society. The Japanese call advanced production techniques and advanced management methods the two wheels of economic development, neither of which can be omitted.

In order to train high-ranking talent to engage in management, developed countries abroad make great efforts to establish management departments or management schools in their higher institutions of learning. For a long time we have neglected to train modern management cadres. Because of the 10-year catastrophe, the original pathetic number of management specialties and institutes of finance and economics were eliminated. At present, our students majoring in management and economics make up only slightly more than 2 percent [of the total]. This is not only an indication of structural confusion in education but also a reflection of the disproportionate development of the whole intellectual structure. In order to adapt to the demands of the four modernizations, we need not only readjust the structure of our management cadres in time and energetically promote professional personnel, but also carry out greater readjustment in the provision of specialties and plans for student recruitment at our universities. Otherwise, we will lack successors in these areas.

For this reason, we must create conditions and select key points to steadily establish management institutes or management departments at comprehensive universities and universities of sciences and engineering. The goal of training in question should be to equip the students with the basic technical knowledge of product design and production techniques, to help them master the basic theories and methods of modern management and technical, economic analyses, and to complete their basic training as engineers. Insofar as the sources of students are concerned, they should be just be recruited from among middle school graduates, but selected, rather, from professional, technical personnel or management personnel with 3 to 5 years of working experience at enterprise units and scientific research units. At the present stage, the point of emphasis should be on conducting various forms of advanced management training classes at universities; members of such classes should be personnel from the on-the-spot units. The course of study may vary--a half-year, 1 year, 2 years, and other periods. This approach assures quicker results.

5. The formation and perfection of scientific research systems require that higher institutions pay full attention to scientific research work

so as to elevate the quality of teaching in higher institutions and at the same time make contributions toward the improvement of the scientific and technological level of the state.

A scientific research system is made up of three parts: basic research, applied research, and developmental research. After the liberation of the whole country, we gradually established our own scientific research system, which was made up of five elements: the Chinese Academy of Sciences, higher institutions, production departments, national defense departments, and local scientific research organs. Over the years, this scientific research system has played a definite, positive role in the development of our scientific and technological enterprises. But we cannot help but admit that, because we lacked sufficient perception of the functions of the various links in the scientific research system, and because the division of labor between various scientific research organs in the scientific research system was not clear, we have left the structure of the scientific research system in a state of confusion, and this has resulted in great losses. As we explore reform of the scientific research system at present, there is a need to further define the division of labor and coordination between the five elements on the one hand, and pay full attention to the position and role of higher institutions in the entire scientific research system on the other hand. We think that the Academy of Sciences and the scientific universities should carry out mainly basic research (including pure basic theoretical research and goal-oriented basic research), and, under ordinary conditions, should refrain from undertaking applied research--and especially should stay away from any work on the study and manufacture of specific products. Research organs of production departments and engineering universities should concentrate mainly on applied research. Local research organs should lay emphasis on research work with geographical characteristics in mind.

During the past 30 years, research work in our higher institutions has made not a few contributions and also exhibited great potential. Hence, we must pay full attention to scientific research work and consciously combine teaching with scientific research. This not only is intended to raise the quality of our education, but it also is of very great significance for the development of our science and technology.

5. To anticipate the uneven development of science requires that the reform of our higher education should strengthen prognosticative research and continue to support new subjects adapted to the trends of development in science and technology.

Scientific research indicates that the function of science has undergone a great change; science has changed from "a daughter born" gradually into "a mother giving birth." Science has advanced ahead of production and, as a scientific potential, higher education should advance even ahead of science. Only thus can the students who are trained better adapt to, and promote, the advancement of science and production.

Education is the foundation of science and technology, and it also is a strategic intellectual investment. The position of education in the entire national economy is extremely important; if we cannot make a go of our education, the four modernizations will be amiss. If we fail to grasp today, we shall regret later. Let us conduct an all-round study and exploration of higher education from various angles and various sides and, along with a firm grasp on readjustment, carry out penetrating and widespread discussions as to how higher education should be reformed in order to turn education into a true force promoting the rapid development of science and technology, and in order to make the necessary contributions to the four modernizations.

NEWSPAPER SAYS PRC WON'T YIELD TO HEGEMONY

HK161106 Hong Kong HSIN WAN PAO in Chinese 15 Sep 80 p 1

[Unattributed "New Talk" column: "Though the Government Is Reformed, the Anti-Hegemony Stand Will Not Change"]

[Excerpts] When Zhao Ziyang was appointed China's new premier, the heads of state of various countries, including Soviet Premier Kosygin, cabled congratulations.

PRAVDA yesterday carried an article expressing the hope that the friendship between China and the "socialist big family" would be restored.

Western analysts believe that the Soviet Union took advantage of a change of premiers in China to send out trial balloons to seek reconciliation between the two countries.

In a speech delivered recently in the central Asian city of Alma Ata, which is 200 km from the Chinese border, Soviet Chairman Brezhnev said that momentous changes are taking place in China. While it is still too early to assess their significance, certain concepts relating to Mao Zedong Thought are being criticized. Speaking of the cultural revolution, he said it has been publicly denounced as a big disaster for the Chinese people.

The so-called trial balloons sent out by the Soviet Union which were aimed at deceiving its people, totally lack a sincere desire to improve relations with China. China has laid down four conditions for reopening Sino-Soviet talks. They require that the Soviet Union reduce its troops stationed along the Sino-Soviet border, withdraw its troops from Mongolia, stop giving support to the Vietnamese aggression against Kampuchea and pull out all its forces from Afghanistan. Moscow, however, has simply disregarded the Chinese conditions.

The logic followed by Brezhnev and other Soviet leaders is that as Premier Zhao Ziyang is charged with the task of promoting reforms. Although China is still influenced by Mao's ideas, the reforms will eventually bring about a China abandoning its role of ideologically opposing the Soviet Union and merging into the Soviet sphere of influence. This is utter nonsense, pure and simple.

China is determined to carry out reforms in its political and economic systems. This is based on and guided by Marxism-Leninism and Mao Zedong Thought and is diametrically opposed to the Soviet revisionism of oppressing the people at home and seeking hegemony abroad. China has long upheld its antihegemony stand.

After acknowledging Kosygin's message of congratulations, Zhao Ziyang at yesterday's banquet welcoming the Kenyan president spoke unequivocally against Soviet hegemony which gravely threatens world peace. Premier Zhao declared: "Peace cannot be won imploringly nor can war be prevented by making concessions." First of all China will not yield to hegemonists for the sake of peace.

SITUATION IN WESTERN SAHARA REVIEWED

OW121048 Beijing XINHUA in English 0753 GMT 12 Sep 80

[Text] Beijing, 12 September (XINHUA)--The war sparked off by the disputes over Western Sahara between Morocco and the Popular Front for the Liberation of West Sahara (Polisario Front) has recently flared up again after several months of tranquility.

Since the beginning of last month, a series of fightings between the two sides have taken place. Local observers point out that on the eve of the Freetown Conference of the ad hoc OAU Committee on the West Sahara, both sides are trying to get the upperhand on the battlefield to coordinate their diplomatic activities.

Guerrillas of the Polisario Front have since early last month intensified their attacks on the Moroccan troops. On 15 August, they penetrated into southern Morocco and once occupied the Sidi Amara village on the outskirts of Akka City. A communique of the front claimed that 127 Moroccan troops were killed. On 20 and 21 August, the guerrillas made attacks on [word indistinct] area near Tantan City in southern Morocco. 282 Moroccan troops were reported to have been killed and 300 others wounded. While the Moroccans said over 200 guerrillas were killed and 80 military vehicles destroyed in the encounter.

According to a communique issued by the Polisario Front, the guerrillas made 36 assaults last month, killing a total of 600 Moroccan troops and wounding 400 others.

On 3 September, the guerrillas in 400 military vehicles raided Tata City, 150 kilometres south of Agadir in southern Morocco, in the biggest and most penetrating attack in five months. The Moroccans declared that during the battle over 300 guerrillas were killed or wounded and 70 military vehicles destroyed. While the Polisario Front claimed that its guerrillas had once "besieged and occupied" Tata for several hours. They killed 212 Moroccan troops, captured 70 military vehicles and downed one F-1 mirage plane. Another communique of the front said that another F-1 mirage was brought down over Esmeyra in southern Morocco on 9 September.

The Polisario Front has for some time established bases in southern Morocco, and concentrated its troops to raid Zag and its surrounding areas. The two sides have been locked in fierce fighting. Zag, an important base of the Moroccan army, is 150 km from Algeria and 60 km from West Sahara. The area of several hundred square kilometres is formed of chains of rugged mountains and noted for its difficult terrain. If the Polisario Front could gain control of the area, it may cut the link between Morocco and West Sahara. Since November last year, Morocco has sent well-equipped mobile forces of 10,000 strong (the Polisario Front estimated the number at 20,000) in three mopping up operations in West Sahara and southern Morocco. In early March this year, in order to destroy the front's bases inside Morocco, the Moroccans used 7,000 mobile troops to mop up guerrillas in Zag, Tigsert River Valley and Ouarkziz Mountain, unleashing the most fierce fighting since the start of the West Sahara war. The Polisario Front declared in a war communique, it inflicted some 2,000 casualties over the Moroccan troops in the 10-day fighting. Since then, despite sporadic fighting, tranquility had prevailed in the region for 2 months. In early May a Moroccan mobile force of 10,000 again launched large-scale mopping up operations in the region. They opened a 30-km passage between Zag and Assa, and were joined by the isolated garrisson troops in Zag. The Moroccans claimed that they wiped out 450 guerrillas and destroyed 160 military vehicles in the campaign.

The recent situation on the battlefield showed that the Moroccan troops backed by air forces have strengthened mopping up operations while the guerrillas responded with surprise attacks by small teams. Obviously the guerrillas are powerless to win complete victory on the battlefield. But it is also difficult for the Moroccan troops to inflict heavy casualties on the Polisario Front. It seems the West Sahara war will be a long-drawn-out war of attrition, which will be a heavy burden to both Morocco and the Polisario Front and its supporters. Thus there is every reason to hope that all the parties concerned would be willing to seek a just solution to the conflict through peaceful consultations.

REPORTER VIEWS ANCIENT CHINESE TIES WITH KENYA

OW130754 Beijing XINHUA in English 0734 GMT 13 Sep 80

[Report by XINHUA correspondent Wang Dajun]

[Excerpts] Nairobi, 12 September--The port of Mombasa, the largest in east Africa, lies in southern Kenya on the coast of the Indian Ocean, 490 kilometers southeast of Nairobi.

Nationalization of the port of Mombasa took place not long ago. Not until January 1977 did Kenya establish its own authority over the port. The Kenyan people have since made fruitful efforts in running the port. Now all the 13,000 workers there are Kenyans.

Time-Honored Sino-Kenyan Friendship

While receiving this correspondent, mayor of Mombasa Mr Sumba said, "The people of Mombasa are familiar with China. Contacts between Kenya and China were started by our ancestors and the friendship between our two peoples goes back to ancient times."

What I saw during my visit to this port city with a history of over 1,000 years testified to the mayor's words.

In a visit to the museum in Fort Jesus in the old port of Mombasa, I saw among the exhibits dozens of Chinese porcelain, most of which are products of the Ming and Qing dynasties.

In the northern part of Mombasa, I saw the ruins of a "Chinese money shop." However, it is said to have been owned by Arabs instead of Chinese. It was so named because transactions were carried out with Chinese currency. On display in a museum there were some Chinese coins unearthed from the ruins of the bank.

Twenty kilometers north of Mombasa is Malindi, a port the well-known Chinese navigator Zheng He of the Ming dynasty had called at.

It is now a beautiful city receiving tens of thousands of western tourists a year. Half of the over 20,000 inhabitants of the city make their living in connection with tourism.

Although no sign of Chinese visitors to the place in ancient times remains, stories about such visits have been told from generation to generation.

SHANGHAI HANDBILL PROTESTS BRITISH WARSHIPS VISIT

OW171215 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT 16 Sep 80

[Text] During the recent visit to Shanghai by three British warships, handbills protesting the visit were found at Huangpu Port and in downtown Shanghai. These handbills reflect the people's sentiments. We will now relay, through our broadcast, the text of the handbill which was signed by (Zhang Fanji), a worker in Shanghai.

Comrades, brothers and sisters of the working class: The presence of the British imperialist warships in Shanghai is a great insult to heroic Shanghai. Look at what events have taken place in our country and you will invariably ask: Where are our country's leaders leading to? Seeing the British warships berthed at Huangpu Port will certainly infuriate you. They are by no means warships from a friendly country. They fly the flag of the great British empire, a flag which symbolizes British imperialist aggression against China over a long time.

Many years ago, Britain, Japan, the United States and other big powers, waving the shopworn banners of imperialist piracy and relying on their gunboats, cruelly suppressed Chinese patriots and revolutionaries. My father was a veteran worker in Shanghai. He told me repeatedly that British warships joined the sworn enemy of the people of our country in bloodly suppressing the uprising of workers of Shanghai in March of 1927. Warships flying the national flag of the British commonwealth opened gunfire on the living quarters of Shanghai's workers. My uncle and many other relatives died in the naval gunfire in Zhabei District on 21 March of that year. The arrival of British warships in Shanghai today is a great affront and insult to our revolutionary martyrs.

Comrades, brothers and sisters of the working class, my father told me that the people of our country have shed blood in their struggle to drive the British, Japanese and U.S. imperialist pirates out of our country. The return of the British warships, which were driven out from this country in 1949, is beyond imagination. What then was our heroic struggle and our bloody sacrifice for?

The British warships allegedly arrived in Shanghai on a so-called "goodwill mission" at an invitation extended to them by Deng Xiaoping. I would like to say that it would be extremely absurd for the dwarf Deng Xiaoping to consider the imperialists his friends. Comrades, is not what is happening in China today the bad consequence of the Deng Xiaoping line?

It is the dwarf Deng who has directed our country onto the evil road of forging friendship and alliance with the imperialists. It is he who invited the British warships to come to Shanghai, a city rich in revolutionary traditions. By so doing, dwarf Deng has openly buried the fruits of our revolution. Will the revolutionary people of Shanghai remain indifferent and silent? Let us shout: Down with the line of Deng Xiaoping who works hand in glove with imperialism! Proletarian Shanghai and our great motherland must remain red through and through.

JAPANESE KYUSHU YOUTH DELEGATION ARRIVES IN QINGDAO

SK160526 Jinan Shandong Provincial Service in Mandarin 2300 GMT 15 Sep 80

[Text] According to our reporters, the Japan-China Friendship Youth delegation from Kyushu arrived in Qingdao by ship on 15 September. The 420 visitors are headed by (Songtingyouyao), head of (Gongqi) county in Japan.

The steamer entered Qingdao harbor at 0800. The Japanese friends were warmly welcomed by responsible persons of the departments concerned including (Mu Zhou), deputy mayor of Qingdao municipality, and (Xu Tianrui), deputy director of the Shandong Provincial Foreign Affairs Office and chief of the Provincial Tourist Bureau, as well as by hundreds of other people.

In the morning, responsible persons and representatives of the delegation paid a visit to the Qingdao Municipal People's Government while other Japanese friends toured Qingdao City and scenic spots and planted trees symbolizing Sino-Japanese friendship in Zhongshan Park. At noon, the Qingdao Municipal People's Government held a party in honor of all members of the delegation. In the afternoon, they visited the Qingdao municipal workers' cultural palace and joined the workers at their entertainments. In the evening, after attending a soiree also sponsored by the municipal government, the Japanese [departed?] by special bus for a visit to Jinan municipality scheduled to begin on 16 September.

PAPER CARRIES COMMENTARY ON ZIMBABWE, SOUTH AFRICA

HK121344 Beijing RENMIN RIBAO in Chinese 5 Sep 80 p 6

[Short commentary: "A Powerful Counterblow"]

[Text] On 3 September, the government of Zimbabwe announced that it was breaking all ties with the South African authorities except trade relations. This is a just decision on the Zimbabwean people to defend their independence and security and prevent the racist South African regime from carrying out subversive activities in the country. When Zimbabwe gained its independence in April this year, Prime Minister Robert Mugabe declared that his government would maintain good neighborly relations with South Africa. But he also declared his government's opposition to South Africa's racist policy. While pledging noninterference in the internal affairs of South Africa he also demanded the same from the latter. This wise policy has won appreciation at home and abroad.

However, the South African authorities have adopted a hostile attitude towards Zimbabwe. Through their diplomatic missions they have recruited elements hostile to the Zimbabwean Government to carry out subversion and sabotage in Zimbabwe. In view of this, Prime Minister Mugabe issued a warning to the South African authorities in July. However, the South African authorities have not pulled in their horns and, on the contrary, Botha, leader of the South African authorities, said arrogantly and threateningly: "South Africa will deal with its neighboring countries as it did in Southern Angola." In face of the peremptory attitude of South Africa, the Zimbabwean Government resolutely announced the severance of its diplomatic relations with South Africa. This is a powerful counterblow to the South African authorities.

The reactionary nature of the South African racists shows that they cherish a deep hatred for the independent Zimbabwean Government. The independence of Zimbabwe which heralded the complete collapse of the Rhodesian racist regime, has greatly inspired the Namibian and Azanian peoples in their struggle against racist rule and for independence. World public opinion while denouncing the South African authorities for practicing racist policies, also urged them to carry out the UN resolutions, respect the national rights of the Namibian people and bring about the independence of Namibia according to the Zimbabwe formula. The South African authorities were panic-stricken in the face of this situation. They cried out in alarm that if this situation continued, "they would be unable to stand it" and must "remove" this "hidden peril." They therefore regard the Zimbabwean Government as a thorn in their side and have used every means to carry out subversion and create chaos in Zimbabwe in order to undermine its independence. By so doing, the racist regime in South Africa evidently hopes to prove the viability of racism. Stop the vigorous development of national liberation movements in Southern Africa and save its tottering rule. But its dream will never come true.

The sparks of the victory of the Zimbabwean people's independence will surely kindle the land of Southern Africa. The perverse acts of the South African authorities will only result in bringing about their destruction like a moth darting into a flame.

BRIEFS

COOPERATION WITH U.S. UNIVERSITIES--Guangzhou, 17 September (XINHUA)--Two hundred and twenty-five college teachers and scientific and technical workers are taking English at the Guangzhou English Language Center. The center, jointly organized by Zhongshan University at Guangzhou and the University of California at Los Angeles, is training people who plan to go to English-speaking countries for advanced study. Four hundred students are to be trained every year. The teaching staff will consist of nine teachers from the University of California at Los Angeles and five from Zhongshan University. An opening ceremony was held yesterday at Zhongshan University. Both Huang Huanqiu, vice-president of Zhongshan University and Charles Young, president of the University of California at Los Angeles, wished the center success. TV DOCUMENTARY WITH JAPAN--Wuhan, 17 September (XINHUA)--The Central Television Station of China and the Sada Planning Inc. of Japan have begun shooting a television documentary about the Yangtze River, the longest river in China. It will record the scenery, pace of economic construction and the customs, culture, history and daily life of people along the river banks. The film, which will run for a total of 10 hours on completion, will be produced in two parts. The first part concentrates on Hubei, Hunan and Sichuan Provinces, on the middle and upper reaches of the Yangtze. Work on this part of the film will be finished by December this year. Scenes in Shanghai and Jiangsu and Jiangxi Provinces, on the lower Yangtze, will be shot next year. Three copies of the film will be made in Chinese, Japanese and English. Wang Huanan, head of the Chinese TV team, said the film would help the development of tourism and promote understanding between the Japanese and Chinese people. The Central Television Station of China is shooting another documentary, entitled "Silk Road," in cooperation with Japan's N.H.K. [Beijing XINHUA in English 0729 GMT 17 Sep 80]

FINANCIAL DELEGATION TO JAPAN--Beijing, 15 September (XINHUA)--A delegation of the China International Trust and Investment Corporation with Lei Renmin, vice-chairman of the board of directors of the corporation, as its deputy leader left here today for a two-week friendly visit to

Japan at the invitation of Aiichiro Fujiyama, chairman of the Japan Association for the Promotion of International Trade. Leader of the delegation is Rong Yiren, vice-chairman of the National Committee of the Chinese People's Political Consultative Conference and chairman of the board of directors of the China International Trust and Investment Corporation. He will leave for Japan a few days later. [Text] [OW160419 Beijing XINHUA in English 1609 GMT 15 Sep 80]

AUSTRALIAN BOOKS EXHIBITION--Beijing, 15 September (XINHUA)--An exhibition of Australian books opened at the China Art Gallery here this afternoon. On display are 1,300 titles from 54 Australian publishers, covering the entire spectrum of Australian non-fiction publishing, from the most erudite post-graduate research titles to simple, colourful books for children. They reflect the new aspects and advanced levels of science, culture, education and economics in Australia. Addressing the opening ceremony, Ding Bo, manager of the China National Publications Import Corporation, Hugh Alexander Dunn, Australian Ambassador to China, and Geoffrey King, president of the Australian Book Publishers Association, joined in hoping that China-Australia cooperation and exchanges in the publishing industry would continue to grow. Also attending the opening ceremony were Tong Dalin, vice-minister of the State Scientific and Technological Commission, and Chen Hanbo, acting director of the National Publishing Bureau of China, as well as over 150 Chinese visitors from the publishing, scientific, educational and other fields. CULTURAL DELEGATION LEAVES SHANGHAI--Shanghai, 14 September (XINHUA)--A Japanese delegation of cultural officials wound up its visit to China and left here for home today. The delegation, led by Tamio Amaha, director-general of the Public Information and Cultural Affairs Bureau of the Japanese Foreign Ministry, had toured China at the invitation of the Chinese Ministry of Culture. While the delegation was staying in Beijing, talks were held between cultural officials of the two countries. The two sides expressed satisfaction at the cultural exchanges between the two countries in recent years, and put forward proposals on further exchanges of culture, education, art and sports in 1980-1981. The two sides signed minutes of talks. [Text] [OW140832 Beijing XINHUA in English 0816 GMT 14 Sep 80]

SHIPS FOR HONG KONG--Beijing, 12 Sep (XINHUA)--Contracts under which two Chinese shipyards will build four bulk-carriers for a Hong Kong firm were signed in Beijing this afternoon. Two 27,000-ton carriers and two 36,000-tonners are to be built by the Jiangnan and Hudong shipyards of Shanghai, for World-Wide Shipping Group, Hong Kong. The four contracts were signed by Chai Shufan, chairman of the China Corporation of Shipbuilding Industry, and Yue-King Pao, chairman of World-Wide Shipping. OBSTACLES TO FOUR MODERNIZATIONS

HK110815 Hong Kong WEN WEI PO in Chinese 10 Sep 80 p 2

[WEN WEI PO Editorial: "Remove All Obstacles to the Four Modernizations"]

[Text] The third session of the fifth NPC listened to the long speech of Hua Guofeng on 8 September. It was the climax of the session. In his speech, Hua pointed out that the future tasks are to reform the economic system, get rid of bureaucratism and perfect the democratic legal system. It is necessary to separate the party from the government and promote young, educated and professional people to positions of leadership. This is a blueprint of the motherland's four modernizations. It will encourage the people and aims at improving their standard of living.

Viewing the situation from abroad, the great reshuffle of the state council has aroused the most attention concerning the agenda of the session. Hua Guofeng will resign from his position as premier but will continue as party chairman; the five brilliant and senior revolutionaries Deng Xiaoping, Li Xiannian, Chen Yun, Xu Xiangqian and Wang Zhenwu will no longer serve as vice premiers. Wang Rezhong will resign from his position as vice premier but continue to work as secretary of the CCP Central Committee and concurrently minister of the propaganda department of the CCP Central Committee. Chen Yonggui has been dismissed from his post because of serious mistakes and Zhao Ziyang has been recommended for the post of premier. Zhao Ziyang will be responsible for putting forth other changes in the personnel of the state council at the NPC session. This reshuffle has the approval of patriotic Chinese in Hong Kong and Macao, overseas Chinese and friends of the Chinese people. As a matter of fact, the central authorities in China are vigorous and full of vitality.

This is a correct and important step in pushing forward the four modernizations. The administration of the central authorities is in the hands of relatively younger, better educated and professional people, while the older generation of revolutionaries are responsible for party affairs and making decisions on important matters and principles. Thus, a powerful motive force has been created in the new long march of the four modernizations in China.

However, this change alone will not insure the victorious achievement of the four modernizations. We have already pointed out that overcoming bureaucratism is the current pressing task. However, we must still examine in depth the actual conditions of the state today. There are many other problems that must be watched closely. This is because some of the central government decrees have not been implemented in certain departments and certain areas. A perfunctory attitude and feigning compliance with central orders and open opposition to central policies and guiding principles are neither rare nor limited to just a few individuals.

This is quite a serious problem which is caused on by both the existence of bureaucratism to a great extent and by the continuing remnant ideological poison created by Lin Biao and the "gang of four." Lu Dingyi pointed out at a group meeting of the CPPCC: "During the 'Great Cultural Revolution', Lin Biao and the 'gang of four' promoted a gang of 'rebels.' Half of the CCP members joined the party at that time." This gang of people are now scattered over various posts in the middle and lower levels and have some authority. We do not have adequate reasons to believe that all of them are good or bad. However, reality has proven that the nature of orders from the central authorities changes when they come into the hands of these people. Lu Dingyi said: "Wang Hongwen said that 'people will see the situation in 10 years' we must not forget this statement." Although the wolves--the "gang of four"--are gone now, we still must pay attention to the foxes.

This is very difficult and it takes a relatively long time to solve such a serious problem. Fundamentally speaking, it is a problem of the entire party and it is impossible to solve all kinds of problems in a day. We can only sort out the most urgent and serious ones and deal with them first.

What is the most important thing? It is that leaders of the higher and middle level must be sincere, honest and wholehearted in implementing the policy of the central authorities. What we mean by sincerity and honesty is full ideological support, and what we mean by wholeheartedness means actual practice. If leaders of the higher and middle level are not performing satisfactorily due to rigid or semirigid ways of thinking, we can put them aside for the time being. However, if they are not performing satisfactorily because they are the escaped followers of Lin Biao and Jiang Qing or they are deeply poisoned by them and refuse to repent, we should dismiss them and deal with them in accordance with the actual situation. In the past, we were too soft-hearted in dealing with such people. We only stressed patience and education. As a result, the progress of the four modernizations has been slow.

Only if higher and middle level leaders implement the policy of the central authorities, pursue the path toward modernization and strive to improve the people's living standard can we achieve all the things mentioned by Hua Guofeng in his long speech. However, we do not have a guarantee for this because the basic level leaders must also be revolutionaries. However, we must make great efforts and spend a very long time to achieve this.

"People will see the situation in 10 years" is not an empty threat. We must solve problems of bureaucraticism and personnel problems such as "a good troublemaker can become an official." While pointing out that Hua Guofeng's speech to the NPC session won warm applause, we must also point out that we must soberly face reality.

WANG BINGNAN ATTACKS THREE VICE PREMIERS

HK151132 Hong Kong HSIN WAN PAO in Chinese 12 Sep 80 p 1

[HSIN WAN PAO correspondent 12 September report from Beijing: "Wang Bingnan Criticizes Three Vice Premiers"]

[Text] During a CPPCC group discussion, Wang Bingnan, president of the Chinese People's Association for Friendship with Foreign Countries and former ambassador to Poland, noted: It is imperative to adopt a measure to dismiss all incompetent leading cadres from their posts. All departments must have some inspection systems to frequently check up on the work of leaders to expose incompetent leaders. Over a long period of time, we have continued to say that everything is fine. Once things go wrong, the situation will be serious. There are many problems within the petroleum, coal and metallurgical systems. We should encourage the masses to expose them.

He added: At present, being an official means having power to give arbitrary and impracticable directions. We have many vice premiers and ministers. However, some of our vice premiers and ministers are incompetent. For example, it has been pointed out by many groups that Comrades Chen Muhua, Kang Shien and Yu Qiuli do not have prestige within the party and government circles. However, they are still there. Since some prime ministers and ministers of capitalist countries are ready to accept higher or lower posts and are ready to be an official or one of the common people, is it conceivable that our socialist country cannot accomplish this? Our top-level leaders should take the lead in setting good examples.

KMT LEADERS ON PRC STATE COUNCIL RESHUFFLE

OW180105 Beijing Radio in Mandarin to Taiwan 0130 GMT 17 Sep 80

[Station reporter's report: "Achieve Long-Term Peace and Order Through Circumspection and Farsightedness--An Interview with Five Leading Comrades of the KMT Revolutionary Committee Central Committee on the Readjustment of the Leading Personnel of the State Council"]

[Text] During the period when the third session of the fifth NPC was being held, this reporter interviewed five leaders of the KMT Revolutionary Committee on the question of the readjustment of the leading personnel of the state council. They were Pei Changhui, vice chairman of the KMT Revolutionary Committee Central Committee and member of the Standing Committee of the fifth NPC; Zheng Dongguo, vice chairman of the KMT Revolutionary Committee Central Committee and member of the fifth CPPCC National Committee's Standing Committee; Tao Shuzeng, chairman of the Hubei Provincial Committee of the KMT Revolutionary Committee and member of the fifth CPPCC National Committee; Fu Xuewen, member of the Standing Committee of the KMT Revolutionary Committee Central Committee and member of the fifth CPPCC National Committee; and Zhang Zhen, vice chairman of the Henan Provincial Committee of the KMT Revolutionary Committee and member of the fifth CPPCC National Committee.

Zheng Dongguo said: The recent readjustment of the leading personnel of the state council fully evidenced the abolition of the de facto system of lifetime tenure for leading cadres. This is a way to achieve long-term peace and order through circumspection and farsightedness. Before that, the system of lifetime tenure was practiced in all socialist countries: China has set the precedent by abolishing the system. The CCP Central Committee has made the wise and correct decision of introducing young, knowledgeable and professional people into the leading posts of government at all levels. The decision has a direct bearing on the success and failure of the modernization program, hence its tremendous significance. The elderly Zheng also said: The CCP has been good at drawing on historical lessons and has avoided overconcentration of power and the practice of holding too many concurrent posts. It has realistically and clearly distinguished between the party's and the government's work and has regarded national interests as the major consideration while continuing with the reform of the structure of economic management with the ultimate aim of improving the people's livelihood. The recent readjustment of the state council's leading personnel signified a good start in reforming the leadership system of the Chinese Government. It will produce inestimable influence on China's modernization program and the great cause of motherland reunification and on the efforts to maintain and promote world peace and oppose hegemonism.

Zhang Zhen said: I was deeply moved by the fact that Chairman Hua Guofeng gave up of his own accord his concurrent post as premier of the state council, and that the five veteran comrades--Deng Xiaoping, Li Xiannian, Chen Yun, Xu Xiangqian and Wang Zhen--gave up their concurrent posts as vice premiers. He who devotes himself to state affairs of vital importance always places the state above everything else and gives no thought to personal fame and position. The way Chairman Hua and five other prominent figures gave priority to vital state affairs reminds me of the beautiful Chinese legend of Emperor Yao passing on his position to Emperor Shun.

Pei Changhui said: I know the situation in Sichuan better, because I just came from the province to Beijing to attend the third session of the fifth NPC. Since ancient times, Sichuan has been the land of abundance. However, the 10-year turmoil during the cultural revolution brought Sichuan's economy to the brink of collapse. Under Comrade Zhao Ziyang's leadership and with the common efforts of more than 100 million people of the province, marked results have been achieved within a period of only 2 or 3 years. In agriculture, flexible policies have been adopted. The province reaped bumper harvests for 3 consecutive years, from 1977 to 1979, and increased grain output by more than 14 billion jin. In industry, communications, finance and trade, a number of measures have been adopted, namely, expanding autonomy of the enterprises, sharing profits and rewarding those who overfulfill production quotas. This has spurred a steady increase in the production of the enterprises and a constant improvement in product quality. The state plans have been overfulfilled, more profits have been made, the workers' collective welfare has improved and their personal income has increased. All this has greatly enhanced the workers' enthusiasm.

Take for instance the comprehensive appraisal of product quality at the Chongqing Printing and Dyeing Plant. The plant ranked 26th in the nation early last year, but climbed to the 3d position by the end of the year. This single example is illustrative of things in other fields. The elderly Pei said in real earnest: Comrade Zhao Ziyang is an appropriate and trustworthy man for premier of the state council. He has our resolute support and is certainly trusted by Sichuan Province's more than 100 million people. When he was first secretary of the Sichuan Provincial CCP Committee, Comrade Zhao Ziyang upheld the central authorities' principles and policies and dared to undertake reformation. In no time, Sichuan's economy was enlivened. I believe that having become premier of the state council, he will popularize throughout the country the measures that have proved effective in Sichuan Province and will enliven the national economy and bring prosperity to the whole people. This is the aspiration of the 1 billion people of China.

Tao Zhuzeng said: Since the switch of the work emphasis of the whole country, for the sake of fulfilling the central task of modernization, it has been necessary to asking young, knowledgeable and professional people to the leading posts of the government at all levels accordingly. Holding too many concurrent posts prevents one from acquiring professional skill in his work. This is not in line with current developments. The progress of the modernization drive will be seriously affected if no measure is taken to improve the situation of leading members holding too many concurrent posts. I have come across situations like this: The people at the grassroots who are familiar with the actual situation but who have no power to decide cannot but refer the situation to the higher authorities for instruction. But the people higher up always make decisions before they have the time to grasp the essence of the situation, because they hold too many posts concurrently. Some leaders merely draw circles on official documents and pass them on to the next office. Therefore, problems that would have been readily solved are handled poorly or drag on endlessly. I sincerely admire Chairman Hua Guofeng for his circumspection and farsightedness, for avoiding overconcentration of power and holding of too many concurrent posts in order to achieve long-term peace and order, and for setting the example by giving up his post as premier of the state council.

Fu Xuewen said: State leaders like Comrade Zhao Ziyang and others who are in the prime of life are full of vitality, enterprising spirit and talent. They have performed meritorious service for the party, the government and the military and have accumulated rich experience. By promoting them to the leading posts and by enlisting the support of Chairman Hua and other veteran party leaders for them, the government will be able to quickly raise the quality and efficiency of its work and will guarantee the continuity and stability of its correct leadership. The elderly Fu also said: All things acquire vitality through metabolism. The recent readjustment of the leading personnel of the state council showed that the CCP and the great motherland have great vitality. This is only a beginning. This example should be used as a force to improve government at all levels below the state council. The lower bodies will follow the examples of the higher authorities, and comrades who firmly implement the party line, who can find their bearings independently in work and who are in the prime of life will be assigned to the leading posts at all levels. This is of immediate significance to strengthening collective leadership and abolishing the system of life-time tenure. It will certainly accelerate the pace of China's modernization drive.

EDITORIAL URGES PUNISHMENT OF CHEN YONGGUI

HK151208 Hong Kong WEN WEI PO in Chinese 13 Sep 80 p 2

[Editorial: "Demanding the Punishment of Chen Yonggui"]

[Text] The third session of the fifth NPC has ended with favorable comments from people both inside and outside the country. The future task is how to implement the spirit of the NPC session.

During this session, the serious crime of Chen Yonggui, former vice premier of the state council, was exposed. Although he has been dismissed from his post, people are waiting to see how this case will be further handled.

In view of his crimes exposed at an initial stage, the salient ones are:

He made use of Dazhai and used the approach of deceiving those above and bullying those below to create a sham model and obtain great prestige and good salary.

He did not pay attention to the experts' opinion and presumptuously promoted the construction work of "drawing water from west to east" in Xiyang. This wasted tens of million yuan which was double the economic losses of the capsized "Bohai No 2."

He suppressed people who had given him friendly advice and criticized the construction of "drawing water from west to east" in Xiyang, creating a number of murder cases.

He indulged his son Chen Yanai to take advantage of his privileges to insult women and do harm to people of Xiyang; and so forth.

It is said that Chen Yonggui and another responsible person from Dazhai Guo Fenglian made a self-criticism at a group meeting of the Shanxi People's Congress. However, the truth has not been made known. It is necessary to let people throughout the country know about this important case. In our opinion, it is necessary to investigate the Chen Yonggui case to consolidate and rectify the state laws and party discipline. Where the Chen Yonggui case is concerned, we should not just talk about it at the plenary session of the NPC and at the session of the CPPCC but we should inflict strict punishment on him. We suggest that:

Departments concerned carry out a serious investigation of Chen Yonggui;

The standing committee of the NPC be responsible for looking into the Chen Yonggui case and send personnel to get in touch with all departments concerned. They must get all the facts of the case and still exercise supervision in the course of handling the case. At the same time, the standing committee of the NPC should send representatives to Shanxi to carry out an investigation and then make a report to the people;

The highest people's procuratorate take the lead in playing its procuratorial and prosecuting role. It must exercise its independent authority given to it under the constitution;

Public opinion be responsible for speaking the truth, and waging an unremitting struggle against bureaucratism. Cadres who were derelict in their duty must strive to promote democracy and the legal system.

In our opinion, the Chen Yonggui case is not an isolated phenomenon of bureaucratism, but a disaster caused by indulging in feudal dictatorship. It has both historical and social roots. Chen Yonggui was first a peasant. After that he speculated in politics and rose to a high position. He has done many evil things but has not been punished for a long time. This reflects many problems existing in the state leadership system, cadre system and the democratic legal system. We must act in accordance with the democratic spirit of the third session of the fifth NPC and the experiences and lessons obtained from the Chen Yonggui case to punish the past criminals and caution others and stop privilege seeking and bureaucratism from growing in the future.

The handling of the Chen Yonggui case and other cases of dereliction of duty on the part of important cadres will serve as a test of the utilization of the people's democratic rights and symbolize the state's path toward rule by law.

Therefore, we demand that the state punish Chen Yonggui to show gratitude to everyone in the country.

PARTY AND STATE

BIOGRAPHY OF CPPCC VICE CHAIRMAN BURHAN SHAHIDI

OW121523 Beijing XINHUA in English 1505 GMT 12 Sep 80

[Text] Beijing, 12 September (XINHUA)--Following is a biography of Burhan Shahidi, newly-elected vice-chairman of the National Committee of the Chinese People's Political Consultative Conference:

Burhan Shahidi, a member of the Uygur nationality from Wensu county, Xinjiang, was born in 1894, and joined the Communist Party of China in 1949. Burhan studied at Berlin University in 1929, began working for the revolution in Moscow in 1933 and later returned to Xinjiang for underground work. He was vice-chairman of the revolutionary coalition government of three regions in Xinjiang in 1946, and worked for the peaceful liberation of Xinjiang in 1949.

After the liberation of Xinjiang, he served as chairman of the provincial government, a Standing Committee member of the Xinjiang sub-bureau of the CPC Central Committee and member of the Military and Political Commission of Northwest China. Beginning from 1953, he served as vice-chairman of the CPPCC National Committee and chairman of the Chinese Islamic Association. After 1956, he became director of the Nationalities Institute of the Chinese Academy of Sciences, vice-president of the Political Science and Law Association of China, and vice-chairman of the China Peace Committee. He was elected a Standing Committee member of the CPPCC National Committee in 1978.

BRIEFS

VICE PREMIER'S SON CALLED PLAYBOY--During the CPPCC group discussions, some people noted: Chen Yonggui's son is called "Chen Yanei." This is because he is a playboy and has humiliated many women. He has owned several cars, sold any car he disliked and pocketed the money from the selling of the car. Some other people also noted: We hear that two vice premiers have become relatives by the marriage of their son and daughter and that a special plane was used for the marriage. Some senior cadres' children have smuggled television sets and recorders from Hong Kong into China. Some other senior cadres' children in Guangzhou have smuggled medicinal materials and gold out of China. No ordinary senior cadres' children are capable of doing these things. It is imperative to investigate these affairs seriously. [HSIN WAN PAO correspondent 12 September report from Beijing: "CPPCC Discloses that Chen Yonggui's Son Has Humiliated Women and Amused Himself With Cars"] [Text] [HK151124 Hong Kong HSIN WAN PAO in Chinese 12 Sep 80 p 1]

NEW GUANGDONG MUNICIPAL MAYOR--According to a report by the ZHONGGUO XINWEN SHE, Wu Nansheng, the current secretary of the Guangdong Provincial CCP Committee and chairman of the Guangdong Management Committee for Special Economic Zones, has been officially appointed as first secretary of the Shenzhen Municipal CCP Committee and mayor of Shenzhen municipality. [TA KUNG PAO report: "Wu Nansheng Is Concurrently Mayor of Shenzhen Municipality"] [Text] [HK180705 Hong Kong TA KUNG PAO in Chinese 18 Sep 80 p 2]

PLA DEPUTIES' BOYCOTT OF NPC DISCUSSION DEFENDED

OW160637 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT 13 Sep 80

[Text] During the third session of the fifth NPC, four deputies from the PLA abruptly withdrew from a panel discussion in great anger, and two other PLA deputies indignantly walked out at an ongoing plenary meeting of the NPC session. These incidents happened for the first time in the NPC's history. We cannot deny the fact that they were serious incidents and have had very bad consequences.

However, it is necessary to see both aspects of these comrades' boycott actions; we cannot seize upon one point and ignore the overall picture. As a matter of fact, they were compelled to do so.

The question that prompted their walking out is why the 3-point joint proposal put forward at the NPC session by our PLA deputies was deliberately slandered and flagrantly rejected with the remark that their proposal could in no way represent the PLA. Their proposal calls for a reinvestigation of the Lin Biao incident; an investigation of the "571 Engineering Project" forged by Kang Sheng, Wang Dongxing and Zhang Chunqiao; and a reexamination of the cases of more than 370 PLA cadres involved in the Lin Biao incident, as well as their rehabilitation. These cadres included the former PLA chief of general staff Huang Hongsheng and the former PLA branch directors and unit commanders Wu Faxian, Li Zuopeng, Qiu Huizuo, Ma Ning, Ding Sheng and Long Shujin.

We cannot make use of the trial of the gang of four to strike at PLA cadres. It is necessary to proceed from the fact that the above cadres were assigned by Chairman Mao to leading posts at the central level and in the PLA and to handle the problem (?of their rehabilitation). The joint proposal put forward by PLA deputies has nothing wrong [words indistinct] and is basically correct. It represents the demand of numerous PLA cadres. We should know that our army cadres have never received such heavy blows and been so cruelly persecuted as they were during the heyday of the gang of four, especially (?since Vice Chairman Deng Xiaoping came to power at the Party Central Committee).

After the downfall of the gang of four, the Party Central Committee and its military commission decided to eliminate chaos, restore order and redress and correct the frameup and false cases in an effort to handle the problems left by history by seeking truth from facts. However, there are still more than 10,000 army cadre cases left unsettled because of their involvement in the Lin Biao and the gang of four incidents, and these cases still bear unjust, false or wrong charges and sentences. Moreover, after the screening of the Lin Biao incident and the trial of the gang of four, a large number of PLA cadres will be dismissed or ordered to retire. Can we say all this is a normal phenomenon?

At a meeting of the Central Military Commission and a meeting of the Party Central Committee's political bureau held prior to the opening of the third session of the fifth NPC, Vice Chairman Deng Xiaoping and two other leaders at the central level stressed that many PLA cadres have profound feelings for Lin Biao, who shielded them during the cultural revolution, and that they did all kinds of evil things when PLA units were engaged in the "three supports and two militaries" tasks. They made this charge without objectivity but with a view of taking revenge. What the PLA did during the cultural revolution was done under orders of Mao Zedong, chairman of the Military Commission of the Party Central Committee. The instructions given by Lin Biao to the PLA were either instructions from Chairman Mao or instructions approved by him. How can we repeatedly strike at PLA cadres who were merely carrying out orders?

As for the person of Lin Biao, we also cannot negate everything about him and his whole personal history by merely judging him during a given period or by judging one of his deeds. He was one of the principal leaders of our army who performed indelible services in various periods of the Chinese revolution. Although he committed mistakes by closely following Mao Zedong during the cultural revolution, later he came to a sudden realization of his mistakes. Thus, he fell in the trap set for him by the gang of four and Kang Sheng.

We are not assessing the performance of Mao Zedong, the principal party and army leader, during the 10-year catastrophe in a true way of seeking truth from facts. Why else should we assess Lin Biao in a way of mixing our personal grudges against him with a number of external causes? Any erroneous conclusion in the assessment of Lin Biao should be resolutely corrected regardless of who made the conclusion or whoever came to the conclusion by whoever's instructions. As for PLA cadres who call for a correct handling of the Lin Biao incident, we must not censure, persecute and frame them.

CSO: 4005

MILITARY AND PUBLIC SECURITY

COMMENTS ON MILITARY SPENDING, NATIONAL DEFENSE

OW160601 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT 11 Sep 80

[Text] Shortly before the third session of the fifth NPC, the minister of finance and the minister in charge of the State Planning Commission were hastily replaced, ending temporarily the dispute that had been going on for nearly 7 months on the military budget. However, in discussing the two reports [by Yao Yilin and Wang Bingqian at the NPC session], the various PLA services and arms and PLA units have raised many practical questions. Even quite a number of middle-level and high-level cadres are doubtful and worried whether the army's modernization will be adversely affected by the control of financial economic powers by Wang Bingqian and Yao Yilin.

Many comrades feel that cutting back military expenditure and speeding up modernization of national defense are contradictory to each other. This is to expect the horse to run fast while cutting its feed.

This strong reaction of military cadres to the military budget and to the new choices of personnel for the Ministry of Finance and the State Commission of Planning is quite normal. This is because: First, military expenditure indeed has a direct bearing on army-building; and second, no exact figure of military expenditure has ever been reported in the country and in the army since the Eighth Party Congress. Therefore, when PLA cadres hear about the cutting down of the military budget, they cannot help feeling all kinds of doubts and misgivings. Their doubts and misgivings are groundless.

It is well known that our country's military expenditure is much higher now than in the early period following the founding of the People's Republic. Even in the past few years, since the Party Central Committee decided to place the emphasis on agriculture, light industry, scientific research and culture and education, the direct and open military budget still has been 15 percent higher than agricultural investment and 30 percent higher than the budget for culture, education, scientific research and public health.

Furthermore, funds for national defense are far from limited to a single source, the military budget. For example, a very large part of the funds for research on nuclear missiles, electronic equipment and other sophisticated weapons and military installations which require huge amounts of money, is paid under scientific research projects. Under the state council, four machine building ministries directly or indirectly serve national defense. Local national defense installations too are built with local help. Even more important, the progress of the modernization of the army does not entirely depend on the size of the military budget, but on correct and reasonable use of funds.

For example, this year's regular military budget is 2.94 billion yuan less than last year's. Judging by the figures, it seems to be a sizable reduction. However, a month-long limited war was fought against Vietnam last year, and military expenditure rose sharply by more than 2 billion yuan. In future, if someone again becomes hotheaded and forces the army to embark on an adventure like that, in which we lost more than we gained, then even the addition of another several billion yuan to the military budget will not help the modernization of our army at an early date.

It goes without saying that armed forces, ancient and modern, Chinese and foreign, always hope that more should be spent for the military to strengthen equipment, raise fighting capacity, give pay increases to military personnel and strive to gain overwhelming military superiority over other countries.

However, the armed forces are a component part of the state and cannot grow independently. If hundreds of things remain to be done in a country, especially if heavy industry is backward, modernization of the army is unthinkable. Yet due to mistakes in guiding ideology, political line and economic policies in the past few years, our country's steel production will remain at the 1979 level in 1981, petroleum production will hover at the same level for 3 years, production of motor vehicles including military vehicles will drop by 20,000 units, and tractor production will drop by 25 percent. [Figures for motor vehicle and tractor production not given] This is to say, if steel, petroleum and power output and scientific research cannot be pushed forward, a huge military budget not only will fail to hasten the modernization of national defense, but on the contrary will adversely affect the national economic development as a whole.

MEMORIAL SERVICE HELD FOR PRC WRITER PERSECUTED BY LIN BIAO

OW151257 Beijing XINHUA in English 1231 GMT 15 Sep 80

[Text] Beijing, 15 September (XINHUA)--A memorial meeting was held here today for the writer Yang Shuo.

Yang Shuo was vice-chairman of the Chinese Committee for Afro-Asian Solidarity and chairman of the Foreign Literature Committee under the Chinese Writers' Association. He died on 3 August 1968, at the age of 55 under persecution of Lin Biao and Jiang Qing.

The memorial speech described Yang Shuo as "a prose writer of influence and loved by the masses" "who left behind a large amount of writings portraying the natural beauty and people of Asian and African countries and supporting the struggles of the third world countries for independence, democracy, freedom and liberation." The speech was delivered by Lin Lin, vice-president of the Chinese People's Association for Friendship with Foreign Countries.

"Yang Shuo made active contributions to increasing mutual understanding and friendship among peoples of the world," said Lin Lin.

Yang Shuo joined the Chinese revolution in 1937 when he did cultural and propaganda work in the headquarters of the Eighth Route Army in Shanxi Province. In 1946 he took part in the war of liberation as a war correspondent. When the war to resist U.S. aggression and aid Korea began he went to the battlefields and wrote the novel "Three Thousand Li of Mountains and Rivers" on Korean patriotism.

SOCIOLOGICAL, EDUCATION AND CULTURE

BACKGROUND OF BEIJING PEOPLE'S ART THEATER

OW181214 Beijing XINHUA in English 1200 GMT 18 Sep 80

[Text] Beijing, 18 September (XINHUA)--The Beijing People's Art Theater will be China's first professional modern drama company to visit the West when it makes its European debut later this month.

Set up in June 1952, the theater has an experienced staff of 300 and a repertory of 160 plays. Built on the pattern of a national theater, it has developed its own style of performing art and established its own standards for training stage artists.

Cao Yu, playwright for half a century and now president of the Chinese Dramatists Association, is president of the theater. The late Jiao Juyin, whose stage career is of national renown, was its general stage director.

The theater works on a system of the president being in full charge of production. An art committee of experts works under him to give advice on selecting new plays and choosing the cast.

Decades of hard work and close cooperation has built up a great understanding between the theater and three prominent contemporary writers, the late Guo Moro, Lao She and Cao Yu himself. Guo Moro, majestic and pursuasive, Lao She, sharp and humorous, and Cao Yu, intelligent and dramatic, have joined forces to build a repertory for the theater famed for its style and grace and a natural simplicity acquired from strict training.

A center of attraction for young ambitious writers throughout the years, the theater received more than 100 new plays in 1979. For those of promise, it organized discussions and offered expoert help, a practice much appreciated by the public.

As with all state theaters, it is supported by government subsidies, in its case amounting to 200 to 400 thousand yuan a year. High is the cost of costume and decor of classical plays and new productions, but the tickets of this leading drama theater of the country are sold at ordinary low prices. Directors and performers receive wages from the government, and there are extra pays for performance activities and evening rehearsals.

The theater has over 100 veteran dramatists who began their career as early as the 1930's. Recruits are drawn each year from graduates of drama institutes as well as from amateur talents. Three times in the past two decades, the theater has enlisted new people from among students and factory and rural youth, totalling 100. After three years of training, 20 of these met the requirements for joining the theater, while the rest were given work in other drama companies. All the dozen new plays the theater staged in the past 2 years offered three casts, to give the new comers an early chance of the limelight.

Many of the theater's directors and actors lecture at drama and cinema institutes. More than 150 amateur drama troupes have received coaching from the theater.

Prior to the opening night of every new production, the theater gives dress rehearsals to people of different professions and circles to listen to their suggestions.

EXHIBITION IN BEIJING BY ART STUDENTS

OW140318 Beijing XINHUA in English 0217 GMT 14 Sep 80

[Text] Beijing, 14 September (XINHUA)--An exhibition at the Central Academy of Fine Arts of works by students of institutes of arts and crafts from all parts of China will close on 15 September.

Among the 500 pieces on display are Chinese traditional paintings, wood cuts, oil paintings, sculptures, sketches and handicrafts. These exhibits were selected from works contributed by 2,400 students studying in China's eight academies of fine arts and institutes of arts and crafts.

A wood cut, named "A New Chapter," done by Han Likun, first year graduate student at the Zhejiang Academy of Fine Arts expresses the importance of intellectuals in the new period of construction. It is a powerful representation using mathematical formulae to outline the head of a teacher.

Gao Xiaohua, a second year student at the Sichuan Academy of Fine Arts, has two prize-winning paintings included among the exhibits. One called "I Love the Oil Field" shows the different attitudes of a young man and a young woman toward working at a remote oil field. The other painting called "Why" shows several bandaged young Red Guards after a fight. The painting shows the misery of these young people.

Since the opening of the exhibition on 1 September, it has been visited by many artists and art lovers. Jiang Feng, president of the Chinese Artists' Association, remarked that this exhibition reflected the swift development of art education in the past 3 years. Many visitors have been impressed by the creativeness of the students in their presentation of subject matter and painting techniques. Ye Qianyu, a well-known painter and vice-president of the Chinese Artists' Association, particularly praised the oil painting "At the Foot of Daba Mountain" done by Luo Zhongli, a third year student at the Sichuan Academy of Fine Arts, saying it embodies the feeling of today and the expectations of tomorrow.

During the "cultural revolution" all eight academies of fine arts and institutes of arts and crafts in China were closed. Many teachers were sent to work on farms. After the downfall of the "gang of four" these institutes were reopened. Now this joint exhibition demonstrates their achievements of the past 3 years and also gives them a chance to exchange experience.

After closing in Beijing, this exhibition will be taken to Chengdu, Xian, Shenyang, Hangzhou and Guangzhou.

BRIEFS

FOLK LITERATURE STUDY--Beijing, 11 Sep (XINHUA)--The China Society for the Study of Folk Literature and Art has set up branches or preparatory committees in 25 provinces and the city of Shanghai, according to the latest issue of the monthly journal "FOLK LITERATURE," These local groups are collecting folk tales and songs. More than 50 new books of folk literature have been published in the past 2 years, including "Chinese Folk Tales," "Essays on Chinese Folk Literature," and fairy tales, animal stories and folk tales of the Mongolian, and Dauer and She nationalities, legends of peasant uprisings and stories about folk heroes. Almost all of the major books in this field banned during the "cultural revolution" have been reissued. Periodicals and books on folk literature are being put out in Hebei, Henan, Jaingsu, Sichuan, Hunan, Yunnan and Guizhou Provinces. Before the "cultural revolution" there was only one such magazine in the whole country. "MANASS" in the Kirgiz language and "GESAR," a Tibetan epic being put out volume by volume in the Tibetan language, have been well received. [Text] [OW111243 Beijing XINHUA in English 0711 GMT 11 Sep 80]

CALLIGRAPHY COURSES--Beijing, 11 Sep (XINHUA)--The Chinese Calligraphy School set up in central Beijing last month reported today that it is getting between 100 and 200 applications a day for lessons in this traditional art form. Wang Mingyun, an official of the China National Calligraphy Association which was also formed last month and which established the school, said: "Letters are pouring in from other parts of the country applying for correspondence courses." The school's Saturday night course in basic calligraphy and regular script runs for 3 months. Public interest in calligraphy has been increasing for several years. Calligraphy lessons have been reintroduced at primary and middle schools, exhibitions have been held in a number of cities, and noted calligraphers have toured schools, factories, army units and country districts to teach. Some 20,000 people attended the First National Calligraphy and Seal-Cutting Exhibition at Beijing's Palace Museum in July. Wang Mingyun said it was gratifying that many of them were young people who were deprived of cultural studies during the "cultural revolution." [Beijing XINHUA in English 1218 GMT 11 Sep 80]

SINGAPORE BOOKLET ON ASEAN STAND ON KAMPUCHEA UN SEAT

OW181612 Beijing XINHUA in English 1557 GMT 18 Sep 80

[Text] Bangkok, September 18 (XINHUA)--ASEAN states (the Association of Southeast Asian Nations) reject the so-called solution of a "vacant seat" for Kampuchea in the United Nations and advocate the seating of Democratic Kampuchea, declares Singapore's Foreign Ministry in a booklet being distributed here.

The booklet entitled "From Phnom Penh to Kabul" was published by the ministry and was distributed by the embassy of Singapore here yesterday and today.

The 52-page booklet adds that the vacant seat formula peddled by Soviet and Vietnamese sympathizers is only a round-about way of eventually getting endorsement of a puppet regime in Phnom Penh, thus rewarding the aggressor by punishing the victim.

Emphasizing the importance of taking a stand, the booklet argues as follows: "In short, we will be voting for something more fundamental than the integrity of Kampuchea and Afghanistan." We will be voting against the establishment of a new imperial order.

"If we, as the Vietnamese and their friends demand, seat the Heng Samrin regime, then we would be betraying those who are resisting Vietnamese aggression." "If we approve of the Soviet action in Afghanistan by voting for it in this organisation (U.N.--Edit.), that would be a betrayal," the booklet stresses.

"In ASEAN's view, the main cause of the present strife and tension in Southeast Asia, which has produced a sustained threat to the security of Thailand, is the continued Vietnamese military occupation of Kampuchea. ASEAN opposes all manoeuvres to divert world attention from this fundamental issues.... It condemns all attempts to create a military fait accompli which is in flagrant violation of the U.N. Charter and international law," the booklet emphasises.

The booklet links Vietnam's invasion of Kampuchea, its threats against Thailand and the Soviet takeover in Afghanistan, saying that the wars in Afghanistan and Kampuchea are the forerunners of a new world empire. The arguments so far offered by the Soviet Union to justify its armed intervention in Afghanistan and those by the Vietnamese for their way in Kampuchea serve only to strengthen our conviction that other new Afghanistans and new Kampucheas are in the making, it notes.

Dealing with the so-called Chinese threat used by Vietnam to justify its actions the booklet writes: "The 'Chinese threat' the Vietnamese then propounded was a cover for imperialist designs just as four decades ago Hitler used the 'Bolshevik menace' as a cover for occupying almost all of Europe." The "Chinese threat" now is no more than a cover for the permanent occupation of Kampuchea by Vietnam, it says.

ASEAN hopes that the Vietnamese troops really return to Vietnam to rebuild their war shattered country instead of ravaging the lands of others, the booklet concludes.

SINO-JAPANESE TELECOMMUNICATIONS CABLE BREAK INVESTIGATED

Hong Kong TUNG HSIANG in Chinese No 22, 16 Jul 80 pp 49-50

[Article by Ma Chiu-ming [7456 8003 2494]: "Espionage at the Bottom of the East China Sea; The Mysterious Breaking of the Sino-Japanese Telecommunications Cables"]

[Text] The wide East China Sea is a rich fishery zone. Each day, fishing boats from China, Taiwan and Japan ply the sea. On the surface nothing seems abnormal. But in the deep waters below the green waves are hidden many "conspiracies." Mysterious happenings that defy understanding have occurred one after the other.

A 'Pip' Sound and All Was Quiet

Lying calmly at the bottom of the East China Sea is a trans-oceanic communications cable connecting China and Japan. It is busily working every day. On 16 May, following a "pip" sound, communications between the two places suddenly broke and were silent. Something happened to the telecommunications cable. Japan's Kokusai Denshin Denwa Company (abbreviated KDD) immediately reconnected the line of transmission between the two places by switching to the international commercial satellite communications system's communications satellite over the Pacific Ocean.

Manfunctioning of telecommunications cables is a very routine and ordinary occurrence. The KDD immediately dispatched a ship "the KDD" to the site of the malfunction to investigate and carry out repairs. However, strangely, the broken off portion of the trans-oceanic cable was very unusual, unlike ordinary damage.

Even though cables break frequently, this is the third time since China and Japan reestablished bilateral relations in October of 1976, that this trans-oceanic cable connecting communications between the two nations has had problems.

The Time of the Three Breaks Are 'Coincidental'

Even more suspicious is the question of the three occurrences of the breaks in the cables. They all occurred during the period just prior to the pending visits of high ranking Chinese officials to Japan. The first malfunction occurred when Vice Premier Deng Xiaoping was about to visit Japan. The second when Foreign Trade Minister Li Qiang was visiting Japan. The third occurred a few days before Premier Hua Guofeng was to visit Japan. Such a coincidence makes people think naturally that the breaking of the cable might be due to human factors? Although at present the Chinese and Japanese have not yet been able to find out the actual cause of the malfunctions, analysis from all sources coincidentally indicate that an international conspiracy was behind them. The deep sea hides espionage!

Let us analyze the background of the incidents of malfunctions of the trans-oceanic cables from the detailed accounts of the three incidents.

The Sino-Japanese telecommunications cable lies at the bottom of the East China Sea connectiong Reihoku Town, Tenkusa Prefecture, Kumamoto County, Kyushu, Japan, and China's Nanhui of Shanghai City. There are 480 lines in the cable but at present only 20 of the telephone lines, 19 teletype lines and 4 telegraphic lines are normally used.

At 1618 hours on the afternoon of 16 May before Hua Guofeng visited Japan, the cable suddenly malfunctioned. Communications between the two nations suddenly ceased. Japan's KDD Company immediately took emergency measures and borrowed the Pacific communications satellite to maintain and continue communications between the two places. In addition, it made contact with the Shanghai Post and Telecommunications Bureau and both sides used test waves to check the lines. Finally, the location where the cable malfunctioned was found to be near 30°12' N latitude and 124°30' east longitude, about 250 kilometers from Nanfeng County, Shanghai City and about 600 kilometers from Japan's Reihoku Town on the continental shelf, at a depth of 50 meters.

The Cable Can Bear a Pull of Seven Tons

The Sino-Japanese trans-oceanic cable was connected on 25 October 1976. It is about 850 kilometers long. The central part of the cable is a thick steel wire braided together with 40 special steel wires and wrapped in thin copper. In addition, the outer layer is wrapped with insulating materials about 1 inch thick. Then, the core is wrapped layer by layer with insulating material and copper conducting wires, forming an electrical cable of about 2.5 inches thick. Tests proved that this type of cable can bear a pull of 7 tons.

Two-thirds of the length of this cable lie near China on the continental shelf at a depth of from 50 to 100 meters. The one-third near Japan lies at the deep parts of the so-called "Ryukyu Basin." The deepest part is 800 meters. The continental shelf where the cable lies is a well known netting ground for eels and hairtails. Everyday, fishing boats from China, Japan, South Korea and Taiwan conduct massive operations here. Taking this into consideration, China and Japan paid attention to the possible damage the fishing nets and the lead anchors of the fishing nets might bring to the trans-oceanic cable when the cable was laid. Therefore, in laying the cable in this region, a trench of 60 to 70 inches deep was dug at the bottom of the sea, and then the cable was placed inside the trench and buried. Theoretically, the cable can bear a pull of 7 tons. Being hidden inside the deep trench, it is very difficult to break. Yet, surprisingly, the broken portion of the cable is exactly at this place considered to be most perfectly protected.

Thus, after the cable broke, the general manager of Japan's KDD company, Ishikawa Kyokubo was puzzled and said: "This is the third time that something has happened! Even the cable that is laid near an unloading and loading dock and in the rivers where waves are strong like the Japan-U.S. trans-oceanic cable has broken only once up till now." But the Sino-Japanese cable has continued to break. How can this not cause suspicion?

In retrospect, the first occurrence when the Sino-Japanese trans-oceanic cable break occurred at 0505 hours on the morning of 11 October 1978. The location was 31°14' north latitude and 125°01' east longitude. The second time was at 1544 hours on the afternoon of 22 January 1980, at 31°22' north latitude and 127°18' east longitude.

Two Giant Strips of Broken Traces

After the two occurrences of mysterious breaking of the trans-oceanic cable, the Chinese and Japanese met to discuss the matter and reached an agreement. The Japanese dispatched a repair vessel "KDD" (the vessel weighs 4,300 tons with Captain Yoshida Mi at the helm and 76 crewmen). The vessel inspected the site. China dispatched a repair vessel "Youdian No 1" to help. The two nations repaired the broken cable and investigated the cause of breaking. It was a pity that the first time both sides spent a total of 300 million Japanese yen (shared equally by both sides) and the second time they spent 80 million Japanese yen but the real reason of the occurrence has not yet been clarified.

Results of the investigation reveal that the cross section of the broken cable shows that the hard insulation material that was about 1 inch thick was stretched lengthwise like molasses while the special steel wire wrapped within seemed to have been torn apart by a strong and violent force. Also, the supersonic "sonar" placed at the site of the broken cable to detect the topography of the sea floor indicated that two very deep "cuts" were present at the place where the cable was buried deep in the trench. The cuts were apart at a 30 degree angle. The "cuts" were like the traces left after a giant truck had run over a cable. The two cuts were about 90 meters apart and continued for about 1 kilometer. In other words, about 1 kilometer of the transoceanic cable had been torn apart.

Based on the "cuts" left on the bottom of the sea, people first wondered whether this could have been caused by the dragging of an anchor of fishing boats netting fish. However, according to President of the Deep Sea Net Fishery Association of Nagasaki City, Japan, Tokushima Kitaro, it is impossible. The anchors of fishing boats can only drag along some rocks at the bottom of the sea at most, and they cannot create such "huge cuts."

Soviet Destroyers Are Monitoring the Area

Various pieces of information indicate that the Chinese and Japanese both popularly believe that such continued occurrences of broken cables at the bottom of the sea may be the result of human efforts. Japan's public opinion is also gradually accepting the theory that "this is a conspiracy by a certain nation." Of course, there are some facts that support this theory. According to reports, when the "KDD" repair vessel was conducting on site operations, a Soviet destroyer was monitoring the work not far away.

MUGABE URGES PEACE FOR ZIMBABWE

OW221616 Beijing XINHUA in English 1503 GMT 22 Sep 80

[Text] Salisbury, September 22 (XINHUA)--Zimbabwean Prime Minister Robert Mugabe gave a tough warning yesterday at Chitungwiza, the scene of inter-party clashes and political unrest last week, that the government would take stern action against political hooligans, according to the HERALD here today.

Mugabe said, "The conflict was undoubtedly between ZANU (PF) and ZAPU (Patriotic Front) followers, but let everybody be warned that the government is going to act, and act harshly and resolutely if the situation in urban townships and other affected areas does not improve."

He added that it was a great shame that there should continue to be any quarrel between ZANU and ZAPU after the elections.

Mugabe ordered all party political leaders at branch and district levels to organise meetings to redirect actions of their members. Central Committee members of those parties must equally take stock of themselves and work vigorously to correct the unfortunate direction things were taking.

He concluded, "Our people want peace more than anything else. Let us give them that peace. People are right in asking whether this is freedom and happiness that we fought to bring to Zimbabwe."

It was reported earlier that sanguinary conflicts broke out at Chitungwize and Sinoia near the capital between the forces of ZANU headed by Prime Minister Mugabe and ZAPU led by Minister of Home Affairs Joshua Nkomo, and resulted in casualties. Mubage and Nkomo met twice last week to seek a solution to the conflicts.

WESTERN MEDIA ON DETERIORATING IRAQI-IRANIAN RELATIONS

OW191852 Beijing XINHUA in English 1835 GMT 19 Sep 80

[Text] Beijing, September 19 (XINHUA)--Relations between Iraq and Iran have further deteriorated since Iraq abrogated the Iraqi-Iranian agreement on boundary demarcation on September 17, according to Western news agency reports.

When news of the abrogation reached Tehran yesterday, the Iranian majlis was in session discussing the issue of American hostages. The discussion immediately ended and the majlif went into a closed-door session to hear reports from Prime Minister Mohammad 'Ali Raja'i and Defence Minister Javad Fakuri on "the situation in western Iran."

Also attending the session were high-ranking officers of the three services of the armed forces.

Meanwhile, president and commander-in-chief of the armed forces Abolhasan Bani-Sadr, accompanied by Prime Minister Raja'i, met with the chiefs and senior officers of the forces at a meeting of the National Security Council to discuss the grave situation resulting from Iraq's unilateral abrogation of the boundary agreement.

The chiefs of staff of the three forces also met with Iranian leader Khomeyni for instructions.

In a speech yesterday President Bani-Sadr said that Iraq was concentrating troops for a "massive attack" on oil-rich Khuzestan Province in southwestern Iran.

A statement issued by the Iranian Foreign Ministry following the Iraqi abrogation says that the Iranian people would staunchly defend their country's independence and territorial integrity.

Meanwhile, Iraq continued its offensive against Iran.

It announced yesterday that all ships sailing in the Shatt al-'Arab, a strip of water where the Tigris and Euphrates rivers meet, must now hoist the Iraqi flag only and follow orders issued by the Iraqi authorities.

It has also been stipulated that these ships must now pay dues to Iraq in return for navigational services.

Shatt al-'Arab is the most important waterway for transporting oil and other cargoes to and from Iraq and Iran.

The military communiques issued by the two sides yesterday show that hostilities between the two countries along their 1,200 kilometre-border are escalating.

The latest fighting is centered on the Shatt al-'Arab estuary in the south and the oil fields on both sides of the Naft River.

IRAN-IRAQ HOSTILITIES ESCALATE

OW201951 Beijing XINHUA in English 1920 GMT 20 Sep 80

[Text] Beijing, September 20 (XINHUA)--Iranian President Abolhassan Bani-Sadr today assumed command of Iranian military operations in the escalating border conflicts with Iraq, according to reports from Tehran quoting Radio Tehran today.

The escalation followed the announcement by Iraqi President Saddam Husayn on September 17 to abrogate the 1975 border treaty between the two countries which gives Iran the right to use the Shatt al-'Arab waterway as a Persian Gulf outlet.

Radio Tehran warned that the escalated fighting might push the two countries to the brink of an all-out war.

In an interview with Radio Tehran yesterday, Iranian Prime Minister Mohammad 'Ali Raja'i accused Iraq of anti-revolutionary and un-Islamic behavior.

Iran, he said, would be prepared to accept mediation to sort out problems between the two countries if Iraq stopped its "inhuman and un-Islamic action" against Iran.

Meanwhile, a spokesman of the Iraqi Defence Ministry said that Iraqi air defence units shot down two Iranian F-5 fighters in Diyala and Maysan provinces on September 17 and 18. At the same time, he said, two Iranian tanks were destroyed and another captured. Iraqi Air Force also bombed Iranian artillery positions, he added.

Radio Baghdad said that the border fighting yesterday involved ground troops, tanks, jets and the naval units that engaged Iranian planes.

A statement issued by the Iranian military command on the state radio said that there was intense fighting on September 18 along the whole length of the frontier from Kermansh Province in the north to the Gulf in the south. The state radio also reported on September 18, Iranian troops destroyed an Iraqi post and four tanks.

HEROICS OF FRG AMBASSADOR, WIFE CITED

OW210750 Beijing XINHUA in English 0737 GMT 21 Sep 80

[Text] Beijing, September 21 (XINHUA)--Mr. Guenther Schoedel, ambassador of the Federal Republic of Germany to China, and Mrs. Schoedel made headlines in the PEOPLE'S DAILY today for their assistance in saving a Chinese boy who had suffered a serious injury.

Entitled "New Chapter of Friendship Between Chinese and German Peoples," the article was contributed by Liu Zhenfen, a staff member of the English language magazine WOMEN OF CHINA, who is mother of the wounded child.

On the afternoon of August 26, Liu Zhenfen wrote, her child went swimming at the Beidaihe Seaside Resort when he fell on the rocks and fainted on the beach. Bleeding in the head while threatened by onrushing waves, the boy was in great danger.

Ambassador and Mrs. Schoedel, who, happened to be around rushed over to the boy's rescue. The ambassador borrowed a bicycle and went straight to the guest house 2.5 kilometers away to order a car and, with the help of Mrs. Schoedel, sent the child to a hospital.

With the care of the doctors and nurses there, Liu Zhenfen said, her child has now been out of danger. During the boy's hospitalization, Mrs. Schoedel time and again inquired about his condition and sent him fruit.

Liu Zhenfen said that she admired especially the spirit of Mr. and Mrs. Schoedel in extending help to those in need. "They have written a new chapter with their own action in the annals of friendship between the Chinese and German peoples," she concluded.

VIEWS UPCOMING GENERAL ELECTION IN PORTUGAL

OW220300 Beijing XINHUA Domestic Service in Chinese 1522 GMT 20 Sep 80

[Roundup report by XINHUA reporter Wang Zhigen: "Portugal on the Eve of the General Election"]

[Excerpts] Lisbon, 19 Sep--Portugal will hold its second parliamentary election on 5 October. The new parliament will elect a new prime minister, form a new cabinet and revise the constitution. After the revision of the constitution, the Military Revolutionary Council will no longer exist as one of the state leading organs, thereby ending the transitional period of nearly 5 years. Therefore, it is generally agreed that the upcoming election is a major event since the collapse of the fascist regime in Portugal.

Since the first parliamentary election in 1976, the Socialists, the Social Democrats, the Social Democratic Center and the Communists have emerged as the four major political parties, dominating the political scene in Portugal. The upcoming election is in fact a battle among the four major parties.

After the first parliamentary election, the Socialist Party held 40.3 percent of the seats in the parliament and, as the largest political party, formed the cabinet. However, because the Socialists did not command a controlling majority in the parliament, the Portuguese Government has since July 1978 faced political crises and instability, as seen from frequent reshuffling of the cabinet. In July 1979 the president dissolved the parliament, and a midterm election was held in December. The democratic alliance formed by the Social Democratic Party and the Social Democratic Center as the main political parties won the election and formed the first majority government since 1976.

All the parties are now forming alliances in the election campaign. The Social Democratic Party and the Social Democratic Center are campaigning together under the name of the "Democratic Alliance." The Socialist Party, which had consistently called itself the first major political party and refused to form an alliance with other parties, took the initiative in forming the "Republic Socialist Front" with the Social Democratic Independent Action Party and the Socialist Leftist Union in July this year. On the other hand, the Communist Party has continued its election campaign under the "People's United Alliance" with the Portuguese Democratic Movement. The three major alliances are assuming their election postures and getting ready for battle.

Judging from the present situation, the Democratic Alliance is in a favorable position. For years, the Portuguese economy has faced serious crises. After it formed the cabinet in January this year, the Democratic Alliance took vigorous measures to mend the national economy under the slogan "Change Portugal." The national economy has seen noticeable improvement in the past 9 months. In foreign policy, the Democratic Alliance has taken an unequivocal stand on joining the EEC and fulfilling NATO obligations. In the wake of the Soviet invasion of Afghanistan, the Democratic Alliance strongly condemned Soviet hegemonism, recalled the ambassador from Moscow and declared temporary suspension of official contacts with the Soviet Union. Because the masses of electors still vividly remember how the Soviet Union in 1975 supported its proxy in subverting the Portuguese Government, the situation seems favorable to the Democratic Alliance.

However, since its formation, the Republican Socialist has concentrated its efforts on two issues: It has attacked the Democratic Alliance for desiring restoration and for frustrating the "25 April" results and at the same time refused to reach an understanding with the People's United Alliance headed by the Communist Party. The People's United Alliance has also concentrated its attack on the Democratic Alliance while resorting to the tactic of both wooing and attacking at the Republican Socialist Front. However, the development of the situation has been unfavorable to the People's United Alliance since the midterm parliamentary election, because the Portuguese Communist Party has defended the Soviet invasion of Afghanistan.

The Democratic Alliance is holding a weak controlling majority of 51.1 percent of the seats in the parliament. People are now paying close attention to whether the Democratic Alliance will be able to retain the slim majority and what will happen to the political situation in Portugal if the Democratic Alliance fails to do so.

The election campaign has now entered a climatic stage. The three alliances are waging hand-to-hand combat. It is still hard to predict the final outcome of the election.

NEW TURKISH GOVERNMENT FORMED

OW220126 Beijing XINHUA in English 0107 GMT 22 Sep 80

[Text] Ankara, September 21 (XINHUA)--A new Turkish government was formed here this evening ten days after the military takeover, according to a state radio announcement this evening.

The prime minister is the retired Admiral Bulent Ulusu.

Two deputy premiers: Zeyyat Baykara (the former contingency senator and deputy premier in 1974-1975 government), Turgut Ozal (the chief of state planning organisation in last government).

Among other twenty-four ministers, the foreign minister is Ilter Turkmen, national defense minister Haluk Bayulken, interior minister Selahattin Cetiner, and finance minister Kaya Erdem.

The twenty-seven-men cabinet is a mixed one which includes seven retired high ranking officers and twenty civilian experts. Almost all of them are independent.

The new cabinet will be supervised by the supreme authorities "the National Security Council."

The last civilian government of Demirel was toppled by the armed forces on September 12.

NEW TURKISH PREMIER ADDRESSES FIRST CABINET MEETING

OW230124 Beijing XINHUA in English 0108 GMT 23 Sep 80

[Text] Ankara, September 22 (XINHUA)--Turkish new Prime Minister Bulent Ulusu announced here today that one of the foremost duties of his government would be to root out anarchy and prevent acts of terrorism.

Ulusu made his opening remarks here this morning at the first meeting of the new cabinet which assumed office today.

He said, "All the shortcomings of our political and social order, which the public complain about, will be corrected and all legal and administrative measures will be taken to ensure a more efficient performance of the state service."

Measures for economic stability, he said, will be implemented "with utmost care."

He declared that Turkey's foreign policy will be guided by the motto, "Peace at home, peace in the world." He stressed that Turkey "will adhere to all international agreements including the NATO alliance" and will maintain and develop its social, cultural and economic relations with all other countries, especially with its neighbours, on the basis of mutual respect for independence and non-interference in each other's internal affairs.

The prime minister concluded by saying that his government would proceed with the drafting of a government programme.

XINJIANG ANCIENT BURIAL EXCAVATIONS EXHIBITION FEATURED

OW191416 Beijing XINHUA in English 1232 GMT 19 Sep 80

[Text] Urumqi, September 19 (XINHUA)--Something like one thousand people a day are visiting an exhibition here of six bodies buried 3,000 to 1,000 years ago.

They were selected from one hundred found in tombs by archeologists over the past two decades in Xinjiang.

Arid Xinjiang in the heart of Asia has a desert climate, probably accounting for the good state of preservation of the bodies. They were found one to two meters, or even four to five meters, under the present ground surface.

China's earliest and best-preserved corpse is on display. It is a woman lying on her side, who is thought to have died in her twenties some 3,200 years ago.

This estimate comes from carbon 14 dating of the wood covering the body. Xinjiang was then in the later period of primitive clan society.

The woman's brownish yellow hair is curled and plaited. Her skin has become brownish black, but the nails and muscles are fairly well-preserved.

The corpse was unearthed in Hami Prefecture in 1978. Another female body of the same date from the same area was displayed in Shanghai last year.

The tomb of a senior general, who died 1,347 years ago, yielded a record of his life and family history.

A tomb tablet with an epitaph was set up in memory of Zhang Xiong and his wife by their younger son, an official. Of yellowish grey sandstone coated in black, the tablet is 74.5 centimeters square and 14 centimeters thick. It was discovered in 1973 in Turpan.

General Zhang Xiong, who died at age 50, was the highest military commander of a border state that was conquered by the Tang Dynasty and turned into an administrative region in 640.

The body, estimated in life to have been 1.80 meters tall, was positioned as if he were astride a horse, emphasizing his military career. The face is square and has a calm expression. The greying hair, eyebrows and beard can still be discerned. The body is muscular.

A husband and wife buried together in a poplar coffin in the Taklimakan Desert in southern Xinjiang about 1,800 years ago offer information on the aspirations and costume of the time.

The man is dressed in a silk robe decorated with designs that symbolize "your heart's desire for generations to come, longevity and descendants." A bow and a quiver of arrows are by his side.

The woman's head rests on a pillow in the traditional shape of a cock, signifying that a woman should rise before dawn. Besides the pillow is a rattan woven dressing case with a comb, a powder bag and a bronze mirror.

She has a necklace of translucent glass beads and wears a copper ring with plum blossom designs on her right index finger.

Nearby are two women dating back 1,300 years, whose clothes show that they were ordinary people. Their hair is done in a bun. Silk covers their faces, as was the burial custom of Xinjiang at that time. The silk is now glued to the skin.

Also in display are coffins and funerary urns made of wood and pottery. There is a reconstructed full-size model of a typical tomb of the Tang Dynasty (618-907) with its sloping passage (shortened for the exhibition), small courtyard, antichamber, main room and side chambers. There is also a photo of the only paper coffin yet found in China.

The Xinjiang corpses dried out naturally, and the weight of a body ranges from one-fifth to one-fourth of that in life. They differ from Egyptian mummies which were embalmed or treated with preservatives.

Xinjiang Medical College formed a research group which has studied a middle-aged female corpse dating back more than 1,000 years. The blood type has been identified as "A." Only some muscles on the inside of the left thigh have some degree of elasticity. A muscle studied from this location still retained eight per cent moisture. X-ray revealed a large amount of gas of unknown properties within the brain pan. Analysis of a sample showed a fairly high content of oxygen that was purer than the present city air of Urumqi.

A silver Persian coin that had been placed at the back of the woman's mouth on burial is of the Sassanid Dynasty. The design shows an altar with rising flames flanked by priests.

BEIJING SETS UP HOME COUNSELING RESEARCH CENTER

OW200911 Beijing XINHUA in English 0726 GMT 20 Sep 80

[Text] Beijing, September 20 (XINHUA)--Beijing has set up a counselling research center in an effort to reduce the incidence of juvenile delinquency resulting from wrong home environments.

The center, known as a home counselling center and the first of its kind in China, is led by Han Zuoli, director of the City Education Bureau, and has a dozen educationalists as members and advisers.

It will undertake research in counselling especially in single-child families, and advise on educating problem children.

According to the city education bureau, the problem of home counselling has aroused great concern in Beijing. As more and more families have one child, it says, people tend to pamper and spoil the child or pay too much attention to the child's academic education at the expense of moral education. There are people who still "spare the rod and spoil the child," said a bureau spokesman, while others, who themselves are not well-educated or well-behaved, have a bad influence on their children.

A survey in the Xuanwu District by the education bureau shows that among the 157 minor offenders at the district reform school, about 56 per cent had improper home education. Twenty per cent had bad parents who ignored their children's offences and another 20 percent were ill-treated by stepfathers or stepmothers, but the rest were either spoiled or pampered or not given warmth and support when problems occurred.

Another survey of 53 juvenile delinquents in a neighbourhood community center shows that 80 per cent had bad or improper home training or none at all.

The research center says home education concerns not only the upbringing of young people but also has a tremendous influence on the whole society.

Lu Chang, deputy secretary-general of the research center, said the center will carry out an extensive survey on home education in single-child families, organize lectures and write articles for the local press elaborating on the need for home education.

Earlier this year, Beijing launched a child-education campaign and stressed the education of children in many emulation drives in which outstanding members of society were publicized as examples to be followed.

The city women's federation also published the magazine A MUST FOR PARENTS and the book "Guide for Family Hygiene" which provide guidelines for home education and upbringing of children.

BEIJING DRESS DESIGN STUDENTS HOLD FASHION SHOW

OW230925 Beijing XINHUA in English 0728 GMT 23 Sep 80

[Text] Beijing, September 23 (XINHUA)--A group of 15 young Beijing clothes designers today presented their fashion ideas to a large audience at the art gallery here.

It was a distinctly eclectic collection, incorporating the traditional elegance of Chinese dress and some of the best points of Western clothing.

As always at fashion shows, the reaction was mixed. There were some conservative frowns at necklines that looked a little lower than the usual and warm reception for clothes that emphasized smartness and practicability.

However, unlike most other fashion designers who get to put their ideas before the public eye, these youngsters have had less than one month's training. They enrolled this month at the dress design school at the Institute of Industrial Art which staged today's exhibition.

One of them, 23-year-old Chen Tianming, said he took up fashion designing "because I want to make people better looking. Clothes reflect a country's culture and the aesthetic level of the people," he said.

Apparently he also wants to bring a touch of fun to the clothing industry. Asked if yearly changes would become a feature of China's fashion scene, he said: "Wouldn't it be boring to wear the same kind of clothes year in and year out?"

A developing trend among Chinese designers is a mixture of Chinese fashions, some features of Western tailoring and the flaire of China's national minority costumes and the mix is being encouraged at the institute's design school.

And there will still be the ups and downs and fashionable nuances that characterise clothes for the discriminating buyer. Chen Tianming says, for example, that the hemline (strictly on the knee this year) will be lower next season. He's already preparing for it in his designs.

He gets his information from spot checks at shop counters throughout the city where he listens to customers' views.

"Living standards in China are on the rise," he said today. "This will manifest itself more and more in the clothes people buy. What we are trying for is clothes that are inexpensive and good looking."

Pai Chongli, the 45-year-old head of the design school, said his class is the first in the country. The clothes his students have designed may not be spectacular, he said, but the youngsters are promising.

The institute ran design classes in the dyeing and printing specialty in the early 1970's to give students a sense of proportion and an eye for color but it was only this year that fashion has been made a separate department.

There are two basic influences on Chinese clothes designing, said Pai Chongli--the rising aspirations of an increasingly better-paid public and the export trade.

Textiles are a big earner of foreign exchange and more attention will be paid to the requirements of overseas buyers, but manufacturers have shown themselves much more responsive to the needs of the home market in recent years.

In traditionally conservative Beijing, for example, where the rise in fashion consciousness has put a tremendous load on the city's tailoring shops, municipal authorities have invited five top Shanghai tailors to come and teach their skills to other people.

Experts from other cities are also being invited and retired tailors are being encouraged to open their own businesses and take on apprentices. This year a total of 21 new tailoring shops have been set up in Beijing.

BRIEFS

HANGZHOU DELEGATION TO BOSTON--A five-member delegation of Hangzhou Municipality, led by (Zhou Hui), acting chairman of Hangzhou Municipal Revolutionary Committee, left Hangzhou by train for Beijing on 12 September. From Beijing, the delegation will fly to Boston to attend the World Metropolitan Conference to be held there 21-27 September. During its stay in Boston, the Hangzhou delegation will meet with the Boston mayor to discuss the formalization of friendly ties between Hangzhou and Boston. It will also hold an exhibition of Hangzhou products in Boston. Chen Zuolin and several other leaders of Zhejiang Province and Hangzhou Municipality saw the delegation off at the Hangzhou Railroad Station. [OW181455 Hangzhou Zhejiang Provincial Service in Mandarin 1100 GMT 12 Sep 80]

YUGOSLAV JOURNALISTS IN NANJING--Accompanied by (Hu Sha), deputy chief editor of GUANGMING RIBAO, the delegation of the Yugoslav Journalists Association arrived in Nanjing from Beijing on 12 September. On the evening of 12 September, Jiangsu Vice Governor Wang Bingshi met and feted the delegation. While in Nanjing, the Yugoslav comrades visited a unit of the Nanjing PLA Units, an elementary school and the people's market and held discussions. The Yugoslav guests left Nanjing for Shanghai on 14 September. [Nanjing Jiangsu Provincial Service in Mandarin 2300 GMT 14 Sep 80]

U.S. BOTANISTS ACTIVITIES--Beijing, 15 Sep--A West Hubei botanical survey team jointly organized by Chinese and U.S. botanists recently visited a forest area in West Hubei to survey and collect plants. The team consisted of 5 U.S. and 11 Chinese botanists. Their main task included studying plant varieties and collecting specimens in the Shennongjia forest area. [Beijing XINHUA Domestic Service in Chinese 0750 GMT 15 Sep 80]

STUDY GROUP TO U.S.--Recently a five-member Anhui Provincial Confectionary and Syrup [Gaoguo Tangjiang 4741 2654 4743 3364] Technical Study Group left for the United States on a survey tour at the invitation of the (Niles) Corporation. The group was led by (Huang Cheng), vice chairman of the Provincial Scientific and Technological Commission, with (Wang Lixian), professor of the Huadong Academy of Sciences, as deputy leader. Before the group's departure, (Huang Cheng) briefed Gu Zhuoxin, secretary of the Provincial CCP Committee and chairman of the Provincial People's Congress

Standing Committee, on the survey plan. Gu Zhuoxin spoke on the purpose and tasks of the survey and on how to make the survey a success. [Hefei Anhui Provincial Service in Mandarin 1100 GMT 16 Sep 80]

JAPANESE AGRICULTURAL GROUP--A 22-member agricultural delegation from Japan arrived in Hefei for a visit. Members of the delegation were mainly experts and professors of agricultural economy. On 9 September, the Anhui Provincial Agricultural Society held a discussion meeting at the delegation's request. Twenty-two Chinese specialists, professors and scientists exchanged information on agricultural economy and agricultural production with members of the delegation at the meeting. The delegation left Hefei for Nanjing on 10 September. [Hefei Anhui Provincial Service in Mandarin 1100 GMT 18 Sep 80]

SRV TYPHOON--Beijing, September 21 (XINHUA)--Typhoon Ruth, the most devastating one to hit central Vietnam in 30 years, killed more than 100 persons and demolished hundreds of thousands of homes, according to press reports received here. Ruth, the sixth tropical storm to strike northern Vietnam in the past two months, slammed into Thanh Hoa Province on September 16. According to first reports, up to 80 percent of the homes in the province were leveled or badly damaged by the tropical storm as it raged over the area for eight hours. Seventy-six school buildings and all the kindergartens in the province were demolished leaving 120,000 students without classrooms. Hospitals were ripped down. The storm pulled down nearly 100 high-voltage electric pylons and disrupted the communication system in the province. Sixteen thousand acres of rice fields were seriously damaged. Typhoon Joe, which struck the northern sector of the country in July, wiped out about 3 million tons of rice. Typhoon Ruth probably caused another 2 million ton loss. All this added much to the existing serious food shortages in Vietnam. [Text] [OW210722 Beijing XINHUA in English 0708 GMT 21 Sep 80]

ENVOY BANQUET IN SWITZERLAND--Geneva, 25 Aug (XINHUA)--Chinese Ambassador to Switzerland Li Yunchuan gave a dinner in Berne this evening in honor of the Fribourg Defence Ensemble which is going to visit China. President of the Swiss Confederation Georges-Andre Chevallaza attended the dinner. He described the establishment of diplomatic relations between Switzerland and China as a great event in the history of the two countries' relations. On the occasion of the 30th anniversary of the establishment of diplomatic relations between the two countries, he said, the ensemble's visit to China will be of profound significance. He also wished continued development of the two countries' relations. [Text] [OW301215 Beijing XINHUA in English 1507 GMT 26 Aug 80]

YUGOSLAV OFFICIAL IN GREECE--Athens, September 20 (XINHUA)--Admiral Branco Mamoula, chief of general staff of the Yugoslav armed forces left here for Belgrade this morning at the end of his four-day official visit to Greece. During his stay here he had talks with General Agamemnon Gratsios, chief of general staff of the Greek armed forces, on matters of mutual interest. Mamoula also met with Greek Defence Minister Evangelos Averoff-Tositsas and the latter presented to him the insignia of the grand commander of the Order of Merit, awarded to him by President of the Republic of Greece Konstandinos Karamanlis. Admiral Mamoula also visited some units of the Greek armed forces and watched military exercises. [Text] [OW201602 Beijing XINHUA in English 1536 GMT 20 Sep 80]

KAMPUCHEANS ATTACK SRV AGGRESSORS--Beijing, September 19 (XINHUA)--Kampuchean guerrillas in northern Koh Kong Province on September 13 killed 21 Vietnamese troops during an attack on a transport platoon, Radio Democratic Kampuchea, reported. On September 11, the guerrillas stormed into a Vietnamese stronghold south of Mt. Kum Russei, putting 26 enemies out of action. On September 4, guerrillas in souther Koh Kong Province destroyed a stronghold defended by three platoons of Vietnamese troops located in the area from the Tong village to the Trapeang Rung road. On September 10-12, they repelled attacks mounted by Vietnamese reinforcements, annihilating another 47 enemies. On September 12, the guerrillas attacks Vietnamese troops from the Trapeang Rung road to the Andong Tuek road in the town of Thma Sar, putting 24 enemies out of action. According to another report by the radio, Kampuchean guerrillas in the Leach District, Pursat Province, recently made repeated attacks on a Vietnamese stronghold in the district, inflicting heavy losses on the enemy. ASIAN BASKETBALL CHAMPIONSHIPS--Hong Kong, September 21 (XINHUA)--South Korea retained title honour after beating China 101 : 68 here this evening in the final of the Eighth Asian Basketball Championship for women. China opened a 2 : 0 lead this evening, but was soon overtaken by South Korea, who dominated the field throughout the rest of the match by tight defence and accurate shooting. The score at half time was 51 : 34, South Korea leading. In the second half, the Chinese upgraded their defence and played a fast-attack game in a bid to narrow the gap in scores, but they met with half-court pressing defence put up by the South Koreans. China clinched the 1976 title in Hong Kong by beating the South Koreans in the final. The South Koreans, however, recaptured title honour in Kuala Lumpur two years later. In the other match earlier today, Japan scored a 98 : 57 win over Malaysia to take third place. Malaysia came fourth. The placings from the fifth to tenth are: Thailand, Hong Kong, India, Singapore, Indonesia and Sri Lanka. [Text] [OW211638 Beijing XINHUA in English 1618 GMT 21 Sep 80]

PRC TEAM BEATS JAPAN--Hong Kong, September 19 (XINHUA)--China outplayed Japan 91 : 65 at the Eighth Asian Basketball Championship for women here this evening. Half-time score was 46 : 34, China leading. The Sino-Japanese encounter was a hotly-contested match at which the Japanese players put up a gallant fight by seizing most of the rebounds. The Chinese players dominated the court but showed less accuracy in their middle-distance shooting than they were in the earlier matches at the championship. With this victory, China had an immaculate record of four straight wins and will meet South Korea in its final match on September 21. [Text] [OW191524 Beijing XINHUA in English 1510 GMT 19 Sep 80]

NETHERLANDS AGRICULTURAL DELEGATION--A seven-member agriculture delegation from the Kingdom of the Netherlands led by Gerrit Braks, minister of agriculture and fisheries, visited our province on 19 September and left Changchun for Beijing today. It was accompanied by Johannes Kneppelhout, the ambassador of the Netherlands to China. The delegation was welcomed and seen off at the airport by provincial deputy governor Mu Lin and by responsible persons of the provincial agricultural office. On the evening of 19 September, provincial deputy governor Mu Lin met with the delegation and hosted a banquet in their honor. During their stay in Changchun, members of the delegation expressed their opinions on scientific and technical cooperation in the fields of agriculture and animal husbandry, visited the provincial agricultural scientific institute, and embroidery and wood carving plants. They also toured the city. [Text] [SK211336 Changchun Jilin Provincial Service in Mandarin 1100 GMT 20 Sep 80]

U.S. FASHION SHOW--Shanghai, 20 Sep (XINHUA)--The first fashion show given by a U.S. firm was held on Friday in Shanghai in the 1-hour show sponsored by Halston Enterprises Inc, 16 models showed autumn and winter clothing made of silk, wool and synthetic fibres, skirts and sportswear. After the show, held in the Shanghai Exhibition Hall Chinese dress designers had talks with Halston designers and asked technical questions about designing. Halston Enterprises put on the show at the invitation of the China National Textiles Import and Export Corporation. [OW220221 Beijing XINHUA in English 0817 GMT 20 Sep 80]

OPEC OIL PRODUCTION CUT--Beijing, September 20 (XINHUA)--Eleven of the 13 members of the Organization of Petroleum Exporting Countries agreed at a special meeting in Vienna on September 17 to cut their oil production by 10 per cent, according to Western news agency reports. The reduction aimed at ending the current world oil glut and checking the stockpiling by industrialized countries. Among the 11 members which agreed to cut production are Saudi Arabia and Iraq, two major oil producers of the organization. The agreement was a gentleman agreement which was not written into the final Vienna communique and no specific date was set for the cut. However, Iran and Iraq have decided to cut their oil production as of Octbber 1. The OPEC oil ministers estimated the current over-supply of oil at between 2.5 and three million barrels per day. Total OPEC production before the cut was put at around 27 million BPD. According to acting Iranian Oil Minister 'Ali Akbar Mo'infar, within two to three months the supply of oil could be on a par with consumption. [Text] [OW211246 Beijing XINHUA in English 1236 GMT 21 Sep 80]

CUBA RETURNS HIJACKERS--Havana, September 18 (XINHUA)--The Cuban Government announced here today that the two Cubans who had hijacked an American jetliner to Havana on Wednesday will be returned to the United States immediately. The airliner was the 10th hijacked to Cuba in less than 5 weeks. A communique reported in the newspaper GRANMA today said that the Cuban Government took the decision because the hijackers had disregarded the authorities' warnings. On September 16, the Cuban Government announced that in the future, it would take penal action against hijackers or return them to where they come from. [Text] [OW181922 Beijing XINHUA in English 1901 GMT 18 Sep 80] Beijing, September 19 (XINHUA)--The U.S. State Department yesterday welcomed the Cuban Government's decision to return two Cuban hijackers to the United States for trial, according to reports from Washington. The Cuban Government announced yesterday that it would turn over the two Cubans who hijacked a U.S. passenger plane on September 17. There have [been] 13 hijackings of U.S. civil planes this year, of which ten have taken place over the past five weeks. State Department spokesman John Trattner described the decision as a "positive step." A UPI dispatch said that although American hijackers have previously been returned to the United States by the Cubans, "this is the first time that Cuban citizens have ever been turned over to American authorities." AFP quoted a diplomatic analyst as saying that this was a clear expression of Fidel Castro's goodwill toward U.S. President Jimmy Carter before the U.S. general elections in November. [Text] [OW191620 Beijing XINHUA in English 1610 GMT 19 Sep 80]

WEST BERLIN RAILROAD STRIKE--Bonn, September 20 (XINHUA)--The speed train system in West Berlin and the railway freight transportation between West Berlin and the German Democratic Republic remained completely paralyzed as the strike of 1,500 West Berlin railroad workers continued today, according to local press reports. The strike started when small groups of workers, of the system under the management of East German Reichsbahn State Railroad, left their jobs on September 15. The strikers pressed for higher wages, better fringe benefits and the reinstatement of the 80 workers fired for taking part in the strike. They also demanded a definite answer from the East Berlin railroad management. It was reported that the railroad authorities kept refusing to negotiate the strikers' claims. Instead, it urged the strikers to return to work immediately. The demand was rejected by the strikers. [Text] [OW211220 Beijing XINHUA in English 1200 GMT 21 Sep 80]

JOURNALIST DELEGATION DEPARTS--Geneva, September 21 (XINHUA)--The Chinese journalist delegation led by Wang Yi, first secretary of the All-China Journalists' Association, left Zurich for Brussels this evening upon concluding a ten-day tour of Switzerland. The Chinese journalists arrived in Switzerland on September 10. They were received by President of the Swiss Federal Council Georges-Andre Chevallaz and head of the foreign department Pierre Aubert. The Chinese delegation toured Geneva, Berne, Basel, Zurich, Lugano and other cities and acquainted itself with Swiss industry, agriculture, education, civil defense and tourism. [Text] [OW220218 Beijing XINHUA in English 0209 GMT 22 Sep 80]

BEIJING INDUSTRIAL ART SHOW--Beijing, September 23 (XINHUA)--Beijing Institute of Industrial Art opened a large exhibition of goods and art work today at the China Art Gallery. The show will close on October 19. The institute, which designed the interior decor of a number of landmark buildings in Beijing, including the great hall of the people and the new Beijing International Airport, also has departments teaching the design of furniture, utensils and pottery. For the next month, the exhibition, which occupies all three floors of the gallery in nine pavilions, will be a focal point for discussions between Chinese design specialists from all over the country. Among the chief attractions at today's opening were a fashion show by novice designers who have just begun training at the institute and displays of uniquely-Chinese pottery, porcelain ware and furniture. Yuan Yunpu, an associate professor of the institute, said the quality of China's porcelain and pottery ware has been assessed as among the highest in the world, but the amount of foreign exchange earned by its export is among the lowest. The purpose of the exhibition, he said, is to bring the quality of Chinese design and the aesthetic quality of many Chinese-made goods to the attention of the buying public and government trade departments. [Text] [OW231243 Beijing XINHUA in English 1224 GMT 23 Sep 80]

SHANGHAI EDUCATIONAL COUNSELING--Beijing, 18 Sep (XINHUA)--Shanghai YOUTH NEWS, the Youth Palace and the Shanghai Association for the Promotion of Popular Science and Technology Among Youth, has set up a consulting center, according to today's CHINA YOUTH NEWS. The idea was first proposed by a graduate student of the China University of Science and Technology after he had a meeting with young people who were studying by themselves in Shanghai. This center serves middle school graduates who are waiting for assignment of work but wish to study a subject in natural or social sciences. Anyone who has completed basic college courses by himself and wishes to continue his studies is also welcome to contact the center for an appointment for consultation. Experienced teachers from middle schools and universities and specialists meet them and give advice on what to study, what books to choose and how to organize a study program. [Text] [OW181424 Beijing XINHUA in English 0739 GMT 18 Sep 80 OW]

POLISH OFFICIAL EMBEZZLEMENT CHARGES--Warsaw, September 22 (XINHUA)--Poland's prosecutor-general Lucjan Czubinski has asked for suspension of the parliamentary immunity of Maciej Szczepanski, the ousted head of Polish radio and television, according to a PAP report. Szczepanski was relieved of his post a month ago, at the height of the Baltic coast strikes. A committee has been formed early this month to investigate into charges of embezzlement and personal enrichment. It was said he had acquired by abusing his official position a fortune worth two million U.S. dollars including seven cars, luxury villas at home and abroad and a yacht. [Text] [OW230927 Beijing XINHUA in English 0739 GMT 23 Sep 80]

SOVIET MINISTER VISITS CUBA--Havana, September 18 (XINHUA)--Soviet Foreign Minister Andrey Gromyko left here for the United Nations upon concluding his official visit to Cuba. It was reported that he and President of the Council of State Fidel Castro had "secret talks" on the international situation and bilateral relations. TASS reported yesterday that "the Soviet Union and Cuba have identified views on all major international problems." Gromyko arrived in Cuba on September 15 at the invitation of the Cuban Government. The visit was his second to that country. [Text] [OW190858 Beijing XINHUA in English 0720 GMT 19 Sep 80]

PARTY AND STATE

EXPLANATION OF COUNTY-LEVEL DIRECT ELECTIONS

Beijing RENMIN RIBAO in Chinese 20 Aug 80 p 3

[Answer to Reader's Query, by Zhang Huanguang [1728 3562 0342]: "What Is Meant by Direct Elections at the County Level?"]

[Text] Direct elections at the county level are part of the new election system now being practiced in our country. Under this system, deputies to the county-level people's congresses are elected directly by the voters living in various constituencies of the counties. In the past, elections were confined to administrative divisions lower than county level, including people's communes, townships, municipalities without administrative districts under them, and municipal districts. Deputies to the people's congresses at the county and higher levels are elected by the people's congresses at the next lower level. Article 24, the new electoral law adopted by the Second Session of the Fifth National People's Congress, stipulates: "Deputies to the National People's Congress and to the people's congresses in provinces, autonomous regions, municipalities directly under the central government, cities divided into districts, and autonomous prefectures are elected by people's congresses at the next lower level. Deputies to the people's congresses of municipalities without administrative districts under them, municipal districts, counties, autonomous counties, and people's communes and townships are elected directly by the voters." The extension of direct elections to the county level, as provided for in the new electoral law, is a significant step in gradually perfecting our country's election system, an important measure in further expanding the scope of people's democracy, and an essential reform of the election system. This direct election system has more advantages than the indirect election system. Under the direct election system, voters can directly elect deputies whom they trust to form the state organs which will serve their interests through the exercise of state power. During their tenure, deputies elected to the people's congresses are required to keep in close touch with their constituents and bring them up to date on the principles, policies, decrees, and instructions of the party and state, and to place themselves under the supervision of the masses. The deputies must also keep the line of communications to their constituents constantly open, so that they can report their work to the latter and receive their suggestions and opinions useful to the operation of the people's congresses. Through direct elections, the people are bound to increase their awareness of being the masters of their own country and strengthen their sense of responsibility. Under their supervision, the deputies will have no alternative but to try their best to serve the people by improving the efficiency of the state organs.

In conclusion, it must be noted that at present, it is still impossible to have direct elections at all levels in a vast and populous country like ours, where political, economical and cultural developments are still not well balanced, communications are not well developed, and experience is still lacking in holding nationwide direct elections.

HIGH ELECTION TURNOUT IN MINORITY COUNTY OF SICHUAN

Beijing RENMIN RIBAO in Chinese 20 Aug 80 p 3

[XINHUA report from Chendgu: "County-Level Elections Take Place in Sichuan"]

[Text] Xide County in Liangshan Yi Autonomous Prefecture, Sichuan Province, has concentrated on uncovering and solving, in a manner appropriate to local conditions, special problems that have surfaced during the recent elections, and has scored some successes in this field.

Xide County is a multinational county, with the people of Yi nationality accounting for a large percentage of its population. Aware that the people of the Yi nationality there do not understand Mandarin, the county public relations department has taken initiative to publish and interpret the new electoral law in the Yi language.

In addition, two booklets entitled "Information on the Election Campaign" and "Answers to Questions about Elections" have been compiled and published for distribution to the people of Yi nationality as a guide to their understanding the new electoral law and related policies.

Another problem that surfaced during the elections was the county government's difficulty in determining the age of voters, since the people of Yi nationality count their age as 1 year old at the time of birth. To straighten out their age, officials in charge of elections had to interview the parents, neighbors, relatives and friends of voters.

Xide County is located in a mountainous area where the population is widely scattered and isolated from the rest of the prefecture. Despite this, more than 97 percent of the eligible voters turned out to cast their ballots on election day, and 98.8 percent of ballots counted proved valid. This success has prompted the local people to comment: "This election has produced results to our satisfaction!"

NEW BOOK ATTEMPTS TO ANSWER QUERIES ON ELECTORAL SYSTEM

Beijing RENMIN RIBAO in Chinese 20 Aug 80 p 3

[News report: "The Book 'Questions and Answers on the Election System' Is Off the Press"]

[Text] A book entitled "Questions and Answers on the Election System," written by comrades Xu Chongde [6079 1504 1795] and Pi Chunxie [4122 4783 0588] and published by the Qunzhong Publishing House, has come off the press.

Included in the book are 120 questions and answers. It offers, in laymen's language, detailed explanations on the basic theory and application of China's election system. It also covers subjects of interest to the voters, ranging from the significance of the election system to the distinction and relationship between the electoral law and other laws; from the definition of citizens and voters to their right to elect and to run for election; from universal suffrage to the method of calculating the voting age; from the question of the voting rights of persons serving prison terms to the problems facing the PLA fighters, overseas Chinese, minority people and women during the elections; from direct and indirect elections to the secret ballot; and from the principle guiding the geographical apportionment of deputies to the National People's Congress to the election of deputies to local people's congresses in autonomous regions and the division of constituencies.

The book applies the Marxist viewpoint to answer some basic questions about China's election system and to contrast it with the systems in the capitalist countries. In discussing the division of constitutencies and the nomination of candidates, it analyzes the geographical apportionment of representation and the election campaigns in capitalist countries. The book can be used as a valuable reference material by counties and communes throughout the country.

NEW STATE COUNCIL ARRANGEMENTS REPORTED

HK191158 Hong Kong HSIN WAN PAO in Chinese 19 Sep 80 p 4

[HSIN WAN PAO 19 September special dispatch from Beijing: "Wan Li Ranks First Among the 13 Vice Premiers; Yang Jinren, Zhang Aiping and Huang Hua Retain Their Original Ministerial Posts, and It Is Said That the Would-be Defense Minister Is Not Zhang Aiping But Someone Else"]

[Text] After a personnel reshuffle in the State Council--China's cabinet--there are now 13 vice premiers, with Vice Premier Wan Li ranking first among them.

I visited the parties concerned today and asked them to give me a namelist of the vice premiers of the State Council. Wan Li was in first position on the namelist.

The new Premier Zhao Ziyang and Vice Premier Wan Li were both in charge of the work of provinces when they emerged again after the smashing of the "gang of four." Zhao Ziyang took charge of the work of Sichuan and Wan Li took charge of the work of Anhui. Their administration of provincial affairs was very much based on the will of the people in the two provinces. Around the first half of 1979, a folk rhyme spread in mainland China saying "if you want to eat grain, you should go find (Zhao) Ziyang; and if you want to eat rice, you should go find Wan Li." Zhao Ziyang and Wan Li have indeed scored achievements in improving the living standards of the people in Sichuan and Anhui. Wan Li is now vice premier in charge of day-to-day affairs.

The other 12 vice premiers listed are: Yu Qiuli, Geng Biao, Fang Yi, Gu Mu, Yao Yilin, Kang Shien, Chen Muhua, Bo Yibo, Ji Pengfei, Yang Jingren, Zhang Aiping and Huang Hua. These vice premiers each have their own special responsibilities through a division of labor. For instance, Yu Qiuli is in charge of energy resources; Fang Yi is in charge of education, science and culture; Gu Mu is in charge of capital construction; Yao Yilin is in charge of planning work (he is concurrently chairman of the State Planning Commission); Chen Muhua also takes charge of planned parenthood work apart from her concurrent post as minister of the Ministry of Economic Relations With Foreign Countries; and so forth.

It was learned that the three newly appointed vice premiers Yang Jingren, Zhang Aiping and Huang Hua have retained their original ministerial posts. Hence, their specific responsibilities are also clear. As for the vacant post of national defense minister, there were rumors in Hong Kong that Zhang Aiping would be appointed to fill the post. However, it was said here that someone else would be appointed as the new national defense minister. Facts will later prove who is right.

YE XUANPING'S GUANGZHOU APPOINTMENT REPORTED

HK220131 Hong Kong TUNG HSIANG in Chinese No 24, 16 Sep 80 p 34

[Article by Chien Chen: "Ye Jianying's Son in Guangzhou"]

[Text] I went to Guangzhou last June and it so happened that the Guangzhou international soccer invitational tournament was held at that time. Since I am a soccer fan, I certainly did not want to miss it.

The day the soccer tournament opened, I was not able to get myself a ticket. I learned from the newspaper the next day that the Guangdong Provincial CCP Committee almost turned out in full strength to attend the opening ceremony. Among the long namelist of leaders, I found a name strange to me: Vice Provincial Governor Ye Xuanping. Who is he?

On the evening of the final soccer event, I was finally able to get a ticket for a very good seat. I was right next to the rostrum and could, therefore, see quite clearly the distinguished guests sitting on the rostrum.

The provincial and municipal leaders present on that evening included Guangdong provincial governor Xi Zhongxun and also Wu Kehua, Yang Shangkun, Liu Tianfu and Wu Lengxi. Ye Xuanping was also present, and he also presented the championship award after the game. When I saw Ye Xuanping, I was struck dumb for a while: why does this man look so familiar to me? Where have I seen him before?

The fact that among the large number of vice provincial governors Ye Xuanping was the one to present the award demonstrates that he has probably replaced Yang Kanghua and taken charge of running the day-to-day affairs of Guangdong's culture, education and physical culture. Vice provincial governor Yang Kanghua was previously responsible for these tasks. During the first Guangdong-Hong Kong Cup Soccer Tournament, Yang Kanghua personally headed a team to Hong Kong; during the second Guangdong-Hong Kong Cup Soccer Tournament, which was held in Guangzhou, Yang Kanghua also presented the award. Ever since the movement to comb out the elements of the "gang of four," Yang Kanghua has been responsible for the work of Guangdong's culture, education and physical culture. However, recently he suddenly disappeared from the scene and Ye Xuanping replaced him in these tasks. In addition, judging from news reports, it seems that Ye Xuanping has also shared responsibility for some overseas economic work.

Who exactly is Ye Xuanping? I later learned that he is the eldest son of NPC Standing Committee Chairman Ye Jianying. No wonder he looks so familiar to me. His appearance greatly resembles the middle-aged Ye Jianying.

Nevertheless, Ye Xuanping's rise was a bit abrupt. According to a friend in Guangzhou press circles, his name was not found in the namelists of the chairman, vice chairmen and members of the Standing Committee of the provincial people's congress, the provincial governor and vice provincial governors, or the responsible people of various departments elected at the second session of the Fifth Guangdong Provincial People's Congress held on 26 December last year.

It was not until last April and at the suggestion of provincial governor Xi Zhongxun that the third session of the Standing Committee of the Guangdong Provincial People's Congress adopted the decision to appoint Ye Xuanping as vice governor of Guangdong. However, people know very little about Ye Xuanping's past experience. It was said that he was a technician and was a prefectural level cadre before becoming vice provincial governor.

As soon as Ye Xuanping appeared, Yang Kanghua vanished from the ranks of the vice provincial governors. At the closing ceremony of the final event of the Guangzhou international soccer tournament, the names of the provincial and municipal leaders were listed in the following order: Xi Zhongxun, Wu Kehua, Yang Shangkun, Liu Tianfu, Wu Lengxi, Wang Ning, Dong Jingbo, Liang Weilin and Ye Xuanping.

Recently, there were rumors in Guangzhou that Ye Xuanping would probably have a new appointment. It was said that Yang Shangkun would be transferred to the central authorities shortly and the vacant post of mayor of Guangzhou would probably be filled by Ye Xuanping.

COMMENTS ON TRIAL OF 'GANG OF FOUR'

HK181447 Hong Kong HSIN WAN PAO in Chinese 17 Sep 80 p 1

[Unattributed "New Talk" column: "On the Trial of the 'Gang of four'"]

[Text] Since the conclusion of the NPC session, people's attention has been partially diverted to the trial of the "gang of four." It was previously reported that the trial would take place in September. Then it was reported that the trial would take place after the NPC session. Now it has been reported that the trial will be postponed and will not be held this year.

The flagrant crimes of the "gang of four" are apparent even without a trial, but since we are stressing rule by law, a trial must be conducted. A trial can be conducted secretly or in public. It seems that it would be preferable not to have a public trial. The "gang of four" are not ordinary criminals. One was a vice chairman of the CCP Central Committee. Another was a Standing Committee member of the Politburo and the other two were Politburo members. Each one knows many state secrets. No country allows its state secrets to be divulged. The "gang of four" must be tried and the state secrets must be guarded, and the way to satisfy both requirements is to avoid a public trial or to conduct it in a semiclosed way.

Of these four persons, Jiang Qing was in a more special and subtle position. When the names of the "gang of four" first appeared, their order was Wang, Zhang, Jiang and Yao according to the importance of their official posts. Although Jiang Qing's post was not the highest, her position was actually the highest. Relying on her husband, the wife became highly placed. When Hua Guofeng delivered an important speech at the NPC session, he mentioned the "Jiang Qing clique." It is practical and realistic to equate the "gang of four" with the "Jiang Qing clique" and to put Jiang Qing first among the four persons.

Of these four persons, Jiang Qing was the most arrogant and Zhang Chunqiao was the most insidious. This was true in the past and it is still true today. According to a recent report, when a preparatory trial was conducted not long ago Zhang Chunqiao remained silent while Jiang Qing roared and imputed everything to "God." This was not strange; it would have been strange if she had not done so. From this, we can see that this film actress of the 1930's still wanted to act in a "play" but had no desire to repent.

Of course, Chairman Mao cannot escape responsibility for the 10-year catastrophe. Although he was used by the "gang of four," he "personally initiated and directed the Great Cultural Revolution" in that year and could not stay aloof from the "matter of responsibility." Even so, the "gang of four," particularly Jiang Qing, could not evade their towering crimes. In the last days of his life, Chairman Mao Zedong had already put forward the problem of handling the "gang of four." When Deng Xiaoping was in charge of the work of the central authorities for Premier Zhou Enlai he struggled against the Jiang Qing clique. He got into trouble because of this.

The trial of the "gang of four," summing up the Great Cultural Revolution and appraising the merits and demerits of Chairman Mao Zedong (the last two items will be carried out at the 12th National Congress of the Chinese Communist Party at the beginning of next year) must be done well so that we can lay down our burdens and wholeheartedly advance on the road of the four modernizations.

MANAGEMENT OF LEADING CADRES CRITICIZED

Beijing RENMIN RIBAO in Chinese 19 Aug 80 p 8

[Article: "Do Not Spank the Wrong Person"]

[Text] In "Long Wen Bian Ying" ["Long Wen Whips the Shadow"] there is a story called "Ku Di Zhang Li" ["Ku Di Beats the Servant"]: During the Northern and Southern Dynasties there was a man with a double surname called Ku Di. He was ignorant and stupid and when at home he was always troubled with flies, so he told his servant to beat them: "It is your job, so you must prevent them from entering." The servant was originally only responsible for minding and protecting the house, so how was it that he was to manage the flies? But the stupid Ku Di regarded him as being disloyal and his letting the flies in as a crime, and so he beat the servant. This is spanking the wrong person.

Seriously analyzing this, there are many reasons for errors and mishaps in work. Some are due to neglect of duty by the party concerned, and when criticizing and teaching, if the person concerned is "spanked a few times" as a means of teaching, that is all right, and the one suffering the thrashing can say nothing. Yet, in actual work, there are many problems created by leading cadres and after the mishap occurs the leaders often only mention casually a few sentences of self criticism and the stick still hits the lower cadres and the masses.

Because certain flaws still exist in the cadre system, among the leading cadres there are not many who are both red and expert. Especially in the departments and units, there are even fewer who are politically strong and proficient in professional work. Yet a minority of people from the units are often able to decide the fate of the large number of cadres. Under these conditions, cases where the right person is not chosen for the job occur often. When those without learning are used, results are bad and errors occur, and then who should be blamed? This makes me think of the bitter experience of the great Russian poet Pushkin. Because Pushkin called for opposition to the tsar's government, he was sent into exile. During one period there was an official overseeing him who was as stupid as Ku Di. He actually sent Pushkin to Odessa to investigate locusts and organize their extermination. Pushkin expended great effort and after running around all day he still had no success. In the end he could not even write a report and only composed a few lines of poetry: "Locust, flying." It is hard to say that we can blame Pushkin for his inability.

Some leaders who unconscientiously study the party's lines and policies only enjoy turning them back and forth on upper level leaders and listening here and there only consider what "spirit" there was. Some leaders who are "officials" are habitual and always enjoy "having hundreds at their disposal," act arbitrarily, do not investigate or study, rely on old experience, do things according to old ways and "cut with one blow." Some leaders are ignorant and incompetent, only talk nonsense and give arbitrary and impracticable directions. In a certain place there was a leading cadre in charge of cultural work who flew into a rage after hearing a symphony orchestra. He asked accusingly of the orchestra conductor why he was so impolite in always having his rear face the audience? If the conductor complied with this leaders "view" and made a 180 degree turnabout, the whole orchestra would be in confusion, and then who is it that should be spanked?

As I see it, these important problems are due to not choosing the right person for the job or to mistakes in command. In either case, the leader's responsibility should first be looked into and then the stick will not be able to randomly fall on lower cadres and the masses. At present, what is difficult is that the stick is still being held by these leaders. To give the stick over to someone else so that you get a spanking is hard, and raising the stick oneself to give oneself a spanking is even more difficult. Therefore, from a long-range view, there still remains the problem of how best to handle the "stick."

PARTY AND STATE

REDRESSING UNJUST, FRAME-UP, MISJUDGED CASES SPEEDED UP

Beijing RENMIN RIBAO in Chinese 8 Aug 80 p 4

[News report: "The Attitude Toward Redressing Unjust, Frame-up, and Misjudged Cases Has Changed From 'Antagonism' to Positive Support"]

> [Text] Editor's note: In the work of redressing unjust, frame-up and misjudged cases, there have been occurrences in some areas of failure to carry out the tasks through delay and of failure to carry out the tasks through resistance. There were many reasons for this, in some cases because of the seizure of power by bad men or factional interference, and the refusal to implement party policy; in some cases they have been unable, even today, to break with the old conventions because of the influence of the ultraleft line. Comrade Cao Kaiye [2580 7030 2814], deputy chief of the Huangshi Municipal Public Security Bureau is one who "locked horns" because his thinking was not liberated. Under supervision of and education by the superior party committee and concerned departments, he has been transformed comparatively well. This shows that resistance to the redressing of unjust, frame-up and misjudged cases comes from all sides, and that leading organs and leading comrades must go among the masses, aim at specific circumstances, adopt strong measures, eliminate all kinds of resistance and interference, and thus secure a good beginning and a good conclusion for this work.

Special to this paper: Reporter Xiao Du and news researcher Zhang Shuzheng report: Under the help of and education by his superiors and concerned departments, one of the leading members of the personnel of the Huangshi Municipal Public Security Bureau in Hubei Province has corrected his perception of the party's political line and ideological line, has been liberated from the fetters of ossified and semi-ossified thinking, and has conscientiously implemented the party's policy for accelerating the progress of redressing, frame-up and misjudged cases.

As soon as the work of redressing unjust, frame-up and misjudged cases was begun, the Huangshi Public Security Bureau reviewed and reversed a group of misjudged cases, and processed a great many letters and personal visits, achieving a certain accomplishment. Later, as the whole city got deeper and deeper into the work of implementing the policy, many units, through a reexamination of cases that had been determined by the Public Security Bureau to be so-called "vicious attacks," "counterrevolutionary cliques," and complex cases in other areas, proposed demands for redress and conveyed them to the Public Security Bureau. However, the Public Security Bureau did not put them off with delays, but replied that they "maintained their original conclusion." In mid-September of last year, 116 "replies" like this had piled up in the case files of that bureau, and particularly more than 30 complex cases that had only been clarified through a great deal of effort on the part of several units, but which they were still "holding out" against.

Through an investigation, the Huangshi Municipal Communist Party Committee and the concerned departments of the province came to understand the reasons why the Public Security Bureau had "locked horns," the principal one being that a few of the comrades had not liberated their thoughts from the fetters of "rather 'left' than right." Deputy Bureau Chief Cao Kaiye, who was personally responsible for handling the cases, had been chairman of a peasant's union at the time of the land reform and later was a long time in public security work, having been acclaimed a model of outstanding service on the public security front a number of times. For many years, a tenet of his work was that "class struggle is the key link," and the "deification of leaders" had a deep effect on his thinking. He believed that the past handling of the cases had been correct, especially those involving non-criminal speech and actions by persons of bad background or dubious history, and he could not cast off the frame of reference in "raise to the highest plane of principle, determine character severely, and deal with harshly." When he encountered a case of so-called "vicious attack," he dared not touch it; even though some obtained redress, they had to retain a slight "tail."

The municipal party committee and the concerned departments of the province resolutely helped the Huangshi Municipal Public Security Bureau leadership and case-handling personnel eliminate "the inhibition of the golden hoop." In mid-September, division chief Wei Hengrong [7279 1854 2837] was sent by the Provincial Public Security Bureau to lead a work team to the Huangshi Municipal Public Security Bureau. From among the cases that the Municipal Public Security Bureau had classed as "maintaining the original conclusion," they selected 30-odd for examination, and after conscientious review and research, arrived at a disagreement on 24 of them. For example, there was an old worker at the Huangshi Boiler Factory who, during the decade of confusion, said that overturning the old cadres was "killing heroes," that taking part in armed struggle was "taking instructions from Jiang Qing," and for this he was branded a "counterrevolutionary." How can we maintain the original conclusions on this kind of so-called "vicious attack?"

Wei Hengrong and the others did a convincing analysis of the case file, shook up the thinking of the leaders and case handlers of the Municipal Public Security Bureau, and secured some progress in the case handling work. Later, provincial and municipal personnel responsible for implementing policy and comrades of the Municipal Bureau did a concrete analysis of how the "replies" tallied with the facts, and how they were inappropriate to the implementation of policy, thus advancing the unity of their thinking and perception.

To deepen the perception of the importance of redressing unjust, frame-up, and misjudged cases, Bureau Chief and Secretary of the Bureau Party Committee Liang Chengwen [2733 2052 2429] on one hand organized the bureau's case handling personnel for an in-depth study of the Central Committee documents and a comprehension of the spirit of the policies; on the other hand he participated in the case handling conferences and personally reviewed the cases. He analyzed the cases one by one and encouraged Comrade Cao Kaiye to consider many questions: during the four clean-ups, Huangshi was a test point and the area of attack was relatively broad, and in that instance he was acclaimed a "shock worker"; when the decade of confusion started, "sweeping away monsters and demons," he was again acclaimed a "shock worker." At that time he was chief of a dispatch station and had not thought clearly about whether some things were correct or not, but only carried them out hard-headedly. Practice is the only criterion for examining truth. Today, in retrospect, there really are a great many unjust, frame-up and misjudged cases; particularly with regard to those who voiced grievances about the decade of confusion and who expressed opinions about the errors and deficiencies of the party's work and leadership, for an erroneous method of "raising to a high plane of principle, determining character severely, and dealing with harshly" was adopted, necessarily confusing contradictions of two different kinds. When others do not obey and file appeals, we naturally have the duty to examine and revise in accordance with party policy and in line with the spirit of seeking truth from facts, so that "if all is in error, correct all, if party is in error, correct part, and if there is no error, correct nothing," but we definitely must not substitute sentiment for policy.

After several rounds like this, the leadership and case handling personnel of the Municipal Public Security Bureau had a deeper understanding of the spirit of the Third Plenary Session of the 11th CCP Central Committee and had raised their consciousness of the implementation of party policy. With regard to cases reported from the various units, they put everything in order, clarified the key points, and concentrated their strength on fighting a war of annihilation. With regard to a few cases that had involved appeals to city, provincial or national authorities without having been resolved for a long time, and other complicated cases, the bureau leadership personally participated in the review, and some were decided collectively by the party committee of the bureau. When reinvestigating a verdict, those cases that involve treating ideological problems as political problems, treating problems of method as problems of standpoint, treating problems of background as problems of behavior, and the substitution of criminal procedures for administrative measures are corrected and redressed by seeking truth from facts. Of the 116 cases on which the reply had been to "maintain the original conclusion" before the middle of last September, 101 have been corrected through a review like this. They have also taken their cases on tour and spontaneously exchanged ideas on case handling with other units. Since October of last year, the Municipal Public Security Bureau has dispatched men on a total of 33 trips to 10 units to promote the work of correcting 43 cases in which the original unit had proposed maintaining the original conclusion. Up to the present, the Huangshi Public Security Bureau has reinvestigated more than 90 percent of the political cases, criminal cases, and cases of background status on which appeals had been filed; 33 complex cases have been disposed of, of which 28 were redressed and corrected. They are continuing to deal with the remaining cases and review a few that have left tails, determined to carry out the work of redressing unjust, frame-up, and misjudged cases thoroughly.

ERRANT ZHEJIANG CADRES' ATTEMPTED REPRISALS SCORED

Hangzhou ZHEJIANG RIBAO in Chinese 22 Aug 80 p 1

[Article: "Enforce Party Discipline; Uphold 'Guiding Principles'"]

[Text] The Standing Committee of the Provincial CCP Committee recently reopened discussions on the case involving Ye Ruiya [0673 3843 3768] and others who sought to strike back after having been found guilty of infractions of party discipline. A decision was made to strip Ye Ruiyu and Chen Wencong [7115 2429 5115] of all their positions in and outside the party and to give a severe reprimand to the cadres of the Wenzhou Municipal Party Committee who were implicated in the incident. This action on the part of the Provincial CCP Committee is an entirely proper action in its effort to enforce party discipline, uphold the party's "guiding principles," and safeguard the democratic rights of party members and the people.

According to "Certain Guiding Principles Regarding Political Life Within the Party," party members are entitled to make criticisms and recommendations to party organizations and workers in leadership positions at various levels. They are also entitled to make appeals and accusations at party meetings or to address themselves to higher organizations and even to the Central Committee itself. It is strictly forbidden to strike back at those who offer criticisms or to take retaliatory action against the plaintiffs and appellants. Nevertheless, Ye Ruiyu, deputy secretary of the Wenzhou Municipal Party Committee, and his associates, in defiance of party discipline and the laws of the land, took it upon themselves to conduct an illegal search of hotels, to open and detain mail, and to infringe upon the personal freedom and the democratic rights of the plaintiffs and the appellants by illegally arresting and detaining them. Such action cannot be tolerated.

How Communist Party members should conduct themselves toward the masses, and especially how they should react to criticism, is a most serious problem. Communist Party members are members of the proletariat. Communist cadres, no matter how high their position, have the responsibility to render faithful service to the people. Under no circumstances are they permitted to abuse their authority. They must accept in the proper spirit the well-founded critical opinions of the masses. Even if such critical opinions are not well-founded or if they are not entirely well-founded, they are required to give an explanation on the basis of facts. On no account are they to attempt to ferret out the motives behind the criticisms, far less to strike back in order to get even. The great majority of our cadres conduct themselves admirably. After the promulgation of the "guiding principles," a significant imporvement in party style has been noted in the conduct of many cadres. Unfortunately, there are still a small number of cadres who, like Ye Ruiyu and his associates, abuse the authority vested in them by the people and who lord it over party members and the masses. They make a travesty of the laws of the nation and the regulations of the party. They have no understanding of the meaning of democracy. Looking upon themselves as "officials," they expect the people to obey their orders without question. Considering themselves above the restrictions imposed by laws and party discipline, they even treat their comrades and those people who hold different views as their enemies. The behavior on the part of Ye Ruiyu and his associates attests to the extent to which feudalistic ideas of special privilege and tyranny have taken root in the minds of some people. The case in which Ye Ruiyu and his cohorts took it upon themselves to resort to retaliatory action in violation of laws and party discipline has had serious repercussions. They have seriously damaged the prestige of the party in the eyes of the people and dealt a palpable blow to the positive attitude of large numbers of cadres and the masses in implementing the "guiding principles" and in making their best efforts to contribute to the four modernizations. The masses ask, with justifiable resentment, "Why can't we address ourselves to the secretary of the Provincial CCP Committee? If they are to take such an attitude, who will dare to make their grievances known to the authorities?" In order to safeguard the rights of party members and the masses, we must wage a relentless struggle against tyrannical, feudalistic ideas and infractions agains the law and party discipline. All party members, and especially leadership cadres, should learn to strictly obey party regulations and the laws of the nation. On no account are they to place themselves above party regulations and the laws of the nation, or to lord it over the masses. They must learn to accept criticisms and the dissenting views of the masses in the proper spirit, and to submit themselves to the supervision of the masses. Under no circumstances are they permitted to abuse their authority to achieve personal gains or to resort to acts of reprisal.

We can see from the Ye Ruiyu case that the implementation of the "guiding principles' represents an intense struggle in the minds of the people. Why was it that this case had not been promptly dealt with? The main reason is that the responsible people in the Wenzhou Municipal Party Committee took a cavalier attitude toward the implementation of the party's "guiding principles" and the enforcement of the party's disciplinary measures. After it became known that Ye Ruiyu had resorted to acts of reprisal, the person responsible in the Wenzhou Municipal Party Committee instead of promptly looking into the incident and taking appropriate action, took Ye Ruiyu and his associate at their word in answering the charges. Even after the Provincial CCO Committee had given Ye Ruiyu a reprimand, the attitude on the part of the responsible person in the Wenzhou Municipal Party Committee left a lot to be desired. Instead of promptly transmitting the reprimand to those concerned, he and other comrades made the claim that "the situation in Wenzhou is special, that certain people are taking advantage of the opportunity to create friction among different factions by trying to reverse a previous verdict, that Ye Ruiyu had only recently become a cadre and that, besides, the incident had taken place prior to the promulgation of the "guiding principles." All these are onesided arguments. Is it true that the situation in Wenzhou is special? Taking the province as a whole, it is true that there are certain "special" localities which suffered grievously from the 10-year havoc wrought by Lin Biao and the "gang of four," and that the detrimental effects caused by the ultraleftist line espoused by Lin Biao and the "gang of four" have yet to be completely eradicated. And in handling the Ye Ruiyu case, the Provincial CCP Committee did not fail to take this into consideration. Nevertheless, the Wenzhou Municipal Party Committee had no justification for exonerating Ye Ruiyu and his associates. Unless discipline is strictly observed and the "guiding principles" are upheld, is it possible to achieve stability and unity? Unless a serious effort is made to upgrade the party style, is it possible to motivate the people to show a positive attitude and dedicate themselves to the four modernizations? When culprits are accommodated, can cadres be made to see the light and mend their ways? The answer to all these questions is "no." As for the argument that Ye Ruiyu had resorted to the acts of reprisal prior to the promulgation of the "guiding principles," that also cannot be used [as an excuse] for not taking proper action. It is true that cases predating the promulgation of the "guiding principles" should be dealt with somewhat differently from cases which occurred after its promulgation. However, acts of reprisal and violations of the law and party discipline cannot be condoned at any time. Basically, the only way to promote stability and unity in the Wenzhou situation and to provide impetus to the four modernizations is to implement without qualification the line, principles, and policies of the party and to upgrade the party's style by resolutely adhering to the "guiding principles." It is incumbent upon the party committees to heighten their understanding of the "guiding principles," to make a serious study of the "guiding principles," to implement the "guiding principles" unwaveringly, to courageously uphold the "guiding principles," and to wage an uncompromising struggle against those who act in violation of the "guiding principles."

Implementing the party's "guiding principles" and upholding party discipline have a vital impact on upholding and upgrading the quality of party leadership, strengthening the inseparable bonds between the party and the people, and raising the party's capability in promoting the four modernizations. It behooves party organizations at various levels throughout the province, and the large contingent of party cadres, especially those in leadership positions, to take the lead in observing party discipline and the laws of the nation, to make a conscious effort to accept in good grace the criticism and supervision of the masses, and to bring about equality for all under the law. It is imperative that those responsible for supervising the observance of party discipline, all law-enforcement organizations and all law-enforcement personnel at various levels, at all times and under all circumstances, should strictly, fairly, stringently, and seriously handle matters according to the party's disciplinary measures and the laws of the nation, so as to uphold the dignity and authority of party discipline and the laws of the nation, to safeguard the various democratic rights of party members and the masses, and to ensure the expeditious implementation of the four modernizations.

SHANGHAI MEETING STRESSES IMPORTANCE OF DISCIPLINE

Shanghai JIEFANG RIBAO in Chinese 22 Jun 80 p 1

[Article: "Municipal Discipline Inspection Meeting Decides Focal Point of Work"]

[Text] Recently, the municipal discipline inspection meeting convened by the preparatory group of the Discipline Inspection Committee of the Shanghai Municipal Party Committee of the Chinese Communist Party has decided that the mission and focal point of work in discipline inspection are: following the shift in the focus of party work, the focal point of work in discipline inspection should be placed on guaranteeing the carrying out of the lines, principles, and policies of the party, on inspecting and correcting problems with respect to violations of political discipline, and on ensuring implementation of the four modernizations.

The meeting has adopted a way to combine centralization with decentralization. On 16 April, during a half-day plenary session, it communicated the spirit of the Second Plenary Session of the central Discipline Inspection Commission to cadres responsible for discipline inspection of the whole municipality, reviewed the discipline inspection work in Shanghai over the past half year, and put forward the main points of work to be carried out in 1980. After that, discussions were carried out by different groups organized in accordance with their respective organization channels. Suggestions made by these groups, after discussion, were compiled and a summary was made at a half-day plenary session convened on 16 June. More than 2,500 people were present at this meeting, including the leading comrades from the Municipal Party Committee, from different departments, committees, and staff offices of the municipal government, and from the party committees (leading party groups) in different districts, counties, and bureaus who are in charge of discipline inspection work. Also present were the secretary and deputy secretary (division chiefs) of the Discipline Inspection Committee (Discipline Inspection Group), as well as cadres who are full-time discipline inspection workers. Secretary Wang Yiping [3769 0001 1627] of the Municipal Party Committee spoke at the meeting.

After analyzing the situation of discipline inspection work in the whole municipality, the meeting asked party committees at all levels and discipline inspection departments to further deepen their understanding of the importance of discipline inspection work. The meeting noted that Shanghai was the counterrevolutionary base of the "gang of four" for usurping the supreme party leadership and state power, and it is where party organizations and party conduct and discipline have been most severely devastated. In the more than 3 years since the smashing of the "gang of four," although we have made great successes in the struggle to expose and criticize Lin Biao and the "gang of four," to redress unjust, wrong and false charges, and to readjust leading groups at all levels, yet we have to notice that the pernicious influence of the ultraleft line of Lin Biao and the "gang of four" not only still exists in certain aspects; this should not be underestimated. Besides, the phenomenon of departures from the four fundamental principles in certain areas should not be neglected. In all these respects, we have an urgent need to strengthen party discipline inspection work.

The meeting affirmed that since the establishment of the preparatory group of the Discipline Inspection Committee of the Municipal Party Committee nearly a year ago, aside from building an organizational structure, carrying out education in party conduct and party discipline for vast numbers of party members, and handling correspondence as well as receiving visitors, the main jobs it has done include reexamination and rehabilitation, implementation of policies, and investigation and handling of cases involving violations of law and discipline. Great successes have been achieved in all of these jobs, and a good job must continue to be done in the future. The meeting asked party organizations at all levels, in the spirit of the directives issued by the central authorities, to study collectively the documents of the Fifth Plenary Session of the 11th Party Central Committee, and especially to learn collectively "Certain Guiding Principles Regarding Inner-Party Political Life," to discuss the draft amendment of the party constitution and to carry out ideological education for the whole party, with the goal of upholding the party's political and ideological lines so as to strengthen party solidarity and unity, and of strengthening the democratic centralism of the party in organizational and disciplinary aspects. In March of this year, after the promulgation of the "guiding principles," vast numbers of party members and cadres enthusiastically endorsed it. Party organizations at all levels actively launched activities to study and implement the "guiding principles" by adopting various ways and means such as rotational training classes for party members and cadres, learning at party schools, and participating in collective party activities. Preliminary successes have been achieved through taking the "guiding principles" as a mirror, or as a ruler, to integrate the realities of the leading groups with the realities of individuals in order to measure themselves. However, learning to implement the "guiding principles" is the sort of work which should last for a long time. Unremitting efforts should be made and actions should be taken while learning. Better results can be achieved only step by step. All party members in Shanghai must have the determination and confidence to do a good job in learning and implementing the "guiding principles." Party member leading cadres, especially leading cadres at the district, county, and bureau levels and above, must play a vanguard model role in learning the "guiding principles" and the draft amendment of the party constitution. They must launch criticism and self-criticism in the spirit of rectification in order to conscientiously measure themselves. Cadres engaged in discipline inspection work should first learn well and earnestly practice what they advocate. From now on, they have to start with themselves in everything so as to make themselves qualified Communist Party members.

After having studied and discussed the principles of "putting prevention first, putting education first, legislate first, educate first, laws should be observed, violations of the law should be punished, and laws should be strictly enforced"--which were put forward by the central Discipline Inspection Commission for carrying out discipline inspection work that is "both resolute and reliable"--the meeting regarded that these are overall, positive, and correct principles. The principles ask that discipline inspection work not be based mainly on punishment--that is, punishment without education--but that instead an advanced model be set and then spread through positive education, so that the masses of party members and cadres will be able to heighten their consciousness to do a good job in correcting party conduct and enforcing party discipline. It is necessary to seize tendentious young successors to give them timely criticism and education so that problems can be resolved in the initial stage. At the same time, necessary disciplinary action should be taken in cases where party regulations, party laws, and party discipline are violently violated. When individuals are punished, the majority are educated, and the punished themselves are also educated. Future mistakes can be avoided only by learning from past mistakes, and positive results can be obtained only by doing so. "Both resolute and reliable," as stipulated in the principle means that there is no compromise of principle. Cases of discipline violations should be handled without sparing anyone's sensibilities. One should take an analytical attitude in dealing with people and in handling things, and such an attitude should be pertinent and appropriate, not to be swayed by personal feelings. At present, there are people in the party who, in dealing with mistakes, are prone to taking the attitude of "self-criticism with an open mind, but absolutely unrepentant," and "conducting self-criticism for a period of time while seeking satisfaction for the whole life." The meeting pointed out that it is absolutely necessary to ask such people to correct their mistakes. There are cases in which people purposely present a fait accompli and then make an empty promise of "not to be repeated," attempting to seek "real benefit" from mistakes. This is also definitely not allowable.

The meeting also pointed out that discipline inspection work is not a mission that is confined to the discipline inspection sector. Party committees at all levels should conscientiously strengthen their leading role in discipline inspection work. They should regularly hear reports on discipline inspection work. And discipline inspection work should be the order of the day for party committees. Discipline inspection organizations at all levels should be further strengthened, and close attention should be paid to building up a contingent of cadres for carrying out discipline inspection work.

MODEL CADRE CONTINUES WORK DESPITE TERMINAL ILLNESS

Shanghai JIEFANG RIBAO in Chinese 1 Jul 80 p 1

[Article: "A Retired Cadre Yu Jieqiong Proves to be Good Party Member"]

[Text] On the eve of "1 July," comrades of the party branch of the retired cadres of Jingan district unanimously recommended Yu Jieqiong [0151 2212 8825], who had worked with the Institue of Financial Science of the Ministry of Finance, as a good party member. The district party committee fully affirmed the revolutionary spirit of Comrade Yu Jieqiong because, though suffering severely from a lingering cancer, he stands in no fear of it and [continues] indomitably to write books expounding theories and suggesting ways and means for implementing the four modernizations. Thus it decided to commend him on 1 July at the meeting commemorating the party's birthday.

Comrade Yu Jieqiong is 68 years old this year. He returned to China from the United States during the initial postliberation period. He has been with the Institute of Financial Science of the Ministry of Finance for a long time, in charge of research work on both foreign finance and enterprise finance. He joined the Chinese Communist Party in 1956. Comrade Yu Jieqiong is an expert on the financial front. "Statistics on Production Enterprises" and "Financial and Monetary Inspection of Production Enterprises" are among the books he has written. During the period when Lin Biao and the "gang of four" ran wild, however, he was sent off to graze cattle and later on was expelled from the party and forced to retire, thereby losing his political and working rights. In 1973, Comrade Yu Jieqiong, who was once healthy and strong, was on the verge of death after suffering a lot. Accompanied by his son, he returned to Shanghai. As he witnessed the steady deterioration of the nation's financial situation, old Yu was filled with grief and anxiety, yet he had no way out. In 1978 after the crushing of the "gang of four," the leading party group in the Ministry of Finance reexamined his case and rehabilitated him. His party membership was reinstated. However, at that time he was already suffering from thyroid cancer and has since undergone two major operations. He was too weak to carry on his work as usual. The Ministery of Finance decided to change his status from retirement to temporary leave and showed him the utmost solicitude with the best of care.

The party's great plans for implementing the four modernizations strongly aroused the sense of revolutionary responsibility of this old comrade and spurred him to make the best use of his time, regardless of serious illness, to continue to work for the party at home. Since December 1978 he has managed to get up early every day, no matter whether it is in cold winter or hot summer. He has conscientiously engaged in writing. In a period of a little more than 1 year, he has, with his trembling and weak hand, completed 13 articles, including "Serving Finance by Utilizing the Law of Value," "Assessing Local Collective Enterprise Investments Base on the Law of the Economy," and "Financial Supervision of Capital Construction Should Pay Attention to Taking Objective Laws as Guidelines in Capital Construction." He also compiled more than 10 pieces of data introducing the practice of business administration in the capitalist nations. These articles and data were written with original ideas. When they were presented to the Ministry of Finance, they won widespread attention and praise.

Yu Jieqiong has also been concerned about the well-being of the masses throughout the course of his illness. During the second half of last year he worried very much about the ever-worsening condition of the contaminated drinking water in Shanghai. He decided to investigate the situation, regardless of his severe reaction to chemotherapy at that time. He spent 2 days inspecting, on foot, the dark and bad-smelling Suzhou River and the turbid Huangpu River and found that the situation is serious. After he returned home, he wrote a report from the angle of a financial worker and separately submitted it to the Ministry of Finance and the Central Environment Protection Bureau asking the central authorities to appropriate special funds to help Shanghai adminster the contamination problem. In reply, comrades including Finance Minister Wu Bo said in their respective letters that the problem is under overall consideration in an effort to work out a solution.

In March of this year, Comrade Yu Jieqiong acknowledged that the cancer he suffers has spread and his life is drawing to an end. For that reason, he valued his time still more and stepped up his writing. He said: "I am a member of the Communist Party. I have to work for the party as long as I am still alive!"

'RENMIN RIBAO' CHIEF EDITOR'S 'VICTORY' REPORTED

HK250903 Hong Kong TUNGHSIANG in Chinese No 24, 16 Sep 80 pp 17-18

[Article by Tzu Lin: "Hu Jiwei's Victory"]

[Excerpts] The masses have the right to supervise cadres and newspapers should strengthen criticism. This is a slogan which has been reiterated recently by the CCP.

The reiteration of this slogan can be described as a victory for RENMIN RIBAO chief editor Hu Jiwei.

Shortly after the smashing of the "gang of four," Chinese newspapers repeatedly declared that the common people could criticize the government and cadres and that "the speaker is blameless, the listener should be warned." As a result, newspapers did play a role in supervising cadres and their criticisms played an important role in opposing privileges and bureaucratism, thus regaining their prestige among the people.

Critical Contributions and Satirical Caricatures Are Withheld From Publication

However, due to the emergence of big-character posters and the Wei Jingsheng incident, criticisms made by newspapers were censured by some people and even criticism of "the will of senior officials" was described as wrong. Hu Jiwei once disclosed: "The criticisms made by our newspaper can only be described as fervent exhortations. They are not fervent attacks, not to mention fierce attacks. Even so, many comrades are already very annoyed with them." During this period, many local newspaper reporters who had written critical reports were attacked and prevented from writing such reports and many contributions, letters and caricatures were withheld from publication.

In the face of this situation, Hu Jiwei publicly voiced his dissent. He brought the matter out into the open with "How Are We To Carry out Criticism and Self-criticism in Newspapers" published in XINWEN ZHANXIAN [NEWS FRONT] at the end of 1979. This article refuted all kinds of censures. In this issue of XINWEN ZHANXIAN, a commentator's article called for discussing issues concerning criticism made by newspapers.

Following the publication of Hu Jiwei's article and the XINWEN ZHANXIAN commentator's article, there were no apparent local press reaction to them, and the number of critical press items of an incisive nature continued to fall. This way of doing things incurred the censure of the masses and also dampened the newly restored confidence the common people had placed in the CCP.

A Key Editorial

When Beijing theoretical circles began to reverse their verdict on the criticism of "the will of senior officials" in May this year, Chinese newspapers once again realized that mass supervision and criticism are indispensable. A short commentary published in GONGREN RIBAO on 31 July reiterated the slogan that "the masses have the right to supervise cadres at all levels." After July, RENMIN RIBAO published an editorial which was entitled "The Promotion of Party Style Cannot Be Divorced From Mass Supervision." The publication of this editorial shows that Hu Jiwei's proposal for "strengthening newspaper criticism" has begun to prevail within the party.

People are pleased at the victory Hu Jiwei scored in this debate and also hope that the CCP will make protracted and persistent efforts to uphold this policy of public criticism and self-criticism.

ECONOMIC, CULTURAL POLICIES FOR TIBET TO BE CHANGED

Shanghai JIEFANG RIBAO in Chinese 20 Jun 80 p 3

[Article by JIEFANG RIBAO correspondent Zhang Yeping [1728 0048 1627] in Lhasa: "Spring Comes Late to the Plateau; Strive To Make Up for Lost Time"]

[Text] Recently the Party Central Committee issued important instructions concerning the work in Xizang. Hu Yaobang [5170 5069 6721], Wan Li [5502 6849], and other leading comrades of the central authorities even made an inspection tour of Xizang to discuss with the comrades there the major programs for turning Xizang's poverty into wealth. The Xizang problem has focused the attention of many people on this southwestern frontier of the fatherland.

The Importance and Uniqueness of the Xizang Problem

Xizang is located on the southwestern frontier of our country, bordering the six countries of Pakistan, India, Nepal, Sikkim, Bhutan, and Burma. It has a boundary of 4,000 kilometers and occupies a very important strategic location. The area is immense but sparsely populated. Its inhabitants are relatively uniform in nationality, with an absolute majority of the Zang nationality. Historically, religion has always thrived in Xizang, and the religious leader of Lamaism was also the supreme ruler of Xizang. With a system of agricultural serfdom, characterized by the "integration of government and religion," Xizang for the longest time was unique in its production patterns, political, cultural, religious and legal systems, as well as its upper stratum. Since Xizang's peaceful liberation in 1951, millions of agricultural serfs have smashed their feudal shackles through peaceful rebellion and democratic reform and, together with peoples of other nationalities in the country, walked onto the road of socialism. Xizang today is an autonomous region of our nation. Because of its history and geography, Xizang's character is strikingly unique in its natural conditions, national traits, economic structure, cultural tradition, religious beliefs, and even its spoken and written language, its customs and mores. As has been pointed out in the distributed circular summarizing the symposium on the work in Xizang: "Xizang is an inseperable part of the sacred territory of the fatherland and is a national autonomous region in which the political, economic, cultural and natural conditions are all of special importance."

What Is the Root of Poverty?

Comrade Hu Yaobang pointed out during his inspection tour: "At the present time, the most prominent reality in Xizang is that the living standard of its inhabitants lags far behind that of the other provinces and autonomous regions of the nation." In other words, its people live in poverty and its culture is underdeveloped. Based on what this correspondent saw and heard during his 1-year stay in Xizang, one impression that stands out is that the Xizang plateau's wealth and poverty (that is, its wealth in natural resources and the poverty in which its people live) constitute a very inharmonious picture.

Then, what is the root of Xizang's poverty? First, it is rooted in historical factors. Xizang's socialism is founded on the ruins of feudal agricultural serfdom. Xizang is low in the development of productive forces, and its economy and culture lag behind. Second, the damage caused by the ultraleft line of Lin Biao and the "gang of four" caused a drop in production and made the people destitute. These are the two apparent factors. But the question is: Since the smashing of the "gang of four" more than 3 years ago, most parts of the country have been enjoying increasingly greater prosperity and there has been considerable change in production and in the people's livelihood. Then why is Xizang still lagging behind?

To analyze this situation, the following questions must be briefly reviewed: What are the manifestations of the ultraleft line of Lin Biao and the "gang of four," and what are their ill effects?

(1) The ultraleft line of Lin Biao and the "gang of four" distorted the instructions of Comrade Mao Zedong, treated the problem of nationalities as a problem of classes, and damaged the party's policies toward the nationalities, religion, and the united front. This resulted in the widening of the class struggle and seriously damaged the solidarity between the Zang and Han nationalities.

(2) They violated the objective reality of Xizang society, and erroneously classified "rich peasants" and "rich herdsman." Before the democratic reform, Xizang was a feudal society of agricultural serfdom in which there existed two opposing classes; namely, the feudal lords and the masses of agricultural serfs. However, the question is: How could there have been rich peasants during that time, when owner-peasants did not even exist? Nevertheless, under the ultraleft lines of Lin Biao and the "gang of four," those agricultural serfs whose livelihood had become relatively good were arbitrarily classified as "rich peasants" or "rich herdsmen." In some areas, even those peasants and herdsmen who had become better off through sheer hard work, and only after the democratic reform, were

also classified as rich peasants and rich herdsmen. This gave rise to the confusion of class alignment and the dampening of enthusiasm on the part of peasants and herdsmen for the development of production and the betterment of their livelihood.

(3) In areas of agricultural production and animal husbandry, they violated the objective reality of Xizang and the wishes of its people. It was the custom of the Zang nationality to have roasted barley, butter, beef and mutton as staples. The herdsmen live in tents made of oxhair. Yet under the directions of the ultraleft line, "take grain as the key link" was unilaterally stressed. This policy forced out animal husbandry and its occupational lines and made it difficult for the Zang people to obtain butter to eat or oxhair for their tents. It also decreased sideline income--a situation which created further difficulties for the people.

(4) With regard to the economic policy of the agricultural and animal husbandry regions, they confused the differentiation between socialism and capitalism. For example, in the area of distribution, the ultraleft line of Lin Biao and the "gang of four" took the policy of "distribution according to work" and "more work more pay" as capitalistic, while treating "mass together" and "equalitarianism" as socialism. Another example: the [ultraleft line] kept the production brigade from developing various enterprises, labeling these enterprises as following the "capitalist road." It chopped the team members' privately owned plots of land, livestock, and family sidelines as if they were the "tails of capitalism." It also shut down the country fair trading in the villages as if it gave the "green light to capitalism." Policies like these were already very "left" when they were applied in the interior of the country; applied to the area of Xizang, which, to begin with, had a very underdeveloped commodity economy and little capitalism, these policies proved to be even more "left." Therefor these policies caused ever greater damage to production and to the people's livelihood.

(5) In industry, the ultraleft line of Lin Biao and the "gang of four," merely for the sake of "filling in the blanks", disregarded Xizang's conditions in raw and semiprocessed materials, fuel, transportation and shipping; blindly pushed various developments; engaged in "cooking a meal without rice"; and thus squandered large sums of money, manpower, and material resources. On the other hand, handicraft production for various kinds of goods especially needed by the Zang nationality (such as mats, aprons, wooden bowls, and oil barrels, etc.) did not develop rapidly. This also affected the livelihood of the Xizang people.

These evil consequences caused by the ultraleft line of Lin Biao and the "gang of four" seriously damaged the solidarity of the nationalities, destroyed Xizang's economic and cultural development, and brought hardship and suffering to the people of Xizang.

The Key to the "Solution of Poverty"

To open the gate to Xizang's wealth and prosperity, the secretariat of the Party Central Committee held many meetings in April of this year to discuss the work in Xizang. In the distributed circular "Summary of the Symposium of the Work in Xizang," the central authorities formulated clear and definite provisions concerning the task and direction of Xizang's construction. In the latter part of May, the chief secretary of the Party Central Committee, Hu Yaobang, Wan Li, and other leading comrades made a special trip to Xizang. They studied and investigated to see if the suggestions of the Central Committee had been thoroughly implemented, and they discussed with the Xizang comrades the major plans of "turning poverty into wealth."

Generally speaking, the policies of the Party Central Committee for work in Xizang include the following points: Politically, further implement the policies of the nationalities, religion, and united front and of strengthening the solidarity of the nationalities. Under the united leadership of the central authorities, allow all the nationalities of Xizang to enjoy national autonomy to the fullest. Economically, firmly adopt the policies that allow Xizang's economy to recover and grow. These include: Exempt the people of Xizang for a number of years from the state purchase quotas, and eliminate apportioned quotas of any form. In all other areas of the economy, such as agriculture, animal husbandry, forestry, finance, commerce, handicraft, transportation and shipping, adopt flexible policies especially suited to the situation in Xizang, so as to expedite Xizang's economic growth. At the same time, divert the large sums of national outlays, which had been used to prop up Xizang, to meet the urgent needs in the daily lives of the Xizang people. With regard to matters of culture and education, vigorously restore and develop, under the firm premise of socialism, Xizang's national culture as well as programs in education and science. In matters of party organization, a policy of national cadres must be correctly implemented and the solidarity between the comrades of the Han and the Zang nationalities must be strengthened. Within 2 to 3 years, more than two-thirds of the national cadres of Xizang not engaged in production must be of the Xizang nationality; other cadres must be transferred back to the interior systematically.

The Xizang Autonomous Region Party Committee, during a recent discussion on the instructions laid down by the Party Central Committee for carrying out the work in Xizang, expressed the belief that the key to successfully implementing the Party Central Committee's policies lies in straightening out the comrades' thinking. Judging from the fact that Xizang's cadres are mostly leading cadres, it may be deduced that the thinking of some comrades has not yet been liberated from the confining shackles of the ultraleft line. For example, when a set of previously used methods prove no longer applicable today, some people become confused. When some people find that certain slogans they used to shout and hear in the past need to be changed now, they find it difficult to understand. Some people begin to have doubts when they witness the restoration of some policies which were criticized by Lin Biao and the "gang of four," even though they had been proven correct by reality. In view of this situation, the regional party committee, in the process of implementing the policies of the Party Central Committee, has seriously and earnestly opened remedial classes to discuss the standard questions concerning truth, to straighten out thinking, and to clean out the residual poison of the ultraleft line, so that the thinking of the masses may be truly liberated and construction work in Xizang may be pushed forward daringly and expeditiously.

Now, the interior of the fatherland is in the height of summer, and on the Xizang plateau spring is very much in the air. Xizang's belated spring, as though realizing the passage of time, is bracing up and quickening its steps to catch up with the season.

BACKGROUND OF BOHAI NO 2 INCIDENT GIVEN

HK221455 Hong Kong TUNG HSIANG in Chinese No 24, 16 Sep 80 pp 9-11

[Article by Chu Chung-yi: "'New Economic Group' Versus 'Petroleum Group'"]

[Text] The "Bohai No 2" incident which resulted in the deaths of 72 people and directly brought about a loss of some 37 million yuan has finally come to an end. Before the opening of the NPC, the highest authorities in Beijing adopted a resolute and ironclad policy to dismiss the petroleum minister, Song Zhenming, from his post and give the vice premier in charge of the petroleum industry Kang Shien, a heavy demerit. The response to these measures was encouraging both inside and outside the country as soon as the news was released.

"China is still prosperous!" The decision of the leadership in Beijing enables the people who think that China is hopeless to regain their confidence. In view of the handling of the "Bohai No 2" incident, people mainly see the determination of the Beijing authorities in rectifying the unfair system of rewards and punishments and slack discipline and enforcing party discipline and state laws.

An Important Background

In fact, this is only one side of the case. Recently, I met some friends within the economics circle in Beijing and learned that the "Bohai No 2" incident had been handled under a background which is of great importance and cannot be ignored.

What is this background? On the surface the "Bohai No 2" incident was an investigation into the causes of a serious accident. However, it was in fact, an important confrontation between two different economic ideas and two different lines for economic development, and was a critical trial of strength between the "new economic group" and the "petroleum group" in the Beijing leadership. The trial of strength ended with in victory for the "new economic group."

We must not underestimate this victory of the "new economic group." The significance that it bears in the history of Chinese economic construction is at least as great as that of the debate on the criterion of truth carried out in May 1978. It will have incalculable and deep influences on China's march toward the four modernizations.

The "new economic group" is a new term recently introduced in Beijing, the Chinese people are gifted in creating political terms. This term is a new name for the "practical group" in economic construction.

Member of the 'New Economic Group'

Who are the heads of the "new economic group?" Its representatives in the administration of the State Council are Zhao Ziyang, Yao Yilin and Wan Li; in the theoretical circle are Hu Qiaomu, Sun Zhifeng and Xu Dixin; and inside the party is Hu Yaobang. Of course, they are backed up by old revolutionaries such as Deng Xiaoping and Chen Yun.

In short, the "new economic group" advocates seeking truth from facts and working in accordance with the economic laws. Specifically speaking, where an enterprise is concerned, it advocates expanding the self-management right, bringing the superior position into play, protecting competition and pushing forward joint ventures. Regarding circulation, it advocates appropriately making use of readjustment by market supply and demand. Regarding economic planning, it demands scheduled, proportionate and balanced development, stresses acting according to one's capability and attaches importance to improving the people's material life. Regarding the labor system, it proposes adopting a more flexible policy and reviving and developing individual industrial and commercial households as a supplement to the state planned economy. Where employment is concerned, it demands that the state abolish its monopoly and unified distribution, and advocates appropriate circulation of capable persons, open recruitment and freedom in choosing jobs. Regarding personnel management, the "new economic group" opposes remaining laymen and encourages experts to dominate factories. All these measures, so to speak, meet the demands of the present economic stage of China in a better way. These are bold measures which are practical and break out of ideological confinement.

The implementation of these measures was already and surely will further speed up the recovery of the Chinese backward economy and push forward the progress of the four modernizations. However, it is not easy for these measures to be implemented. There are certainly many kinds of obstacles in the middle and lower levels. Moreover, some people in the higher level in Beijing object to it and the "petroleum group" is representative of this opposition.

We Cannot Underestimate the Capacity of the 'Petroleum Group'

Besides the criticized petroleum minister Song Zhenming and Vice Premier Kang Shien, the "petroleum group" consists of one or two people who hold a higher post and are more authoritative. Of course, they cannot triumph over the "new economic group" in a trial of political strength. However, they have always been recognized as the economic authority for a long time and have taken up leadership posts in economic, financial and state planning. We must not underestimate their capacity since they are still enjoying traditional power.

What the "petroleum group" advocates is a traditional method of economic development which China has implemented over the past [words indistinct]. In other words, the "petroleum group" pushes forward economic construction by giving prominence to politics and by means of mass movements, and directs the economy with methods used during the war years. Where economic development is concerned, it gives prominence to heavy industry and neglects light industry and agriculture. It does not care about the balance and one-sidedly goes after high quotas. Regarding finance, it advocates huge accumulation and pays no attention to improving the living standard of the people.

This economic ideology has continued to dominate Chinese economic circles even 2 years since the downfall of Jiang Qing and her accomplices. Later, when the workstyle of seeking truth from facts was encouraged and discussions on the criterion of truth were launched, people began to see its flaws. People recognized that the extremely strict management and the idea of the "iron rice bowl" were in fact a chronic malady. They also realized that the "new petroleum group" was too fond of greatness and success but in fact did not know how things stood. They eventually saw the drawbacks of taking risks and letting laymen be masters of the house. We can see the absurdity when we refer to the 10-year planning on economic development put forward by Hua Guofeng at the first session of the Fifth NPC in February 1978. Over the past few years, it has been revealed in newspapers that a large number of abandoned and suspended construction works had been disclosed. The reason for this was that the capital construction front was over-extended and the construction works were hurriedly carried out without adequate consideration and without adequate raw materials and preparations. All this was in fact the result of the direct or indirect influence of the economic ideology of the "petroleum group." The salient facts were extravagance of the "1.7 meter" rolling work in the Wuhan Steel Mill, the selection of an improper location for the Baoshan Steel Mill, suspended construction of Shandong Heavy Iron and Steel Plant and failure to make good the promise of supplying Japan with oil and so forth.

Hu Qiaomu Sounded the Bugle

The confrontation between the two economic ideology of the "new economic group" and the "petroleum group" began to develop immediately after the great debate on the criterion of truth in May 1978. In May this year at a State Council meeting, Hu Qiaomu gave a report on "to act in accordance with the economic laws and speed up the achieving of the four modernizations." In his report, he systematically summed up experiences and lessons in economic construction over the past 20 years and acutely criticized the bad habits of paying no attention to objective laws in economic construction and blind leadership according to the officers' wills. He further stressed a series of guiding economic principles such as planned, proportionate and balanced development and attaching importance to laws governing the market. This could be called the first relatively complete these on the new economic policy, proposed by the "new economic group" on an important occasion, which sounded the bugle to carry out economic development in accordance with the economic laws. However, diverging points of view exist in the higher level of the PRC with regard to Hu Qiaomu's these. This important speech was published 3 months later in RENMIN RIBAO, that is, on 6 October.

Although the new economic plan has been formulated, there are many obstacles to it. There are conflicts between the higher, middle and lower levels inside the CCP. The reason for this is that on the one hand, it is difficult to turn the tide since people had gotten used to the situation which had been in effect for some time, and on the other hand, some officials have been contented to be laymen and labeled themselves as the "big rough and ready chaps," and this new economic policy was in direct conflict with their personal interests.

During this period, if people paid attention to the economic reports of the CCP provincial and municipal newspapers and journals, they would have discovered many contradictory phenomena. Some provinces and municipalities were still faithful to the campaign of learning from Daqing and conduct grand and spectacular-scaled meetings to select and award Daqing-modeled enterprises, while some other provinces and municipalities did not mention a single word about Daqing-modeled enterprises. This reflected the various responses of different provinces and municipalities to the new economic policy.

Zhao Ziyang, Wan Li Shoulder Great Responsibilities

Since the force of habit was very great and in order to be more precise, the "new economic group" headed by Deng Xiaoping and Chen Yun entrusted the high-ranking officers of the "practical group," Zhao Ziyang and Wan Li, who were famous for their emancipated minds and acute and decisive workstyle, to carry out experiments on the new economic policy in some units in Sichuan and Anhui provinces. Zhao and Wan did their jobs well to the satisfaction of the "new economic group." Experiments proved that this new economic policy could liven up the dull and rigid Chinese economic system, and enhanced the activism of officers and workers of the enterprises; the increase rate of the production value became generally higher than that of the nonexperimental enterprises. The market was livened up in a very short time and the people's living standard was improved. The progress of Sichuan and Anhui aroused the people's attention. The reputation of "Ziyang (the red sun) shines high and Wan Li (an area of 10,000 li) is bright" spread like wildfire.

Practice is the grounds for a great debate. The success in Sichuan and Anhui can be regarded as the first victory of the "new economic group."

However, the confrontation between the economic ideology of the "new economic group" and the "petroleum group" was not very apparent at that time because it was still not the principal conflict. At that time, the principal conflict inside the political circle of the PRC was a vigorous debate waged by the "practical group" and the "whatever faction" centering on adopting a correct attitude towards Mao Zedong Thought. The third plenary session of the CCP Central Committee at the end of 1978 was the climax of this debate. On the other hand, the Chinese economy was at the brink of collapse at that time because of a poor economic situation and its being trampled upon by the gang of Jiang Qing. After the smashing of the "gang of four," the danger of economic collapse appeared due to construction of new projects without a prior and adequate understanding of the actual economic situation. The situation can be compared with one in which a person, who had just recovered from a fatal disease, participating in racing. Therefore, it became a pressing task for the economic sphere to solve the serious imbalance of economic development. Thus, the ideological confrontation between the "new economic group" and the "petroleum group" was neglected when people urged "readjusting, restructuring, rectifying and improving" the national economy. As a matter of fact, the proposal and the implementation of the principles of readjustment was itself a measure and a victory of the ideology of the "new economic group."

The Decision on Abolishing the Old 10-Year Plan

The eight-character principle on readjusting the economy was officially put forward at the second session of the Fifth NPC convened in June 1979 and a period of 3 years was fixed for its achievement. In the wake of the implementation of the policy of readjustment, the flaws of the "petroleum group" in its planning for economic development in China were exposed to a large extent. People realized that they had been working not according to the objective laws and their capability. Simultaneously, the conflict between the "new economic group" and the "petroleum group" become more acute daily. This April, the decisive level of the PRC finally came to a resolute decision. They decided to abolish the original 10-year economic plan, and formulate a new one. At the same time, they decided to reassign Yu Qiuli from the position as chairman of the State Planning Committee to be in charge of the energy committee, and appointed Yao Yilin concurrently chairman of the State Planning Committee. After Yao Yilin had taken up his post, he gave an important speech, stressing that the state must work in accordance with its own capability and make gradual progress in economic planning. He criticized the old method of planning solely by subjective opinions and paying no attention to the objective laws. He also criticized blindly going after high quotas at a tremendous speed.

This was a critical fight that the "new economic group" won. And it so happened that the oil rig "Bohai No 2" capsized during this period, how to squarely analyze and handle this serious incident thus became another trial of strength between the "new economic group" and the "petroleum group."

Points of View

In accordance with the viewpoint of the "petroleum group," there were bound to be sacrifices in striving for progress. Thousands of people sacrifice their lives in the battlefield in order to win a great victory. And taking this into comparison, the lives of 72 would mean nothing in order to develop an oilfield of strategic significance. We must enhance the revolutionary spirit of "fearing neither hardship nor death," and it is reasonable to pay a price when you are inexperienced in certain aspects. In light of this, the Oil Ministry and its subordinate marine exploitation bureaus should not shoulder great responsibility with regard to the capsizing of the "Bohai No 2" platform.

However, in the opinion of the "new economic group," this was an extreme case of dereliction of duty. It violates the objective laws and showed no respect for science and it was an example of blind leadership by subjective opinions. Song Zhenming and [words indistinct]. They thought that they could apply past experience throughout their lives, they were arrogant and did not take others' advice. Thus, the originally advanced petroleum ministry became corrupt and enforcement of rules and regulations became slack as laymen took over leadership and workers lacked adequate training. The "Bohai No 2" platform was imported 7 years ago. However, important materials such as the book on stability calculation has not yet been translated and they even paid no attention to a report submitted by the first front team of the drilling platform. All this finally led to a shocking catastrophe. If we do not strictly handle this severe incident, we will not be able to enforce party discipline and state laws and to vigorously and speedily implement and push forward respect for science and the new economic policy which works in accordance with the objective laws.

Removing a Big Stumbling Block

The "new economic group" was resolute to get rid of all obstacles and made a thorough investigation into the "Bohai No 2" incident. They finally won a complete victory after seesaw battle for more than 8 months.

By examining the background, we can see that the handling of the "Bohai No 2" incident is of great significance. It has removed a big stumbling block in the implementation of the new economic policy. It appears that it will continue to exert influence on the PRC's economic construction in the future.

BRIEFS

NATIONAL MINORITY VISITING GROUP--Sponsored by the State Minority Nationalities Affairs Commission, a team composed of three groups of national minorities was formed to visit various places in the country to mark the 1980 national day. The first group arrived in Qiqihar Municipality, Heilongjiang, 13 September. This group is composed of people of 25 nationalities from Xinjiang, Ningxia, Gansu, Qinghai, Shandong, Anhui, Jiangsu, Shanghai, Tianjin, Shanxi and Hubei provinces, municipalities and autonomous regions. The Qiqihar Municipal CCP Committee, the Standing Committee of the municipal people's congress, and the municipal government and CPPCC committee held a rally to welcome the group. Secretary (Chen Junsheng) of the municipal CCP committee spoke at the rally. The group plans to spend 4 days in Qiqihar. [SK170956 Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 13 Sep 80]

NEI MONGGOL NPC DEPUTIES--With Ting Mao as their leader and Kui Bi and Ba-tu-ba-gen as their deputy leaders, the Nei Monggol regional deputies to the third session of the Fifth NPC returned to Hohhot on 15 September. Members to the third session of the Fifth National CPPCC Committee also returned by the same train. They were welcomed at the station by Kong Fei, Yun Shiying, Peng Mengyu, Gao Zengpei, Hao Xiushan, Chen Bingyu, Wu Daping and Zhao Zhanshan, responsible persons of the regional CCP committee, the Standing Committee of the regional people's congress, the regional people's government and the regional CPPCC committee. [SK170314 Hohhot Nei Monggol Regional Service in Mandarin 1100 GMT 15 Sep 80]

HUBEI DOMESTIC FORUM--The united front work department of the Hubei Provincial CCP Committee recently invited some scientists, professors, famous artists, experts in engineering and personages of democratic parties who were in Wuhan to attend a forum. At the forum, they discussed issues related to the domestic situation and the four modernizations. In connection with reality, they put forward very good opinions on the four modernizations. [HK151240 Wuhan Hubei Provincial Service in Mandarin 1100 GMT 8 Sep 80]

HUNAN RURAL PROPAGANDA CONFERENCE--In late August, the Hunan Provincial CCP Committee held a conference in Nan County on propaganda work in the countryside throughout the province. The participants exchanged experiences on publicizing the two documents of the central authorities on development agriculture and emphatically discussed and studied the ideological theory and policy of enriching the countryside as soon as possible. The participants were urged to boldly build the rich communes and brigades and enable some of the communes, brigades and peasants to become rich first. They pointed out that it is necessary to rectify the commune and brigade enterprises, respect the rights of the production teams in self-determination and establish and put on a sound basis the system of production responsibility in accordance with local conditions. It is also necessary to actively encourage the commune members to take part in sideline production at home so long as this does not interfere with collective production. [Changsha Hunan Provincial Service in Mandarin 1100 GMT 5 Sep 80 HK]

JIANGXI DEVELOPMENT--Over the past 8 months since the second session of the Jiangxi Provincial People's Congress, the provincial people's congress, provincial people's government, provincial higher people's court, provincial people's procuratorate and other prefectural and municipal people's governments have respected the democratic rights of people's representatives and handled 501 proposals. The Jiangxi Provincial People's Congress Standing Committee has issued a circular which demanded that people seriously handle the proposals put forward at the people's congress. Many people's representatives proposed strengthening construction of old revolutionary bases and this has aroused the attention of the central authorities and the Jiangxi Provincial CCP Committee. Thus, it has been decided that funds would be allocated for such development and an old revolutionary bases development committee has been established. The Jiangxi people's government also instructed the railway department to repair damaged tracks and the provincial revolutionary committee has paid attention to air pollution in response to the proposals of the people's representatives. [Nanchang Jiangxi Provincial Service in Mandarin 1100 GMT 9 Sep 80 HK]

HEILONGJIANG LEGAL OFFICES--Beginning in 1979, various localities of Heilongjiang Province have resumed or established legal advisory offices staffed with full-time lawyers. From January to June 1980, these offices had served as defenders in 1,038 criminal cases and as procurators in 58 civil cases. [Heilongjiang Provincial Service in Mandarin 1100 GMT 14 Sep 80 SK]

HUNAN CPPCC SOIREE--On the evening of 22 September, the Hunan Provincial CPPCC Committee held a mid-autumn festival soiree to receive people of various circles in Changsha. Those attending were the chairman and vice chairmen of the provincial CPPCC committee, responsible persons of democratic parties and industrial and commercial federations, personages of various circles in Changsha, Taiwan compatriots, returned overseas

Chinese and relatives of people who have gone to Taiwan, some 70 people altogether. Zhou Li, secretary of the provincial CCP committee and chairman of the provincial CPPCC committee; Tao Zhiyue, NPC Standing Committee member and vice chairman of the provincial people's congress Standing Committee; and Cheng Xingling, vice provincial governor and vice chairman of the provincial CPPCC committee, attended and spoke. [Changsha Hunan Provincial Service in Mandarin 1100 GMT 23 Sep 80 HK]

CCP COMMITTEES--According to information obtained by the reporter from informed sources, while considering the question of how the Standing Committee of the NPC can exercise supervision over the State Council and other state organs, the CCP Central Committee is also considering how to institutionalize self-supervision. It is possible that the forthcoming 12th National Party Congress will elect a supervisory committee and an advisory committee in addition to the Central Committee. The idea that the supervisory committee to be elected by the party congress will be an organ parallel to the Central Committee, and not one under the Central Committee, is under consideration. This proposal will greatly enhance the power and efficiency of supervisory work. The supervisory committee will not only supervise party committees in the localities and various departments, but will also directly supervise the Central Committee. The advisory committee is intended to make full use of the abilities of veteran revolutionaries who have withdrawn to the second or third line. Those to be elected to the advisory committee should be revolutionaries of the older generation who have had rich experiences. They will not only give suggestions to the Central Committee but will also exercise a certain degree of supervision over the Central Committee. Preventing the overconcentration of power and safeguarding democracy institutionally are set policies of the CCP. This principle will be manifested in various aspects in the forthcoming period. [Text] [HK190837 Hong Kong WEN WEI PO in Chinese 18 Sep 80 p 2]

JILIN AUTUMN FESTIVAL PARTY--A tea party was held 22 September at the auditorium of the Jilin Provincial CPPCC Committee to celebrate the mid-autumn festival. Among the more than 100 participants were vice chairmen of the provincial CPPCC committee, including Yu Yifu, Zhong Mingbiao, Che Minqiao, Guan Mengjue, Cui Cai and Xiao Danfeng, and responsible persons of various democratic parties, including Xu Shouxuan, Cheng Shengsan and Yu Ruihuang. The party was jointly sponsored by the group for propaganda work directed toward Taiwan under the provincial CPPCC committee, the provincial Kuomintang Revolutionary Committee and the provincial preparatory group for establishing the Taiwan Democratic Autonomous League. [Changchun Jilin Provincial Service in Mandarin 1100 GMT 22 Sep 80 SK]

MINORITY VISITORS IN HEILONGJIANG--The "national day" minority visiting group formed by the people of 26 minority nationalities from 11 provinces, municipalities and autonomous regions concluded their visits in Harbin and Qiqihar and left for Changchun 22 September. Li Lian and Li Jianbai, secretaries of the provincial party committee, received them 19 September. Chen Lei, secretary of the provincial party committee and governor of the province, and Zhao Dezun, secretary of the provincial party committee and chairman of the Standing Committee of the provincial people's congress, feted them 21 September [Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 22 Sep 80 SK] Minority visitors in Jilin--the "national day" minority visiting group arrived in Changchun by train 22 September. The 188 visitors include leading cadres at and above county levels, rural grassroots cadres, scientific and technical personnel, model workers and people from democratic parties and religious circles. Yang Zhantao, deputy governor of the province, received them at the station. [Changchun Jilin Provincial Service in Mandarin 1100 GMT 22 Sep 80 SK]

HEILONGJIANG PEOPLE'S CONGRESS CIRCULAR--The Standing Committee of the Heilongjiang Provincial People's Congress recently issued a circular on relaying, studying and implementing the guidelines and documents of the third session of the Fifth National People's Congress. The circular urges all departments and enterprises to check their work in accordance with the guidelines of the NPC and to publicize them throughout the province. [SK230425 Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 22 Sep 80]

HEILONGJIANG RALLY--The Standing Committees of the Heilongjiang provincial and the Harbin municipal people's congresses held a rally 18 September at Harbin workers' gymnasium to relay the guidelines and documents of the third session of the Fifth National People's Congress. It was attended by 5,000 people. Also attending the rally were leading comrades from the provincial party committee, the Standing Committee of the provincial people's congress, the provincial government, the provincial CPPCC committee, the Harbin municipal party committee, the Standing Committee of the municipal people's congress, the municipal government, the municipal CPPCC committee, the provincial military district, cadres from major units and schools and deputies to people's congresses at various levels. Chen Lei, NPC deputy and governor of Heilongjiang Province, presided over the rally. Zhao Dezun, NPC deputy and chairman of the Standing Committee of the provincial people's congress, relayed the documents and resolutions passed at the NPC. [Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 18 Sep 80 SK]

LIAONING CPPCC SESSION--The 12th enlarged session of the Standing Committee of the Liaoning Provincial CPPCC was held 18-21 September in Shenyang Municipality to relay the guidelines and documents of the 2d session of the 5th National People's Congress and the 3d session of the 5th National CPPCC. Li Huang, chairman of the provincial

CPPCC committee, presided. The participants expressed support for NPC documents and discussed the situation in Liaoning Province. [Shenyang Liaoning Provincial Service in Mandarin 2200 GMT 21 Sep 80 SK]

SHANGHAI TAIWAN COMPATRIOTS GATHERING--The Shanghai branch of the Taiwan Democratic Self-government League on the evening of 21 September held a mid-autumn festival get-together of Taiwan compatriots in Shanghai. The gathering was attended by some 200 members of the league, NPC deputies, national CPPCC committee members and well-known personages from various circles. NPC deputy and Taiwan compatriot Lin Minmin spoke about the just concluded NPC session in which Chairman Hua Guofeng called for vigorous efforts to bring about Taiwan's early return to the motherland. [Shanghai City Service in Mandarin 1130 GMT 22 Sep 80 OW]

ZHEJIANG CITY REPORT MEETING--The Hangzhou Municipal Revolutionary Committee held a report meeting on 18 September to convey the guidelines of the third session of the Fifth NPC. Chen Xia, secretary of the Hangzhou Municipal CCP Committee and vice chairman of the municipal revolutionary committee, presided over the meeting. Hangzhou deputies to the third session of the Fifth NPC (Wang Fusheng), (Sun Meiying), (Li Baoqing), (Zhou Dayuan), (Hu Shunquan), (Yu Deyou and (Yu Daxiang) attended the meeting. (Wang Fuseng) made a report at the meeting. He said that a spirit of democracy and reform prevailed at the NPC session and that the session marked a giant step forward in our country's democratization. Chen Xia also spoke at the meeting, calling for efforts to implement the guidelines of the NPC session. [OW230115 Hangzhou Zhejiang Provincial Service in Mandarin 0400 GMT 19 Sep 80 OW]

HONG KONG NEWSPAPER ON GENERAL XU'S PLAN TO WRITE MEMOIRS

HK181315 Hong Kong TA KUNG PAO in Chinese 17 Sep 80 p 3

["Newsletter" by Chung Hsin: "Xu Shiyou Talks About Writing Memoirs"]

[Text] Attending the third session of the Fifth NPC was a veteran general with greying hair wearing cotton-padded shoes and long cotton socks. Chatting animatedly, he said: "This meeting of the NPC is fine. The Party Central Committee has decided to reform the leadership system, reduce the number of concurrent posts and strengthen collective leadership. This is very good."

This deputy is General Xu Shiyou, a battle-tested veteran of many victorious campaigns who is familiar to people in China and elsewhere. There are many moving anecdotes about him. In people's eyes, he is a Zhang Fei-type of legendary figure. Except for his outspoken character shaped by long years in the army, he is quite literate and a sensible person.

When Xu Shiyou was young, his family was in straitened circumstances. He became a monk at the age of 8 in Shaolin Temple, where he learned the Chinese martial arts and mastered them. At 16, he joined Wu Peifu's Big Sword Company as a private. When the northern expedition began, he plunged himself into the storm of the major revolution. In 1926, he joined the Red Guard Regiment which became part of the Red Army. During this period, he took part 5 times in a doomed battalion and was wounded 8 times. Having seen action through the greater part of his life, he rose from the ranks to be a commander. He is 74 this year.

When he was asked how he felt when he was transferred from the Guangzhou PLA Units to the military commission of the Central Committee, he replied unhesitantly: "Obey orders and heed directives. From being a fighter, squad leader and company leader to becoming battalion commander, regimental commander, division commander, army commander, army group commander and commander of military regions, I have gone where the party assigned me, never bargaining over each transfer or reassignment." "The cause of the revolution cannot be disrupted," he went on. "The army also has to be commanded by new persons. There are many outstanding people in the army.

It is imperative that we take the road of bringing forward younger cadres." On the problem of training, selecting and promoting successors, he said: Recruit qualified people and promote them after they have matured.

This veteran general is very concerned about building up the Chinese armed forces. To perpetuate the PLA's fine traditions and hand them to the next generation, he is writing his memoirs and summing up historical experiences. He told reporters that he was writing about the 16 years during which the struggle in Shandong was upheld. The next chapter of his memoirs will be about the Red Army's major campaigns.

He said: "When the fourth front army entered Sichuan, it consisted of only 11,000 men. It rapidly increased to 300,000 men after Chiang Kai-Shek mounted the 'encirclement and suppression campaign' with the help of forces commanded by warlords. As a result, the convergence from six directions was smashed. Moreover, women's battalions were also formed. That is why there were many comrades from Sichuan and women comrades in the Red Army." He added: "I have a clear head so I remember all the major battles waged in the past. Since I have no organic disorders, I will visit Sichuan in the future to take a look at places where battles were fought in former years." An avid reader, Xu Shiyou said he had read "A Dream of Red Mansions" 6 times. He has also read "The Art of War of Sun Zi" and other military writings. He often told his close colleagues: Be loyal to one's country when one is alive. Although I am getting old, I will be ready to take army units to the front if my country needs me.

The veteran general is still going strong and does not appear less vigorous than he was in former years. When the deputies were discussing the four modernizations in the Great Hall of the People, vigorous Xu Shiyou appeared more youthful than before.

BRIEFS

XINJIANG'S DISABLED SERVICEMEN--Xinjiang Autonomous Region has completed the survey on giving allowances to qualified retired or disabled servicemen and families of revolutionary martyrs. At present 3,921 people of all nationalities in Xinjiang regularly receive state living allowances. Some are also given preferential treatment in work points by communes or brigades to which they belong. [OW180649 Urumqi Xinjiang Reigonal Service in Mandarin 1300 GMT 10 Sep 80]

URUMQI PLA UNITS DECISION--The CCP Committee of the Urumqi PLA Units 9 September made a decision to launch activities to learn from He Changfu--a model in cherishing the people. A circular on the decision called on commanders and fighters to make efforts to strengthen unity between the army and the government and between the army and the people and to contribute to building a united, prosperous and civilized Xinjiang. [OW141409 Urumqi Xinjiang Regional Service in Mandarin 1620 GMT 11 Sep 80]

ANHUI PLA CADRE COURSE--The political department of the Anhui Provincial Military District recently sponsored a lecture course for cadres to study the book "Study the Problems of China's Socialist Economy." District Commander Yu Guangmao and 13 other military leaders attended the first lecture. [OW181425 Hefei Anhui Provincial Service in Mandarin 1100 GMT 12 Sep 80]

FUJIAN REMITTANCE EMBEZZLERS--Fuzhou, 14 Sep--Public security organs, procuratorates and courts in Fujian have arrested and convicted a number of criminals who embezzled inward remittances from overseas Chinese. A remittance delivery boy in Dongshan County was sentenced to 3 years, imprisonment for having embezzled 1,400 yuan of inward remittances. An overseas Chinese affairs office director in Xianyou County was arrested for further handling for embezzling 140,000 yuan of overseas Chinese remittances and deposits. In order to protect the legitimate interests of overseas Chinese, returned overseas Chinese and their dependents, the public security organs, procuratorates and courts in Fujian have also taken action to deal with smugglers and other criminals trying to sabotage overseas Chinese remittances. [Beijing Xinhua Domestic Service in Chinese 0234 GMT 14 Sep 80]

TIANJIN MEMORIAL SERVICE--A memorial service for Martyr (Lu Xiufeng) was held at the auditorium of the Tianjin Martyr Cemetery on 16 September. (Lu Xiufeng) was a policeman of the Tianjin Railway Police Station who died in a fight with a criminal in August 1980. Wreaths were sent by the Beijing Municipal CCP Committee and the municipal People's Government, the Tianjin Municipal CCP Committee and the municipal People's Government, the political departments of the Ministry of Railways and the Ministry of Public Security. Attending the memorial service were Liu Jianfu, standing committee member of the Bejing Municipal CCP Committee and deputy mayor; Zhao Jun, deputy mayor of the Tianjin Municipal People's Government; and members of the party organizations of the Ministry of Railways. The meeting was presided over by (Wang Yingren), secretary of the Tianjin Railway Sub-Bureau CCP Committee. (Jiang Guihua), deputy secretary of the public security department of the Beijing Railway Bureau, gave a memorial speech. [SR171121 Tianjin City Service in Mandarin 1430 GMT 16 Sep 80]

XINJIANG PLA MODEL--The Xinjiang Regional Party Committee's Propaganda Department recently issued a circular calling on all cadres and people of all nationalities in Xinjiang to learn from He Changfu, a model deputy squad leader attached to a certain unit of the Urumqi PLA Units who had been commended by the Central Military Commission for cherishing people. [Urumqi Xinjiang Regional Service in Mandarin 1300 GMT 21 Sep 80]

EDITORIALS OFFER BASIC SOLUTIONS FOR EMPLOYMENT PROBLEMS

Hong Kong ZHONGGUO XINWEN in Chinese 14 Aug 80 p 1

[Text] Both RENMIN RIBAO and GONGREN RIBAO today published editorials offering basic methods to solve the employment problem confronting the labor sector.

Both papers pointed out that the employment problem facing the labor force is one of major national concern. Since the establishment of the new republic 30 years ago, great strides have been made to provide the labor force with employment. However, there remain certain problems for which solutions must be found. To remedy the situation, it is imperative that a great effort be made to mobilize the resources of all businesses and all organizations in society to tackle the problem There are many causes which give rise to the labor employment problem, such as the economic setup, the distribution of population, and the educational system. So far as the system of labor employment is concerned, there are too many controls and rigid restrictions which are making it more and more difficult for members of the labor force to find employment. This was especially true during the 10-year period of havoc which devastated the production sector and brought the national economy to the brink of collapse. The result was that, while there were more and more people seeking employment, the capacity to absorb jobseekers became inversely smaller and smaller. The drastic increase in the population of cities and towns further added to the employment problem.

Both papers expressed the opinion that a solution of the problem of labor employment hinges on an increase in production. The basic solution to this problem lies in adjusting our ways of thinking, liberalizing our policies, developing productive enterprises, opening further opportunities for employment, adopting the practice of having labor organizations offer employment opportunities under overall governmental planning and guidance, setting up the dual policy of getting laborers to organize on a voluntary basis to provide employment or letting them seek their own employment, rapidly developing, under the guidelines of this policy, an economic system based on collective ownership responsible for its own profits and losses, and developing an economic system of individual ownership that is not exploitative in nature.

Both editorials emphasized that the low esteem in which collective enterprises are held is unjustified. In the future, collective enterprises should be accorded a position of equality politically. Economically, they should not be made to surrender their profits. Every assistance should by given to collective enterprises for the solution of their problems. They should be permitted to pay wages and benefits approximating those of public enterprises. The more efficiently run collective enterprises should be permitted to pay higher wages and better benefits than publiclyowned enterprises, so long as production is not adversely affected. As for an economic system based on individual ownership, this is actually a subsidiary part of and supplementary to the socialist economic system based on public ownership. For a long time to come, the economic system based on individual ownership will continue to exert a positive and beneficial influence, and it should therefore be adequately developed. It is entirely wrong to condemn individual labor as "taking the capitalistic road" or being "a tool of capitalism." Its good name should now be restored.

ADVANTAGES OF NEW EMPLOYMENT POLICY EXPLAINED

Hong Kong ZHONGGUO XINWEN in Chinese 14 Aug 80 p 1

[Text] Under the overall planning and guidance of the government, the labor sector of the People's Republic of China is implementing step by step the dual policy of taking upon itself the responsibility of making jobs available for the labor force and of letting the labor force organize itself on a voluntary basis to make jobs available to its members or to let members of the labor force find employment on their own. This is a departure from past practices when the government had sole responsibility for assigning jobs to the labor contingent.

This policy was announced at the National Conference on Labor Employment convened by the Chinese Communist Party Central Committee in Beijing on 2-7 August. Among the items discussed at the conference were the future policy on labor employment, the course of action to be taken, and the overall measures to be adopted for the implementation of the policy.

Since the establishment of the PRC, great strides have been made in employment of the labor contingent Over 100 million members of the labor force are presently employed. This figure is over five times that in 1952, shortly after the establishment of the republic. Of this number, 20 million have found employment in the past 3 years. This has alleviated to a considerable extent the problem of unemployment brought on by the Great Cultural Revolution. However, the past practice of having the government taking upon itself the responsibility of allocating jobs to the labor force in the cities and towns created among the jobseekers a reliance on the government for providing them with jobs and a lack of incentive to organize themselves to create job opportunities and find employment on their own.

Actually, as a result of the government's overemphasis in the past on changing the economic system of collective ownership to the system of ownership by the entire people, individual ownership was suppressed and eventually done away with, making it more and more difficult to find opportunities for employment. The result was, on the one hand, the emergence every year of large numbers of jobseekers waiting for government assignments and, on the other, the inability of large numbers of production and service organizations to find workers. The thorough implementation of the new policy will not only help to remove such snags but will also open wide the gate to employment and enable members of the labor force to select suitable jobs on the basis of the needs of the nation and their own preference.

The conference asked the various levels of government to relax their policy, to greatly intensify their efforts to develop collectively owned enterprises which alone are responsible for their profits and losses, to help promote to an adequate degree an economic system based on individual ownership, and to use their manpower resources and the skills and traditionally superior cultural and manual level of the people to develop labor-intensive enterprises. The general idea is for the government to help those who seek employment to set up cooperatives (teams) on their own initiative, to offer them low-interest loans, to encourage and assist individually owned enterprises in their economic development, and to help establish joint agricultural, industrial, and commercial enterprises to be run primarily by young intellectuals in the suburban areas in the cities, counties, and towns. If circumstances permit, certain enterprises and services should be allowed to change their working hours and to increase the number of workshifts and rest periods in order to accommodate a larger number of workers, to offer employment consultation services, and to set up labor organizations that offer technical training and training in the fields of production and services.

PRC OFFERS EMPLOYMENT TO YOUNG INTELLECTUALS

Hong Kong ZHONGGUO XINWEN in Chinese 12 Aug 80 pp 3-4

[Text] At present, of the 1.5 million young intellectuals assigned to work in the mountainous regions and the countryside, 500,000 who had been assigned to various widely scattered work units have been reassigned to the 8,000-odd collective agricultural (forestry) stations and joint agricultural, industrial, and commercial enterprises for young intellectuals in the cities and towns rather than to assign them to jobs over widely scattered areas.

Over the years, thousands upon thousands of young intellectuals have been assigned to work in the mountainous regions and the countryside. They have made positive contributions to the development of the border areas and to the improvement of conditions in the villages. Aside from the benefits derived from practical experience, we have seen the emergence of a contingent of outstanding young intellectuals whose interests range over farflung areas and who have done creditable work in bringing a measure of stability to the countryside. The governments at various levels are most concerned over the problem of finding employment for these young people. Since 1966, the majority of the 15 million young intellectuals who had been assigned to the mountainous regions and the countryside have been offered employment, During the past year alone, employment was found for 3.5 million young intellectuals in the cities and villages who had previously been assigned to the countryside. There are still 1.5 million who remain in the countryside.

In order to find more suitable employment for young intellectuals who remain in the countryside and young intellectuals slated to be assigned to the countryside, changes are being made in the practice of assigning young intellectuals to join work units in widely scattered areas. Job opportunities are now being offered young intellectuals in agricultural (forestry) stations and joint agricultural, industrial, and commercial enterprises in certain cities and towns. This has resulted in increasing the supply of subsidiary agricultural products to the cities and in enriching the learning experience and improving the living conditions of the young intellectuals and the development of cities and towns. Some of these agricultural stations and enterprises were established by the young intellectuals themselves, some with the assistance of the government, some through the financial support of the concerned enterprises themselves, and some through the joint efforts of urban enterprises and agricultural communes. Those agricultural stations and enterprises which are comparatively large in scale are now capable of handling production, processing, and sales. The more recently established are being set up step by step as joint agricultural, industrial, and commercial enterprises. They are all financially independent collective economic units. In the first few years, they are accorded certain privileges provided by the government's "Three Exemptions Policy"--namely, exemption from paying taxes, exemption from paying part of the profit to the government, and exemption from having to sell all or part of the agricultural products to the government.

This system of offering job opportunities to young intellectuals is a vast improvement over the system of assigning them to various work units over widely scattered areas. The better operated agricultural projects and enterprises are being developed into bases for the resettlement and education of young urban intellectuals who had previously been assigned to the countryside, bases for the supply of subsidiary agricultural products to the cities and towns, and bases for turning the villages into satellite cities. The suburb of Xiangtan in Hunan has already been developed into a base operated by young intellectuals for the production of such subsidiary agricultural products as fish, chickens, rabbits, and citrus fruits. The largest modern chicken farm produces 100,000 chickens annually. The pay received by the young intellectuals at the Red Flag general agricultural station in that city is higher than that received by similar workers in that city area. The agricultural station offers the young intellectuals cultural and technical classes on a regular basis. Some of the young intellectuals are selected to undergo technical training. The young intellectuals are also provided free housing, free utilities, free medical care, free nurseries, and free schools for their children. Not only have some of the young intellectuals volunteered to continue to work in the more successful agricultural stations, but these agricultural stations have proved to be very attractive to other young intellectuals. Some of them have joined these agricultural stations with their spouses. Some brothers and sisters have applied to join the joint agricultural, industrial and commercial enterprises. Even the young people in the villages in the vicinity have evinced their desire to join these enterprises.

These agricultural (forestry) stations and joint enterprises go a long way toward the development of satellite cities. They have been made part of the overall plan for urban development in a number of places. The city of Benqi, in Liaoning Province, has set aside four areas within a perimeter of 2 to 20 kilometers for the development of satellite cities and for setting up joint agricultural, industrial, and commercial enterprises to be run by young intellectuals. According to this plan, certain factories and enterprises are to be established in the satellite cities. The city of Mudanjiang in Heilongjiang has already taken advantage of its abundant forests, mountains, and water and land resources to establish 51 agricultural stations for young intellectuals. These stations are closely coordinated with the development of four satellite cities in the Mudanjiang area. They are being developed with a view to the establishment of joint agricultural, industrial, and commercial enterprises.

HONG KONG PAPER ON JINAN UNIVERSITY'S DIFFICULTIES

HK181306 Hong Kong WEN WEI PO in Chinese 17 Sep 80 p 2

[Editorial: "An Appeal on Behalf of Jinan University"]

[Excerpts] According to sources from Beijing, since Jinan University, which has a long history, was reopened, it has been beset with difficulties waiting to be solved. The main difficulty is that a certain military medical university is still occupying the campus. Moreover, although preparations have been made for a new medical school, there are still no funds. In addition, good students cannot be selected on a preference basis, thus teaching quality is affected and so on. At the NCP and CPPCC sessions, delegates and committee members vehemently presented their views. They held that Jinan University was facing a crisis. If the difficulties are not surmounted immediately, the university is bound to close down.

Since the collapse of Lin Biao and "the gang of four," the central authorities have attached importance to the history and prestige of Jinan University. They decided to reopen the school to restore education for overseas Chinese. Since the school reopened 2 years ago, even though it is not new, it is actually being operated like a new school. The past merits have all been sabotaged. Hence there are a great many difficulties, the most prominent one being the military medical university on the campus, whose presence affects the classrooms, laboratories, libraries, hostels for the teaching staff and the students. In the past two sessions of the NPC and the CPPCC, representatives and committee members raised the issue of Jinan University and demanded a prompt solution. The Central Military Commission gave an order demanding the military medical university to move out on schedule and return the school building to its rightful owner. However, no action has yet been taken. As we sympathize with the misfortune of Jinan University, we cannot help but question:

1. It is hard to see why Jinan University was closed down 10 years ago and why a military medical university was allowed to move south to occupy the place. Further, what are the reasons for not implementing the Central Military Commission's eviction order?

2. All places throughout the country are implementing the policy that troops should move out of public and residential premises they occupy and return them to their owners. However, the issue of Jinan University was delayed and has not yet been solved, why?

3. The country is now strictly carrying out democracy and promoting the legal system and no one should have any privilege in any matter. However, the military medical university ignores public opinion. Objectively speaking, does this not amount to obstructing education by exercising privileges?

In our opinion, Jinan University has its own unique history and influence inside and outside the country. It is a place where talented people for socialist reconstruction can be trained. We cannot bear to see a university which was savagely devastated during the cultural revolution remain in a hopeless position. We cannot let it close down helplessly; otherwise, this is an insult to overseas Chinese education. Therefore, we appeal to the central authorities on behalf of Jinan University to properly handle the eviction of the military medical university and prohibit the prolonged occupation of the school for any reason. Jinan University has its historical traditions and responsibility. The state should support it in every way, reopen it as a key university, and furnish it with funds, facilities and teachers.

We hope that the overseas Chinese and Hong Kong and Macao compatriots who are concerned about Jinan University and overseas Chinese education will pay attention to its present situation and give support from all aspects.

'BEIJING RIBAO' COMMENTS ON DOMESTIC TOURISM

OW230123 Beijing XINHUA Domestic Service in Chinese 1312 GMT 21 Sep 80

[Text] Beijing, 21 Sep--About 1 million people in Beijing took part in domestic travel this spring and summer. Among the tourists are retired workers and staff members, teachers, students, workers and cadres, and medical, scientific and technical personnel. The tour was conducted in many forms and ways. Some young students joined summer camps that included study of biology, aviation, astronomy and geography, and military and physical training. Other young students formed their own groups freely and traveled at their own expense. Some tours were for exploration and research. Eight students of the automation course 713 of Qinghua University made a tour on bicycles, covering 1,500 li in 13 days. They said: travel toughens us, increases our knowledge and broadens our horizon.

Departments concerned have created conditions for domestic tourism. The Beijing Taxicab Company, the Capital Bus Company and the Long-Distance Bus Company have opened over a dozen special tour routes covering Badaling, the Ming Tombs, the Yunshui Cave at Shangfang Mountain, the Miyun Reservoir, Chengde and Beidaihe. The Beijing Municipal Taxicab Company has also developed tourism in coordination with taxicab companies in Qingdao, Jinan and Shenyang. The trade unions, women's associations, schools, government offices and mass organizations also organized all kinds of tourist activities. Eight institutes and colleges, including Beijing University, organized over 80 tour groups, comprising more than 20,000 teaching staff and faculty members, to tour Beidaihe, Luda and Qingdao; the tourists comprised about one-third of the teaching staff and faculty members of these institutes and colleges.

In connection with the above, BEIJING RIBAO today publishes a commentary saying that domestic tourism is a very promising undertaking. It is hoped that departments concerned will see this tendency of development clearly, strengthen leadership, plan well and, while improving international tourism, make domestic tourism a success.

TEACHING OF MINORITY DIALECTS STEPPED UP IN SICHUAN

Beijing GUANGMING RIBAO in Chinese 3 Aug 80 p 2

[Article: "Sichuan Prefectures Strengthen Education in Minority Dialects, Extend Years of Schooling for Primary Schools"]

[Text] The Garze, Aba and Liangshan minority nationalities autonomous prefectures in Sichuan Province, in accordance with the spirit of the Central Committee's directive concerning Tibetan work, adjusted and reformed the educational structure of the minority areas so that the minority dialects will become one of the principal subjects in school; the term of study will be extended and the battle line will be shortened: some minority boarding schools that were operated effectively in the fifties will be restored; some middle and elementary schools will hold minority classes.

Very great accomplishments have been achieved in educational matters of Garze, Aba and Liangshan minority autonomous prefectures in the 30 years since liberation. However, because of "leftist" interference since a certain time, the objective circumstances of the minority areas have not been considered and we have blindly demanded "accelerated establishment of universal elementary education, positive development of middle school education," working at the so-called "moving the school to the home doorstep," etc. On the basis of numbers, the schools have been universalized, but in fact, the school matriculation rate is low, the quality of education has fallen, and the development of abilities has not appeared.

Since June of this year, the party committees of these three prefectures have worked at reforming the educational structure in accordance with the social and economic conditions and characteristics of the people in their respective prefectures. Included in this is an extension of the elementary school term to 6 years, with the first year devoted primarily to the study of the minority language. On the basis of experience of almost 2 years of experiments in wiping out illiteracy in the Yi language, the Liangshan Yi Autonomous Prefecture determined: in the future, production teams in areas where minority nationalities live in compact communities need not hold elementary school classes for the first grade, but can devote it primarily to wiping out illiteracy in the Yi language. Some normal schools in the three prefectures will establish courses to train teachers in the minority languages. The Tibetan dialect of Aba Prefecture is very complex, and they intend to select a number of Tibetan dialect teachers out of the general population (including lamas). At the same time, they intend to operate a number of boarding schools that had been operated in the past and use the method of increased stipends to solve the livelihood problems of the minority students. The Garze Tibetan Autonomous Prefecture has prepared to operate one or two elementary schools of this type in each of 17 counties in the pastoral area and border area during the coming school year. The Liangshan Yi Autonomous Prefecture is preparing to operate a few experimental minority classes in the middle and elementary schools in the seats of 11 counties where minorities live in compact communities. The Aba Tibetan Autonomous Prefecture is planning to operate minority elementary schools in Aba, Ruoergai, Hongyuan and Rangtang, all within the limits of the plain where the Red Army passed through.

MIDDLE SCHOOL EDUCATIONAL POLICY REFORMS PROPOSED

Beijing GUANGMING RIBAO in Chinese 5 Aug 80 p 1

[Article: "Vice Minister of Education Advances Five Measures To Change the Proportion of Students Concentrating on Entering Schools of Higher Learning"]

[Text] At the closing session of the National Key Point Middle School Work Conference on 4 August, Vice Minister of Education Zhang Chengxian pointed out that to carry out the educational policy for overall moral, intellectual and physical development conscientiously, we must adopt effective measures to transform the present practice in middle schools of simply seeking for a proportion of students to advance to a higher grade. He proposed five specific measures for this:

1. Throughout the whole country there must be no establishment of college examination quotas for the various provinces, cities and prefectures; the province, cities, autonomous prefectures, as well as prefectures and counties must uniformly set no college examination quotas for their schools. There must be no passing down of college examination norms to the schools, and the proportion of students who advance to college will not be used as the sole criterion in determining whether a school's work has been good or bad, even less should this be used as the basis of rewards or penalties to the schools or teachers.

2. The schools and the students must be resolutely liberated from frequent examinations. The schools need hold only mid-term and final examinations, and the province, prefecture, city and ward must not hold united examinations or surveys, giving the schools a ranking. This practice influences the schools' work in starting from actual conditions.

3. Instruction should be conducted strictly in accordance with the educational plan and the educational outline, and there must be no concentrated effort to finish early or early conclusion of classes, nor should there be a great deal of review so as to affect regular instruction.

4. We must be responsible to the whole student body, and not concentrate on the graduating class and abandon the classes that are not graduating; in the graduating class, we must not concentrate on a few top students, ignoring and abandoning the majority of the students.

5. We must guarantee that students get 9 hours of sleeping time per day, and guarantee physical activity and vacation periods for the students.

ONE CHILD PER COUPLE URGED

Beijing GUANGMING RIBAO in Chinese 11 Aug 80 p 1

[Article: "Why One Child per Couple Is Encouraged"]

[Text] The seventh and current issue of the journal BAN YUE TAN [SEMI-MONTHLY DISCUSSIONS] published the answers of a leading cadre of the State Council's birth control office to questions posed by the journal's reporter on the problem of only bearing one child. The contents are as follows:

Reporter's question: "Why do you want to encourage one child per couple?"

Leading cadre's answer: "China's realization of the four modernizations is the gradual raising of the level of the people's material and cultural life. If by the end of the century, each person in China is to reach an annual mean income of about 1,000 American dollars, then it is necessary on the one hand to actively devleop production and on the other to control population increase. Based on the studies of related departments and calculations on population increase, by the year 2000, the population should be controlled to within 1.2 billion. To realize this goal, we must do a great deal of work from now on so that the birth rate and natural increase rate will decline year by year according to plan. One of the special features of China's population composition is children, and the ratio occupied by young people is high. In 10-odd years, the children of today will enter child bearing age. Therefore, we need to decrease the birth rate and from now on must encourage one child per couple (in special cases two children can be planned). If on the average, couples give birth to two children, by the end of the century China's population will break through the 1.2 billion mark. This will then increase the burden on national economic construction, we will be unable to reach the requirements of the people's income and the improvement of the material and cultural life of the people, and education and employment of later generations will all be influenced."

Question: "If a couple only bears one child can there occur an increase in the population or even the situation of two workers fostering four older people and one child?"

Answer: "It cannot. In encouraging one child per couple, although the number of fostered older people will slowly increase, at the same time the population of fostered children will decrease. The two will offset each other and the number of fostered people will continually decline in the next 25 years. In 1979, the index of fostered older people and children on each worker was 0.93, the average burden not reaching one person. According to the "one birth" plan, by the year 2000, the fostering index will be 0.39, which will be near the lowest point. Although the population of older people will rise from 67 million in 1979 to 114 million, the population of children will decline from 410 million to 180 million. The two will offset each other and the fostered population will still have a decrease of 169 million. The working population will increase from 503 million to 761 million, and the fostering index will decrease even more. In the same way, by the year 2017 the fostering index will only be 0.46. By the year 2034, it can return up to the present level of about 0.91 fostering per worker. On the other hand, due to the raising of the level of material and cultural life, social welfare projects need also be improved and many problems must be appropriately resolved."

Question: "If one child per couple is encouraged, can this cause an aging effect in our population and an inadequate work force?"

Answer: "No, it can't. The reason is that the present compositional age of China's population is young. Based on statistics, those under 29 years of age make up 63 percent of the population. If by 1985 each couple bears only one child, the working age population will continually increase over the next 25 years and in the next 50 years the working population will not be smaller than that of the present. By the year 2010, China's population of those over 65 years of age will be 11.8 percent of the entire population, which corresponds to the average level in modern Europe."

Question: "Is one child per couple a permanent plan?"

Answer: "No. This is based on the special features of China's population composition and is a policy which will be from now until the 21st century. Because this type of policy is employed, we can then guarantee that in the year 2000, China's population will not exceed 1.2 billion. Because China has a vast territory and is a multinational nation, in encouraging one child per couple we must deal with different specific conditions in different ways. Each province, city and autonomous region can, under the guidance of the general policy, deal with the special characteristics of their region and formulate plans suitable to the conditions of their region."

Question: "What considerations and special treatment does our nation give to one child households?"

Answer: "In his government work report at the Second Meeting of the Fifth National Congress, Comrade Hua Guofeng pointed out: 'We must formulate realistic means to encourage one child per couple and progressively implement social insurance for childless older people.' Now, each province, city and autonomous region, based on its population composition and economic conditions, has formulated trial (temporary) rules or methods for family planning. Among them was the method of encouraging one child per couple. At present, we are in the process of discussing the revision of the nation's 'Method of Family Planning' and composing appropriate rules."

BRIEFS

JIANGXI LIBRARY ASSOCIATION--The opening ceremony of the Jiangxi Provincial Library Association and the First Scientific Seminar were recently held in Nanchang. The seminar lasted for 6 days and some 105 representatives from libraries throughout the province attended. This was the first large meeting of the library circle since the founding of the state. Lai Shaoyao, vice chairman of the Provincial CPPCC, Yu Lin, deputy director of the Provincial CCP Committee Propaganda Department, Li Dingkun, director of the Provincial Culture Bureau, and others attended the opening ceremony. Yu Lin spoke at the seminar. He said that libraries had to shoulder great tasks in the new period to promote the four modernizations. Their work directly affects the progress of the state's level of technology. Li Dingkun made a report on strengthening research in library science and speeding up the development of libraries. The seminar printed 35 theses and chose a few to be read. On the last day of the seminar, responsible comrades from the Provincial Culture Bureau, Provincial Teachers' Training School, Provincial Library and other departments were elected to the first council. [Nanchang Jiangxi Provincial Service in Mandarin 1100 GMT 9 Sep 80]

ANHUI CULTURAL RELICS CONFERENCE--The first Anhui Provincial Cultural Relic Work Conference was recently held in Hefei to map out measures for preserving cultural relics in Anhui on the basis of the guidelines of the recently held National Cultural Relic Work Conference. The conference was attended by the directors of culture bureaus at the prefectural, municipal and county levels who are in charge of cultural relics and curators of all museums in Anhui. [Hefei Anhui Provincial Service in Mandarin 1100 GMT 10 Sep 80]

SHANDONG STUDENT ENROLLMENT--Shandong Province has completed its 1980 student enrollment work, admitting 16,691 college students and 28,900 secondary vocational school students. Of the new college students, 12,411 applied to study science; 2,742, liberal arts; 704, foreign languages; 249, the arts; and 585, physical culture and sports. The minimum score for admission to liberal arts is 330 and to science 350. In 1979 the minimum score for admission to liberal arts was 300 and to science, 270. In addition, 73 postgraduates were enrolled this year. [SK171124 Jinan Shandong Provincial Service in Mandarin 2300 GMT 12 Sep 80]

BEIJING PEOPLE'S UNIVERSITY--The 2d artillery command recently turned over the last school building to the Chinese People's University that it had occupied since 1970. The 2d artillery command occupied the buildings of the university in 1970 when it was suspended. In July 1978, the state council decided to reopen the university. Since then the artillery command has turned over several buildings to the People's University. [OW211645 Beijing Domestic Service in Mandarin 1200 GMT 14 Sep 80]

HEILONGJIANG ACADEMIC SYMPOSIUM--An academic symposium on the Rational Development and Utilization of the Heilong, Songhua and the Wusuli Rivers and Ecological Equilibrium concluded 14 September. Attending the symposium were 80 experts, professors and scientists from 24 societies. Some 80 theses were received at the symposium. [Harbin Heilongjiang Provincial Service in Mandarin 2200 GMT 14 Sep 80]

HARBIN MIDDLE SCHOOL--A television middle school was established in Harbin Municipality 15 September. This is a comprehensive secondary school with television education as the main teaching tool. The program includes high school math, physics and chemistry. Jobless youths and in-service workers and staff may apply to study at this school. The course of study is 2 years. Lessons are given on every Tuesday, Thursday and Saturday from 1730 to 2030 on channel one at Heilongjiang Television Station. Noted high school teachers in Harbin Municipality are invited to give lessons. Enrollment is now under way, and the first course will begin by the end of September. [Harbin Heilongjiang Provincial Service in Mandarin 2200 GMT 15 Sep 80]

HEILONGJIANG LITERARY, ART TROUPE--The National Minority Theatrical Festival sponsored by the Ministry of Culture and the State Nationalities Affairs Commission will be held in Beijing 20 September. The Heilongjiang Provincial Performing Delegation that will attend this festival is composed of 62 amateur performers of various minority nationalities throughout the province. Before departing for Beijing, the Provincial Performing Delegation gave a performance at the Theater of the Harbin Municipal Workers' Cultural Palace on the evening of 14 September. Chen Lei, provincial governor, and Li Jianbai, secretary of the Provincial CCP Committee, viewed the performance and received all performers. The delegation will leave Harbin for Beijing 16 September. [Harbin Heilongjiang Provincial Service in Mandarin 2200 GMT 15 Sep 80]

NEI MONGGOL CADRE TRAINING--Hohhot, 16 Sep (XINHUA)--Upon request of the Ministry of Agriculture, the Nei Monggol Institute of Agricultural Sciences and Animal Husbandry began the first cadre training class on 10 September. Forty-two leading Mongolian and Han cadres from the region's leagues, municipalities, banners and counties attended the class. [Beijing XINHUA Domestic Service in Chinese 0343 GMT 16 Sep 80]

BEIJING FAMILY EDUCATION SOCIETY--Beijing, 16 Sep (XINHUA)--The Society for the Study of Family Education was inaugurated in Beijing Municipality on 15 September. Formed on the initiative of the Municipal Women's Federation, its members include noted Beijing educationists, psychologists and journalists. The society was founded mainly to study problems of family education and popularize knowledge in this field. [Beijing XINHUA Domestic Service in Chinese 1237 GMT 16 Sep 80]

HEILONGJIANG EDUCATIONAL BUREAU CONFERENCE--The Heilongjiang Provincial Educational Bureau held a provincial conference on secondary vocational education in Hulan County 4-10 September. The conference noted that the main work of bureaus in charge of secondary vocational schools is to map out development plans for schools, assign teachers and leading cadres and allocate necessary educational funds to schools. The main work of educational departments is to supervise these schools, check how they implement the party's educational policies and principles and assist responsible bureaus in solving problems. The conference also studied the application requirements, deciding that those who apply for study at these schools must be high school graduates, with the exception of vocational nursing schools, where junior high school graduates are also admissible. The length of schooling is 2 to 3 years. Responsible comrades of the Heilongjiang Planning Commission, the Provincial Labor Bureau, the Provincial Financial and Personnel Bureaus and the Provincial CYL Committee attended the conference. [Harbin Heilongjiang Provincial Service in Mandarin 2200 GMT 16 Sep 80]

SHANGHAI BOOK EXCHANGE MEETING--Shanghai, 17 Sep (XINHUA)--A book exchange meeting, the largest since the founding of New China, has been held in Huangpu District, Shanghai, since 15 September. More than 200 representatives from Xinhua bookstores in East China, the central south and the southwest, as well as the distribution centers in Beijing, Shanghai, and Chongqing, have brought with them some 20,000 varieties of books published by more than 140 publishing houses throughout China. During this period, the Shanghai distribution center will hold a discussion meeting to solicit opinions from bookstore representatives from more than 100 cities and 30 counties regarding distribution of Shanghai-published books at their establishments. [Beijing XINHUA Domestic Service in Chinese 0113 GMT 17 Sep 80]

ZHEJIANG NONRESIDENT STUDENTS--It has been decided by the Zhejiang Provincial People's Government that this year, Hangzhou and Ningbo Municipalities will enroll 720 nonresident college students from aomng candidates who have failed in this year's college entrance examination. This project, which will be first tested at Hangzhou University, Hangzhou College of Electronic Industry, Ningbo Teachers' Institute, Ningbo Branch of the TV University and others, will be partly financed by the local authorities, while nominal fees will be collected from nonresident students for tuition, meals, transportation, medical service and textbooks. Graduation certificates will be issued to students who pass the examination at the end of the 3-year study period. Provincial and municipal departments will assign jobs to the best students according to national construction needs. Registration date will be 19-21 September. [OW211625 Hangzhou Zhejiang Provincial Service in Mandarin 1100 GMT 17 Sep 80]

SHANGHAI WORKERS EDUCATION--Shanghai, 19 Sep (XINHUA)--Shanghai's industrial, communications, finance and trade departments have developed workers' education with emphasis on workers secondary schools, which have enrolled more than 650,000 young workers as of now. In the past few years, Shanghai has resumed and set up more than 1,600 workers schools and roughly formed a workers' educational system providing primary through higher-level education. [OW230115 Beijing XINHUA Domestic Service in Chinese 0236 GMT 19 Sep 80]

GANSU ARTISTS CONGRESS--Gansu Province opened its Second Provincial Congress of Literary and Art Workers 18 September. This is the first congress since 1954. It is aimed at studying the party's principles and policies on literary and art work, relaying the spirit of the Fourth National Literary and Art Congress, summing up the provincial lessons and experience gained in this regard in the post-liberation period, discussing the provincial literary and art tasks and plans for the new period, establishing or improving regulations for various societies, setting up new societies and electing leading bodies for various literary and art organizations. More than 600 people attended the opening ceremony, including leading comrades from the Gansu Provincial CCP Committee, the Standing Committee of the Provincial People's Congress, the Provincial People's Government, the Provincial CPPCC Committee and from the Provincial Military District. Among those attending were Feng Jixin, Yang Zhilin, Wang Shitai, Liu Haisheng, Gao Jinchun, Qiang Zixiu, (Qian Renhua), Huang Zhengqing, Li Qiyang, Zheng Zhongyuan and Li Bin; and literary and art workers of various nationalities from various localities and PLA units throughout the province. Comrade (Li Yuan) gave the opening speech and Yang Zhilin, secretary of the Provincial CCP Committee, addressed the congress. [Lanzhou Gansu Provincial Service in Mandarin 1125 GMT 18 Sep 80]

SECONDARY SCHOOL REFORMS--Shenyeng Municipality recently disbursed 1 million yuan of local emergency funds to be used in developing education and to solve key problems of insufficient funds for the reform of the secondary educational structure. Last year, Shenyang experimentally operated six technical senior middle schools and seven agricultural middle schools, and this year every county and prefecture is planning to develop a group of schools like these, but because of a lack of funds, the plan for operating the schools has been delayed repeatedly and could not be realized. Because of this, the municipal party committee, the municipal government and the finance department tightened up on other disbursements and issued 1 million yuan from local finances to supplement educational expenses. This fall, there will be supplements for the expenses of development at various kinds of vocational schools and agricultural middle schools, including television instruction, teacher instruction, spare-time instruction and other items. [Text] [Beijing GUANGMING RIBAO in Chinese 4 Aug 80 p 1] 9284

NEI MONGGOL RADIO-TV UNIVERSITY--The Nei Monggol Regional Radio-TV University has made great progress during recent years. Over the past 2 years, more than 10,000 students have been enrolled. In 1979 this university enrolled 8,200 students, of which 1,000 are students not engaged in production. In 1980, there are 2,421 students enrolled in the university, 1,200 of whom are full-time students. Approved by the Regional People's Government, this university has also enrolled 900 students from jobless youths and high school graduates this year. [SK231342 Hohhot Nei Monggol Regional Service in Mandarin 1100 GMT 22 Sep 80]

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

SYMPOSIUM ON ACTING ACCORDING TO 'GUIDING PRINCIPLES'

Tianjin TIANJIN RIBAO in Chinese 1 Aug 80 p 1

[Article: "Resolutely Act According to the 'Guiding Principles' and Rectify the Party's Workstyle"]

[Text] From 29 to 31 July, the Preparatory Group of the Municipal Discipline Inspection Committee convened a symposium on pursuing thoroughly the ' "guiding principles." It was attended by leading cadres responsible for disciplinary examination work from various wards, counties, bureaus, and organizations under the direct jurisdiction of the city. Experiences in learning to pursue thoroughly the "guiding principles" were exchanged, and the topic of how to further grasp well the work of pursuing thoroughly the "guiding principles" was discussed.

The symposium was vigorous and lively. Comrades attending the symposium expressed their opinions with zest and gusto. Everybody said that he thought and gave many valuable opinions and suggestions.

Many comrades suggested that within a certain period of time, in addition to completely grasping well the thorough execution of the "guiding principles," it will be necessary to emphatically grasp well the following three aspects:

1) Firecely grasp existing problems connected with upholding the party's political and ideological lines. It is necessary to earnestly examine those who are in the leading posts of various fronts but who would take over but do nothing, drag on but take no action, with regard to the party's and nation's lines, policies, and laws and regulations; with regard to the various directives and regulations of the central Discipline Inspection Commission; and with regard to the decisions and instructions of the municipal party committee. Disciplinary action should be resolutely meted out to those who will not change after repeated advice, or whose case is very serious.

2) Fiercely grasp problems connected with accepting the supervision of the party and the masses and not going in for special privileges. Those who would break the law and disturb the order by using their professional position to gain special privileges, by trying to earn private profit, by going in for specialization, by corrupting and stealing, by converting public property to personal use and by humiliating dealing blows to, and planning to kill others should be severely punished, and their bad style should be relentlessly checked.

3) Fiercely grasp problems connected with struggling against wrong trends, bad persons, and bad things. Good party members who have engaged in struggle against bad persons and bad things should be strenuously promoted and encouraged. Those who do not give a helping hand to a man in danger should be criticized and severely punished. A new style should be created within the party and in society that considers it glorious to engage in struggle against wrong trends, bad persons, and bad things, and shameful to look on with folded arms. The bad style should become like "rats running across the street; people shout, 'beat them.'"

Many comrades also suggested that, beginning this year, a fixed month in each year be designated as the month for examining how the "guiding principles" are being carried out. By firmly grasping this once a year, the results can be seen after 3 to 5 years.

Comrade Chen Weida [7115 0251 6671], first secretary of the municipal party committee, gave a speech at the symposium. He said that because of the interference and damage of Lin Biao, the "gang of four," and their surrogates in Tianjin, the wounds inflicted on the construction of Tianjin's party organizations are very serious. Since the "gang of four" was smashed, we have achieved good results in party construction, but there are still very great discrepancies. In order to further strengthen the construction of the ideology, organization, and workstyle of our Tianjin party organizations, we need time and much arduous struggle. Therefore, in rectifying the party's workstyle, we should not act overzealously. And in party construction, we have to insist on the party's principles and also to proceed steadily. We must earnestly study, pursue thoroughly, and carry out the "guiding principles," and restore and develop our party's fine tradition and workstyle. In rectifying party style and strengthening party construction, we have to make important decisions and exert great efforts. He said that from now on, comrades who engage in either political work or economic work must insist on democratic centralism and resolutely act according to the "guiding principles." In discipline inspection work, attention must be paid not only to an insistence on principles but also to education. To comrades who have made mistakes, we should insist on the principle of taking a lesson from the past and avoiding future mistakes, and curing the illness to saving the patient from danger. Punishment is important, but education is more important. We should highly regard the practice of leading and educating the masses within and outside the party by using the correct models, and grasp well the propaganda work for correct models in carrying out the "guiding principles." Our party is very hopeful. Under the leadership of the Party Central Committee, and through our joint efforts, it is definitely possible for us to do a good job of rectifying and constructing the party.

Li Yanwu [2621 4282 0710], standing member of the municipal party committee, also made a speech at the symposium.

OLD CADRES URGED TO YIELD POSITIONS TO TALENTED PROFESSIONALS

Hangzhou ZHEJIANG RIBAO in Chinese 27 Aug 80 p 3

[Article by Bao Ding [0545 0002]: "Recommend, Yield One's Position to, and Employ the More Talented"]

[Text] In his diary, "Rongzhai Manuscript," Song Hongmai recorded this episode: "When Sun Quan came to power as the new ruler of the Kingdom of Wu, Lu Su wanted to return to north China. But Zhou Yu pleaded him to stay in the Kingdom of Wu. After Zhou Yu succeeded in doing so, he introduced Lu Su to Sun Quan, saying: "Your Majesty must widely look for competent aides like Lu Su who will help you achieve success." When Zhou Yu was gravely ill, he told Sun Quan: "Lu Su is a man whom you can trust--a man who is undaunted in the face of perils and is capable of handling any situation. I would be glad to see him take my place before I die." Immediately upon hearing this, Sun Quan named Lu Su minister of war and asked him to command the troops once led by Zhou Yu. When Lu Su encamped his troops in Lukou, he visited Lu Meng, governor of Xunyang Prefecture, and conferred with him on military affairs as soon as he learned that [Lu Meng] was a talented strategist. As soon as the visitor learned of Lu Meng's strategy for the deployment of the troops of the Kingdom of Wu, Lu Su jumped up from the chair and patted Lu Meng on the back, saying: "My friend, you are really great and outstanding!" Before bidding farewell to his host, Lu Su also paid a tribute to Lu Meng's mother. Shortly after Lu Su's death, Lu Meng took over the command of the troops stationed in Lukou. Later, when Lu Meng resigned from his post for reasons of health, Sun Quan asked him: "Could you recommend anyone as your successor?" Lu Meng replied: "Lu Xun is a thoughtful, farsighted, and capable leader." Without asking any more questions, Sun Quan soon summoned Lu Xun to his office and appointed him the commanding general to succeed Lu Meng.

Zhou Yu, Lu Su and Lu Meng were well-known generals of the Kingdom of Wu and Sun Quan's righthand men and high-ranking aides. When they successively yielded their positions to one another, they made no mistakes. Their main reason for yielding their positions to the more talented was poor health and old age. In other words, they felt too old and too weak to shoulder the heavy responsibilities of state. It was this idea that prompted them to voluntarily recommend and yield their frontline commanding positions to the younger, more talented, and competent generals. What a lofty virtue that was!

Today, this practice of yielding positions to the more talented has become increasingly popular with the people in our socialist country. There are old and ailing cadres in our country today who are no longer qualified to carry out the four modernizations program. Mindful of our long-range national interests, they have voluntarily given up their positions to more robust and outstanding professionals who adhere to the socialist road and are capable of meeting the challenges posed by the four modernizations, and they have willingly assumed the less important positions of advisors and assistants. This action reflects the broadmindedness of Communist Party members, a virtue of the highest order ever displayed by them. There are many other comrades, however, who have been unwilling to yield their positions to more talented professionals. Whenever they hear people talk about yielding positions to the more talented, these shortsighted comrades with declining revolutionary will--comrades who rest on the laurels of their revoluntionary past--feel unhappy, grumbling: "During the Great Cultural Revolution, we were asked to stand on the sidelines. Now we are being asked to give up our positions." This idea is wrong. We must make a clear distinction between the plot of Lin Biao and the "gang of four" to overthrow all old cadres as an inevitable step in usurping the party and state power, and our recent policy of encouraging old cadres to yield their positions to more talented professionals so as to accelerate the tempo of the four modernizations. The willingness displayed by some of our old comrades to yield their positions reflects a high degree of their loyalty to the party's revolutionary cause. In other words, we should not confuse what Lin Biao and the "gang of four" did with regard to the old cadres during the Great Cultural Revolution with our current policy of encouraging our old cadres to "yield their positions to the more talented." Our policy of encouraging old cadres to yield their positions does not indicate that we want all of our old cadres to quit their posts. As everyone knows, old cadres who have accumulated rich experiences in all fields of work during the protacted revolutionary struggle are valuable assets to our party and state. Among them are resourceful and competent comrades proficient in professional knowledge who undoubtedly still form an important force for carrying out the four modernizations. But as time goes on, the old are bound to be replaced by the new. Even those comrades who hold very important positions still have to consider yielding their positions to the robust cadres of integrity sometime in the future, in order to accelerate the tempo of the four modernizations. They must regard this as a duty none of them can evade.

The ancients said: "A big bird relies on its wings and the air to fly high in the sky. Recruiting and employing able talents to serve the government is an important function to which a ruler must attend. A ruler without the truly competent to be his aides resembles a doctor without good medicine to treat his patients." This means that the ancient rulers attached great importance to the recruiting of good talent. They often considered recruiting and appointing the competent to fill important vacancies as the first order of business. They were willing to do everything possible to overcome all difficulties in introducing healthy and fresh blood to the government. It is certain that appointing talented professionals to important posts will give rise to jealousy among the people. This will occur from time to time. For this reason, whether or not a person is competent should be tested before he is recruited to fill any position vacated by an old cadre. If he is competent, he should be employed and appointed to a suitable position yielded by an old comrade, disregarding any slander or insinuation against him. In this respect, Sun Quan set a good example for us to follow. When Zhou Yu yielded his position to Lu Su, a man named Zhang Zhao at that time viciously called Lu Su a "precocious and unsophisticated youth who is unpopular with the people working under him." Su Quan was not disturbed by this charge, because he was well aware of, and had confidence in, Lu Su's ability to help him govern the country. Sun Quan also felt that "a ruler should disregard minor mistakes committed by great heroes, and should not mind tiny defects in a jade of great beauty." He held that once anyone saw a white jade with tiny defects, he certainly would not throw it away as rubbish. When Lu Meng yielded his position to Lu Xun, Chun Yushi, governor of Kuaiji Prefecture, sent a letter to Sun Quan, saying: "Your decision to select and appoint an inexperienced and untested youth to an important position worries me." As soon as Lu Xun arrived in the capital of the Kingdom of Wu, he praised his critic Chun Yushi in the presence of Sun Quan as being a "good official." Upon hearing this, Sun Quan was surprised, asking Lu Xun: "Why do you want to praise your critic Chun Yushi?" Lu Xun replied: "Chun Yushi criticized me for a reason that is unknown to me. If I answer his charges with countercharges, it is not in the people's interests. For this reason, such meaningless bickering should be stopped forthwith." Sun Quan said: "You have really set a good precedent worthy of emulation by others." False charges, such as those framed by Zhang Zhao and Chun Yushi, against persons to be appointed to important positions are not dreadful. What worries us is the fact that some employers fail to distinguish genuine talent from fakes, and sycophants from dedicated competent workers. Sun Quan deserves to be called a wise ruler capable of distinguishing right from wrong and promoting good officials and eliminating bad elements. But some of our leaders often become hesitant and even back away from their original decisions to employ talented persons as soon as they heard some criticism and insinuation against them. I know that some old cadres vowed 18 months ago to yield their positions to the more talented. But so far, they still have not delivered on their promise. According to the proverb, there is neither pure gold nor perfect persons and talents in the world. As long as they are generally good and as long as they are persons of integrity, they must be boldly employed, regardless of their minor shortcomings. Only in this way can we take a step forward in training and bringing up a younger generation of talented professionals and help them grow in strength.

Millions and millions of outstanding skilled workers should be trained to meet the needs of the four modernizations. Our broadminded and farsighted old cadres should actively create conditions for those resourceful and outstanding youths to move up step by step to key positions so that they can play an active role in the march toward the four modernizations and in building China into an economically prosperous country.

PARTY AND STATE

IDEOLOGICAL, POLITICAL EDUCATION OF PARTY MEMBERS VITAL

Tianjin TIANJIN RIBAO in Chinese 11 Aug 80 p 3

[Article by Zhu Zhichu [2612 0037 0443]: "Earnestly Grasp the Ideological and Political Education of Party Members"]

[Text] To grasp well the ideological and political education of party members is very significant for correcting all kinds of bad styles created within the party by Lin Biao and the "gang of four" over a long period, for restoring and developing our party's fine workstyle formed during the long revolutionary struggle, for strengthening and improving the party's leadership, for increasing the party's fighting capacity, and for ensuring the satisfactory progress of the construction of the four modernizations.

The party's fighting capability and prestige emanate from two factors. One is the party's correct line, reflecting objective reality and the people's privileges. The second is the fine workstyle of the party and the exemplary vanguard role of party members. Now that the party's political line, ideological line, and organizational line are all correct, there is no question about this. Therefore, whether the party's lines can be pursued thoroughly within the whole party depends on how well developed the stronghold role of the party organizations and the exemplary vanguard role of the party members are. If our party's organizations at all levels and all party members can truly reach the standards specified in "Certain Guiding Principles for Political Life Within the Party" and the "Constitution of the Chinese Communist Party" (revised edition), then the party's lines will be fully put into effect and converted to a huge material base, with the result that the party's fighting capabilities will be greatly strengthened. As can be seen from the situation with our city's party members at present, however, there are still discrepancies of various degrees from the standards of the "guiding principles" and the revised edition of the party constitution. Especially, some party members who joined the party during the Great Cultural Revolution are basically unqualified to be party members. Some older party members who have been in the party for many years have also become not as well qualified because of the evil effects of the 10 tumultuous years of Lin Biao and the "gang of four." As a result, the party's prestige among the masses of people has been damaged and the party's fighting capability seriously reduced, thus rendering it very unsuitable to bear the heavy responsibility of leading the construction of the four modernizations. Because of this, the Party Central Committee has requested that before the convention of the 12th National People's Congress, through widespread learning of the spirit of the Fifth Plenum of the 11th Party Central Committee, the revised edition of the party construction be discussed, the execution of the "guiding principles" be pursued thoroughly, and the writings on party construction by party leaders be studied,.thus conducting all-around and deep ideological and political education for all party members and cadres.

During the previous stage, the ideological and political education of party members in our city has been satisfactory and has had definite results. As far as the whole city is concerned, however, the development of this work is not yet balanced; party organizations of certain units have not paid enough attention to it, have not grasped it firmly, and have not taken enough measures; even some leading cadres themselves have not learned in earnest. Some of them are learning for learning's sake, and doing for doing's sake. Theory and practice have thus become disjointed and actual results cannot be gained. Therefore, in order to go in better for the ideological and political education work of our city's party members, it is necessary for party organizations at all levels to put forth their best efforts.

Recently, related departments of the Municipal Party Committee, together with the party committees of some wards, counties, and bureaus, conducted a preliminary investigation and analysis of the status of the party members of some basic-level units. From the [study] of party members of these units, it really can be seen that some party members are unqualified or basically unqualified. Major problems exist among them, including. Some party members have been afflicted more deeply with the evil effects of Lin Biao and the "gang of four," are rigid in thinking, and up to now even do not understand, doubt, and are in conflict with the party's present lines, guiding principles, and policies. Some party members have a serious factional attitude, pull and drag this way and that, go in for personal influence, and yet even now are still being received as equals within the party organization. Some party members are very poor in organizational discipline, do not carry out the party's decisions, do not observe the party's appointments, do whatever they wish, and even break the law and disturb order, corrupt morals, and commit foolish acts. Some comrades have developed a serious individualistic attitude, ask for official positions and authority by reaching out their hands to the party, seek private profit through their posts, and go in for bad styles such as specialization, etc. Some party members have a poor revolutionary consciousness, are passive and backward, and do not play the [proper] role as party member's for long. All these problems are incompatible with being a Communist Party member. Therefore, each unit should earnestly go in for an analysis of the status of party members, strictly following the stipulations for the privileges and responsibilities of party members in the "guiding principles" and the revised edition of the party constitution, truly and accurately grasping the outstanding problems existing among the party members in their own units, and solving them by seeking truth from facts.

The important point in the ideological and political education of party members is to increase the ideological and political level of consciousness of the majority of party members so that they will understand the party's character programs, guiding ideology, organizational principles, party regulations, and laws, the three great workstyles, responsibilities, and privileges of party members, and how to be qualified Communist Party members. Each party member should examine himself in earnest, straighten out his ideological consciousness, increase his self-consciousness in carrying out the party's ideological line and political line, have truly the same heart and mind as the party, maintain consistency with the party politically, and in his actual work liberate thinking, seek truth from facts, insist on the four basic principles, and work for the four modernizations with one heart and one mind.

Attention should be paid to solving the problem of factional spirit. At present, there are many persons in the party who hold firmly to the factional spirit, believe that factional spirit is higher than party spirit, and feel that the party is not as close as the faction. Therefore we have to be determined to solve the problem of the capitalistic factionalist spirit, insist on criticizing the factionalist spirit until it stinks, educate party members to recognize the danger of the factionalist spirit, and actively set limits for those who stubbornly have a factionalist spirit. At the same time, those who have a factionalist spirit should be pressed to comprehend, renounce their mistakes, and reform.

It is necessary to uphold the party's concentration and unity and strengthen organizational discipline. In the education of party members, it is necessary to fiercely grasp the rectification of organizational discipline. Each party member should examine his own position toward executing unified discipline: "The individual is subordinate to the organization; the minority is subordinate to the majority; lower organizations are subordinate to higher organizations; the entire membership is subordinate to the Central Committee." He should self-consciously correct all words and deeds that violate organizational discipline, have the capability to know things in general and act in the interests of the general situation, correctly deal with the relationship between the individual and the organization, and self-consciously observe party discipline.

The party's fine traditional workstyle should be restored and developed. Through this education, we should further restore and develop such fine traditions and workstyles as the mass line, seeking truth from facts, theory linked with practice, criticism and self-criticism, and arduous struggle. Party members, especially those undertaking leading work, should overcome such bad styles as bureaucratism and specialization, and they should absolutely not be allowed to seek personal profit by making use of their professional positions. Each party member should have the spirit of criticism and self-criticism, guide his conduct by strict rules, do things in the open, not avoid confrontation and not cover up defects and mistakes, examine himself self-consciously, be ever ready for correction, and have the courage to boycott and struggle with wrong trends, bad style, and evil atmosphere.

In conducting the ideological and political education of party members, party organizations at all levels should try their best to carry out political and ideological work deeply and carefully from beginning to end, educate party members "to start from now, start from themselves, and start from everything," and strictly act according to the "guiding principles" and the stipulations of the revised edition of the party constitution. To those comrades who made this and that mistake under the evil influence of Lin Biao and the "gang of four," we should patiently carry out ideological rectification work well. With regard to those comrades who made serious mistakes, it is still necessary to insist on the principle of "curing the illness and saving the patient from danger," and "unity--criticism--unity." With regard to those party members who do not want to change after repeated advice, who disregard the repeatedly issued orders of the Party Central Committee, who grind their teeth in hatred of the party's lines, guiding principles, and policies, who take over work but do nothing, who still engage overtly and covertly in factional splitist activities even up to the present who want to be received as equals within the party organization, who openly commit foolish acts, and who seriously break the law and disturb order, we should decidedly punish them according to party discipline and the laws of the nation. We should never allow them to continue to go free.

In sum, before the convention of the 12th National People's Congress, party organizations at all levels should earnestly grasp well the ideological and political education of party members, and, through studying and discussing the revised edition of the party constitution and pursuing thoroughly the execution of the "guiding principles," completely get rid of the evil effects of Lin Biao and the "gang of four," support the leading ranks of the party at all levels, go in for correct party style and for strict party discipline, and elevate the majority of party members to the level of qualified party members, so as to fully develop the stronghold role and the exemplary vanguard role of party organizations at all levels in the construction of the four modernizations.

VIOLATIONS OF PARTY DISCIPLINE UNCOVERED IN ZHEJIANG

Hangshou ZHEJIANG RIBAO in Chinese 27 Aug 80 p 3

[Article by the Discipline Inspection Commission of Wenzhou Prefectural Party Committee: "Uphold the Solemnity of Party Discipline"]

[Text] Our discipline inspection commission has considered it a sacred duty to uphold the party's "guiding principles" and to preserve the sanctity of party discipline.

Last year, we investigated and prosecuted several major and complicated cases involving violations of law and discipline. For a long time, Lin Biao and the "gang of four" trampled our party regulations and rules underfoot, thus creating a situation in which party discipline was not strictly observed by party members. From our handling of the aforementioned cases we feel that today it is very difficult to track down and prosecute any cases of violations of discipline. Last year, when we accepted the assignment to investigate a number of major and complicated cases of violation of discipline, some friendly comrades were worried about whether we could carry out our assignment, saying: "In feudal society, law enforcement officials like Bao Gong were authorized to execute criminals without the prior approval of higher authorities. Today, in our socialist society, law enforcement officials must carry out their duties without the delegation of that kind of power, thus making it more difficult for them to investigate and prosecute a case." To be blunt, the so-called difficulties have resulted from resistance by alleged violators of discipline, their associates and leaders. When the alleged violators of discipline were being questioned, they often refused to tell the truth and complicated the investigations with lies and false depositions. They even spread rumors to mislead the people, in the hope of compelling us to stop the investigations. When we check their depositions with their associates, they either lied to us for fear of reprisals from the suspected violators of discipline, who still wielded power and exercised influence over the people, or helped them cover up the seamy side of the cases in an attempt to prevent us from continuing the investigations. Some of them even tried to frighten discipline inspection cadres with threats of violence. When we went to confer with their leaders on the cases, they even tried to exonerate and protect the suspects, in gross disregard of the sanctity of law and discipline and principles for which our party stands.

In the face of such a difficult and complicated situation, should we continue or retreat from our investigations? As discipline inspection cadres, we have always considered it our duty to defend party rules and regulations, to do everyone justice, to resolutely struggle against saboteurs of the party's fine workstyles and violators of party discipline, and to uphold the solemnity of party discipline. In order to carry out the tasks assigned by the party, we must daringly stand up to, and nibble at, any "hard bones." The masses have demanded that when an inspection of party discipline is conducted, everyone be treated as equal before the law. In this connection, they said: "We must display courage to deal blows not only to 'flies' but also to 'roaches' and tigers and wolves as well." We must daringly "nibble at hard bones" in response to the masses' demand. Only in this way can we preserve the sanctity of party rules and regulations. We also feel that the party should take action against anyone proven guilty of violating its discipline, no matter how long his service, how high his position, or how great his contributions. In this connection, some leading members of our prefectural discipline inspection commission often say: "Since the party and people have entrusted us with the task of inspecting party discipline, we must politically commit ourselves to serve the interests of the party, to make justice prevail, and to preserve the sanctity of party regulations and rules." To this end, we should not fear offending the people or fear their reprisals or any other unfavorable consequences. We must carefully and thoroughly conduct investigations and handle every case with a high sense of responsibility for the revolution and in a spirit of seeking truth from facts. We must gather information which will lead us to track down a case and get a clear understanding of it. In short, we must exercise great care in handling each case.

An example was the case of Ye Ruiyu [5509 3843 3768] and company, who avenged their opponents with retaliatory actions. In June and July 1979, as a result of two investigations into this case, we obtained indisputable circumstantial and material evidence. On 4 August 1979, we completed an investigatory report identifying the Ye Ruiyu case as one of suppressing democracy, of infringing on the democratic rights and personal freedoms of party members and citizens, and of avenging opponents with retaliatory actions, in violation of party discipline and state laws. At the same time, on the basis of the facts and our longstanding policy, using party discipline as the criterion, we suggested that the party take disciplinary action against Ye Ruiyu and company. But the principal responsible person of the municipal party committee rejected this suggestion, trying to shelve the case. In order to uphold the party regulations and rules and justice and preserve the sanctity of party discipline, we repeatedly called on him to speed up the handling of the case. We did so without fear of offending anyone. Another leading comrade on our prefectural discipline inspection commission also discussed this matter by telephone with a responsible comrade of the municipal discipline inspection commission several times, asking him to relay a request to the municipal party committee to give opinions of its own in order to conclude the case expeditiously. Fearing neither reprisals nor other unfavorable consequences, some comrades on our prefectural discipline inspection commission wrote two letters to the central Commission for Inspection of Discipline scolding the principal responsible person of the Wenzhou Municipal Party Committee for presenting biased opinions in defense of the violators of discipline. In the letters, they also presented opinions of their own, saying: "If the violations of law and discipline by Ye Ruiyu and company are not dealt with according to the provisions of party discipline, it will risk the wrath and condemnation of other party members and the people." We feel that in handling cases, we must seek truth from facts, uphold principles, and carry the struggle through to the end; we should neither circumvent contradictions nor knuckle under to pressures. Experience proves that as long as we seek truth from facts, the party committees and discipline inspection commissions at the higher levels will certainly do everything possible to back us up.

In handling the violations of law and discipline, we must persist in the principle of everyone being equal before the discipline, do justice to all parties concerned, and indulge in neither favortism nor nepotism. We must never abuse our authority by giving favorable treatment to certain violators of law and discipline, and we must take the law as the criterion for testing party character. During the 10 years of turmoil caused by Lin Biao and the "gang of four," they and their followers concentrated on building up their own mountain strongholds, practiced factionalism, traded flattery for favors, and did everything in gross disregard of principles and discipline. If a member of their mountain stronghold was found guilty of crimes, they could first reduce the major issues to minor ones and then the minor ones to naught. This pernicious influence is still playing havoc with some comrades within our party even now. Last year, when we investigated a violation of law and discipline, the suspected violators lobbied for "special favors" from us through his relatives and old colleagues. But we countered this "lobbying campaign" with a determination to uphold the principle to deal his case according to the provisions of party discipline. In the course of our investigation, we pledged to indulge neither in favoritism nor in nepotism. We did so without fear of offending people. Consequently, all forms of interference in our work were overcome and the discipline and principles of the party were upheld, thus paving the way for more effective and successful implementation of the tasks assigned by the party.

NATURE OF 1898 REFORM MOVEMENT DISCUSSED

Shanghai WEN HUI BAO in Chinese 18 Jul 80 p 4

[Article by Jin Dequn [6855 1795 5028]: "The 1898 Reform Was Not a Reformist Movement"]

[Text] On the question of the nature of the 1898 Reform, there was a fairly consistent view before the Cultural Revolution, which took it as "a kind of soft reformist movement" and as "exemplifying a patriotic character and progressive significance."[1] During the Cultural Revolution, Qi Benyu [2058 2609 4416] was the first to initiate a revolt by arbitrarily declaring that the 1898 Reform was "reactionary," "traitorous," and "a false, reactionary path which cannot be followed through." In recent years, not a few comrades have published articles to return to order from disorder and affirm anew the positive, progressive role of the 1898 Reform; this was commendable and also very necessary. But, some comrades still said that "the 1898 Reform was a reformist political movement."[2] We are of the opinion that the 1898 Reform was a patriotic, salvational reform movement started at the end of the 19th century by the bourgeoisie. It is all right to say that the 1898 Reform was a bourgeois political reform movement, but it would be inappropriate to say that it was a reformist movement.

Reform and reformism are not the same; they are two different concepts and cannot be confused with each other, just like revision and revisionism; a strict distinction in usage is involved.

Reform and renovation are of the same political connotation, namely, the change of old laws and the execution of new policies. Reformism is a term of external origin which emerged in Europe at the end of the 19th century; it is designated a political current in the workers' movement which was hostile to Marxism and the fundamental interest of the proletariat, and it substituted anti-capitalist class struggle with a little reform which did not at all touch the foundation of the exploitative system of the bourgeoisie. Lenin set forth a clear political demarcation in his views on reform and reformism when he said: "An action of reform is usually slow, prudent and gradual, but not retrogressive."[3] He also said: "A

Marxist is different from an anarchist; he acknowledges the struggle to achieve reform, i.e., he acknowledges the struggle to effect an improvement of the condition of the laborer in a situation in which the ruling class still retains the control of political power. But at the same time, a Marxist is also firmly opposed to a reformist who directly or indirectly limits the orientation and activity of the working class within the realm of reform. Reformism is a deception perpetrated by the bourgeoisie against the workers, because, so long as the rule of capital continues to exist, the workers remain hired slaves no matter how individual reforms are carried out."[4] This indicates that, under ordinary historical conditions, reform is a regular, progressive measure; but if one limits oneself within the realm of reform even when the opportunity for revolution becomes ripe, one is bound to be trapped in reformism and thereby play the reactionary role of eroding and anesthetizing [the will of] the masses. This is to say that, when we analyze a problem we must base ourselves on definite time and conditions and thereby pass a fair judgment.

The 1898 Reform occurred at the end of the 19th century; although the rising Chinese national bourgeoisie was then still rather immature, it did, after all, represent a new mode of production; it consisted of revolutionaries and pioneers; it reflected the demand for new productive forces; and it was a principal motive force propelling society forward. They urgently demanded a change in the existing situation, and they were working hard to cumulate their strength for ridding China of the danger of partition by the Powers and of the oppression of feudalism and autocracy; they were full of vigor and eager to try their strength. The heavy tasks of anti-imperialism and anti-feudalism conferred by the new era were now, at this juncture, falling on the shoulders of the national bourgeoisie. At that time, there were two factions in the politics of the Chinese national bourgeoisie: one was the reformers represented by Kang Yuwei, Liang Qichao, Yen Fu, Tan Shitong, etc., who advocated the following of the path of reform, the changing of existing laws and the adoption of new policies; the other was the revolutionaries represented by Sun Zhongshan, who advocated the following of the path of revolution and armed opposition to the Qing Government. Between these two factions "there were very intimate and cordial interchanges, and no differentiation was really stressed." Both of them were seeking truth, exploring the paths for the salvation of the state and the nation; for the purpose of reaching a basically similar ultimate destination, a movement for social change in two different forms was carried out: there was no contradiction between the parallels. This was not the way Lin Biao, the "gang of four" and their hackneyed literateurs had described it, that the emergence of a reform movement was always against revolution and essentially reactionary.

This was tested by social practice. In 1894, Xun Zhongshan organized the earliest bourgeois revolutionary group--the China Revival Association--and proposed the revolutionary program of "driving out the barbarians, reviving China, and establishing a federal government." After he failed for the first time when he led the Guangzhou uprising, the ordinary people took Sun Zhongshan, who wanted to overthrow the Emperor, as a "madman" and dared not get near to him. This fact indicates that the subjective and objective conditions for a bourgeois revolution were still not present at that time. Sun Zhongshan's revolutionary policy and activity were still not understood by people. On the other hand, the "presentation of a memorial by way of the official carriage" sponsored by Kang Yuwei and Liang Qichao in those days served to organize more than 1,000 imperial licentiates from all over the country to present their common memorial and appeal together and provide a new mode of conduct, resulting in their great popularity for a time. They repeatedly submitted memorials to the Qing emperor, organized study societies, established schools, published newspapers, pointed out time and again the danger of state annexation and national annihilation, sharply reprimanded the conduct of betrayal and fawning on foreign powers on the part of the landlord class in power, called for the change of existing laws and strengthening of the nation in order to avert the danger of annexation and annihilation, and for the first time clearly posed the two questions of national independence and the development of capitalism: all this was evidently in accord with the demands of China's historical development and beneficial to the inciting of patriotic zeal on the part of the masses. Precisely because they thrust themselves forward and dared to say: "By that time, we were afraid that it would be impossible for Your Majesty and the ministers even to beg for long-term peace by becoming plebeians," and they also warned suggestively about a possible repetition of "an unbearable past incident [like a former emperor committing suicide] at Meishan [in the Imperial Garden]," that the youthful Emperor Guangxu, who "rather wished to do something about the situation," was ultimately shaken. He was "unwilling to be the ruler to lose his country," made up his mind to support the reform measures recommended, and thereby forged a political reform movement from above. From the several dozen edicts on such reform measures promulgated during the "Hundred-day Reform," we can see that this was the blazing of a path for the development of the political, economic and cultural ideology of the bourgeoisie, and this was a vehement impact hurled against the feudal autocracy from its upper structure to its economic foundation. And precisely because of this, the 1898 Reform could not be tolerated by the feudal autocracy; it obviously did not belong to the realm of reformism which sought to maintain the old institutions. This point may also be verified in reverse by the fact that the feudal diehard forces headed by the empress dowager "would rather lose the country than agree to a change of the existing regime" and hence eventually put the reformers to death.

Although because of the suppleness on the part of the bourgeois reformers, they harbored vain hopes toward imperialism and the feudal forces in thinking that the adoption of the means of violent revolution was not necessary and they also remained distant from the vast ranks of the masses, so that the 1898 Reform ended in failure upon the shedding of blood by "The Six Gentlemen," yet, "the ancients never judged heroes on account of their successes or failures," hence we must not underestimate the character and role of the 1898 Reform merely on account of its eventual failure, just as we cannot, merely on account of the eventual failure of the Heavenly Kingdom of Peace, the Boxer Movement, and the 1911 Revolution underestimate their own brilliance. As regards this series of movements and revolutions in modern China, "even though their respective conditions differed from one another, they all aimed at resisting the external enemies or at a transformation of the existing situation,"[5] "not a single one of them was without the characteristic of a bourgeois democratic revolution,"[6] "and all of them demonstrated the stubborn spirit of resistance on the part of the Chinese people in never resigning to submission under imperialism and its running dogs."[7] Among the four persons cited by Comrade Mao Zedong as "advanced Chinese who sought truth from the Western countries through great and countless toils" in China's modern history, Hong Xiuquan, Kang Yuwei, Yen Fu and Sun Zhongshan, reform devotees made up two of them. Nor was it by accident that Kang and Yen were mentioned in the same breath with peasant revolutionary leader Hong Xiuquan and bourgeois revolutionary leader Sun Zhongshan; here Kang and Yen were taken as the representatives of the new-born forces in China at the end of the 19th century and leaders of the reform movement. They and the reform movement initiated by them were both honors conferred on China by that era, and their significance and roles can certainly not be overlooked.

The 1898 Reform took place at a middle point between the Heavenly Kingdom of Peace Revolution and the 1911 Revolution and was in the process precisely when the old type of revolution led by the peasantry was giving way to the new type of revolution led by the bourgeoisie; hence it played the role of an intermediate link connecting the past to the future. As a first practice undertaken by the Chinese bourgeoisie to change the country's social system, the 1898 Reform was a daring experiment on the part of the new, advanced class; since reform had failed, so revolution followed up: many reform devotees thus automatically adapted to this tide of the time and quickly woke up to embark upon the road of revolution. It can be said that, without the 1898 Reform at the time, there could not have been the 1911 Revolution which followed in its wake so quickly. Therefore, if we look at the whole history of China's revolutionary struggles in its semi-colonial and semi-feudal society, the 1898 Reform also belonged to the realm of the bourgeois old-democratic revolutionary movement; it was "a step of the ladder" in the advance of history.

Hence, we cannot, just because Kang, Liang, Yen and others still persisted in their royalist stand in a diehard manner, opposed revolution, and degenerated from reformers into royalists at the beginning of the 20th century when the democratic revolutionary ideological trend of the bourgeoisie surged and the great storm of revolution was already on the verge of breaking out, thereby take their attempt at social change in conformity to the tendency of historical development at the end of the 19th century--the 1898 Reform--also as a reformist movement without distinction. This would result in confusion of the right with the wrong, and would hardly accord with the historical-materialistic point of view.

PSYCHOLOGICAL NEEDS IN IDEOLGOICAL-POLITICAL WORK STRESSED

Beijing GUANGMING RIBAO in Chinese 22 Aug 80 p 2

[Article by Peng Haorong [1756 1170 2837], Shen Hongda [3088 1347 6671], and Li Shixian [2621 0013 7359] of the Economics Department of Liaoning University: "The Application of Social Psychology in Ideological-Political Work"]

[Text] Psychology is a subject in science. Man's psychology is a function of the brain, a reflection of the external world. Any man goes through a perceiving process, a feeling process, and a willing process; these are different aspects of the same sensual activity and also processes of the same high nervous activity. These psychological processes are intrinsic with every man but, at the same time, because of the difference in every man's biological characteristics, the difference in every man's working conditions and living conditions, and the difference in every man's status and the influence of his education, every man thus also has his own given psychological characteristics. Such psychological characteristics, like interest, ability, disposition and temperament, etc, also make up people's various characters. And people's psychological processes and characters in turn make up people's psychological conditions.

To achieve an overall understanding of the different aspects of the psychological characteristics of staff and workers and gradually master the laws of the psychological activities of staff and workers is an important content of our effort to make our ideological-political work scientific. Especially along with the development of modern science and technology and the vast reinforcement of mental labor, the perception and analysis of information and data related to the process of labor as well as mental activity in general on the part of staff and workers are made far more complex, particular demands are also thus made upon their creative ability and their ability to adopt swift adaptive measures under situations when conditions undergo urgent and drastic changes; this makes it necessary for us to study how to put man's social psychology and other conditions in harmony with the characteristics of modern scientific and technological systems. As a result, the study and application of social psychology are objective requirements for the correct treatment of production relations in enterprises on the one hand, and objective needs in the development of modern large-scale production on the other hand.

In our ideological-political work, we should carry out our ideological-political tasks more and more meticulously and more and more scientifically through investigation and study and analyses of the laws of movement of the psychological characteristics of staff and workers. In order to study the laws of movement of psychological characteristics, we must proceed from the general and the individual aspects by studying both man's psychological characteristics in a social group and the psychological characteristics of individual behavior. These two aspects are mutually related to, and yet different from, each other.

Examined on the basis of social group behavior, man's phychological characteristics are influenced by productive and non-productive factors. From the point of view of the productive factor, the technical level, management level and labor organization of an enterprise all have a fairly great influence upon man's psychological characteristics. Technical advancement and automation of the productive process not only help people rid themselves of heavy physical labor but also cause people to find pleasure in labor. Under many conditions, people's interest in work, preference for a profession, awareness of labor as a respected undertaking, confidence in a career, and satisfaction in the environment are often more important than material benefits. But the more advanced and complicated technology becomes, the heavier in proportion will mental labor also become; this is likely to make laborers' psychological burdens also increasingly heavy and the efficiency of labor likewise dependent on people's psychological conditions. Those staff and workers who work in environments of greater noises are always liable to have agitated emotions at work or at home. The tradition and atmosphere of a given enterprise have a great psychological influence on its staff and workers, especially new staff and workers. The political quality, capability and working style of leaders also have a great psychological influence on staff and workers. A person's psychological conditions are not only controlled by the whole society but are also controlled by a partial environment. Whether or not the form of labor organization, the membership composition of a labor group, and psychological characteristics of each member such as interests, needs, etc, are harmonious with one another always has a great influence on people's psychology. In the process of psychological communication, one person's emotions are often transmitted to another, thus leading to a positive or negative impact upon the collective. Hence, when we organize a collective or a labor group, we must consider a quota of manageability and select an optimum scale. For example, interests and benefits between members are best harmonized when productive workers are maintained at about 15 each group, and technical personnel, at about 10 each group.

From the point of view of the non-productive factor, living conditions, family environment, residential environment, conditions of commercial service and transportation service, etc, always have an impact on the psychological conditions of staff and workers that cannot be overlooked.

From the examination of individual behavior, people of different sexes, different ages, different degrees of education, and different social status are also different in their interests, needs, and preferences of benefits; their likings, habits, memories, imaginations, capabilities and qualities, too, are different; and hence their psychological characteristics likewise differ. These individual psychological characteristics are often also controlled by social factors. For instance, when a person is not given any attention, his self-respect suffers, he loses confidence in his own ability as a result, then he will lack initiative, rich imagination and sensitive judgment at work; but if a person is over-confident about himself, he will not be recognized by society and the collective, and contradictions and conflicts will also result; he is also liable to feel pressure in spirit.

Whether examined on the basis of social group behavior or on the basis of individual behavior, there is a common law about man's psychological conditions, and that is that man's behavior is always governed by motives, and motives are in turn determined by needs and interests.

In our country, psychological needs of staff and workers at the present stage may be classified as follows:

(1) Labor needs

They include:

Employment needs. Their general demand is employment; their higher demands have to do with choice of professions and kinds of work.

Safety needs. Their general demands are absence of injuries in the labor environment and short distance; their higher demand is relatively lower labor intensity.

Technical needs. Their general demand is a labor that is more complex and interesting; their higher demands are mental labor or one specialty plus versatility.

(2) Material needs.

They include:

Basic livelihood needs. Their minimum demand is a guarantee of clothing, food, residence and transport; their higher demands have to do with unit housing, furniture, clothing of superior quality, etc.

The need for durable products in material life. It's general demand aims at wrist watch, sewing machine, bicycle, etc; its higher demand has to do with sets of furniture, refrigerator, etc.

(3) Cultural needs.

They include:

The need to study. Its general demand aims, for example, at obtaining a middle cultural and technical education; its higher demand has to do with, for example, going to college, becoming a graduate student.

The need in cultural life. Its general demand aims, for example, at literary, artistic and athletic enjoyment and performances; its higher demand has to do, for example, with outlets for specialties in literature, athletics, and art, and creative products thereof.

Apart from the foregoing, there is also the need for travel and sightseeing.

(4) Social Needs.

They include:

The need in collective relationship and political advancement. Its general demand aims at harmony in comradely relations and relations between superior and subordinate levels; its higher demand has to do with entry into the Communist Youth Corps, entry into the Communist Party, status as core cadre in business and politics, etc.

The need in the development of talents. Its general demand aims at satisfactory performance at work and outstanding work; its higher demand has to do with inventions and creations.

The need for respect and honor. Its general demand aims at attention given by leaders and respect paid by comrades; its higher demand has to ldo with status as advanced worker, labor model, or scholar, expert.

People's psychological needs usually develop from a lower level gradually toward higher levels. After needs at the lower level are satisfied, needs at a higher level are likely to emerge. The task of ideological-political work is to master the structure and laws of change of the psychological needs of staff and workers, unite the satisfaction of the legitimate needs of staff and workers with the goals of existing enterprises, and guide staff and workers on the correct treatment of contradictions and gaps between needs and realities.

Of course, man's psychological state is not entirely determined by material benefits. Spiritual factors such as socialist consciousness, career ambitions, sense of responsibility as master of the house, patriotism and revolutionary heroism are all important causes determining man's psychological state. To study the structure and laws of change of the psychological needs of staff and workers is meant precisely to unite labor, livelihood, cultural and social needs organically with spiritual factors, and to give better scope to the inner momentum of laborers in order to serve the accelerated realization of the four modernizations.

[This article is a passage from a chapter of teaching material on "Management of Industrial Enterprises" written by Comrades Peng Haorong, Shan Hongda, and Li Shixian. The chapter title is: "Ideological-Political Work in Industrial Enterprises," as transcribed from JINGJI GUANLI [ECONOMIC MANAGEMENT], Supplement (4).]

LETTERS TO EDITOR COMPLAIN OF POOR AIRLINE SERVICE

Unreliable Scheduling

Beijing RENMIN RIBAO in Chinese 17 Aug 80 p 3

[Letter to the Editor from Xi Wang [1598 2598]: "Some Opinions of Chinese and Foreign Tourists on Our Country's Civil Aviation"]

[Text] In the past few years, in connection with my work, I have had a great deal of contact with our country's civil aviation and with its airports in various areas. At present the whole country is very much involved with the four modernizations, and there have been striking advances in all fields, but with regard to the Chinese civil aviation system, not only have I been unable to discover any progress, but I really feel that it is completely backward.

One problem is lies. At Kunming airport last November, the flight for Guangzhou was supposed to take off at 9:30, but there was still no sign of it taking off at 11. Upon inquiry it was said that the plane had a malfunction that had just been eliminated. Instead, through observation and the revelations of concerned personnel, it was determined the real reason was that some pressed duck that was to be loaded aboard the plane arrived late, and because of this the takeoff was delayed. On planes traveling civil aviation's domestic routes, food and drink was generally not provided (there are individual routes that are exceptions to this, but very few), and civil aviation personnel do not take into account that passengers flying at noon do not get any lunch, nor do they take into account that if foreign guests arrive late in Guangzhou, they not only miss their lunch but they also have to compensate the restaurant in Guangzhou for its loss in preparing lunch for them.

In June of this year, I flew from Chengdu to Kunming. Before I went to the airport, airport personnel called on the telephone to urge all passengers to arrive at the airport early, saying that the airplane would take off ahead of schedule. After arriving at the airport I was again informed that the airplane had not yet left Chongqing because it had developed a malfunction that was now being repaired, and that no one knew when it might arrive in

Chengdu. After an hour I asked again, and the story was changed, saying that the airplane would not be able to land because of bad weather in Chengdu. After another hour, it was said that there was rain and lightning in Kunming. With all these changes in reasons, the airplane still did not fly. May we ask which of the answers was the true one? Only they know.

A second problem is poor service. Poor service on Chinese civil airlines has long been well known throughout the world. For example, flights on many lines are en route at lunchtime or dinnertime, but no food is provided on the airplane (with some individual exceptions). This [practice] is seldom seen internationally. The civil airlines of many countries include food for the passengers, and some even include lodging if a flight is overdue or can't depart on time. Chinese civil air is different; whoever wants to ride on a Chinese civil airline plane must risk starvation and having to sleep on the street. Once, while waiting in Chengdu for a flight to Kunming, I waited from noon until evening, and then it was suddenly announced that the flight was canceled. Throughout the whole afternoon, a number of Chinese and foreign passengers stayed in the hot waiting room without anyone inquiring about them; they wanted something to drink but were not able to find anything. One foreign visitor said: "The Chinese civil airline has the worst service of any airline in the world. I've never seen anything like it." He cited a number of examples of how air passengers were treated in a number of countries more backward than China. He said: "When an airplane is unable to take off because of weather or some other unavoidable reason, some civil airlines first explain politely to the passengers, then make arrangements for their food and lodging; in order not to make the passengers agitated and bored, time permitting, they also organize tours of the city so that the passengers can see places of historical interest or scenic beauty. However, what we have encountered in China is an unfeeling, cold reception that has completely destroyed the good impressions of our travel in China for a few days...."

A third problem is arbitrary changes. If they want to fly, they fly; if they want to stop, they stop. On 24 June of this year, the flight from Chengdu to Kunming was suddenly canceled, forcing a foreign tour group to change to rail accommodations. When that group arrived in Kunming, they had only half a day for sightseeing before they received a sudden call from the airport; their flight would be leaving ahead of schedule. The result was that the tour group had to abandon its prearranged schedule and leave hurriedly for Guangzhou.

Last year a French tour group was to travel from Kunming to Guangzhou. It was suddenly decided that their plane would leave ahead of schedule, but the Civil Airline Bureau did not notify the passengers, so the tour group missed the plane. That flight unexpectedly flapped its wings and took off without over 20 foreign passengers.

In addition, we frequently encounter cases of arbitrarily not flying. The reasons are manifold: If it is not because the flight crew wants to rest, it is because the attendants want to eat. To fly or not to fly because of "weather" has become a "conventional weapon" of our civil airline. It is truly a case of "even though the sky is clear, it is also 'angry'" and we can take pen in hand and appeal against what we know of heaven.

Our country's civil airline is "only this one, and no other" civil air department in the country. Under the circumstances, they should make every effort to raise the quality of service and flying technology to make the passengers feel that having "no other" can be convenient, safe, pleasant to travel. Instead, the impression given to passengers by the Chinese civil airline is entirely opposite. Today, in this decade of the 1980's of the 20th century, if the Chinese civil airline's method of operation is not changed, not only will it damage our international prestige but it will obstruct our implementation of the four modernizations.

Please, all levels of leading comrades in the civil aviation bureau, conscientiously take charge of your work!

Discourteous Attendants

Beijing RENMIN RIBAO in Chinese 17 Aug 80 p 3

[Leter to the Editor by Wang Xintang [3769 2450 1016] of Shenyang: "The Quality of Service of Our Country's Civil Aviation, as Reflected From Our Experience on a Trip"]

[Text] On 8 May, I went from Beijing to Japan with the Liaoning Province economic and trade delegation. On 28 [May] I returned from Japan aboard Chinese Civil Airlines flight 926. I was very happy to have the opportunity to fly on a big 747 airplane. However, the quality of service was not such that I would dare recommend it.

1. The proper courtesy was lacking. Almost 400 travelers boarded this flight, most of them foreign friends. In a trip of almost 4 hours, whether the service personnel were bringing water, serving food, or selling liquor and cigarettes, we never heard courteous phrases such as "please," "thank you," "excuse me," etc. The service personnel treated foreign travelers with humor, but they were solemn toward their Chinese compatriots. On the trip home, an unhappy event occurred: One of the female service personnel was pushing a cart of drinks when she knocked over a bottle of mineral water and it spilled onto the food tray of Comrade Wang Enhui [3769 1869 1920], vice chairman of the provincial economic committee and a member of the delegation. When the mineral water and the contents of the glass on his tray spilled on the jacket and trousers of this old comrade, the stewardess just looked at him coldly, as though she didn't care in the least. Having witnessed this, I stared at her firmly, and only then did she take a small towel and throw it (not hand it) to Comrade Wang Enhui, then turned her cart

around and left without a word. Foreign travelers nearby were shocked and could make no sense of what had happened. Again and again I suppressed my "Shangdong shillelagh" temper, and said not a word. Comrade Wang Enhui only sighed lightly. Later, I wanted to give her a piece of my mind, but she was not wearing a name badge or service number, and there was no book on the plane for writing comments.

2. The quality of the food served is too poor. There were different kinds of food, but they didn't make any distinction between Chinese and foreigners, but simply brought the food and dropped it on the table plip-plop without asking anyone's preferences. The knife marks on the sausage and tomato slices had already changed color (perhaps because they had been allowed to sit too long after having been sliced); fried foods could be neither cut with a knife nor pierced with a fork; the iced orange juice was weak because the ice had been in it too long. Some foreign travelers took a few mouthfuls of food, and after saying, "Tsk, tsk," put down their knives and forks. Some Chinese compatriots whispered: Chinese food is renowned throughout the world, and food served to passengers on airplanes is paid for in foreign currency, so why can't it be a little better?!

3. It took too long to deliver the baggage. When the flight arrived at Beijing airport, it was already past 10 at night. Several hundred Chinese and foreign passengers were pressed together into the customs waiting room. By this time, people meeting friends had their faces pressed up against the big glass window of the customs room, waving to show how eager they were to see their friends who were waiting to pick up baggage and have it inspected. But the time passed minute by minute, the baggage handlers gathered around their carts, and the first piece of luggage was not seen until an hour and 15 minutes later. After we had been greeted by a Japanese friend who had come to the airfield to meet us, he said with a sigh, "At last! I've been waiting 75 minutes!"

4. They were not properly careful with the passengers' luggage. One of the comrades in the delegation brought a television set home on the plane. He added a great deal of packing inside the carton. When he shipped it at the Tokyo airport, the Japanese baggage handlers took special care to paste a "fragile" sticker on it and very carefully put it on the conveyor for fragile goods. One of the Japanese baggage handlers said with concern: "Can you be sure that your television set will be all right when it arrives at Beijing airport? We have seen for ourselves that Chinese Civil Airlines breaks things." Just as expected, when this television set was picked up at Beijing airport, there was a big hole in the carton, most of the straps binding it had been broken, and the cabinet of the television set was broken. This sort of thing happens at Shenyang airport as well. Last fall I returned from Beijing to Shenyang, and when I picked up my luggage at the airport, I discovered one of the service personnel dragging a passenger's new leather suitcase along the ground, and the leather surface and zipper of the suitcase had been scraped to bits. My own artificial leather bag had also had its zipper damaged because it had been dragged.

MILITARY BIOGRAPHIC INFORMATION, UNIT CODE DESIGNATORS

[The following biographic information on selected military personnel and PLA military code designators were extracted from Chinese-language newspapers as indicated]

Bian Suobao [0593 6956 1405]

Commander of a certain regiment of the Zhejiang Military District. (Hangzhou ZHEJIANG RIBAO 30 Jul 80 p 1)

Fang Ziji [2455 1311 1323]

Deputy director of the pharmacy of Hospital 401 belonging to the North China Sea Fleet. (Jinan DAZHONG RIBAO 12 Aug 80 p 3)

Guo Huaruo [6751 0553 5387]

Deputy Commandant, PLA Academy of Military Science; from 16 to 24 June 1980, he attended the organizational meeting of a new Society for Studying World War II held in Kunming and was elected as one of the honorary presidents of this new society. (Beijing GUANGMING RIBAO 31 Jul 80 p 3)

Guo Xingfu [6753 5281 4395]

Appointed deputy director of the teaching and research section for tactics of the Nanjing Units' Infantry School. (Hangzhou ZHEJIANG RIBAO 31 Aug 80 p 3)

Huang Helin [7806 7729 2651]

Party committee secretary and political commissar of a certain corps of engineer regiment of the Jinan Units. (Jinan DAZHONG RIBAO 1 Sep 80 p 3)

Huang Quanwu [7806 3123 2976]

Party committee member and deputy commander of a certain regiment of the Shanghai Garrison District. (Shanghai WEN HUI BAO 16 Jul 80 p 1)

Jiang Guangmin [5592 0342 2494]

Party committee deputy secretary and commander of a certain division of the Shanghai Garrison Command. (Shanghai WEN HUI BAO 16 Jul 80 p 1)

Li Xiufang [7812 4423 5364]

Deputy director of the training department of the military medical school of the Lanzhou Units. (Beijing GUANGMING RIBAO 29 Jul 80 p 2)

Li Zhiqing [2621 1807 3237]

Political officer of the 2d Company of a certain unit stationed in Tianjin. (Tianjin TIANJIN RIBAO 1 Aug 80 p 2)

Liu Chongfu [0491 1504 1381]

Commander of a certain air force regiment stationed in Shanghai. (Shanghai WEN HUI BAO 16 Jul 80 p 1)

Lu Xiuge [7120 4423 7041]

Party committee secretary and political commissar of a certain unit of the Beijing Garrison Command. (Beijing BEIJING RIBAO 17 Aug 80 p 1)

Luo Fengsheng [5012 7685 3932]

Political commissar of a certain air force regiment stationed in Shanghai. (Shanghai WEN HUI BAO 16 Jul 80 p 1)

Xu Xuewu [1776 1331 2976]

Chief of staff of a certain corps of engineer regiment of the Jinan Units. (Jinan DAZHONG RIBAO 1 Sep 80 p 3)

Yang Guoxiang [2799 0948 4382]

Deputy divisional commander of a certain air force unit. (Beijing MINZU TUANJIE No 8, 1980 p 37)

Zhang Shuwei [1728 2885 6182]

Party committee member and deputy political commissar of a certain corps of engineer regiment of the Jinan Units. (Jinan DAZHONG RIBAO 1 Sep 80 p 3)

Zhou Xun [6650 6598]

Political commissar of the Fuzhou Garrison Units. (Beijing GONGREN RIBAO 1 Aug 80 p 1)

Unit 34143

The 6th Squad of this unit was mentioned. (Beijing GONGREN RIBAO 25 Jul 80 p 3)

Unit 37091

A photograph shows this unit's vessels in training. (Beijing ZHONGGUO QINGNIAN BAO 31 Jul 80 p 1)

Unit 38600

This unit was identified. (Tianjin TIANJIN RIBAO 28 Jul 80 p 1)

Unit 39394

This unit was identified. (Beijing GONGREN RIBAO 17 Jul 80 p 4)

Unit 51191

This unit was identified. (Tianjin TIANJIN RIBAO 28 Jul 80 p 1)

Unit 52837

The political department of this unit was identified. (Beijing GUANGMING RIBAO 7 Sep 80 p 2)

Unit 52853

This unit was identified. (Tianjin TIANJIN RIBAO 28 Jul 80 p 1)

Unit 52940

This unit was identified. (Beijing GONGREN RIBAO 15 Aug 80 p 2)

Unit 80411

A maintenance company of this unit was identified. (Hefei ANHUI HUA BAO No 3, 1980 p 29)

Unit 83303

This unit is stationed in Xuhui Ward, Shanghai. (Shanghai WEN HUI BAO 31 Jul 80 p 1)

Unit 86621

This unit was identified. (Tianjin TIANJIN RIBAO 28 Jul 80 p 1)

Unit 89304

The 1st Company of this unit was identified. (Beijing GONGREN RIBAO 15 Jul 80 p 3)

Hospital 157

This hospital belongs to the Guangzhou Units. (Guangzhou NANFANG RIBAO 20 Aug 80 p 2)

Hospital 211

This hospital belongs to the Shenyang Units. (Beijing GUANGMING RIBAO 1 Aug 80 p 1)

Hospital 303

This hospital belongs to the Guangzhou Units. (Guangzhou NANFANG RIBAO 25 Aug 80 p 2)

Field Hospital 505

This hospital belongs to the Guangzhou Units. (Guangzhou NANFANG RIBAO 25 Aug 80 p 2)

SOCIOLOGICAL, EDUCATION AND CULTURE

EFFORTS TO PROMOTE ONE-CHILD FAMILIES MUST BE REALISTIC

Beijing RENMIN RIBAO in Chinese 11 Aug 80 p 5

[Article by Wang Xingquan [3769 5206 3172]: "Adopt Positive Measures To Promote One Child Per Couple"]

[Text] The promotion of a one-child family is currently the most effective measure to control population growth. The question now is how to perfect this task. This involves the adoption of a series of practical and effective measures.

Basically, the promotion of a one-child family is in accordance with the interests of all the people and reflection of popular desire. Hence, once the goal was declared, it has been supported by the overwhelming majority of the masses. The task has been executed with significant results in quite a few areas, especially in the city. However, we should also say that we have just begun the task. Development is uneven. In the remote countryside, it meets with many barriers and difficulties and has less result. Although some of the causes are related to old values, there are various technical problems as well. Many people do not realize the necessity of a one-child family, and various technical problems make them feel even more suspicious. If we do not apply measures systematically and gradually iron out the technical problems in promoting a one-child family, our administrative measures per se are unlikely to produce results.

For example, the value of "reproduction for security in old age" is a feudalistic value which has persisted for thousands of years. In the past, criticisms were leveled at such a feudalistic value in quite a few areas, but little attention was paid to the practical problems arising from old age or to measures for dealing with them. We must know that there are profound economic reasons behind the value of "reproduction for security in old age," a value prevalent in the feudal period and ingrained and perpetuated in the minds of the people. In the course of 70 years after the collapse of the monarchy and 30 years after liberation, it has exerted an important influence on the people. The feudal economy was a subsistence economy in which each household was a production unit as well as a social unit. Under such economic conditions, owing to the low level of productivity, the labor force was generated and maintained only within the family. When the labor force diminished owing to senility, there was nothing to rely upon except one's offsprings. The value of "reproduction for security in old age" is the product of a subsistence economy. Accordingly, it is not sufficient to change such a value merely by educational campaigns. We can eradicate the value only by striking at its roots. Since the founding of the republic, our national economy has witnessed a great deal of development, and the overwhelming majority of peasants have been organized. However, our present level of productivity is still very low. Manual labor is still the norm in the countryside, and individual households are still discrete social units. Part of the productive functions are still carried out within the family, and old folks still have to rely on the young for security. The question of caring for the elderly becomes acute when a young couple gets married and produces only one child. Therefore, in addition to promoting a one-child family, efforts must be made to resolve the problems of old age. To resolve these problems, the fundamental step is to increase production and wealth. If the economy is not developed, we will not be able to eradicate such feudalistic ideas as "reproduction for security in old age" and "male chauvinism," let alone have the material preconditions for providing for the welfare of old people. Among some of the collective enterprises in the city and the countryside, steps should be taken to institute a retirement plan based on the pace of economic growth, so that old people can gradually rely on their pensions for a living. In addition, measures should be taken to introduce various social welfare plans in accordance with individual conditions and cases. Some of the elderly institutions and centers for handicapped old people managed by specialists in the countryside have produced relatively good results. In the city, retirement homes have gradually been planned in places with better conditions, and this has been quite welcomed. On the basis of thorough investigation and discussions, we should devise an insurance policy which is suitable to our national conditions and carry the plan out on a nationwide basis.

The promotion of a one-child family raises the standards of childcare, health, and education. Every parent hopes to see his son grow up in good health. Parents can pay more attention to their children in a one-child family system. The belief that the only child in a family is necessarily spoiled is not an objective viewpoint. However, we should recognize the possible problem of the child in a one-child family being spoiled because of his special position. We should adopt various measures to perfect our work in pregnancy, birth, childcare, hygiene, and education. At present, these problems have caught the attention of related units, and much work has been done. Many hospitals have strengthened their work in examining pregnant women and educating them. All county- and city-level grassroots units in Sichuan Province have organized cadres and medical workers to make regular visits to one-child families and resolve related problems. In Chongwen District in Beijing Municipality, one-child families are required to take regular health examinations, and various units have offered their help in various ways. Xicheng District of Beijing Municipality encouraged more than 70 institutions and enterprises to organize kindergartens and childcare centers and, under permissible conditions, to accept children from workers who do not belong to their units. In general, however, similar work has not been widespread and systematic. At present, our schools do not have lessons on health education, and not enough work has been done to educate adolescents in physical health and family planning. During the 10 years of turmoil, training of teachers in childcare was greatly curtailed. Not enough attention has been paid to child disease, child psychology, child education, and related areas. Various things like these, when viewed in isolation, do not seem to be related to the work of promoting one-child f families. But the fact is that the consummation of these tasks will greatly aid the promotion of a one-child family.

The promotion will come across many other problems, such as issues related to self-retained land, the distribution of economic crops among commune members, and the assignment of housing to urban workers. Past methods encouraged not small families but large families. Also, since manual work is the norm in the countryside, and a grown person means an addition to the labor force, large families tend to become richer, and this will affect the promotion of a one-child family. The present policy of rewarding one-child families, aside from public enterprises, raises the problem of the source of funds among urban collectives and rural communes. In addition, there are many problems regarding the manufacture and distribution of contraceptives and sterilization methods. Many of these problems require a great deal of effort to identify and resolve.

We emphasize the fact that the adoption of a one-child family requires effective measures, but we do not mean that ideological work should not be strengthened. Perfecting educational work is also an effective measure. However, our propaganda should be not simplified but rather diversified. We must employ various forms and tools of propaganda to make known our work to all families and people, and to make our propaganda work lively enough to produce results.

Obviously, all the problems mentioned above cannot be handled only by the family planning departments or specialists. Our family planning work has produced many good results over the past few years, thanks to the hard work of our family planning departments and their contributions--though these results would not have been produced without the help of related departments. In order to perfect our work of realizing a one-child family, our family planning workers should seriously carry out their work, while related departments should also play their part in ensuring success.

INTEGRATION OF SCIENCE, ENGINEERING, ARTS URGED

Beijing GUANGMING RIBAO in Chinese 15 Jul 90 p 2

[Article by Cai Keyong [5591 0344 0516] of the Higher Education Research Section of Central China College of Engineering: "A Tentative Discourse on the Integration of Science, Engineering and Arts Subjects in Colleges and Universities"]

[Text] At present, higher education in our country faces this extraordinary problem: engineering, science, and arts go their separate ways. This problem contradicts the nature and demands of the development of science and technology in modern times and creates obstacles for the training of highly competent scientists and technicians and for the development or research that requires integration and cuts across all scientific disciplines.

The Trend of Higher Education in the World Is Toward Integration of Science, Engineering and Arts

If we read the history of the development of higher education in the world, we will find that all the well-known universities in the developed countries are integrated universities, and that they have developed from diversification to integration. The history of human civilization shows that England was the first country to have universities. Oxford University was founded in the 12th century. Cambridge University was founded in the 13th century. At that time, the natural sciences had not been established as separate branches of learning and were inseparable from philosophy. Reflecting the scientific development of those days, the universities were not divided into different colleges or departments. With the development of production, the natural sciences broke away from philosophy as separate subjects of study after the 15th century. Thus science began to move into various fields of specialization, with each branch taking on one subject in the study of nature. By the early 19th century, the natural sciences had reached a high level of diversification. Dynamics, astronomy, physics, chemistry, biology and geology began to be established as different fields of pursuit. To reflect the development of science and technology of this period, many new universities in various countries set up different departments for different studies. Many of these newly established universities leaned heavily on the technological side (such as industrial technology, agricultural technology, and medical science).

All-Round Development of Science and Technology Demands Integration of Science, Engineering and Arts

Since the 1930's, and especially since the Second World War, the trend in the development of science and technology has been unmistakably toward integration. Science has stopped branching off into ever-multiplying areas of special study and, instead, has begun to settle into a coherent system. All branches of science have become part and parcel of this coherent system. This is what we call the trend toward integration. The integration of modern science has taken place not only among marginal areas of study but also among the various branches of natural and social sciences, as well as among natural sciences, technological sciences, engineering technology, social science, and philosophy. In other words, the development of marginal sciences has already gone through two stages. In the first stage, marginal sciences developed as a result of the integration of all branches of natural science, all branches of techological sciences, and all branches of engineering science, as well as the integration of natural science with technological and engineering sciences. In the second stage, they have developed as a result of the integration of natural, technological and engineering sciences with social sciences. For instance, management sciences and systems engineering are marginal sciences that developed during the second stage.

The trend of the development of science and technology toward integration has made the study of one specialized field, though pursued with excellent results for a long time in the past, unsuitable for our modern times. Many of the major scienctific, technological, and social issues of today have such wide implications that the study of solutions to these issues requires the coordination of all branches of science and technology.

In the 19th century, scientific research was basically the effort of individual scientists. In the early part of the 20th century, research was conducted in small laboratories under the supervision of professors. For example, Pierre and Marie Curie were a husband-and-wife research team. Even Ernest Rutherford had fewer than 100 researchers working under him. After the Second World War, research efforts took on a new dimension. Cooperation among the different branches of science was expanding for more ambitious projects. Cybernetics became a new field of study in the late 1940's--a study that was to have far-reaching impact. It was started by Norbert Wiener, a mathematiciam and philosopher, and Rosenthal, a biologist. The basic concept of cybernetics emerged from the monthly dinner meetings of mathematicians, physicists, electronic experts, engineers, medical scholars, psychologists, and philosophers at Harvard University during the war. The birth of cybernetics marked the first spectacular success of the coordination among science, engineering, and liberal arts in the history of scientific and technological development. It ushered in a new epoch of scientific and technological development. James Chadwick discovered the neutron in 1932. In 1934, Enrico Fermi began his experiments with neutrons and uranium nuclei, and faced problems which he as a physicist could not understand. This was because he was unfamiliar with analytical chemistry and failed to grasp the basics. He continued on the wrong track for 5 more years. Finally, in 1939, chemists Otto Hahn and Fritz Strassman resolved the riddle for him with the discovery of the fission of uranium-235 when it is bombarded by neutrons. A scientist told Fermi of this discovery. This led to his success in 1942 in creating the first self-sustaining chain reaction in uranium. The moral of this story is that the lack of coordination among the branches of science in their research efforts slowed the development of science and technology.

The trend of the development of science and technology toward integration places two demands on higher education: First, the better equipped the departments of a university are and the more able they are to conduct coordinated research, the greater the achievements will be expected of a university. Second, a university must try to develop in its students the ability to reach beyond their area of specialization and to engage in coordinated research. In other words, it must train its students thoroughly in basic scientific theory, and at the same time give them the widest possible exposure to all branches of science. To meet these demands, many noted universities in developed countries have, since the 1930's and especially since World War II, expanded into all-round institutions integrating science and engineering with liberal arts, even though they may have different emphases in their instruction.

Reforming the Structure of Higher Education, and Training a Large Number of Scientists and Technicians

If we are to realize, more or less, the four modernizations by the end of this century, we must plan to gradually transform a number of our major universities into integrated institutions with different emphases where science, engineering and humanities are inseparable and where instruction and research go hand in hand. This concept is not "one of those capitalist fantasies" or a "pipedream." It is perfectly in keeping with objective law.

Marx saw both the possibility and the necessity of all-round human development, based on his analysis of the nature of the forces of production in an industrial mass production situation. Engels reconfirmed Marx' observation from the viewpoint that nature is an indivisible entity, and that nature is dialectically interlocked with human society.

One school of opinion once held that Marx' and Engels' definition of all-round development is that man must be capable of both manual and mental labor. That opinion is only partially correct. While Marx and Engels did mean that, what they really wanted to say was that man must develop his intellect toward all-roundness.

In ancient Greece, a shoemaker once made a critical remark on the work of the then celebrated painter Appelles. Since the shoemaker knew nothing about art, his criticism was totally irrelevant. So Appelles said to him: "Shoemaker, you'd better mind your own business." Marx hailed Appelles' reply as embodying the "gem" of wisdom in a handicraft society. As industrial mass production has taken over since the 19th century, we would be "terribly foolish" ("Das Kapital," Vol 1, P 535) to continue to think that a man in one profession would know nothing about another profession.

Analyzing the indivisibility of matter in our world, Engels commented: "The nature which we face is an indivisible whole. It is the sum of all things in it." ("Collected Works of Marx and Engels," Vo 20, P 409) As nature is an indivisible whole, me must look at it as a whole as our knowledge of nature improves and as all branches of our science, which are devoted to the study of only one part or one side of nature, retouch one another at the other end. The trend of scientific and technological development toward integration makes the development of human intellect toward all-roundedness possible and necessary. Socialist and communist societies need well-rounded people. Engels put it well when he said: "If industry is to be run by the entire society in a publiclyowned and well-planned manner, there will be need for versatile people, people who are familiar with the entire production system." ("Collected Works of Marx and Engels," Vol 4, p 370) In this context, socialist higher education must make it its business to train "people who are familiar with the entire production system" and "versatile people." Obviously, the development of one's intellect toward well-roundedness is not meant merely to help one find employment. It is meant to meet the objective needs of the development of science, technology, and large-scale industrial production.

Our noted scientist Qian Xuesen [6929 1331 2773] believes that if one is to recognize and resolve many of the major problems of the technological and engineering sciences, one must be familiar with the theory and methodology of natural sciences, mathematics, and social sciences. For example, the newly emerged branch of science called ecology deals with both natural and social factors. With bioecology and geochemistry as its basic components, it incorporates chemistry, biology, physics, geology, medicine, engineering, mathematics, and economics both in its scope and in its methology. Similar multicomponent sciences include space science, oceanography, energy science and material science.

One should point out that modern science and technology have developed by leaps and bounds since the 1950's. While all the developed countries were reforming their higher education to suite the new shape of things, we copied the Russian model of the 1940's in separating humanities from sciences and in setting industry, agriculture, and medicine apart. We set up a mammoth Academy of Sciences system to separate the functions of education and scientific research. It is true that in those days we had no choice but to follow in the Russian footsteps. Later on, the Russians themselves found it necessary to make certain adjustments in their unreasonable structure of higher education. Due to the interference and sabotage of Lin Biao and the "gang of four," we did very little to reform the colleges and departments of our universities for two decades. If there were changes in the structure of our higher education in those two decades, the changes were insignificant. The urgent task facing us today is to make the best use of our limited manpower, material resources, and funds to turn a small number of well-endowed universities into institutions of different emphases integrating science and engineering with liberal arts in order to train an elite corps of scientists as far as university conditions permit. Our government should provide funds for these universities so that they can do the best they can as quickly as they can to combine instruction with scientific research, set up research institutions of their own, and open graduate schools in order to enroll graduate students and turn out scholars with doctors' and masters' degrees who are up to international academic standards. This does not mean that all universities should devote themselves to as many areas of study as possible, but rather,that they should set up a number of new departments insofar as their resources permit, and that they should reorganize their existing departments in order to become integrated universities with different emphases. Naturally, we cannot have too many of this type of university at present. We can gradually increase their number along with the development of science and technology.

The program to achieve the four modernizations not only demands a large number of outstanding people who are well trained in basic theory, widely exposed to all branches of science, and capable of integrated research and research that reaches beyond the boundary of any single branch of science--people who will head our scientific and technological departments--but also demands a larger number of designers, craftsmen, management personnel, and technicians with various specializations. In fact, we need far more of the latter than the former. Unless we have a gigantic scientific and technological army, complete with all branches of service and all necessary equipment, we will be talking nonsense when we say we can achieve the four modernizations and surpass the world's advanced standards of scientific and technological competence. Therefore, it is necessary for us to set up, in addition to major integrated universities, a large number of various types of 4-year and 2-year technical colleges, teachers' colleges, and professional colleges that are devoted either to one or to several areas of study, as well as part-time schools and correspondence schools, so that we can mass-produce designers, craftsmen, teachers, management personnel, and technicians of different specializations. Furthermore, we must make plans to develop colleges and institutions devoted to the study of liberal arts so that we can have a large number of liberal arts scholars as well. With such added expertise in our population, we can expect a change in the makeup of our cadre corps.

SOCIOLOGICAL, EDUCATION AND CULTURE

SHANGHAI PROMOTES SPARE-TIME EDUCATION

Beijing GUANGMING RIBAO in Chinese 2 Jul 80 p 2

[Article by Yang Deguang [2799 1795 1684] and Hu Ruiwen [5170 3843 2429] of the Shanghai Municipal Bureau of Higher Education: "The Broad Prospects of Broadening the Avenues of Education as Seen From the Opening of Four Evening Schools"]

[Text] To meet the educational needs of the broad masses, many units in Shanghai Municipality have offered spare-time educational programs as a means of creating better educational opportunities for the public, with good results. In this article we would like to tell the story of four locally run evening schools, representing three different types of operation that bear testimony to the promise and vitality of sparetime education.

One type is the evening schools run by universities. For example, Shanghai College of Finance and Economics started an evening program last fall, offering 3-year courses in industrial accounting, commercial accounting, statistics, finance, and banking. The first year the program admitted 470 credit students and 100 noncredit students out of 2,000 initial applicants. The second year it enrolled 450 students out of 3,000 applicants. It uses the classrooms of the Luxun Middle School and Sichuan North Road Primary School. The faculty consists of six full-time administrators and part-time teachers. Students pay a tuition of 20 yuan for each semester. Similarly, the Shanghai College of Foreign Languages uses the classrooms of the Huaizhong Middle School for its parttime evening program in English. It enrolls 360 students, divided into nine classes. The students range in age from over 20 to over 50. They come from the ranks of industry and communications, finance and trade, scientific research, culture and education, and public health. The program relies on original English-language publications as texts and audiovisual teaching aids to try to develop speaking and conversational ability in the students. Its faculty consists of two full-time administrators and some part-time teachers.

The second type is the schools sponsored by businesses. For example, the Huangpu No 1 and Huangpu No 2 Food and Beverage Company, Tobacco and Sugar Company, and Service Company contracted the Huangpu Middle School to run an evening school at the intermediate level for them. This project started in the second half of 1979 and enrolled 1,200 employees divided into 27 classes. The curriculum consists of mathematics, reading, and foreign languages. The tuition each semester is 8 yuan per student. There is no full-time faculty. Each of the four sponsoring companies sends a representative to check on their employee-students' attendance and progress. The teaching staff and the facilities are all provided by the Huangpu Middle School.

The third type is the spare-time vocational schools run by street blocks. For example, Fengcheng Street established a spare-time middle school in 1978. The faculty consists of three old highschool graduates who have retired due to poor health. They serve both as school administrators and as teachers. They also bring in 20 other schoolteachers and factory technicians to teach part-time. The curriculum consists of mechanical draftsmanship, machine handling, electronic technology, basic electrical engineering, television design, repair and maintenance, reading, writing, mathematics, English, Japanese, accounting, and dress design and tailoring. They have a separate class for each subject, to be completed in 6 months or 1 year. They have graduated some 1,000 students in the past 2 years. At present they have 654 students divided into 14 classes. These students are mostly residents on the same street. Some have full-time jobs, while others are youngsters waiting to be placed in jobs. The school is located at the Benchi Middle School and charges a tuition of 5 or 6 yuan per student per semester.

The above-mentioned three types of schools are born out of the needs of the public as well as the units concerned. They are good in many ways. They are economical to run and require small staffs. They make do with what they can get. With part-time teachers and a small number of administrators, each of these evening schools can educate several hundred to a thousand people at a time. They are also practical in the sense that they tailor their curriculum to local needs. Students who have jobs can readily apply to their work what they learn in the evening. Young people waiting to be placed can also learn vocational and professional skills which will help them find jobs.

The rise of the three types of schools described above shows our universities and middle schools the way to creating more educational opportunities through offering spare-time programs. Our municipality has a total work force of 4 million. Of this number, 2 million entered the work force during the turbulent decade and the years that followed. Fifty percent of them had a primary school education; 40 percent had a junior high school education; the remaining 10 percent were split between high school graduates and semi-illiterates. This year, some 170,000 high school graduates in Shanghai will not be able to go on to college. There are also some 100,000 high school graduates from previous years. This puts the total number of young people waiting to be placed in jobs at 270,000. It is impossible to find jobs for so many young people in the near future. This situation calls for continued education for the young people, both employed and waiting to be employed. Therefore it is necessary to have more evening universities and evening middle schools to absorb them. Judging from what the universities and middle schools in Shanghai have available at present, they are capable of any of the three types of operation described above, for the benefit of the young people both employed and awaiting placement. The present 48 institutions of higher education in Shanghai Municipality have a combined teaching staff of 17,000. After this current schoolyear begins, they expect to have a combined enrollment of 70,000. So the student-teacher ratio is four to one. If we could get this ratio back to the pre-Cultural Revolution level of six to one or seven to one, we could free several thousand teachers for evening classes. In addition, we could also get some part-time teachers to help out. Similar richness in manpower resources also exists with vocational middle schools and ordinary middle schools. The Huangpu Middle School mentioned above is a good example. As for classrooms, there are enough at the more than 400 middle schools in Shanghai to go around for use by the various types of evening schools.

New we see that both the need for and the possibility of creating more educational opportunities through spare-time programs are there. As to how to get the schools at the higher and intermediate levels interested in offering spare-time programs, we must provide encouragement and support at the policymaking level. For example, we should allow sponsors of spare-time schools to keep their revenue from tuition receipts after expenses, and not to have to turn over a percentage of that revenue to the state. We should allow schools to sign contracts directly with businesses opting for evening programs, and to freely recruit from among the employees of the sponsoring businesses as well as from among young people awaiting employment. We should also allow businesses to deal directly with schools for educational contracts. We should suggest to local governments that they set aside certain susidies for sponsors of spare-time education and earmark more funds for those evening schools credited with larger enrollments and better performance. In addition, we should provide incentive for study. Like the Huangpu Food and Beverage Company and other sponsors, we should set certain standards for spare-time schooling for employees and use their records at evening schools as one of the criteria for work evaluation and promotion. To encourage young people to go to evening school, we should suggest to the planning and recruiting departments that they hire the better graduates from evening schools and require academic credentials (or equivalents) for each type of job. The municipality could also set up a civil examination office. Those who are already working and those who are awaiting placement, once they pass an examination establishing their academic competence either at the college level or at the middle school level, would be placed in jobs consummate with their educational level, and be paid accordingly.

STEPS TAKEN TO IMPROVE NATIONALITY WORK

Beijing MINZU TUANJIE [NATIONALITY UNITY] in Chinese No 5, 15 May 80
pp 20-21

[Article: "Activities in Nationality Work"]

[Text] Military Units Stationed in Tibet Strictly Carry Out Nationality Policy

Since the Fifth National People's Congress, the military units stationed in Tibet have closely grasped the work of re-education in nationality policy questions. Because of the interference and sabotage by Lin Biao and the "gang of four," the nationality policy conception of some commanding officers of our military units stationed in Tibet has become rather thin in recent years. In order to overcome this defect, party committees of units stationed in Tibet at various levels have taken nationality policy questions as an important content of their political education work. On important occasions of celebration, troops are gathered together for such education. In ordinary days, timely education is given on the basis of tasks assigned and problems encountered. When new soldiers are first enrolled, they introduce to them customs, habits, religious beliefs and taboos of the masses of the various tribes in Tibet so as to continue to raise the consciousness of the vast ranks of the commanding officers in carrying out the relevant nationality policy. On the basis of the spirit of documents such as Premier Zhou's "Questions Concerning Our Nationality Policy," the Political Department of our military units stationed in Tibet has also compiled and distributed an "Outline of Education in Nationality Policy." While attention was paid to education, efforts were also made to strictly carry out our nationality policy and solve our nationality contradictions in time. On the basis of the customs and habits of the minority nationality, they have also formulated certain regulations beneficial to unity between the nationalities. Various units have also spared some manpower and material resources to help the productive work in the districts where they were stationed. These actions undertaken by the units won the heartfelt support of the masses of the various tribes. (Zhong Ziangrong [6945 4362 2837], Chengdu Units)

Nimu County Sets Up Tibetan Language Evening School for Han Cadres

Except for a few old comrades who have worked there for many years, most of the Han cadres working in Nimu County, Tibet, basically cannot use the Tibetan language. In the case of the 20-odd Han cadres entering Tibet most recently, they simply know nothing about the Tibetan language. This naturally hampers the exchange of sentiments between the Tibetan and Han nationalities, and constitutes still more a hindrance in the development of our work.

Accordingly, the county party committee grasped the Tibetan language as a basic exertion for the Han cadres and established a Tibetan language evening school especially for the Han cadres.

For 2 hours every evening and three evenings per week, Tibetan cadres with a definite level in the Han language and well versed in the Tibetan language would undertake the teaching, beginning from pronunciation and basic vocabulary; on the basis of the characteristic that the county is centered on agriculture and cattle-raising, they also had the students study phrases for daily use and phrases used at work. The evening school has set up a concrete schedule for their progress in the study.

The action undertaken by the Han cadres to study the Tibetan language has promoted the enthusiasm of the vast ranks of Tibetan cadres to study the Han language, too; the county party committee is also preparing to establish a Han language evening school. (Guan Qingzhi [4619 1987 2535], Tibet)

Liangshan Military District Seriously Trains Minority Nationality Cadres and Fighters

The Liangshan Military District in Sichuan Province, according to the needs of the units and construction in the nationality area and in conjunction with relevant rehabilitation and transfer work, has been purposely sending a large contingent of minority nationality cadres and fighters trained in the units to various localities every year. According to available statistics, since the organization and establishment of the district, 432 minority nationality cadres and 9,690 fighters have been sent to the Liangshan area. Of those who have taken office as leaders at various levels, there are 2 at the prefecture [1558] level, 127 at the county level, 310 at the district level, 1,359 in communes, 1,540 in production brigades, and 2,268 general cadres. These comrades have already become an important contingent of core forces in the four modernizations work of the Liangshan area. (Political Department, Liangshan Military District)

The State Builds Two Cattle-Raising District Dormitory-Schools for Luqu County

The area of the cattle-raising district in Luqu County, Gansu Province, is vast; the Tibetan herdsmen must move their grazing grounds many times according to seasonal changes every year. Since a school cannot solve the room and board problems of its students, it is forced also to move along. This has greatly affected the quality of teaching and the health of the students.

Recently, the state allocated a special fund of 120,000 yuan to the county, and is planning to build 20 student dormitories and mess halls each at the Dohai and Gongba schools; together, they can accommodate more than 300 students, and each minority nationality student can also draw 6 yuan of aid money. (Liang Yiqun [2733 0181 5028], Gansu)

Concentrated Use of Border Area Construction Funds

Starting from the reality of people of minority nationalities encountering difficulties in transportation in their remote hilly areas, the party committee of the Chengbu Miao Autonomous County, Hunan, made concentrated use of its limited border area construction funds on transport enterprises, and thereby gave full play to the effects of the funds in question.

Lanrong Commune, which is situated in the high mountainous area of more than 1,000 meters above sea level, is constructing a mine right now; because of the inconviences in transportation, people there can only rely on the use of shoulder poles and backpacks to transport mineral ores to a spot beside the highway more than 10 kilometers away, and the development of the mine is therefore encountering serious obstruction. The county party committee allocated a transport capital construction fund of 23,000 yuan to this county from the border funds, and also helped it purchase a truck to solve the urgent problem at the moment. It also allocated funds to the Dagu Commune to build a highway in order to have material resources in support of agriculture, and products for daily use reach the mountainous villages in time. Besides, it also allocated funds to help the Pengdong and Wutuan Miao communes bordering Guangxi purchase two trucks to solve the difficulty of having a highway but lacking the means of transportation. (Yang Shenghai [7122 4141 3189], Hunan)

Jinan Municipality Looks After Korean Nationality, Provides Rice

The masses of the Korean nationality like to eat rice; but, because of a rice shortage, Jinan Municipality in Shandong Province has not taken very good care of this habit in their life in the past. After re-education in nationality policy recently, the municipal foodgrain bureau seriously inspected the situation of the execution of nationality policy by its own system and came to the conclusion that this was a practical problem that should be solved. According to the spirit of directives from the superior level, they decided to provide, from April this year onwards, an additional 3 jin of rice to each person of the masses of the Korean nationality each month. Upon hearing this news, comrades of the Korean nationality were all very happy. They said: This action of providing us with additional rice at a time when our municipality is experiencing rice shortage makes us deeply aware of the warmth of the party's nationality policy; we are determined to return the care of the party and government with our practical action in devoting ourselves energetically to the four modernizations. (Qin Xulun [4440 4872 4858], Shandong)

Manchu Nationality in Xinbin Likes To Buy Pennants

Xinbin County in Liaoning Province is the place of origin of the Manchu nationality; here are gathered people of the Red, Blue, Yellow and White Banners. Pasting or hanging up pennants in the spring festival period has been the traditional custom of the Manchu nationality; but during the Cultural Revolution, a festoon such as a pennant was said to be a feudal, superstitious thing, and therefore was eliminated. This year, the nationality policy was put into effect; in order to satisfy the needs of the masses, the county's trading companies especially purchased 100,000 pennants. Masses of the Manchu nationality were extremely pleased to buy these pennants from them; those of the Red Banner pasted up red pennants; those of the Yellow Banner, yellow pennants; those of the Blue Banner, blue pennants; and those of the White Banner, white pennants. These pennants were beautiful in their picturesque patterns and bright in their colors, symbolizing the propitious beginning of the year. As every family pasted up these pennants, everybody smiled with happiness. (Cao Wenqi [2580 2429 1142], Liaoning)

Hui Nationality Restaurant at Huge Mountain Cave Is Run Increasingly Well

Metallurgical Construction Company No 7, which is situated slightly over 20 kilometers from Guiyang Municipality in Guizhou Province, has nearly 100 staff members and workers of the Hui nationality. In the past, if they wanted to eat lamb, they had to go to Guiyang Municipality to buy it; not only did the individuals involved have to spend some money on transport, they also missed many working hours. Staff and workers of the Hui nationality naturally reflected strong opinions in this regard. In view of this situation, the company party committee organized over 10 family members of staff members and workers, put one staff member or worker in charge, and started a Hui nationality restaurant.

Since the smashing of the "gang of four," especially when everyone is marching earnestly toward the four modernizations today, this restaurant is being run increasingly well. Staff and workers of the whole restaurant are united and help each other; they all work fulltime, disregard their working hours, consciously extend their business period, and think of the customers at each turn. This has not only rendered convenience to the masses of various nationalities, but has also made it possible to have profits submitted to the state. Thus the undertaking has been praised by all concerned. (Bao Jianxing [0202 1696 5887], Guizhou)

Deputy Director Qian Pays Special Visit to A-hong Lin

On the eve of the spring festival this year, Qian Diqian [6929 2107 0578], deputy director of the Political Department of the military units in Kunming, Yunnan Province, led part of the leading comrades of the army, division and regiment headquarters on a special trip to Shadianzhai, where brethren of the Hui nationality of Honghe Zhou live in an enclave, and paid a visit to A-hong Lin Guangwen [2651 0342 2429] in particular.

A-hong Lin happily talked about the development of the collective economy in Shadian and the way the life of the commune members had become gradually progressive and enriched; he praised the strictness with which the garrison units carried out the party's nationality policy and religious policy, the conscious respect they exhibited toward the customs and habits of people of the Hui nationality, and the large amount of work they did to enhance the unity between the soldiers and civilians. Deputy Director Qian, in turn, expressed approval of A-hong Lin's lofty character in showing his care and affection for the soldiers of his own nationality and also thanked the masses of the Hui nationality on behalf of the leading organs of the military units for the conveniences they had rendered to the garrison units in respect to their training, construction work, production and general livelihood; he also thanked brethren of the Hui nationality in Shadian for the noble spirit they had exhibited during the period of our defensive counter-attack against Vietnam in courageously supporting the frontline and warmly comforting our cadre fighters and wounded and sick personnel. A-hong Lin was very thankful for the care shown by leading comrades of the units, indicating that he would set himself up as a good example in doing a good job on supporting the military, so that soldiers and civilians could defend the country's borders in unity and rush toward the four modernizations with a common will and common effort. (Li Wenyi [2621 2429 5030] and Du Bing [2629 0393], Yunnan)

Huochang County Opens Up Prayer Temples and Strengthens Management of Religious Activities

Since the launching of re-education in the nationality policy question in Huochang County, Xinjiang Province, last year the county party committee, while guaranteeing the citizens' freedom of not believing in any religion and of propogating about atheism, also sought seriously to protect the vast ranks of the pious masses in their enjoyment of the legitimate right to engage in religious activities. On the basis of the three principles of facilitating the stability and unity of the pious masses, facilitating the motherland's four modernizations work, the county party committee relevantly solved the question of places for religious activities in localities where pious masses usually gather together. There were restored and opened up altogether 7 prayer temples and 19 activity spots in the county, and this was welcomed by the masses of the Uygur, Hasak, and Hui nationalities who believe in the Islamic religion.

In its work to properly solve the question of places for religious activities, the county party committee paid attention to holding full consultation with the pious masses of various nationalities, so as to elect religious personalities who were both knowledgeable in the religion and patriotic and law-abiding, to serve as A-hongs leading the pravers at those places. As for these prayer-leading A-hongs and well known personalities in the religious circles, the county party committee regularly organized them to study politics and current affairs in order to elevate their ideological consciousness and assure the thorough realization of the party's unity, education and transformation policy.

In order to strengthen the management of religious activities, the county party committee also put down certain concrete regulations, whose main contents include the following: Any religious activity must abide by the governments policies, laws and edicts; no permission is given to the restoration of religious and feudal privileges and oppressive and exploitative systems already repealed; no permission is given to the coercion and deception of non-believing citizens into believing a religion; no permission is given to the impartation of religious ideas to youths and children not yet 18 years of age; Communist Party members and Communist Youth Corps members are not allowed to believe in religion; cadres and teachers must also endeavor to get rid of the constraints of religious ideas. (Song Jiaren [1345 1367 0088], Xinjiang)

Mengcun Party School Gives Courses in Materialism and Atheist Education

Taking advantage of the opportunity of rotational training of teachers of party branches in the countryside by the county party committee school, the United Front Department and Propaganda Department of the Chinese Communist Party's Mengcun Hui Nationality County Committee in Hebei Province has carried out atheist propaganda and education. In response to the characteristic that the scientific and cultural level of students in the countryside is relatively low, and according to the spirit of relevant documents from the superior level and concrete conditions of the county, they undertook to compile and write the colloquial lectures themselves. Their main contents are: the struggle between the two world views of materialism and idealism; the emergence and development of religion and its essence; policy limits that ought to be kept under control in the launching of the atheist education; etc. Through education, the students received an education in materialism, gained fundamental understanding of the origin of religion and the conditions on which its existence and development depend, and gained a further perception of the party's principles and policies concerning religion. The students indicated that when they return to their units they are going to actively carry out atheist propaganda, guide the masses to make a clear demarcation between science and superstition, between materialism and idealism, distinguish the right from the wrong, and elevate people's socialist consciousness. (Zhu Yenqing [4376 1693 7230], Hebei)

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

PLANT UPHOLDS 'FOUR UNITES,' CARRIES OUT EDUCATION OF PARTY MEMBERS

Jinan DAZHONG RIBAO in Chinese 27 Aug 80 p 3

[Article: "Uphold the Four Unites and Regularize and Systematize the Education of Party Members"; by the Party Member Education Section of the Provincial Party Committee Propaganda Department on Experiences of the Party Committee at the Jinan Locomotive Plant in Ideological and Political Education of Party Members]

[Text] The party committee at the Jinan Locomotive Plant firmly upheld the method of the "four unites," keeping close links with reality, as they conducted education of party members in ideology and politics on a regular basis, giving full play to the exemplary vanguard role of the broad masses of party members in the four modernizations. Their principle method was:

Firmly Integrate Party Member Education with the Core Operations of the Plant

Last year during "quality month" activities, the party committee at the plant called several mobilization meetings of all party members of the entire plant. The various branch committees set forth concrete demands on party members, and the various party groups conscientiously organized discussions to educate party members to become models in raising production quality. Among the 43 staff and workers who were judged "outstanding quality workers" 18 were party members. This year again, in a move to evaluate quality and award promotions in rank, the party committee established contact with the staff and workers and in seven successive meetings conducted education in the communist ideology of "be the first to bear hardship and the last to enjoy comforts," and also on the policies governing promotion in rank. Over 200 party members throughout the plant offered to step down in rank. At the same time many party members also enthusiastically gave assistance to the party and branch party committees in launching ideological work around the question of adjusting wages, in approaching staff and workers to pour out their souls, to do work among family dependents, insuring a smooth progress of the work of evaluating quality and awarding promotions in rank, thus promoting solidarity between party members and the masses and between cadres and staff and workers. They gained an understanding that integration of the central tasks of the plant with the education launched among party members will constantly provide education with fresh content. They "shot their arrows at the precise targets" hitting deep and with lasting effect, thus insuring completion of the central tasks.

Uphold Mutual Integration of Concentrated Training in Rotation with Education of a Regular Nature

Since last year, this plant has conducted 25 training courses for party members, training 839 party members, i.e. 90 percent of all party members. Through concentrated rotational training party members gained fairly systematically knowledge of the basics of the party, and, one step further, raised their knowledge about the party's character, outline and organizational principles, the rights and obligations of party members, party discipline and the party's excellent tradition and working style. While paying attention to the concentrated training, they also attached extreme importance to the perfection of regular education. On the one hand they strengthened the organizational life of the party, firmly upholding the system of three meetings and one lesson. The leading comrades of the party committee, to set an example and take the lead in attending party classes, effectively held democratic life meetings and set a fine example for the party members. Every party branch should in general maintain a schedule of holding monthly one branch small group meetings, one general meeting of all party members, one party small group meeting and one party training class. On the other hand they established a system of regular reports from party members on their ideological progress. The party branches are to gain regularly an understanding and are to analyze the ideological state of the party members, launch ideological and political work on an individual person and topic basis, and to exert efforts to do a meticulous and perfect job of educational work. Due to regular painstaking ideological and political work by the party branch of the coal and water shop, 15 out of 18 party members of that shop were judged "advanced workers," and this shop was evaluated the most advanced workshop of the entire plant.

Firmly Uphold Linking Evaluation of Excellence and Selection of Models with Aid to Those Who Lag Behind

One important point in the education of party members is stimulation by the example of advanced models, that party members have models to learn from and targets to aim at. In this way those lagging behind will be stimulated to change speedily. Last year 20 party members throughout the plant were adjudged exemplary party members, and the party committee of the plant called on the entire membership and all staff and workers to emulate them. Propaganda was focused on Hu Baofu [5170 1405 4395], model party member, who regularly and without fail throughout 26 years has considered the plant his home, has never absented himself from work with or without leave, and has on all occasions performed the advanced type of action that gave evidence of the leading role of a member of the Communist Party. In the coal and water shop there was an old party member who worked listlessly with little energy. The party branch had several heart-to-heart talks with him. By using the example of Comrade Hu Baofu's advanced performances, they educated him in a helpful way so that he finally again came to radiate the revolutionary vigor of his youth and on his own initiative applied for heavy work in a production team or group. At times he would now even take the lead in sticking out at a job, and in the end he was commended as an advanced worker.

Firmly Uphold Linking Positive Education with Enforcing Party Discipline

In the course of the education of party members, priority must at all times be given by the plant party committee to positive education. The broad masses of party members, especially the leading cadres of the party, should regularly organize repeated study of "Certain Rules Governing Political Activities in the Party," as well as the draft revision of the party constitution, to continuously raise their level of political ideology and exert themselves to achieve the standards set for members of the Communist Party. In the course of studies at the toolshop the branch party committee instituted the pledges as mentioned in the "Rules." They displayed the pledges on the wall to allow a supervision by the masses, to have them regularly compared and checked and finally take effect in direct action.

At the time of conducting positive education the plant party committee shall also carry out conscientious investigation and correction of any unhealthy tendencies that should appear in the party. Since last year nine cases of violation of discipline have been investigated and dealt with. In six of these cases disciplinary action was taken. When the finance section needed more accounting personnel, they did not test candidates to select the best but by "opening the backdoor" admitted eight children of cadres or of so-called related units to the training course. When the plant party committee found it out, they immediately instituted an investigation and dealt with this matter. Their criticism of the party members involved was applauded by the staff and workers of the entire plant. Practice has proven that strict enforcement of party discipline is also an important constituent element of the education of party members.

EXEMPLARY VANGUARD ROLE OF PARTY MEMBERS DEVELOPED

Jinan DAZHONG RIBAO in Chinese 27 Aug 80 p 3

[Article by Wang Xiangqing [3768 6272 1987]: "In the Work of the Four Modernizations, Play an Exemplary Vanguard Role"]

[Text] The branch party committee at the Li Er production brigade, Guangong Commune, Shouguang City, organized the party members for a conscientious study of specialized knowledge, thus one step further displaying the exemplary vanguard role in the work of the four modernizations.

Following is the Fifth Plenary Session of the 11th CCP Central Committee, the branch party committee at the Li Er production brigade, apart from firmly maintaining the system of 3 meetings and 1 lesson, specified 2 evenings every month for technical courses for party members to study specialized topics in agriculture and has this fixed as a permanent institution. Before each lesson, the branch party committee determines the study topic, which generally is derived from the actual requirements of the brigade and is based on the scientific agricultural information in selected periodicals and books. Instructors at the courses are mainly educated and technically informed party members of the brigade itself, while scientific and technical staff from higher level departments are also invited to give lectures.

In these studies organized by the branch party committee of the brigade, the party members have so far studied the treatment of summer corn, plant protection and use of chemical fertilizer, use of agricultural chemicals and similar items of agricultural science, thus raising the level of specialized knowledge of 16 party members from out of the entire brigade, which has had an effect in actual production. When various destructive insects, such as aphids, "autumn dogs" and corn locusts infested 550 mu of summer corn of the brigade this autumn, the branch party committee immediately organized study of insect pest control, then had the participants go to the various production teams to lead the masses in a concentrated assault on the insects which very quickly eliminated the insect pest.

They have gained the realization that now in the new situation when the focus of our work has turned to the four modernizations, to organize study of general and scientific knowledge among party members in the key lines of work, meaning for them to become red and expert, is the only way to give full play to the exemplary vanguard role of party members. Editorial Comment: "Exert yourselves in study, try hard to become red and expert," are important provisions of the "Certain Rules Governing Political Life in the Party." The draft revision of the party constitution also lists the study of scientific and general topics, work techniques and professional knowledge as one of the responsibilities of party members. It is therefore an important task in the building up of the party in this new era to effectively organize the study by party members of general and scientific knowledge. To engage in the four modernizations is a substantial undertaking, it requires an understanding of science and relies on genuine ability. A party member who is merely filled with lofty aspirations and great ideals but lacks perfect mastery of specialized knowledge and production techniques will always remain an unprofessional outsider in his particular job and will therefore remain unable to make his due contribution to the four modernizations, therefore also unable to fully play the exemplary vanguard role of a member of the communist party. It is very worthwhile to emulate the method of the branch party committee at the Li Er production brigade, who, in the course of studying implementation of the "Rules" and the draft revision of the party constitution, conscientiously organized the party members to study specialized topics of agricultural science.

PARTY MEMBERS URGED TO MAINTAIN CLOSE LINKS WITH MASSES

Jinen DAZHONG RIBAO in Chinese 27 Aug 80 p 3

[Article by Yong Pu [3057 3877]: "Communist Party Members Must Maintain Close Links with the Masses"]

[Text] "To maintain close links with the masses, to discuss new problems with the masses, lend support to the rights and interests of the masses, respect the special knowledge of the masses and their rationalization proposals, listen with an open mind to the criticism and demands of the masses and to transmit these immediately to the party," this is the sixth paragraph of duties demanded of members of the Communist Party in the draft revision of the party constitution.

Our party faithfully represents the interests of the peoples of all nationalities. The character of our party and its tasks determine that the party must maintain with the masses an intimate closeness that is forever as inseparable as fish and water. In the course of our protracted revolutionary struggle our party has built up an excellent tradition and workstyle of maintaining close links with the masses. In the war years the masses risked their lives to protect party members and cadres, and there have been equally innumerable instances where party members and cadres sacrificed their lives in rescuing and protecting the masses. After the establishment of our present government, it was due to the fact that our party became the party in power that some members of the party and some cadres did not show the same intimacy and friendliness in their relations with the masses. Especially during the 10 years of great turmoil, serious damage was inflicted on the excellent tradition and workstyle of our party in respect to its links with the masses. In order to restore the party's excellent tradition and workstyle, the draft revision of the party constitution stipulates, most necessarily, that close linkage with the masses is an imperative duty of every member of the party. This is an important guarantee for a successful realization of the four modernizations.

Close linkage with the masses requires consultation of the masses whenever a new problem arises. Still we often meet comrades in our party who consider themselves most brilliant, who don't follow the road of the masses in their work, who act on their own and order other people about, who force the masses to do what they don't want to do and who as a result do great undeserved harm to the party's cause. From now on this workstyle will certainly have to change. "Three cobblers with their wits combined equal one Zhuge Liang." Among the masses there are thousands of Zhuge Liangs. Consultation with the masses on any new problem is the only way to overcome any difficulty and to effectively accomplish our work.

Close linkage with the masses will protect the rights and interests of the masses. To serve the people with heart and soul is the purpose of our party. Every word and every action by a member of the Communist Party must conform with the greatest benefit for the broadest masses of the people, and must have as its highest norm the support by the broadest masses of the people. A member of the Communist Party must therefore respect the democratic rights of the people, and with regard to their material life he must firmly protect the interests of the masses. Those party members who show no solicitude for the life of the masses, for their pains and hardships, and that small minority of party members who even go so far as to violate the interests of the masses, must all be subjected to criticism and education, and those who stubbornly refuse to reform must be subjected to criticism and education, and those who stubbornly refuse to reform must be subjected to disciplinary punishment.

Close linkage with the masses means to show respect for the special knowledge and rationalization proposals of the masses. The construction of socialism and the realization of the four modernizations require a high degree of general and scientific knowledge; they require well-qualified men who are capable of mastering various kinds of specialized knowledge. To stifle or suppress talent is a criminal act. Every member of the Communist Party, each at his particular workplace, must therefore conscientiously respect the special knowledge of the masses, must on his own initiative accept the rationalization proposals of the masses, and boldly recommend to the party organization any outstanding talent who shows special knowledge and leadership ability, to have him promoted to work in a leadership position, and thus contribute his intelligence and ability to the construction of socialism and the realization of the four modernizations.

Close links with the masses also has the meaning of listening with an open mind to, and reflect, the criticism and demands of the masses. A member of the Communist Party must be an intimate friend of the masses, become one with the masses, must be supported by the masses, must immediately report to the party organization any criticism and demands of the masses, must become a bridge and bond in the linkage between the party and the masses. He must under no circumstances stand high above the masses, act as lord and master, ignore in silence, or remain apathetic to the criticism, demands and voices of the masses, nor even less turn a deaf ear to the justified criticism and demands of the masses, or even try to reataliate against them, giving anyone "small shoes to wear." That would certainly be cutting one's self off from the masses and turning into the opposite direction.

Our great historical mission of constructing socialism and of realizing the four modernizations demands of all members of the Communist Party that they maintain close links with the masses and exert themselves to be representatives of the masses; by means of the exemplary workstyle of Communist Party members, have the masses rally round the party and have everyone work hard and struggle to accomplish the cause of the party.

PARTY AND STATE

PARTY CURRICULUM ADDRESSES RED AND EXPERT THEME

Hangzhou ZHEJIANG RIBAO in Chinese 17 July 1980 p 3

[Article, "Study Hard, Become Both Red and Expert"]

[Text] Study Hard, become both red and expert is the final topic in this series of lectures from the party's training course material. Being the last topic doesn't mean its not an important one. Quite the opposite. In a certain sense this lecture is even more important, because once the party line is determined, the cadres are the decisive factor. Building a rank of cadre who uphold the socialist road and have expertise and ability is an important prerequisite for carrying out the party's political line and expediting the four modernization projects, and it is also a pressing, major political task confronting the entire party.

Communist Party members should become the vanguard warriors for implementing the four modernizations and must study hard to become both red and expert. Speaking of both red and expert, it invariably reminds us of a discussion of the many profitable experiences of the older generation of revolutionaries. Comrade Chen Yi once made up an analogy for young people. He said: "A pilot for example, having no feelings for the motherland and the people, nor any conciousness of socialism, will fly to the enemy's side as soon as he takes off, so how can you let this kind of a person fly a plane? However, another pilot, determined to defend and to sacrifice for the motherland, will never fly to the enemy's side; but, as his skills are poor, will invariably be shot down by the enemy as soon as he takes off, so what's the sense in having a pilot like this either? For this reason, skill alone, without politics won't do, and politics alone, without skill won't do either." Comrade Peng Dehuai gave a very interesting talk to the troops during the War of Liberation. He said: The mastery of one's profession is very important! One very important reason that our millet plus rifles defeated HU Zongnan [5170 1350 0589], was our mastery of this rifle. Haven't you read THE INSEPERABLES [6647 3883 1152]? Dou Erdun [4535 1422 2415] had stronger skills than Huang Tian [7806 1131], but when Huang Tian stole his tiger-headed sickle and replaced it with a broad sword, Dou Erdun no longer dared to compete with him. Why? Because he was not proficient with it. These two revolutionary forefathers used extremely vivid analogies, and illustrated that red and expert is a dialectical unity. Being expert is naturally not the equivalent of being red, but being red certainly demands being expert. If you are defeated in combat because you are not knowledgeable nor an expert, can you honestly say that this is being red?

At present, we are in the process of implementing the four modernizations. The four modernizations we are implementing are socialist modernizations, not capitalist modernizations. Each and everyone of our communist party members must uphold the socialist road. This is a prerequisite. After smashing the "gang of four," and especially since the Third Plenary Session, the entire line, direction, and all the policies set forth by the Party Central Committee are vivid manifestations of the socialist road under our nation's present-day conditions. For this reason, the current predominant feature in upholding the socialist road is the resolute support and concientious carrying out of these lines, directions, policies, and a continued opposition to those types of mistaken inclinations which are skeptical of, and resist the Party Central Committee's political, ideological, and organizational lines since the 3rd plenum. But can this alone be enough to expedite the four modernization projects? It cannot! We must still acquire the various types of expertise and professional competence that correspond with the modernization projects. It is clear to all that the grand goal for realizing the four modernizations is a much more complicated, formidable, and awesome undertaking than that of the previous Revolutionary War and the economic construction of the fifties. In the past, it was alright to go into battle armed with only millet plus rifles, and an understanding of how to fire, bayonet, and throw a hand grenade. Its not the same today: the Army, Navy, and the Air Force must have modernized expertise in all its various military branches. If you don't study and acquire this expertise, can you fight well in a modernized war on sheer consciousness and courage alone? You can't! That's the way it is in combat, and the same applies in industry, agriculture, business, and education. We can explain it this way, the greatest obstacle to implementing the four modernizations is not the lack of a first rate technology and equipment, but rather the lack of a first rate rank of cadres, capable of grasping modern technology and organizing modern mass production. Therefore, if a Communist Party member does not have real ability and learning, nor the expertise and competence for the four modernizations, even though he has a very strong enthusiasm for the four modernizations, he will not be able to make the proper contributions, and may even end up playing an adverse role. If that's the case, you vanguard warriors of the proletariat might as well be stamped with a large question mark. As long as there are communist party members and cadres with a firm political direction and the ability to adapt to the modernization projects, there will be Communist Party members who can meet the qualifications, and there will be leading cadres who are worthy of fulfilling their positions.

Someone asked, hasn't it been said that "laymen are capable of leading experts"? That's right. In 1957, to counter the slogan of "laymen cannot lead experts" espoused by a handful of rightists to negate the party leadership, Comrade Mao Zedong penetratingly pointed out: "The rightist say we cannot lead. 'laymen cannot lead experts'. We refute the rightists and say that we can lead. We are the capable ones when it comes to politics." He also went on to point out: "It won't do either, to be concerned only with politics and not know about the technical professions. All our comrades should do some study on technology and the professions." That is to say; even though we may be ignorant of a particular profession, or don't know enough about it, we are still the experts in politics, and we are the ones capable of leading in the fields of politics, policy, ideology and organization. But this is not to say that it's alright to be ignorant about the professions and scientific technology. Politics and professions are the unities of opposites. The political tasks are realized through the concrete professional work or the various political work must be carried out in the professions. Politics devoid of professions can only be empty politics, and this kind of empty politics is harmful and unprofitable to the revolution and to construction. As a matter of fact, this being a layman for a long time and having to be a leader too, gives rise to two types of situations: One is where you think of yourself as leading, when in fact you're being led; you can't see that you're just giving orders all day, not giving your full attention to the concrete problems that may arise, and are only capable of managing according to someone else's ideas. If this isn't being led, what is? The other type is pretending to know when you don't, issuing blind commands are given, breaking economic rules, and causing tremendous losses in operations. Would you consider this exercising correct leadership? We already have had too many bitter experiences and lessons in this regard, and "a fall in the pit" should serve as "gain in the wit." We have never been able to be content to be "roughnecks" [1129 5071 4723], who don't study, are unskilled, and are willing laymen. It must be understood that the cadres who have been satisfied with being laymen for quite some time are intoxicated by their political empty talk, and will never be able to run to the country and can only harm her.

Every Communist Party member, in seeking to make a greater contribution to the four modernization projects, ought to devote time and energy to two areas: continually raising of his level of awareness, and striving to attain the skills for the four modernization projects. The works and deeds of Comrade Luo Ronghuan, who for a long time was responsible for the political work of leading units, are very inspiring to us all. During his life, he always stressed that political work cadres should not only understand politics, but the military and the professions as well. He said, if the political cadres are laymen in respect to the military and the professions, then the political work fall into generalities, and won't permeate and play a role in all areas. During the war years, when he was a director of a political department and a political department and a political commissar, he went to the headquarters operations office daily to read and study the military situation reports, and urged the political organs to show concern for the fighting, and made himself combat-oriented.

In March 1942, during a political work session of the 115th Division, convened and presided over by Luo Shuai [5012 1596], in addition to studying political work, he specialized in conducting military technical training and immensely raised the political cadre's technical level and their ability to command operations. Many comrades subsequently became outstanding military commanders. Comrades, Comrade Luo Ronghuan is one who specialized and engaged in unit political work, yet he laid such emphasis on being adept at military functions, and studying military techniques, its no wonder that the great number of Communist Party cadres directly involved in industry, agriculture, the vocations, and cultural education would never be satisfied being a layman again. The broad mass of party members and cadres should energetically strive to acquire genuine skills for the work of the four modernizations, make themselves into experts, and effectively strengthen and improve the party's leadership.

If that's the case, can one become a professional and be both red and expert? Our answer to that is yes! Comrade Peng Dehuai is an example. He was in the midst of bitter and prominent party struggles for several decades, enjoyed a great reputation as a military scientist both at home and abroad, and was regarded by the Chinese peoples as an honorable and distinguished general. On the Northwest battlefield during the War of Liberation, confronted with an enemy force ten times larger, he miraculously decreased the enemy, and wrote a glorious chapter for the Chinese revolution, which was hailed by the people as a "spectacle of war full of power and grandeur." But old Peng was born in poverty and had only two years of schooling when he was young. He had to study assiduously, alone and unaided, attended middle school through studying books, mastered the military profession, and became a distinguished military commander. Even in the critical war environment, old Peng always carried, in a tin document box, the works of Marx, Lenin and Chairman Mao, ancient and modern military treatises, LU Xun's works, as well as other famous classical and literary works. He would often read at night by candlelight, lose sleep, and forget to eat, and once during a road march, caught himself totally absorbed reading while mounted on a horse, and gave out with a resounding laugh. He once jokingly told someone: "Your humble servant is but an old student with just two and a half years of schooling. The struggle is becoming so difficult, and the party's tasks are mounting so fast, it won't do not to study." These words expressed it so well! In these days we must change ourselves from laymen into professionals in the course of work on the four modernizations, and similarly, the only way out is to study. Since this period, our party has started to adopt various effective measures to strengthen the cadre's professional studies. For example, every level of the party schools, aside from studying Marxist theory and the Party's line, direction, and policies, offers studies in scientific technology and related professional knowledge, runs different types of cadre schools, holds various kinds of training classes and sets up scheduled rotating training for the cadres and so on. However, we should get rid of any ideas of waiting and dependency, bring subjective activity into play, study diligently and well, learn from books, the masses, and all the experts, and gradually transform ourselves from laymen into experts.

As a matter of fact, since the founding of the People's Republic, we have had a very large contingent of communist party member cadres transferred to the economic, scientific technological, cultural and educational, and other fronts, who, responding to the call of the Party Central Committee, took the experts as teachers, studied diligently and painstakingly, relied on their own effort, and within a very short period of time, were transformed into specialists who understood the party's directions, and policies, were good in performing ideological work, and had fully mastered their professions. The experiences of these comrades illustrates that learning scientific technology and professional knowledge is on the same par as learning how to fight used to be, for "there is nothing too difficult for the people, for they can even manage to pursue advanced studies as long as they set the their minds to it, and are good at learning." Each and every one of our communist party members ought to have this kind of confidence, study hard, and continuously advance in a direction that's both red and expert.

GUIDELINES FOR CORRECT CONDUCT BY PARTY MEMBERS, CADRES

Hangzhou ZHEJIANG RIBAO in Chinese 10 Jul 80 p 4

[Article: "Accept the Supervision of the Party and the Masses; Don't Go in for Special Privileges"]

[Text] In this lecture, we will talk about an important problem of correcting the party's style. That is, accepting the supervision of the party and the masses and not going in for special privileges.

During the long-term revolutionary struggle and construction tasks, our proletarian revolutionaries of the older generation worked earnestly and assiduously, never sought private gain, played an exemplary role everywhere by faring and sharing alike with the masses for better or for worse, and thus won the high confidence and love from the hearts of the people. Let us now tell a story of how Comrade Chen Yi made a strict demand of his relative by forbidding him to go in for special privileges. At the initial stage of liberation, when Comrade Chen Yi was mayor of Shanghai, his father-in-law came to visit him and stayed many days. He told [his wife], Comrade Zhang Qian [1728 5409]: "We are now still using the ration system, and whatever we eat or use is limited by law. If your father stays too long, our nation's income will be affected. It would be better to let him go back home." But Comrade Zhang Qian's father could not follow this reasoning and thought that, since Comrade Chen Yi was a mayor, why could he not stay longer? Comrades Chen and Zhang then did some persuasion and said: "The cadres of the Communist Party render services to the people and are different from the Kuomintang officials. The higher their positions, the more they should take the lead. In this way they will be supported by the people, the nation will be prosperous, and our revolutionary causes will be hopeful." Through patient persuasion, the old man was finally convinced to go back home. How well Comrade Chen Yi had done. At a time when our party was just taking over as the ruling party, Comrade Chen Yi by his own actions showed all the party comrades that Communist Party cadres are completely different from the Kuomintang officials. They have a responsibility to render services to the people earnestly and assiduously, and do not have the right to go in for special [privileges]. Each of our Communist Party members should follow the example of Comrade Chen Yi and consider whether he or she is going in for special privileges; this is an important matter of principle related to the question of whether it is possible for our party to maintain its proletarian vanguard character. That is, [each member] must keep from changing from a "public servant of society" into an "official" who is one class higher than the people. Especially today, history has entered a new era, and only the party's leadership is to be relied on for the satisfactory progress of construction of the four modernizations. Party cadres at all levels should more earnestly accept the supervision of the party and the masses, learn and develop the glorious tradition of being happy to serve the people, use the power vested in them by the party and the people to benefit society, wipe out all conduct of special privileges, and devote themselves to the construction of the four modernizations.

We all know that China was a feudalistic society for several thousand years. This society had a very severe gradation of classes, made a clear distinction between high and low, and observed such creeds as "Respect the superior, despise the inferior, treat the emperor as emperor, and treat ministers as ministers"; "The intellectuals rule the people, the manual laborers are ruled by the people"; "Respect is not to be shown to the common people, punishment is not to be imposed on the high officials"; etc. Thus, the feudal ruling class protected the various kinds of special privileges they enjoyed politically and in their daily life. After liberation, we thoroughly destroyed the feudalist land ownership system, but it is not easy to have feudalistic ideologies retreat from the stage of history. Especially during the 10 tumultuous years, Lin Biao and the "gang of four" went in for feudalist autocracy in a big way. Politically, they declared themselves kings or leaders; in their daily lives, they lived in an extremely extravagant manner. Feudalistic special privileges were thus developed to the peak, and our party's fine workstyle was thus seriously damaged. As a result, this bad feudalistic habit still is prevalent in places, and a great effort is required to oppose and criticize it. Furthermore, it should be seen clearly that in our communist and socialist country, the relationship among the people is an entirely new kind that is incompatible with any feudalistic special privileges. People's positions may be high or low, but these are only the different divisions of labor, and there should be no difference of superior and inferior, of high and low. Each Communist Party member, especially the party's leading cadres, must consider going in for special privileges to be the greatest shame and to be conduct that brings disaster to the party and nation. As early as the period of the anti-Japanese war, Ye Ting [0673 2185], commander of the New Fourth Army, once went out on official mission with an aide and asked the aide to dine with him on the same table. Comrade Ye Ting said: "An aide and a general are only different divisions of work; they have the same objective--to fight the Japanese and protect the nation. Today we eat at the same table, and we should do the same thing after the victory of the revolution!" In receiving dung collector Shi Chuanxiang [2514 0278 4382] in October 1959, Comrade Liu Shaoqi said: "By collecting dung, you are an orderly of the people. I, as the chairman, am also an orderly of the people. This is only a difference in the revolutionary division of work, and all are indispensable parts of the revolutionary cause." These two elder revolutionaries had clearly and thoroughly explained that our Communist Party members, no matter how high their positions and how great their contributions, are members in a society of equality, and should have the attitude of treating people equally. The position of ruling party enables many of our comrades to control a very great deal of power and have many advantageous conditions. If attention is not paid to strengthening the formation and training of party spirit and to opposing feudalistic special privileges, then there will be a serious separation from the masses and even a deterioration in character.

Some comrades frequently consider that going in for special privileges is only a problem of individual workstyle which has nothing to do with the general situation, and that it is unnecessary to be so easily astonished, or to make much ado about nothing. This kind of thinking is not right! Our revolution and construction are tasks of the millions and millions of masses. Whether Communist Party members go in for special privileges is an important matter having to do with whether we can unite and lead the masses to struggle and win the victory of revolution and construction. During the years of revolutionary warfare, cadres of our party and the revolutionary political power fared and shared alike with the masses for better or for worse, were trusted in times of trouble, and "with salt, everybody shared the taste; without salt, everybody shared the tastelessness"--thus forming a harmonious whole. This was the basic assurance that our party had overcome all difficulties and defeated Japanese imperialism and the reactionary clique of the Kuomintang. during the 3-year period of economic difficulties, our party's leading cadres of various levels, together with the masses, self-consciously engaged in bitter struggles and took the lead in saving and cutting back. In those years, Chairman Mao and Premier Zhou very often stopped eating meat and eggs and ate miscellaneous cereals. Comrade Peng Dehuai reduced his ration on his own, taking only 18 jin per month.... By their own exemplary actions, they united the majority of the masses and satisfactorily won the battle against natural calamities and manmade disasters, and the national economy rapidly recovered in a short time. At present, we are engaged in the struggle for realization of the four modernizations. Granted that our material foundation is much better than that in the revolutionary warfare period, and than that in the "yiwu" and the "erwu" construction periods, but because of the 10 years of damage inflicted by Lin Biao and the "gang of four" we still have many difficulties in various aspects, and we still need for the whole nation to pull together, fare and share alike for better or for worse, and engage in hard struggle. If our leading cadres are zealous in seeking personal special privileges, stretching out their hands and looking diligently for power, position, pay, and material comfort, then they will be separated from the masses, lower the dignity of the party, and suppress and hurt the enthusiasm of the majority of the cadres and the masses, thus affecting the construction of the four modernizations. Is this to be considered a small matter? Our party members and cadres, therefore, should be determined to engage in a long-term bitter struggle, firmly eradicate all kinds of bad styles, and further promote and develop the spirit of arduously fostering the cause.

Some comrades might say that opposing specialization is a matter for high-level cadres, and that there is no need for concern with basic-level cadres like them. This kind of view is not right, either. No matter how great or how small the cadre is, he has control of certain amount of power and has the problem of how to exercise that power. Cases of seeking special treatment for oneself and one's own children by taking advantage of one's official powers have occurred among higher cadres as well as among basic cadres, and the only difference is in the ways they were expressed. As far as the consequences are concerned, this kind of working method is detrimental to the close relationship with the masses and to the construction tasks of the four modernizations. Therefore, our party members and cadres, no matter whether they are on the higher or lower levels, should pay attention to preventing and opposing specialization. Certainly, when we oppose going in for special privileges, we are not going in for absolute parity. Our party's leading cadres at all levels bear heavy responsibility for their various tasks. Their working conditions have a great influence on the tasks of the whole party and nation. It is right to provide the leaders with some reasonably convenient conditions and to insure their safety, and this will be understood and agreed upon by the majority of the masses. However, these necessary attentions should originate from the needs of the work, and there should not be too much difference from the actual living conditions at present. Every cadre is prohibited from going in for special privileges in a big way, with the motive of "patronage." Recently, the party Central Committee set forth specific regulations for the living conditions of leading personnel at various levels. This is entirely necessary. Our leading comrades at various levels should self-consciously observe these regulations. It is prohibited to use public funds in violation of regulations to entertain and send gifts, prohibited to approve money and materials in violation of financial and economic disciplines, prohibited to act in disregard of what is one's own and what is public, to gain private ends from public causes or from public money, to embezzle and spend lavishly funds and materials which belong to the nation or to an organization, etc. At the same time, in connection with the education of one's own children and other relatives, it is necessary to pay special attention to one's conduct and not use one's official powers to seek special attention for them in enrolling in schools, joining the party, promotion, and placement, etc.

In order to effectively oppose special privileges and to prevent public servants from becoming officials riding on the heads of the people, our party's leading cadres at all levels must self-consciously accept the supervision of the party and the masses. In addition to earnestly carrying out such systems for the cadres as examinations, awards and punishments, rotation of jobs, discharges, etc, and to hearing at specific times the opinions and comments of the party members and the masses at the units where they belong, every party member, no matter how high or low his position, must belong to a party branch or a group of the party, participating in the party's organizational life. We cannot have special party members who do not participate in the party's organizational life and who do not accept the supervision of the masses from within and without the party. Party organizations and the masses should supervise party members and cadres so as to know whether they are learning in earnest and are thoroughly carrying out the party's line, guiding principles, and policies; whether they are observing party discipline and the laws of the nation; whether they are insisting on the party's fine tradition and workstyle;, whether they are seeking special privileges; whether they are playing an exemplary role in production, work, study and struggle against enemies; and whether they have a close relationship with the masses and are seeking the benefits for the people. Only if party members and cadres forever place themselves among the masses and accept the supervision of the party and the masses can they make themselves public servants who are wholeheartedly rendering services to the people.

PARTY EDUCATION STRESSED AT BEIJING TEACHERS COLLEGE

Beijing BEIJING RIBAO in Chinese 21 Jul 80 p 2

[Article: "Teachers' College Party Committee Purposefully Carries Out Party Lecture Education"]

[Text] The party committee of Beijing Teachers College has proceeded from actual conditions, made its overall planning and arrangements, taken party lecture education as the main means, and again educated party members to raise their level of Marxism-Leninism.

Recently, at various levels arranged for more documents than usual for study in the party. The party committee of the Teachers College proceeded from actual conditions, took party lecture education as the main means, set down special topics separately, culled the relevant sections from all the documents and assembled them according to the special topics for study and discussion, and solved practical problems within the party in a planned way by aiming at these problems. This way of doing things has produced fairly good results and has been well received by the broad party members.

As an initial step, they stipulated eight special topics of party lecture education, namely: 1. "How To Be a Qualified Communist"; 2. "The Nature and Task of the Party"; 3. "Marxism-Leninism and Mao Zedong Thought Constitute the Guiding Thought of Our Party"; 4. "Communists Should Uphold the Centralized Unity of the Party and Strictly Observe Party Discipline"; 5. "Communists Should Set Themselves as Examples of Stability and Unity"; 6. "Communists Should Firmly Establish the World Outlook of Dialectical Materialism, and Follow the Line of Awareness and the Line of Work by Seeking Truth From Facts and by Proceeding From Actual Conditions in All Matters"; 7. "Communists Should Serve the People Heart and Soul"; and 8. "Communists Should Set Themselves as Examples of Criticism and Self-Criticism." They have adopted as basic teaching materials the Communique of the Fifth Plenary Session of the 11th Party Central Committee, the "Guiding Principles for Inner-Party Political Life," the "Draft of the Revised Party Constitution," "Fundamental Knowledge About the Party," Comrade Deng Xiaoping's "Current Situation and Tasks," and Comrade Liu Shaoqi's "On the Self-Cultivation of a Communist." In party lecture education, it is necessary not only to explain systematically the fundamental knowledge about the party but also to apply theory to reality, to integrate organically the study of fundamental knowledge about the party with the transformation of one's world outlook, and in particular to solve such problems as straightening out the ideological line, strengthening one's sense of responsibility to the party, strengthening organizational discipline, and playing the exemplary vanguard role of a communist. After the party lecture, a discussion is conducted as a regular activity of the party in connection with the people's actual thinking. For instance, on the topic of "How To Be a Qualified Communist," the lecture deals with the party's program and with the qualifications for being a communist. In connection with people's actual thinking, the discussion touches upon individualist thinking as exposed in the evaluation of one's work and wages, teaches party members to develop the spirit of seeking neither fame nor gain and to be first to bear hardships and the last to enjoy comforts, and commends party members who have expressed themselves well. When there is a contradiction between private interests and the interests of the party and state, members are required to serve unconditionally the interests of the party and state. In carrying out regular party activities, the party members are guided to discuss such questions as: "How far do you lag behind the requirements of the party?" "What have you done to manage relations between the interests of the party, the state, the collective and the individuals?" and "How do you explain that the interests of the party are above everything?" From the study and discussion, they come to understand what they must do before they can become a qualified communist.

In the past 3 months they have held three party lecture sessions. Through party lecture education, the broad party members have intensified their party spirit, and there have appeared a number of party members who have played their exemplary role fairly well. The party committee at the college has also trained cadres who are members of the party, and has successively run three study terms for training party branch secretaries in rotation. In the present term, cadres at the party branch secretary level have basically completed their rotational training. The committee has even set up a "study day" system, whereby the secretaries and members of the party general branch committee get together once a week to study the "guiding principles" and other documents, to elevate their Marxist-Leninist theoretical level and administrative ability, and to further improve and strengthen the leadership of the party.

'FOOLHARDY PRACTICES' SAID DETRIMENTAL TO PRODUCTION SAFETY

Beijing GONGREN RIBAO in Chinese 2 Jul 80 p 1

[Editorial: "Respect Science and Oppose Foolhardy Practice"]

[Text] Serious accidents, numerous casualties, and great economic damage and loss are a prominent problem at present in industrial production. Many things account for such occurrences; however, having no respect for science and believing only in foolhardy practice constitute one of the important reasons for the accidents.

The explosion of a boiler in the Shaoyang Municipal Standard Weights and Measures Factory, Hunan Province, reported in our paper today, was the result of foolhardy practice. However, some people just wouldn't learn a lesson and insisted on saying: "By relying upon foolhardy practice we worked our way out." Though such arguments came from the mouths of only few cadres, an analysis of a large number of accidents reveals that there is no lack of such cadres with this kind of thinking. This kind of thinking is very harmful. Now is the time to stop foolhardy practice.

What is foolhardy practice? It means not paying attention to science and not acting in accordance with objective laws. Objective laws are independent of man's will. Whoever goes against them not only cannot attain his subjectively desired goal but will be punished. Speaking about the boiler, those who have some common technical knowledge understand that there is steam pressure inside a boiler, so that it must be strong enough to withstand this pressure. No matter who goes against this law, the boiler will explode. However, some of our comrades who haven't got the least bit of technical knowledge themselves refused to listen to the opinion of the workers and the technicians, even refused to obey the warnings and restrictions of the government departments concerned, and persisted in their foolhardy practice. Some comrades, having received high quotas from the higher level, did not report the real situation or give their own views by seeking truth from facts, tried obediently to fulfill [the quotas], persisted in risking the equipment and the workers' health, even took no heed of the labor policy of our Communist Party and socialism, exposed the workers to the danger of death, and still considered themselves courageous. After the smashing of the "gang of four," under the repeated instructions of the Party Central Committee and the State Council, many comrades have begun to pay serious attention to production safety. Nevertheless, there are still those who have not yet overcome the evil influence of the ultraleft thinking spread by the "gang of four" on the industrial front, and who still wrongly believe that their present achievements came from foolhardy practice. As a matter of fact, whatever relies on foolhardy practice can never gain success. Sometimes it may gain a temporary success, but it cannot last long; sooner or later it will flop. Vigor is necessary, but foolhardy practice without paying attention to science is sheer stupidity and should not be repeated. Severely criticizing the subjectivism of not acting according to objective laws, Comrade Mao Zedong pointed out: "Such subjective methods, which oppose science and Marxism-Leninism, are the great enemy of the Communist Party, of the working class, of the people, and of the nation, and are a sign of an impure party spirit. A formidable enemy stands before us, and we must topple him.

In industrial production, where is the line of demarcation between foolhardy practice and otherwise? A very important point is seeing whether or not you are carrying out strictly the policies and regulations on safety in production and civilized production. From practical production over a long period of time, people have accumulated a rich experience which is summed up and improved to form a set of rules and regulations to be used for the guidance of production activities. These rules and regulations have not come easily; some of them have been paid for with blood. They represent the people's knowledge of objective laws at the present stage. We should cherish them dearly and follow them. They tell us what is right and what is wrong in doing things, and what is prohibited. An analysis of the large number of accidents shows that most of these accidents could have been avoided entirely; 70 to 80 percent of them were caused by operations and orders in violation of rules and regulations. We must educate the broad cadres and workers in observing rules and discipline, and resolutely put an end to giving orders and working against rules and regulations. Of course, rules and regulations are not always hard and fast. They will continually be perfected with the continuous accumulation of people's experience in production and the further progress of science and technology.

In actual practice, some leaders considered foolhardy cadres "praiseworthy" and "likable." Accidents and deaths caused by foolhardy actions were not investigated. Sometimes, these cases ended up with nothing definite and were not duly dealt with according to law; major cases were dealt with as if they were minor offenses, and guilty persons not only received no punishment but were even promoted to more responsible jobs. This is a very wrong tendency. It should be pointed out that foolhardy cadres cannot be considered good cadres. They are unable to accomplish anything but are liable to spoil everything. If our comrades are content to be permanently laymen and persist in acting blindly, they will make things worse. In his speech at the celebration of the 30th anniversary of National Day, Comrade Ye Jianying pointed out: "Our cadres, and especially the leading cadres at all levels, must strive to acquire the necessary scientific knowledge and skill. It is impossible to give competent leadership to efforts at modernization if one does not study hard and acquire scientific knowledge."

To carry out the four modernizations successfully and help the broad workers sustain their enthusiasm continuously and fully, we must attach great importance to this subject of safety in production and civilized production, and should not continue to ignore it. Those bureaucrats who persist in acting blindly and cause serious accidents with heavy casualties must be investigated seriously. Those who have caused casualties and serious damage and violated criminal laws must be punished by law, without any tolerance. The trade union must resolutely defend the rights of workers for safety in production and civilized production, and they must learn to use law as the weapon in the struggle against the serious phenomenon of ignoring the safety and health of workers in the course of production. Meanwhile, it is necessary to strengthen propaganda and education, know how to mobilize the masses, conduct mass activities for supervision of safety, organize the masses to put forward rational suggestions for labor protection, help the enterprise administrations to adopt the necessary measures for technical organization, and fundamentally improve working conditions.

Let us replace foolhardy practice with scientific knowledge, enhance our consciousness, reduce blindness, and enable the workers, under conditions of safety in production and civilized production, to work happily in body and mind for the four modernizations of our motherland!

DISMISSED PARTY CADRE CRITICIZED AT MASS MEETING

Beijing GONGRAN RIBAO in Chinese 19 Jul 80 p 1

[Article: "Tangshan Municipal Party Committee Deals Severely With Guo Huichuan's Mistake of Pampering His Son"]

[Text] Comrade Guo Huichuan [6753 1920 1557], deputy secretary of the Discipline Inspection Committee of the Tangshan Municipal Party Committee, trying to shield his son who had committed serious mistakes, had the impudence to take advantage of his position and power and carried out certain irregular activities in the party. In this case, a few leading cadres of Tangshan Municipality disregarded party principles and acted as "bureaucrats shielding one another." After our paper reported the case on 18 June, it immediately drew the serious attention of various quarters. To strictly enforce party discipline, the Tangshan Municipal Party Committee made the decision, with the approval of the Hebei Provincial Party Committee, to dismiss Guo Huichuan from his position as deputy secretary of the Municipal Discipline Inspection Committee, and to give a disciplinary warning within the party to comrades Mo Geng [1075 5087], second secretary of the Municipal Discipline Inspection Committee, and Ren Gujian [0117 6253 0256], vice chairman of the Municipal Revolutionary Committee.

On 17 July, HEBEI RIBAO prominently featured on its first page the decision of the Tangshan Municipal Party Committee and a report by the Tangshan Municipal joint Investigation Group on the mistakes of Comrade Guo Huichuan in pampering his son and of some leading cadres of Tangshan Municipality in acting in collaboration to persecute the family of a girl, and it explained in detail the facts of this case. HEBEI RIBAO also published an editorial under the title "Learn a Lesson From the Case of Guo Huichuan, Who Pampered His Son and Undermined Party Style." The editorial pointed out that Comrade Guo Huichuan, in his capacity as deputy secretary of the Discipline Inspection Committee of the Tangshan Municipal Party Committee, shielded his son who had made mistakes, and also persecuted the family of a girl. Of course, this was a distinct mistake which the party discipline could not tolerate. If such acts in violation of the rules and constitution of the party are not severely dealt with, how can we enforce party discipline?: How can we assuage popular indignation and convince the people?: The Provincial Party

Committee approved the decision of the Tangshan Municipal Party Committee to deal severely with Guo Huichuan and other comrades. This reflects the determination of our party to resolutely enforce the "Guiding Principles for Inner-Party Political Life" and restore and further develop the fine traditions and style of the party, which will receive the support of all party members and the broad cadres and masses. The editorial also pointed out that the idea of "being well-matched in social and economic status" for children's marriage exposed Comrade Guo Huichuan's serious feudal mentality of special privileges.... If a responsible cadre in charge of the work of inspection of party discipline still maintained such feudal ideas of special privilege, how could he wage a firm struggle against the style of seeking special privileges and all unhealthy trends and evil practices? It was entirely necessary for the Tangshan Municipal Party Committee to dismiss him from all his posts on the Discipline Inspection Committee. It was an education for Comrade Guo Huichuan, and it is also an education for all comrades who are still contaminated by the feudal ideas of special privilege.

To combat the bad influence, the Tangshan Municipal Party Committee also decided to hold a mass meeting at the Huaxin textile mill and to instruct comrades Guo Huichuan, Mo Geng, and Gujian to criticize themselves at the meeting and listen to the criticism and advice of the broad staff members and workers of the Huaxin textile mill. At the meeting [the Municipal Party Committee] will announce the decision for dealing with Guo Huichuan and other comrades and, at the same time, commend the cadres and staff members and workers of the party committee and youth league committee of the Huaxin textile mill and the public security branch office of Lubei Ward who had struggled against the mistakes committed by Guo Huichuan and other comrades.

SHANDONG PUTS CIVIL DEFENSE PROJECTS TO PEACETIME USE

Civil Air Defense

Jinan DAZHONG RIBAO in Chinese 16 Aug 80 p 1

[Article by Wang Jiyuan [3769 7139 6678]: "Many Units in Our Province Carry Out a Policy of Integrating Peacetime and Wartime Needs in Building Civil Air Defense Projects In Order To Serve Both Production and Life"]

[Text] Since the beginning of this year, many units in our province have carried out the policy of integrating peacetime and wartime needs in building civil air defense projects, making use of those already completed for the construction of the four modernizations and for service to the people's life. This policy has been fairly effective.

There are many advantages to using idle, unused civil air defense projects and facilities for production sites, warehouses, restaurants, inns, and places of culture and recreation, thus integrating peacetime and wartime needs. 1. It alleviates the difficulty of insufficient production sites in the city. In the past, vegetable shops in the Dongfeng Market of Qingdao, because there were no other sites, normally piled up their vegetables at the sides of streets, a practice which not only led to losses from mildew but also adversely affected the city's appearance and hygiene, and the shop owners were fined many times. Since the beginning of this year, the shop owners have stored their vegetables in nearby underground projects, thereby reducing their losses and increasing their income. 2. It can both develop production and increase the income of the units concerned and provide amenities for the life of the masses. In the past, workers of the printing and dyeing mill in the western suburb of Jining City found it somewhat difficult to attend motion picture theaters.

After they transformed a civil air defense project into a theater, 230 films were shown in it from January to June, bringing in an income of over 200,000 yuan. Yanzhou County utilizes underground projects for the cultivation of mushrooms, edible fungi, and glossy ganoderma. It has already produced 700 jin of mushrooms, and the edible fungi and glossy ganoderma are growing well. 3. It is of advantage in finding employment for youths waiting for jobs. The neighborhood committees of Yantai City utilizes an underground civil air defense project as a restaurant that is not only convenient for the masses but also provides employment for 24 persons. 4. It is of advantage in preventing heatstroke and lowering temperatures. Over 40 units in Jinan City use the cold air in tunnels to prevent heatstroke and lower temperatures, and this is especially pleasant in cinemas and theaters. 5. It is useful in solving the difficult problem of obtaining accomodations. In the past, relatives and people who had come from far away to see patients in the People's Hospital of Jinan had no place to stay. A nearby civil air defense project in the southern part of the city was made into an underground inn, thereby solving the masses' difficulty. 6. It is of advantage in protecting and operating civil air defense projects as they can be rapidly switched to wartime use.

Short Commentary

Jinan DAZHONG RIBAO in Chinese 16 Aug 80 p 1

[Short commentary: "Integrating Peacetime and Wartime Needs Benefits State and People"]

[Text] The construction of civil air defense projects is an important strategic measure. The Third National Conference on Civil Air Defense clearly stipulated that a policy of integrating wartime and peacetime needs must be carried out in the construction of civil air defense projects. This policy reflects the strategic requirements while constructing the four modernizations and serving the people's life. It integrates long-term interests with current interests. It is a correct policy.

Since the beginning of last year, our province has gradually shifted the focal point of its construction of civil air defense projects to reinforcing and rebuilding by complete sets those projects that have already been built, thereby putting into use a number of projects that integrate peacetime and wartime needs. Practice proves that the policy of integrating peacetime and wartime needs in building civil air defense projects can be a good investment that reduces state expenditure, creates wealth, and helps the four modernizations. Using the projects for peacetime needs promotes the protection and operation of civil air defense projects, puts them in an excellent state for preparation against war, and benefits air defense in wartime.

In carrying out the policy of integrating wartime and peacetime needs, at present we stress the finding of good solutions to the following problems. First, the party and government leadership at all levels and the departments concerned must fully recognize the advantages and import signifiance of this integration and link it to the actual conditions in their units, taking positive measures and utilizing projects that have already been built. If a project can be used the year around, then vigorously create conditions for its year-around use; if it cannot, then use it on a seasonal basis. Some projects can be used by an individual, others by a group. Some can be used by a single household, others by several households jointly. We must seek truth from facts, adapt to local conditions, and not insist on uniformity. We must take measures for ventilation, illumination, dampproofing, dehumidification, heating, soundproofing, as well as level distribution, exits and entrances for personnel, and the hoisting of materials to the surface. Under the premise of insuring wartime requirements, we must strive hard to meet the individual and technological requirements of peacetime. Third, we must solve problems in the policy concerning the supply of goods, tax revenue, profit distribution, electricity charges, and the labor insurance and welfare of underground working personnel with regard to the funds invested and the management items involved in integrating peacetime and wartime needs. Only when these problems have been solved with the policy truly have been carried out.

EXPERT DEVISES LAND MINE FOR USE AGAINST INFANTRY, PARATROOPERS

Jinan DAZHONG RIBAO in Chinese 11 Aug 80 p 3

[Article: "Achievements of Zhang Shuxin, Deputy Head of Armed Forces Department of Zhanghu Commune, in Land Mine Demolition Research"]

[Text] Zhang Shuxin, [1728 2579 0207], deputy head of the armed forces department of Zhanglu commune, has contributed to the carrying on and development of traditional land mine warfare and has become a land mine demolition expert on the northwest plateau of Shandong Province.

Confronting the special features of a future war, Zhang Shuxin resolved to develop a directional steel fragmentation mine for use against both infantry and paratroopers in order to meet the requirements of these features. A directional explosion involves explosives, mine casing manufacture and detonating device. For Zhang Shuxin, who only had a junior middle school education, this task was very difficult. However, being a man with lofty ambitions and high ideals, he knew no difficulty could stop him. In the daytime he did his normal work at the armed forces department and in the evening he tried to find time for study. To get a good grasp of the principles of explosives, he diligently studied senior middle school textbooks on physics and chemistry. He studied and researched some materials on land mine demolition put out by our country and by America, England, France, Japan, and the Soviet Union. In this way, after not a very long period of time, he got an initial grip on the basic principles and dynamics of explosives.

As his theoretical knowledge became richer, Zhang Shuxin quickened the pace in developing a directional mine. He thought long and hard about the ideal type of mine casing: If one wants the steel fragments to fly in a certain direction, then the mine casing must be concave; if one wants a powerful land mine, then there must be a large explosive charge; if one wants a mine that is convenient to carry, then it must be light and small. In theory, the concave-shaped hollow must be two-thirds higher than the explosive charge. How could this be done in a volume that was not large? One day he got an inspiration from the wooden comb his wife used for her hair: wouldn't the problem be solved if the mine casing were shaped like a comb? He immediately drew a sketch of the mine casing based on this idea. Afterward he began intensive calculations on the concave geometrical shape, the size and external form of the explosive charge, the optimum size of the mine casing, and the trajectory of the steel fragments. During those days, the light in his office burned deep into the night. Comrades in the department and his wife also threw themselves into the battle. Once, when doing calculations on some data, from 4 am until 1 am he sat beside a pot of water resting on a stove in which the water completely boiled away without his being aware of it. With hard work by everybody, the ideal mine casing was finally made. On its first test, the mine exploded with the force and in the direction desired. Zhang Shuxin was as happy as if he had just eaten ice cream during the hot dog-days of summer. He almost jumped for joy, the fatigue from many days of study and work being completely swept away.

His confidence was strengthened; the direction of the mine's blast had been attained. The next step was to solve the problem of the steel fragments being thrown out in a line that made them deviate from the target. That very night he began to work on this problem. Piling his desk high with books and materials on the subject, he conscientiously leafed through them one by one in search of the ideal answer. He finally found (among one of them) a basis for a solution to the problem. Briefly it was this: the detonator must be positioned in the exact middle of the mine casing's concave surface. For him, it was as if a window had been opened in his mind. "Ah, so there is also research on the positioning of the detonator." He asked himself: But why must the detonator be positioned in the exact center of the concave surface? He again became lost in thought, to the extent that sometimes, while out walking he ran into walls or trees. When it was time to eat, he failed to hear his wife call him to the table. Once, in order to get him to eat, she gave him a pat. To her surprise, he became angry and said she had interrupted his train of thought. This concentration made him seem like a person suffering from amnesia. He studied the structural principals of detonators and the relationship between the high-pressure density capacity flow and the detonating capacity. Finally, he fully understood these questions from a theoretical standpoint. The next test explosion achieved the ideal results--a directional steel fragmentation mine for use against both infantry and paratroopers had been successfully developed.

Any ordinary militiaman can install and use this mine. Simple in structure, it is easy to make. It weighs only 3.5 kilograms and costs less than 6 yuan to make. Its maximum range is 240 meters, and it can inflict casualties in a 40-meter zone. It has the power of a volley fired by 1,000 rifles! If several of the mines are laid in a row, an important line of communications can be blocked while casualties can be inflicted on enemy paratroopers.

From first to last, Zhang Shuxin had studied more detonation with his eyes fixed on opposing a future war of aggression, bearing in mind the actual capabilities of militiamen. This was apparent in that he had devised a directional mine for use not only against both the enemy's infantry and his paratroopers but also against his tanks, thereby integrating the traditional and the modern, integrating attacking, blasting, and blocking. The mine can blast out an antitank ditch in order to hold back a tank advance. He chose the method of setting off mines by a pressure and tripping device, in accordance with the principle used in the rural areas in the past of erecting a line of spears to defend against robbers, and succeeded in devising a pressure and tripping detonating device that could fire rocket projectiles at tanks. An enemy tank had only to pass by to have its tortise shell pierced. In order to cope with the complexities of modern warfare, he devised eight new methods for lighting the basting fuse. His improved fuse can be used interchangeably in all kinds of land mines. Under Zhang Shuxin's careful instructions, the members of the commune's militia squad or platoon [fendui 0433 7130] charged with the mission of blowing up tanks can now handle explosives, fuses, electric detonators, and lanyard detonators, and can make and use them by local methods. They can direct the mine's blast into the sky and in any direction they want, and can blast out antitank ditches.

No theoretical question can daunt people who have once cruised in the sea of knowledge. Not long ago, Zhang Shuxin began to assiduously study radio technology, and he has now devised a scheme for remote-control detonation that is in the implementation stage. In line with requirements, this major innovation when applied in actual battle has an effective range of 5 kilometers, and can hit 500 targets. It is a big breakthrough in land mine detonation. Zhang Shuxin is now racing along without pause on the road of mine detonation research, selflessly contributing his intelligence and wisdom to the modernization of our motherland's national defense.

SAFETY MEASURES NOTED FOR MILITIAMEN THROWING LIVE GRENADES

Jinan DAZHONG RIBAO in Chinese 11 Aug 80 p 3

[Article by Qu Bingtai [1448 3056 3141]: "Do Careful Work To Prevent Mishaps in Grenade Throwing"]

> [Text] [Editor's Note] Mishaps are a frequent occurence when militiamen throw live hand grenades. To effectively prevent this kind of mishap is an important problem for our people's armed cadres. At present, however, some units have their militiamen throw live grenades in reservoirs, ponds, or ravines in order to prevent accidents. This is a passive method, and there remains the hidden danger that the grenade thrown was a dud [yadan 0800 1734]. Other units, fearing mishaps, simply do not allow militiamen to throw live grenades. Isn't this like "giving up eating for fear of choking?!"
>
> In battle, grenades are an indispensable weapon. How can safety be insured while obtaining the benefits of grenade training? It is profitable to read what Comrade Qu Bingtai has learned from experience.

When militiamen throw live grenades, there are many reasons for mishaps. One very important reason is loss of control when throwing the grenade.

I first became head of the commune's armed forces department in 1958. For over 20 years I have organized more than 100 live grenade-throwing exercises for militiamen without a single mishap. From practice I have seen that militiamen who throw grenades, especially those who do so for the first time, are full of anxiety and become flustered from stage fright. Why? The main reason is that they lack elementary knowledge. They have insufficient understanding of the function and structure of hand grenades and are afraid to throw live ones. Some, because it is their first time, do not have practical experience and are timorous. If their problems are not solved and the subject of throwing live grenades is allowed to weigh upon their minds, they will forget to pull the pin, not throw the grenade far enough, or drop it at their feet or behind their backs, thus causing a mishap. This being the case, how can we help these millitiamen get rid of their worries? I feel it is necessary to do the following things.

The first thing to do is to educate the militiamen to have the confidence that they will be victorious in battle if they are courageous and to throw grenades in line with the enemy's situation. During peacetime training, when militiamen are being mobilized for live grenade throwing, we must make clear to them that the grenade-throwing field is a battlefield and that if the grenade is not thrown far enough or accurately enough, then they cannot wipe out the enemy but, on the contrary, will be hurt by him. They must be filled with the spirit of vanquishing the enemy and throw live grenades. At the end of April this year, a militiawoman of the country's refrigeration plant on two occasions would not throw live grenades. We talked privately with her, linking the training to the Vietnamese bandits' crime of raiding China's border and thus stimulating her to train against this enemy. On the third occasion she successfully completed here assignment. The second thing to do is to explain the function and structure of a hand grenade so as to give the militiamen a good idea of what is safe and what isn't. In this way, they will concentrate on their movements when throwing grenades, maintain the initiative, and not become flurried. The third thing to do is to hold dry runs and set examples. Before training with live grenades, the militiamen should practice dry runs in order to give themselves a better grasp of the essentials involved in grenade throwing and help the individual correct his posture. When practicing with live grenades, the old and new hands who have become adept should throw first and thus set an example for everyone else. This will help those who are throwing for the first time to relax and be unafraid. With regard to those militiamen who are full of misgivings, we must not impatiently organize grenade-throwing exercises for them but, in addition to educating them, let them watch the exercises and, only after they have calmed down, have them practice throwing grenades. In the first half of this year, we organized over 120 militiamen to throw live grenades--and for the great majority of them it was their first time--without a single mishap.

In addition, the commander, when organizing live grenade throwing, besides being steady and full of concentration in order to set an example for everyone else, must educate the others and, when giving orders, must especially see that his manner is polite and calm in order to avoid, because of his stiffness in manner, making the militiamen more nervous. At the same time, we must constantly fix our eyes on every movement of the militiamen and protect the individual in order to prevent the chance mishap.

SECOND XINJIANG ISLAMIC CONGRESS HELD IN URUMQI

Hong Kong ZHONGGUO XINWEN in Chinese 7 Jul 80 p 13

[Article: "Second Xinjiang Islamic Congress Held in Urumqi"]

[Text] The second Islamic Congress of the Xinjiang Uygur Autonomous Region was held recently in Urumqi. The well-known Imam (religious head) of the Kashiaitika Mosque, Hashimu Hariaji recited verses from the Koran at the opening. Some of the Muslims said happily: reciting the Koran and using religious language at a solemn meeting like this could not even have been imagined a few years ago.

Xinjiang is one of the primary areas inhabited by Chinese Muslims. There were more than 180 well-known Islamic personages and Muslim representatives of the nine Uighur, Kazakh, [Chinese] Moslem, Khalkas, Tajik, Tatar, Uzbek, Dongxiang [Gansu], and Salar nationalities in attendance at the Islamic congress. Of these, the Moslem representatives of the Dongxiang and Salar nationalities were attending an Islamic congress for the first time.

The week-long conference carried on the spirit of the Fourth Chinese Islamic Congress, and after discussion, passed the "General Regulations for the Xinjiang Uygur Autonomous Region Islamic Association;" the conference also elected the leading organ for the association's second committee.

The newly-elected chairman Yahefudamaola Shadeeraji [3660 0677 3940 1129 3029 2139 3097 1779 1422 7093 0679] and Vice Chairman Amutidamaola [7093 2606 2251 1129 3029 2139] said: The Xinjiang Islamic Association will assist the government in implementing its policy of religious freedom, will promote peace and unity, develop the Islamic tradition that one who loves his religion must love his country, and will unite Islamic people and Muslims of various nationalities for the sake of our country's four modernizations, to protect the unity of our country and the unification of our nationalities, to struggle against hegemonism, and to preserve world peace.

The Chinese Islamic Association sent a congratulatory wire to the conference.

MORE PRACTICAL WORK NEEDED IN ENGINEERING EDUCATION

Beijing GUANGMING RIBAO in Chinese 26 Aug 80 p 2

[Article by Sun Zongqi [1327 1350 7322]: "The Practical Side of Higher Education in Engineering Needs Strengthening"]

[Text] I was formerly a mineral prospecting instructor in the Geology Department at the Zhongnan College of Metallurgy. I am now pursuing further studies in Sweden. Although I am living abroad, I make it a practice to read about discussions on education published in newspapers in China. I would like to express some views on the subject, in the light of the situation as it exists in foreign countries.

It is easy to see certain outstanding differences when we compare our institutions of higher learning with those in foreign countries. First, the ratio between teachers and students is larger in foreign countries. Whereas the ratio ranges from 1 to 12 and 1 to 20 in foreign countries, it is 1 to 4.1 in our country. Secondly, whereas most of our college graduates are not capable of taking a job assignment immediately after graduation, most college graduates in foreign countries are better qualified. When they engage in practical work after graduation, most of them are capable of working independently. For instance, while doing practical work following graduation, college students in Sweden are quite capable of undertaking scientific research work in mining offered them by factories and mining operations. From this it can be seen that, in our country, while a larger staff is engaged in higher education, the rate of efficiency is lower. This, of course, has something to do with the basic education system in our middle and primary schools.

I would like, however, to confine myself to a discussion of the problem concerning higher education in engineering. First, it is important to correctly identify the problem facing engineering colleges. My opinion is that it is a problem of industrial production. By that, I mean we must develop the students to the point that, as engineers, they are able to handle basic production problems. To make that possible, it is necessary to achieve a nice balance between theory and practice. During the "Great Cultural Revolution," we made the mistake of overlooking the importance of theory. At the present time, however, my opinion is that sufficient importance has not been placed on the other side of the coin--namely, practical work. This has had a deleterious effect on the ability of students to apply what they have learned, on their ability to undertake work of a practical nature, and on their ability to work independently.

The importance of practical work stems from the fact that our understanding is bolstered by our perceptions. It is only through practical experience that we can come to a deeper understanding of theory. While the hours for classroom instruction are fewer in foreign countries, more hours are devoted to experiments and practical work. According to a Chinese student studying in Sweden, when he was teaching microelectronics in China, only 8 out of 80 or 90 schoolhours were devoted to experiments, where as in Sweden, out of 84 schoolhours in the same course, 30 hours are devoted to classroom lectures, 24 to experiments, and 30 to exercises.

It is a onesided argument to claim that it is necessary to increase the number of hours of classroom lectures so that students will better understand basic theory. For instance, in the early 1960's, because students were lagging so far behind in their special courses, it was necessary for teachers not only to take time in the classroom to teach them production procedures, but even to teach them the names of tools and equipment and their uses. Later, we moved the schedule of practical work in production ahead of classroom lectures, increased substantially the number of hours devoted to practical work, and reduced the number of hours for classroom lectures. The result was that the students were found to be more capable of retaining and applying what they had learned.

Most students who are enrolled in special engineering courses are required to have some knowledge of mechanics, electrical engineering, electronics and hydrodynamics (osmotic pressure), etc. Although many hours are devoted to such subjects, the ability of the students to apply what they have learned is rather limited. That is due to the fact that, although we also have classes for conducting experiments, not enough hours are set aside for homework outside the classroom to give the students an opportunity to solve certain basic problems in the laboratory after class. The senior middle school graduates enrolled in colleges are ill equipped to tackle their special courses. That being the case, it is essential for the students to have the opportunity to engage in practical work in production. Incidentally, in the formulation of our teaching policy, the schools should be given a larger degree of autonomy. Hundreds of special courses are taught in the colleges, and since each has its own special features, they must not be subjected to the same uniform treatment. Furthermore, many special courses have been taught for decades. To allow the colleges to make decisions on the basis of their own experience would make it possible to come up with solutions more suitable to our circumstances.

The problem of providing practical work in production has been one of long standing. Even now, a solution has not been found. Every year, institutions of higher learning have had to assign large numbers of students to receive practical training in selected production areas. Even after the students have been assigned, what they get is an opportunity to observe production at work but not really to take part in actual practical production work. This is most detrimental to the development of the students. The system is entirely different in foreign countries. When it comes to practical production, foreign students are given certain responsibilities in a specific line of work. The junior students are assigned simple duties, while the senior students are given heavier responsibilities usually assumed by team leaders.

Before they return to school, they are required to have a certificate signed by the chief engineer of the mining company, together with a report on their practical work. Practical training along such lines goes a long way toward qualifying them to take on jobs immediately after their graduation. I suggest, therefore, that the government make it a rule for students to do practical work in the plants, and make every industrial and mining enterprise assume that noble responsibility.

Overemphasis on basic theory also retards the development of graduate students. Many of our universities stipulate that research students should spend 1 to 2 years in basic studies and in studying basic technology and special courses, and that after the 2-year period they are then to engage in scientific research. Is it possible to achieve outstanding results when so little time is devoted to scientific research? Although research students in foreign countries also have to study certain courses, they are mainly left to study on their own instead of having to attend lectures. More important still, they are given time to engage in scientific research. After the first 6 months, research students begin to engage in scientific research, which constitutes two-thirds of the total credits which they are required to complete. During the period of research, many of them have proved quite capable of doing good work in scientific research.

As to the proper ratio between theory and experiments, experience offers the best answer. The ratio should be determined by an examination, study, and analysis of the results of the teaching experience. I take the view that it is not possible to achieve a firm grasp of theory if emphasis is arbitrarily placed on theory at the expanse of experimentation.

The problem of achieving a proper balance between theory and practical experience--a problem which plagues our institutions of higher learning in the field of engineering--is attributable to a lack of actual experience on the part of our teachers and to their limited ability to solve actual problems. I myself am not an exception. When discussing this problem, we teachers undergoing graduate studies in Sweden are agreed that certain experimental classes conducted in Sweden cannot be held in our country. First, we do not have the necessary facilities. Secondly, our teachers do not have the experience to conduct such classes. We are not able to produce the problems and exercises, because our teachers have no practical experience in this area.

The only way to turn the situation around is for us to encourage large numbers of teachers to engage in scientific research by giving them the time and money to do so. It is obvious that not many college teachers can be spared from their duties so that they may engage in full-time scientific research. A better way is for teachers to teach and do scientific research at the same time. In our Mining Engineering Research Unit in the Geology Department, it has long been the practice for teachers of special courses to teach and engage in scientific research at the same time. This is not only conducive to the accumulation of knowledge and progress in scientific research, but it also helps to raise the quality and quantity of teaching. Most of the research subjects in engineering colleges should be related to the problem of production. The idea is for the production units to suggest subjects for research, and to sign contracts with the colleges and universities to undertake such research projects. This will not only solve the problem of expenses, but it will also help to increase production and will enable the teachers to help improve the students' ability to analyze various problems related to production.

REFORM OF SYSTEM IN INSTITUTE OF HIGHER LEARNING URGED

Beijing BEIJING RIBAO in Chinese 21 Aug 80 p 2

[Article: by Wei Chang [4850 2490]: "The System of Teaching in Institutes of Higher Learning Should be Reformed"]

[Text] An extremely important problem facing us today is the fact that burdens borne by students in our institutes of higher learning are too heavy; they are killing themselves with study, but the scope of what they are learning is too narrow. A great many specialists and professors are very worried about this, and a number of well-known foreign scholars have also candidly drawn attention to it. It is commonly recognized that if this is allowed to go on much longer, it will be extremely difficult to train first class scientists, engineers and technicians with creative spirit, and it will also have a directly adverse effect on the development of our science and technology and the realization of the Four Modernizations. There are many aspects to the causes which produced this situation, things intimately involved with the current educational system.

The current educational system of our institutes of higher education is based on the academic year, and it prescribes fixed limitations on years of study. Students are organized according to yearly classes, study an identical curriculum, and the institutes involved use the "year" as the only standard to handle questions of student status. While it cannot be denied that this system contains certain advantages, for example, in planning it is relatively strong, nevertheless it also has disadvantages, the most significant of which are that it is a detriment to training outstanding talent, to promoting the growth of the new frontier disciplines and to opening new avenues for people of ability. The aspirations of individual students, their special aptitudes, capabilities, level of knowledge and prospects for training are, of course, not identical. This educational system is incapable of arranging different educational plans for the diverse range of students. It is prone to cause an artifical evening-up where a minority goes without enough to eat and perhaps drops out, and the majority bears excessive burdens. Students who can do more than just handle their required courses cannot, on the basis of their own preferences and special skills, freely select in a comparatively extensive fashion from a range of lectures. In particular, they cannot cross over to another department or discipline to select courses, and so it is difficult for them to give full play to their special skills and to develop multifaceted interests, and thus meet the requirements necessary for the advancement of the frontier disciplines. Under this system, if one is not able to graduate on time, at the very least it will mean the delay of an entire year, and if one wants to gain advanced standing it can only be to the next year's class. No matter how well one is learning, he cannot graduate early and take the entrance examinations for graduate school; this virtually means that he will have wasted his time and energy.

The academic year system of instruction has its origin in the system of academic instruction arranged in grades and classes which appeared in the sixteenth and seventeenth centuries. At that time, along with the development of capitalism, individual instruction in the feudal society was no longer able to meet current needs, and the academic year system was gradually adopted by countries in Europe and, step by step, reached its final form. However, by the end of the nineteenth century with the expansion of monopoly capitalism and the sudden emergence of large-scale industrialization, there was an urgent need for an accelerating development of science and technology and a massive training of all sorts of specialists; this resulted in demands being made upon university education to adopt a more effective system. At the same time, certain educationalists in America began to promote pilot schemes of elective courses and a system based on academic credits, which were quickly implemented in all their universities. Shortly after that, universities in Western Europe and in Japan began to adopt the academic credit system one after the other. This indicates that whatever form an educational system might take it always does so in response to definite historical conditions, and always is the result of changes stemming from developments in society and in production.

Prior to liberation, our institutes of higher learning emulated American universities and had commonly adopted the academic credit system, but after liberation we modeled ourselves on the experience of the Soviet Union, stopped using the academic credit system entirely and adopted the academic year system. In the last 30 years our institutes of higher learning have practiced this system and have accomplished great thing in training talents. However, we must also recognize that in this same 30 years we have failed as far as nourishing topnotch talent is concerned, the growth of the new frontier sciences has been retarded and there has not been sufficiently broad range of routes which would allow the full realization of human talent. We must confront these issues squarely and conscientiously study and reform the current educational system.

In the last two years there already have been a small number of institutes of higher learning which have begun to make attempts to reform the academic year system and to try out an academic credit system. An academic credit system is an educational system which uses credits as a means of reflecting academic standing, requirements and a way to calculate amounts of study accomplished. It does not prescribe study in terms of yearly restrictions but merely prescribes the total number of credits one must take in each semester and the total number of credits necessary to complete a major. When a student completes all his credits, he then can graduate. The calculation of each academic credit is based upon the total amount of time expended upon the course involved, either inside class or out (including lectures, classroom discussion, experimentation, field training and preparation of lessons). Usually, if one course meets for one hour per week, the student prepares for it with two hours of study outside class and after completing one semester of it and passing the examination, it will result in one academic credit. With the implementation of the credit system, the student can select and study courses on the basis of his own personal foundation and interests, even to the extent that he can cross departmental and school boundaries to study; his freedom is comparatively greater, and there is more flexibility involved. Because by nature the courses taken often turn out to be either involved with specialization, a new discipline or the frontier of knowledge, they usually represent the fruit of the teacher's or researcher's scientific research; therefore, a wide range of course offerings enables the student to study a greater number of subjects, expand the horizons of his knowledge and moreover encourages teachers to spend more effort on scientific research and unceasingly raise the standards of learning. Under this system, standards for graduation are based primarily on fulfilling certain amounts of credits; when these credits are completed, the student graduates.

We must reform the educational system but cannot entirely follow the European or American credit system, for in Europe or America the student himself chooses his own profession and takes courses entirely on the basis of his own preferences and interests. This is excessively free, self-initiated and self-indulgent. Our socialist state ought to train talent in a planned manner; students ought to take into account the needs of the state and the orientation it has determined for specializations, moreover, they should submit to the assignments the state makes for them. Therefore, we ought both to extract from the academic year system those advantages which stem from the strength of its planning and to absorb the merits of the academic credit system offered by its flexibility. It would be more appropriate for the realities of our national situation if we were to adopt a system which incorporates features of both the academic year and the academic credit systems.

The problems and difficulties which we face in reforming the current educational system of our institutes of higher learning and in promoting an academic year-credit system are still fairly numerous, and we must energetically do research into and resolve the following matters:

(1) The reform of assignment system. When students have completed their credit requirements, they ought to be allowed to advance the time of

graduation or the time when they take examinations for graduate school. At present, this problem has still not been resolved. The Personnel Planning Department and the Education Directives Department ought to formulate concrete proposals to deal with this as quickly as possible. If students are not able to advance the time of graduation, it will seriously blunt their enthusiasm and cause the credit system to lose its intended effect of trying to speed up the production of personnel.

(2) The reconsideration of the entire curriculum. In present educational planning required course occupy a very great proportion, and leeway left to the student to choose electives is very small. If things are allowed to continue in this way, the effect of implementing a credit system will not be significant and it will not reach its goal of teaching students in accordance with their aptitude. We ought to reduce the number of required courses to the lowest possible limit and make strenuous efforts to simplify and reduce the number of hours devoted to lectures as well as improve educational methods and provide students with the right to take more initiative to choose the way they learn. The proportion of electives to required courses at the very least ought to be thirty percent to seventy; the best proportion would be forty to sixty.

(3) Start up a great number of electives. We must encourage teachers to strengthen their research, to strengthen themselves through advanced training and to be bold in starting up new specialized course curricula. This is the key to whether or not the credit system will be able to persever. Some people have coined the metaphors that the academic year system is like a "system of boarding at a dining hall" with an unalterable choice of menu and the credit system is like a "restaurant system" where one makes one's own individual choice of dishes. If it is indeed to be a "restaurant system," let us make sure we provide everyone with a rich and varied menu, for if the menu is too limited, then it will not be much different from boarding at a dining hall.

(4) With the utmost vigor improve the conditions for experimenting. The sciences in the small number of comprehensive universities which have adopted the credit system on a trial basis have met with a very grave problem, which is that facilities for experimentation are insufficient, and experimentation courses present great difficulties when people try to move up the time when students are allowed to take them as electives. For this reason, it is almost impossible for science students to try to advance the time of the graduations. This s a problem which we must make every effort to solve. Some people are of the opinion that if the implementation of the credit system in higher education takes place in such a way that experimentation can keep up with it as well, then the standards of training personnel will immediately improve. This seems to make a great deal of sense.

(5) Strengthen direction and use scientific methods to manage education. There is a great deal of scholarship involved in dealing with such matters

as what curriculum a student should select and how best he can prepare himself, and they involve relationships of the greatest significance. If we do not provide concrete leadership and rigorous requirements, it may result in going too far in one direction, adversely affect the healthy growth of trained personnel and a failure to achieve good results. Providing students with the right to take their own initiatives is not at all the same thing as letting things slide wherever they might. It is for this that we must improve the management of education, strengthen the system of teaching and all rules and regulations and make a good job of this task of reorganizing education.

CARTER REITERATES U.S. POSITION ON IRAN-IRAQ CONFLICT

OW250304 Beijing XINHUA in English 0236 GMT 25 Sep 80

[Text] Washington, September 24 (XINHUA)--U.S. President Carter reiterated today that there should be "absolutely no interference by any other nation" in the conflict between Iran and Iraq and called for a negotiated settlement.

In a special statement issued here this afternoon, he said that the fighting "represents a danger to the peace and stability of the region." "It should be promptly terminated. Any grievances between Iran and Iraq should be settled at the negotiating table and not on the battlefield."

Carter's remarks reportedly reflected a deepening concern over the Soviet Union's readiness to rush an additional large quantity of weapons and supplies to the region.

He repeated that the United States has "not been and will not become involved in the conflict between Iran and Iraq."

The United States "strongly supports" both the statement made by the secretary-general of the United Nations and also by the president of the U.N. Security Council to bring this fighting to a prompt end and to obtain a negotiated settlement, he said.

Carter also warned that the strategic Persian Gulf must be kept open. "Freedom of navigation in the Persian Gulf is of primary importance to the whole international community. It is imperative that there be no infringement of that freedom of passage of ships to and from the Persian Gulf region," he said.

The statement came after the president, who was fresh from a two-day west coast campaign trip, met this morning with his principal advisors at the White House to assess the crisis in the Persian Gulf and discuss U.S. policy considerations and decisions in the area.

Secretary of State Edmund Muskie was recalled from New York, where he had been attending sessions of the United Nations and had consulted with a number of foreign ministers in the last several days. Carter himself is also in contact with other nations through U.S. embassies abroad and directly between him and the leaders of some of those nations. "We will continue to work vigorously with as many nations as possible and also with international institutions who seek as we do, a speedy end to the conflict," he said.

Speaking of the American hostages held in Iran, the president said that the United States will "continue our work for their prompt and safe release and we continue to hold the Government of Iran responsible for the safety and the well-being of the American hostages."

WESTERN PRESS REACTION TO MIDEAST CRISIS REPORTED

OW241600 Beijing XINHUA in English 1517 GMT 24 Sep 80

[Text] Beijing, September 24 (XINHUA)--Western press has expressed concern that the Iranian-Iraqi conflict might create an opportunity for the Soviet Union to intervene in the Gulf region and could seriously affect oil supplies to the West.

THE NEW YORK TIMES said editorially yesterday that it has been feared for months that "problems in the Persian Gulf could provide the Soviet Union with new opportunities to gain influence in the region" and now the conflict between Iran and Iraq has created "increased opportunities for Soviet encroachment on the Persian Gulf region."

The conflict caused such instability that "the Soviet Union might be tempted to intervene in Iran as it has in the past," it noted.

An AFP report from Paris said that Western embassies feared that escalation of the conflict might "give the Soviet Union a long-sought excuse to step in at the heart of Western oil supplies" and "that is why Western governments are following with such concern the development of a conflict whose implications go far further than the two countries concerned."

The WALL STREET JOURNAL said yesterday that the conflict "is raising concern that the fighting could escalate out of control, endangering Western oil supplies and providing new opportunities for Soviet gains in the Persian Gulf region."

"What makes the latest Iraqi-Iranian fighting particularly threatening is its intensity and the growing potential for Soviet involvement," it said.

It said "since last spring, the Soviets have steadily improved their ability to capitalize on turmoil in the region by building up their forces, near the Iranian border" and the presence of Moscow's forces "increases Russian ability to respond to any development."

It also said "the more immediate concern is that the fighting might jeopardize the 3.5 million barrels of oil a day the two countries are exporting to the West and significant loss of production from Iran and Iraq could bring still higher world oil prices."

A NEW YORK POST editorial yesterday said "the Russians have not only invaded Afghanistan, but have now deployed half of the Red Army units in western Afghanistan along the Iranian border. Is this, in turn, to fulfill the rights of intervention they claim to hold under a 1921 treaty."

The British DAILY MAIL expressed concern that "the Iraqis and the Iranians are bombing each other's oil installations and, much more worrying, if the war does continue to escalate, there is the threat of tanker traffic through the Straits of Hormuz, the oil jugular to the West."

The LONDON TIMES in an editorial yesterday hoped "the Arab nations and the West have a common interest in stopping the fighting at the earliest opportunity."

WEST CALLS FOR NEGOTIATIONS IN IRAQI-IRANIAN CONFLICT

OW2507.5 Beijing XINHUA in English 0721 GMT 25 Sep 80

[Text] Beijing, September 25 (XINHUA)--The French Government yesterday called on the great powers to show "great restraint" toward the Iraqi-Iranian conflict in order to favor a political settlement, according to reports reaching here.

After a cabinet meeting, presidential spokesman Jean-Marie Poirier said, "France takes note that the difference at the root of this confrontation is strictly bilateral. France considers that it should be the object of a political settlement."

British Foreign Secretary Lord Carrington, in an address to the U.N. General Assembly on September 23, noted, "Iran and Iraq are now in a state of undeclared war."

He said he shared U.N. Secretary-General Kurt Waldheim's fear that the conflict "could have serious and unpredictable consequences, and I echo his call for the utmost restraint, for an immediate end to the fighting and for a negotiated settlement."

Meanwhile, the Italian Government said in a statement that it was following the escalation of the hostilities between Iran and Iraq with "the greatest concern." The statement appealed to the two warring states to cease hostilities and create conditions for negotiation.

An Australian Foreign Ministry spokesman said on the same day, "Australia is extremely concerned at the developments but also notes that the superpowers have adopted a restrained approach and we hope this will continue."

The secretariat of the Organization for Petroleum Exporting Countries stressed in a statement yesterday, "we strongly appeal for an end of the hostilities so that Iran and Iraq, both founding members of OPEC, may devote all their resources to the well-being of their people."

UN SECURITY COUNCIL URGES END TO IRAQ-IRAN CONFLICT

OW240828 Beijing XINHUA in English 0817 GMT 24 Sep 80

[Text] United Nations, September 24 (XINHUA)--The U.N. Security Council last night appealed to the governments of Iran and Iraq to immediately end their fighting and settle their dispute peacefully.

The appeal was contained in a statement issued by security council president Taieb Slim of Tunisia after the council's urgent "informal consultations on the extremely serious situation prevailing between Iran and Iraq" at the request of U.N. Secretary-General Kurt Waldheim. The appeal was adopted without a vote.

The statement said the members of the security council "have taken note of the sharp deterioration in relations and the escalation in armed activity leading to loss of life and heavy material damage" and "are deeply concerned that this conflict can prove increasingly serious and could pose a grave threat to international peace and security.

"The members of the security council welcome and fully support the appeal of the secretary-general, addressed to both parties on September 22 1980, as well as the offer that he has made of his good offices to resolve the present conflict."

The statement appealed "to the governments of Iran and Iraq, as a first step towards a solution of the conflict, to desist from all armed activity and all acts that may worsen the present dangerous situation and to settle their dispute by peaceful means."

UN SECURITY COUNCIL MEETS ON IRAN-IRAQ CONFLICT

OW270819 Beijing XINHUA in English 0744 GMT 27 Sep 80

[Text] United Nations, September 26 (XINHUA)--The U.N. Security Council met tonight to consider Iran-Iraq conflict after repeated, arduous consultations since yesterday.

The meeting was jointly requested by Mexico and Norway. Iraq was represented at the meeting by a special emissary, while Iran was absent.

Addressing the council as the first speaker, U.N. Secretary-General Kurt Waldheim reiterated his deep concern over the escalation of the tragic conflict between Iran and Iraq and expressed his anxiety at dangers which would inevitably arise from it.

He believed that the council would find the most useful and practical way of ending the fighting and settling the differences between the two countries by peaceful means.

Porfirio Munoz Ledo, ambassador of Mexico, stressed that the security council should continue to promote mediation and not stand in the way of other efforts by both the non-aligned and the Islamic countries.

He urged the parties to the conflict to heed the appeals of the United Nations and called upon all states to abstain from any action that might aggravate the current situation.

Norwegian Ambassador Ole Algard said the war between Iraq and Iran was a matter of the gravest concern to all.

The security council should adopt a resolution calling upon the governments of Iraq and Iran to take forthwith all measures for an immediate ceasefire and to initiate negotiations, he said.

Iraqi representative Ismat T. Kittani, said that Iraq was ready and willing "to respond to any initiatives for international peace and security." He requested the council to inform the Iraqi foreign minister to participate in the council meeting, if, he said, it would move into substantive discussion of the conflict or consider a draft resolution in connection with this matter.

Before adjourning the meeting, the president of the security council Tables Slim (Tunisia) announced that the council would resume consultations tomorrow morning to decide the time for the next formal meeting.

WESTERN ANXIETY OVER IRAN-IRAQ CONFLICT REPORTED

OW280127 Beijing XINHUA in English 0103 GMT 28 Sep 80

[Text] Beijing, September 27 (XINHUA)--Anxiety over the Iraq-Iran hostilities is mounting in those Western countries which depend on the steady flow of Middle East oil for their survival. They are deeply concerned with the safe passage for oil tankers through the Strait of Hormuz, the gateway of the Persian Gulf.

Iran and Iraq used to be two key oil exporters in the Middle East. However, owing to the upheaval since spring last year, Iran's daily oil output had dropped from six million barrels to 1.5 million and its average daily export to about 700,000 barrels by the time of the outbreak of the current conflict.

Iraq produced 3.5 million barrels a day before the conflict and has been the second largest oil exporter next to Saudi Arabia only in the Organization of Petroleum Exporting Countries as well as in the world. It exported three million barrels a day, two-thirds of which passed through the Persian Gulf.

Owing to the raging conflict, the oil supply from the two countries has practically come to a halt. Economists estimated that the present oil stocks in the West stood at five to six billion barrels which can last three to five months, and that other major producers could help by boosting their output when necessary. So there is no immediate danger of an oil crunch.

However, the International Energy Agency has pointed out that France, Italy, Spain and Japan are likely to be the hardest hit among its member nations if the oil flow from Iran and Iraq is interrupted for a long period by the war.

What worries the West most is the safe passage of oil through the Strait of Hormuz. Of the nearly 50 million barrels consumed by the Western countries and Japan each day, 40 per cent came through the strait. And oil shipped from the Persian Gulf accounts for 80 per cent of Japan's oil imports and 60 per cent of France's.

On September 24, the nine foreign ministers of the European Economic Community and the spokesman of the French president issued statements, all stressing the utmost importance to the community of nations of free passage for ships in the Gulf. Chancellor Helmut Schmidt of the Federal Republic of Germany said yesterday that his government would use all its influence to keep the vital Persian Gulf open for navigation.

While watching closely the developments in the Middle East, the United States is having consultations with its allies on what can be done to keep the Straits of Hormuz open.

U.S. PROPOSES MEETING TO MINIMIZE GULF CONFLICT EFFECTS

OW270130 Beijing XINHUA in English 0113 GMT 27 Sep 80

[Text] Washington, September 26 (XINHUA)--The United States has offered to host a meeting with its major allies to discuss ways of minimizing the economic effects of the Iraq-Iran conflict on international shipping and world petroleum markets, White House press secretary Jody Powell said today.

No such meeting has been set, he said. But the United States is willing to host such a meeting if that meeting "should seem desirable."

A brief statement issued by the White House said that the idea emerged after President Jimmy Carter and State Secretary Edmund Muskie "have exchanged views over the past several days with key friends and allies on a wide range of issues related to the conflict between Iran and Iraq."

The statement did not mention the countries to the meeting. But those consulted are reported to have included Japan, Britain, France, the Federal Republic of Germany and Italy.

The oil export cut-off from Iran and Iraq is a cause of immediate concern to the United States and its allies although the former is affected indirectly. They are even more worried that the worsening conflict could lead to cuts in the flow of oil from the other Persian Gulf producers.

More than 18 million barrels of crude oil move through the Strait of Hormuz a day--roughly 40 percent of all the oil imported by Western nations. For Japan, it is 20 percent and for the United States 11-13 percent.

The United States and many other countries have called for restraint by all parties and a negotiated settlement of the Iraq-Iran dispute.

INDIA, YUGOSLAVIA CONCERNED ABOUT IRAQ-IRAN CONFLICT

OW271411 Beijing XINHUA in English 1320 GMT 27 Sep 80

[Text] Beijing, September 27 (XINHUA)--Indian Prime Minister Indira Gandhi and the visiting Yugoslav Executive Council President Veselin Djuranovic expressed concern at the Iran-Iraq conflict, according to a New Delhi report.

V. Djuranovic who arrived [in] New Delhi on September 26, held talks on the same day with Mrs. Gandhi on the Gulf conflict and the situation in Afghanistan and Kampuchea. They hoped that the non-aligned nations would make constructive efforts towards reducing tension and creating conditions for peaceful resolution of problems.

They agreed that the two countries should work together to strengthen the non-aligned movement and preserve its unity. They expressed concern over the global economic crisis and stressed the need for greater solidarity and cooperation among non-aligned and developing countries in solving their economic difficulties.

Speaking at a banquet given in his honour by Indira Gandhi, Djuranovic expressed the hope that Iran and Iraq would end their conflict and seek a peaceful solution to the controversial questions by political means proceeding from the principles of the policy of non-alignment and the United Nations Charter.

He told the Indian NATIONAL HERALD that non-aligned countries must not remain a detached observer in the present-day tense situation but should face challenges and develop their activities regardless of differences in views."

India and Yugoslavia signed on September 26 a five-year economic agreement beginning in 1981.

CSO: 4020

JAPAN APPEALS FOR END TO IRAQI-IRANIAN CONFLICT

OW251936 Beijing XINHUA in English 1922 GMT 25 Sep 80

[Text] Beijing, September 25 (XINHUA)--Japanese Prime Minister Zenko Suzuki was reported today to have appealed for an immediate end to the hostilities between Iran and Iraq, as hundreds of Japanese workers were preparing to leave a bombed petrochemical complex in south Iran, according to news reports received here.

Japanese acting foreign minister Kiichi Miyazawa told a Diet committee that Japan would seek the help of Islamic countries to arrange an early end to the conflict. He added that Japan would also ask both the Soviet Union and the United States to refrain from intervening in the dispute.

In Baghdad, a British Embassy spokesman said today that ambassadors of West European countries in the Iraqi capital had met and planned concerted evacuation of their citizens in Iraq.

The Emir of Kuwait, Sheikh Jabir al-Ahmad Al-Sabah, had a telephone conversation with Iraqi President Saddam Husayn today. They discussed the possibility of convening an emergency meeting of Arab and Islamic foreign ministers.

King Khalid of Saudi Arabia telephoned President Husayn today that his kingdom stood by the side of Iraq "in its pan-Arab battle and conflict with the Persians, the enemies of the Arab nation," according to an Iraqi News Agency report.

TOGO, NIGER PRESIDENTS URGE END TO IRAN-IRAQ WAR

OW271310 Beijing XINHUA in English 1251 GMT 27 Sep 80

[Text] Beijing, September 27 (XINHUA)--Gnassingbe Eyadema, president of Togo, and Seyni Kountche, head of state of Niger, have cabled Iranian President Abolhasan Bani-Sadr and Iraqi President Saddam Husayn calling on them to end the armed conflict.

President Eyadema's cable dated yesterday says: "No matter what is the result of the conflict, the two belligerent parties and the communities to which they belong would be harmed and weakened and the only victors are the merchants of arms." "The conflict can only pave the way for foreign interference and bring harmful results," it adds.

"We are deeply convinced that dialogue is the only way to protect the genuine interests of the two countries and to save the future," the cable said.

President Eyadema hoped that his appeal would help bring a peaceful solution to the disputes.

Niger head of state Kountche, in a cable to the presidents of Iran and Iraq on September 25, expressed his concern over the conflict between the two countries and urged them to come to an immediate ceasefire so as to create an atmosphere conducive to a peaceful settlement.

CSO: 4020

SINGAPORE-KUWAIT JOINT STATEMENT VIEWED

OW201730 Beijing XINHUA in English 1701 GMT 20 Sep 80

[Text] Beijing, September 20 (XINHUA)--Singapore and Kuwait today "expressed grave concern over the open foreign armed interventions in the two non-aligned countries in Asia, namely Kampuchea and Afghanistan," and called for an "immediate, total and unconditional withdrawal of foreign forces" from the two countries in accordance with the relevant U.N. resolution, according to reports reaching here from Singapore.

This is contained in a joint statement issued at the end of a three-day visit to Singapore by the Amir of Kuwait, Shaykh Jabir al-Ahmad al-Jabir al-Sabah.

The statement said the two sides "further stressed the need for the peoples of the two countries to determine their future without foreign interference, coercion and intimidation."

They "reaffirmed the important role played by the Association of Southeast Asian Nations (ASEAN) in promoting regional cooperation in Southeast Asia, in the spirit of equality and mutual respect, towards preservation of peace, prosperity and progress in the region," the statement said.

The two sides also stressed the need for non-aligned countries to redouble their efforts to strengthen international peace and security.

On the Middle East situation, the statement said no just and durable peace can be achieved without a total withdrawal from territories occupied by Israel since June 1967 including East Jerusalem, and the restoration of the inalienable rights of the Palestinian people.

The two countries reiterated their support for the establishment of a zone of peace in the Indian Ocean and noted that the security of the Gulf area should be left to the Gulf states themselves.

The two sides expressed the desire to further strengthen the bonds of bilateral friendship and cooperation in various fields. The Kuwaiti amir left Singapore for home today after his five-Asian-nation tour including Pakistan, Bangladesh, India and Malaysia.

CSO: 4020

STALEMATED EUROPEAN SECURITY CONFERENCE REPORTED

OW280210 Beijing XINHUA Domestic Service in Chinese 1653 GMT 25 Sep 80

[Text] Madrid, 24 Sep (XINHUA)--The preparatory session for the followup European security conference has entered the third week since it was opened in Madrid on 9 September. The session's discussion on the schedule for the followup conference in November has, in fact, been stalemated because the Soviet Union has done its utmost to prevent the creation of a situation in which the Western nations will condemn Soviet invasion of Afghanistan and persecution of political dissidents at the conference.

The aim of the preparatory session is to map out the schedule and agenda for the formal conference in November. Since it will be the first meeting between the East and the West since Soviet invasion of Afghanistan, the United States intends to demand an explanation from the Soviet Union on its persecution of political dissidents and its invasion of Afghanistan and to protest Soviet jamming of Western radio broadcasts. On the other hand, TASS commentaries have condemned the U.S. discriminatory policy toward the Soviet Union in foreign trade and declared that the "economic sanction" against the Soviet Union violates the spirit of Helsinki.

As soon as the preparatory session began, the two rivals entered into a dispute over the schedule for the conference. The Western nations insisted that the schedule should be discussed and arranged on the basis of the yellow paper adopted by the 1977 followup conference in Belgrade. According to the guidelines of the Belgrade yellow paper, each European security conference should--during the political debate--thoroughly inspect the implementation of the final document of the Helsinki conference and set a specific time and place for the next conference, as well as discuss the continuity of the conference.

In order to avoid the predicament of being condemned, the Soviet Union has tried by hook and by crook to obstruct the discussion of the schedule for the conference based on the yellow paper. According to Western officials, the Soviet delegation wants to limit the political debate at the conference to 3 weeks and demands that once the political debate is over, the conference should immediately discuss new proposals on cooperation so that the Soviet Union could peddle its pet projects on "cooperation," "disarmament," and so forth.

Owing to the Soviet Union's tough stand, no progress has been made since the start of the session. As the session entered into its second week, Spain, the host nation, made a verbal motion on 15 September in order to break the stalemate. The motion, which called for half of the time of the conference to be devoted to a debate of essential political issues, received the immediate support of the Western nations. Then, the Hungarian delegation also submitted a motion written in Russian on the question of the schedule, calling for reducing as much as possible the time to be spent on political debate. The Soviet delegation endorsed the motion right away and called it a "positive" move. Obviously, the Soviet side believed that if the motion was approved, it could avoid the plight of being condemned. Thereupon, both sides engaged in a dispute over the two motions.

On 23 September, the Czechoslovak delegate submitted a proposal written in Russian for "replacing the Belgrade yellow paper," saying that the debate should be limited to a week and that the question of the continuity of the European security conference not be discussed at all at the debate. The U.S. delegation has called the proposal unacceptable.

After a week of argument, a proposal by Yugoslavia was finally adopted on the morning of 22 September. That is, first the European security conference should be held at the level of "state representatives"--that is, delegates should be foreign ministers--and second, the European security conference should be continued. This proposal has so far been the most important achievement of the session.

In a word, since the preparatory session was opened on 9 September, the participants have agreed on nothing except the level of delegates attending the conference. Diplomatic circles in Madrid believe that, should the Soviet Union insist on the Czechoslovak proposal, the preparation session will be completely paralyzed. However, both rivals are expecting to gain something from the conference and for the moment at least, do not want to call off the session.

CSO: 4005

EEC FOREIGN MINISTERS HIT USSR, SRV FOR INVASIONS

OW250740 Beijing XINHUA in English 0707 GMT 25 Sep 80

[Text] United Nations, September 24 (XINHUA)--Speaking at the U.N. General Assembly today, EEC foreign ministers stressed that the withdrawal of Soviet and Vietnamese aggressor troops from Afghanistan and Kampuchea is an indispensable condition for the solution of problems of the two invaded nations.

Gaston Thorn, vice president and minister for foreign affairs of Luxembourg, in his speech on behalf of the European Economic Community, observed that the invasion of Afghanistan and Kampuchea constituted a flagrant violation of the principle of the U.N. Charter, that is the right of peoples to self-determination and the principle of non-intervention in the internal affairs of another state.

He censured the invading countries "which take advantage of their military superiority in order to establish their spheres of influence, even at the risk of jeopardizing peace and stability."

He said the withdrawal of the Vietnamese troops occupying Kampuchean territory was an indispensable condition for a solution of the Kampuchean problem, "which should be based upon the existence of an independent and neutral Cambodia, with a genuinely representative government."

On Afghanistan, he said, the nine members of the EEC once again hoped that "it will be possible to avoid the indefinite continuation of this particularly cruel war through a solution in keeping with the resolution by our assembly providing for the withdrawal of Soviet troops and the free exercise by the Afghan people of their right to determine their own future."

French Foreign Minister Jean Francois-Poncet stated that the Soviet military intervention in Afghanistan was unacceptable and that no security considerations can justify such action.

He pointed out that the first obstacle to the solution of the Afghanistan issue was the intervention of a foreign army and this obstacle must be removed.

He stressed that the military occupation of Kampuchea by Vietnam had to end and agreement be reached if Kampuchea was to re-emerge free, peaceful and neutral.

Lord Carrington, secretary of state for foreign and commonwealth affairs of Britain, said, "Let there be a political solution--a solution which will remove Soviet forces from Afghanistan, restore to the people of that country their sovereignty and their independence and enable them to choose for themselves how they shall be governed."

"Tens of thousands of Soviet troops remain in Afghanistan. But they have failed to subjugate the people of Afghanistan," he added.

He stressed that there could not be a political solution without the withdrawal of all foreign forces from Kampuchea.

The foreign ministers of Italy, Denmark and West Germany also deplored the armed invasion of Afghanistan and Kampuchea. They emphasized that any political solution must be based on the withdrawal of foreign aggressor troops from the two countries and the exercise of the right of the Afghan and Kampuchean people to self-determination.

EC FOREIGN MINISTERS CONCERNED OVER IRAN-IRAQ CONFLICT

OW250132 Beijing XINHUA in English 0112 GMT 25 Sep 80

[Text] United Nations, September 24 (XINHUA)--The foreign ministers of the European Community have expressed their deep concern at the military confrontation between Iraq and Iran in a statement issued here today.

The statement was made at a meeting held in New York late last night by the foreign ministers of the nine countries of the community.

The statement stressed the need to avoid anything which might give the conflict a broader dimension. "In this connection, they (the nine countries) look to other states, particularly the great powers, to maintain the restraint which they have shown."

The nine countries declared themselves ready to support any international initiative likely to promote a political settlement of the conflict. "They recall the capital importance for the international community of freedom of navigation in the Gulf, on which it is imperative not to infringe."

Speaking at the U.N. General Assembly today, Hans-Dietrich Genscher, minister for foreign affairs of the Federal Republic of Germany, appealed to "those involved not to add yet another conflict to those already existing in the Middle East but to sit down at the negotiating table."

He also appealed to all states "to exercise the greatest restraint so as to prevent the conflict from spreading."

Lord Carrington, British secretary of state for foreign commonwealth affairs, remarked yesterday that the United Nations surely could not afford to ignore the grave situation which had developed between two of its member states, Iraq and Iran.

He called for utmost restraint, an immediate end to the fighting and a negotiated settlement.

HUNGARIAN ENTERPRISES TO RUN SMALL FOOD STORES

OW251225 Beijing XINHUA Domestic Service in Chinese 1432 GMT 23 Sep 80

[Text] Budapest, 22 Sep--According to local newspaper report, the Hungarian Government recently adopted a decree stipulating that commercial enterprises are allowed to establish small-scale retail trade and food service stores with only a few staff members and workers.

The decree stipulates: the staff members and workers of the stores can be from the same family, but the leaders of the stores must be selected from among the staff members and workers of their own enterprises who are willing to accept offers for such jobs. The stores' equipment is owned by the enterprises, but their operations are independent and their accounting separate. The enterprises and the store leaders are required to sign contracts in accordance with the stipulations of the civil law. Contracts should stipulate that the stores will turn over a definite amount of profits to the enterprises and pay other expenditures with their incomes as well. The stores may distribute all the profits left over after deducting the aforesaid expenditures to their staff members and workers without limits, provided that tax regulations are observed.

The reports said: Such operating methods are conducive to the enhancement of the quality of service, the attraction of customers, the improvement of work efficiency and the implementation of convenient and economic operations. Besides, the operating time of these stores will also better meet the needs of the local residents.

This new operating method will be gradually implemented by the retail business and food service trade beginning 1 January 1981.

MEXICAN, VENEZUELAN LEADERS ON IRAN-IRAQ CONFLICT

OW251950 Beijing XINHUA in English 1905 GMT 25 Sep 80

[Text] Beijing, September 25 (XINHUA)--Government leaders and political figures in Mexico and Venezuela have voiced concern over the conflict between Iran and Iraq.

Mexican President Lopez Portillo, speaking at a dinner in honor of Luxemburg Prime Minister Pierre Werner on the evening of September 23, said that the situation in which the Middle East finds itself as a result of the Iranian-Iraqi conflict threatens all mankind and has made the international situation more dramatic. He viewed all conflicts in the world as "resulting from violations of the principle of co-existence." He also said that the way through which to bring about the right of people to self-determination is to "ban the use of force in conflicts and in the approach to other countries' internal affairs."

In a reference to the conflict between the two mideast countries, Mexican Foreign Secretary Jorge Castaneda said in New York that an end must be put to the hostile actions and peaceful means should be explored to resolve the conflict. He called on the U.N. Security Council to act to stop this conflict.

Political figures in Venezuela regarded the Iranian-Iraqi conflict as a menace to world peace. They expressed opposition to any interference by big powers. Venezuela's independent parliamentarian Rumulo Henriquez told the Spanish News Agency, EFE, yesterday that the world is expecting the strong powers not to meddle in the dispute. He said he stood for a cease-fire between the two warring nations in an effort to arrive at an agreement through negotiations. Former Foreign Minister Aristides Carvani viewed the fighting between the two OPEC member countries as "extremely dangerous." If the conflict continues, he said, it will bring real problems to the world's oil supplies and may lead to a bigger war. He termed the Middle East region as a "hot spot" since various factors and interest groups are in action there.

FRENCH PREMIER IN AUSTRIA DISCUSSES INTERNATIONAL ISSUES

OW271608 Beijing XINHUA in English 1533 GMT 27 Sep 80

[Text] Vienna, September 26 (XINHUA)--The conference on European security and cooperation must not be an excuse for the Soviet Union to pass itself off as the sole champion of peace, said French Prime Minister Raymond Barre in his talks with Austrian Chancellor Bruno Kreisky.

Barre's visit to Austria from September 24 to 26 was the first official call to Austria made by a French prime minister since 1967.

The two heads of government had an exchange of views on European security and the Middle East, according to APA. With regard to the followup conference on European security in Madrid, Barre held that detente is indivisible and that the policy of detente toward the Soviet Union, initiated by De Gaulle, must be maintained.

Barre pointed out that the Afghanistan event has actually turned the process of detente into a problem. People must not accept lightly Moscow's grave violation of international law and encroachment upon the right of a people to decide the political system of their own country independently and freely.

On the current conflict between Iraq and Iran, Barre said that France is trying to help bring this conflict to a halt through its representatives in international bodies. He said that passage through the Straits of Hormuz must be ensured by all means.

Barre returned to Paris this afternoon.

EUROPEAN PARLIAMENT, BELGIUM, FRG ON IRAN-IRAQ CONFLICT

OW251922 Beijing XINHUA in English 1901 GMT 25 Sep 80

[Text] Beijing, September 25 (XINHUA)--The European Parliament, Belgium and West Germany have expressed deep concern over the military conflict between Iran and Iraq and hoped the two sides will restrain themselves and obtain a peaceful settlement of the conflict speedily.

An European Parliament statement issued yesterday said that "the political commission of the European Parliament is deeply concerned over the armed conflict on the frontiers between Iran and Iraq." It would like to see "the conflict be settled through negotiations, so as to avoid destructions and human victims in the future in the territories involved."

The Belgian Government in a statement yesterday called on Iran and Iraq to "seek a peaceful settlement of the conflict rapidly out of the consideration of their own interests and in the interest of world peace."

The West German Government spokesman also expressed the hope yesterday that the two parties would cease hostilities as soon as possible.

In Luxembourg yesterday, the joint committee of the African, Caribbean and Pacific countries and the European Economic Community urged the two belligerent parties to solve the conflict through negotiations.

GISCARD CALLS FOR IRAQI-IRANIAN NEGOTIATIONS

OW261403 Beijing XINHUA in English 1200 GMT 26 Sep 80

[Text] Beijing, September 26 (XINHUA)--French President Valery Giscard d'Estaing yesterday urged Iraq to state its readiness to open negotiations with Iran over their four-day armed conflict, according to reports from Paris quoting presidential spokesman Jacques Blot.

The spokesman, reporting on a 90-minute meeting between Giscard d'Estaing and Iraqi Deputy Prime Minister Tariq 'Aziz, said that the two men discussed the conditions under which negotiations could begin to settle the dispute by political means and that different formulas were examined.

The president expressed the opinion that the Islamic states could have a particular role to play in seeking a solution, Blot said.

Giscard d'Estaing had stressed the importance of freedom of navigation in the Gulf and the Hormuz Strait, and 'Aziz assured him the Iraqi authorities would do nothing to interfere with that freedom, the spokesman said.

It was reported that the Iraqi deputy prime minister, President Saddam Husayn's special envoy, had held high-level consultations in Moscow and Amman, Jordan, before meeting with French President Giscard d'Estaing.

TURKISH PREMIER COMMENTS ON IRAN-IRAQ CONFLICT

OW261612 Beijing XINHUA in English 1541 GMT 26 Sep 80

[Text] Kuwait, September 26 (XINHUA)--Turkish Prime Minister Bulent Ulusu said, "We feel a great regret over the worsening situation between Iraq and Iran and we are following the situation with concern."

He made the statement in an interview to the Kuwaiti paper AL-QABAS published today.

"Both Iraq and Iran are Islamic countries and our neighbours. Anything happening between them will have an effect on us.... If Turkey was called for by international community to make mediation, we will not hesitate," he said.

On Turkey's relations with Arab countries, he said, "We will cooperate with all Arab countries, especially the Gulf countries. We will sell them our products and buy from them what we want." The Arab world would have a special position in Turkey's foreign policy, he stressed.

He also said that Turkey's ties with the West would not affect its relations with the Arab world. On the contrary, such ties would serve as a bridge between the West and the Arab world.

He stressed that his country would continue to develop and strengthen its ties with the Islamic countries.

While denouncing Israel's expansionist policy, he said, "Turkey always insists that Israel should withdraw from the occupied Arab land. As a matter of fact, Turkey has fiercely attacked Israel's decision to make Jerusalem its permanent capital."

U.S. SELLING BETTER WEAPONS TO TAIWAN

OW212150 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT 21 Sep 80

[Text] From just the Sino-U.S. agreement on purchasing U.S. military technology and equipment, one can at least see the following three serious questions:

1. Comparing the lists of U.S. military equipment ordered for our country and Taiwan, we can immediately see that our country has been placed in an unequal position. In fact, the United States only agreed to sell to our country some ground and air transport means and some obsolete military equipment. At the same time, it declared that it would not sell any offensive weapons to China. However, U.S. imperialism signed a new arms sales agreement with the Kuomintang, supplying Taiwan with new powerful modern offensive weapons and military technology, such as (?F-S medium-range fighters, Falcon antiaircraft missiles, a new type of ship-to-air missile, two antitank missiles, a fire control system for naval vessels, a new type of electronic spy system, 70-mm rapid firing guns) and other modern U.S. weapons. Many of these weapons are not possessed by our army. We do have some of the weapons mentioned, but they are inferior in performance to those sold by the United States to Taiwan.

2. According to the agreement, our country must supply at fixed prices large quantities of titanium, (?vanadium), (?tantalum) and other rare metals for a long period. This deal is obviously not in our favor. There are very great demands for these rare metals on the international market, and their prices are constantly increasing. Why should our country commit itself to supply the United States these valuable strategic commodities at fixed prices for a long period? Obviously the condition imposed on us by the United States will cost us dearly in lost foreign exchange.

3. Owing to the many commitments Comrade Deng Xiaoping had made to the United States previously, our country's representatives were seriously fettered in negotiating the agreement with the U.S. side. Particularly when Vice Chairman Deng held talks with U.S. Defense Secretary Brown earlier this year, he accepted many conditions put forward by the

United States without considering and discussing with other state leaders. Some of the conditions at first glance seemed to be in our favor. In fact, we lose more than we gain in the deal. Today the United States refuses to renegotiate or revise articles of the agreement, using the agreement already reached between Vice Chairman Deng and the Americans as an excuse.

Although Comrade Zhang Aiping, who recently became vice premier, suggested to the military commission that it is necessary to continue to ask the United States to revise as soon as possible the articles that are not favorable to our country, his suggestion was rejected. Premier Zhao Ziyang insisted on upholding Comrade Xiaoping's leading authority in the party, saying that revising the agreement already reached is to undermine the prestige of Vice Chairman Deng in front of the Americans.

CSO: 4005

PURCHASE OF U.S. MILITARY EQUIPMENT CRITICIZED

OW182228 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT 18 Sep 80

[Text] The talks between our country's delegation and the U.S. military technical delegation have shown that Americans still want to furnish technical equipment for military use to our country at a high price and that they are trying hard to sell certain extremely expensive and complicated military equipment--which is not needed by our country--to us.

The problem is that we still do not know how to use, repair and maintain this kind of equipment. However, the authoritative military advisor in the central authorities is doing his best to help the U.S. side. In view of the situation, some comrades urgently suggested to the military commission of the CCP Central Committee (?not to buy such foreign military equipment). [words indistinct]

Last year Comrade Deng Xiaoping approved the use of funds for military construction in order to procure foreign military equipment in disregard of the huge national budget deficit which exceeded 2 billion yuan. The funds from those machine-building ministries and scientific research projects exceeded 870 million U.S. dollars. As a result, our country was in an even more difficult situation in regard to foreign exchange.

It should be pointed out that the use of huge funds for procuring foreign military equipment [words indistinct] and the overspending of foreign exchange cannot obtain the military equipment that our army really needs. On the contrary, the wanton use of funds often results in obtaining military equipment which cannot satisfy the national defense needs.

It is regretful that this situation often occurs and is happening more frequently.

In recent years facts have shown that certain leading comrades of our country act in a rash manner in procuring military equipment and they do not consider things carefully. The reason for this situation is that those leaders each took a different view and policy in procuring military equipment and made decisions without listening to the opinions (?of others).

Everyone knows that in his talks with U.S. Defense Secretary Brown early this year, Comrade Deng Xiaoping, ignoring the views of authorities and experts, ordered the purchase of sophisticated electronic reconnaissance equipment. As experts have pointed out, we cannot as yet use such equipment effectively. These highly sophisticated instruments and pieces of equipment ended up in the storage room, a waste of tens of millions of U.S. dollars.

Recently a number of comrades in concerned organs expressed dissatisfaction with the decisive role usually played by the Chinese military attache in Washington in the purchase of American military equipment. As a rule, in negotiations and purchases of military equipment, the views of Chinese military representatives in foreign countries obviously should be considered. But the question here is that our military attache in Washington is related to Comrade Deng Xiaoping and is his trusted follower. Thus, he represents the central authorities in the field of military purchases and Sino-U.S. military cooperation. However, to our regret, most of last year's foreign exchange deficits were incurred by the purchase of unnecessary, outdated U.S. military equipment. The third session of the Fifth NPC demanded that everyone vigorously practice economy, oppose waste and stop deficit spending. This demand is entirely applicable to the army. All responsible comrades should be profoundly aware that although the party and people give us the power to spend huge funds to meet the needs of the army, it does not mean that we can squander them at will. Every penny we spend must be truly for the modernization of our army and strengthening of our national defense.

ROME CONFERENCE SUPPORTS AFGHAN REBELS' RESISTANCE

OW271254 Beijing XINHUA in English 1238 GMT 27 Sep 80

[Text] Rome, September 26 (XINHUA)--"It is the duty of the left to render political, moral and material assistance to the resistance movement in Afghanistan," declared European Parliament member Jiri Pelikan, of the Italian Socialist Party, at a two-day international meeting ending here today.

Pelikan told the "support for Afghanistan" meeting sponsored by the Socialist Party monthly MONDO OPERAIO that the continued Soviet military presence in Afghanistan and the construction of airports and military bases there reveal the Soviet intention to use the ground they have gained as a staging base for further expansion into other countries in that region.

The Soviet objective, he went on to note, "is a triple one: acquisition of Indian Ocean bases for the Soviet navy, access to the regional oilfields crucial to the Soviet Union since that country will not be able to meet its own and its allies' oil needs in five years time and the use of this control to contain the West which is heavily dependent on the region for oil."

In the presence of Soviet troops, he pointed out, a political settlement of the Afghan issue could only mean recognition of the Karmal regime and a free hand to the Soviet troops to close the border and stifle the resistance movement by bloodshed and starvation.

The meeting also heard charges of Soviet atrocities in Afghanistan by other participants.

A U.S. expert on Afghanistan Mike Barry gave an account of prisoners gunned down and buried alive, and peaceful villages bombarded by the Afghan puppet regime in active collaboration with Soviet occupation troops.

Dr. Z. Rassoul, member of the Islamic Council for the Liberation of Afghanistan, said that the majority of the Afghan people who are fighting against the Russians for national independence and political liberties, "would rather die than live enslaved."

Describing the resistance movement as one of national liberation, former professor of the Kabul University Mohammad Habib had this to say: "The Afghan patriots are making an immense contribution to the cause of world justice and peace. We appeal to all anti-imperialist, democratic and progressive forces not to remain silent about the genocide of our people."

NEPAL'S SHAHI SPEAKS ON AFGHANISTAN, KAMPUCHEA

OW270730 Beijing XINHUA in English 0718 GMT 27 Sep 80

[Text] United Nations, September 26 (XINHUA)--"The total, immediate and unconditional withdrawal of foreign forces" should be "the first prerequisite in any political settlements in Kampuchea and Afghanistan," declared K. B. Shahi, foreign minister and chairman of the delegation of Nepal, at the U.N. General Assembly today.

Shahi pointed out in his general debate statement that the events of far-reaching consequences in Kampuchea and Afghanistan "constitute a serious threat to the peace and security of the world, let alone the peace and security of the neighbouring areas."

"This grave situation," he continued, "has arisen as a result of armed intervention in those two non-aligned countries." "Non-interference in the internal affairs of another country is the most fundamental principle of relations between states," he added.

Refuting the specific excuses used by certain aggressor countries, Shahi stressed, "the nature of a particular government or its actions and policies, the conditions prevailing in another country, the suspected designs of foreign powers in that country--none of these factors give any state the right to interfere in the affairs of another."

On the political settlements in Kampuchea and Afghanistan, Shahi emphasized, "there should be no giving in to the concept of fait accompli." "In such situation," he remarked, "nothing will be accomplished if it were not acceptable to the people of the countries concerned." "The total, immediate and unconditional withdrawal of foreign forces should be the only basis for any solution," he said.

CPPCC HONORS ZHANG XUELIANG'S RELATIVES IN MAINLAND

OW232210 Beijing XINHUA Domestic Service in Chinese 1659 GMT 23 Sep 80

[Text] Beijing, 23 Sep--Ulanhu, Liu Lantao and Xiao Ke, vice chairmen of the National CPPCC Committee, held a banquet at the hall of the CPPCC this evening in honor of General Zhang Xueliang's relatives and old friends residing in the mainland to celebrate the midautumn festival together jubilantly.

Present at the banquet were Zhang Xueliang's younger brother Zhang Xueming and his wife Zhu Luojun; Xie Xueping, wife of Zhang Xueliang's young brother Zhang Xuesi; his younger brother Zhang Xuequan and his wife Ma Yunlan; his younger sisters Zhang Huaiying and Zhang Huaiqing; his olf friends Liu Lanbo, Lu Zhengcao, Guo Weicheng, He Zhuguo, Xie Fang and Gao Cunxin and their wives; Wan Yi, Chen Dazhang and Liu Ding.

Ulanhu spoke at the banquet. He said: The midautumn festival symbolizes the full moon in the skies and family reunion on earth. I am very glad to have this happy get-together with Mr. Zhang Xueliang's relatives and old friends tonight to celebrate this festival.

He said: Mr. Zhang Xueliang was a noted patriotic general of our country. He made tremendous contributions to the struggle to end the civil war and bring about the resistance against Japanese aggression. The people of the whole country hold him in high esteem and miss him very much. "On festive occasions more than ever we think of our dear ones far away," so the saying goes. Today, we deeply cherish the memory of Mr. Zhang Xueliang.

Ulanhu said: We firmly believe that China's sacred territory Taiwan will certainly return to the motherland. He encouraged Mr. Zhang Xueliang's relatives in the mainland to continue studying and working hard to make contributions to the motherland's four modernizations and to the cause of the motherland's unification.

FIFTH ANNUAL FRANCO-BRITISH SUMMIT MEETING VIEWED

OW201943 Beijing XINHUA in English 1925 GMT 20 Sep 80

[Text] Paris, September 19 (XINHUA)--The fifth annual summit meeting between leaders of France and Britain was held at the Elysee Palace here today.

Deputy Spokesman of the Elysee Palace Jacques Blot told reporters after the summit that French President Valery Giscard d'Estaing and British Prime Minister Margaret Thatcher had held an exclusive meeting and the two parties mainly discussed problems of strategy and defence, East-West relations and Iran.

At the subsequent enlarged meeting, both sides discussed Afghanistan and the forthcoming followup meeting of the conference on security and cooperation in Europe to be held in Madrid. French Premier Raymond Barre, Foreign Minister Jean Francois-Poncet and British Deputy Foreign Secretary Ian Gilmour attended the meeting.

Mrs. Thatcher told reporters after the summit that the two sides had made "considerable advances" during their talks and their discussions were "a great advantage" for both sides to get to know each other's position on major international issues.

Mrs Thatcher said both she and Giscard d'Estaing agreed that relations with the Soviet Union could not be normal as long as Soviet troops still occupied Afghanistan. "We are very, very firm about that" and "we must make that very clear when we meet in Madrid," she said.

President Giscard d'Estaing said both sides had "similar or converging views" on all issues discussed. He also said he had been encouraged by Britain to pursue efforts to end the anomaly of Europe playing a relatively minor role in world affairs.

Mrs Thatcher left Paris for Bordeaux to attend the first meeting of the Franco-British council in the evening. In her speech at the meeting she strongly condemned the Soviet Union for its military occupation of Afghanistan. She pointed out that "the Soviet Government appears to regard force as the best card left in their hand."

Sounding a warning on dangers posed by the Soviet Union, she said "those of us who live in Western Europe cannot ignore the menacing accumulation of modern weapons and highly trained soldiers deployed on our doorstep." "The deployments are said to be defensive. But allegedly so was the invasion of Afghanistan," she noted.

"Europe," she stressed, "must maintain its strength." To that end, she called for a fundamental enhancement of an all-round cooperation between France and Britain. She said "Britain is always ready to develop a somewhat fuller and closer defence cooperation on the basis of our successful joint production of military equipment," she said.

Both French Premier Barre and Mrs Thatcher noted the importance of European construction at the meeting. On the European common agricultural policy, however, Barre insisted on integration of both market and price, interdependent financial relationship and the priority of the Common Market, while Mrs Thatcher called for a change in the policy.

It was reported that both heads of government returned to their respective capitals from Bordeaux in the same evening, while about 150 delegates to the Franco-British Council remained there to continue their discussions until the end of the meeting on September 21.

SINGAPORE ENVOY CRITICIZES SOVIET, VIETNAMESE AGGRESSION

OW240714 Beijing XINHUA in English 0700 GMT 24 Sep 80

[Text] United Nations, September 23 (XINHUA)--S. Dhanabalan, foreign minister of Singapore, warned at the U.N. General Assembly here this afternoon that if we acquiesced in, compromised with or condoned the actions of aggression of the Soviet Union and Vietnam in Afghanistan and Kampuchea, "we in the Third World would surely pay the price, as the next victim would come from our ranks."

He appealed to all U.N. member states to "resist any attempt to unseat Democratic Kampuchea from the U.N." "To allow Democratic Kampuchea to be unseated would be to endorse and encourage the policy of aggression by Vietnam," he remarked.

"Are we going to allow the legitimate government of a country, which is fighting against a foreign invader, to be unseated just because the foreign invader has been successful in establishing a puppet regime in the capital city?" he asked. "Some are advancing the idea of leaving the seat of Kampuchea vacant in the U.N. This will only punish the victim and reward the aggressor because an empty seat is a prelude to the puppet regime making a bid for the empty seat," he said.

"In both Kampuchea and Afghanistan, foreign occupation forces must be withdrawn and the people of Kampuchea and Afghanistan be allowed to chart their own destiny. The root cause of the present problem in Afghanistan and Kampuchea is their occupation by foreign forces," he stressed.

Refuting the allegation of the Soviet Union and Vietnam that "they were invited to send their military forces into Afghanistan and Kampuchea," he noted that "the pattern of invasion was the same in both countries." "The aggressor nation first invaded its neighbour with massive military power, then established a puppet regime and then got the puppet regime to acknowledge subsequently that it invited the foreign forces."

He repudiated the Vietnamese fallacy about so-called "Chinese menace" and drew attention to the fact that "today it is Kampucheans who are dying, not the Chinese. Vietnamese troops are unwelcomed guests in Laos, not in China. And on June 23, Vietnamese troops made incursions into Thailand."

He condemned the Soviet Union for seeking its proxies in the non-aligned movement. He said "today the Soviet Union already has allies and proxies in the non-aligned movement who are completely in support of its policies." "With such allies and proxies within the non-aligned movement, the Soviet Union can be assured that there will be no clear consensus among non-aligned countries to oppose its moves against a non-aligned country."

"If we condone Vietnamese action in Kampuchea, it will be a clear signal to the superpowers that they have our licence to canvass for proxies among the non-aligned nations to promote their interests," he stressed.

"We are against all forms of imperialism and domination" and "we must show clearly to the superpowers that we will have no truck with the policies of their proxies," he declared.

INDONESIAN FOREIGN MINISTER ADDRESSED UNGA SESSION

OW250244 Beijing XINHUA in English 0230 GMT 25 Sep 80

[Text] United Nations, September 24 (XINHUA)--Foreign Minister of Indonesia M. Kusumaatmaja today asked the general assembly to take necessary measures to implement the U.N. resolutions on Kampuchea and Afghanistan.

Addressing the plenary session this afternoon, Kusumaatmaja said, "My delegation notes with deep concern the continuing conflict in Kampuchea resulting from the armed intervention by Vietnam in violation of the principles of the United Nations Charter."

"One year after the adoption of the resolution on Kampuchea," he complained, "foreign forces still remain entrenched" there, "hunger and starvation persist in the country, while hundreds of thousands of Kampucheans continue to live as refugees in neighbouring Thailand."

The recent armed incursions into Thailand from inside Kampuchea, he observed, "has heightened tensions along the Thai-Kampuchean border and increased the danger of a widening of the conflict." Therefore, he stressed, "it is essential for the general assembly to find ways and means to secure the withdrawal of foreign forces from Kampuchea."

On the problem of Kampuchean refugees, he pointed out that "it is important that a system of voluntary repatriation of refugees be instituted and that the dire predicament of the Kampuchean people in Kampuchea be alleviated."

In regard to the situation in Afghanistan, he said, "the resolution adopted by the emergency special session which called for the withdrawal of foreign troops from Afghanistan has not been implemented." He urged that "the assembly should take necessary measures to ensure its full implementation in order to facilitate the re-emergence of Afghanistan as a non-aligned country, able to play an independent role in the conduct of world affairs."

AUSTRALIAN FOREIGN MINISTER'S UN SPEECH CITED

OW260132 Beijing XINHUA in English 0113 GMT 26 Sep 80

[Text] United Nations, September 25 (XINHUA)--Australian Foreign Minister Andrew Peacock pointed out here today that the Soviet invasion of Afghanistan and the Vietnamese occupation of Kampuchea had caused regional political instability and tension and impaired the international climate of trust.

Australia, he said, joined others in urging Iran and Iraq to terminate their conflict and appealed for restraint and a negotiated solution to their dispute.

Speaking at the U.N. General Assembly session this morning, Peacock said that the activities of the Soviet Union in Afghanistan and elsewhere had brought about "the general climate of apprehension and uneasiness" amongst the littoral and hinterland states of the Indian Ocean region.

"The massive military buildup and deployment by the Soviet Union in the region of the Indian Ocean has cast an ominous shadow on efforts to bring about peace in that region, and consequently over preparations for a conference aimed at creating a zone of peace," he added.

He went on to say that owing to the presence of 200,000 Vietnamese occupation troops in Kampuchea, "there is the consequent lack of any opportunity for the Kampuchean people to choose their own government. In addition, there are threats to the security of Thailand made manifest by the incursion of Vietnamese troops into Thailand earlier this year."

"A peaceful and secure Southeast Asia cannot be achieved until a political settlement has been reached in Kampuchea which is acceptable to all parties concerned and which gives full opportunity to the Kampuchea people to determine their own style of government and way of life," he stressed.

FRG'S GENSCHER PROPOSES UN DEBATE ON REFUGEE PROBLEM

OW250130 Beijing XINHUA in English 0108 GMT 25 Sep 80

[Text] United Nations, September 24 (XINHUA)--Hans-Dietrich Genscher, minister for foreign affairs of the Federal Republic of Germany, suggested that the current session of the United Nations General Assembly should include in its agenda a new and urgent item entitled "International Cooperation To Avert New Refugee Flows."

Addressing the general assembly this morning, Genscher pointed out that the mass exodus from Indochina, Afghanistan and Ethiopia "has further aggravated the refugee problem." "In the border region between Thailand and Cambodia refugee problems have led to an acute danger of war," he said.

He added that today, all over the world, the number of the refugees was estimated at 15 million.

"We must tackle the problem of the world's refugees at its roots," he stressed, adding that the problem constituted "a growing challenge to our conscience, an increasing disregard for basic human rights and a growing threat to good-neighbourly relations between states and to the international order as a whole."

He said, "We must increase further the humanitarian assistance for refugees. But we must also face up to the political task of counteracting the causes of their flight and expulsion. We must work together to avert new refugee flows."

BRITISH PRIME MINISTER HONORED AT DINNER IN ATHENS

OW231708 Beijing XINHUA in English 1500 GMT 23 Sep 80

[Text] Athens, September 23 (XINHUA)--"The world is as unsettled and as dangerous a place as it has ever been at any time since 1945," pointed out the visiting British Prime Minister Margaret Thatcher yesterday at a dinner given in her honour by Greek Prime Minister Yeoryios Rallis.

The British prime minister arrived here yesterday afternoon for a three-day official visit at the invitation of former prime minister of Greece Konstandinos Karamanlis which was renewed by Prime Minister Rallis.

The British prime minister said, "We see a power--the Soviet Union, whatever may be our analysis of Soviet motives and intentions, has decided to use its overwhelming military force to subjugate a small neighbour--Afghanistan."

She expressed concern over "the persistent aggression in Southeast Asia, dangerous instability in Iran, and continuing confrontation in the Middle East." She also hoped that "the Polish people will be left to determine their own destiny."

Talking about Greece's re-entry into the military wing of NATO, Mrs Thatcher said, "it is of highest importance that Greece returns soon to the military structure of NATO. We all want you back in--urgently. A solution is essential, both for Greece's sake and for that of the rest of us in the alliance."

Prime Minister Thatcher appreciated the efforts of the Greek Government to modernize its armed forces "in view of the Soviet Union's massive military strength which is a visible menace to the balance of forces between East and West." "Britain has an important part to play in its realization--both in supplying equipment and by encouraging closer co-operation between our armed forces and yours," she said.

On his part, Greek Prime Minister Yeoryios Rallis hoped there would be close co-operation with Britain in both the economic and political fields within the community.

The British prime minister was received this noon by President Konstandinos Karamanlis. The president gave a luncheon in her honour.

The visit, the first to Greece by a British prime minister since 1958, takes place a few months before Greece joins the European Community as its tenth member on January 1, 1981. Britain welcomed from the start Greece's application to join the community, and was the first community country to ratify Greece's treaty of accession.

Prime Minister Thatcher will leave here tomorrow for Belgrade, Yugoslavia.

GHANAIAN FINANCE MINISTER AMON NIKOI INTERVIEWED

OW231704 Beijing XINHUA in English 1651 GMT 23 Sep 80

[Text] Accra, September 23 (XINHUA)--Initial results have been achieved in Ghana's economic recovery and development, said Amon Nikoi, Ghanaian minister of finance and economic planning during an interview with XINHUA correspondents on the eve of the first anniversary of the Third Republic of Ghana.

September 24, 1979 was the day when the military rule came to an end and the civil system was restored in Ghana and the Third Republic was founded. At that time, the country faced problems of slow growth in industry and agriculture. Factories operated under capacity. There was a shortage of food, with the main cash crop--cocoa production--declining markedly. In addition, trade deficits became larger and larger and inflation was runaway.

On the present economic situation, Nikoi said: "The country's gross domestic product is expected to increase 2 per cent this year whereas there was no growth at all last year, this year's balance of payments is expected to have a surplus of 440 million cedis (one U.S. dollar equals 2.75 cedis)." He predicted, "the rate of economic growth may reach five per cent in the next three years, and the rate of inflation will stabilize around 20 per cent in the same period."

Referring to the measures the government will adopt to promote economic development, Nikoi said that the economic policy of the government will be carried out with a focus on agricultural production. The government will provide the farming community with seeds, seedlings, farm implements, spare parts for agricultural machinery and fertilizers in sufficient amounts to encourage production of food, raw materials and export crops.

He also said that the government will promote the linkages between agriculture and industry so as to reduce her dependence on imported raw materials, fertilizers, weedicides and insecticides.

He added that the short-term agricultural programme launched last May is expected to form a basis of sustained increase in output. Ghana has succeeded in clearing a large portion of its accumulated trade arrears. She is in a position to allocate more financial resources to import raw materials so as to increase capacity utilization of factories, he said.

Referring to the prospects of Ghana's economic development, he said: "The difficulties outlined above were created over a long period of time. We cannot hope to solve them overnight." "What we expect to see over the next two years is to boost production, particularly agricultural production, so as to create conditions for a sustained growth and development," he added.

CSO: 4020

TURKISH PREMIER DISCUSSES NEW GOVERNMENT POLICY

OW271926 Beijing XINHUA in English 1906 GMT 27 Sep 80

[Text] Ankara, September 27 (XINHUA)--The government program read out by the new Turkish Prime Minister Bulent Ulusu here this afternoon listed the establishment of peace and order and economic recovery as matters of the government's primary concern.

The program read at a meeting of the National Security Council, the ruling military body, covers both domestic and foreign policies. It says that "anarchy, sectarian provocations and separatist activities that are directed against the unity and indivisibility of our nation shall definitely be eradicated."

Before the military takeover, terrorist activities, Islamic religious differences and separatist activities of the Kurds had grown to alarming proportions, endangering peace and security of the country.

Ulusu said that the government's economic and financial policies consisted of holding price rises at a reasonable level, checking inflation, using the country's resources in a most productive way and maintaining a process of sound, planned development.

"Our major objective in national defense," the program says, "is to maintain, at the highest level, by making use of all available means, the fighting strength of the heroic Turkish armed forces." It points out that the armed forces are the backbone of the nation and the principal safeguard against the internal and external dangers confronting the country "located in the most sensitive region of the world."

Education will have a special place in the economic, social and cultural policies of the government.

On foreign policy, the program says: "Turkey's approach to the conflicts in the region will be based on such principles as that of justice and equity, the right of each nation to determine its own destiny and inadmissibility of acquisition of territory by the use of force." Turkey will continue its support to the just cause of the Palestine people, it says.

The prime minister declared that Turkey's relations with the other member nations of NATO, first and foremost the United States, and with NATO itself would be developed further. He added that the government desired to strengthen friendly relations and close cooperation with all its neighbours and that special importance would be attached to the development of friendly relations with the Soviet Union. "Our relations with the European Economic Community will be directed towards Turkey's eventual attainment of its place within the community."

Ulusu affirmed his government's desire to have the existing issues with Greece and the Cyprus problem solved by means of negotiations, and to develop relations with Islamic countries, the Arab countries in particular, as well as Iran and Pakistan.

JAPAN-U.S. AUTO EXPORT PROBLEM REVIEWED

OW222000 Beijing XINHUA in English 1942 GMT 22 Sep 80

[Text] Washington, September 22 (XINHUA)--Japanese Foreign Minister Masayoshi Ito made it known at a press conference here today that Japanese auto export to the United States in the last quarter of this year is expected to be below the level of the corresponding period last year.

He told the press that Japanese auto makers, after talks with the government, are expected to exercise restraint in their export to the United States. He added that the U.S. administration welcomed this development.

Foreign Minister Ito arrived here on September 18 on his way to New York for the United Nations General Assembly and met Vice-President Walter Mondale, Secretary of State Edmund Muskie, Secretary of Defense Harold Brown, advisor to the president Zbignew Brzezinski, Secretary of Treasury Miller and members of the congress.

They discussed the Asian situation, defense and bilateral economic problems and the discussions, according to Ito, were focussed on defense and Japanese auto export to the United States. Ito agreed to give "special treatment" to its defense budget.

The United States now absorbs 20 per cent of Japanese auto output. It imported 1.3 million Japanese cars in the first half of 1980 which is up 40 percent over the year before and maintains a 22 per cent share of the U.S. auto market. Last year Japan sent 6.7 billion dollars worth of cars to the U.S., 25 per cent of its total exports to the U.S.

The automobile trade imbalance is a hot issue in U.S.-Japanese relations of trade which is now reaching 50 billion dollars each year. The continuing flood of Japanese automobiles and other imports into the United States came at a time domestic auto manufacturers have lost hundreds of millions of dollars and laid off more than a third of their work force.

Chrysler, recently rescued from bankruptcy by government intervention, announced it had lost 536 million dollars in the second quarter alone. Ford lost 468 million dollars in the same period, and General Motors lost 412 million dollars, these being the big three American auto manufacturers.

Under growing pressure from representatives of the United Automobile Workers, the U.S. administration seems to be digging in its heels against imported competitive Japanese automobiles. U.S. Secretary of Labor, Ray Marshall, warned Japanese auto makers when he was in Tokyo last month that continued strong shipments of Japanese cars to the United States could result in "a serious reaction."

JAPANESE SELF-DEFENSE FORCES TO EMPLOY ELECTRONICS

OW290820 Beijing XINHUA in English 0806 GMT 29 Sep 80

[Text] Tokyo, September 29 (XINHUA)--The Japanese Defence Agency has decided recently that new electronic troops and electronic supporting units would be established in the ground and maritime self-defence forces respectively with a view to improving the country's electronic war system.

According to Japanese press reports, the decision was made because the Japanese ground and maritime self-defence forces were rather poorly equipped as compared with the air self-defence force which was almost fully equipped with electronic devices.

Under a plan of the defence agency, the electronic troops to be added to the ground self-defence force would be deployed in Higashichitose, Hokkaido Prefecture under the northern army. The ground chief of staff office disclosed that this move was aimed at enhancing the capabilities of jamming and counter-jamming technics.

On the part of the maritime self-defence force, an electronic supporting unit would be set up in Yokosuka where there was the fleet headquarters of the force. This unit was to acquire as quickly as possible the combat capability ranging from following enemy warships to attacking and disrupting the electronic system of the enemy.

The plan would be implemented as from next year.

ITALIAN GOVERNMENT RESIGNS 27 SEPTEMBER

OW281212 Beijing XINHUA in English 1200 GMT 28 Sep 80

[Text] Rome, September 27 (XINHUA)--The government of Francesco Cossiga resigned today after the Chamber of Deputies, the lower house of parliament, voted down an economic decree.

A government motion asking parliament to pass the economic decree into law was defeated by 298 to 297 votes in parliament today, thus leading to the current government crisis, although Cossiga won a vote of confidence by 329 to 264 in a roll-call vote earlier.

Italy is faced with grave economic difficulties since the beginning of the year, caused by recession in auto-making, chemical, textile, ship-building and other industrial sectors, heavy inflation, increased foreign trade deficit and steadily rising unemployment. As a remedy, the Cossiga government proposed in July a series of austerity economic measures including increases in taxes and oil prices and setting up of funds to assist ailing industries and presented to parliament an economic decree covering the above measures in early September.

After the economic decree was defeated in parliament then, the government had to revise it. But when the new, revised decree was brought to vote in parliament today, it was again rejected not only by the opposition parties including the Italian Communist Party, Social-Democratic Party, Liberal Party and the Radical Party, but also by some members of parliament from the ruling Christian Democratic Party and the Italian Socialist Party.

Because of the resignation of the Cossiga government, Italian President Ales Sandro Pertini, who was then in Hong Kong, decided to postpone his visit to Jordan and return home immediately.

ITALIAN WORKERS STRIKE, SUPPORT FIAT WORKERS' DEMANDS

OW260833 Beijing XINHUA in English 0705 GMT 26 Sep 80

[Text] Rome, September 25 (XINHUA)--One point five million metal engineering workers held an eight-hour nationwide strike today protesting the Fiat management's plan to sack 14,000 workers.

The sympathy strike coincided with an imminent breakdown of the negotiations between the Fiat management and the engineering workers' confederation on the planned sacking.

In Turin and Naples, which are centres of engineering industry, the strikers held protest rallies or took to the streets. 70,000 workers in Turin marched in processions from four directions on Piazza San Carlo, the site of their rally. Their placards read, "no sacking" and "no job switch."

The Turin rally was attended by the mayor of the city and the president of the Piemonte Region.

Strikes of varying durations were also held by workers in the communications, transport, construction, public utilities and trading departments. Teachers boycotted classes and all newspapers in Piemonte Region suspended publication.

Thousands of representatives of the workers in the regions of Liguria, Lombardia and Emilia made special trips to attend the demonstration in rally in Turin.

A similar action involving 20,000 workers took place in Naples.

The biggest auto-maker in Italy, the Fiat Company has met with growing difficulty in sales abroad since the beginning of this year in face of a global economic recession, a shrinking car market in the West and intensified competition from Japanese auto-makers. To tide over its difficulty, Fiat has twice reduced the working hours of the workers since last June and on September 7 it announced a decision to sack

14,000 workers. Negotiations between the engineering workers' confederation and the management were started two days later to seek for a formula that would avoid outright sacking, but they broke down because the management insisted on its plan to sack workers. The government intervened on September 11 with Minister for Labour Franco Foschi participating in the talks, but no breakthrough was in sight.

BRIEFS

PAKISTAN BORDER ATTACKS--Islamabad, September 29 (XINHUA)--The Soviet Union "cannot absolve itself of the responsibility" for the two air attacks within 48 hours on Pakistan's border posts in Northwest Frontier Province, the Urdu-language newspaper JANG wrote editorially today. It said that the raids were mounted by Afghan helicopter gunships, but Afghanistan is now "under Russia's military control." The paper noted that there have been some 200 violations of Pakistan's airspace since December 1979. It urged the government to make representations to the Soviet authorities and demand an end to such provocations. The armed forces of Pakistan, it said, would teach a telling lesson to the aggressors who persisted in such provocations. Another Urdu-language daily, NAWA-I-WAQT in its editorial today stressed the need for "heightened alertness along the border." [Text] [OW291916 Beijing XINHUA in English 1904 GMT 29 Sep 80]

MRS MARCOS WELCOMES MUSICIANS--Manila, September 27 (XINHUA)--A packed and enthralled audience, numbering over 2,000, applauded heartily every item performed by players of traditional Chinese instruments and singers of Chinese songs at the magnificent cultural center here this evening. The evening's programme performed by the visiting broadcasting national music ensemble of China included traditional Chinese music, music of Chinese national minorities and modern music. The concerto, duet and solo of different Chinese instruments such as erhu, suona, zheng, pipa and flute drew very warm applause and were obviously understood by the audience. Tenor soloist Guo Song, soprano Lu Qingshuang and the young Uighur singer Guli sang songs rich in Chinese flavour and local colour They also sang Philippine songs to the applause of the audience. Mrs. Marcos received members of the ensemble yesterday and listened to some items performed by the Chinese artists at the presidential palace. In a message welcoming the ensemble to her country, Mrs. Marcos said she believed that its performances would contribute to the enhancement of friendship and cultural relations between the two countries and inspire greater appreciation of Chinese music in her country. INDIA, YUGOSLAVIA ON ASIAN CRISES--Beijing, September 28 (XINHUA)--Yugoslavia and India have expressed in a joint communique their "serious concern" over the growing aggravation of the situation "in some parts of Asia," according to reports from New Delhi. The communique says that crises in south-east and south-west Asia could and should be resolved "only through political solutions based on well-recognized principles of nonalignment, peaceful co-existence and the United Nations' Charter implying full respect and support for the sovereignty and independence for all countries in these regions as well as the right of their people to live in their own way without interference from outside." The communique adds that the leaders of the two countries felt that "there were growing tendencies to use force and to interfere in the internal affairs of other states, and this represents a serious threat to peace, stability and security in the world." The communique was issued yesterday at the end of the official visit of Yugoslav president of the Federal Executive Council Veselin Djuranovic to India. MOZAMBIQUE WEAPONS FROM USSR--Nampula, September 28 (XINHUA)--The 16th anniversary of the Mozambican armed struggle for national liberation was celebrated at a mass rally held here yesterday. Speaking at the rally, President Machel Samora, commander-in-chief of the armed forces, said, "September 25 is a day symbolizing the Mozambican people's bravery and heroism and their deep hatred for foreign domination." The Mozambican people, he said, are confronted with an arduous task of overcoming the country's under-development in the 1980s, and great efforts and sacrifices are needed. He expressed the hope to buy more weapons from the Soviet Union. The second cultural and sports festival was held here from September 21 to 28 to mark the army day. Mozambique began its armed struggle in September 1964 and September 25 was named army day after independence. [Text] [OW291244 Beijing XINHUA in English 1224 GMT 29 Sep 80]

ACROBATS IN TRINIDAD--Beijing, September 24 (XINHUA)--Ellis Clarke, president of Trinidad and Tobago, yesterday received the visiting Chongqing Acrobatic Troupe of China and gave a cocktail party for the guests, according to a report from Port-of-Spain. Earlier, head of the Chinese troupe Xu Mingzhen called on Marilyn Gordon, acting minister of education and culture. Shi Jian, charge d'affaires ad interim of the Chinese embassy in Trinidad and Tobago, was present on both occasions. The Chongqing Acrobatic Troupe arrived in Port-of-Spain on September 21. [Text] [Beijing XINHUA in English 1219 GMT 24 Sep 80 OW]

OPERA TO LATIN AMERICA--Beijing, September 25 (XINHUA)--The First Beijing Opera Troupe sent by the People's Republic of China to Latin America will begin a three-month's performance tour of Mexico, Brazil and Argentina, on September 29. The 65-member Tianjin Beijing Opera Troupe has prepared ten operas for the tour. Zhang Yinxue, director of Tianjin's Cultural Bureau and leader of the troupe, today told XINHUA that "Beijing opera is winning a wider audience abroad. Our Argentinian friends requested that the opera 'Chisangzheng' be included in the repertoire. A Brazilian friend told me he thought the people of Brazil would enjoy Beijing opera as much as they do football." The Tianjin Beijing Opera Troupe is mainly composed of graduates of that city's opera school. Their average age is 33. Most of the artists have had over a decade's stage experience. Art adviser Xie Guoxiang hopes that his group will "increase friendship and mutual understanding between China and Latin America. [Excerpt] [Beijing XINHUA in English 0726 GMT 25 Sep 80 OW]

U.S. FINANCES EGYPTIAN PROJECTS--Cairo, September 28 (XINHUA)--Egypt and the United States today signed seven agreements amounting to 165.3 million dollars to finance development projects in Egypt, MENA reported. The agreements completed the U.S. aid programme to Egypt for this year. An official source told MENA that through these agreements Egypt will obtain funds and the technical know-how from the U.S. which would help it in oil prospecting. He added that these agreements will give Egypt a push in the field of the mineral resources prospecting and will give a double push as far as the Egyptian economy is concerned. The source said that these agreements will also help the opening of new vistas for investment in Egypt. [Text] [OW290127 Beijing XINHUA in English 0102 GMT 29 Sep 80]

U.S. URANIUM SALES TO INDIA--Washington, September 24 (XINHUA)--The U.S. Senate voted 48-46 today to permit the sale of 38 tons of enriched uranium to India, thereby neutralizing an earlier House disapproval and clearing the way for the shipment to go ahead. The nuclear fuel export, destined for India's Tarapur reactor, a U.S.-aided project, was authorized by President Carter in June in consideration of U.S. interests in that area and for fear that the Soviet Union might substitute as a supplier if the United States denied India the fuel. The proposed sale, however, was blocked last week by an overwhelming vote in the House of Representatives. Opponents of the sale based their case on the possibility of use by India of the fuel for nuclear explosions and on India's close relations, including arms deals, with the Soviet Union. To overcome the barrier, the administration mounted an intensive lobbying campaign in the Senate during the last few days. Objection by both the House and the Senate was required to stop the sale. STUDY IN UK--London, 17 Sep (XINHUA)--Thirty-eight Chinese students majoring in science and engineering have all completed their 2-year preparatory courses in 1 year with very high marks and have been enrolled in universities in Britain. They are all 1978 senior middle school graduates and were selected to study abroad shortly after they enrolled in Chinese universities. Their ages range from 18 to 20. Five of them are girls. [OW240115 Beijing XINHUA Domestic Service in Chinese 0808 GMT 18 Sep 80]

TAIWAN TRAWLERS IN FUJIAN--Two Taiwan trawlers which went to Fujian's Dongshan Port to seek shelter from storm and repair engines were warmly received by the local people's government and the Dongshan reception center for Taiwan fishermen on 27 August. Braving rainstorms, the local fishermen worked on the Taiwan trawlers for 3 hours until engine trouble was eliminated. During their stay at Dongshan, the Taiwan fishermen were also entertained at a movie party. [OW141115 Beijing Radio in Mandarin to Taiwan 1500 GMT 5 Sep 80 OW]

JAPAN ON IRAN-IRAQ--Tokyo, September 25 (XINHUA)--Six major Tokyo newspapers today editorially expressed concern about the escalating armed conflict between Iraq and Iran and appealed for an immediate ceasefire and settlement of the dispute through negotiations. The NIHON KEIZAI SHIMBUN said what is urgent at present is to check the war flames from spreading. "The prerequisite for preventing deterioration of the situation is that both the United States and the Soviet Union should refrain from supplying arms to the warring parties or deploying military forces in the Arabian Sea and Persian Gulf area," it said. The SANKEI SHIMBUN also said in order to quench the war flames, the United States and the Soviet Union should not provide military aid to the belligerents. It warned the two superpowers against the danger of fishing in the troubled waters. The paper expressed the hope that the U.N. Security Council now being called into session would speedily adopt a resolution on ceasefire and that Iran and Iraq should respond at once and stop fighting. The MAINICHI SHIMBUN, ASAHI SHIMBUN, YOMIURI SHIMBUN and TOKYO SHIMBUN all called for a ceasefire and U.N. mediation.[Text] [OW250812 Beijing XINHUA in English 0732 GMT 25 Sep 80]

ISLAMIC CONFERENCE ON CONFLICT--United Nations, September 23 (XINHUA)--The member states of the Organization of the Islamic Conference held an emergency meeting here today to consider the situation arising from the conflict between Iraq and Iran. The meeting urged the parties involved, with the good offices of the U.S. Secretary-General and the secretary-general of the Organization of the Islamic Conference, to seek a peaceful and just solution to the conflict in the spirit of Islamic solidarity and brotherhood. A press release issued after the meeting said that the Islamic group, on this occasion, expressed its grave concern over the tension existing between two member countries, Iraq and Iran, characterized by major military hostilities and the far-reaching and negative economic consequences of the situation. [Text] [OW240137 Beijing XINHUA in English 0130 GMT 24 Sep 80]

PLO ON IRAN-IRAQ--Beirut, September 24 (XINHUA)--Yasir 'Arafat, chairman of the Executive Committee of the Palestine Liberation Organization, has sent messages to President Saddam Husayn of Iraq and President Abolhasan Bani-Sadr of Iran, urging them to put an end to the hostilities in order to better combat the Zionist and imperialist conspiracies against the Arab and Islamic nations. The Palestine News Agency reported today that the messages were sent in the name of the Palestinian fighters confronting the attacking Israelis in south Lebanon, the occupied Palestine and Jerusalem. 'Arafat also telephoned the Iraqi and Iranian leaders, saying that he was ready to travel to Baghdad and Tehran to help bring an end to the dangerous and regrettable conflict between the two countries. [Text] [OW250134 Beijing XINHUA in English 0117 GMT 25 Sep 80]

THAILAND ON IRAN-IRAQ--Bangkok, September 24 (XINHUA)--Iran and Iraq should immediately cease fire because war between them would affect both sides, said the Thai Prime Minister Prem to reporters here yesterday. He made clear that Thailand would maintain a neutral stand toward the conflict. Thai deputy prime minister Thanat Khoman said in commenting on the same subject that Iran and Iraq are both situated in the oil-producing region coveted by the super powers. A superpower is already attempting to intervene. Therefore, he said, all countries of the world, and the U.N. Security Council, in particular, should adopt measures to bring the fighting between the two countries to an end so as to prevent the possible interference by a third country. Thanat also showed concern over the effect on the oil supply from the two countries to other parts of the world as a result of the conflict. He believed that Thailand would no doubt be affected enormously. He hoped that departments concerned in Thailand would closely watch the development of the situation and work out corresponding measures to cope with it. [Text] [OW241303 Beijing XINHUA in English 1256 GMT 24 Sep 80]

U.S. HOSTAGE DEBATE POSTPONED--Beijing, September 24 (XINHUA)--The Iranian parliament yesterday decided to break off its debate on the U.S. hostages because of the border conflict between Iran and Iraq, according to reports reaching here. The debate which barely started followed the recent U.S. secretary of state's letter to the Iranian prime minister expressing U.S. recognition of the reality of the Iranian revolution. The reports quoted Radio Tehran as saying that the Iranian Islamic students had transferred the U.S. hostages from six Iranian cities to new locations. After six months of captivity in the American Embassy, the U.S. diplomats were sent to provincial cities last April following the abortive American rescue mission. [Text] [OW241230 Beijing XINHUA in English 1221 GMT 24 Sep 80]

IRAQI ACTION AGAINST IRAN--Baghdad, September 23 (XINHUA)--"Iraq will take all appropriate measures" to compel Iran "to observe the rights of others and international law." This was declared in a statement of the Revolution Command Council signed by Iraqi President Saddam Husayn at dawn today. The statement, broadcast over radio, came after Iran declared yesterday all sea frontiers with Iraq including the Hormuz Straits war zones and banned all freight to Iraqi ports. It said that Iran's announcement of its intention to control "this vital and international route at the entrance of the Arab Gulf meant a declaration of full-scale war." "The Iranian action will pave the way for foreign powers to meddle in the internal affairs of the region," the statement said. It also warned that "Iraq will not stand idly by vis-a-vis this situation." [Text] [OW231224 Beijing XINHUA in English 1207 GMT 23 Sep 80]

TURKEY ON IRAN-IRAQ--Ankara, September 23 (XINHUA)--Turkey has deplored the military conflict between Iraq and Iran. Foreign Ministry spokesman Savlet Aktug announced here last evening that the Turkish Government felt sincere anxiety over the confrontation between Iran and Iraq and was watching the developments closely. Aktug said that this confrontation would upset peace and stability in the region. Turkey hopes that "this confrontation will come to an end as soon as possible and that the two friendly and fraternal countries will find peaceful solutions to the problems between them," he said. According to the press here today, the Turkish Foreign Ministry sources believe that the continuation and spread of the war may lead to external interference in the region which would be detrimental to regional and world peace. This is why Turkey is following the developments with concern. Meanwhile, the Turkish airline THY has suspended all flights to the Middle East, following Iraq's declaration of war on Iran yesterday. [Text] [OW231233 Beijing XINHUA in English 1219 GMT 23 Sep 80]

JORDAN SUPPORTS IRAQ--Damascus, September 29 (XINHUA)--"The National Consultative Council of Jordan today expressed its total support for Iraq in waging a national war for the liberation of the occupied Arab lands," Radio Amman reported tonight. In a statement released after a special meeting, the council also urged the Arab nation to stand'on the Iraqi side. It urged "the Arab countries to refuse any foreign intervention, especially superpowers' intervention in the affairs of the region." According to another report, King Husayn of Jordan sent a message to Iraqi President Saddam Husayn today expressing Jordan's support for Iraq in its conflict with Iran. The message was carried to Baghdad by Crown Prince Hasan. On the same day King Husayn received Iraqi Foreign Minister Sa'dun Hammadi and heard a briefing on the fighting between Iraq and Iran. [Text] [OW300334 Beijing XINHUA in English 0245 GMT 30 Sep 80]

PAKISTAN OFFICIALS TO BAGHDAD--Damascus, September 29 (XINHUA)--Pakistan President Mohammad Ziaul Haq and Habib Chatti, secretary general of the Organisation of the Islamic Conference, left Amman for Baghdad today to continue their goodwill mission and to seek a settlement for the Iraq-Iran conflict, according to a report from Amman. During his stay in Amman, the president was met by King Husayn Ibn Talal, Crown Prince Hasan Ibn Talal, Prime Minister Mudar Badran and other high-ranking officials. The two guests arrived in Amman from Tehran last night. [Text] [OW300139 Beijing XINHUA in English 0102 GMT 30 Sep 80]

IRAQI PRESIDENT RECEIVES HAQ--Baghdad, September 29 (XINHUA)--Iraqi President Saddam Husayn received Pakistan President Mohammad Ziaul Haq, the current president of the Organization of the Islamic Conference, here today. In the meeting, the two sides recalled the developments in the Arab world. Ziaul Haq said that the Islamic world would make efforts for a peaceful settlement of the Iran-Iraq conflict. Present at the meeting was also the secretary general of the Organization of the Islamic Organization Habib Chatti, who is accompanying Ziaul Haq on a goodwill mission visit to Iran and Iraq. The Pakistan president arrived here at noon today. [Text] [OW300133 Beijing XINHUA in English 0112 GMT 30 Sep 80]

IRAQ CEASEFIRE REQUESTED--Baghdad, September 29 (XINHUA)--Iraqi President Saddam Husayn declared in an official statement Iraq's readiness to immediately halt the hostilities between it and Iran if the other side made a similar undertaking, and to resort to negotiations directly or through a third party, "in order to reach an equitable and honourable solution which would guarantee our rights and our sovereignty." He said this in a message to U.N. Secretary General Kurt Waldheim, the Iraqi radio and television networks broadcast here at 6:00 this evening. He noted that the Iraqi decision on this matter is perfectly consistent with the spirit of Resolution 479 of the U.N. Security Council on September 28, 1980. He emphasized: "We naturally accept the above-mentioned resolution of the security council and declare our readiness to abide by it if the Iranian side does likewise." "We hope that the security council will take the necessary measures to urge the Iranian side to abide by that decision," he added. [Text] [OW300136 Beijing XINHUA in English 0104 GMT 30 Sep 80]

IRAQ WELCOMES MEDIATION EFFORTS--Baghdad, September 26 (XINHUA)--Iraqi Foreign Minister Sa'dun Hammadi said in a press release here today that his government "appreciates the proposals for mediation" to solve the problems that led to the current conflict with Iran. He declared that his country "welcomes all efforts to achieve peaceful relations between Iraq and Iran." "Iraq's sole aim is to protect its legitimate national rights in its territories and sovereignty over its national waters, and has no ambitions whatsoever over Iran's territory," he said. He affirmed that his country has been and will remain one of the most loyal adherents to the policy of non-alignment based on the principles of non-interference in the internal affairs of others and respect for the sovereignty of all states and on its keen interest in peace and security of the world. [Text] [OW261906 Beijing XINHUA in English 1851 GMT 26 Sep 80]

IRAN REFUSES MEDIATION--Tehran, September 27 (XINHUA)--Iranian Prime Minister Mohammad Ali Raja'i announced yesterday that Iran would not accept any mediation on its armed conflict with Iran. In an interview with Tehran Radio, the prime minister said, "If any foreign envoys want to see the evidence of the Iraqi aggression, we will make arrangements for them," but "we do not accept anybody as a goodwill mission." He said

Iran would be prepared "to put forward our viewpoints on the dispute with Iraq for foreign representatives, but never will we be ready to say one word in the form of negotiations." A proposal to send a goodwill mission to mediate between the two warring Gulf states was endorsed by the Islamic group at the United Nations, at a meeting earlier yesterday. [Text] [OW270814 Beijing XINHUA in English 0754 GMT 27 Sep 80]

NEPAL ON IRAN-IRAQ--Katmandu, September 26 (XINHUA)--The Nepalese Government in a statement yesterday appealed to Iran and Iraq to end the armed conflict and seek a peaceful settlement of their dispute. It said the current armed conflict between the two countries "has given a serious turn to the already existing conditions of tension in the area and the situation calls for the utmost restraint on all sides." The statement added, "If the conflict is allowed to persist, it will be a great setback to the aspirations of all people for peace and development and constitute a real threat to the peace and security of the world. "It is with this perception in mind that the Nepalese Government would also like to appeal to all countries to bring their influences to bear for the solution of the problem by peaceful means." "We are of the view that outside interference in this matter in whatever form will be extremely serious for international peace and security," the statement stressed. [Text] [OW260904 Beijing XINHUA in English 0823 GMT 26 Sep 80]

VENEZUELA ON IRAN-IRAQ--Beijing, September 27 (XINHUA)--Venezuelan President Luis Herrera Campins has expressed the hope that the Iranian-Iraqi conflict should be settled as early as possible, according to a Caracas report. The president spoke at a recent meeting in commemoration of Juan Pablo Perez, founder of the Organization of Petroleum Exporting Countries (OPEC). On September 24, President Herrera instructed Humberto Calderon Berti, Venezuelan minister of power and mines, to seek ways of restoring peace in the Gulf region. Calderon said on the following day that he had made contacts with members of the OPEC. His country would do its best to contribute to the solution of the conflict, he added. On the same day, Venezuela's acting foreign minister Oswaldo Paez Pumar asked the Venezuelan ambassadors to Iran and Iraq to mediate a restoration of peace between the two countries. [Text] [OW271224 Beijing XINHUA in English 1204 GMT 27 Sep 80]

IRAQ-IRAN MEDIATOR--United Nations, September 26 (XINHUA)--Pakistan President Mohammad Zia ul-Haq will undertake a goodwill mission to Iraq and Iran to mediate between them in response to an appeal by Islamic countries, Foreign Minister Agha Shahi told reporters here today. The proposal, made by Indonesian Foreign Minister Mochtar Kusumaatmaja, was endorsed by all Islamic foreign ministers at a meeting held here today. It was accepted by Iraq and Iran. President Haq's mission, assisted by secretary-general of the Islamic Conference Habib Chatti, will seek the views from the warring parties. Agha Shahi said that Haq would come to New York to address the U.N. General Assembly on his mission to the two countries. It is learned that Mr. Habib left New York this afternoon to accompany the Pakistan President on his trip to the United Nations and on the extraordinary mission. [Text] [OW270137 Beijing XINHUA in English 0121 GMT 27 Sep 80]

UN ACTION ON IRAQ-IRAN--United Nations, September 26 (XINHUA)--U.N. Secretary-General Kurt Waldheim has once again urged the security council to consider the military conflict between Iran and Iraq "with the utmost urgency." His suggestion was contained in a letter addressed to the president of the security council yesterday, which was issued here this morning. Despite all the efforts made by the security council and the secretary-general himself, unfortunately "the fighting has continued and intensified," the letter says. [Text] [OW261726 Beijing XINHUA in English 1650 GMT 26 Sep 80]

TURKEY ON IRAN-IRAQ--Ankara, September 25 (XINHUA)--Turkish Foreign Minister Ilter Turkmen announced here yesterday, "one of the factors to end the confrontation between Iran and Iraq is certainly the non-intervention of any country, be it of the region of outside it." This was said by Turkmen at the airport before his departure for attending the 35th session of the U.N. General Assembly. Turkmen said, "We support both the U.N. secretary general's and the general assembly's appeals for peace. It is our sincerest wish that the confrontation be ended and that the topics of controversy be solved through negotiation." Turkmen said, "If the confrontation continues and the oil refineries and wells of the two sides are harmed, then there may be a serious gap in the oil supplies of the entire world." [Text] [OW251536 Beijing XINHUA in English 1512 GMT 25 Sep 80] Ankara, September 27 (XINHUA)--"Turkey has been following the Iranian-Iraqi war with great concern and sensitivity and is prepared to meet the situation with her usual alertness," declared Turkish Defence Minister Haluk Bayulken here yesterday. The Turkish armed forces are ready to put into effect the current military plans, he said. "Our aim is to protect the integrity of the country and the nation and we are well prepared to do this as always," he added. All necessary measures have been taken for this. Bayulken reaffirmed, "It is our greatest wish that these two countries find a way of solving their problems with peaceful means and agree on a ceasefire for this purpose in the near future." [Text] [OW271918 Beijing XINHUA in English 1830 GMT 27 Sep 80]

GABON ON IRAQ-IRAN--Beijing, September 27 (XINHUA)--Gabonese President Omar Bongo sent messages yesterday to the presidents of Iraq and Iran appealing to the two countries to stop military conflict, a report from Libreville reported. The messages said: "The war broken out between Iraq and Iran makes us uneasy for every reason. The war damages the solidarity of the Muslim world in particular. The Muslim world needs to be more united than ever before to meet the challenges it faces at present. Therefore, I have the duty to appeal to both of you for taking sensible attitude and hold dialogue, so that the conflict may be stopped, and peace and concord may be resumed in the Gulf region. On the same day, the ministerial council of the Gabonese Government issued a communique saying that in face of this grave situation, Gabon cannot remain indifferent. The Gabonese Government appealed to the two sides to exercise great restraint, solve this problem through dialogue and resume peace between the two countries. GUINEA ON IRAN-IRAQ--Conakry, September 27 (XINHUA)--Guinean President Sekou Toure has sent separate messages to Iranian leader Ayatollah Khomeyni and President Abolhasan Bani-Sadr and Iraqi President Saddam Husayn, calling for an immediate ceasefire and negotiation to solve the Iranian-Iraqi disputes. Sekou Toure said in his message: "The war between the two fraternal countries creates an extreme dangerous situation for their people, their economies and the entire region, and brings severe damage to the stability and development of the region." The Guinean Government, he wrote, is concerned about the dangerous situation brought about by the conflict between Iran and Iraq and calls on the two countries to remove the root cause of the conflict and find a just settlement through talks, instead of the use of force. [Text] [OW280836 Beijing XINHUA in English 0745 GMT 28 Sep 80]

PAKISTANI TALKS WITH IRAN--Beijing, September 28 (XINHUA)--Pakistan President Mohammad Ziaul Haq arrived in Tehran yesterday and held two hours of talks with his Iranian counterpart Abolhasan Bani-Sadr and Iranian Prime Minister 'Ali Raja'i in the evening, according to reports from Tehran. After the meeting, President Bani-Sadr told Pakistan reporters he was happy that General Zia had come, but repeated that Iran was not prepared to accept mediation in its conflict with Iraq. The Pakistan president told the journalists: "I have not come here for mediation," "I have come to hear Iran's views." President Ziaul Haq's trip was decided by the representatives of Islamic states, including Iran and Iraq, at the United Nations on September 26. Later both President Bani-Sadr and Prime Minister Raja'i announced that they rejected any mediation effort. [Text] [OW280300 Beijing XINHUA in English 0250 GMT 28 Sep 80]

BANGLADESH ON IRAN-IRAQ--Dacca, September 25 (XINHUA)--Bangladesh President Ziaur Rahman sent separate messages to President Abolhasan Bani-Sadr of Iran and President Saddam Husayn of Iraq yesterday, calling for an immediate end to the hostilities between the two countries and urged them to resolve their disputes through peaceful and negotiated settlements, according to Radio Bangladesh this morning. In the messages, President Rahman said, "We are greatly disturbed and distressed by the escalation of the armed conflict between Iran and Iraq, two Islamic and non-aligned countries." He said the armed conflict has caused serious loss of life and property to the two countries. "The continuation of the conflict is bound to endanger the security of the entire region and lead to most dreadful consequences, hurting not only Iraq and Iran but also the Islamic world as a whole," the Bangladesh president stressed. [Text] [OW251355 Beijing XINHUA in English 1213 GMT 25 Sep 80]

PDRY ON IRAN-IRAQ--Aden, September 25 (XINHUA)--Nasir Mohammad, president of the Presidium of the Supreme People's Council and Premier of the People's Democratic Republic of Yemen, appealed today to the Iranian and Iraqi leaders to exercise restraint and enter into negotiations to settle their differences by peaceful means, Radio Aden announced here today. Nasir is currently paying a visit to Libya. His appeal was addressed to Ayatollah Khomeyni and President Bani-Sadr of Iran and Iraqi President Saddam Husayn today. He expressed his regret over the bloody conflict now going on between Iraq and Iran. "This is in the interest not of the people of the two countries but of imperialism and Zionism," the premier said. [Text] [OW260126 Beijing XINHUA in English 0109 GMT 26 Sep 80]

IRAN SETS CONDITIONS--Beijing, September 26 (XINHUA)--Iranian President Bani-Sadr has laid down two conditions for calling off the fighting with Iraq, according to a Press Trust of India dispatch from Tehran yesterday. The Iranian president said at a meeting with ambassadors of Islamic countries on Tuesday that Iraq must withdraw its forces to peacetime positions and stop interfering in Iran through weapons and saboteurs. "If Iraq accpets the two conditions and if there were any other problems, we would sit and discuss how to solve those problems," he said. [Text] [OW260810 Beijing XINHUA in English 0721 GMT 26 Sep 80]

BEIJING GREETS TAIWAN RELATIVES--On the eve of the moon festival, some celebrities in Beijing scientific and technological as well as educational and cultural circles expressed their deep feelings for their friends and relatives in Taiwan through the station reporter. Ye Gongshao, noted professor of the Beijing Medical College, said: On this moon festival, I would like to extend my sincere greetings to my many relatives, friends and schoolmates in Taiwan. In the past 30 years, I have not been able to correspond with them directly. I could only know how they were doing through indirect means. I know they deeply miss their hometowns and relatives. I hope to establish direct correspondence with my relatives and carry out academic exchanges with my counterparts. On this moon festival, China's noted bridge-building expert Mao Yisheng and noted geologist Cheng Yuqi, who had been to Taiwan before liberation [of the mainland], sent their regards to their friends in Taiwan. Cheng Yuqi said: Last July, I attended the 26th geological conference in Paris and met six geologists from Taiwan. During the session, they visited the exhibition and admired new China's geological achievements. Nowadays geologists of many countries frequently visit China for academic exchanges. I hope my counterparts in Taiwan will also come back to make joint contributions to developing the motherland's geological work. RADIO KABUL DIRECTOR DEFECTS--Islamabad, 25 Sep (XINHUA)--The director of Radio Kabul, Syed Fazle Akbar, has defected and reached Pakistan's border city of Peshawar. In an interview with Radio Pakistan, he said that he made up his mind to leave the country because he could no longer bring himself to keep up the anti-Islamic and anti-Afghan propaganda over Radio Kabul. The staff of the radio, too, felt "very much frustrated" because of the tragic state of affairs into which the Soviet invaders had plunged their country, he added. CSO: 4020

THREE IMPORTANT MISSIONS OF CCP

Beijing BEIJING RIBAO in Chinese 30 Jun 80 pp 1, 4

[Commentator's Article: "The Party Must Control the Party"]

[Text] To develop such a great country as ours with its 10 million people into a strong modern socialist country, we must rely only on the leadership of the CCP.

In all the modern civilized nations, politics is guided by political parties. This is not an accidental phenomenon. In today's society, the substance of life is complex and far reaching. The rights and interests of any class of people cannot be effectively realized and protected unless the most active, most aware, and most representative members of society form political parties. Further, the recent hundred year's history of our country points to the fact that the proletarian class, as well as the multitude of the working people, gained victory in their New Democratic revolution, socialist revolution, and socialist construction precisely because they were led by a political party of the working class, that is, the Chinese Communist Party.

Taking the world into view, one can say that only two classes of people are capable of providing leadership in modernization: the bourgeoisie and the working class. Only these two classes are closely connected with modern socialist production. In China, because the bureaucratic capitalist class is the slave of imperialism and because the national bourgeoisie possesses inherent weakness, the Chinese bourgeoisie can neither lead Democratic Revolution to victory nor assume leadership position in modern construction. After the CCP led the Chinese people to great victory in the new democratic and socialist revolutions, the important task of leading the country to become a strong, modern socialist country historically fell to it.

Socialist modernization is a revolution of unprecedented breadth and depth. For example, eliminating the influence of fuedalism, capitalism and small-scale production is a very difficult task. During the course of such a mission, various contradictions are bound to develop as a result of differences of views and interests, though the basic interests are the same. The CCP is the advanced unit of the Chinese working class. It is highly organized and disciplined; it is broadly connected to the masses of the people. Furthermore, armed with Marxism, Leninism, and the scientific system of Mao Zedong Thought. the CCP is capable of grasping the patterns of social development. Thus it contributes a great deal of stability to the future of China's socialism and communism. Only such a party can represent our people's present as well as future interests, correctly handle conflicts among the people and enable people to recognize the relationship of dialectical unity between their present and future interests so that they can be united as one and struggle to achieve their own interests. No other party can undertake such a mission. Therefore, in the course of socialist modernization, it is in the interest of the people in the whole nation that we uphold the leadership of the communist party from beginning to end. Based upon their personal experience, the masses of the people always look to good, correct leadership, a leadership that is free from gross errors and that corrects itself in time if it does commit errors.

The fundamental goal of Lin Biao and the gang of four was to destroy our party so that they might devastate a host of other things. They completely destroyed our party's political line, ideological line, and organizational line; they trampled on our party's fine traditions and style, and they advocated "kicking over party commissions and rousing revolution." Consequently, at one time they almost paralyzed party organization at all levels. Later, although these organizations were nominally restored, many organizations actually fell into the hands of their factional systems. In addition, because they erroneously interpreted and promoted the "unified Leadership" slogan to substitute party for government, party organizations got bogged down in handling everyday administrative affairs and solving all kinds of trivial disputes. As a result, they had no energy or ability to carry out the construction work of the party itself. Under such circumstances, it seems irrelevant to talk about strengthening the leading role of the party.

Presently, as the task of the Four Modernizations is progressing speedily, every sector urgently needs the Party's leadership to be strengthened, but the conditions of party organizations at all levels do not suit the needs of our great endeavor. Only if we try our best to improve party leadership can we strengthen it. To do so, we must first change the undesirable condition of ignoring the distinction between party and government, substituting party for government, having the party run everything and substituting administrative leadership for party leadership. This change will give party organizations at all levels adequate time and energy to handle primarily the task of party construction. If we can properly handle party construction, if we can effectively carry out the party's correct political line, ideological line, and organizational line; and if party organization is strong and its members can set good examples, then everything else can be easily managed.

Since some party members looked upon the party's right to lead as individuals' rights to approve, to make decisions, and to have the final say, once these rights were taken out of their hands they would feel that there was nothing for them to do, and that they couldn't guarantee party leadership. This is an erroneous conception. For the socialist endeavor is the endeavor of the people; it is to be undertaken by the concerted effort of the masses of the people, each in his/her own capacity, and through the cooperation of the executive organ and other agencies. Only if the party effectively manages its own affairs, provides correct leadership, establish its prestige among the people, and conducts detailed, patient, and thorough ideological-political work among the masses can we expect the masses to follow the party willingly, and only then can the party's leadership be consolidated. If you insist on doing all that administrative and technical work yourself, then you will be so busy that you can't manage it all, and won't necessarily be able to do it well. Moreover, you will prevent others from bringing their initiative into play. More important, you will not have the time to do well the things the party ought to be concerned with. Instead, you may lose prestige and weaken the party's leadership.

What then are the missions the party ought to carry out effectively?

The primary mission of the party is to indoctrinate, through propaganda education, party members and the masses of the people in the party's line, principles, and policies, and to make sure that party lines, principles, and policies, will be strictly adhered to within our own district, department, or unit.

Now the political line, ideological line, and organizational line of our party are all correct. But this is not to say that these correct lines will all be completely followed through in due course. We must admit that because of the existence of the poisonous current of the extreme lefttist, the influence of feudalist consciousness, capitalist thought and small-scale production mentality, the fact that some of our party cadres and members are below par with regard to their knowledge of Marzism and that they lack scientific and cultural knowledge--resistance to carrying out the correct line of the Party Central is still quite strong. Party organizations at all levels must first put forth their effort to raise the level of consciousness among the people and party members as a whole with regard to the execution of the party line. Now we must lead the people to march with one mind toward the modernizations. We should examine their work in terms of whether it is beneficial to the task of the Four Modernizations, whether they have made the best contribution they can to the Four Modernizations. To cite Beijing as a specific example, party organizations must make sure that the people in Beijing are united in thought and in action in carring out completely the four proposals given to Beijing City Administration by the secretariat of the Central Committee of the party.

Party organizations at all levels must indoctrinate the party as a whole, from top level cadres to ordinary members so that they will adhere to the dialectical materialist ideological line or proceeding from actual conditions, and seeking truth from facts. Situations change constantly, and many contradictions do exist. Only if everyone's thought is truly liberated and everyone strives to study the new situation to solve new problems and to act strictly according to objective rules and regulations, can we extol the good, avoid the bad and fully develop our strengths.

To insure complete execution of the party's political line, all party organizations must also constantly familiarize themselves with the conditions of party cadres, strengthen cadres' education and training and promptly recommend those who carry on the party line, who have real ability and learning, who are young and strong to assume leadership positions. At the same time, they must reorganize, when necessary, those who are unfit for leadership resonsibilities and sincerely help these cadres to improve themselves.

Another important mission of the party is to persevere in educating party members in democratic centralism and strict organizational discipline, and to insure the cohesiveness and unity of the party.

The power of the CCP lies in its upholding the unity in thought and in action, based on Marxism, Leninism, and Mao Zedong Thought. This unity, moreover, is in turn strengthened by the iron discipline which is built upon the foundation of self-awareness. Without this condition, the Communist Party cannot be a united combat group. Party organizations should teach all party members, including high-ranking cadres, to strictly abide by the principles of organizational discipline of democratic centralism: "individuals must subordinate themselves to the organization; the minority must subordinate itself to the majority; the lower level must subordinate itself to the higher level; and the entire party must subordinate itself to the Central Committee." Above all, politically we must maintain perfect harmony with the Party Central Committee. When carrying out the Central Committee's and party organizations' decisions, we should not allow any individual deviations or pretended observance of the principles. We must clearly explain to party members that strictly adhering to organizational discipline is not a trifling matter which concerns only a few party members involved; rather it is a matter of great importance which can determine whether our party has fighting power, and whether our party can carry out, consolidate, and strengthen its leadership. Once discipline is set, it must be strictly carried out and not be regarded, as just something for us to pay lip service to. In fact, if we fail to inspect and carry out discipline, it might as well be non-existent. As to those who violate party and discipline, we must distinguish different situations and seriously discipline them without indulgence and any compromise.

Still another important mission of the party is to constantly increase party members' political awareness, and to develop fully their function of being pioneering models in production, in work and in various social activities. Party members' function of being pioneering models is a very important condition in achieving party leadership. The masses of the people judge whether our party truly represents their interests, serves them and leads them toward the magnificent goal of achieving socialist modernization. They judge not only from the correctness of our party lines, principles, and policies, but also, in a large measure, the actions of our party members, especially those in leadership positions. They usually learn about our party through the conduct of our party members. In our new long-march, every party member should be the backbone and core of the masses of the people and work with them with wholehearted zest and dedication. Furthermore, they should function as bridges between the party and the people; as intermediaries who can quickly promote and explain the party's lines, principles, and policies to the people and also report the people's views and needs to party organizations. Most important of all, these members should assume leadership roles in learning, production, work as well as other social activities. They should endure hardship before others and enjoy themselves after others and demonstrate their spirit of self-sacrifice. They should take the initiative to shoulder greater responsibilities and to set good examples for the masses to follow. During the ten years of upheavel, the party's fine traditions and styles suffered serious damage. Within the party, quite a few members are either unqualified or not fully qualified; in fact, some even fall far behind the people outside the party. We must rectify this situation; we must do so no matter how much energy it takes, how many obstacles we have to oversome. Otherwise, if some members object to whatever the Party promotes and insist on doing what the Party is against, how can we lead the masses to march forward?

We must educate party members to establish firm convictions in communism on scientific bases. This is an essential requirement of a member of the Communist Party. For if one doesn't believe that the communist ideology can be realized and if one doesn't plan to struggle for it, why does one bother joining the Communist Party? When taking oath on joining the party, every member would express his/her desire to struggle for communism his entire life. But some of these comrades considered the oath as a kind of exaggerated or empty talk, devoid of meaning and aren't really prepared to do this. What they failed to realize is that this oath has real meaning and is supposed to guide all of one's actions. For example, in the face of unhealthy trends and evil practices, should one follow the crowd or should one act as a solitary rock in a turbulent stream? Should one enthusiastically study science, technology, and various kinds of technical know-how or should one muddle along? When confronted with an important decision, should one consider the interest of the party first or should one consider one's own interest first? Many questions such as these are directly related to one's understanding of communism.

The Fifth National CCP Congress adopted "Some Guiding Principles of Inner-Party Political Life." The new draft of Party Constitution also established higher standards for the qualifications of party members. Party organizations at all levels must earnestly organize their members to integrate with reality, to learn these standards and to measure oneself by them. They should highly praise the party members who serve as vanguard models, and, at the same time, help those unqualified or not fully qualified members to improve themselves expeditiously through criticism and education. If upon understanding the party's standards for members and repeatedly seriously considering them some members feel that they can't measure up to such strict standards, it is perfectly all right for them to ask to withdraw from the party. The party organization must approve such a request. It is by no means a disgraceful act to withdraw from the party; nor can we say that these comrades have committed serious errors. They are still our good comrades. When they have acquired the necessary qualifications, they can still re-apply for membership. This approach to the problem is beneficial to both the party and these comrades.

It is not easy to fulfill these three important missions, but we must try our utmost to fulfill them. In the past, during the war, under difficult circumstances or in adversity, people followed the party because various party organizations truly fulfilled these missions. We relied on the correct party line, strong party organizations, and exemplary party members for our success. Today, in our new long march, we still have to rely on these conditions. If we can succeed in our missions, not only will our prestige among the masses be further restored, but it will attain a new height on a new scientific basis. Our party's leadership in all endeavors can then be strengthened, people will unite themselves more earnestly around the party, and the victory of socialist modernization will be more attainable.

UPCOMING NPC STANDING COMMITTEE SESSION DISCUSSED

HK300745 Hong Kong HSIN WAN PAO in Chinese 25 Sep 80 p 1

["News Talk column": "A Reshuffle at the Ministerial Level of the State Council"]

[Text] The NPC Standing Committee will probably hold a session in the next few days. It is said that one of the subjects to be discussed at the session is the trial of the "gang of four" and the other is the reshuffling of some ministers and vice ministers of the State Council.

The "gang of four" will be tried soon and the trial of the gang is a matter of the Ministry of Justice. As for how the "gang of four" will be tried, the NPC has a say in the matter. The trial of such a delicate case is a matter of primary importance in our country. The opinions of NPC can at least be presented to the Supreme People's Court for reference. Leaders of the Supreme People's Court are also elected by the People's Congress. The NPC is the highest organ of state power and the supreme court is in charge of judicial work. Just as the State Council which manages administrative work, the supreme court should also hold itself responsible to the NPC.

Of course, even the NPC is not allowed to decide the case before the trial is conducted. Nobody should conclude that the "gang of four" will not be sentenced to death and so forth. At the recent NPC session, some people criticized Hua Guofeng, saying that he should not announce the "gang of four" will not be sentenced to death before the trial has even started. This reflected the democratic atmosphere prevailing at the NPC session.

Before the session, Song Zhenming asked to be removed from the post of minister of petroleum industry because of the capsizing of the oil rig "Bohai No [illegible]" Some people maintained that in so doing he tried to regain the initiative though he was already in a passive position and that he tried to evade responsibility. He should not be allowed to escape punishment because he is legally accountable for the accident. After Song Zhenming's resignation, the vacant position of the minister of petroleum industry will certainly be filled at the upcoming sesson of the NPC Standing Committee.

In addition, the vacant post of defense minister should also be filled as a result of Xu Xiangquan's resignation. Some people think that according to the principle of differentiating the work and responsibilities between the government and party, the Defense Ministry will substantially take over the work of the military commission of the CCP Central Committee. As a result, minister of defense will take over greater responsibility. The problem of the military commission was reportedly not discussed at length at the recent NPC session. It is obvious that the duties and responsibilities of the Ministry of Defense will not be enormously changed at least at the present moment. Yang Dezhi and Li Desheng are the most popular candidates for the post of defense minister. However, Yang Dezhi is chief of general staff and concurrently a secretary of the Secretariat of the CCP Central Committee. According to the principle of differentiating the work and responsibility between the government and party and preventing the holding of too many posts concurrently by one person, the possibility of his being appointed the defense minister is not great.

Will other ministers be changed? This is a possibility. At least some vice ministers will be relieved of their posts. For example, after Vice Minister Li Guocai was criticized by name and exposed by RENMIN RIBAO, GONGREN RIBAO demanded that he be dismissed from his post. He should not be allowed to hold his post any longer. Another vice minister of chemical industry, Yang Yibang, was also criticized at the two recent NPC sessions.

Li Guocai was reportedly protected by a member of the State Economic Commission. This person was Vice Premier Kang Shien who received a demerit because of the capsizing of the oil rig "Bohai No 2."

OPEN REPUDIATION OF MAO ZEDONG CALLED FOR

OW280233 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT
26 Sep 80

[Text] Speaking at a party Central Committee work conference earlier this year, Vice Chairman Deng Xiaoping said that the rootcause of the ideological confusion within the party and the army lay in leadership, that is, those leaders who were not persecuted or suffered only a little during the Cultural Revolution. He brought up this question again when meeting some PLA deputies at the third session of the Fifth NPC.

Facts show that this view expressed by Vice Chairman Deng Xiaoping is wrong and its intention is not as simple as we thought. A large number of party, government and army leaders have been dismissed from their posts in the past few years, including more than 8,000 cadres of all army headquarters, arms and services, military regions and districts, military academies and at and above regiment and battalion levels. Despite the reshuffles, the ideological problem among the masses of cadres has basically remained unsolved and the crisis of confidence has continued. Only a few people have confidence in the principles, policies and plans set forth by certain leaders of the party Central Committee, its military commission and the State Council. According to the estimation made by the party Central Committee's organizational work conference held last year, less than 24 percent of people had trust for the principles, policies and plans. The third session of the Fifth NPC laid bare more problems, which have undoubtedly further aggravated the crisis of confidence and caused more ideological confusion.

At the NPC session, a deputy from Hubei said: Owing to their past experience, the masses of people worry that the present situation is fluid and the policy may be changed again. Deputies from Anhui and Hunan pointed out: Many of the prominent leaders today were vanguards of the "great leap forward," heroes of the anti-rightist struggle and opportunists during the Cultural Revolution. They always paraphrase Chairman Mao's quotations in their speeches and articles. It is very possible that when these people seize the power in future, the policy will be changed again.

The rootcause of the ideological confusion and crisis of confidence lies in the fact that in handling the questions of the party left over from history and in discussing Mao Zedong's contributions and errors, certain leaders in the central authorities were motivated by their selfish interests and deliberately left some questions unsolved. Because of these leaders' equivocal attitude in handling the questions and constant praises for Mao Zedong's Thought and contributions, it is only natural that the cadres and masses of people cannot but raise the doubt that Mao Zedong's policies will be revived someday.

As for the "gang of four" and their followers, they merely followed Chairman Mao's instructions. The "gang of four" were the successors promoted by Chairman Mao personally. He was the spiritual leader and backstage boss of the "gang of four." We strongly condemn the "gang of four" for [words indistinct] the "great leader." How could the ideological confusions have been avoided?

Political campaigns--the three red banners, the anti-rightist struggle, the rectification campaign and the "Great Cultural Revolution"--which were personally launched and led by Chairman Mao after the founding of the country, have now been officially negated and repudiated. However, their culprit still lies in the memorial hall and is worshipped by people. Such a ridiculous thing could happen only in our party and country.

In order to eliminate the ideological confusion within the party and the army and among the masses of people, at the 12th National Party Congress we must openly and unselfishly repudiate Chairman Mao's errors after the founding of the country and remove his remains from the memorial hall and bury them in Shaoshan village, his hometown.

'HONGQI'S' THEORETICAL GUIDANCE DISCUSSED

HK291015 Hong Kong WEN WEI PO in Chinese 22 Sep 80 p 3

[WEN WEI PO article: "Beijing Theoretical Circles Offer Ideas to HONGQI and Look Forward to Theoretical Guidance To Deal With Present Disorderly Thinking"]

[Text] For the sake of improving propaganda work and raising the quality of propaganda, on 1 July, the editorial department of HONGQI invited 42 public figures from theoretical circles in Beijing to a forum presided over by Xiong Fu, the editor-in-chief of the journal. At the meeting, speeches were delivered by Wu Liping, Feng Ding, Liu Zongzhuo, Wen Jize, Zhang Jian, Xue Muqiao, Qian Junrui, Ma Peiwen, Wang Ruoshui, De Lin, Zhang Tengxiao and Liu Keming. Wang Renzhong and Zhou Yang, director and deputy director respectively of the propaganda department of the CCP Central Committee, also addressed the meeting.

The forum summed up the work of HONGQI over the last 2 years: HONGQI has made progress and portrays things better than in the past. However, it has still not succeeded in becoming a publication everybody is anxious to read and must read. Since changing into a semimonthly publication, it has become more timely and also taken on additional writers. However, there are still very few articles of a more profound theoretical flavor and richer theoretical content that can really proceed from reality, grasp rich practical materials, carry out conscientious study and are able to evoke and solve new problems in the complicated economic sphere. There is still not enough theoretical courage and although the literary style is most serious, it is not lively enough. There is still a very big gap between the demands of the CCP Central Committee and the desires of the masses.

Those attending the meeting held: There are masses of problems urgently requiring theoretical guidance in the country at present. The minds of the masses are confused and they hope for enlightenment and solution. For example: Why is there no improvement in the economy of our country? Why is the superiority of the socialist system not brought into play? What has caused the intensification of class struggle and such a great number of unjust, false and wrong cases? How can we prevent a repetition of such mistakes? How can we correctly handle the relationship between the socialist four modernizations and Marxism-Leninism? What are the characteristics of the Chinese-style road to modernization? There is also: the object of socialist production, democracy and law, the ethical standard of communism and the youth problem. They hope to get hold of some urgent major issues and organize people to study and write special articles about them or organize comradely mass discussions and debates, fairly exchange views and boldly carry out exploration.

Xue Muqiao proposed: I hope that HONGQI will in the next 3 to 5 years, or perhaps longer, do a good job in clearing up the many ideological and theoretical problems left behind by history, find out which are correct or incorrect and keep on publishing articles about them.

Feng Ding held that apart from articles of a guiding and educational nature, we must try and include some articles of scientific and general interest. Wen Jize hoped for the publication of more articles on science and technology. Wang Ruoshui proposed that party organs and journals should sometimes also go in for friendly competitions or call for competitions. Zhou Yang agreed with the views of many of the comrades and called for HONGQI to be run in a more lively manner and to achieve unity of thinking by means of active free discussions. He said: "There may be some risks in free development and discussions, but comparatively speaking, this is less dangerous than ideological ossification. We would rather run this risk in order to invigorate the thinking of our party and people so that they will have the courage to speak, express opinions and discuss things."

At present, the circulation of HONGQI has reached 7.1 million copies. Wang Renzhong held that we must make it the best publication in the whole country. He accepted the request made by the participants for the CCP Central Committee to strengthen leadership and said that he was prepared to hold a special meeting to study the work of the journal.

CADRE RETIREMENT SYSTEM RIDICULED

OW291045 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT
28 Sep 80

[Summary from poor reception] "It is understandable that a large number of deputies to the third session of the Fifth NPC have warmly welcomed the abrogation of lifelong tenure for cadres. The abrogation of lifelong tenure for leading cadres, especially for the leading cadres in the party Central Committee, is a prerequisite for the smooth development of our party, army and country. However, the abrogation of lifelong tenure must be observed both in name and in reality, and new leaders should be elected by giving full expression to inner-party democracy; otherwise, the new retirement system will be meaningless.

"The present situation in the party is contrary to the new system. Before they tendered their resignations, many leaders--including Deng Xiaoping, Li Xiannian and other leaders among the central authorities--(?used the feudal method) to select and set up their own teams of successors. This method is, in essence, the same as that employed by Mao Zedong in stipulating Lin Biao as his successor and promoting and training Wang Hongwen as a trade union leader."

What is worse is that before their resignations, certain people promoted their longtime subordinates, comrades-in-arms and confidants to various leading posts. Some of those promoted are not in the prime of life, nor do they have rich experience, but they are a bunch of opportunists who blindly accept and carry out their masters' orders. In the past, our party and army suffered grave losses, prestige was seriously damaged, and the people went through various hardships because this bunch of people betrayed the interests of the country and people and did everything they could to please their master.

"There are also certain people, especially some among the central authorities, who call for rejuvenating the leadership and oppose lifelong tenure. However, when it is their turn to retire, they resign from some secondary posts and retain the post with actual power. Our country is ruled by the dictatorship of one party, and the party leadership is above all.

For this reason, certain people are firmly grabbing the power of the party and trying to manipulate key party, government and army departments and to appoint their leaders through the control of the party Central Committee."

In sum, de facto lifelong tenure for responsible persons in the party Central Committee has seriously affected government office work and obstructed the growth of a new generation of leaders.

CADRE'S SON SENTENCED TO DEATH FOR MURDER IN HEILONGJIANG

OW280217 Beijing Domestic Service in Mandarin 1200 GMT 27 Sep 80

[Excerpts] (Zhang Huatang), Standing Committee member of the party committee and deputy director of the Shuangyashan Forestry Bureau, Heilongjiang, was sentenced to 6 years imprisonment for shielding his son--who was charged with seizing a gun and murder--giving him ammunition and hand grenades and supporting and conniving with him in resisting arrest by public security personnel. (Zhang Yongping) was sentenced to death and deprivation of political rights for life. Relatives who harbored and shielded (Zhang Yongping) were also punished by law.

(Zhang Yongping), son of (Zhang Huatang), was an assistant driver of the (Baoshan) lumber yard, under the Shuangyashan Forestry Bureau. He was locked up for driving a motor vehicle without authorization. While in custody, on 18 April this year, (Zhang Yongping) and (Liu Shangjiang), also in custody for the same offense, hit two guards with bricks, seriously injuring them, and escaped with two pistols, 12 rounds of ammunition and a wristwatch, both robbed from the guards. The two criminals stole a motor vehicle and escaped to Harbin City. In Harbin, they ran into public security personnel who were after them. (Liu Shangjiang) opened fire to resist arrest and was shot dead on the spot by the public security personnel. (Zhang Yongping) got away in the motor vehicle and, while running away, shot and killed (Xiao Qifeng), political instructor of the (Xiaofang) Traffic Police Company, Harbin City.

(Zhang Yongping) escaped to his uncle (Zhang Haitang's) home in Anda County, Heilongjiang. (Zhang Haitang), who was a communist party member, had already received two wanted circulars on (Zhang Yongping) from public security organs, but he still personally sent the killer (Zhang Yongping) into hiding in the home of another relative, (Zhang Binghua). He also went to (Zhang Yongping's) home twice to bring back pistol ammunition and handgrenades for (Zhang Yongping) to resist arrest. (Zhang Huatang), father of (Zhang Yongping), not only failed to report to the public security authorities, but sent on two occasions a total of 56 rounds of ammunition and handgrenades to (Zhang Yongping). (Zhang Binghua), a distant cousin of (Zhang Yongping), and (Zhang Yuncheng), an uncle, created conditions for (Zhang Yongping's) hiding and escape. They committed perjury and lied to public security authorities. (Zhang Yongping) was arrested in a relative's home in Shandong Province by public security authorities and brought to justice.

'TAIWAN-BORN' CADRES, FIGHTERS IN PLA DISCUSSED

OW202216 Beijing XINHUA Domestic Service in Chinese 1241 GMT 20 Sep 80

[Excerpts] Fuzhou, 20 Sep--A large number of Taiwan-born cadres and fighters have grown up rapidly in the people's army and made positive contributions to accelerating the modernization of national defense. They have been commended and rewarded by their superiors.

Chen Jinsheng, a Taiwan-born fighter who won the honorary title of "hero in fighting the enemy" in the campaign to cross the Changjiang River, is now deputy director of the Xiapu County People's Armed Forces Department under the Fujian Provincial Military District. In his leading post, he has systematically studied lasers, guided missiles, nuclear weapons, chemical weapons, atomic confrontation, and other modern military science knowledge and written more than 100,000 words in study notes. He has also used the theoretical knowledge he acquired to study the reform of military training, directed militiamen to practice modern fighting skills and trained more than 700 outstanding training cadres.

Shen Xinlong and Shen Lihua are Taiwan-born brothers of the same parents. They enlisted in 1973 and 1974 respectively and were assigned to Fuzhou PLA units.

Liu Shian, a surgeon in the general hospital of Fuzhou PLA units, is a native of Xinzhu County, Taiwan. Pressed into military service by the Kuomintang and sent to the mainland, he was moved and inspired by our army. He revolted and crossed over in 1946.

NEW FILMS SHOWN FOR NATIONAL DAY

OW300734 Beijing XINHUA in English 0714 GMT 30 Sep 80

[Text] Beijing, 30 Sep (XINHUA)--"You Can Be Proud of Me, Mama," China's first feature film on the 1979 battles in defence of China's borders against Vietnamese troops, will be shown this national day. A Changchun production in color, the film tells how a group of young soldiers defend their country and a mother's sorrow and courage on the death of her son.

Other new film attractions involve the chaos and harm of the Cultural Revolution and the people's yearning for Taiwan's return.

"Tenth Bullet," a Sian production, traces the life story of a veteran public security man who received nine bullet wounds in past years of revolutionary wars and was jailed on false charges by the "gang of four." In his first case on his resuming post, he found the criminal to be his only son. Left alone when his parents were in jail, the boy had suffered a great deal and come under the influence of the ultraleft, finally was party to a sabotage attempt. To the father, this was the tenth bullet wound.

"Love of Lushan," a Shanghai widescreen love story, gives views of Lushan Mountain's sea of clouds, waterfalls, ancient pines and winding paths.

"Spy," produced in Changchun, reveals how factional quarrels are used by the enemy. The story is set in the 1930's.

"Loyal Hearts" is adapted from one of Beijing's first dramas about medical scientists persecuted by the "gang of four."

QINGHAI MURDER CASE STIMULATES PUBLIC DISCUSSIONS

SK250932 Xining Qinghai Provincial Service in Mandarin 1100 GMT 23 Sep 80

[Text] According to QINGHAI RIBAO, a murder was committed at noon on 1 September at a room in [words indistinct] living quarters of the highway section of the Qinghai Provincial Communications Department. A man shot a girl to death and wounded her older brother with a 45-caliber pistol. Subsequently, the murderer killed himself.

The murderer was (Zhou Jianguo), 25, a cadre at the Xining Municipal Public Security Bureau. The victim was (Zhang Li), 21, a nurse at Qinghai Medical College Hospital.

(Zhou Jianguo) had been in love with a girl in his college class. In April 1979 he met (Zhang Li) when he was taking field training at Qianghai Medical College Hospital. He tried to woo her. Being honest, upright, diligent and responsible, (Zhang Li), a nice girl, refused his proposal. Desiring to improve herself, she believed that she should concentrate on her study and work while she was still young. After several contacts, she learned that they were different in character and had nothing in common. More than once she told him to leave her alone. (Zhou Jianguo) became depressed and planned the murder.

On 31 August (Zhou Jianguo) tried to force the girl to sign a suicide pact with him.

Around 1000 the next morning, (Zhou Jianguo) called at the girl's home and continued to torment her. At noon the girl's two brothers returned from work. Learning that (Zhou Jianguo) had been inside with their sister for hours, they knocked at the door and asked Zhou to open it. Zhou refused to let them in. Finally, the girl's younger brother lost his temper and broke down the door. The murder ensued.

The broad masses are indignant on learning of the murder. They all say that being a public security officer and knowingly violating the law by murdering such a nice girl, (Zhou Jianguo), even after his death, should be bitterly criticized. Everyone is sorry about the death of (Zhang Li).

QINGHAI RIBAO carried a brief commentary on this case 23 September. It states: Young people are apt to commit suicide and murder when they are confronted with frustrations such as failing a university entrance examination. Disappointment in a love affair or lack of promotions also lead to frustration. We must heed this abnormal social phenomenon. No one can avoid frustrations. The question is what attitude we adopt in facing difficulties. Some people use them as experience and learn from them: they deserve to be called strong men. Others blame everyone but themselves when they are defeated. They collapse after a single setback. They may even lose confidence and commit suicide. These persons are cowards. There are also those who will become desperate when their selfish goals are unlikely to be attained. They may hurt or kill others. These persons are black sheep.

All social circles should strengthen the education of youths on the legal system and the proper outlook on life. All departments that possess weapons must strengthen controls over weapons, forbid their abuse and strictly guard against theft and loss.

AN ANALYSIS OF RONALD REAGAN'S CHINA POLICY

Hong Kong QISHI NIANDAI [THE SEVENTIES] in Chinese No 9, 1 Sep 80 pp 60-61

[Article by Chu Sheng [2806 3932]: "Reagan's China Policy"]

[Text] When U. S. Senator Goldwater, in pursuit of the presidential throne, won the Republican nomination in 1964, Ronald Reagan, then only an actor in Hollywood, first went into politics and campaigned for him. Goldwater suffered a crushing defeat at the hands of Johnson of the Democratic Party.

Goldwater failed because he was too conservative. Before running for the presidency, he even opposed many of the policies supported by Republican president Eisenhower and the moderates in Congress; therefore, how could he win the support of the broad voters? Again serving as a senator later on, he was a well-known leading figure of the ultrarightwing faction of the Republican Party and the treasure of Taibei.

Let us see how he, in the U. S. Senate on 6 August, interpreted Jiang Jingguo's announcement on holding an election at the end of this year. He said that Jiang Jingguo's move was "a momentous step for the Republic of China to stride toward a perfect and model democratic government." (Cited from CENTRAL NEWS AGENCY; not seen in other foreign press reports). Recently, he even denounced Beijing's criticism of Reagan's statements on the China policy as interference in U. S. elections.

The market for Goldwater's views is becoming more limited in the U. S. government and with the public. However, Ronald Reagan, a Goldwater protege of former years and a rightwing Republican, has been considerably edified, and even his advisers have close ties with Taiwan.

According to the WASHINGTON POST of 6 June, one of Reagan's important advisers is the head of a public relations firm in California. Some 2 1/2 years ago, he accepted an employment contract with the Taiwan authorities at a monthly allowance of $5,000 to propagandize for Taiwan in America, including preparing statements for Reagan in support of Taiwan and against maintaining relationships with Communist China. The measure was endorsed by Reagan.

Taibei's ZHONGGUO SHIBAO [CHINA TIMES] of 18 June cited reliable sources in Washington saying that, if Reagan was elected, possibly he would send a personal representative to Taibei and improve U. S.-Taiwan relations, and that the representative would discuss with Jiang Jingguo such momentous issues as the sale of arms.

However, what produced the strongest reaction were Reagan's statements when campaigning for nomination in Detroit, Cleveland and (Michigan). He declared repeatedly that, if elected, he would resume "official relations" with Taiwan. Even though the point was not included in the Republican platform, Reagan remained his old self and held firmly to his own view.

Though the reactions of the U. S. government and public and of China, which was the party concerned, were unfavorable, Reagan's China policy remained vacillating and uncertain.

On the part of Communist China, Chairman Hua Guofeng and Vice Premier Zhao Ziyang in charge of daily affairs, when receiving U. S. congressmen in July, censured, without naming names, Reagan's campaign promises.

U. S. Undersecretary of State Holbrook felt that, if Reagan considered changing the relations with Taiwan, it would bring negative results to America's strategic position in Asia. He cited the newest public opinion poll which indicated that two-thirds of the Americans had a favorable impression of China.

General (Haigue) (President Nixon's aide), former commander of NATO, whose views receive Reagan's serious attention, felt that the best way to protect the security of Taiwan was to maintain a good relationship with Beijing, and that, if Beijing felt that its territorial sovereignty was not under external threat, it would continue to tolerate the status quo of Taiwan.

U. S. Senate majority leader Byrd (Democrat) declared that Congress would block Reagan from resuming complete diplomatic relations with Taiwan.

In a didactic tone, he said: "As an individual running for the presidency, he may be ambiguous, unclear and uncertain of the issues, but once winning the presidency, he will become more steady and realistic in his thinking, because he will be dealing with the real world."

Never having dealt with the real world, Reagan encountered for the first time the setback brought on by himself. A comment in the British ECONOMIST said that, if Reagan wanted to become an Eisenhower, he must free himself from "Goldwater's shadow" in the mind of the voters. His foreign affairs advisers hurriedly defended their boss. His chief foreign affairs adviser (Ailun) said that at present there would be no change in the relationship with Communist China and indicated that the possibility of supplying non-offensive military equipment and other material to Beijing was not ruled out.

(Ailun) said that Reagan merely wanted to study the possibilities of establishing official relations with Taiwan but never thought of resuming diplomatic relations with it.

The chairman of the Republican platform committee (Tuoer) also agreed that there was no possibility of restoring the old relationship between the U. S. and Taiwan prior to Carter's recognition of mainland China.

The defenses failed to pacify public indignation. Thus, Reagan took his first diplomatic initiative on 4 August and announced that he was sending his campaign partner Bush and (Ailun) and others to the Orient. The group would arrive in Beijing on 20 August after visiting Japan, utilizing Bush's favorable status as the former chief of the liaison office in Beijing to intercede with Communist China. However, just when Bush started on his trip to China, Reagan again mentioned establishing the so-called "official relations" with Taiwan. JENMIN RIBAO promptly reacted and asked Reagan "not to miscalculate." Bush and (Ailun) again did their patching up in Tokyo and Beijing. Bush also said: Reagan and I both feel that the relations between the U. S. and China will continue to develop harmoniously. He denied that Reagan promoted "two China's," and even declared that the Taiwan Relations Act passed by Congress after resumption of relations with Beijing limited the power of the president and stipulated the non-governmental relationship with Taiwan.

Undersecretary of State Holbrook pointed out sharply that the statements of Reagan and Bush and (Ailun) were not consistent. Besides indicating Reagan's ignorance in foreign affairs (he never clarified the form of official relations), it also reflected the split on the China policy between the different factions in the Republican party.

However, unquestionably it is absolutely impossible for Communist China to permit the resumption of relations between the U. S. and Taiwan. Before the establishment of diplomatic relations with China, not that the then Secretary of State Vance did not want "to keep the cake and eat it," proposing setting up an embassy in Beijing and a liaison office in Taibei, but his proposal was rejected by Beijing. Reagan's manifestations this time only revealed his own vacillation on foreign affairs and the internal split of the Republican party, unfavorable to the election.

Naturally, Taibei jumped with joy over Reagan's early manifestations on resuming relations with Taiwan. However, with the changes in situation discussed above, it had to sober up and refrain from rashness, for fear of repeating a bad dream. Taiwan Provincial Chairman Lin Yanggang [2651 3152 3263] visited America from the end of July to the beginning of August, and observed, in passing, the election situation of that country. Upon his return to Taibei, he informed the reporters: "We will not support either side or any political party. The relationship between the U. S. and Taiwan is not determined by whomever that is the president, but by the people of the two countries." It was a strong indication that Taiwan had given Reagan up. The Taibei LIANHO BAO [ALLIANCE NEWS] also published an editorial stating: "Bush's explanations to Communist China easily make one realize that the Beijing policy of the future Reagan government will not depart from that established by the two Republican governments in the past, i.e., the policy of normalizing relations, which is actually the policy now in force." In other word, the Republican and Democratic parties sing the same tune.

This time, one can say that the Guomindang is more penetrating in its observations. Actually, campaign promises are often empty words. Didn't Eisenhower, before his inauguration, say that Eastern Europe would be liberated from the Soviets? Didn't the 1976 Democratic platform guarantee the gradual withdrawal of troops from South Korea? Those promises were never made good.

Naturally, if the Republicans win, the relationship between the U. S. and Taiwan will probably improve. Reagan may possibly utilize the Taiwan Relations Act to reinforce the tie between the two sides, such as facilitating, by means of semi-official status, the dealings of Taiwan representatives with the various departments of the U. S. federal government.

Meanwhile, the amount of arms sold by the U. S. to Taiwan may possibly increase greatly with Reagan's assumption of power. In 1979, after the establishment of diplomatic relations between China and the U. S., the U. S. sold $800 million in arms to Taiwan in 1 year. In the first half of this year, the U. S. Congress approved the sale of

$28C million in arms to Taiwan, and the U. S. government permitted (General Dynamics) and the (Northrop Aircraft) to discuss with Taiwan the sale of advanced FX warplanes. All such measures were openly opposed by Communist China.

The financial concerns in the west and the south backing Reagan all possess colossal arms industries. (California and Texas are the largest arms production bases in America, occupying first and second positions in military orders). They hope to further develop the arms market in Taiwan through Reagan.

However, even if Reagan is elected, just how far he will go in his Taiwan policy will still have to depend on how he balances the Taiwan issue with the entire international strategy.

In his new book ("Real War,") former U. S. President Nixon pointed out: "China's direction is primarily determined by Beijing, but also by the U. S. The Chinese leaders are primarily concerned over China's survival. Thus, they must effectively resist the Soviet threat. Under this situation, the U. S. must win China's trust, making it feel that the U. S. is a long-range reliable and powerful friend. If America's conduct makes China feel that it is unreliable, it will influence China's direction and its attitude toward the Soviet Union."

One believes that probably no U. S. president will destroy the world balance of power just to please a handful of rightists.

PROBLEMS FACING UNGA SESSION DISCUSSED

HK261515 Hong Kong TA KUNG PAO in Chinese 15 Sep 80 p 2

["Political Talk" column by Shih Chun-yu: "The 35th UN General Assembly Will Be Facing the Same Old Problems"]

[Excerpts] The Secretary General's Report

The 35th UN General Assembly will open in New York on 16 September. On the day before the opening of the General Assembly, the UN Secretary General Waldheim made a report on the work of the UN, introducing its activities over the last 1 year.

The report was 25 pages long. On the whole, it admitted that the UN had not fulfilled its tasks in the past 1 year in disarmament and in settling various international disputes. Let's not discuss disarmament since it is a same old problem and nothing has been done about it for a number of years. However, it is a fact that the UN cannot curb the expansion and invasion of great and small hegemonists despite strenuous efforts.

On the other hand, the report expressed worry about the current worldwide arms expansion and called for the governments and peoples attention to this tendency.

A Pessimistic Attitude Toward the Future World Situation

The report carried a pessimistic attitude toward the future world situation. It demanded cooperation of all countries but it did not point out what were the roots of the disasters. The problems in Afghanistan and Kampuchea are related because both have life-and-death struggles taking place. On these two issues the UN has held two assemblies and passed resolutions by overwhelming majorities, demanding that the Soviet Union and Vietnam unconditionally withdraw all their forces. However, both the Soviet Union and Vietnam ignored those resolutions of the UN General Assembly and continued their invasion into these two sovereign states. Israel has repeatedly sent troops to invade Southern Lebanon and even declared its annexation of East Jerusalem and proclaimed Jerusalem as its capital. Because of this, the UN issued several warnings to Israel. But what was the result?

Regarding the delignment of hostages in Iran for over 9 months, the UN has made every effort to reach a settlement. The UN secretary general even went to Tehran in the hope of mediating. However, the hostages have not yet been released.

Nowadays, it is not just the superpowers who ignore international morality and justice and pay no attention to the UN resolution. But some small countries have begun to do so for the sake of their own petty interests. And the very existence of the UN is in question at present.

Minor Achievements of the UN

The UN has fulfilled quite a number of tasks. However, it has been weak in dealing with the most important--safeguarding world peace.

It is a fact that arms expansion exists. The Soviet Union is the chief culprit that has led the world on to this dangerous path in the past few years. Its invasion of Afghanistan is an important step in pushing its global strategy and building up a fortified base to plunder the Middle East oil. For this reason, the United States and Western Europe began to strengthen military defenses to meet the next move of the "Polar Bear." Vietnam's invasion of Kampuchea has forced the Asean nations to strengthen their forces. It is obvious that it was the hegemonists such as the Soviet Union and Vietnam that began this worldwide arms race.

Rebuild Prestige of the UN

The UN General Assembly will open soon. The problems that they will face in the coming year will be the same old problems. The UN will not be able to rebuild its prestige until it finds a way to curb Soviet and Vietnamese aggressions. It seems that all countries should consider how to strengthen the UN as an organization in order to maintain world peace.

LIU SHAOQI'S DOWNFALL, IMPRISONMENT DESCRIBED

Hong Kong ZHENGMING [CONTEND] in Chinese No 35, 1 Sep 80 pp 44-47

[Article by Liu Ying [2692 3851]: "The Last Talk Between Mao Zedong and Liu Shaoqi"]

[Text] The portrait of Mao Zedong in the Great Hall of the People in Beijing has been quietly taken down, and the New China book store has begun anew selling the works of Liu Shaoqi. The true faces of these two big bosses of the Chinese communists are being restored bit by bit, while the secrets and ugliness covered up by the Cultural Revolution are being slowly uncovered. Although the work of restoration and revelation is proceeding very slowly and not at all thoroughly, the people can nevertheless see, through certain crevices, some of the true pictures.

Liu Shaoqi did not know before-hand about the Hongzhou Conference to set the Cultural Revolution in motion and to purge Liu Shaoqi and the others--that was a plan that had long been nurtured but never disclosed by Mao Zedong. Naturally Liu Shaoqi, having been kept in the dark, could not have known about it. However, indications of certain events did arouse Liu Shaoqi's suspicion.

In April 1966, upon his return to Yunnan at the conclusion of his visit to Burma, Liu Shaoqi suddenly received a long-distance telephone call from Zhou Enlai, saying that the Political Bureau of the CCP Central Committee had already begun an enlarged meeting in Honzhou. Hearing this, Liu Shaoqi was rather puzzled. After all, he was the vice-chairman of the Party Central Committee. Why then had he not had the slightest inkling that such a meeting was to be held?

The Hongzhou meeting was a very important meeting in the history of the Cultural Revolution. In that meeting, individuals like Peng Zhen [1756 6297] were singled out by name for criticism, and the "Programmatic Document of the Cultural Revolution" was formulated (Circular of 16 May). In fact, that conference was a conference for the "Declaration of War" for Mao Zedong to set the Cultural Revolution in motion. But, from the very beginning, Liu Shaoqi had been quietly kept in the dark.

Liu's Sleeping Pills and Mao's Telephone Calls

Factually speaking, Liu Shaoqi did not have any aggression or animosity toward Mao Zedong. Prior to the Seventh Party Congress of the Chinese Communist Party, Mao Zedong's prestige in the party was not terribly high. Liu Shaoqi did his best to help establish Mao's prestige and power. Among the high level cadres of the Chinese Communist Party, Liu worked the hardest. Then, the Seventh Congress was convened in which Mao Zedong's prestige and power were duly established. So, Liu Shaoqi figured that his goal had been realized and, therefore, no longer pushed this goal. Liu Shaoqi's daughter said the following during the Cultural Revolution: "Whenever he (Liu Shaoqi) was asked why he did not hold high the great red banner of Mao Zedong Thought, as my younger sister later told, he answered that, 'Before the Seventh Congress, Mao Zedong's absolute prestige had not been established but became established after the Seventh Congress. Before it had been established, great effort had to be taken to establish it; but once it had been established, it was a reality, no matter what the people said.'" It is obvious that Liu Shaoqi worked much toward the establishment of Mao Zedong's prestige.

The respect Liu Shaoqi had for Mao Zedong could also be seen from certain events in his daily life.

Ordinarily Liu Shaoqi could fall asleep only after having taken sleeping pills twice. After the first, and milder, dosage of sleeping pills, he would usually look through some documents and papers; then, he would take the second and stronger dosage. After this, he would go to bed. Before going to bed, he always told his secretary not to awaken him for any telephone calls, except for those from Mao Zedong. However, Mao Zedong always called at this time, because he was used to working at night and sleeping during the day. Therefore, he frequently telephoned to chat with people during the middle of the night or in the small hours of the morning.

Whenever this happened, Liu Shaoqi would always get up immediately, wash his face with cold water, make a cup of strong tea to wake up and go to see Mao Zedong without delay. When he came back he would get busy with the work that Mao Zedong had laid out for him. There was no way for him to go back to sleep. This happened often and Liu Shaoqi never complained.

The Change in Liu Shaoqi's Thinking

But all political struggles have their own rules and regulations, and the loyalty to friendship can not eradicate the conflicts brought about by political contention. Very soon after the eruption of the Cultural Revolution, Liu Shaoqi suffered his first fall at Mao Zedong's hands. It was over the question of dispatching work teams.

Mao Zedong, after having personally lit the fierce fire of Cultural Revolution in Beijing, left for an inspection tour in the south, leaving Liu Shaoqi to handle the daily routine. Liu Shaoqi had not the slightest idea as to how Mao Zedong wanted this Cultural Revolution to be conducted.

So he followed the regular pattern which had been used in the previous 17 years. In light of the experience with past political campaigns, it was customary to dispatch work teams. Hence, Liu Shaoqi dispatched work teams after having requested Mao Zedong's permission to do so.

However, when Mao Zedong returned to Beijing from the south in the latter part of July, he suddenly criticized Liu Shaoqi's dispatching of work teams as "oppressing and silencing the people." Immediately after, he wrote during the 11th Session of the All-China Party Congress of the Eighth Central Party Committee ("Shelling the Headquarters--My First Big-Character Poster,") that Liu Shaoqi's name had been moved down from number two to number eight in the name list of the Chinese Communist Party.

Since Liu Shaoqi could not understand the reasons for this sudden criticism and demotion, he was bound to grumble sometimes at home. However, due to his many years' trust and loyalty toward Mao Zedong, he still believed, out of habit, that he himself must have committed some errors. Therefore, he ordered his chauffer, after the Eighth Party Congress, not to drive his car to the front any more but to take the eighth place in the convoy when ever he was riding among the other leaders. At the same time, during the work conference of the Party Central Committee held in October, he made a sincere self-examination and genuinely believed that this self-examination would meet with the understanding of the other party leaders.

But, things did not go the way he had imagined. When the "January Storm" came in 1967, conditions had already changed to such a degree that it was even harder for him to understand the situation--almost all the responsible cadres of all the provinces were criticized and purged; and more and more people were struck, and fell. Liu Shaoqi's faith also faltered. In a letter to Mao Zedong, he expressed two opinions: "1. The responsibility for taking the wrong line this time lies with me. The broad cadres are good, especially those old cadres who are the valuable assets of the party. I take the major responsibility. So, set the cadres free as soon as possible, so that the party will not sustain too much damage. 2. I will resign from the positions of chairmanship of the People's Republic of China, of the standing committee of The Party Central Committee and of the editorial committee (for "The Selected Works of Mao Zedong.") I will take my wife and children to Yenan or to my native place to take up farming in order to end the Cultural Revolution at the earliest date and to spare the nation from damage."

By the time Qi Bengyu's [2059 2609 5736] article "Patriotism or National Betrayal" came out, Liu Shaoqi's anguish of "incomprehensibility" had already turned to deep anger. Of course, his anger was not directly aimed at Mao Zedong but at Qi Bengyu and the others who were campaigning for the "Party Central's Cultural Revolution." Qi Bengyu's article was the first open criticism against Liu Shaoqi, though his name was not mentioned. Liu Shaoqi's children and those who worked closely with him questioned him about the "charges" listed in the article. He was very angry about these charges and refuted every one of them.

The Last Talk in the Beijing Hall

After a few months of criticism, Liu Shaoqi's morale worsened. By then he had not seen Mao Zedong for a long time. He really wanted to have a good talk with Mao Zedong, but there was no chance.

In July of 1967, Mao Zedong suddenly notified Liu Shaoqi to come for a talk to the Beijing Hall in the Great Hall of the People. Liu Shaoqi was very happy and immediately rushed over.

In this Great Hall, Mao Zedong and Liu Shaoqi together had held many conferences. But this time, the two figures at the summit of the Chinese Communist Party were having their last talk.

The Beijing Hall is located on the upper floor of the Great Hall of the People, near a snack counter and the lounge. A carpet with a brown color design lay on the floor and there were brown sofa chairs arranged in a circle.

Sitting in the brown sofa chairs, Mao Zedong and Liu Shaoqi began their last talk. It lasted for one hour and 45 minutes. The atmosphere was amiable. On the way out, Mao Zedong even patted Liu Shaoqi on the shoulder warmly, asking him to read three books when he got home--one by Feuerbach, one by Hegel and another one.

Liu Shaoqi's mood was really good when he returned home from the Great Hall of the People. He was like a long-suffering patient who had suddenly received a dosage of a miracle drug. But this good mood did not last long.

Liu Shaoqi Looks Around for Wang Guangmei [3769 0342 5019]

Liu Shaoqi's home was searched on 18 th July. During this search he was separated from Wang Guangmei--his children had long been isolated from him.

Liu Shaoqi and Wang Guangmei were under house-arrest, kept separated in the front and rear courtyards. Over the entrance between the two courts there hung a bamboo curtain. Each time Liu Shaoqi was let out for fresh air, he would stealthily peep through the curtain to see if Wang Guangmei was there. Ever so often, it happened that Wang Guangmei was also out for fresh air at the same time. He could see her silhoutte vaguely.

On September, Wang Guangmei was officially arrested, taken from Zhongnan Hai, and imprisoned. Liu Shaoqi did not know about it and thought all along that she was still under house-arrest. So whenever he was let out for fresh air he would continue to look for Wang Guangmei through the bamboo curtain. But he could never see her. He thought: "Perhaps

Wang Guangmei is being taken away for sessions of criticism and purge." But he quietly wondered: "Why is Wang Guangmei not back yet?"

Liu Shaoqi and Wang Guangmei cherished each other very dearly. When Liu Shaoqi was struck down, Wang Guangmei was particularly concerned and did everything possible to take care of him. Many a bothersome development was taken care of by her. For example, whenever people came to search their house, it was Wang Guangmei who faced them. Again, when people came to pressure them for secret documents, Wang Guangmei held on to the keys, firmly refusing to unlock the safe.

Having not seen Wang Guangmei for a long time, Liu Shaoqi's morale became worse and worse and his emotional state deteriorated.

Mao Zedong's Written Instructions

When Liu Shaoqi was first placed under isolated house-arrest, Mao Zedong issued written instructions not to lower the standard of Liu Shaoqi's medical care or diet.

However, when the entire society was churning wave after wave of hatred toward Liu Shaoqi and when any behavior, although overly ultra-left, could appear legal behind the facade of the "campaign of the masses" or the "demand of the masses," even written instructions from Mao Zedong amounted to nothing more than a sheet of blank paper.

Liu Shaoqi's kitchen staff refused to prepare decent meals for him, giving him only hard corn bread to eat day in and day out. Originally, there had been a cook in Liu Shaoqi's house, by the name of Hao Miao. Before liberation, he was an apprentice for western cooking at the Cui Ming Cottage, where Ye Gianying [5509 0494 5391] had resided when the negotiations were going on in Beijing between the nationalists and the communists. After the liberation, Hao Miao was dispatched to Liu Shaoqi's house to work as a cook--and thus began 18 years of service. A very good relationship existed between him and Liu Shaoqi's family. During the Cultural Revolution, despite the fact that Liu Shaoqi received much criticism, Hao Miao still was devoted to him--heart and soul. This loyalty brought him great grief later, for in May 1967 (2 months before Liu Shaoqi was detained in isolation) he was imprisoned and kept imprisoned for 6 years. After Hao Miao's arrest, a new cook was sent over. This individual--perhaps because he had drawn a lesson from Hao Miao or becuase he was under the influence of the anti-Liu Shaoqi mood prevalent in society at the time--refused to perpare good for Liu Shaoqi. Every day Liu Shaoqi was given only corn bread to nibble on.

Mystery of the Calabash-shaped Bottle

The medical care that Liu Shaoqi had been receiging also stopped. Liu Shaoqi had diabetes and had been receiving a certain Japanese-manufactured drug all along. After his house-arrest, this drug was no longer supplied to him. When this medication was stopped, his hands began to shake so much that he was unable to light a cigarette. This was followed by other symptoms--cells in the brain began to deteriorate which affected control of his legs--all of which were treatable with medication. But these people were unwilling to let Liu Shaoqi have his treatments. Diabetics should eat more vegetables and nutritional food and fewer foods that contain much sugar and starch--but they just let him eat bread made of cornmeal.

The year before his death, Liu Shaoqi stopped talking altogether and refused to eat any food. Whether this was because of his physical weakness or because of his deep despair has become a mystery which followed him to his grave. After his detention in isolation Liu Shaoqi no longer had anybody with whom he could communicate. So who could have known the world deep in his heart?

When Liu Shaoqi refused to eat, the guards forced liquids into his mouth. His physical condition deteriorated.

He usually appeared restless and impatient, his two bony arms constantly stretching out, grabbing aimlessly in the air. No matter how the guards tried, they could not stop him. One day, when a guard accidentally pushed a calabash shaped bottle into his hands, he suddenly held the bottle tight and calmed down instantly. Later on, whenever he had his stretching out and grabbing aimlessly in the air, the guards would push this bottle into his hands. He always calmed down at once.

Why did Liu Shaoqi quiet down whenever he had this bottle in his hands? This is another mystery.

After Liu Shaoqi became rehabilitated and redressed, someone approached Wang Guangmei with this question. Wang Guangmei could not give an immediate answer. Only after a great deal of recollection did she remember that she had kept prickly-heat powder for the children in a calabash-shaped bottle. Could it be that this bottle made Liu Shaoqi feel again the affection of his children and the warmth of his home, and thus made him calm? This question can not be answered.

Wang Dongxing [3076 2639 5281] was the section chief for handling the "special case of Lir Shaoqi." So, the guards regularly reported to him all information on Liu Shaoqi's condition.

After 1968, Liu Shaoqi's illness became more and more serious. When Wang Dongxing heard about this, he said to the guards at once, "don't let him die but keep him in a state between living and dying, because when the Ninth Congress convenes, he can serve as a live witness."

Besides, Wang Dongxing himself went regularly to the house where Liu Shaoqi was detained. There, he would peep in from the outside, to see how Liu Shaoqi was getting along.

Soliciting Liu Shaoqi's Opinion

In 1969, Lin Biao's "Strategy No 1" was put into operation. At that time, the supreme strategists of the Chinese Communist Party decided to transfer under escort all the highest level political criminals out of Beijing. Such criminals, of course, included people like Liu Shaoqi.

Before the transfer took place, the guards had tried to solicit Liu Shaoqi's opinion about it. But Liu Shaoqi, at that time, had not spoken for more than a year. Therefore a nurse wrote on a newspaper, with a piece of cotton dipped in ink, these few large characters: "Leave Beijing." "Consent?"

Liu Shaoqi opened his eyes and looked at these characters feebly. But, he neither nodded his head to indicate consent nor did he shake his head to object. He only turned his face to the side, signifying that he refused to answer the question.

Actually, in his situation it really made no difference whether Liu Shaoqi consented or not. His decision of staying or leaving would not have made any difference. As to the question of who had instructed the guards to get his opinion and why his opinion was even solicited in the first place --these, again, are two mysteries that have not been unraveled.

At the Jin Cheng Bank

On 17 October 1969, Liu Shaoqi was transferred under escort to Kaifeng.

The Place where he was detained in Kaifeng was not a regular prison of the barracks of the Liberation Army, but the site of a former bank.

It was the Jin Cheng Bank during the nationalist days. After the liberation, it became the office of the Municipal People's Council. Within the large courtyard of the bank, there was a smaller yard, which, having none of its sides adjacent to the streets, was very secluded. Therefore, it became the special secret jail for Liu Shaoqi's imprisonment.

When Liu Shaoqi was first taken there under escort, 48 burly chaps were standing at the first gate and 26 more at the second gate. The security was certainly tight. The stretcher with Liu Shaoqi on it was placed in a small room at the southern end on the first floor of the west building. After 27 bed-ridden days in this small room, Liu Shaoqi quietly left this world. Then, his body was pushed into the vault in the cellar. When the guards were making the last check on Liu Shaoqi's body, they found that a thermometer was still under his armpit. This shows the lack of medical care given him.

Death put a stop to the suffering of Liu Shaoqi's flesh, but the injustice suffered by his soul could not disappear together with his flesh. Liu Shaoqi firmly believed that "history is written by the people"; in other words, all the rights and wrongs in history have to be judged fairly by the people. Of course, this belief is correct in a broad sense and in the long-run. However, when the people want to record the concrete history of a particular period, they often find it impossible to do so for lack of inside information. Unfortunately, up till now, because of all kinds of "security" reasons, too little information in this respect has been made public by the Chinese communists.

PARTY AND STATE

WE MUST LOOK AT FACTS WHEN IMPLEMENTING POLICIES

Jinan DAZHONG RIBAO in Chinese 21 Aug 80 p 3

[Article by Zhang Tao [1728 3447]: "Only By Seeking Truth From Facts Can We Correctly Implement Policies"]

[Text] The party's policies are based on the premise that truth can be derived only from an examination of facts. Whether in practice or in theory, it is important to bear in mind the inherent relationship between implementation of the party's policies and the need to seek the truth by examining the facts.

The party's policies are formulated on the basis of the course of action which should be taken in order to follow the line and fulfill the mission set in a particular historical period. Like theories, planning, principles, and courses of action, matters of policy belong to the realm of thought. A correct policy is the true reflection of the world as it is and of the laws that govern it. It can be arrived at only by examining the facts. However, we still have among us some leadership cadres who are not concerned about finding out how a correct policy comes to be formulated. They only see the great impact created by the party's policy on the positive attitude and the creative power of the masses. They do not realize that this power is derived from the party's policy which is founded on actual facts and is a reflection of the basic interests and wishes of the masses. Some have the incorrect view that a correct policy and the correct course of action are not reflections of objective circumstances and of the laws pertaining to such circumstances, but that they are correct because they are formulated by the leadership. These comrades often confuse authority with truth by taking the view that "leadership and policy are one and the same." Because they do not bother to delve into the actual circumstances, they do not have the "facts" in hand and they do not use their heads to seek the truth. They merely rely on their own assumptions in providing leadership to the masses. By veering to the left and then to the right, they have dealt a serious blow to the positive attitude of the masses. Only by relinquishing our subjective views and seeking the truth through a careful examination of facts can we implement our policies in a correct manner.

In both the natural world and in human society, continual development results from the interaction of internal conflicts. A policy must correctly reflect objective circumstances and the laws pertaining to such circumstances. It must also be continually developed and revised to keep in step with changing objective circumstances. We must formulate our policies by taking into account the changes that have taken place as a result of changes in objective circumstances, so that our subjective views may be more attuned to objective circumstances. It cannot be expected that, once formulated, a policy will fully reflect actual objective circumstances, or that our subjective views will be perfectly in line with actual objective circumstances. This is especially true with respect to implementation of the four modernizations, because of very complicated circumstances. Some of our comrades do not have a clear understanding of this. When the party revises its original policy, or when it proposes a new policy to meet changing circumstances, these comrades, instead of looking at the actual circumstances and weighing the merits of the revised or new policy, quote statements made in the past in attacking and denouncing the revised or new policy as smacking of "rightism" or "revisionism," contradictory thinking, and indecisiveness in policy implementation. They are badly mistaken.

When a policy is in the process of being implemented, certain practices may be noted. There are those who try to get things done with "one stroke of the knife." Regardless of adverse conditions, and under whatever circumstances, they set the same standard and progress at the same speed. Some follow instructions to the letter, regardless of the consequences, as long as they are written on a piece of paper with a red letterhead or are handed down by the authorities. Others challenge, on grounds of special circumstances, the validity of the general guiding principles of a policy, claiming that the party's policy does not apply to them, or they take a lackadaisical attitude in implementing the policy. All these aberrations are the products of subjective and metaphysical ways of thinking.

According to dialectical materialism, contradictions, whether in general or in particular, exist in all objective situations. A policy is the embodiment of the sum of numerous concrete situations. It was Lenin, in summarizing the relationship between particular and general situations, who said, "A particular situation exists only as it relates to a general situation. A general situation exists only as it relates to and through particular situations. All particular situations (no matter what) are general, and all general situations are particular (a part, a phase, or by its very nature). A general situation is but the sum total of particular situations, and no particular situation can be fully covered by general situations, etc." ("Collection of Selected Writings of Lenin," Vol 2, p 213) It was Comrade Mao Zedong who said, "The relationship between the general and the particular and the absolute and the relative is the essence of the conflict between situations. Failure to understand this is tantamount to abandoning dialectics." ("Mao Zedong's Five Chapters of Philosophical Writings," p 75). Regarding the line of thinking described above, there are some who take into consideration only the general at the expense of the particular, and there are those who arbitrarily overemphasize the particular at the expense of the general. They all fail to have a true understanding of the situation according to the rules of dialectics. They all have abandoned the line of thinking prescribed by the party--that truth can be arrived at only by examining the facts. They have all failed to implement the party's policies in a correct manner.

To correctly implement a policy, it is necessary to seek the truth by examining the facts, to give due regard to dialectics in assessing situations, and to understand that the formulation of a policy and the implementation of that policy involve a process of proceeding from the particular to the general and from the general to the particular. We should accept the fact that the party's policy is the product of the scientific abstraction of the sum total of numerous particulars and that, therefore, it should exert a general guiding influence. It should be understood that no single location or unit can cut itself off from the guidance of the unifying policy of the party. It should also be known that, while a policy has a general application, it is merely the sum of the essential characteristics of certain particular factors or parts of certain particular factors, and that it cannot embrace all the distinctive features of the particulars. In the process of implementing a policy, it is necessary to investigate and study the relevant factors in order to have a concrete understanding of a situation and to be able to propose specific measures which will meet the needs of a specific situation. The implementation of the party's four modernizations policy, for instance, is a reflection of the needs of the general situation throughout the nation. All localities and all units must therefore put construction of the four modernizations at the center of their efforts. However, different localities and different work units have their distinctive features. In the process of implementing the four modernizations, it is necessary to take advantage of one's strong points in adjusting, amending, reforming, improving upon, and heightening the policy of readjustment, restructuring, consolidation, and improvement. The need to adjust is crucial, as can be borne out by the comparatively serious maladjustments in the national economy brought on by Lin Biao and the "gang of four." In the implementation of a policy, we must not lose sight of the actual situation or follow orders as if by rote. Even those enterprises which have little or no responsibility for making adjustments should also pay attention to the need to introduce reforms and improvements. We should not, on the one hand, look upon the party's policy as a rigid model and try to ram it through without regard for actual circumstances, or, on the other, minimize its importance as a unifying guiding force. Under special situations created by different circumstances in different areas, we should not insist on absolutely complete implementation of a policy, nor should we ignore its existence. It is only when we take into account actual circumstances, act under the guidance of a unifying policy, and adopt flexibly the methods and measures most befitting the circumstances that we can effectively implement a policy. It is only thus that a policy can be put on the right track.

It should be said at this point that in the formulation or implementation of a policy, certain deviations and errors are unavoidable, in view of the limitations placed on the people by their different levels of knowledge, their practical experience, their reasoning power, and certain physiological factors, not to mention the complicated nature of objective circumstances. It is only when we seek the truth by examining the facts and make experience the only criterion in getting at the truth that we can discover our deviations and errors in time, find out the causes which give rise to such deviations and errors, benefit by learning from our errors, and adopt the proper corrective measures. After the adoption of a wrong policy during the difficult 3-year period, the entire party leadership, under the guidance of Comrade Mao Zedong, was able to discover and correct certain errors within a comparatively short period by strictly adhering to the principle of seeking the truth by examining the actual facts. Following the 10-year havoc brought on by the ultraleftist line and policy, we were not able to take corrective action for a long period of time because we failed to seek the truth by examining the actual facts. It was only after Lin Biao and the "gang of four" had been smashed that the party's excellent tradition of seeking the truth by examining the facts was restored and corrective action was taken. The lessons of history tell us that a policy can be correctly implemented only when we seek the truth by examining all of the facts.

TWO DIFFERENT POLICIES, LINES ON CADRES DISCUSSED

Hangzhou ZHEJIANG RIBAO in Chinese 25 Aug 80 p 3

[Article by Hu Jilong [5170 1323 7893]: "'Cherish' and 'Shield'"]

[Text] Cadres are valuable assets of our party, which is known for its long tradition of cherishing cadres.

The "guiding principles for inner-party political life" adopted by the Fifth Plenary Session of the 11th Party Central Committee is an important measure to effectively eliminate the pernicious influence of Lin Biao and the "gang of four" who were guilty of undermining the party's fine workstyle and discipline, and to strengthen and improve the leadership of the party. The "guiding principles" also calls for looking after and cherishing cadres politically. Practice proves that only by conscientiously implementing the "guiding principles," daringly exposing their violaters and firmly upholding party discipline can we rectify the party's workstyle, markedly improve the relations between the party and the masses and make party cadres more popular with the masses.

But it must be noted that at present, there are still some localities and units which have failed to thoroughly implement the "guiding principles." When a few cadres were criticized by the masses for seriously violating the "guiding principles," these localities and units have failed to defend these principles and carry out the ideological struggle for fear of irritating these cadres. Worse was the fact that they have done everything possible to defend these erring cadres and cover up their misdeeds until they could reduce such major issues to minor ones and minor ones to naught. Ironically, they called this "an act of cherishing the cadres." But the angry masses sharply criticized them by saing: "This is an act of shielding rather than cherishing the cadres!"

This criticism is completely correct. A clear distinction must be drawn between the two terms "cherish" and "shield." The term "cherish cadres" primarily means an endeavor to strictly educate them, to control and oversee their activities, to look after them politically, to allow them an opportunity to develop and increase their ability to serve the people, to take care of the daily needs of their families within the limits of our policy and material conditions and to help them solve their difficult problems. The term "cherish cadres" also means criticizing and educating cadres in an appropriate and friendly manner or even reprimanding them in case they committed mistakes. The term "shield cadres" means tolerating and condoning their wrong ideas and misdeeds that betray the interests of the party and people. It also means defending their shortcomings and covering up their mistakes. When erring cadres are treated in this way, they will have no way of knowing their mistakes, or how to conscientiously correct them and teach other comrades to avoid repeating similar mistakes. Furthermore, shielding erring cadres will result in endangering unity between the party and the masses and damaging the party's prestige among the masses.

The reasons for shielding cadres stem from many factors. For example, some comrades who want to shield cadres contend that cadres who have already suffered too much at the hands of Lin Biao and the "gang of four" should be punished no more even if they committed mistakes. This idea apparently results from their failure to distinguish between the plot of Lin Biao and the "gang of four" to frame false charges against the cadres and the present ideological struggle launched by our party to educate cadres through criticism and self-criticism. Lin Biao and the "gang of four" and company dealt merciless blows to cadres. They framed false charges against those cadres who opposed them, and deliberately exaggerated their mistakes to the maximum so that they could sentence these cadres to death on charges of non-existent crimes. Their aim was to destroy our party's cadre system and to pave the way for usurping the supreme party and state power. Our party's longstanding policy is to teach erring comrades to correct their mistakes through serious criticism, and to help them grow in a healthy environment so that they will be in a better position to serve the people and the purpose of the four modernizations. The criticism launched by Lin Biao and the "gang of four" against cadres was aimed at "viciously punishing innocent cadres" to death while our present criticism is aimed at helping those criticized and "preventing them" from committing more mistakes. We should never confuse the former form of criticism with the latter. In dealing with cadres who have shortcomings and who have committed mistakes, we must persist in seeking truth from facts. When we hear anything wrong with cadres, we should check it out be seeking truth from facts. We should not mistake wind for rain, deliberately exaggerate their mistakes and regard their minor errors as serious crimes. It is absolutely unfair to punish cadres without going through a thorough investigation. But this does not mean that we cannot launch necessary criticism against those comrades who have really committed mistakes. Nor does it mean that we cannot openly expose those cadres who have made serious mistakes and have shown no intention of correcting them. Disciplinary actions must be taken against them. Party members must be highly disciplined. A clear distinction must be drawn between those who merit commendation and those who deserve punishment and between right and wrong. In other words, those who have made contributions to the party must be properly commended; proper punishment must also be meted out to others who have made mistakes. Only in this way can we continue to promote healthy workstyles and overcome baleful influences in our society, induce all party members to work enthusiastically, and inspire party cadres to preserve their true nature as servants of the people. Some comrades are concerned that exposing others' faults in violation of the "guiding principles" may result in disrupting unity and may adversely affect their future working relations with them. For this reason, they prefer to make peace with everyone within the party whenever they detect any unhealthy trends affecting the normal inner-party life. Their philosophy is that the cultivation of "normal flowers" is better than the cultivation of "thorny roses." But we must understand that any that is not achieved on the basis of the party's principles will not last long, and anyone who wants to achieve rapport with others in this manner will end up being accused of cherishing and unifying them in a wrong way.

Some comrades want to "cover up others' faults" for the reason that they "are now riding in the same boat, and therefore should sympathize with one another." In plain language, they have committed similar mistakes, and therefore have no right to criticize one another. One of them once said: "If I am wrong, do I have any right to criticize others?" In response to this question, I would like to suggest that he need not fear drawing fire from others while criticizing their shortcomings and wrongdoings, and that he voluntarily place himself under the supervision of the party and the masses and welcome them to expose and criticize his own mistakes. I also want to remind him that gone are the days when the people could practice feudal factionalism and "quackery" which led them to share "glory and humiliation" together and deliberately cover up each other's mistakes and prevent them from being exposed. As for those comrades still obsessed with feudal factionalism, we must take necessary actions to patiently and carefully educate them until they can extricate themselves from such feudal factional shackles.

In short, the practice of cherishing cadres and that of shielding them have nothing in common. These two different practices serve two different purposes and will produce two different results. They also represent two extremely different policies and lines on cadres. In order to defend the interests of the party and people and to insure the successful implementation of the four modernizations program, we must improve the style in party relations; we must never mistake "shielding cadres" for "cherishing cadres"; we must courageously launch criticism and self-criticism against those comrades who have commiteed mistakes, and struggle against them according to the "guiding principles for inner-party political life." Everyone should be aware that any attempt to cover up mistakes and wrongdoings and condone wrongdoers would not be tolerated; it is wrong to tolerate the decadent practice in which officials are encouraged to protect one another in case of scandals.

YOUNG PEOPLE TOLD TO RELY ON, SUPPORT THE PARTY

Taiyuan SHANXI QINGNIAN in Chinese No 7, 1980 p 34

[Article by Ji Yongfu [0679 0516 1133], Central Party School: "How Should the Party's Leadership Strength Be Viewed?"]

[Text] It seems that the question on how the party leadership should be viewed is somewhat in a state of confusion. The reason for it is that the question is not viewed from all angles.

Does our party have the strength to lead the construction of modernization to success? Looking back on our party history, there were people during the period of the democratic revolution who wondered "how long the red banner could hold up." Chairman Mao firmly answered: "A single spark can start a prairie fire." There were some who said during the years just following the founding of the People's Republic: "The Communist Party is capable of fighting a war, but as for construction it is out of the question." In fact, we have not only crushed an old world but we are also able to build a new one. At present, we also hear some people say: "The Communist Party is pretty good at carrying out class struggle, but not at implementing the four modernizations." The views of some people have been changing since the smashing of the "gang of four," and especially through practice since the Third Plenary Session of the 11th Party Central Committee. Practice has proved or is going to prove that our party is capable not only of leading the democratic revolution to victory, but also of leading the cause of socialist construction to success.

On the other hand, we must not lose sight of the fact that to adhere to party leadership, it is necessary to improve party leadership. We must fully see and understand the problems which are within or which face our party. It is more comprehensive to look at these problems from a developmental point of view. Now we should say: "There are many problems in our party which are incompatible with the development of the situation or with the hopes and demands of the masses. At the same time, we must admit that the prestige of the party among the people is not as high as in the past. Following the shift in the focus of party work, we are confronted by many problems which are more complicated than in the past, and our mission is more strenuous than in the past. That is why the party, at its Fifth Plenary Session of the 11th Party Central Committee, put forward the call to adhere to the party's leadership, improve the party's leadership, and raise the party's fighting power. It has also studied and resolved many important problems related to improvements in the party's organizational situation, and to the responsibility and system of the party's leadership. Documents such as the new draft amendment of the party constitution and the "Guiding Principles Regarding Inner-Party Life" are powerful weapons for greatly increasing the party's fighting power in order to adapt to the situation. The election of additional members to the Standing Committee of the Political Bureau and the establishment of the Central Committee Secretariat are important policy decisions designed to better adapt to the needs of the strenuous work of modernization, to ensure the long-term continuity of the lines, principles, and policies of the party, and to guarantee the long-term stability of the core of party leadership. Moreover, the new party constitution raises the question of abolishing the existing system of lifelong posts for cadres. This is a farsighted reform based on the historical experiences and lessons gained from the international communist movement and from our own party. This reform is advantageous to implementing the four modernizations, and it will play an important role in improving the leadership system of the party. All of these [measures] indicate that the party leadership is becoming stronger and stronger by summing up experiences, drawing on lessons, and marching forward continuously. It is very promising to see that our party will lead our country to implement the four modernizations in an all-round way by the end of the century.

PAST 'MISTAKES' OF CCP HAVE BEEN CORRECTED

Taiyuan SHANXI QINGNIAN in Chinese No 7, 1980 pp 2-3

[Article by Zhao Yuting [6392 7183 0080], secretary, Shanxi Provincial Party Committee: "Unswervingly Follow the Communist Party; a Talk to Young Comrades on How Mistakes Committed by the Party Should Be Viewed"]

[Text] In the new long march toward the four modernizations, we step forward to greet the 59th anniversary of the birth of the great, glorious, and correct Chinese Communist Party. Over the past 60 years, the people of the whole country, under the leadership of our party, have achieved signal victories one after another, after having undergone many winding struggles and overcome numerous difficulties and obstacles. This shining festival is most memorable to us.

The history of the Chinese revolution over the past 59 years tells us that the Chinese Communist Party is a most revolutionary and most advanced party that represents the correct direction for developing scientific socialism and the basic interests of the masses of people. During the period of the democratic revolution, the Chinese people, under the leadership of the party, have carried out arduous and remarkable struggles, overthrown the "three big mountains" that had lain like a deadweight on the backs of the people of our country, achieved a great victory in the new democratic revolution, and founded a new China. From then on, the great People's Republic of China has stood like a giant in the East of the world. Since the founding of our People's Republic, our party has once again led the people of the whole country to rapidly restore and develop the national economy, smoothly carried out a socialist transformation, and achieved important victories in socialist revolution and construction, putting an end once and for all to our poverty and backwardness. All of these irrefutable facts are obvious to and strongly impressed on all of us. You young comrades have never experienced the hardships of the old society and do not have the specific feeling of the contrast between the old and the new social systems. I hope that you will consult your parents, your elder brothers, and revolutionaries of the older generation. They will be able to tell you how the working people of the old society were discriminated against politically exploited economically. They will be able to tell you how corrupt and incompetent the reactionary rulers of old China were, and how the imperialists invaded and plundered us. They also will be able to tell you how, for a period of more than 100 years after the Opium War, advanced elements and people with lofty ideals in China, for the purpose of resisting the big powers, rejuvenating the nation, and seeking truth in order to save the country, experienced many hardships and shed their blood; however, they failed to alter the situation throughout their efforts. Only under the leadership of the Chinese Communist Party were the people of our country completed liberated. The historical facts show clearly that only the Communist Party can save China. This is an absolute truth which we must keep firmly in mind and be sure not to forget.

However, we now often hear that some young comrades say that, yes, the Communist Party is great, glorious, and correct, yet why did the party commit errors, especially major errors like those committed during the Great Cultural Revolution? Others even say that the Communist Party was great, glorious, and correct in the past, but it is not all that great, glorious, and correct now. One could follow the Communist Party in past, but now he can't. Even though such a view is extremely incorrect, it indeed exists in the thinking of some comrades. Since the problem exists, we cannot evade it but must give it an explicit answer. It is true that our party has in its history committed a lot of mistakes and some greater ones, and serious mistakes which were committed during the Great Cultural Revolution were very distressing. Moreover, everytime mistakes occurred, they brought losses in varying degrees to the cause of the party and the people. Mistakes committed during the Great Cultural Revolution were the most severe setbacks since the establishment of the People's Republic. We should not avoid mentioning the problems that have already occurred. Yet one divides into two, and it is said that a fall in the pit, a gain in your wit. Mistakes and setbacks did not cause the collapse of the party, but instead, every time we have experienced a mistake, we learned a profound lesson. The party's prestige has not been weakened, but heightened; the party's power has not been crippled, but strengthened. The experience of several mistakes committed in our history is like that, and the experience of the mistakes committed during the Great Cultural Revolution is also like that.

Our attitude toward committing mistakes should not be confined to realizing mistakes or admitting mistakes but, more importantly, to conscientiously analyzing the cause of the mistakes, finding ways and means to overcome and correct the mistakes, and knowing clearly the direction and target for marching forward continuously. Comrades know that if one wants to do revolutionary work, it is hard to avoid mistakes. There is nobody in the world who does not commit mistakes, except either before he is born or after he is dead. At the same time, it must be recognized that a political party is led by a group which is organized by the leaders, and a leader is not a divinity but a human being. Historically, all revolutionary parties and leaders have committed mistakes and the difference lies only in the levels of the mistakes committed. The causes of committing mistakes are many and varied. A concrete analysis should be made according to the concrete situation. Some of the mistakes committed in our party's history were the result of a lack of experience or blindness in work. The socialist cause which we are carrying on is a great and entirely new one. A socialist system cannot automatically emerge from a capitalist base, and therefore it is very hard to avoid making mistakes. Some mistakes were committed because of subjectively taking an onesided view and not starting off from the actual situation in China, and therefore subjective desires were divorced from objective realities. Such mistakes can be avoided, but they often are difficult to avoid. Some mistakes in our history show that every time the ideology of [dialectical] materialism was upheld, no mistakes were made, but when idealism was dominant, mistakes were bound to be made. Becoming dizzy with success was another reason for committing mistakes. Mistakes are bound to be made when one becomes arrogant and complacent in the face of success. One of the important reasons of the mistakes committed by our party during the Great Cultural Revolution was that some of our comrades, even our principal leading comrades, after great successes in socialist revolution and construction, became arrogant and complacent in their thinking and thereby made a wrong appraisal of objective realities in our country, contrary to the actual situation. As a result, mistakes were made and great losses were suffered. Lin Biao and the "gang of four" utilized our mistakes in carrying out extensive counterrevolutionary sabotage which brought unprecedented disaster to the people of our country, thereby resulting in the most severe setback in the course of our socialist construction since the establishment of the People's Republic. However, even in the face of such severe mistakes and setbacks, our party never became disheartened, but always summed up experiences and drew lessons for marching forward continuously. Our party decisively smashed the conspiratorial clique of the "gang of four" with one blow boldly managed to bring order out of chaos on the front of political and ideological theories, and proceeded with a forceful overhaul and consolidation of the organization. Our party openly redressed large numbers of unjust, false, and wrong charges, including the serious false charge against Comrade Liu Shaoqi. The true features of Mao Zedong Thought have been restored and, at the same time, the serious distressing mistakes that occurred during the period of the Great Cultural Revolution have been openly recognized before the party and the people of the whole country, and corrections have been openly made. Thus, the prestige of the party has been heightened instead of lowered. The glorious image of the party, which was severely sabotaged by Lin Biao and the "gang of four," has gradually been restored in the eyes of the people. Especially after the Third, Fourth, and Fifth Plenary Sessions of the 11th Party Central Committee, on the basis of summing up the experiences and lessons of the Great Cultural Revolution, the party proposed a shift in the focus of party work; enacted and affirmed the political, theoretical, and organizational lines of the party; restored, perfected, and developed a series of party principles and policies; and adopted an eight-character policy aimed at readjusting, consolidating, restructuring, and improving the national economy. From then on, the party has gradually put the cause of socialist construction on the correct path of development. Practice in the short period of merely a little over 3 years since the crushing of the "gang of four" has once again proved that our party is a party which is practical and realistic, serious about correcting mistakes when discovered, earnest and conscientious, open and aboveboard, and full of promise. Our party is a great, glorious, and correct Marxist-Leninist revolutionary party. We must firmly believe in it without the slightest doubt or vacillation.

Young comrades, you are the masters of new China and the principal force in implementing the four modernizations. The heavy historical responsibility of implementing the four modernizations falls on your shoulders. It is hoped that you will get a clear understanding of the situation, acquaint yourselves with the goals, and foster lofty ideals and a high ambition. You must still more believe in the party, love the party, support the party, and unswervingly follow the party. You must unite as one, under the leadership of the Chinese Communist Party and together with the people of the whole country, look forward and implement the four modernizations in a practical way in order to dedicate your life to the struggle for building China into a powerful socialist country, accomplishing the four modernizations before the end of the century to achieve the bright future of communism.

CADRES ACCUSED OF VIOLATING LAW SENTENCED TO PRISON TERMS

Hangzhou ZHEJIANG RIBAO in Chinese 25 Aug 80 p 3

[Article by the Party Committee of the Pingshan Commune, Zhuji County: "We cannot Under Any Circumstances Shield People and Affairs Which Violate the 'Guiding Principles'"]

[Text] What should we do with the violators of the "guiding principles," party discipline and state laws who happen to be members of the party leading groups? Should we do everything possible to cover them up or display courage to expose them? An answer to this serious question will spell success or failure in the implementation of the "guiding principles." We will never forget a profound lesson we have drawn from our experiences in this connection.

Not long ago, the former secretary of our commune party committee tried to cover up the misdeeds of Qi Xingquan [2058 5887 2938], former secretary of the party branch of the Feng Cun brigade, who was accused by a commune member of ganging up with many others in stealing the collective property--trees. After being reprimanded by higher authorities concerned for this wrongdoing, Qi Xingquan still showed no remorse for what he had done. Later, he was sentenced to 5 years in prison by a judicial organ for abusing his authority to launch a vengeful attack and framing false accusations against that commune member who exposed his crime of theft. We were not surprised to see Qi Xingquan punished according to the due process of the law. But what has surprised us is the fact that the former secretary of our commune party committee failed in his duty to take timely actions to educate and prevent his subordinate from committing that crime. We were also angered by his attempts to condone and cover up this crime. When Qi Xingquan was educated and criticized for setting up a private court to torture that commune member, the former secretary of our commune party committee continued to name and support him as the secretary of the party branch of the Feng Cun brigade, thus further emboldening and encouraging him to commit more mistakes and crimes. When our commune party committee assigned personnel to help the county judicial organ investigate the Qi Xingquan case, that former commune party committee secretary called it a miscarriage of justice "dealing a fatal blow to a basic level cadre in the countryside." After Qi Xingquan was eventually arrested and sentenced to prison terms, the former commune party committee secretary wrote several letters to the higher authorities concerned, insisting on calling this judicial decision a mistrial. After committing this mistake, he created a serious situation in which the masses completely lost their confidence in the integrity of our party organizations.

This incident has taught us a profound lesson in a negative way: "Gone are the days when officials could protect one another and could cover up each other's shortcomings. Everyone should daringly struggle against bad elements and misdeeds, especially at a time when party cadres violated party discipline and state laws and committed mistakes. Practical experience shows that any deliberate attempt to shield erring cadres and cover up their misdeeds will do them great harm. No one should cherish cadres in this way." After learning this lesson, our party committee has made greater efforts to study and implement the "guiding principles," and to conscientiously examine our shortcomings and mistakes without fear of "leaking our family secrets to the outsiders." We have also placed our problems on the table for discussion by party members and the masses. Earlier, we found that some of our party committee members indulged in excessive feasting. As soon as this came to our attention, a special meeting was held for party members to openly criticize this unhealthy tendency. In order to stop it, our party committee has adopted a "15-point" regulation calling on all subordinate brigade party branches to thoroughly implement the "guiding principles" and place them under the supervision of party members. As a result, wastage caused by excessive feasting has been stopped. Since then, none of our nine party committee members has ever abused power by seeking jobs for their relatives and friends as they have done in the past. Nor has any one of them ever engaged in any "fraudulent backdoor ideals for private gains," framed false charges in retaliation against the innocent, and lobbied for erring comrades in an attempt to cover up their misdeeds. Our experiences tell us that only by resolutely acting as models in observing and upholding the "guiding principles," and in serving the public interest, can our leading comrades bravely deal blows to all violators of the "guiding principles." Not long ago, a deputy secretary of the party branch of the Loujia brigade under our commune ganged up with one of its members and concurrent accountant in embezzling collective funds several times. Although some of our commune members had gathered evidence to prove this wrongdoing, they only grumbled about it behind the people's back, rather than openly bringing the two embezzlers to justice, for fear of reprisals. As soon as Lou Xianfu [2869 6343 1133], member of our commune party committee and secretary of the party branch of the Loujia brigade, received a report on this alleged corruption case, he promptly called his party branch into session to rectify the workstyle of party members and to call on commune members to expose the crimes of the two embezzlers. After this charge of embezzlement was proved true by auditors, the party branch of the Loujia brigade ordered the two embezzlers to return the stolen money to the collective treasury. Later, with the approval of party committees at the higher levels, the party branch also took disciplinary actions against these two leading cadres. Commenting on this decision, party members and the masses in this brigade said: "as long as leading cadres at all levels strictly observe the party regulations and rules by treating every legal case with absolute fairness, our party can certainly revive its fine workstyle."

CIVIL SERVICE SYSTEM THAT MADE HAN DYNASTY STRONG RESTATED

Shanghai WEN WUI BAO in Chinese 15 Aug 80 p 4

[Article by Li Konghuai [2621 1313 2037]: "The Selection and Appointment of Government Officials in the Han Dynasty"]

[Text] Although the centralized feudal bureaucratic political system built by Qin Shihuang, founding emperor of the Qin Dynasty, lasted only 15 years, it was adopted by the succeeding Han Dynasty as a basis for building a series of political systems of its own and for improving and perfecting these systems. For example, the system designed to select and appoint people to the government posts--an election system for short--was an important aspect of the government system adopted by the Han Dynasty, a system which had had a far-reaching impact on the bureaucratic politics of our feudal society which covered over 2,000 years.

Methods for Choosing Government Officials

"Every mode of production will result in a human relationship of its own and a specific form of government." ("Selected Works of Marx and Engels," vol 2, p 91) The political power of the Western Han Dynasty emerged as a result of a series of peasant uprisings. After its founding, it attached great importance to the development of a system designed to select, train and appoint talented people to the government posts, along with other related systems. Shortly after Liu Bang came to power, he regarded the selection and the training of talented intellectuals as a necessary step in consolidating the political power of the landlord class. In the 11th year of his reign, he issued a decree, saying: "As far as I know, no ruler is more powerful than Emperor Wen of the Zhou Dynasty and no king is more popular than the duke of the state of Ji. But both rulers were heavily indebted to the talented officials for their successes. Are our talented intellectuals today not as good as their ancient counterparts? Certainly not. The problem is that the intellectuals will know no way of entering the government service if a ruler is unwilling to look for them and to keep them in contact. Today, with the blessing of the Heaven, I hereby declare my willingness to share this kingdom with all talented intellectuals and officials, along with a determination to make it live forever." It was this guiding thought that led the Han Dynasty to pay great attention to the selection and training of government officials. The ways devised by the Western Han Dynasty to select and train government officials can be summed up as follows:

First, imperial selection: This was an important method adopted by the Western Han Dynasty to select and appoint talented intellectuals to government posts. Imperial decrees were issued from time to time for this purpose. Included in each decree was detailed information on subjects to be tested, numbers of vacancies to be filled, and required experiences and educational backgrounds, and where such tests were to be held. Men of letters and of integrity were selected by the emperors of the Western Han Dynasty to serve as their advisors and consultants.

Second, annual selection: each year, every province was required to recommend a specific number of talented intellectuals for positions with the central government. At first, each province was required to suggest only one best qualified person for a government position. Later, Dong Zhongshu [5516 0112 5289] suggested that two persons be recommended for government positions from every province. Aware that the population varied from province to province, the Eastern Han Dynasty entitled each province to choose one for every 200,000 in population with the exception of frontier provinces and minority regions which were entitled to special treatment. This was a method by which the central government could directly select talented intellectuals for official positions.

Third, special appointments by the emperor and Cabinet members: Beyond the aforementioned two ways of selection, emperors might deem it necessary to hire special talented professionals or experts to meet specific needs. For example, Shu Suntong [0647 1327 6639], a man of letters; Xia Housheng [1115 0186 5168], a specialist in ceremonial dresses; Shu Guang [3990 1639], a scholar concentrating on the study of the Warring States, were hired as advisors by the royal family. Among others so hired were mostly noted social figures, who were either directly hired by his majesty or recommended to the royal family by Cabinet members. Special envoys might be sent along with gracefully decorated carriages to fetch those highly esteemed and elderly scholars to fill special government vacancies. This was a special privilege and treatment accorded scholars of great academic achievements. Senior officials were also authorized to select and appoint scholars to government positions. But recommendations for posts which paid more than 10,000 litres of rice in kind a year had to be submitted to the central government for approval during the Western Han Dynasty. Until the Eastern Han Dynasty, this requirement was waived so that provincial governors and the Inspection General of the central government and other officials at higher levels could feel free to employ people as they wished. This was an important reform in the government employment system. During the succeeding dynasties, senior officials often recommended their pupils and former subordinates for government positions, thus forming complicated social relations.

Fourth, Appointment of Sons, Sale of Official Titles: "An official who earns a salary equivalent to 200,000 litres of rice or more a year can appoint one of his sons to an official post after completing 3 years of government service." This was a special privilege enjoyed by bureaucrats' children at that time regardless of their moral qualities and abilities. Commenting on this faulty system which entitled bureaucrats' children to assume the government positions without going through any civil service examination, some people at that time pointed out: "Officials born of the families with an annual income of 200,000 litres of rice are not necessarily competent to serve the people." During the Han Dynasty, there was a system under which official positions could be bought at a price. Although these positions ran ranked low and were not on the payroll, those who got them could wait for transfer to lucrative posts later on. Emperor Wu of the Han Dynasty even opened government positions to experts in the martial art which could be bought and could change hands at specific prices. Until the Eastern Han Dynasty, the government raised revenue partly from sales of official positions as a way to solve its financial difficulties. No wonder corruption became increasingly widespread in the days ahead. Furthermore, good scholars, those skilled in the martial art, and rich men could also become officials if they so wished. Among others who entered the government service at that time were occultists, medical doctors, astrologers, and musicians. In short, the doors to the government service were wide open to those interested.

The aforementioned facts revealed a close relationship between the personnel employment system and politics in the Han Dynasty. When emperors Wen and Jing of the Western Han Dynasty and Emperor Guangwu of the Eastern Han Dynasty were in power, they welcomed people from all walks of life, including the poor, to join the government service, thus creating an important condition for developing production and for bringing about unity and stability in society. They believed that the practice of favoritism and nepotism in selecting the government officials was a key factor that led to political corruption and caused contradictions to sharpen in society. This belief was vindicated when the development of an unfair election system led to political corruption during the later stage of the Eastern Han Dynasty.

Examination and Employment

During the Han Dynasty, candidates for government positions were strictly tested and evaluated before they were employed in order to raise the political standards of government officials and to insure the normal operation of state organs at all levels.

In the process of recruiting new officials, each candidate's family background, occupation, experience, education, assets, physical health and complexion would be cross-examined by the authority concerned before he was selected to join the government service. During the early days of the Han Dynasty, the government required each candidate for public office to offer evidence that he was worth more than 100,000 yuan in property. In other words, the poor stood no chance of being selected to serve their country.

For example, Han Xin [7281 0207] was too poor to qualify for a government position despite his dazzling intellectual virtuosity. Critics of this system at that time said: "Rich people are not necessarily competent to serve the government." This system remained unchanged although Emperor Xiaojing changed the requirement for each candidate's property value from 100,000 to 40,000 yuan during the second year of his reign. During the Han Dynasty, businessmen, their sons-in-law who took the place of their sons and lived in their wives' homes, and loan sharks were banned from entering the government service. The government of the early Han Dynasty also adopted a policy to promote agriculture and suppress commerce. Under this policy, businessmen were prohibited from wearing brocade clothes and using carriages, and from becoming government officials, and were heavily taxed. This restriction on businessmen was not lifted until after Emperor Wu of the Han Dynasty came to power, and the country was confronted with financial difficulties which forced the government to welcome contributions in the form of useful materials, grains, sheep and goats and female servants from the businessmen in exchange for government positions. Also welcomed to join the government service were those muscle men skilled in the martial art. Nevertheless, each candidate for public office had to undergo rigid training. "A pupil cannot graduate or apply for a government position until he can memorize and recite more than 9,000 Chinese characters and is well-versed in their applications." In addition to training officials through schools, Emperor Wu of the Han Dynasty offered positions to those who passed tests in five books, and an oral examination in government policy." Those who took such oral examination were required to answer questions about government policies at three different levels. Their answers to such questions were later evaluated to determine their qualifications for official positions at all levels. After passing preliminary examinations held by the provincial government, a candidate had to take two or three more tests before a final decision could be made with regard to his selection or rejection. At these tests, the emperor might appear in person to ask some candidates questions about policies. This strict civil service examination system eventually provided the landlord class in the Han Dynasty with an endless flow of talented officials to form the backbone of the government systems at all levels.

Of the candidates who passed examinations, a few of extraordinary intellectual virtuosity and erudition would be directly promoted to Cabinet level positions in the imperial court, and the majority would have to go through a year's probation and evaluation before they could work independently as government officials. If anyone failed to meet the required standard during the probation period, he would be either transferred elsewhere or sent back to the original place of his station. During the Han Dynasty, the probation system applied to both civilian and military officers. After passing the probation period, each of them was required to serve out a term of several years at a post to which he was assigned. According to the recorded history of the Wei and Jin dynasties, every prefectural magistrate and provincial inspector general had to stay at one post for at least 3 years before qualifying for a transfer. It was believed that the Han Dynasty followed the same system, although it left no record for us to confirm it.

Evaluation, Promotion, Commendation and Punishment

During the Han Dynasty, the government adopted an evaluation and reporting system aimed at promoting or demoting officials. Under this system, their performances were evaluated once a year according to the regulations set by the central government; local government officials were required to report their achievements to the central government by the end of the year. These reports covered a wide range of subjects including taxes, theft, robbery, lawsuits, elections, agriculture, national disasters, population, roads, waterway transportation, irrigation. This system began with the Qin Dynasty and fully developed during the Han Dynasty. According to this system, "by the end of the year, each provincial government is required to send an envoy to report to the central government what has happened in the province during the past year." During the Han Dynasty, provincial officials in charge of this work customarily gathered in the capital of the country sometime in January to pay their tribute to their majesty and to report to him their respective achievements in all fields of work. In addition to this annual routine report, every responsible provincial official was also required to submit a more important report to his majesty once every 3 years. The emperor could also get such reports while on an inspection tour of various provinces throughout the country. This meant that he attached great importance to this work. During the Western Han Dynasty, these reports were usually handled by the prime minister but had to be verified by the imperial censor. The Han Dynasty government system also stipulated that the governor of every province had a duty to obey orders dictated by the central government and to oversee the operation of his subordinate counties; he should insure that each county would get its annual administrative report ready far ahead of his own report to the central government each year. Generally speaking, counties were required to submit their reports to the governor of their province sometime between the autumn and winter so that he could sum them up in a report to be submitted to the central government early the following year. Efficiency reports of this kind were also required of government offices at all levels and of the offices of nine Cabinet ministers. Sometime, his majesty would like to be briefed by his Cabinet officials on what had taken place throughout the country. In the fifth year of Yuanfeng, Emperor Wu of the Han Dynasty set up an office of the general inspector, directly under the supervision of the imperial censor, to inspect and oversee the operation of 13 provinces and to directly get acquainted with the actual situations there. The general inspector usually returned to the Capital to report his findings to his majesty by the end of the year, which could be used to verify the annual reports submitted by all provincial governors in January. In this manner, the central government opened another avenue to keep itself informed of the latest developments in the country. This reporting system was instituted by the government to evaluate and survey achievements by officials at all levels and to gain a better understanding of what they had done and to encourage them to further improve their performances. This system was backed up by another system designed to promote those who merited commendations and demote others who deserved punishment. During the Han Dynasty, officials who made extraordinary contributions to the government could jump several grades to high-ranking positions while others who made ordinary contributions would be promoted to the next higher level positions. Usually, such promotions brought higher pay, cash awards and other honors. Officials who were proven inept or found guilty of crimes could be demoted or banished to remote areas. Severe punishment would be meted out to officials who committed crimes. Officials who were found guilty of crimes were banished to frontier regions along with other criminals. Guilty officials could also be dismissed from office, demoted or sentenced to prison terms. Inept officials were often demoted with reduced pay. During the Han Dynasty, the transfer of officials from the local to central level positions was called "entry" and from the central to local positions was dubbed "exit." The transfer from one station to another at the same level was called the "routine changes."

A survey of the Han Dynasty's government employment system also revealed regulations that entitled officials to take home leave, and to retire at a specific age. The regulations also entitled staff officials to take 1 day off following 5 days of work in office, and to take sick leave no more than 3 months at a time. An official would be relieved of his duties provided his sick leave exceeded 3 months unless extended leave was authorized by the higher authorities. Shortly after their parents died, officials were allowed 3 years to mourn their death at their homes. Old or ailing officials were permitted to retire from office and were entitled to pensions. But retired high-ranking officials should be prepared to attend the imperial political meetings and to advise the emperor again if so requested. During the early days of the Han Dynasty, the three highest-ranking officials in the imperial court were required to serve the country for life. But this de facto system of the three highest-ranking officials serving for life was abolished when Prime Minister Wei Xian [7279 6343] was permitted to retire for the reason of poor health and old age in the third year of Emperor Xuan (67 B.C.). At the time of his retirement, he was awarded 100 jin of gold. This retirement system was highly valued by the succeeding rulers in Chinese history for the reason that it could keep bringing fresh blood to the government and retain those politically experienced and eminent retirees as advisors. Cash was donated to each official at his death along with silk fabrics, clothes, utensils, seals and other gifts which were to be buried with the dead. His majesty also made it a tradition to confer on him a posthumous title of honor to be inscripted on the gravestone in a cemetery also granted by the government. If he was a senior official or Cabinet member, he could hand his official title down to his future generations. This was a special privilege enjoyed by high-ranking bureaucrats in the Han Dynasty.

Election System Undergoes Changes in the Eastern Han Dynasty

The stringent system adopted by the Han Dynasty to select, evaluate and oversee the government officials was instrumental in insuring the smooth operation of the state machine of the landlord class at that time. But a comprehensive survey of the Western Han Dynasty's personnel selection system must include an assessment of politics at that time which had had direct impact on the process of selecting candidates for public service. As it was mentioned earlier, no corruption surfaced in the process of selecting candidates for official positions during the period of the first three emperors of the Han Dynasty. Nevertheless, impropriety in the selection of officials gradually broke into the open when Emperor Wu was in power and the country was embroiled in a civil strife, causing serious damage to the economy. Emperor Wu was the first ruler of the Han Dynasty who set up official positions to be filled by martial art experts and later sold them for profits as part of the government revenue. Worse was the fact that the power to select people for government positions gradually fell into the hands of influential local tyrants and landlords, who recommended people for government positions not in terms of their talents or competence and integrity but in terms of their wealth and financial resources. They also used their money to curry favor with those both in and out of the government. Fortunately, at that time, the state machine remained in good shape to resist such temptations and to insure the normal operation of the examination and evaluation system so as to continue to introduce to the government the useful talents it needed. Toward the end of the Western Han Dynasty, two peasant uprisings caused by political corruption plunged the country into disorder. Order was soon restored by Guangwu, first emperor of the Eastern Han Dynasty. Also revived were healthy social practices and the stringent system to select qualified talents for government positions. With the Eastern Han Dynasty entering the later stage of its life, the powerful office holders and their families and landlords began to assert themselves and push the people around again. They used the personnel selection system as a tool to form cliques to serve their private interests and to build up their influence until they could hold sway over the imperial court.

In the first year of Emperor Shun (132 A.D.), General Secretary of the central government Zuo Xiong [1563 7160] suggested that the personnel selection system be strengthened and age limits be placed on candidates for government positions. He did so in an attempt to prevent the selection system from worsening. But the selection system became so rotten that it eventually became a tool to serve only the private interests of local tyrants and landlords and to expand their political influence. An example was that the powerful families which held the three highest-ranking government positions for four generations at that time had had disciples and old subordinates all over the country and could recommend them for any positions as they wished. Their relationships resembled those between a ruler and his close confidants and between fathers and sons. As a result, new clans and new classes emerged in society. The general character of the officials who entered the government service under this system could be reflected in the following remark: "Candidates for civilian positions never read books, and did not stand for the principle of filial piety and integrity; once they were selected, civilian officials became corrupt and generals from noble families were as cowardly as chickens." This corrupt personnel selection system had a disastrous effect on the destiny of the Kingdom of the Eastern Han Dynasty. This system still held sway over the societies of the succeeding Three Kingdoms and Wei and Jin dynasties in which "the children born of the poor families never stood a chance of being selected to serve their country."

MOSLEMS OBSERVE RAMADAN; OFFICIAL RECOGNITION GIVEN

Moslems in Jinan

Jinan DAZHONG RIBAO in Chinese 14 Aug 80 p 1

[Text] On 13 August, a vast number of the people of Hui nationality in Jinan jubilantly observed their traditional holy day--Ramadan. Ramadan is a grand festive day celebrated by the people of Hui nationality in our country annually. But when Lin Biao and the "gang of four" were in their heyday of power, mosques were closed throughout the country, thus depriving the Moslems in our country of their right to observe Ramadan. Since the downfall of the "gang of four," as a result of the thorough implementation of the party's nationalities and religious policies, the mosques have reopened following 14 years of their close, thus enabling the Moslem faithful to jubilantly observe Ramadan again.

On the early morning of 13 August, Moslems brimming with joy visited the homes of their relatives and friends, and exchanged greetings. Some of them even presented tasteful foods which they took following a fasting to the people of Han nationality. At 8 am, the Moslem faithful, both male and female, cheerfully participated in a prayer at the Nanda Mosque decorated with lanterns and colored buntings. Foods were served in the mosque at the end of a fasting.

Before the worshipping service was performed, responsible comrades of the Shandong provincial and Jinan municipal departments concerned with nationalities affairs extended greetings to the masses of Ahong and Hui nationalities during their visit to the Nanda Mosque. Mi Changmao [4717 7022 5399], standing committee member of the National Moslem Association, and Imam of the Nanda Mosque, greeted the visitors on behalf of the Moslem faithful. He called on Moslems in Jinan to study hard, strengthen unity among the people of all nationalities, and make contributions to the four modernizations under the leadership of the party and government.

Introduction to Ramadan

Ramadan is one of three major holy days for the Moslem faithful, which falls on 1 October in the Moslem calendar every year (or on 13 August in the world calendar this year). In China, Ramadan is observed by the people of Hui, Uygur and Kazak nationalities annually. On that day, relatives, friends and neighbors of the Moslem faithful exchanged greetings; households of the Moslem faithful served guests special foods or presented them to friends and relatives as gifts. The government has proclaimed Ramadan a holiday for the aforementioned minority people as a demonstration of respect for their tradition and customs.

Moslems in Guangzhou, Tianjin

Hong Kong ZHONGGUO XINWEN in Chinese 14 Aug 80 p 11

[13 August News Report by ZHONGGUO XINWEN from Beijing]

[Text] On 13 August, over 1,000 Moslems gathered at the Huaishengguang Mosque to jubilantly mark their traditional holy day--Ramadan.

At nearly 8 am, these well-dressed Moslem worshippers participated in a prayer led by the imam of the mosque clad in white turban and robe, with their heads facing the mihrab which marks the direction of Mecca. Later, after exchanging greetings in the mosque, they went to Guihuagang or north part of Beijing to pay homage to their ancestors at their graves.

In addition to Moslems living in Guangzhou, other participants in the observation of Ramadan at the Huaishengguang Mosque were muezzins from Xinjiang, Hong Kong and Macao. On the morning of 13 August, Chen Yilin [7115 0122 2651], Liao An [1675 1344] and other responsible persons of the Guangdong Provincial and Guangzhou Municipal Committees of the Chinese People's Political Consultative Conference and the Guangdong Provincial and Guangzhou Municipal Nationalities Affairs Committees arrived at the mosque to extend greetings to the Moslems who gathered there. Thousands of Moslems in Tianjin Municipality gathered to observe Ramadan at their newly remodelled mosque on 13 August.

BLUEPRINT FOR A NEW XIZANG GIVEN BY ACTING CCP SECRETARY

Beijing MINZU TUANJIE [NATIONALITY UNITY] in Chinese No 7, 15 Jul 80 pp 2-8

[Article by Yin Fakang [7113 3127 1660], acting first secretary of the Xiang Autonomous Region CCP Committee: "Strive Hard for a United, Prosperous, and Civilized New Xizang"]

[Text] Xizang is an inseparable part of the sacred territory of the motherland and is a nationality autonomous region of a particularly important nature. The people of the Xizang nationality are diligent, sincere, honest, intelligent, and brave. Historically, they opened up the Xizang Plateau with their own intelligence and strength, and played an important role in the formation and development of all nationalities in China.

However, owing to the cruel exploitation and oppression by the reactionary serf-owning class in the past, the economy and culture of old Xizang for a long time was in a state of extreme backwardness, the life of the laboring people was exceedingly poor, and the population was shrinking year by year.

With the peaceful liberation of Xizang, especially after the reforms that were made after putting down the rebellion, a million serfs stood up and became the masters of Xizang, and earth-shaking changes occurred in the social system. In the past 30 years, under the leadership of the Party Central Committee, the party committee of the autonomous region and party organizations at all levels in the region have led the broad ranks of party members, cadres, and the PLA stationed in Xizang, of both the Tibetan and Han nationalities, to mobilize and organize the masses of people of the Tibetan and all other nationalities, to unite the Xizang patriotic democratic figures, to build up Xizang, to defend the border, to uphold the unity of the nationalities, and to guard the unity of the motherland. In this they have achieved great results and made great contributions. However, owing to the extremely backward base left from history, especially the 10 years of turmoil caused by the disturbance and destruction of Lin Biao and the "gang of four," as well as certain deficiencies and mistakes in our work, as of now, in Xizang the development of agricultural, animal husbandry, and industrial production is still very slow, culture and education are very backward, and the life of the masses is very poor.

The Party Central Committee shows extreme solicitude for the Tibetan people and attaches great importance to the work in Xizang. After the Fifth Plenary Session of the 11th Party Central Committee, the Central Secretariat held a special forum on work in Xizang that clearly put forward the central tasks, the struggle objectives, and an eight-point policy for work in Xizang under the new historical conditions. Soon afterward, Comrade Hu Yaobang, secretary general of the CCP Central Committee; Comrade Wan Li, secretary of the CCP Central Committee Secretariat and vice premier of the State Council; Comrade Ngapoi Ngawang Jigme, vice chairman of the NPC Standing Committee; Comrade Yang Jingren, vice chairman of the CPPCC and deputy director of the United Front Work Department of the CCP Central Committee; and Comrade Zhao Chenqing [6392 6591 3237], deputy director of the Organization Department of the CCP Central Committee, personally inspected the Xizang Plateau and directed work there. Comrade Hu Yaobang concretely put forward six big issues that Xizang needs to resolve now and in the future. Comrade Wan Li also issued many instructions that clearly pointed out the direction Xizang should take to further advance from poverty to prosperity.

The central tasks and struggle objectives put forward by the Party Central Committee for Xizang Autonomous Region under the new historical conditions are: With the Tibetan cadres and people given first place, strengthen the unity among cadres and people of all nationalities; bring every positive factor into play; starting with the actual conditions, heal by every means the wounds inflicted by Lin Biao and the "gang of four"; develop the national economy; raise the material living standard and the cultural and scientific standard of all nationalities; construct the border areas; strengthen the border defenses; and, in a planned and orderly way, make Xizong flourish and develop, thrive and prosper.

The policies, tasks, and struggle objectives put forward by the Party Central Committee, as well as the call to build a united, prosperous, and civilized new Xizang, fully accord with the realities of Xizang and fully reflect the fundamental interests of the people of every nationality in Xizang. They are the concrete embodiment in Xizang of the party's general line and general task in the new era, and are also a powerful weapon for our party in solving nationality problems now and for a long time in the future. This battle task is a glorious historical mission given by the Party Central Committee to the people of all nationalities in Xizang. Striving hard to realize this objective is of extremely important significance for step by step realizing practical equality, economically and culturally, between the Tibetan and Chinese nationalities, for effecting a further close relationship between the party and the Tibetan people, for building a powerful modern socialist state, and for fictoriously carrying out the international struggle.

1. Emancipate the Mind and Relax Policies To Make the People of All Nationalities in Xizang Prosperous As Soon As Possible

The party's ideological line is the theoretical basis in formulating the political line, and is also the fundamental guarantee for the execution and implementation of the political line. In order to fulfill and realize in the work in Xizang the central tasks and struggle objectives and to build a united, prosperous, and civilized new Xizang, first of all we must emancipate the mind, correct the ideological line, uphold dialectical materialism, arrange the work in Xizang around the implementation of the Party Central Committee's important directives, conscientiously supplement the lesson on discussion of the truth criterion, keep in touch with reality, and relentlessly criticize the ultraleft, thereby freeing the people's minds from the shackles of the ultraleft line of Lin Biao and the "gang of four."

At present, there are very many problems in ideological theory that urgently await solution. We must grasp the key points and solve the problems that are blocking our advance and that most urgently require solution. An important problem that, first of all, is worth bringing up is whether we can seek truth from facts and in everything start from reality. Such being the case, the greatest reality at present in Xizang, speaking of the autonomous region as a whole, can be summarized in one word, viz, poverty. We should have the courage to dare to face this reality, dare to admit backwardness, dare to admit poverty. The premise for curing poverty is to admit poverty. Only by frankly admitting poverty can we cure poverty by all possible measures. At the same time, we must solve the problem of daring to possess wealth. In the past, one kind of thinking always linked poverty to socialism, wealth to capitalism. Without a doubt, this viewpoint that fears wealth, fears becoming too conspicuous is mistaken. Under the premise of maintaining the course set by socialism, to create wealth by labor is glorious, and we should dare to possess wealth. We must thoroughly criticize the fallacies of false socialism advocated by Lin Biao and the "gang of four," viz, the "transition through poverty" and the "eating of messhall food," and truly clarify what is socialism and what is capitalism. To maintain public ownership of the means of production, to maintain distribution according to work, and to not allow exploitation are socialism. For the masses of peasants and herdsmen to work to create wealth is certainly not capitalism. Starting from the reality that the commodity economy of Xizang is not very developed--speaking of the situation as a whole--it is fundamentally useless to worry about capitalism. If we fear wealth then we cannot cure poverty.

We must get a clear understanding of the goals of socialism. The goals of our production are not to learn from Daqing and Dazhai, to reach the target set by the national program for agricultural development, and to fill up the blank spaces, and also are not to get more bonuses by fulfilling directives, tasks, and plans, but are to satisfy the Tibetan people's needs in their material and cultural life. We cannot again seek underserved reputations and do stupid things that invite disaster.

We must see that Xizang is different from the interior of our country, and also is different from other minority nationality regions. We must study the particularity of this contradiction, and make clear the specific and general nature of the dialectical relationship. We should firmly establish the practice in Xizang of starting everything from reality and looking at everything from the viewpoint of the people of Xizang. In our handling of agriculture, animal husbandry, transportation, commerce, culture, education, and every other construction undertaking in Xizang, we should see whether it is of benefit to the people of every nationality in Xizang, whether it meets their requirements. Whatever is of benefit to the people of Xizang and is welcomed by them should be conscientiously done: if it does not satisfy their needs and is not welcomed by them and yet is done obstinately, then we will become separated from the masses and will not have the viewpoint of the masses. To do things well requires good intentions, but good intentions by themselves will not do, as it is still necessary to conform to reality. Otherwise, good intentions can lead to doing bad things. Therefore, only by having a correct ideological line can we advance steadily in the correct direction toward changing poverty into wealth.

In order to enrich the masses as quickly as possible, we must start with the reality in Xizang, and for all economic problems put into effect specific and flexible policies. Starting from the present circumstances of the masses' poverty, the policies should certainly be liberalized, liberalized, and again liberalized. By using the party's policies to mobilize the enthusiasm for socialism of the broad masses of peasants and herdsmen, a powerful and dynamic production force will be created. Only by putting our policies on the right track and adopting them to local conditions can there be a big increase in output, and by adding science to the equation, there can be a huge increase in output.

Starting with 1980, throughout the autonomous region for 2 years there will be an exemption from agricultural and animal husbandry taxes; and the state monopoly on purchasing, marketing, and distribution of agricultural, animal husbandry, and sideline products will be abolished. The state's adoption of the method of discussion and barter in its purchasing, on the voluntary basis of the masses, will encourage the peasants and herdsmen to sell to the state more surplus agricultural, animal husbandry, and sideline products. Eliminating formal exactions, abolishing all added burdens, not practicing any equalitarianism and indiscriminate transfer of resources, the state, from now on, when running each construction undertaking, when employing the labor and draft animal force of the commune and production team that is really necessary, will adopt the method of contracts, giving reasonable remuneration. Exempt from industrial and commercial taxes will be agricultural, animal husbandry, and handicraft industry products; the handicraft industry of the commune, production team, and individual; and the small trader's, peddler's, and individual commune member's sales and exchanges in the market. Road tolls will not be levied on tractors and motor vehicles used for agriculture and animal husbandry at the county, district, commune, and production team levels.

We must fully respect the right to stand on their own feet of the production team, the work team, and the household. From now on, the autonomous region will adopt a comprehensive balanced method, from top to bottom, in formulating production plans, and will not again have production output and planting plans in which orders are transmitted to lower levels. Every production team and work team will, according to their local natural conditions and the requirements of society, arrange their own crop planting. What is suited to be planted will be planted, what is desired to be planted will be planted. Where there are production measures to be taken, the decision on them will be left to the production team, the work team, and even the household itself. We must not resort to coercion and commandism, we must not give arbitrary and impracticable orders. The production team has the right to decide itself the distribution level, thus abolishing the past maximum quotas for distribution. The labor force, the financial capacity, and the goods and materials of the production team, work team, and household are protected by laws and must not be subject to equalitarianism and indiscriminate transfer of resources or subject to seizure.

We must establish and perfect every form of the production responsibility system and strengthen labor management. Every place can organize work teams on a temporary and seasonal basis; can divide the work teams on a yearly basis and link output to the calculation of remuneration; and can also try out the method of "major responsibility for a task" and other methods that please the masses. With regard to livestock that are inconvenient for the collective to manage, the method of having the commune members take care of them and sharing the work proportionately can be adopted. If the scope of the production team is too large--its members living far apart and management being inconvenient--it can, based on the wishes of the masses, appropriately divide the work into smaller b its, normally 20 to 30 households being most suitable.

Poor communes, poor production teams, and isolated households in remote fringe areas, after receiving permission from the county people's government, and under the premise of not changing the system of collective ownership, are allowed to have "grain ration fields" and household production contracts. Individual communes and production teams where for many years production has not risen and where the life of the masses is extremely poor can, if the masses really demand it and the county people's government approves, temporarily withdraw from participation on the mutual aid teams, and at a suitable time again take the path of collectivism.

We vigorously encourage and energetically support the management by commune members of private plots and privately owned livestock, privately owned trees, and privately owned hills and the development by commune members of household sideline production. The private plots must be reserved according to regulations. Privately owned livestock must be handled by the household. Under the premise of not affecting collective production, the commune members can raise whatever livestock they want and in whatever quantity they want. The number and breed are not limited. Moreover, the commune members are permitted to plant forest trees and fruit trees in front and in back of their houses; commune members are permitted to plant forests at places designated by the production team.

Whoever plants owns whatever he plants. No matter for whatever reason, the commune member's private timber and fruit trees that had been taken by the collective in the past must be resolutely returned to him. The commune and production team also can, based upon concrete circumstances, transfer to every commune member household a fixed amount of barren hills, barren slopes, and barren banks where trees and grass can be planted for the household's long-term use, and the income therefrom will go to the individual household. Commune members are permitted and encouraged to engage in all sorts of household sideline production and handicraft industry. Craftsmen are permitted to practice their craft by traveling from one village to another. Commune members' products and income from practicing the "four retentions and one auxiliary" system will not be subject to allotment and purchasing assignments and will not be subject to collective distribution.

Every prefecture and all counties, communes, and production teams must start from what is of benefit to economic development and the people's life, and, based on natural laws and objective economic laws, determine their own production policies that are suited to local conditions, adjusting well the overall arrangements for agricultural, forestry, animal husbandry, sideline, and fishery production, tapping new sources of production, giving priority to one enterprise, and developing in an allround manner.

Every place must vigorously support and encourage communes and production teams to fully utilize their local natural resources, to develop commune-run enterprises, to develop sideline occupations, to develop the transport service among the people, and to develop nationality handicraft industries. Communes and production teams are permitted to establish direct contacts with the outside; conclude contracts; contract for processing agricultural, animal husbandry, forestry, and sideline products; and contract for transportation, capital construction, and other production projects. They are permitted to open restaurants, inns, inns with sheds for carts and animals, repair shops, and other service trades. They are permitted to directly sell and exchange their own handicraft industry products and their local and special products.

The ban on country fair trade is lifted. Each county and district can, viewing its own concrete circumstances, organize at designated points country fair trade and commodity interflow meetings. The commune, production team, work team, and household have the right to sell their agricultural, animal husbandry, and sideline products at county fairs, and are permitted to barter foodgrain, oils from crops, and livestock at the county fairs. They are permitted to distribute some commodities wholesale to the collective management, and individual small commodity buying and selling from village to village is permitted.

Product exchange between peasants and herdsmen, town and county is encouraged. Based on the wishes of the masses, the former mediums and habitual forms of exchange will be restored, thereby handling well the exchange of agricultural and animal husbandry products, salt and grain.

Every place can, based on the wishes of the masses, gradually transfer the rural basic-level supply and marketing cooperative to the people's commune, forming the commercial organization and the supply and marketing department of the people's commune, putting into effect a system of independent accounting.

Commodity price departments and commercial departments must uphold the principle of no loss and no gain, and maintain the principle of relative stability of commodity prices, again examining and revising the purchasing and selling prices of commodities, particularly of the production materials and livelihood materials that concern peasants and herdsmen, and adjusting prices that are unreasonable. Buying and selling must be fair. The purchasing of the sideline products of the masses of peasants and herdsmen must be on the basis of determining the price according to quality with high prices for high quality. It is definitely not permitted to force prices down step by step or to pocket part of what should be paid. The valuable medicinal herbs and hides gathered and bagged by the commune members should be sold to the state, and when necessary, after approval is granted, floating prices can be put into practice.

Starting from the requirements of production and of the life of the masses, trade with the outside is to be vigorously developed. Departments concerned and prefectures in the autonomous region must pay special attention to the trade of people living along the border, fully make use of the advantageous conditions of border areas, open up former channels, establish new channels, vigorously organize the supply of goods, support the principle of mutual benefit to the masses, and energetically develop border trade.

The industrial production of our region must also proceed from the reality in Xizang and be adjusted accordingly. The adjustment is not to be one of not developing but of developing, especially the energetic development of transportation, hydroelectricity, and nationality handicraft industry. Some factories and enterprises must be closed down and transfered, must be cut back, must be dismantled. Not all industry must be cut back or dismantled; the cutbacks and dismantling now are for their improvement and restoration in the future.

The thorough implementation of these specific and dynamic economic policies will surely be warmly welcomed by the broad masses of Tibetans, will surely greatly mobilize their enthusiasm for production, but they also might encounter some resistance, some new problems might emerge, and it might be necessary to do a great amount of work. Owing to the lack of experience, it is normal that a few problems will emerge. We must strengthen investigation and study, sum up experience in good time, and do our work well with one heart and one mind. We can see that only by unswervingly carrying out these policies that enjoy immense popular support can we bring about in the economic development of our region within a fairly short time comparatively marked successes.

2. Improve Nationality Relations, Strengthen Nationality Unity

Xizang is a minority nationality autonomous region composed mainly of Tibetans. Tibetans make up over 85 percent of the region's total population. Compared with other fraternal autonomous regions, Xizang is a relatively special autonomous region with a great many distinguishing features in natural conditions, geographical environment, nationality traits, and economic structure. From beginning to end we must attach great importance to the great questions of firmly carrying out the party's nationality policy, of maintaining close relations with all nationalities, and of strengthening the unity of all nationalities; this is the key to the success or failure of all our work.

Since the peaceful liberation of Xizang, and after the democratic reform and the socialist transformation, the class sources of nationality oppression and nationality discrimination have basically been wiped out. Therefore, the statement that "the nationality problem is in essence a class problem" is mistaken. This formulation can only cause confusion and misunderstanding in nationality relations. Nationality is a problem that falls within the category of history, and its process is one of emerging, developing, and dying out. Under different historical conditions, the essentials and tasks of the nationality problem are different. Under socialism, the people of every nationality become the masters of the state, and among them are established brand-new relationships. The fundamental task confronting us in nationality relations is to gradually solve the existing problems left over by history of the factual inequality in economics and culture of every nationality. In dealing with the nationality problem, to rashly cut off the nationalities from their historical legacy and say it is a problem of class struggle not only cannot strengthen nationality unity but also must necessarily give our foreign and domestic enemies an opportunity they can exploit to their advantage. This is what our Tibetan comrades must fully understand, and they absolutely cannot be careless about it.

We must, under the unified leadership of the central authorities, exercise the autonomous power of regional self-government. If there is no full self-government by the nationality, then there will be no measures suited to local conditions. If there is no full self-government by the nationality, then there will be no great unity of all the people of the country. Unity and centralism are closely related to nationality region self-government, and this dialectical relationship must be handled well. Speaking of the present conditions in Xizang, to overlook nationality traits and be separated from the reality in Tibet is the main erroneous tendency in our work. That leadership work style and work method that is subjective, one-sided, vaguely generalized, and is done at one stroke, that work experience that is blindly and rigidly spread to other areas, the practice of subjectivism, the forcing of one's will onto other people, the work style of not respecting, to the point of abolishing, the autonomous power of minority nationalities have already created serious consequences for the work in Xizang. From now on, we must, according to the directive from the central authorities and the special characteristics of Xizang, formulate relevant work policies and tasks and give concrete guidance. All decisions and measures must first of all be truly and wholeheartedly consented to and supported by the Tibetan people. If they are not, then they will be revised or put off. In order to integrate well the line and the general and specific policies formulated by the central authorities with the reality of Xizang, we will decide work policies based on actual conditions and fully exercise the autonomous power of the nationality region.

We must strengthen the construction of the autonomous organs of the nationality region, and, starting from the reality in Xizang, do good legislative work. The autonomous region's people's congress, along with its standing committee, is the organ of power, under the unified leadership of the central authorities, in the nationality region, and is the major mechanism for fully exercising the right of making independent decisions. The autonomous region's people's congress, based on the PRC constitution and the relevant laws, decrees, rules and regulations of the state, on the basis of investigation and study and starting from the actual circumstances in Xizang, formulates the laws, decrees, and rules for Xizang in politics, economics, culture, education, hygiene, nationality, and civil administration. It protects by laws the just rights of the Tibetan people in social life and in economic and cultural life.

We must regularly educate the party members, cadres, PLA officers and men, staff and workers, and the masses in the party's nationality policy, decisively overcoming or preventing Han chauvinism and also preventing local-nationality chauvinism. From now on, there will be regular checkups every year on the implementation of the nationality policy in which achievements will be displayed and mistakes corrected, thereby solving the existing problems concerning the nationalities and doing away with all factors not advantageous to nationality unity. At present we must pay special attention to: 1) Vigorously training the cadres of the Tibetan and other minority nationalities to gradually take over, with the Tibetan cadres as the main component, the party, government, and mass organizations at the county level and above in the autonomous region. We must boldly promote them, give them a free hand, enthusiastically help them, and give them concrete guidance so that they have position, power, and responsibility and fully play their roles. At the same time, we must be solicitous toward their life and solve their difficulties. 2) We must earnestly carry on and develop the nationality's culture, respecting the use of the Tibetan written and spoken language, respecting each nationality's customs and habits.

The official communications of the party and government organs of the autonomous region must be in both the Tibetan and Han scripts, and we must train translating personnel and perfect the translating and printing mechanisms. Han cadres must study the Tibetan written and spoken language, and the nationality cadres must first of all learn well the script of their own nationality while studying the Han written and spoken language. We must choose effective measures to gradually make elementary school education universal, eliminate illiteracy in the Tibetan language, transform elementary schools run by the local people into public ones, and make a great effort to run well county and district post-elementary schools and county middle schools. We must vigorously make arrangements for universities. Every large special academy and school and middle-level vocational school should principally enroll students from the Tibetan nationality and from the Monba, the Lopa, and other minority nationalities in order to train qualified specialists for building up Xizang. We must vigorously develop enterprises of a nationality, scientific, and mass nature in culture, education, medicine, and hygiene. We must carry on and develop Tibetan medicine, Tibetan medicinal herbs, and the Tibetan calendar and meteorology. We must carry on with the system of free medical treatment and free film viewing for the masses and students of every nationality. 3) In recruiting workers and enrolling students, we must insure that the proper quotas for the Tibetan nationality and the other minority nationalities are maintained. Industrial and communications, financial, and commercial, cultural and educational, hygienic, and scientific research units must all take in as many as possible Tibetan cadres and Tibetan staff and workers in order to train a contingent of nationality intellectuals and nationality staff and workers.

We must comprehensively implement the party's religious policy. Belief in Lamaism has a long history and has had profound and lasting effects on the people of Xizang, and it must be treated with care. While respecting the normal religious activities of the religious masses, we must also vigorously carry out ideological and political work, science, culture, and education, among them. The present monasteries and temples must be protected and maintained; with regard to those lamas who study and who have chalked up scholarly attainments in the Buddhist and other religious scriptures, as long as they are patriotic, they should be treated as intellectuals. We must let them play their proper role in carrying on and developing the excellent cultural heritage of the Tibetans. Lost or damaged Tibetan cultural artifacts should be recovered, protected, and put in order.

We must earnestly do well in the work of uniting, educating, and remolding the high-level patriotic figures in nationality religion. In politics we show concern for them, in life we give them proper consideration. We give them opportunities to learn from and do good deeds for the people, thereby consolidating the development of the revolutionary, patriotic united front.

We must get a good grip on the work of redressing grievances, trumped-up cases, and miscarriages of justice and of solving the important problems left over by history; realistically redressing the problems of the magnification of the scope of putting down the rebellion and of mistakes in demarcating the rich peasant status.

We must continue to publicize and carry out the party's and the people's government's policy concerning Tibetan compatriots residing abroad, viz, "all patriots belong to one big family, whether they rally to the cause early or late, let bygones be bygones, meritorious deeds will be rewarded, and they are free to come and go." We welcome Tibetan compatriots residing abroad, including the Dalai Lama, to return to their country in order to visit their relatives and friends, sightsee, or settle down. No matter when they come, we will welcome and warmly receive them.

In a word, we stress the unity of all nationalities in Tibet, especially the unity between the Tibetans and the Hans. No matter what nationality and no matter where it comes from, we must cherish nationality unity as we cherish our own eyes, and truly speak and do what is advantageous to nationality unity. Those who mistakenly express opinions that are not advantageous to nationality unity must be severely criticized and educated. Behavior that harms nationality unity must be boldly and resolutely curbed. Bad individuals who deliberately sow discord in nationality relations and destroy nationality unity must be dealt a firm blow. The people of all our nationalities must, with the great goal of building a united, prosperous, civilized new Xizang, closely unite, be as close to each other as if they were one flesh and blood, have brotherly love for each other, and never separate to their dying day.

3. Carry On the Revolutionary Tradition of Building an Enterprise Through Arduous Effort, Wholeheartedly Handle Affairs Well for the People of Xizang

The task of building a united, prosperous, civilized new Xizang is extremely formidable. Without arduous labor and great effort, this grand goal cannot be attained and this glorious task cannot be accomplished. In the past 30 years, the revolution and the construction in Xizang have always received great help from the state and have always been vigorously supported by the people of all nationalities in the country. In the future, this help and support will still be extremely important and cannot merely depend on the support of the people in the interior, we certainly cannot only be "people who are in the habit of asking the higher level for help." We must use the help of the state and the support of the people of the country to arouse our fighting will to cure poverty and create wealth, substantiating the conditions in this respect. In the initial period after liberation, the PLA and the work personnel who came to Xizang displayed the spirit of revolutionary heroism. On one hand they marched, on the other they built. They climbed snowy peaks, walked across glaciers, and conquered bitter cold, lack of oxygen, hunger, and sickness. They made the mountains bow their heads and the rivers give way, leveled hilltops to build bridges, built highways, reclaimed and cultivated wasteland, and increased production and practiced economy.

Together with the Tibetan people, they waged arduous struggle, regenerated the region through their own efforts, overcame one difficulty after another that was hard to overcome in this world, and obtained one victory after another in the revolution and construction of Xizang. Today, compared with the past, there are many more favorable conditions for building a prosperous, flourishing, rich, and strong new Xizang. But it is still necessary to maintain and carry on the fervent, vigorous, death-defying spirit of those years when we marched into, liberated, and built up Xizang, when we suffered greatly, endured hard work, took hard conditions as an honor and a joy, and devoted our intelligence and strength to the cause of rapidly transforming the poverty-stricken features of Xizang.

We must firmly establish the idea of wholeheartedly serving the people of Xizang. Our party's sole purpose is to work for the well-being of the people and do good things for them. The broad masses of party members and cadres in our region want to work for the well-being of, and do good things for, the people, in Xizang. All party members and cadres of every nationality in Xizang must strengthen the transformation of their world outlook and consciously launch a struggle to foster proletarian ideology and eliminate bourgeois ideology. We must really and fully understand the basic truth that the power we hold was given to us by the people and that we can only use it to work for the people's well-being and certainly cannot use it to work for our private gain. No matter whether he is a Tibetan or Han cadre, no matter whether he is a new or veteran comrade--all of them must pay attention to overcoming and correcting the unhealthy tendency toward subjectivism, bureaucratism, and the special privilege mentality. They must firmly establish the mentality of the masses, maintain close relations with the Tibetan masses, go down to the basic levels at regular intervals, share weal and woe and go through thick and thin with the masses of people of all nationalities, understand and experience and observe their hardships, and always keep their hardships in mind. They must truly think what the masses think, worry about what the masses worry about, help the masses in their needs, be diligent and conscientious, quietly immerse themselves in hard work, be honest in performing their official duties, with all their heart and soul consider the interests of the people, wholeheartedly do many good things for the people of Xizang, and, with the Tibetan cadres in first places triumphantly shoulder the heavy burden of building a new Xizang.

We must further establish the idea of "building up Xizang for a long time and making the borderland our home. The construction of Xizang is a long-term task and is a component part of the construction of our country's four modernizations. Concretely, for each cadre, staff member, and worker who comes to Xizang, the time they serve the people of Xizang is limited, but the development of the construction undertaking in Xizang is limitless. Each comrade who comes to Xizang to work, no matter the length of time he has been in Xizang, should not take a short-term view or feel that he does not belong there, but should feel at home and fight side-by-side with the people of Xizang. The individuals leaving or staying in Xizang must heed the party's summons and be subordinate to the requirements of the revolution. At present, the great majority of cadres, staff and workers who came to Xizang have already completed or are about to complete the construction tasks given to them by the party, and are about to receive new assignments and take up new posts, gradually being transferred in turn back to the interior of the country. The less time these comrades have been in Xizang the more they should make the best use of their time, do more work, and handle the work at their last post well. In fact, many comrades are even more enthusiastic about and like their work even more than before. At the same time, Xizang also needs a certain number of comrades of the Han and other nationalities to remain and work in Xizang for a long time, and some forces need to be constantly replenished, particularly doctors, teachers, and scientific and technological personnel. This is not a makeshift measure, but is decided by the requirements of the construction undertaking in Xizang. Although the Tibetan cadres are given first place, this definitely does not mean that we do not need cadres of other nationalities. Therefore, looking at the situation strategically and speaking of the situation as a whole, we still must continue to raise loud and clear the slogan "build up Xizang for a long time and make the borderland our homes" and promote the revolutionary spirit of "loving the country and Xizang as we love our homes."

The key to implementing the important directives issued by the Party Central Committee concerning Xizang is to maintain and improve the party's leadership and to increase the party's fighting capacity. We must gradually, with first place given to the Tibetan cadres, do well in building up the leading groups. Party committees at all levels must spare no effort to earnestly study, publicize, put into effect, and implement the directives of the central authorities. They must study new conditions, solve new problems, strengthen political and ideological work, and strengthen the party's organizational discipline. Party committees at all levels and every Communist Party member must be promoters in emancipating the mind and men of action in implementing the directives of the central authorities.

In the previous 30 years, in order to "plant the five-starred red flag on top of the Himalayas and let the flowers of freedom and prosperity bloom all over Xizang," we, under the leadership of the Party Central Committee, have victoriously completed the glorious mission of marching into and liberating Xizang and of laying the initial foundation for the construction of Xizang. Today, the Party Central Committee has issued the battle mobilization order to build a prosperous, flourishing, rich, and strong new Xizang, and once again in history a great march has begun in Xizang.

Let us, on this new historical march, unite as one, work in full cooperation and with one heart, inspire revolutionary enthusiasm, and struggle arduously. This year we must seize the key points, stadily and surely do several good things, win the confidence of the people, lay a good foundation, strive within 2 or 3 years to reverse the impoverished situation of the people in Xizang, surpass in 5 to 6 years the highest level of the past 30 years, become in 10 years prosperous on a comparatively large scale, and struggle hard for a united, prosperous, and civilized new Xizang.

WORKS OF GRAPHIC ARTIST PROFILED

OW010744 Beijing XINHUA in English 0732 GMT 1 Oct 80

[Text] Beijing, 1 October (XINHUA)--Powerful realism is shown at a display of woodcuts by China's leading graphic artist Gu Yuan that opens here at the National Art Gallery today.

On exhibit are 100 woodcuts (1939-1980) and 90 paintings in watercolors (1953-1980). They represent the artist's style, technique and themes in various stages of his career.

To support the exhibition, the national journal "ART RESEARCH" in its current issue carries a chronological table of Gu Yuan's works and two articles praising the "conciseness, grace and warmth" the artist has achieved in his woodcuts. "He possesses a power that turns Yenan's crude yellow soil into gold, and this comes from his revolutionary zeal and genius," wrote Li Qun, also a leading graphic artist of modern China.

The woodcut display includes "Carrying Fodder" (1940), one of Gu Yuan's graduation works as an art student in Yenan, which drew the attention of the well-known painter Xu Beihong; "At the District Government Office" (1943), showing the close ties between cadres and masses in the liberated areas; "Lowering Rents" (1943), featuring a peasants' meeting where farmhands settle accounts with a landlord; "Human Bridge" (1947), on the People's Liberation Army's advance under heavy enemy fire; "Revival of Anshan" (1949), depicting new China's early effort to build an iron and steel complex; "Jade Belt Bridge" (1962), demonstrating his excellent skill in portraying water, gently flowing and crystal clear.

"Visit to My Old Peasant Host" (1963) and "I Remember Yenan" (1978) recall old time intimacy between army and people. Among the new paintings are "Vietnam Refugees" done in 1979 and "Bringing the Sweet to the People" (1979), a gift to a foreign friend.

A primary school teacher in Guangdong Province, 19-year-old Gu Yuan travelled a long way from South China to Yenan in the north to take a direct part in the communist-led revolution. He painted wall pictures and did woodcuts, telling how the workers and peasants were smashing the old world and building the new worker-peasant regime. His works cover all kinds of subjects in the daily life of the people, from the new marriage law to land reform, from fighting drought to collecting manure. There are beautiful landscapes imbued with the joy and sorrow of the people. The Chinese peasant, awakening from a long history of oppression, stands out as a central figure in his art.

Gu Yuan directed the graphic arts department at the Central Institute of Fine Arts in 1958 and is now vice president of the Chinese Graphic Artists Association.

BRIEFS

XIZANG LANGUAGE SCIENCE PUBLICATION--China's first publication printed in Xizang language--was inaugurated in Lhasa recently. The inaugural issue of this publication contains detailed information on enormous energy resources in Xizang--solar energy, geothermal energy, and abundant hydroelectric power resources--and prosperous animal husbandry, and some well-known medical herbs. Also included in that issue were a number of articles dealing with subjects of production and human interest, which were accompanied by pictures. This scientific paper is published by the Xizang Autonomous Regional Society of Science and Technology for the benefit of cadres, scientists, technicians, workers, and herdsmen in Sichuan, Qinghai, Gansu, and Yunnan Provinces in addition to Tibet Autonomous Region. FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

ISLAMIC MINISTERS SEEK IRAN-IRAQ SETTLEMENT

OW020831 Beijing XINHUA in English 0816 GMT 2 Oct 80

[Text] United Nations, October 1 (XINHUA)--The Islamic conference of foreign ministers held its extraordinary session at the UN headquarters this afternoon and unanimously resolved to recommend the continuation of the efforts of the good-will mission headed by Pakistani President Ziaul Haq to end the military conflict between Iran and Iraq.

The conference also decided to keep the present extraordinary session open "until a solution is reached, which will safeguard the Islamic solidarity and stop the bloodshed among brothers."

The two-and-half hour meeting was chaired by Agha Shahi, foreign minister of Pakistan and current chairman of the Islamic conference.

The meeting heard a report by Chatti (Tunisia), secretary general of the organisation of the Islamic Conference, on the good-will mission to Iran and Iraq and the address of the Pakistani president as well as the statements of the representatives of Iran and Iraq.

Chatti told reporters that the Pakistani president was asked by the Iraqi president to convey to the foreign ministers of the conference his proposal on the unilateral ceasefire which is to begin from October 5 until 8.

However, the Iraqi side put forward this offer with four conditions, which indicates that the ceasefire is not valid if there are any military activities undertaken by Iran against the Iraqi forces after the beginning of ceasefire, or there is additional military concentration on the contact line betweenthe armed forces of the two parties or on the Iraqi borders, and the above stated period will be terminated if there will be no clear declaration on the part of the highest responsible authority in Iran expressing agreement on the ceasefire on its part and readiness for immediate entry into negotiations.

The Iranian representative rejected the Iraqi proposal at the meeting. He stressed that Iraq must put an end to its "aggression" and pull back its troops to the original position before the fighting started.

Earlier today, Iranian President Banisadr in a letter to the UN Secretary General also rejected the Security Council's resolution calling for a peaceful settlement of disputes between Iran and Iraq.

Sources said that the Islamic Conference would meet again on October 4 and then the good-will mission would go back to Iran and Iraq. The Pakistani president will fly to Washington the day after tomorrow ans will hold talks with U.S. President Jimmy Carter.

IRAN-IRAQ AERIAL WAR CONTINUES

OW011207 Beijing XINHUA in English 1150 GMT 1 Oct 80

[Text] Beijing, October 1 (XINHUA)--Iranian jets raided Baghdad yesterday and scored a direct hit on a power station, according to Western news agency reports.

The thermo-electric power station in the southern industrial suburb of Doura was struck early in the afternoon. Five hours after the bombing flames still leaped high up in the evening sky. Heavy casualties were reported.

Iranian aircraft also struck close to a nuclear reactor in north Baghdad, damaging a nearby warehouse. A gas pipeline exploded south of Baghdad and some cars were wrecked.

An Iraqi Army command communique said the towns hit in yesterday's strikes included Kirkuk, Erbil, Mosul and Takrit.

Iraq claimed to have brought down nine Iranian planes during the raids, seven over Baghdad, one over Erbil and another over Takrit.

The Iraqi communique declared that Iraqi aircraft directly hit the Iranian reinforcements trying to reach Dezful in southwest Iran and hammered a helicopter landing site, an ammunition dump and Iranian forces at Ahwaz.

Iranian losses included the destruction of oil depots in Ahwaz, a factory in Abadan, a naval unit in Daforin and oil installations in Khorramshahr, the communique noted.

IRAN IGNORES IRAQ CEASEFIRE CALL, CUBAN EFFORT

OW030732 Beijing XINHUA in English 0721 GMT 3 Oct 80

[Text] Beijing, October 3 (XINHUA)—Iranian President Abolhasan Bani-sadr ignored Iraq's call for a ceasefire yesterday and told his armed forces to intensify their efforts instead.

Iraq said on October 1 that it will unilaterally stop firing from October 5 to 8. Iran's top UN diplomat, Jamal Shemirani, immediately rejected the Iraqi truce call, saying that first "Iraq must put an end to aggression against Iran and it must go back to original positions before the start of hostilities."

After reviewing Iranian forces in Qazvin and near Tehran, President Bani-sadr yesterday urged his troops to make sacrifices.

Speaking on Tehran Radio on the same day the president praised the "discipline and steadfastness" of his countrymen.

It was reported that officials in Tehran had no comment on Iraq's ceasefire call.

Meanwhile, Iran has rejected an initiative by Cuban leader Fidel Castro who sent his Foreign Minister Isidoro Malmierca to Iran on October 1 to hold talks with Iranian Premier Mohammad 'Ali Raja'i in an attempt to end the Iranian-Iraqi war.

Raja'i told the Cuban foreign minister: "I am surprised at Fidel Castro's message recommending us to sit around a negotiating table with (Iraqi President) Saddam (Husayn), while we are under the chains of the tanks and shells of the enemy." "I think that he (Castro) has misunderstood our revolutionary people," he added.

Raja'i said that Iran was "prepared to fight to the end" against Baghdad's army.

Before coming to Tehran, the Cuban foreign minister had visited Baghdad.

CSO: 4020

BRZEZINSKI ON USSR, IRAQ, IRAN

OW011214 Beijing XINHUA in English 1206 GMT 1 Oct 80

[Text] Beijing, October 1 (XINHUA)--Zbigniew Brzezinski, U.S. President's national security adviers, yesterday urged the Soviet Union not to fuel the conflict between Iran and Iraq, according to reports received here.

Speaking at a Samford University forum in Birmingham, Alabama, Brzezinski said "It is important that no foreign power enter into that region and attempt to dominate."

"We feel the international community as a whole, and that includes the Soviet Union, should join in the most rapid termination of the conflict," he said.

"Any attempt to fuel that conflict by the infusion of arms, to one or another of the parties, would be destructive and in conflict with international consensus," he added.

Talking later to a local civic club in Mobile, Alabama, yesterday, Brzezinski noted that the new challenge facing America is to stop the "southward advance of the Soviet Union."

Referring to the consequences which the escalation of Iran-Iraq conflict might have for the U.S. and its Western allies, he warned: "If the flow of the vital source of energy to the economies of Western Europe and the Far East is interrupted or placed under the control of an adversary power, then there will have taken place a fundamental tipping of the balance of global power."

He declared that the United States is prepared to respond to threats to its national security and in the Mideast, security arrangements must be more subtle.

He said the United States has prepositioned equipment for possible use by American forces in the Middle East and substantial U.S. naval and air forces are already within reach of the vital Strait of Hormuz oil shipping channel.

CSO: 4020

BREZHNEV ON IRAN-IRAQ CONFLICT

OW011233 Beijing XINHUA in English 1217 GMT 1 Oct 80

[Text] Beijing, October 1 (XINHUA)--Soviet leader Leonid Brezhnev said the Soviet Union is for Iran and Iraq settling disputable issues between themselves at the table of negotiations. Meanwhile, he accused the United States, though without naming it, of "obviously trying to turn this conflict to their profit."

According to a TASS report, Brezhnev said this at a dinner in Moscow yesterday in honour of the visiting Indian President N. S. Reddy who arrived in Moscow on September 29.

Iran and Iraq are two neighbouring countries "friendly to the Soviet Union," Brezhnev said. "As far as the Soviet Union is concerned, we are for Iran and Iraq settling disputable issues between themselves at the table of negotiations. It would be good if they settled in the spirit of concord what can be settled now, but put off till tomorrow, when a settlement, possibly, comes easier what they cannot settle today."

He went on to say: "Neither Iraq, nor Iran will gain anything from mutual destruction, bloodshed and undermining each other's economy. It is only the third side, to which the interests of peoples in that region are alien, which stands to gain." The Soviet leader did not name the "third side" in the presence of the Indian president. He merely said: "They are those who want to establish their control over Near and Middle East oil, who again dream of turning Iran into a military base and gendarme post of imperialism."

Referring to current international tension, Brezhnev indicated that the Soviet Union was not responsible for it and tried by distorting facts to lay the blame on others for the tense situation in Asia, and other parts of the world.

CSO: 4020

U.S. DEPLOYS AWACS AIRCRAFT TO SAUDI ARABIA

OW010129 Beijing XINHUA in English 0104 GMT 1 Oct 80

[Text] Washington, September 30 (XINHUA)--The U.S. Defense Department announced today the U.S. Government has initiated the temporary deployment of AWACS aircraft to Saudi Arabia "purely for defensive purposes."

The deployment "is designed to track aircraft and thus to provide additional warning for Saudi defenses," the statement said.

The statement reaffirms the position of neutrality of the U.S. Government in the conflict between Iraq and Iran. "We are committed to as rapid a termination as possible of the conflict," it said.

State Department spokesman Jack Cannon, responding to questions put up by reporters, noted that the widening of conflict between Iraq and Iran "heightened Saudi concerns." He indicated that the security of Saudi Arabia is important to the security of the region.

Stressing the pure defensive purposes, Cannon emphasized that the deployment is "in no way to threaten Iran and any other countries." "We are responding to a defense request which we consider legitimate for Saudi Arabia," he said.

A State Department official said that four AWACS aircraft will be deployed to Saudi Arabia. The AWACS stands for Airborne Warning and Control System, which is able to detect incoming attacks and direct military operations from high altitudes.

CSO: 4020

SOMALIA DENIES PROVIDING U.S. WITH MILITARY BASES

OW301936 Beijing XINHUA in English 1925 GMT 30 Sep 80

[Text] Beirut, September 30 (XINHUA)--President Mohamed Said Barre of Somalia has denied that the agreement signed last August between his country and the United States provided the latter with military bases in Somalia.

In an interview with Beirut's Arabic daily AL-NAHAR published today, he said that the agreement only provided for supply of fuel by Somalia to U.S. vessels and aircraft in case of emergency, "but we did not give them any bases, nor do they have any presence here."

On condition mentioned in the agreement was that such facilities would not be provided to the Americans if they were fighting Somalia's friends, the Somali president added.

He explained that it was Arab reluctance to come forth with aid to this country in the conflict with the Soviet-supported neighbouring country of Ethiopia that had left him with no choice but to sign an agreement with the United States.

It was earlier reported that on August 22d, Somalia and the United States signed an agreement allowing the U.S. access to the port and air base facilities in Berbera, northern Somalia, in exchange for five million U.S. dollars in economic aid, and permission to buy 40 million dollars in U.S. military equipment over the next two years.

CSO: 4020

IRANIAN PARLIAMENT DISCUSSES HOSTAGES

OW010755 Beijing XINHUA in English 0746 GMT 1 Oct 80

[Text] Beijing, October 1 (XINHUA)--The Iranian Parliament yesterday failed to make any decision on American hostages in a heated debate, according to Western news agency reports.

It has decided to set up a seven-member commission to study the issue of the American hostages, which had no power to make a final decision. But yesterday's parliament session failed to agree on who would be its members.

Speaking at the session, which was held after two earlier postponements, Speaker Hasheme Rafsanjani said that the parliament had to "get rid of this ominous issue (of American hostages), and pass it on to the commission."

The deputies were also divergent on whether the commission should contact officials of the United States or other countries which represent American interests in Iran.

Some deputies said that the taking of the American Embassy was a righteous move and any move to enter upon negotiations would weaken the Islamic Revolution. They persisted that the American "spies" among the hostages should be put on trial.

Others argued that the world would condemn Iran if it refused to negotiate.

Former speaker Yadol ah Sahabi said, "All the difficulties the country finds itself in stem from the problem of the hostages." "We are isolated in the world, we must negotiate so that the problem becomes clear to all," he added. His remarks brought about protests of many deputies.

PAKISTAN'S ZIA ADDRESSES UN ON MISSION TO IRAN, IRAQ

OW020113 Beijing XINHUA in English 0104 GMT 2 Oct 80

[Text] United Nations, October 1 (XINHUA)--Mohammad Ziaul Haq, president of Pakistan and chairman of the Islamic Conference, stressed in his statement to the UN General Assembly today that an essential condition for the return of peace between Iraq and Iran would be the observance of strict neutrality and noninterference in their internal affairs by the outside powers.

He said, "The tragic conflict between the two Islamic states of Iran and Iraq is a source of deep concern to the world community." "This violent conflict between two brotherly Islamic states," he pointed out, "is attributable to the unstable conditions created in a sensitive area by the pressures and counterpressures of superpower rivalry."

Commenting on his just concluded good-will mission to Iraq and Iran at the behest of the Islamic Conference, Ziaul Haq said, "I was able to ascertain the views of my two brothers in a series of meetings in an atmosphere of mutual trust and confidence."

He added, "I have faithfully conveyed to each brother the views and position of the other in regard to a cessation of hostilities."

He expressed his hope that "efforts will continue to end the tragic conflict between Iran and Iraq and that a peaceful solution will be found to their differences on the basis of justice, respect for each other's rights and in the spirit of Islamic solidarity and brotherhood."

CSO: 4020

PAKISTAN'S ZIA CONDEMNS SOVIET AGGRESSION IN AFGHANISTAN

OW020117 Beijing XINHUA in English 0109 GMT 2 Oct 80

[Text] United Nations, October 1 (XINHUA)--Mohammad Ziaul Haq, president of Pakistan, at the UN General Assembly today strongly condemned the Soviet aggression against Afghanistan and voiced firm support for the Afghan people in their heroic resistance against this act of aggression.

Ziaul Haq said, "The world of Islam is pre-occupied with the tragedy that has overtaken Afghanistan. This small, independent, non-aligned Muslim country has been subjected to military intervention on a massive scale, in an attempt to keep in power a regime that has been foisted on an unwilling people."

The struggle of the people of Afghanistan against the Soviet intervention, he pointed out, "is as sacrosanct, and worthy of respect and support, as the heroic struggle of the Algerian people, the people of Zimbabwe--and, indeed, of all the oppressed and exploited people of the world, at one time or another against foreign domination."

"The deeply-felt resentment of the international community, and of the Muslim world in particular, against this act of aggression has been clearly expressed in the demand for the immediate, unconditional, and total withdrawal of Soviet military forces from Afghanistan," he stated.

Ziaul Haq reaffirmed the principles on which the solution was based as follows:

(a) the immediate, unconditional, and total withdrawal of Soviet forces from Afghanistan;

(b) the restoration of the independence and non-aligned status of Afghanistan;

(c) respect for the right of the Afghan people to determine their own destiny, and to choose their own form of government in accordance with their own wishes, free from external intereference; and

(d) the creation of conditions which would permit the Afghan refugees to return to their homes in safety and honour.

Turning to the issue of Kampuchea, Ziaul Haq said, "Here, again, a puppet regime has been foisted by the foreign occupation forces, leading to a mass exodus of the Kampuchean people, who have endured great suffering and privation."

"In both cases," he pointed out, "principles of international law and peaceful co-existence have been flouted."

CSO: 4020

MALAYSIAN MINISTER ON KAMPUCHEA, AFGHANISTAN

OW020747 Beijing XINHUA in English 0732 GMT 2 Oct 80

[Text] United Nations, October 1 (XINHUA)--Tengku Ahmad Rithauddeen, Malaysian foreign minister, reiterated his country's condemnation of military aggression against Kampuchea and Afghanistan by Vietnam and the Soviet Union.

Speaking at the UN General Assembly session this afternoon, he pointed out that events in Kampuchea and Afghanistan posed a grave challenge to the United Nations. "This challenge must be faced if we are to maintain the strength and credibility of the organisation as the guardian of international peace and security," he said.

"To meet this challenge," he added, the UN General Assembly "must not allow countries to twist 'aggression' as 'cooperation' and 'intervention' as 'assistance'."

He stressed a solution to the Kampuchean problem must be found urgently in accordance with the UN relevant resolution which calls for immediate and total withdrawal of Vietnamese troops from Kampuchea, ensuring that a sovereign and independent Kampuchea will not be a threat to any of its neighbours.

"It is only on this basis that the beds of future intervention and interference in the internal affairs of that country either by regional or extra regional powers will be removed and Southeast Asian countries can together determine factors of peace and security as envisaged in the concept of the zone of peace for the region," he stated.

With regards to Afghanistan, he said Malaysia had deplored Soviet actions in Afghanistan and reiterated the call for an immediate withdrawal of all foreign forces in order to enable the people of Afghanistan to decide their own future free from interference and coercion.

'XINHUA' NOTES ANTI-KHALQI PURGE IN AFGHANISTAN

OW011533 Beijing XINHUA in English 1505 GMT 1 Oct 80

[Text] Islamabad, October 1 (XINHUA)—Over twenty former government ministers, vice-ministers and politicians of the Khalq (people) facton of the Afghan People's Democratic Party have been removed from the jails where they had been imprisoned to embassies of East European countries in Kabul.

The Pakistan English-language daily, THE MUSLIM, reported today quoting "a reliable source" that the step was taken after the Soviet advisers and diplomats of countries friendly to the Babrak Karmal regime had failed to bring about a reconciliation between the Khalq and Parcham (flag) faction of the People's Democratic Party. Karmal is the leader of the Parcham faction.

The Khalqis who had been jailed included Abdul Kareem Misaq, former minister of land reform; Abdul Hakim Sharaee, former attorney-general; and Dr. Shaq, governor of Kabul. They had been responsible for organizing members of the Khalq faction to challenge the Karmal regime and Karmal's appointment as general-secretary of the party.

Other Khalqi leaders who joined Karmal's government or the Revolutionary Council, had lodged a strong protest against the execution of four former Khalqi ministers and six pro-Khalqi officials by the Karmal regime in July.

U.S. URGES REINTEGRATING GREECE IN NATO

OW020726 Beijing XINHUA in English 0709 GMT 2 Oct 80

[Text] Washington, October 1 (XINHUA)--"The United States regards the early reintegration of Greek armed forces into the NATO military structure as a matter of great importance for the NATO Alliance and for the security of the eastern Mediterranean," a U.S. State Department spokesman said today.

The statement was made in response to a warning yesterday by Greek Foreign Minister Konstandinos Mitsotakis in New York that Greece will withdraw from NATO and close the U.S. base facilities in Greece, if its reintegration into NATO is not completed within a few weeks.

Greece withdrew from the NATO's military structure in 1974 over its dispute with Turkey on the issue of Cyprus. But it has participated in the NATO's political activities and in limited maneuvers with NATO forces. It formally applied for reentry in 1976.

Greece and Turkey are reportedly deadlocked over Greek insistence that its reentry into NATO include operational control of Aegean Sea and air lanes as part of NATO's defense planning. Turkey's refusal to agree has blocked the unanimous decision needed from NATO members to readmit Greece.

According to the spokesman, efforts to achieve reintegration are being carried out in NATO military channels. The Supreme Allied Commander in Europe Bernard W. Rogers is working actively with both the Greek and Trukish military authorites. Rogers is said to have presented Greece and Turkey with a three-point formula earlier this month that would reintegrate Greece into NATO now and decide the Aegean dispute later.

The spokesman said that the United States "fully supports General Rogers' efforts to reach an agreement as soon as possible that is satisfactory to all parties."

The United States has four major military installations in Greece, including a strategically important naval base and a regional electronic surveillance center.

NATO EXERCISES BEGIN IN MEDITERRANEAN

OW301218 Beijing XINHUA in English 1211 GMT 30 Sep 80

[Text] Rome, September 30 (XINHUA)--NATO's annual fall military exercises in the Mediterranean started in the Pordenone region, northeastern Italy, yesterday.

The exercises, codenamed "Display Determination '80" and commanded by Admiral William J. Crowe Junior, commander-in-chief of the Allied Forces of Southern Europe, are designed to demonstrate the determination of NATO to defend and reinforce the Mediterranean countries and its ability to supply military equipment to those nations. They are also intended to train allied ground, naval and air forces as well as amphibious operation units to improve their efficiency and coordination.

Before October 14, ground, naval and air forces as well as amphibious operation units from NATO countries including the Netherlands, Portugal, Britain, the United States, Turkey and Italy would conduct military exercises by stages in different war zones.

Yesterday's exercises under the command of General Bittorio Santilli, commander for the Allied Southern European ground forces, were air-to-ground manoeuvres in areas lying between Italy's Pordenone and Carnia. One division and three brigades of Italian troops, with the coordination of one independent, mixed brigade of Portuguese troops, undertook the task of patrolling the frontier areas, ready to smash any "invaders." This was to show solidarity and support for threatened NATO countries.

SOVIET CRUISER KIROV JOINS NORTHERN FLEET

OW021840 Beijing XINHUA in English 1829 GMT 2 Oct 80

[Text] Washington, October 2 (XINHUA)--The battle cruiser Kirov, the Soviet Navy's first nuclear-powered ship, has been sighted by NATO patrol aircraft cruising north off the Norwegian coast evidently headed for the northern fleet, based on the Kola peninsula, disclosed a report in the NEW YORK TIMES today.

At about 28,000 tons, the Kirov is the largest warship, apart from aircraft carriers, to be deployed in more than 30 years. It is a multiple purpose warship with weapons for surface, anti-aircraft and anti-submarine warfare.

The report said that the Soviet decision to build three battle cruisers, of which the Kirov is the first to be deployed, was interpreted by naval analysts "as a sign that the Soviet high command intended to concentrate on ships capable of projecting naval power around the world."

The deployment of the Kirov with the northern fleet is considered a "significant reinforcement" of that fleet which is the most powerful of the Soviet Union's four major naval commands, the report said. North Atlantic Alliance naval analysts remarks that when the Kirov arrived, the northern fleet would have 81 major surface combatants, 130 submarines and 80 to 90 bombers, including long-range Backfire B's armed with air-to-surface missiles.

The report said that the northern fleet would probably be able to round the north cape and move through the Norwegian Sea to the major "choke points," the seaways between Greenland and Iceland and Iceland and Scotland.

In the view of senior United States admirals, the report said, should the Russians be able to force their way through the gaps and allied blocking forces of submarines, aircraft and surface ships, convoys crossing the North Atlantic with reinforcements and supplies for allied battlefronts in Europe would be at grave risk. The addition of the Kirov to the northern fleet, they said, increases the breakthrough capability of the Russians.

NATO'S SECRETARY GENERAL CITES NEED FOR MODERN NAVY

OW030146 Beijing XINHUA in English 0115 GMT 3 Oct 80

[Text] Brussels, October 2 (XINHUA)--"NATO has little choice but to make whatever sacrifices may be required to maintain effective, modern, and highly capable naval forces of its own," said J. Luns, secretary general of NATO here this evening.

In his speech for the Royal Institute of International Relations in Brussels, Luns said: "All the tangible evidence of the broadening horizons of Moscow's strategic thinking may be found in the relentless development by the Soviet Union of an ultra-modern, all oceans, offensive naval capability."

The secretary general pointed out that the Soviet invasion of Afghanistan has sensitized the Alliance to the potentially direct relevance of events far removed from its official geographic purview to the safeguarding of those vital Western interests which NATO has been charged to defend since its inception. "This new awareness has been especially acute in the naval field, where it has become broadly recognized that, for example, other NATO states must do more within the treaty area in order to free US fleet units to pursue missions outside that area to the benefit of Western security," he added.

On preliminary U.S.-Soviet talks on long-range theatre nuclear forces in Europe, Luns said that even if these talks are to succeed, "the Alliance still must move to modernize its nuclear forces in Europe as a necessary counter to the existing and threatening Soviet superiority in this field."

On the Madrid conference, Luns said that the allies should speak at Madrid with one voice, making emphatic that the Soviet invasion of Afghanistan is "an unacceptable affront to the principles supposedly agreed to at Helsinki five years ago."

TALKS ON CENTRAL EUROPE FORCES REDUCTION RESUMED

OW261349 Beijing XINHUA in English 1234 GMT 26 Sep 80

[Text] Vienna, September 25 (XINHUA)--Talks on a reduction of forces in Central Europe were resumed here today for their 22d round after a two-month adjournment.

It is generally held among observers here that the new round, which is aimed at setting a common ceiling for the forces of the NATO and Warsaw Pact nations, is not likely to produce any positive results worthy of mention.

This is because the two sides are still far apart in their estimates of the Soviet ground forces now stationed in Central Euorpe.

Luxembourg Ambassador and spokesman of the NATO countries Edouard Molitor told a joint press conference after the plenary session today that the Warsaw Pact nations must "adopt practical measures now to clear up the difference between the East and the West on the number of Soviet ground troops stationed in the reduction area."

A spokesman of the Warsaw Pact nations refuted the Western estimate that the Soviet side has an advantage of 150,000 men in the reduction area. He even accused the NATO countries of intentionally playing up the data issue and the "geographical factor" that the Soviet Union is closer to Central Europe than the United States.

The new round of talks will last till the end of December.

FRENCH PRESIDENT DISCUSSES SECURITY

OW301240 Beijing XINHUA in English 1231 GMT 30 Sep 80

[Text] Paris, September 29 (XINHUA)--French President Valery Giscard d'Estaing said today that "in a dangerous world where we are living, the first and foremost rule for a big power such as France is not to be at a dead end in security matters."

The French president made the statement while inspecting the training camp of the 11th Parachutist Division in Caylus, southern France.

"France should be capable of facing all kinds of threats, whatever their condition, time, location and nature," he said.

Touching on the reformation plan for the French Army which required reduction of paratroopers, he said: "I have decided to change the decision in the plan so as to keep this contingent of troops intact in our armed forces."

He approved the plan to establish a sub-unit of women soldiers in the paratroops who would receive, care for and transport the wounded and extend relief to all would-be war victims.

In addition, he also put forward three proposals to the staff office of the armed services, namely, to keep reserve units ready for action at any time in case of emergency, to speed up the production of improved automatic rifles, and to work out a five-year plan to ensure sporting activities for servicemen.

ASEAN MEETING ON INDUSTRY, ENERGY ENDS IN INDONESIA

OW301730 Beijing XINHUA in English 1623 GMT 30 Sep 80

[Text] Beijing, September 30 (XINHUA)--The Association of Southeast Asian Nations (ASEAN) ended its first ministerial meeting on industry and energy in Indonesia today with general agreement on basic guidelines including cooperation in energy and automotive cooperation projects, according to reports received here today.

A joint statement issued at the end of the two-day meeting held at Denpasar, Bali, said that the ministers agreed "to formulate framework for cooperation in energy and to enable the countries to obtain security of supply."

They also agreed to exchange information on the development of alternative energy resources, including nuclear power, and emphasized the importance of energy conservation.

"ASEAN member countries should work towards lessening dependence on imported oil and accelerating the development of indigenous sources of energy," the statement pointed out.

The ministers of the five ASEAN countries agreed to establish a plant in each country for five automobile components. Under this automotive complimentation scheme, Indonesia will build a steering plant, Singapore a fuel injection pump, Malaysia a headlight plant, the Philippines will produce heavy-duty rear axles for commercial vehicles, and Thailand a carburetor plant.

Indonesia's Ministry of Industry A. Rauf Suhud said after the meeting that they also agreed to give more emphasis to private participation, such as joint ventures among ASEAN private companies.

An economic ministers' meeting to discuss and approve the agreement will be held in Bangkok at the end of October, he said.

THAI MINISTER ON SRV REJECTING ASEAN PROPOSAL

OW020836 Beijing XINHUA in English 0825 GMT 2 Oct 80

[Text] United Nations, October 1 (XINHUA)--Sitthi Sawetsila, foreign minister of Thailand, told the press following his talks with Foreign Minister of Vietnam Nguyen Co Thach here this afternoon that Vietnam rejected the ASEAN proposal with regard to the convening of an international conference on Kampuchea.

Sawetsila described the talks as a "frank and friendly exchange of views." He said that views of both sides were apart. Vietnam did not accept the proposal of ASEAN countries, while ASEAN countries did not accept the Vietnamese four-point proposal advanced at the so-called foreign ministers' meeting of three Indo-Chinese states in Vientiane either.

The proposal presented to Nguyen Co Thach by Sawetsila on behalf of ASEAN at the talks includes among other things the withdrawal of all foreign troops from Kampuchea, free elections in Kampuchea under UN supervision and guarantees to respect the sovereignty, independence, territorial integrity and neutrality of Kampuchea.

At the press conference Sawetsila stressed the need to find a just and lasting solution to the conflict in Kampuchea. He also reiterated ASEAN's proposal for the convening of an international conference to resolve the conflict in Kampuchea.

He pointed out that "once a just and lasting solution to the conflict in Kampuchea has been found, the ASEAN countries will exert renewed efforts, in cooperation with all the other countries of Southeast Asia, including Vietnam, towards the common goal of establishing Southeast Asia as a zone of peace, freedom and neutrality."

KUWAIT LACKS ENTHUSIASM FOR INCREASED OIL DEMANDS

OW301622 Beijing XINHUA in English 1508 GMT 30 Sep 80

[Text] Kuwait, September 30 (XINHUA)--Since the outbreak of the war between Iraq and Iran, former oil buyers of the two countries have turned to Kuwait for oil.

According to AL-QABAS today, the Kuwaiti Ministry of Oil has received messages from oil companies in Asia and Europe in the past few days expressing concern about their interest being affected by the Iraqi-Iranian war. They said they would send delegates to Kuwait to negotiate oil contracts to make up for the oil shortage in the world market caused by the war.

A Kuwaiti official of the Oil Ministry told the paper that Kuwait showed no enthusiasm over these demands. Adhering to its policy of producing an average of 1.5 million barrels of oil per day, Kuwait would refuse these countries' demands for oil, the paper said.

It was reported that the most eager among the countries asking Kuwait, Saudi Arabia and other Gulf oil producing countries for oil was Japan. Both Iraq and Iran were its suppliers.

Despite the war, Iraq's oil still flows abroad through the pipelines in some Mediterranean countries. A total of 500,000 barrels transit the pipelines in Lebanon and Turkey every day and 400,000 barrels transit the pipeline in Syria.

GROUP OF 77 ON INTERNATIONAL ECONOMIC ORDER

OW020842 Beijing XINHUA in English 0831 GMT 2 Oct 80

[Text] United Nations, October 1 (XINHUA)--"The main impediment towards progress in the establishment of a new international economic order is the opposition on the part of many developed industrialized countries to measures for restructuring the international economic system," the Group of 77 stressed yesterday.

In a declaration issued after the conclusion of the 4th annual meeting of the foreign ministers of the members states of the group which was held at the UN headquarters from September 29 to 30, the ministers expressed deep disappointment and serious concern at the failure of the 11th special session of the General Assembly to achieve its objectives.

The ministers stressed that the present difficulties and uncertainties in international economic relations and the stalemate in negotiations between developed and developing countries require renewed efforts to promote and strengthen economic cooperation among developing countries as an indispensable element both of the accelerated development of developing countries and of strengthening their negotiating power in their relations with the rest of the world.

They noted the consensus reached on the text of the new international development strategy for the 1980's, which is to come into effect from January 1, 1981. They recommended that the strategy be adopted by the General Assembly at its 35th regular session.

POLISH LEADER URGES NO MORE STRIKES

OW011852 Beijing XINHUA in English 1843 GMT 1 Oct 80

[Text] Warsaw, October 1 (XINHUA)--Member of the political bureau of the Central Committee of the Polish United Workers' Party and Vice-Chairman of the Council of Ministers Kazimierz Barcikowski in a televised address yesterday called on the workers to refrain from holding any more strikes.

Barcikowski said, "It was announced in Gdansk that a warning strike would be held on October 3. The strike, if staged, may spread all over the country. It could not be taken as anything other than a breach of the agreement."

Under the agreement reached between the government committee and the United Strike Committee at the end of August, the government should work out a plan for wage raises before the end of September. As the government failed to keep this promise, the Independent Trade Union of Gdansk decided to hold an one-hour strike in the city on October 3 as a warning.

Barcikowski said that the government was determined to observe the agreement and would put it into effect. But, he added, "Things do not depend on the will of the government." In some cases, the agreement could not be carried out as scheduled because of the impotence of the authorities concerned. In other cases, the demands for wage increases are excessive and the government is unable to meet it.

He went on to say, "The economic losses caused by the work stoppages are tremendous. Our factories are now operating at 80 to 85 per cent of their capacity. The pace of production must be speeded up and productivity raised as soon as possible. Any more disruption of the production would add to the existing difficulties, staggering enough as they are."

POLISH LEADERS MEET UNIVERSITY STUDENT DELEGATES

OW301631 Beijing XINHUA in English 1512 GMT 30 Sep 80

[Text] Warsaw, September 30 (XINHUA)--Polish leaders Stanislaw Kania, Henryk Jablonski and Jozef Pinkowski met representatives of the Socialist Youth Union of University Students yesterday and discussed with them major problems of interest to the students.

The Polish telegraph agency reported that during the three-hour meeting, they discussed the institution of higher education, instruction and study in the universities and colleges and the tasks of the university students' movement.

In recent months, university students have demanded more insistently than ever the right to form independent students' unions and reform of higher education. Those of the University of Gdansk have formed their independent union and appealed to the students of universities in the Baltic coast areas to take united action for the autonomy of their universities.

According to the newspaper, VOICE OF THE COAST, the Gdansk Students' Union has drawn up its rules and program of action and will strive for students' autonomy, reform of higher education and better material conditions for the students.

University students in this capital are making preparations for the formation of an independent union of their own. Similar demands were seen in handbills pasted on walls and windows of the dormitories of the Warsaw Polytechnic Institute and were also voiced by students in other cities.

Thus, the meeting of Polish leaders and students' representatives yesterday attracted much public attention.

At the meeting, Kania was reported to have said that the party "is deeply concerned" about what has happened among the university students. He promised to "give due attention" to the demands of the students and will answer them soon.

Speaking of the workers' strikes which broke out last month and the current situation, Kania said that the workers "oppose not socialism but distortions of socialism; they oppose not the people's power but the methods of administration."

He added that "the crisis has not yet come to an end."

The representatives of the students told their leaders that the students wanted to play a greater part in the administration of the universities and revive academic criticism in the universities and scientific institutions. When discussing the formation of organizations for students' autonomy, they said they were in favour of the Socialist Youth Union of University Students functioning under the guidance of the ideological line of the party. They added that the union would "act with the party as partners."

BRIEFS

MEASURES TO KEEP STRAIT OPEN--Beijing, 29 Sep (XINHUA)--Washing news: U.S. President Carter said today that the United States and its allies will take "all the necessary" measures to insure that the Strait of Hormuz will be kept open so that oil can be shipped to the West." Carter said: "I have been in contact with leaders of our allies in the Western world and leaders of Islamic countries directly involved. We will take all the necessary measures to keep this strait open." He said: If this strait is blocked to navigation, the United States and its allies "will have to ask the people of their own countries to adopt conscious conservation measures and also to enforce compulsory conservation measures." Carter emphasized: If such a situation arises, "our countries may suffer serious losses." [Text] [OW290440 Beijing XINHUA Domestic Service in Chinese 1638 GMT 27 Sep 80]

THAI ARMED FORCES TRANSFERS--Bangkok, 29 Sep (XINHUA)--The office of the prime minister of Thailand announced here today the promotion and transfer of 231 officers of colonel's rank and above in the three services of the Thai Armed Forces. The former Under-Secretaries of State for the Ministry of Defence General Chao Swasdisongkram and Admiral Ket Santivejkul were appointed deputy supreme commanders of the armed forces; the former deputy commander of the Royal Thai Navy Admiral Smut Sahanavin was appointed commander of the Royal Thai Navy; the former Naval Chief of Staff Admiral Udom Pumhiran was appointed deputy commander of the navy; the former Assistant to the Commander of the Royal Thai Air Force General Phayome Yensoodjai was appointed new deputy commander of the Royal Thai Air Force. According to a retirement decree of the Thai Government, officers in the Thai Armed Forces reaching 60 years of age will retire before October first each year; therefore, an overall transfer of officers is made annually. The promotion and transfer of posts this time will be effective from October first this year. [Text] [OW291938 Beijing XINHUA in English 1912 GMT 29 Sep 80]

UN STUDY GROUP--Beijing, 30 Sep (XINHUA)--A group of specialists organized by the United Nations Department of Technical Cooperation for Development and headed by Robert Dijon left here by plane today. Members of the group came from 14 developing countries. They studied the prospecting, exploitation and utilization of ground water in the semi-arid areas in north China and had discussions with Chinese engineers and technicians during their 24-day stay in China. Zou Jiayou, vice minister of geology, gave a dinner in honor of the group. [Text] [OW030115 Beijing XINHUA in English 30 Sep 80]

TIANJIN FRIENDSHIP--Tianjin, 30 Sep (XINHUA)--The friendship store in Tianjin has begun to handle international insurance, international through-transport and purchase by mail and issue certificates of origin to cater for the growing number of foreign guests who purchase Tianjin's rugs, furniture and arts and crafts. The store gives customers quotations of prices, specifications and packing by letters on request. [Text] [Beijing XINHUA in English 0254 GMT 30 Sep 80 OW]

IRAQ-IRAN FIGHTING SLACKENS--Beijing, Sep 30 (XINHUA)--Two Iranian war planes bombed and destroyed an Iraqi oil refinery at Khanaqin close to the Iranian border early yesterday afternoon, according to reports reaching here. Tehran Radio announced that the planes also knocked out a military post, a gas reservoir and a radar antenna in Iraqi territory. In addition, three Iraqi MiGs were hit while circling above Abadan early yesterday and three others were downed as they attacked the military base at Bushir and the Kharg Island oil terminal the previous day. The Iraqi side was quoted as saying that their planes attacked Bushir again yesterday and destroyed all the aircraft on the runways. A communique issued in Baghdad said that Iraqi planes attacked and destroyed "enemy concentrations" near Sar-e-pol-e-Azahab in western Iran. But an Iranian communique announced that Iraqi forces were compelled to retreat and abandon several tanks in the region after being confronted by Iranian forces. [Text] [OW301238 Beijing XINHUA in English 1227 GMT 30 Sep 80]

'ARAFAT LEAVES IRAN FOR USSR--Tehran, October 1 (XINHUA)--Leader of the Palestine Liberation Organization Yasir 'Arafat left here for the Soviet Union on September 29 after his visit to Iran, reported the ISLAMIC REPUBLIC here today. He had three rounds of talks with Iranian President Bani-sadr. The paper quoting a Palestinian source said that during the third meeting held on September 29, 'Arafat and Bani-sadr "exchanged views on the situation in the region, particularly the military situation on the Iranian-Iraqi frontier." They also discussed "the effect of the (recent) events on the situation in the Persian Gulf and the Middle East in general and with regard to the Zionist enemy." [Text] [OW011645 Beijing XINHUA in English 1635 GMT 1 Oct 80]

FREE TRADE ZONES--Colombo, 1 Oct (AFP)--A Chinese delegation has told the Sri Lanka authorities that China is considering establishing three free trade zones and the experience they gained here would be most useful, the Foreign Ministry said today. The nine-member delegation led by Mr Jiang Zemin, vice minister of the Chinese Foreign Investment Commission, who studied the operation and techniques of Sri Lanka's free trade zone, left for Malaysia today after a 5-day visit here. During their stay here they visited the free trade zone and had discussions with officials of the Greater Colombo Economic Commission which runs the zone. They also had discussions with the export development board, the principal collector of customs and the chairman of the port cargo corporation. They were hosted to dinner last night by the Acting Minister of Foreign Affairs Tyronne Fernando. They visited Sri Lanka on the first leg of a tour of several Asian and South American countries to study the operation of free trade zones. [Text] [BK011442 Hong Kong AFP in English 1333 GMT 1 Oct 80]

IRANIANS REFUSE TO COMPROMISE--Beijing, October 1 (XINHUA)--Iran leader Ruhollah Khomeyni said yesterday evening that there could be no conciliation with Iraq, according to Western news agency reports. In a message broadcast over Radio Tehran, Khomeyni said, "We are not negotiating with the Iraqi people unless they evacuate our territory." He said, "Only if they surrender, for the sake of Muslims, we might consider something." "But as long as they have arms in their hands we'll also have arms, faith and Islam. We will proceed with these arms and crush them all, as we have crushed the superpowers with the same arms," he added. Khomeyni said, "To those people who are in cities such as Khorramshahr, Ahwaz and Abadan, I say they should resist with dignity and courage and not flee. This is a sign of weakness." "If we are killed, then we have done our duty. If we kill, we have fulfilled our obligations," he declared. "The Iranian nation must crush paper tigers such as Saddam Husayn," he said. "It is the duty of all to defend Islam. If we are obliged to, everyone must take up arms to defend Islam." [Text] [OW011210 Beijing XINHUA in English 1202 GMT 1 Oct 80]

ENVOY IN SAN MARINO--Rome, 1 Oct (XINHUA)--The Government of the Republic of San Marino today held a traditional grand inauguration ceremony for the newly-elected heads of state Gian Carlo Berardi and Rossano Zafferani. Diplomatic envoys of various countries to San Marino including Chinese Consul General Huang Yuping attended the ceremony. The two consuls captains-regent were elected on September 19 at the great and general council. They will assume the office of head of state for six months starting from October first. After the ceremony, Secretary of State for Foreign Affairs and Political Affairs Giortano Bruno Reffi received and had a cordial and friendly talk with Huang Yuping. [Text] [OW030117 Beijing XINHUA in English 1915 GMT 1 Oct 80]

PAKISTAN'S ZIA LEAVES BAGHDAD--Baghdad, September 30 (XINHUA)--Pakistani President Mohammad Ziaul Haq left here this afternoon for New York via Paris after talks with President Saddam Husayn on the Iraqi-Iranian conflict, according to a Radio Baghdad broadcast this evening. During the talks this morning, the two sides examined developments of the conflict and reviewed efforts made by the Islamic nations for a peaceful solution to the dispute. No result was reported by the radio. The radio said that President Ziaul Haq paid tribute to the Iraqi leader's speech delivered on September 28 as expressing "a cordial spirit of ardent love of peace and lenience." Attending the talks were the visiting crown prince of Jordan, Hassan ibn Talal, and Secretary-General of the Islamic Conference Habib Chatty. President Ziaul Haq, who heads the Islamic Conference, arrived here yesterday after his visit to Tehran. [Text] [OW019713 Beijing XINHUA in English 0659 GMT 1 Oct 80]

USSR SUSPENDS OIL TO TURKEY--Ankara, October 1 (XINHUA)--The Soviet Union has told Turkey that it would be unable to deliver the balance of the crude oil it promised to supply to Turkey this year because of the conflict between Iran and Iraq, according to press reports here today. The Soviet Union originally pledged to provide Turkey with 800,000 tons of oil up to mid-September but, so far, it had only supplied 300,000 tons. The Soviet Union has been delivering oil to Turkey from Iraq which has suspended crude oil export since the outbreak of conflict with Iran. [Text] [OW011231 Beijing XINHUA in English 1215 GMT 1 Oct 80]

IRAQ CALLS FOR CEASE-FIRE--Beijing, October 2 (XINHUA)--Iraq has decided to call a unilateral ceasefire in its war with Iran from October 5 to 8, if Iran does not fire on Iraqi forces, according to news agencies' reports quoting an Iraqi special envoy yesterday. Iraqi President Saddam Husayn's special envoy Ismat Kittani made this statement on his way to a New York meeting of the Islamic Conference to hear a report on a recent good-offices mission to Tehran and Baghdad of Pakistani President Mohammad Ziaul Haq. The Iraqi Government reportedly informed Habib Chatti, secretary general of the Islamic Conference, of its decision while he was in Baghdad this week on a peace mission. [Text] [OW020740 Beijing XINHUA in English 0728 GMT 2 Oct 80]

SADAT REITERATES OFFER TO U.S.--Cairo, October 1 (XINHUA)--Iraq and Iran both are Islamic countries and Egypt does not side with either of them against the other except for a just cause, said Egyptian President A. al-Sadat at the closing session of the first congress of the National Democratic Party tonight. The president pointed out that he had said on many occasions that Egypt would offer the U.S. facilities to defend any Islamic or Arab country. He revealed that despite the rupture of Egypt-Saudi relations, Egypt willingly gave permission for the passage through Egyptian air space of four American radar planes to defend Saudi territory at the request of the Saudi Government. He said Egypt would ask America to channel all equipment through Egypt for the defence of Saudi Arabia. This privilege, he added, is not limited to Saudi Arabia, but applies to all Islamic countries as far as Indonesia. Al-Sadat regretted current happenings on the Arab scene. [Text] [OW020724 Beijing XINHUA in English 0706 GMT 2 Oct 80]

IRAN REJECTS UN CALL--Beijing, October 2 (XINHUA)--Iran yesterday rejected a UN Security Council resolution calling upon Iran and Iraq to refrain immediately from any further use of force and to settle their dispute by peaceful means, according to reports reaching here. In a letter to UN Secretary-General Kurt Waldheim, Iranian President Abolhasan Bani-sadr said that "while the Iraqi war of aggression against the Islamic Republic of Iran is continuing, the proposals suggested in your letter and contained in the Security Council resolution cannot be considered by our government." Iraq had previously accepted that proposal, on condition Iran did the same. [Text] [OW020742 Beijing XINHUA in English 0730 GMT 2 Oct 80]

IRAN-IRAQ CONFLICT CONTINUES--Baghdad, October 1 (XINHUA)--Iranian air forces bombed military targets, economic installations and civil buildings in Kirkuk, Aqra, Sulaimaniya, Kut, Basrah and Ummqasr of Iraq today, according to Radio Baghdad quoting a war communique released by the high command of the armed forces of Iraq. During the bombing, two Iranian planes were shot down and 12 Iraqis were killed and four others wounded. The communique said that the Iraqi air forces today bombed an Iranian oil tank in Ahvaz and a nearby railway station as well as the Dezful railway station and the mechanized and armoured forces in Abadan of Iran. According to Radio Baghdad today, the Iraqi military command said in another communique that Iraqi forces attacked Iranian troops on the central front, demolishing an Iranian machinegun post and a mortar position. [Text] [OW021235 Beijing XINHUA in English 1225 GMT 2 Oct 80]

IRAN CAPTURES BORDER TOWN--Tehran, October 2 (XINHUA)--Iranian troops yesterday recaptured Mehran, a border town in Ilam Province, reported the Iranian newspaper ISLAMIC REPUBLIC today. The report said that 10 Iraqi tanks were destroyed in the region and artillery duel was continuing. On the west frontier, Iranian troops succeeded in forcing the Iraqi troops to retreat. On southern frontier, Iraqi troops intensified their attack upon Khoramshahr yesterday and once came close to the railway station and the office of Khoramshahr port. Faced with fierce resistance, they drew back several kilometres and lost 23 tanks. Iraq bombarded a residential area of Abadan yesterday, the newspaper said. [Text] [OW021220 Beijing XINHUA in English 1212 GMT 2 Oct 80]

FRANCE APPEALS FOR CEASE-FIRE--Paris, October 1 (XINHUA)--The French cabinet today demanded that Iraq and Iran respond to the appeal of the UN Security Council and bring an end to their conflict. A cabinet communique stresses "the keen preoccupation of France in the face of the extension of the destructions that have been carried out as well as the prolongation of a conflict which shakes the equilibrium of the region." The communique also emphasizes "the vital importance for the world economy of the maintaining of free navigation in the Gulf and the Hormuz Strait." "In his talks with Ziaul Haq, president of Pakistan, the president of the republic (France) has assured him of France's support for the action of peace taken within the framework of the Islamic Conference," the communique says. [Text] [OW020833 Beijing XINHUA in English 0823 GMT 2 Oct 80]

STRAIT OF HORMUZ SHIPPING--Beijing, October 2 (XINHUA)--The Iranian Government yesterday pledged to spare no effort to keep the Straits of Hormuz open to shipping to and from the Gulf, according to reports reaching here. A statement from the office of Prime Minister Mohammad 'Ali Raja'i said, "despite our current relationship with the hostile government or governments of the area...Iran guarantees to do its share to keep this waterway open." The statement charged that several governments were "considering interference in the Gulf" under the pretext of concern over the possible closure of the straits. [Text][OW021524 Beijing XINHUA in English 1510 GMT 2 Oct 80]

IRAN-IRAQ CONFLICT CONTINUES--Beijing, October 3 (XINHUA)--Speaker Hashemi Rafsanjani told Iranian parliament yesterday that Iranian armed forces had launched an all-out offensive against Iraq. General mobilization was ordered in the southwestern oil province of Khuzistan, according to reports from Tehran. President Abolhasan Bani-sadr said in a message to his armed forces that the Iranians had chased the Iraqis out of the border city of Susangerd and forced them to retreat towards the Iran-Iraq border. A spokesman of Iranian joint staff said yesterday that Iranian aircraft had bombarded Iraqi cities with thousands of leaflets in which Ayatollah Khomeyni urges the Iraqi people to rise against their leader. It was reported that Iraqi and Iranian troops were locked in a savage hand-to-hand combat yesterday for control of the oil port of Khoramshahr. Iran claimed it dispatched paratroopers behind a wave of jet attacks to rescue Khoramshahr yesterday. Meanwhile, Iraqi high command said in a communique that "our heroic armed forces have achieved their main targets and their major operations will be dedicated now to preserving these targets." [Text] [OW030728 Beijing XINHUA in English 0718 GMT 3 Oct 80]

SADAT ON IRAN-IRAQ CONFLICT--Cairo, October 2 (XINHUA)--Egyptian President Anwar al-Sadat has warned of the great danger of the present Iraq-Iran war which, he noted, has lots of dimensinns that may be very dangerous not only for the area but also for world peace. If the Hormuz Straits are closed, he added, it will affect the Arab world, the oil producers, Western Europe, America and the balance of power in the whole world. Al-Sadat said these in an interview with the correspondent of the U.S. CNN Television. He pointed out that whatever happens to the Iraq-Iran conflict, the only gainer will be the Soviet Union, because it means more chaos in the area. He went on to say that the U.S. should be vigil and not allow the Soviet Union to gain without losing anything at all. On the Middle East peace negotiations, al-Sadat said he did not give up hope and would remain optimistic. "We have to sit together and discuss difficulties with the U.S. and no party has the right to impose his thoughts on the other," he added. He stressed: "Egypt asserted again that Jerusalem is part of the West Bank of the Jordan River." [Text] [OW030136 Beijing XINHUA in English 0111 GMT 3 Oct 80]

HONG KONG JOURNAL ON NEW CHALLENGES FACED BY ZHAO ZIYANG

HK301030 Hong Kong KUANG CHIAO CHING No 96 16 Sep 80 pp 8-12

[Article by Lin Wei--"Zhao Ziyang Faces New Challenges"]

[Excerpts] Hua Guofeng was relieved from office on 7 September and Zhao Ziyang took up the premiership of the State Council. Zhao Ziyang began to work as a vice-premier in April, and the 5 months he spent in that capcity were in fact his training period to become the premier of the State Council.

Why Has Zhao Ziyang Been Substituted for Hua Guofeng?

Zhao Ziyang worked in Guangdong for quite some time. However, it seems that people in Guangdong are not interested in talking about his policy achievements in their province. What made him so famous in Sichuan then? What are the real reasons? It is hard to find a satisfactory answer.

Why has Zhao Ziyang been substituted for Hua Guofeng?

According to the NPC,Hua's stepping down enables him to concentrate on party affairs and accomplishes the policy of separating the party from the government.

To separate party affairs from government affairs is surely the current policy of the PRC, and it might be a good idea for Hua Guofeng to concentrate on party affairs.

As for the talk that the power of Hua Guofeng is being curtailed, that does not seem to be a big factor. In fact, while Hua Guofeng held the position of premier, power was actually in the hands of Deng Xiaoping. To resign from the position is not a great loss for him.

Is It True that Zhao Ziyang Is Deng Xiaoping's Protege?

Some say that Zhao Ziyang has been promoted because he is Deng Xiaoping's protege, but facts show that this is not true. Looking at his personal record, before Zhao Ziyang was transferred to the State Council, he had never worked under Deng Xiaoping.

The real reason for Zhao Ziyang taking the post of premier is that he has made contributions to the reform of China's economic system. Experts abroad and at home have held that the existing economic system poses the greatest obstacles to accomplishing modernization in China. How are we to remove these obstacles? If errors should occur in reforming the economic system which has been used for a long time, it would be very difficult to cope with the chaotic situation that might ensue. Therefore, selection of the right person to take charge of the reform is of key importance. The man selected must not only be bold and resolute but must also have the courage to challenge the traditional values. He must have a cool mind and practical experience.

Expand "Self-Management Power of Enterprises"

Expanding the self-management power of enterprises is the main aspect of Sichuan's economic reform, which has been the main factor leading to Zhao Ziyang's present position.

The Courageous and Learned Zhao Ziyang

Although expanding the self-management power of enterprises is not Zhao Ziyang's invention, someone is needed to put the theory into practice. Moreover, to carry out such a policy in a country which has been seriously influenced by ultraleftist ideology for many decades requires great courage.

We must note that it was in October 1978 that Zhao Ziyang practiced expanding the self-management power of enterprises. At that time, the 3d Plenary Session of the 11th Party Central Committee had not yet been held, the "whatever faction" was struggling desperately, and the decision to reform the economic system had not yet been made. Zhao Ziyang was resolute in carrying out the reform of five selected enterprises including the Chongqing Iron and Steel Plant, Ningjiang Machine Tool Plant, Sichuan Chemical Plant and Xindu County Nitrogenous Fertilizer Plant when the situation was still not clear. Such an act can be considered as pioneering; it also shows how courageous he is.

A Severe Struggle in the Chongqing Iron and Steel Plant

In fact, it was not smooth sailing for Zhao Ziyang to carry out economic reform in Sichuan, because the reforms met with considerable resistance.

The writer has learned about a real event in Sichuan which has not yet been reported in Chinese papers. The Chongqing Iron and Steel Plant was the first in Sichuan to expand its self-management power. The event took place in this plant.

In the autumn of 1978, when all provincial leaders were preoccupied with the so-called reform of production relationships to raise the enthusiasm of the workers, Zhao Ziyang showed his foresight by pointing out: "What should we rely on to promote production? Last year we exposed, criticized and investigated; this year, we are implementing the policy set for us; but next year, we must expand the power (author's note: the self-management power of enterprises). Since enthusiasm has its limits, we must improve the equipment and change the conditions of production in enterprises. We cannot import modernization from abroad; instead, we have to rely on our present enterprises. However, at present, everything is centralized under the state and the enterprise system is too rigid. We must give the enterprises more self-management power so as to enliven the economy. Once the enterprises have their own money, then everything will be easy."

Once the Chongqing Iron and Steel Plant practiced expanding its self-management power, it sold its own steel. In the past, it only sold the steel to the state. However, once it started selling its own steel, pressure was brought to bear on it. The municipal supply bureau wrote a letter accusing it of not selling steel through the state and thus upsetting the state plan. A report was submitted to the provincial authorities. After Du Xingyuan, the secretary of the provincial CCP committee in charge of industry, listened to Li Fengqing, manager of the Chongqing Iron and Steel Plant, he said with a smile: "What you have done is correct. I have already read the report of the supply bureau. It is unreasonable. Some comrades are used to the old ways and handle affairs with old methods. Now we must do something to correct them." The next day, Du Xingyuan and Meng Dongbo, a vice governor, summoned people from the provincial economic committee, the provincial planning committee, the supply bureau and the Chongqing Iron and Steel Plant to a meeting to convince the supply bureau to withdraw its report.

However, this does not mean that there was no other pressure. At a national order placement meeting organized by the Ministry of the Metallurgical Industry, one important person from that ministry said to the delegates of the Chongqing Iron and Steel Plant: "You should not sell your own steel. If the state does not purchase it, you can either stop producing it or produce something else. The state will be responsible for the loss."

Such bureaucratic practice enraged everyone in Chongqing Iron and Steel Plant. On the one hand, Wang Yuguang, the deputy manager and concurrently general engineer, telephoned his people who were making deals in various places to carry on as usual; on the other hand, he personally went to Beijing to negotiate. Later on, the ban was lifted. The Chongqing Iron and Steel Plant not only sold out its entire stock of goods but also presold next year's output of steel plates, to the envy of many iron and steel plants.

But one problem followed another. A document from Beijing lodged a complaint against them. Li Fengqing made a report to the provincial CCP committee. After Zhao Ziyang listened to him, he said delightedly: "Self-management power has saved the Chongqing Iron and Steel Plant. It has done a good job. In the past, Chongqing Iron and Steel Plant was the notorious No 1 headache unit. Before the smashing of the gang of four, it had a deficit of 100 million yuan, but within the last 3 years, it has made up for this loss. In particular this year, it has made the greatest contribution to the state.

It is estimated that it will hand over to the state more than 90 million yuan in tax and profits, and still retain 5 to 6 million yuan. If we do not promote expanding self-management power or marketing by ourselves, can we get such good results? The current economic reform is basically very limited in scale. The new enthusiasm and productivity generated after the initial reform will certainly conflict with some irrational rules, old habits and forces. We must take an active attitude in analyzing the new situation and solving the new problems. The reform must be carried on and we must not turn back."

Not long after Zhao Ziyang had given this speech, another document came from the higher levels. This time, not only was the organ that issued the document more powerful, but the document was couched in harsh terms: "All steel contracts will be invalidated if the abovementioned stipulations are violated. If the stipulations are not carried out, enterprises and the relevant departments will have to shoulder the responsibility and face severe punishment."

After Zhao Ziyang learned about it, he specially sent someone to the Chongqing Iron and Steel Plant to pass on his message: "The expansion of self-management power was approved by the party Politburo and the State Council. Only the central authorities have the right to correct any mistakes that may arise, and no other department has the right to interfere."

Model for Economic Reforms in all Localities

Later on, Hua Guofeng also took a stand in Beijing. On New Year's Day, 1980, in his speech on a visit to the Beijing garrison command, he mentioned Chongqing Iron and Steel Plant: "It is impracticable for the state to control and plan everything.... In the future, we should have stipulations such as: After the factories have fulfilled the state quotas, the surplus products can be sold on the market. For example, the 90,000-ton "medium-sized plates" produced by the Chongqing Iron and Steel Plant were originally in great demand. However, once they had been manufactured, nobody wanted them. Finally they were sold after the plant tried its utmost to find customers wherever it could. If they had not been successful, the factory would have had to close down.... It is impossible for the state to take such detailed considerations into account. The state can only indicate the direction, and we must readjust through the market mechanism.

Since the Chongqing Iron and Steel Plant took the lead, other iron and steel plants have also applied for permission to expand self-management power and market their own products.

Practice the "System of Responsibility Tied To Output"

Expanding self-management power of enterprises is only one aspect of Zhao Ziyang's experiments in economic reform. There are two other important ones: Practice the "system of responsibility tied to output" in agriculture and expand the private plots, and set up joint enterprises of agriculture, industry and commerce.

Sichuan was the first to restore "private plots" in name and in practice. In the past, there were "private plots" in China's rural areas. However, peasants had no freedom regarding what to grow because everything was arranged by the communes and the production teams. Peasants in Sichuan are now free to choose what to grow on their private plots. According to the stipulations of the provincial CCP committee, private plots can account for up to 15 percent of the arable land in the province. Sichuan peasants are encouraged to breed as many pigs as they can. The free market in Sichuan is the most active in the whole country. All visitors to Sichuan agree with this. In Beijing, free markets are located in suburban areas and their scale is rather small. But in Chengdu, they are located in the city center and there are many varieties of products on sale. Sichuan peasants are allowed to run their private business during the slack farm seasons. Many get part-time jobs in factories. We should also pay attention to the fact that Sichuan was the first province to practice fixing output quotas at household level in remote areas. The fact that Zhao Ziyang dared to advocate "fixing output quotas at household level" 2 years before Liu Shaoqi was rehabilitated again shows his daring and courage. The reason why Sichuan agriculture has turned around so fast is that it has practiced the agricultural policy which is subsequently being popularized throughout the country.

Agricultural-industrial-commercial joint ventures constitute another bold practice of reform in the Sichuan economic system. These joint ventures are a means to accomplish harmonious cooperation between production and marketing. The rural areas provide raw materials, land or capital, the factories are responsible for production and the commercial sector for marketing. However, all of them are subject to unified quotas and planning. Agricultural-industrial-commercial joint ventures are the first integrated economic bodies in China. The first such joint venture in Sichuan was established in March 1979 and called the "Changjiang Agricultural-Industrial-Commercial Joint Company." The company is a combination of 26 small-scale state agriculture and livestock farms and fisheries with a staff of 9,000. The company produces and processes milk, fruit, fresh water fish and tea leaves. Since its establishment, the company has promoted various lines of production and turned losses into profits. In 1979, the company made a profit of 1.7 million yuan, the income of workers was raised and everybody got an annual bonus of 200 yuan. Certainly, lazy workers were fined. The staff and workers must change their attitude of "paid peasants" and work very hard because their income is closely related to their productivity.

The experience of agricultural-industrial-commercial joint ventures was later popularized throughout the country. Such a practice smashed the past blindness in production and divorcement of production from marketing.

Two Incident Reveals Zhao Ziyang's Sober Mind

In the reforms of the Sichuan economic system, people notice the bold and resolute work style of Zhao Ziyang and his courage in challenging old habits.

The following two incidents best describe the coolheaded Zhao Ziyang. Zhao Ziyang practiced new agricultural techniques in Sichuan, producing only two crops a year. In the past, China tried every way of increasing the number of crops to increase agricultural output. However, Zhao Ziyang had taken into consideration the mountainous characteristics of Sichuan. He deliberately acted contrary to the old practice. He suggested growing two crops a year. He said: "3 times 3 equals 9, but 2 times 5 equals 10." This means if there are 3 crops a year, and the output of one crop is 3, then the gross output equals 9; however, if we use more time to practice meticulous cultivation, then, the output of one crop will be 5 and the gross annual output will equal 10. Another example is that in 1978, the national economic plan called for accomplishing the mechanization of agriculture as its target. Zhao Ziyang acted contrary to such a target at the beginning of 1979. He thought that it was impractical to implement the wholesale mechanization of agriculture taking into account the current technology and labor force in China. Zhao's viewpoint was later endorsed by the agricultural commission, which announced that the 1978 plan would be revised. From the above two incidents, we can see that Zhao Ziyang does not follow blindly, and that he possesses a cool mind and has independent thoughts. After analyzing the work style of Zhao Ziyang in carrying out policies, we can see his talent in reforming the economic system. China is currently devoted to the four modernizations. It is true that each age produces its own hero: an expert in reforming economic systems is in charge of the affairs of the State Council. At present, the economy in China demands that Zhao Ziyang be put in the important position of premier. However, we should also note that the work of reforming the economic system throughout China is a complicated task and the situation varies from one locality to another.

At the same time, the duty of the premier is not merely to reform the economic system but also to find ways of realizing the 1 percent growth rate of population, to find jobs for the 20 million unemployed, to reform the education structure and to guarantee the completion of 400 major scientific research projects. All these will test the premier.

Lack of Diplomatic Experience?

It is undeniable that Zhao Ziyang is head and shoulders above Zhou Enlai, Hua Guofeng or even Deng Xiaoping regarding economics. However, with regard to diplomatic work, he is not as good as Zhou Enlai, Deng Xiaoping or even Hua Guofeng. And diplomacy is an indispensable duty of the premier of the State Council. How Zhao Ziyang manages diplomacy is the concern of the people.

Improve the Living Standard of the People: Zhao Faces a New Challenge

Before Hua Guofeng stepped down from office, he eliminated some obstacles for Zhao Ziyang. The dismissal of the petroleum minister, Song Zhenming, was proposed by Hua Guofeng. Thus, some of the bureaucratic airs were dampened in the National People's Congress before Zhao assumed office. This has facilitated Zhao Ziyang's work.

HONG KONG PAPER ON TRIAL OF LIN BIAO, JIANG QING CLIQUES

HK010938 Hong Kong HSIN WAN PAO in Chinese 29 Sep 80 p 1

[Unattributed "New Talk" column: "Try Only Their Crimes and not Their Mistakes"]

[Excerpts] The trial of the Lin Biao and Jiang Qing cliques is considered a landmark denoting a new era in China, which puts a full stop to extreme "leftism."

Extreme "leftism" is a mistake in the line. However, implementation of ultraleftism, which nearly ruined the country and the people and left heavy blood debts, is a crime--an inexcuseable and great crime. As the supreme people's procuratorate prepares to try the 10 chief criminals of the Lin Biao and Jiang Qing cliques, it has made a special announcement to the effect that only the criminal offenses will be prosecuted, not mistakes in work and the line. Mistakes are not necessarily crimes, though mistakes sometimes do lead to crimes. If all mistakes in work and the line are to be dealt with according to law, too much will be involved. The blow will be too heavy and it will create big upheavals throughout the country. Thus, we should not treat all mistakes in work and the line as crimes. The announcement is to pacify the people and let them know that those who merely make mistakes will not be prosecuted.

However, it is different with the Lin Biao and Jiang Qing cliques, for their mistakes are not merely in work or the line; they carried out a conspiracy. They brought about 10 years of calamity to the country and the nation. Such crimes are inexcusable.

If they are not tried or sentenced severely, according to law, the anger of the people will not be pacified and others cannot be warned against following their example. Although it is the task of the procuratorate to try them, taking into account the magnitude of their crimes, people cannot help but think: their crimes would not be expiated even if they are put to death ten thousand times. At least this is true of the 10 chief criminals.

The CCP Central Committee might have considered leniency after investigating the facts, but they should be even more mindful of the crimes of the Lin Biao and Jiang Qing cliques and the feelings of the people throughout the country.

It is all right not to prosecute the dead, but their crimes must be made known.

Among the dead, besides Lin Biao, there are his wife, Ye Qun, and his son Lin Liguo. Apart from the Lin and Jiang cliques, there is Kang Sheng and Xie Fuzhi. Are Kang and Xie part of one of the two cliques, or do they fall in between the two cliques? People have heard a lot about their crimes. Though they are not to be prosecuted, their crimes must be made known to the public so that they can be accounted for to the country and to history.

Their crimes should be listed in the documents of the 12th NPC in summing up the Cultural Revolution and evaluating Chairman Mao Zedong. It is not enough to try the Lin Biao and Jiang Qing cliques, we must also give an honest evaluation of the Cultural Revolution and the achievements and mistakes of Chairman Mao Zedong. Only then can we thoroughly abandon extreme "leftism" and march at a steady pace on the correct path. We should not cover up evils done by the wicked or the respected.

'HSIN WAN PAO' TO PUBLISH 'UNOFFICIAL HISTORY OF JIANG QING'

HK020533 Hong Kong HSIN WAN PAO in Chinese 1 Oct 80 p 1

[Text] The trial of the Lin Biao-Jiang Qing clique will take place soon. Jiang Qing is the major culprit of this group of 10 since Lin Biao is already dead. Crowning herself the "empress," Jiang Qing brought great calamity to China. Everybody knows what she has done and is furious with her. However, people may not know about her actual behavior. In light of this, we have decided to publish the "Unofficial History of Jiang Qing" in long series of articles beginning on 6 October in order to inform people about Jiang Qing.

The writer of this series is Madam Zhu Shan [3796 3790] who is a well-known personage in Beijing. She was with Jiang Qing for many years and is familiar with her family background, life, character and behavior. Madam Zhu Shan has used hundreds of thousands of words to unprecedentedly tell how Jiang Qing enjoyed her luxurious life and how she stirred up trouble, bore grudges and manipulated power for personal ends in the past decades. The writing is so vivid that people can see how things developed from their small beginnings; it reads like a secret history of the "imperial court." The book is written according to facts without any exaggeration. We can take it either as a fiction or an unofficial history. This is an extraordinary work and people should not miss it.

We made an advance announcement in the spring that the series would be published soon and this has aroused the attention of a great number of readers. However, the date of publication had to be delayed because we had to wait for the trial of Jiang Qing. Now, the time has come for the series to be published. And we regard this series as one of the highlights marking the 30th anniversary of the publication of this paper.

Here are some of the features to be included in this series: How did Jiang Qing give herself to a young master (this young master was also a "well-known personage")? How was Jiang Qing able to sneak her way into Yanan and seduce Chairman Mao Zedong? How did Jiang qing claim to be a "widow" and that she and Chairman Mao Zedong were just a "political couple"? How did Jiang Qing make her own daughter Li Na mad? How did Jiang Qing torture her attendants and so on.

This series is copyrighted. The reprinting and translation of it is strictly forbidden without permission.

'WEN WEI PO' ADVOCATES FREEDOM OF PRESS IN PRC

HK261019 Hong Kong WEN WEI PO in Chinese 25 Sep 80 p 2

[Editorial: "Put an End To 'Seeking Undeserved Reputation While Causing Actual Harm' Through Legislation"]

[Excerpts] When Premier Zhao Ziyang received journalists from Hong Kong, his comment on news reporting in the past was: "Seeking undeserved reputation while causing actual harm."

We think this comment precisely sums up news reporting in the past 2 decades.

Following the popular discussion on democracy and the legal system in recent years, the press has begun to play a more active role and dares to reflect and report the objective truth as it really is. However, it is still unable to break through the "forbidden areas" and completely change its habit of "hemming and hawing." The speeches and inquiries put forward by the deputies at the current NPC and CPPCC sessions were a step toward remedying this state of affairs. The deputies not only realistically assessed their achievements but pointed out the shortcomings and mistakes. The language they used was pungent and sharp, unlike their obsequious and perfunctory style in the past. The press truthfully published their speeches and inquiries and honestly reported the grave accidents caused by bureaucratism. These things are new to the people at home and abroad.

On this occasion, Premier Zhao frankly told journalists from Hong Kong that he hoped the press would report things truthfully, stop "hemming and hawing" and never repeat the mistake of "seeking undeserved reputation while causing actual harm." The new government's new style of renovation is a great inspiration to the press circles of the whole country and of Hong Kong and Macau.

However, after taking a dispassionate look at the present state of the press, we feel that the grave existence of bureaucratism in some places and departments still remains a formidable obstacle to truthful reporting because these officials have power in their hands and can flagrantly interfere. Reporters' rights and freedom of the press still lack legal guarantees. Therefore, we think that the press circles must subjectively surmount all difficulties, courageously fight for democracy and freedom of speech, fulfill their obligations and exercise their constitutional rights. Meanwhile, mapping out the press law has become an urgent matter. With this law, truthful reporting is protected, the press can play its role in supervising the government and those journalists who are responsible for their words can dispense with the fear of being falsely charged. In this way, socialist democracy can be truly carried forward. This is fully to the advantage of the four modernizations and can put an end to the corrupt practice of "seeking undeserved reputation while causing actual harm" once and for all.

We hope that the NPC Standing Committee will comply with the development of things, exercise its power and draw up the press law as quickly as possible.

PARTY AND STATE

HONG KONG MAGAZINE REPORTER COMMENTS ON NPC SESSION

HK261239 Hong Kong TUNGHSIANG in Chinese No 24,16 Sep 80 pp 4-6

[Article by contributing reporter Shih Tien-hui: "A Milestone in the Modernization of the Chinese Political System--On Covering the National People's Congress Session in the Great Hall of the People"]

[Excerpts] After more than 20 years, for the first time, foreign diplomats and Chinese and foreign reporters were allowed to cover the NPC.

Atmosphere of Freedom

The NPC session was scheduled to begin at 1530 on 30 August. Hurried Chinese and foreign correspondents had been waiting outside the door of the visitor's gallery for a long time. On that day, there were more than 300 Chinese and foreign reporters (including those from XINHUA and CHINA NEWS SERVICE) and foreign diplomats.

Thoughts on the National Emblem

As my mind wandered, the NPC deputies and members of the Presidium had entered the session hall simultaneously. With the help of young attendants, Ye Jianying, Soong Ching-ling and Nie Rongzhen walked with great difficulty. Li Xiannian walked in steady paces and did not show any sign of old age. Hua Guofeng, Hu Yaobang and Zhao Ziyang, all in the prime of life, seemed free and easy and glowing with health and vigor. The general secretary of the session, Peng Zhen and his assistant Peng Chong were talking as they walked in. They were pointing at the press gallery and seemed like saying: Good! Let them come and see.

Presence of Chen Yonggui Raised Eyebrows

"Hey!" A foreign correspondent sitting next to this reporter suddenly pointed at the seats for vice premiers at the rostrum and shouted in surprise: "Chen Yonggui! Cheng Yonggui!" A minor commotion in the press gallery resulted. Looking toward the direction he pointed, Chen Yonggui in his usual peasant-style jacket was indeed seated there, reading documents. Chen Yonggui was still a member of the NPC and was seated on the rostrum. That was indeed a surprise. Since the exposure of the project of "conveying water from the West to the East" in Shanxi, the misrepresentation of grain production figures in Xiyang County and the miscarriages of justice, Chen Yonggui has been under attack in the newspapers under the special code name "the former principal responsible person in Xiyang County." According to previous practice, he should have disappeared into thin air.

The first item on the program after the opening of the NPC was the opening remarks by Ye Jianying delivered in a mixture of one-third Hakka, one-third Mandarin and one-third Cantonese. Immediately following were Yao Yilin's and Wang Bingqian's reports on the national economic plan and the state final accounts and budget.

Looking at the two reports, one could say that they were indicative of the spirit of the new economy policy being implemented by Beijing. In terms of policy, they reported both good news and bad news. In terms of principle, they advocated doing things in accordance with actual capability and developing the economy proportionally and steadily in a planned manner. In terms of concrete measures, they expressed the resolution to further reform the ossified Soviet-style planned economy, decentralize power, expand the decisionmaking power of enterprises, utilize the regulatory function of the market mechanism, protect competition and give impetus to development. Initial reactions showed that the two reports were very well-received.

The Inside Story About the Deficit

In the report given by Finance Minister Wang Bingqian, it was revealed for the first time that last year, China incurred a deficit amounting to 17 billion yuan. The report also pointed out that this deficit can only be gradually eliminated in the next 2 years. This problem entails popular concern.

There is an inside story about this deficit problem. It was alleged that the party Central Committee and the State Council held several rounds of discussions on the question of whether the financial deficit should be reported. Some people held that it should not be reported because this would have a bad influence and create anxiety. Thus, there would be only two choices of what to do: Fabricate statistics and like what was done last year, claim that "income and expenditure were balanced and a little surplus was realized" and cover up the real situation; or avoid revealing the figure of income and expenditure. Either one would be essentially deceptive. Then, the so-called supervision by the people would only be "empty words." For this reason, during the meetings, Zhao Ziyang, Wan Li and others forcefully argued in favor of frankly telling the NPC deputies everything and hiding nothing from them, because the reasons for the deficit were tenable--procurement prices of agricultural and sideline products were raised; income of peasants has been increased; wages of staff and workers have been increased; bonuses were given to workers and the standard of living of the people has indeed improved. They believe that the leaders must have confidence that the people will understand the difficulties of the state. Furthermore, only thus can they really place themselves under the supervision of the NPC deputies.

This short episode demonstrates that the "new economic faction" in Beijing is very strict in self-discipline and conscientious about observing state laws. It also shows that the move to change the NPC's status from a "rubber stamp" and actually realize its authority as the supreme organ of state power is still meeting a lot of opposition. Some vice premiers and ministers who are used to personal authority still feel nervous and uneasy about things like democratic consultation and submitting to the people's supervision.

A New Breakthrough--Queries

During the small group discussions held during the NPC, several surprises occurred. The fourth group of the Beijing delegation which had members who are experts in metallurgy and scientists made the first move. During the panel discussion on 1 September, they demanded that queries be addressed to the minister of metallurgical industry, Tang Ke on the question of money being wasted at the Baoshan Iron and Steel Plant. This demand was transmitted to the NPC secretariat and Deputy General Secretary Peng Chong pointed out that this is a legitimate right stipulated in the constitution to the NPC deputies. Ministers must make themselves available whenever summoned. Peng Chong agreed to the demand right away and the next day, arrangements were made for Tang Ke to appear and answer queries. When the summons was transmitted to the Ministry of Metallurgical Industry, the minister and deputy ministers were caught unprepared. They had to ask for postponement until the afternoon of 4 September. They then prepared relevant material in haste and got ready for the confrontation.

This was the first time in the 30 years since the CCP assumed power that a minister has been questioned by NPC deputies. This should be considered a significant breakthrough toward the full exercise of the power of supervision and a great beginning in the transition from rule of man to rule of law. After the Ministry of Metallurgical Industry, other organs of the government, including the Ministry of Foreign Trade, the Ministry of Chemical Industry and the State Bureau of Supplies, were also summoned to answer queries. If this form of examining officials is used from now on, not only in the NPC but also in people's congresses at the provincial, county and other levels, it would indeed be an effective method of supervising officials at all levels.

The climax of this NPC session was, of course, the speech by Hua Guofeng. On behalf of the CCP Central Committee, he suggested the following to the NPC: that he no longer concurrently hold the position of premier and recommended Zhao Ziyang for that position; that the aged vice premiers Deng Xiaoping, Chen Yun, Li Xiannian, Xu Xiangqian and Wang Zhen resign their positions in the government; that Wang Renzhong give up his position in the government and the resignation of Chen Yonggui. These measures realized the principle of separation of party and government, prevents the overconcentration of power and solved the problem of the aging of the highest leadership. This will be beneficial to maintaining the continuity and stability of the present domestic and foreign policy of China, improving administrative efficiency and the building of modernization.

Marshal Ye's Retention of His Post Drew Comments

Actually, the spirit of Hua Guofeng's speech has been repeatedly publicized and stressed by the CCP newspapers and publications recently. However, coming from the mouth of the CCP chairman, it is not quite the same thing. The only perplexing thing is Ye Jianying's retaining the post of chairman of the Standing Committee of the NPC at the age of 82. It is not known whether this decision was unanimously made by the CCP Political Bureau which wants him to continue to shoulder this great burden or whether a suitable replacement could not be selected for the time being. Or could it be that the venerable Marshal Ye has decided to "make more contributions to the revolution" and persist in fighting until his last breath?

In any case, this seems very incompatible with the resignation of five vice chairmen of the NPC Standing Committee and Deng Xiaoping, Li Xiannian, Chen Yun and others from government posts and seems ironical in the light of the recent wide publicity on abolishing the system of lifetime tenure and solving the problem of the aging leadership.

However, generally speaking, the democratic atmosphere within the recent NPC was much stronger than previous ones. The deputies spoke without restraint and the boldness of their words were comparable to the views expressed in 1957, on the eve of the anti-rightist campaign. Fortunately, the times have changed. The CCP has learned painful lessons from the past experiences of stifling freedom of expression and refusing to heed constructive criticism. It has decided to allow free expression of opinion and welcome criticism and refrain from "setting traps." Otherwise, many deputies might now have been attacked as "rightists."

Doubts on "Unanimous Support"

One very commendable thing is that in line with the democratic atmosphere within the NPC session hall, starting from 5 September RENMIN RIBAO devoted a full page to printing excerpts of the speeches of NPC deputies in panel discussions. This enabled the people to read about the views expressed by the people's deputies. This method is beneficial for the people's deputies' supervision of the government officials at various levels and the people's supervision of the people's deputies. This decision by editor in chief Hu Jiwei is indeed admirable.

However, in an editor's note in RENMIN RIBAO the opening sentence said that "people's deputies from all over the motherland discussed the opening remarks of Comrade Ye Jianying and the two State Council reports delivered by comrades Yao Yilin and Wang Bingqian during the panel discussions. They expressed their unanimous support...." Here, it seems that use of the words "unanimous support" is questionable. First, the reports of Yao Yilin and Wang Bingqian were submitted to the NPC for review. To talk about "unanimous support" even before the discussions ended seemed illogical. Second, the people's deputies are masters of the country. The reports were presented by officials who are the people's public servants. To use the word "support" to describe the masters' attitude toward the reports of the public servants seemed like placing the position of master and servant upside down.

Although this is only a minor thing, it shows that the establishment of a real democratic system in China is far from easy. People are used to the old way. When they have to switch suddenly, it is unavoidable that they continue old customs and practices.

Some of the rules laid down by the Presidium of the current NPC are not also very acceptable. For example, one rule says that a motion has to be seconded by at least three deputies before it can be accepted. But in reality, a motion presented by a deputy does not only represent the opinion of one individual but also that segment of society he represents. The people's deputy speaks for the people. Motions are a good way to reflect the people's views. This rule undoubtedly puts up obstacles to the expression of popular opinion. It must be revised or abolished.

System of Cabinet Responsibility

Summing up the more than 10 days of meetings, this session can be considered an occasion where the power of the NPC has been restored. From indications, it seems that the Chinese political system might develop into one similar to the Western system of cabinet responsibility. The party will take charge of formulating the line, principles and policies; the NPC will be responsible for legislation and supervising the work of the government, while routine administration will be handled by the State Council. Therefore, looking at it from the angle of democratization and modernization of the state system, this NPC is also an important turning point.

In this meeting, the power of the PRC has been peacefully and smoothly transferred from the first generation to the second generation. In this respect, it is an unprecedented achievement not only in China but also in the international communist movement.

This great success in reforming the Chinese political system is the result of the basic victory of the realistic moderates in the CCP after more than 20 years of tireless battle with the leftist radicals. And during the final stage, it was Deng Xiaoping, the revolutionary, who made use of his prestige and power to hasten the coming of this epochmaking milestone. History will record this glorious episode.

'BA YI RADIO' BLAMES PRC LEADERS FOR CHINA'S ECONOMIC FAILURE

OW020427 (Clandestine) Ba Yi Radio in Mandarin to China 1400 GMT 1 Oct 80

[Summary from poor reception] "Time flies like an arrow, and the sun and moon move back and forth like a shuttle. Some 31 years have passed since the founding of new China. This is only a very short period when we view it from the historical point of view. However, during these 31 years, the people in China have suffered tremendously. Such suffering is unprecedented in the history of China and the world. Just as many NPC deputies mentioned at the Third Session of the Fifth NPC, countries like China and even countries more backward than it have made rapid progress. But we spent 20 some years in waging struggles and killing each other and in vying with each other for power."

After Mao Zedong died and the gang of four was smashed, our party, at the request of the broad masses of party members and the people throughout the country, preliminarily changed a number of irrational systems and developed to some extent our economic and cultural work. But we must still pay much greater attention to the future and interests of the people and the state.

In the past 31 years, the living standard of workers and cadres has gone down, while black market trade has become rampant. There are a great deal of speculative activities and illegal business transactions.

"Even more serious is the fact that some people advocate the import of machinery and equipment to 'help realize the four modernizations ahead of schedule' after they visit Japan and the United States once or twice. In the past few years many billions of yuan were squandered. Today equipment bought for several billion yuan either becomes a piece of 'real estate' or fails to function at all." The NPC deputies are entirely correct in accusing the party Central Committee and some leading comrades for spending so much moneyon the Baoshan steel complex.

It is regrettable that the leading comrades of the party Central Committee and the State Council have done a lot of foolish things in the past few years and wasted many billions of yuan. However they are not ashamed. They should openly conduct self-criticism before the whole party and the people in the whole country and bear in mind the future of the state and the suffering people in the country.

'WEN HUI BAO' READERS RESPOND TO INTELLECTUAL'S EMIGRATION TO U.S.

HK010513 Shanghai WEN HUI BAO in Chinese 14 Sep 80 p 1

[Letters to the editor: "It Is Certainly Necessary To Treasure Talented People and Sweep Aside Bureaucratism--Refrigeration Expert Chen Tingxiang's Emigration Provokes Heated Reaction From Readers"]

[Text] Editor's Note: Since 28 August when we published the news of the departure for the United States by refrigeration expert Chen Tinxiang because the policy concerning intellectuals was not being carried out and his skills were not being used, we have received heated reaction from our readers. In their letters many expressed their discontent with the bureaucratic workstyle of certain departments; they also exposed the phenomenon that some units ignore the party's policy concerning intellectuals. They demand that the relevant leadership departments attach importance to the role played by intellectuals in the four modernizations and be resolute in doing everything realistically.

We Cannot Tolerate Suppression and Waste of Talented People

Letter from Zheng Hongyi of Shanghai Bicycle Wholesale Department: After I read the article in your paper, I was very angry with the indifferent attitude some departments have shown to the party's policy concerning intellectuals and their bureaucratic workstyle of passing the buck. Talented people are urgently needed in developing science and technology in our country. As we know, a talented person cannot be trained in a short period of time. However, some cadres in change of personnel are driving talented people out of the country. The emigration of Chen Tingxiang, the refrigeration expert, is one such example. To avoid the recurrence of such things, I suggest: that a special group in the municipal department concerned be set up to investigate to what extent the party's policy concerning intellectuals has been carried out in all units in the municipality. Comrades whose special talents are not properly being used are welcome to report to the group. We must break away from rigid regulations, properly implement the policy concerning tapping the potentials of talented people, and instruct the special group to supervise all units in handling their affairs responsibly.

Letter from reader Zhou Xindong: At the same time as the report of the refrigeration expert Chen Tingxiang's emigration in WEN HUI BAO, there was a report on the return of a group of Overseas Chinese experts to participate in the four modernizations. In my opinion, those who returned certainly envisage a bright future for our socialist motherland. However Chen Tingxiang, who emigrated, was also a returned Overseas Chinese some years ago, and he left in anger after 30 years of waiting and disappointments. Today, if we are intoxicated with the reasons why Overseas Chinese return and ignore the reasons why people are leaving the country, how can we guarantee that those returning today will not leave sometime later? In this connection, many talented people are still suppressed by their local units. They are "working contentedly" because the systems of the organization prevent them from leaving. If one day we allow "talented people to move within the country," the events that occurred in the No 2 Commercial Bureau will be repeated in other units as well.

We Must End Inefficiency and Passing the Buck

Letter from reader Jie Pai: The news published in your paper under the headline "Talented People Seek Outlets Abroad" and the commentary entitled "Forsake Not the Talented People" have drawn people's attention to the chronic inefficiency of some organs. After more than 20 years, we still failed to arrange work for Chen Tingxiang. Even after the State Council and the municipal CCP committee issued a directive, the document kept travelling from one place to another for 8 to 9 months without anything being done about it. Thus, we can see how serious the problem is. Today, we must resolutely eliminate the malady, and change the malpractice of bureaucratism which exists in some departments. The people are constantly longing for a change from this abominable inefficiency and passing the buck.

Letter from a retired worker Ni Yinggeng: Units like the No 2 Commercial Bureau which indulge in red tape and procrastination are not uncommon, quite a number of cadres are tainted with such bad habits. This has worried people much. The government orders in these organs are not strictly carried out and the higher level departments are excessively accommodating to the lower level department's lack of organization and discipline. This is one of the reasons for the inefficiency. Since organs are part of the state machinery all workers of the state organs must strive for higher efficiency.

Hoping for the Immediate Implementation of the Policy Concerning Intellectuals

Letter from Chen Biwu of Shanghai 7 May Farm: After reading the report concerning Chen Tingxiang, I strongly sympathized with him. I graduated from the Chinese People's University, majoring in basic Marxism-Leninism in 1964. Originally I worked in the municipal academy of social science doing research work on the history of the Marxist-Leninist communist movement. During the Cultural Revolution, I was transferred to work on a farm. When the social science academy reopened after the smashing of the gang of four, I very much wanted to return to it. My request was supported by the CCP committee of the social science academy in its letter of reply to me. However, the department concerned did not allow me to go. I think that if judged by the law of value, my contributions to the party and the people in the research unit would certainly be greater than on the farm. Now, I am a middle aged man. When will I get a job which corresponds to my training?

Letter from Ye Shuhong of Shanghai Sport Shoe Factory: While Chen Tingxiang is an refrigeration expert, my speciality is water heating. I am 52 years old and have been a technician and engineer. During the 3-year period of grave natural disasters in our country, I was dismissed due to illness. Since then, I have become laborer to earn a living. Since 1968, I have been working in the sports shoe factory as a temporary worker. Although I am at present the deputy group leader of the capital construction office, the leading body at a higher level still refuses to employ me as a permanent worker, nor does it involve me in any technological surveys, reform of technical job titles or appraisals of workers.

Letters from Wu Xingshan of a certain PLA unit, Guo Shirong of Shangrao Municipal Construction Committee, Chen Yuan of Shanghai Aquatic Products Procurement Station and others: People usually refer to damage to property and human injury as accidents and deal seriously with the troublemakers and people responsible. Now is the time when we need more talented people for the four modernizations. However, the leaders concerned in the municipal No 2 Commercial Bureau, the foodstuff company and other units ignore the policy concerning intellectuals and the instructions from the higher levels. This has led to a brain drain and has had a bad political influence. Are these not serious accidents? The leading departments concerned should adopt practicable measures to prevent such things from happening again.

BRIEFS

PRC NATIONAL DAY RECEPTION--Hong Kong, 30 Sep (XINHUA)--The Hong Kong branch of the XINHUA NEWS AGENCY gave a reception at noon today to celebrate the 31st anniversary of the founding of the People's Republic of China. Among those invited to the reception were Hong Kong Governor Sir MacLehose and his wife, NPC and CPPCC deputies, certain provincial people's congress deputies and provincial CPPCC members residing in Hong Kong, personages of all circles in Hong Kong, diplomatic envoys and commercial attaches of various countries stationed in Hong Kong and foreign friends. Altogether, more than 1,300 people were invited. Wang Guo [3769 0948], first director, and Li Jusheng [2621 5468 3932], second director of the Hong Kong branch of the XINHUA NEWS AGENCY, and other responsible persons were at the reception to honor guests from all circles. Wang Guo and Sir MacLehose proposed toasts at the reception wishing Queen Elizabeth II and Chairman Ye Jianying good health. [Text] [OW020109 Beijing XINHUA Domestic Service in Chinese 1302 GMT 30 Sep 80]

ZHEJIANG MINORITY CADRES--Wencheng County, Zhejiang Province, has strengthened the training of cadres of She nationality. The county, one of the province's 10 counties with the largest minority-nationality population, has over 11,000 She nationals. Of these nationals, 147 are staff and workers divorced from production work, including 102 cadres and 71 graduates from middle schools, vocational schools and universities. Most of these cadres are assigned to leading posts in the county's party and government and in the financial, trade, educational and public health fields. [Hangzhou Zhejiang Provincial Service in Mandarin 1100 GMT 1 Oct 80 OW]

XINJIANG COUNTY-LEVEL ELECTIONS--Since the second half of last year 21 counties, municipalities and municipal districts in Xinjiang region have carried out direct county-level elections. According to statistics from Mori, Yanzi, Bole, Shanshan and Hotan counties, , 61--or 73.5 percent--of the 83 members of standing committees of county people's congresses; 15--or 60 percent--of the 25 chairmen and vice chairmen of standing committees of county people's congresses; and 20--or 64.5 percent of the 31 county heads and deputy heads elected came from minority nationalities. All county people's congress chairmen and county heads elected were minority-nationality persons. [OW020235 Urumqi Xinjiang Regional Service in Mandarin 1300 GMT 30 Sep 80]

SHANGHAI JUDICIAL DECISION--Acting in accordance the NPC's recent decision on questions of implementing the law of criminal procedure, the 8th session of the Shanghai Municipal People's Congress Standing Committee has discussed reports by the municipal higher people's court, the municipal procuratorial office and the municipal public security bureau on extending the length of time for handling criminal cases, and adopted a resolution on implementing the law of criminal procedure. The resolution points out that in view of the large number of accumulated cases and lack of personnel at present, it is indeed difficult to handle each and every case in the time limit stipulated by the law of criminal procedure. Therefore, the legal time limit for investigation, prosecution, first instance and second instance will be extended appropriately. [Shanghai City Service in Mandarin 1130 GMT 29 Sep 80 OW]

ZHEJIANG CPPCC MEETING--During the 11th enlarged meeting of the fourth provincial CPPCC Standing Committee, some CPPCC members took the floor and urged the departments concerned to stop waste and improve scientific research and education. CPPCC member (Cao Xianling) said that the current educational funds are much too low and that investment on education must be increased. He said many teachers today are highly incompetent and some teachers cannot even understand an academic report about a subject in their own field. CPPCC member (Zhou Hongtian) reported that Zhejiang oil refinery operates only 3 months each year because of insufficient supply of crude oil, and that the (Zhenhai) pier cannot accommodate large vessels because of silting although it was built for vessels of several hundred thousand tons. CPPCC member (Jiang Xiongfei) said that the party and the government must adopt effective measures to stabilize commodity prices. He said the prices of scores--or even hundreds--of commodities have risen. [Hangzhou Zhejiang Provincial Service in Mandarin 1100 GMT 27 Sep 80 OW]

ZHEJIANG NPC MEETING--The fifth session of the Standing Committee of the Fifth Provincial People's Congress continued on 27 September. Representatives who took the floor stated that the Standing Committee of the provincial people's congress must constantly supervise the work of the law enforcement organs, that scientific research units still have many problems, such as overlapping leadership and overstaffing, that intellectuals' salaries are still low, and that trade unions must serve as workers' spokesmen, reflect their opinions and be concerned with workers' vital interests. [Hangzhou Zhejiang Provincial Service in Mandarin 1100 GMT 27 Sep 80 OW]

JILIN CYL DELEGATION--The Jilin provincial young workers friendship delegation headed by Du Changling, secretary of the provincial CYL committee, headed for Pyongyang, the DPRK, on 19 September at the invitation of Yanggang Province. During its stay in Yanggang Province, Yim Su-man, responsible secretary of the Yanggang Province's KWP committee, received all members of the delegation. Kim Chang-yong, vice chairman of the League of Socialist Working Youth of Korea, received the delegation in Pyongyang. The delegation returned home 25 September. [SK300125 Changchun Jilin Provincial Service in Mandarin 2200 GMT 27 Sep 80]

SHANDONG STANDING COMMITTEE SESSION--The fourth session of the Standing Committee of the Shandong Provincial People's Congress was held in Jinan Municipality 21 September. Attending as observers were responsible comrades of the provincial people's government, the provincial higher people's court, the provincial people's procuratorate and the provincial level departments and mayors from various municipalities. The session was presided over by Zhao Lin, chairman of the Standing Committee of the provincial people's congress. Qin Hezhen, secretary of the provincial CCP committee and deputy governor, relayed the NPC guidelines and the main tasks of government work. The ninth Standing Committee meeting of the fourth provincial CPPCC was held at the same time. [SK220600 Jinan Shandong Provincial Service in Mandarin 2300 GMT 21 Sep 80]

GUANGDONG COUNTY LEVEL ELECTIONS--After conducting tests at selected sites, Guangdong Province has conducted county level direct elections in an all-round way. Except for Dan, Haifeng, Zijin and Longchuan counties which will conduct direct elections a bit later and the Hua County People's Congress will be held a bit later, 25 counties, municipalities and districts, including Haizhu, Huangpu and Yuexiu districts and suburbs under the jurisdiction of the Guangzhou Municipal Government and Longmen, Xinfeng, Dongguan, Heping, Foshan, Zhaoqing and Chaozhou, have held people's congresses to elect the new organs of political power. Thirteen counties and municipalities, including Jiexi, Jiaoling, Haikou, Zhongshan, Kaiping and Sanshui, have elected people's delegates in preparation for the people's congresses. The other 72 counties and municipalities are presently conducting direct elections. [Guangzhou Guangdong Provincial Service in Mandarin 1120 GMT 8 Sep 80 HK]

SHANDONG CPPCC MEETING--The ninth Standing Committee session of the Fourth Shandong Provincial CPPCC Committee successfully concluded 29 September following a 9-day session. The session relayed and implemented the guidelines of the third session of the Fifth NPC and the Fifth National CPPCC Committee, heard a report delivered by the vice chairman of the provincial CPPCC committee, Zhou Xinfu, on the guidelines of third session of the Fifth National CPPCC Committee and studied ways to further improve and strengthen the work of the provincial CPPCC committee. The session adopted a resolution on convening the third session of the fourth provincial CPPCC committee this November. Goa Keting, chairman of the provincial CPPCC committee, addressed the session. [Jinan Shandong Provincial Service in Mandarin 2300 GMT 29 Sep 80 SK]

LIAONING LAWYERS--The various counties and municipalities in Liaoning Province have set up 30 advisory groups on legal affairs composed of by more than 180 lawyers. So far this year, these groups have provided legal advice to 6,000 people and represented 600 defendants in court. They have also helped mediate 30 civil cases. [SK021237 Shenyang Liaoning Provincial Service in Mandarin 1100 GMT 28 Sep 80]

YUNNAN PROCURATORIAL CONFERENCE--The Yunnan provincial conference on criminal procuratorial work was recently held in Kunming. The conference stressed that it is necessary to regard strengthening social order as the major task of criminal procuratorial work. The conference was held by the provincial people's procuratorate. Liu Minghui, secretary of the provincial CCP committee, and Meng Qi, vice provincial governor, attended and spoke. Procuratorial organs at all levels have handled some 100,000 cases. [HK241419 Kunming Yunnan Provincial Service in Mandarin 1100 GMT 10 Sep 80]

ANHUI PROPAGANDA WORK MEETING--The propaganda department of the Anhui Provincial CCP Committee held a provincial propaganda work meeting on 6 September. The meeting, which lasted 7 days, pointed out that the central task in the party's propaganda work was ideological work in economic construction. At the meeting, Lan Ganting, deputy secretary of the provincial party committee, relayed the documents of the national propaganda work meeting. (Liu Zhengwen), director of the propaganda department of the provincial party committee, presided over the meeting and presented a summary report on the meeting. (Zhang Chunhan), first deputy director of the provincial propaganda department, presented a work report on behalf of the department. GUANGDONG MILITARY DISTRICT PARTY CONGRESS CLOSES

HK020059 Guangzhou Guangdong Provincial Service in Mandarin 1120 GMT 27 Sep 80

[Summary] The Sixth Party Congress of the Guangdong Provincial Military District which lasted 5 days closed on the morning of 27 September. The congress was attended by 446 delegates. On behalf of the last party committee, Xiong Fei gave the work report to the congress. On behalf of the party committee and discipline inspection committee of the provincial military district, Deng Xiufang gave the report on discipline inspection work. After serious discussion and examination, the delegates unanimously adopted the two work reports.

The congress elected the sixth CCP committee of the provincial military district and the delegates who will attend the party congress of the Guangzhou PLA units and the Guangdong provincial party congress. The congress summed up the main work, experiences and lessons of the provincial military district since the fifth party congress of the provincial military district in 1969. The congress discussed the tasks of the provincial military district in the new situation and looked into the measures for further strengthening and improving party leadership and speeding up the modernization of units of the provincial military district and building the militia. Before the party congress was held, the party committee of the provincial military district issued circulars, seeking motions from the party committees at and above regimental level of its subordinate units. After repeatedly seeking the opinions of the party members and the masses, all units put forward 405 motions. After summing up and sorting out the motions, the party committee of the provincial military district trimmed them down to 145 motions. The Standing Committee of the provincial military district party committee examined these motions many times.

The congress pointed out: "PLA units must continue to regard education and training as the central task and organize cadres at all levels to study military affairs, politics and culture. They must be prepared against war and improve their ability to cope with an emergency situation. They must strengthen political and ideological work and continue to conduct education on the revolutionary outlook on life. They must help the party members, cadres and fighters strengthen their ability to resist the corrosive influence of all kinds of nonproletarian ideologies. They must seriously improve their leadership style and work methods."

MILITARY AND PUBLIC SECURITY

GUANGZHOU PLA FORUM DISCUSSES ADVANTAGES OF SOCIALISM

HK010913 Guangzhou NANFANG RIBAO in Chinese 6 Sep 80 p 3

[Report by Rao Xinjian [1031 2450 1696], Zheng Suihua [6774 4482 5478], Cao Guangxiong [2580 0342 7160] and Wang Jining [3769 1015 1380]: "Firmly Believe in the Incomparable Superiority of Socialism and Cherish the Motherland as One's Own Mother"]

[Excerpts] From 23 July to 12 August, the political department of Guangzhou PLA units held a theoretical forum of propaganda section chiefs of subordinate units at or above the divisional level to discuss in-depth the superiority of socialism and other theoretical questions.

Forum participants explored from the theoretical angle the question of how to understand the superiority of socialism. They reached general agreement on the following basic concepts:

1. The realization that socialism symbolizes the triumph of the proletarian revolution and its eventual replacement of capitalism which follows the law governing the development of world history as a whole. Since the appearance of the socialist system in China is not without any reason, it embodies the concrete application in China of the general laws governing the development of world history and represents the inevitable development of Chinese history at a given stage.

2. Since socialist society constitutes the lower phase of communism, socialism in the process of development also consists of two stages: undeveloped and developed socialism. Before the victory of socialist revolution, China was a semifeudal and semicolonial society. Factors such as its very backward productive forces, the predominance of the small peasant economy and the very low level of science and culture were responsible for the protracted, complex and difficult nature of the task of conducting the socialist revolution and construction.

3. Since socialism is based on public ownership of the means of production, there will be no socialism if it is devoid of this basis, let alone the superiority of socialism. However, public ownership should not be viewed

in terms of abstract criteria; only when such a system conforms to the state of productive forces can the advantages of socialism be brought into full play and the development of the productive forces promoted.

4. The socialist principle of "from each according to his ability and to each according to his work" must be implemented. Pay according to work involves remunerating people on the basis of the amount and quality of their labor. Only by practicing the principle of payment according to work can the working people care about the results of their labor and thus their enthusiasm for building socialism will be aroused.

5. The fact that a new social system is superior to the old one is fundamentally because the former is able to produce greater labor productivity and thus open up huge possibilities for the accelerated development of the productive forces.

During the discussion, forum participants freely expressed their views, thereby fully airing different opinions. The pros and cons focused on the following issues:

1. What are the characteristics and criteria of a socialist society? Some comrades believed they boil down to public ownership of the means of production and pay according to work, while other comrades added the dictatorship of the proletariat and party leadership. Some comrades also contended that only public ownership integrated with modern large-scale production is characteristic of socialism.

2. What have caused present-day social ills and the appearance of Lin Biao and the gang of four? Some comrades believed that Lin Biao, the gang of four and the like appeared in China's socialist society because of the prevalence of such social drawbacks as bureaucratism, seeking privilege and taking the back door. They noted that these have been engendered from the vestiges of the old system. Other comrades argued that while existing social ills have indeed been caused by the havoc created by Lin Biao and the gang of four and the effects of the old social system, the imperfections of the socialist system are also contributing causes.

3. Will the fundamental socialist system engender drawbacks or not? Some comrades believed the fundamental socialist system such as public ownership and pay according to work will not engender ills. However, due to the shortcomings and imperfections of many specific aspects of socialism, it is possible that certain drawbacks and problems will arise. Some comrades disagreed. They argued that since the socialist society still remains the lower phase of communism, socialist systems including the fundamental type, if compared with the future communist system, are imperfect and may engender maladies. This is unavoidable at the present stage.

HEILONGJIANG CRACKS SMUGGLING, PROFITEERING CASE

SK270605 Harbin Heilongjiang Provincial Service in Mandarin 2200 GMT 25 Sep 80

[Excerpts] According to HEILONGJIANG RIBAO, a big smuggling and profiteering case has been cracked in Jiamusi Municipality. The case occurred within a state organization and a state-run enterprise, causing widespread attention among the people. Therefore, it should be handled promptly. This smuggling and profiteering clique is composed of (Wang Dianying), purchasing agent of the sales and exhibitions sections of the supply and marketing department under the Jiamusi Municipal Light Industrial Bureau; (Liu Defu), director of the afforementioned sales and exhibitions sections; (Ye Qingshan), deputy head of the office of the Jiamusi Municipal Light Industrial Bureau; and (Zhao Qifu), secretary of the party branch and head of the supply and marketing department under the Jiamusi Municipal Light Industrial Bureau.

Under the signboard of a state-run enterprise and under the pretext of enlivening the purchasing and marketing of products, they illegally drew on the business funds of the sales and exhibitions section and wantonly indulged in smuggling and profiteering since July 1979. Three times they smuggled products from Guangzhou Municipality, including 493 wrist watches, 387 calculators and 5 tape recorders, and illegally made 13,000 yuan profit. In addition, they planned to resell gold at a profit, but were arrested prior to executing the plan.

At present, the Jiamusi Municipal CCP Committee is investigating to establish responsibility and the municipal people's procuratorate will institute proceedings against the offenders.

SOCIOLOGICAL, EDUCATION AND CULTURE

SHANDONG ACHIEVES GOOD RESULTS IN SECONDARY EDUCATION REFORM

SK021215 Jinan Shandong Provincial Service in Mandarin 2300 GMT 1 Oct 80

[Excerpts] According to a report by our contributing correspondent (Ying Jingrong), in order to implement the eight-point policy on improving the national economy and to meet the needs of the four modernizations, our province has carried out secondary education reforms and has achieved initial successes. Prior to the Great Cultural Revolution, vocational and technical school education developed quickly in our province. By 1965 the total number of students from vocational and technical schools and agricultural middle schools comprised 41.5 percent of the number of students in secondary schools. During the Great Cultural Revolution, these schools were gravely disrupted.

In order to resolve this issue, our province has enacted planned reforms. In the last 2 years, 293 secondary vocational schools have resumed or been established in our province with 107,000 students, an increase of 45 percent in the number of schools and 1.7 times in the number of students as compared to 1977 figures. Our province has more than 500 agricultural middle schools with an enrollment of some 50,000 students. It has also decided to change one ordinary public middle school in every rural county into an agricultural vocational middle school. We have already changed 30. Student enrollment now stands at 3,200.

Through the cooperation of economic management departments and enterprises, 14 specialized courses and 27 technical courses have been opened on a trial basis in urban middle schools. The number of secondary vocational schools in our province has increased from 8.9 percent in 1977 to 26.3 percent and the number of students from 5.4 percent to 16.3 percent.

Over the past 2 years, the provincial People's Government has allocated 4.8 million yuan from the province's flexible funds to support these schools. The provincial educational department and the educational organs at all levels have held meetings to formulate and issue teaching plans and compile and publish teaching materials for vocational technical classes. They have decided to train a number of teachers to teach in these schools.

'RENMIN RIBAO' ON THEATRICAL REFORM

HK030158 Beijing RENMIN RIBAO in Chinese 24 Sep 80 p 5

[Article by commentator: "Sum Up Experience, Be Determined To Institute Reform--On the Present Reform of Theatrical Work"]

[Text] Not long ago, the Chinese Dramatists Association, the Arts Bureau of the Cultural Ministry and the Opera Research Center of the Literature and Arts Research Institute jointly held a forum in Beijing on opera repertoire. Responsible comrades in charge of opera work in the provincial, municipal, and autonomous regional cultural departments, opera workers and theorists gathered together to sum up their experiences in opera repertoire work. They discussed the existing problems in current opera work and the question of how to further develop and popularize operas to better serve the people and socialism. This was an important meeting in the drama and opera circles of our country. It will certainly play an important role in motivating the development of future opera work.

Since the establishment of the new China, the party and government have attached great importance to the cause of opera. Although the reform of opera has followed a tortuous road, it has scored great achievements and gathered rich experiences. Under the correct instructions of the party's policies such as "let a hundred flowers blossom, weed through the old to bring forth the new," and "make the past serve the present," the art of opera, which has a history of thousands of years, still maintains great vitality in the new era and radiates dazzling artistic brilliance. During the 10-year calamity, Lin Biao, Jiang Qing, Kang Sheng and their followers practiced national nihilism and cultural despotism. The frenzied devastation and destructive blows done to Chinese opera put many local operas on the verge of extinction. Since the smashing of the gang of four, and especially since the 3d Plenary Session of the 11th Central Committee, the great mass of opera workers have emancipated their minds to bring order out of chaos, enhanced their vigor and overcome difficulties and brought about another blooming and prosperous spring to the ancient Chinese opera art. In the past 3 years or so, more than 200 types of operas have been revived throughout the country, and more than 2,000 opera troupes have been reestablished; more than 100,000 destitute and homeless actors are now back on the opera stage and more than 1,000 traditional repertoires have been reintroduced to the audiences. At the same time, there has been progress in the writing of historical and modern plays. The opera stage in our country is unprecedentedly lively, and the art of opera blossoms with radiant splendour once again. The operas which were seriously devastated have been basically revived. The mainstream of the current opera art front is a good and healthy one. We must not underestimate the great achievements of opera work in the past 3 years.

However, on the path of advance and development, at present there are still some problems in opera which demand our close attention. For example: there are few new modern and historical plays; the plays on stage are mostly traditional repertoire; for various subjective and objective reasons, the performances of some troupes are not of high standard; in the wake of the speedy development of television and cinema, there has been a decline of audience attendance at some performances. These things indicate that the current opera repertoire is unable to meet the needs of the new period of socialist construction, nor can it satisfy the masses' increasing demands in cultural life. This also requires that all leading departments concerned and all opera workers seriously sum up experiences, emancipate their minds, establish lofty ideals and be resolute to carry out reforms so that our opera can catch up with the pace of the new era.

To carry out resolute reform, we must first settle the relationship between inheriting tradition, innovation, and creation. The development of opera cannot be separated from the history of our nation and the foundation of traditional art; without that foundation, there will be no innovation or creation. We must implement the party's policy of letting a hundred flowers bloom, weeding through the old to bring forth the new and making the past serve the present when dealing with traditional opera repertoire. Thirty years' experience in opera work has repeatedly proved: there will be prosperity when a hundred flowers are allowed to bloom, but decline when one flower alone is allowed to bloom. Chinese opera has such a long history and contains so many varieties, and the traditional repertoire is rich and complicated; thus, when thousands of repertoires which are of different trends of thought, different artistic characteristics, different sentiments and interests appear on stage, it is certain that there will be great contrasts between the excellent and the poor, the beautiful and the ugly, and the good and the bad. Alongside with fine and healthy repertoire which provides people with spiritual nourishment, there will be some which have poor content and are not artistically outstanding. It is inevitable that a small number of low-grade, or even poisonous plays will appear on stage. We must be serious and careful when handling problems concerning the opera stage. While we are against being crude and vulgar, we are also against conservatism. We must use the Marxist viewpoint and method to arrange the traditional repertoire, and repeatedly revise and refine it so that the old repertoire of the feudal society can revive and become new works with anti-feudalist content and healthy artistic style. As for the examination and approval of traditional repertoire, the criteria set in the "Instructions on the Reform Work of Opera" issued in 1951 by the government administration council of the central People's Government can still help us to distinguish and evaluate traditional repertoire. The instruction says, "The principal duty of opera is to display the new patriotism of the people, and encourage heroism in the revolutionary struggles and productive labor. We must encourage and popularize any opera which propagates resisting aggression and suppression, and love of one's country, freedom and labor, and which praises the uprightness and the good and honest character of the people. On the other hand, any opera which advertises feudal slavish morals or, barbaric or obscene behavior, or which villifies and humiliates the laborers must be opposed." We must use appropriate sense when dealing with some controversial works, we must give correct guidance based on the comments of the masses, the free discussions of opera workers and literary criticisms which are objective and rational. Certain harmful plays, must be censored after strict investigatory procedures. It is harmful to suppress them without analysing them or to use administrative orders without careful thought.

To carry out resolute reform, more new scripts of higher standard and various forms of operas must be used to reflect real life. We must use the viewpoint of historical materialism to write new scripts which reflect historical stories and figures. The new era has assigned a lofty mission to the socialist literature and the arts. Socialist opera has shouldered the important task of training new socialist men, enhancing the spiritual state of the people, promoting the perfection and development of socialist society, and satisfying the increasing demands of cultural life. Therefore, while arranging and rewriting traditional operas, we must actively promote modern drama, write new historical plays and try to create more opera repertoire which reflects real life. We must carry out an unbiased policy and put equal emphasis on traditional plays, new historical plays and modern plays no matter what type of play it is; if opera shows only ancient and not modern life, its development will certainly be confined. Opera should be able to bring into full play its strongpoints and artistic characteristics while reflecting real life. However, we should not stipulate rigid proportions in these three types of repertoire or set modern plays against traditional ones, or put forward slogans like "of key importance," and "of priority." Nevertheless, different types of plays and troupes can put emphasis on different fields so as to bring into full play their strongpoints and avoid their shortcomings in order to serve the purpose of having more varieties of repertoire on stage, raising artistic standards and providing the people with more and better spiritual nourishment, hence, the road of the art of opera will be broader.

Besides being resolute in reforming, we must also seriously investigate and carry out thorough innovations in stage art. We must use appropriate forms to perform new repertoire which reflects new ideology and new content of life. We must further bring new life to old subject matter on the basis of traditional opera art. Opera is a synthetic art. It is not enough to have new repertoire alone; reforms in the style of performance, music and voices, stage art and other aspects are necessary for keeping up with the development of the times and the progress of science and technology. Thus, the performances will become harmonious, unified and complete.

While we are resolute to carry out reform, we must also pay attention to training and improving the opera rank. A key link in developing opera is to train and improve the opera rank. We have many experienced old opera artists, and we have trained many successful opera writers, performers and artists during the past 30 years. However, because of the 10-year calamity during the Cultural Revolution, our opera rank was seriously devastated. At present, there is a problem resembling "the new crop is still in the blade and the old one is all consumed." There is a lack of professional playwrights and directors in most opera troupes, and the actors lack basic training. Therefore, the leading departments concerned must actively adopt effective measures to train and improve talented playwrights and directors, and strengthen training in acting techniques. At the same time, we must carry on implementing the party's policy regarding intellectuals and the opera actors, and stipulate some specific measures to improve their working and living conditions and raise their social status. We must also give them suitable spiritual and material encouragements according to their achievements and contributions.

Incessantly strengthening and improving leadership over opera work is the key guarantee for a prosperous socialist opera stage. We hope that the leading comrades of cultural departments at all levels will actively strengthen and improve leadership over opera work so as to enliven literature and the arts, which include the reform of opera. We must act according to artistic laws. While opposing interference by vulgarity and crudity, we must also avoid laissez-faire liberalism. We do believe: under the leadership of the party Central Committee, if we seriously implement the party's policies and principles regarding opera work and rely on the hard work of the opera workers, we shall score even greater achievements in the art of opera in our country, and can make even greater contributions to the masses and the socialist cause.

'XINHUA' ON FEELINGS IN TAIWAN CULTURAL CIRCLES FOR MAINLAND

OW301816 Beijing XINHUA Domestic Service in Chinese 1136 GMT 30 Sep 80

[Excerpts] Hong Kong, 30 Sep (XINHUA)--According to reports from Taibei, in the past year or so, people of cultural circles in Taiwan have in their talks and articles reviewed the new scenes on mainland China and expressed their yearning for the motherland and their desire to identify themselves with and to rejoin their kinsmen. According to Taiwan press reports, at a Taibei academic meeting in August this year, Taiwan scholars Yan Gengwang and Zhou Fagao remarked that of Per-qin historical relics, "a great deal has been unearthed on the Chinese mainland in the past few years, and their importance is greater than the historical documents." "Recently ancient objects older than the Yin Dynasty ruins have been successively unearthed on mainland China." They asked the Taiwan authorities to "lift the ban on imports or related 'mainland published' purely academic publications" to solve "the lack and limited sources of reference materials."

Taiwan scholar Guo Sifen recently compiled a large picture album entitled "The Long Silk Road," introducing in detail scenes along the ancient road that ran from ancient Changan through the Weishui plain, Xianyang, Xiliang, Lanzhou, the Hexi corridor, the Dunhuang caves, the south and north sides of Tian Shan and the Pamirs. The book also includes selected pictures of the terracotta warriors and horses in the tomb of Qin Shi Huang unearthed a few years ago on the mainland.

Taiwan scholar Jiang Fucong published an article in a newspaper, introducing a display opened in the United States in April this year of historical relics of the bronze age unearthed on mainland China in the past 30 years.

Some people from the cultural circles published articles, noting that in the past few years the mainland has implemented a policy toward the intellectuals to bring into play the role of professional people. "This indeed is something new, something worth celebrating."

Qian Mu and other Taiwan scholars in their articles recalled their past associations on the mainland before liberation with mainland scholars and writers Gu Jiegang, Guo Shaoyu, Ding Ling, Xiao Jun, Kong Luosun, Lao She, Guang Weijan and so forth.

Some Taiwan writers expressed in articles: "How much do I hope for China to be powerful, happy and immortal! ...Like a child longing for the warmth of a mother's love, we wonder when can we throw ourselves into her embrace"? "After all we and the mainland people are compatriots of 5,000 years. Our return to the mainland should be just like wandering children returning to the big family."

SOCIOLOGICAL, EDUCATION AND CULTURE

BRIEFS

PRC PUBLISHERS--The Shanghai Literature Publishing House has put out the first volume of a "Precis of Foreign Literary Works." Altogether the book has four volumes. The book, which is the first of its kind in China, covers more than 1,000 works by 600 writers of 70 countries in a dozen languages. The three other volumes will be issued next year. A number of medical books have been published by the Shaanxi Science and Technology Publishing House and have won approval from medical workers in the province. These books include the study of prevention and treatment of cancer using traditional Chinese medicines, a concise book of skin disease by traditional methods, a book on combination of traditional Chinese and Western medicine and a book about the preparation of herbal drugs.--A series of books containing entries selected and translated from the "Encyclopaedia Britannica" and "Encyclopaedia Americana" will be put out by the General Knowledge Press. The press has already issued a number of translations, including "Encyclopaedia," "Space Exploration" and "Pollution Control, Sewage System, Refuse Disposal System." [Beijing XINHUA in English 0745 GMT 2 Oct 80]

MATH HISTORY BOOK PUBLICATION--Beijing, October 2 (XINHUA)--A "Concise Book of History of World Mathematics" has been issued by the Liaoning People's Publishing House. This 380,000-word book records major events in world mathematical history from ancient times to the 1970's. The history of mathematics in China accounts for one third of the book. The book was edited by Professor Liang Zongju, of the mathematics department of Liaoning Teachers' College. He is a council member of the Chinese Mathematical Society. [Text] [Beijing XINHUA in English 0745 GMT 2 Oct 80]

BEIJING MEMORIAL SERVICE--Beijing, 29 Sep (XINHUA)--A memorial service was held in Beijing on 29 September for Comrade Ding Zan [0002 3805], a noted psychologist who died on 15 May 1968 at the age of 58 as a victim of persecution by Lin Biao, the gang of four and their factional force in the Chinese Academy of Sciences. Born in Jiangsu's Nantong Municipality, Comrade Ding Zan graduated from the psychology department of Zhongyang University in Nanjing. After his graduation, he engaged in medical psychology research at the Beijing Union Medical College and the Central Health Experimental Institute in Chongqing. He studied at the University of Chicago in 1947 and was assigned as deputy secretary general of the Sino-Soviet Friendship Association in 1949. After he joined the Chinese Academy of Sciences in

1949, he was assigned to such posts as deputy secretary of the Chinese Academy of Sciences party organization, deputy director of the planning bureau and deputy president of the institute of psychology. [OW020235 Beijing XINHUA Domestic Service in Chinese 1233 GMT 29 Sep 80]

XINJIANG EDUCATION--Urumqi, 25 Sep (XINHUA)--The state recently appropriated over 14 million yuan to support the development of education for the minority nationalities in the agricultural and pastoral areas in Xinjiang. A considerable portion of the sum will be spent on construction of schools with dormitories in the pastoral areas. In recent years, some 70 primary schools with student dormitories have been built in Xinjiang's pastoral areas. [Beijing XINHUA Domestic Service in Chinese 0110 GMT 25 Sep 80 OW]

XINJIANG GEOLOGICAL MEETING--The second symposium on oil resources in Tarim Basin jointly sponsored by the Chinese Geological Society, Petroleum Society and Geophysics Society was concluded in Urumqi, Xinjiang, on 27 September. Over 100 experts, professors and scientific workers of the Chinese Academy of Sciences, institutes of higher education and 13 provincial and municipal research organs under the ministries of geology and petroleum industry were present to discuss the strategraphic features of the petroleum geology of the Tarim Basin. During the symposium, Vice Chairman of the regional People's Government Yi-min-nuo-fu Ha-mi-ti and Tuo-fu-ti Sha-bi-er, and Vice Chairman of the Xinjiang Scientific Association (A-ba-zi Ba-er-gan) addressed the meeting. Vice Minister of the Ministry of Petroleum Industry (Li Jin) was also present. [Urumqi Xinjiang Regional Service in Mandarin 1620 GMT 27 Sep 80 OW]

XINJIANG MINORITY COLLEGE ENROLLMENT-Urumqi, 24 Sep (XINHUA)--This year 2,134 students of minority nationalities in Xinjiang have passed college entrance examinations. This has been the largest figure of minority students admitted to colleges since the college entrance examination system was revived. [Beijing XINHUA Domestic Service in Chinese 0111 GMT 24 Sep 80 OW]

XINJIANG LITERARY, ART CONGRESSES--During the Third Xinjiang Regional Congress of Writers and Artists, the regional branch associations of Chinese writers, stage artists, musicians, dancers, film workers, artists, and photographers also held their own congresses to elect new leading bodies. [Urumqi Xinjiang Regional Service in Mandarin 1300 GMT 28 Sep 80 OW]

HEILONGJIANG JOURNALISTS ASSOCIATION--The first session of the Third Council of the Heilongjiang Provincial Journalists Association was held 19-28 September. Attending the session were 67 members of the board of directors. The session discussed and adopted new regulations, formulated plans for future work and elected 88 new members of the board of directors from 46 journalists units. (Jiang Chun) was elected chairman of the association. [Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 29 Sep 80 SK]

JILIN WORK-STUDY SCHOOLS--The major cities in Jilin Province have established nine work-study schools since last November. These schools were designed to recruit primary and secondary school students who have committed minor offenses but are too young to be punished by law. The schools are mainly run by educational departments with the help of public security departments. Ruthless physical punishment is prohibited in these schools. Students who mend their ways and perform well will be transferred to the schools they formerly attended. [SK250958 Changchun Jilin Provincial Service in Mandarin 2200 GMT 23 Sep 80]

SICHUAN EDUCATIONAL FUNDS--According to a GUANGMING RIBAO report, Sichuan Province has allocated 2.1 million yuan to help primary and secondary schools run factories and farms. As of the end of August, prefectures and cities such as Daxian, Mianyang, Chengdu, Liangshan, Dukou, Aba and Wanxian have also allocated 1.59 million yuan from their own funds to help primary and secondary schools run factories and farms. [OW291423 Beijing Domestic Service in Mandarin 0900 GMT 27 Sep 80]

SICHUAN NATIONAL SYMPOSIUM--Chengdu, 25 Sep (XINHUA)--The first national academic symposium on Su Shi was recently held in Meishan County, Sichuan, the hometown of Su Shi. The society for the study of Su Shi was also founded. Su Shi was a productive and versatile man of letters in the history of Chinese literature, who had distinguished himself in prose, poetry, calligraphy, art and other forms of writing. Attending the symposium were 82 representatives from institutes of higher education, research units, publications and journalistic units as well as from Hangzhou Zhejiang, Huanggang Hubei, Danxian County, Guangdong and Xiaxian, Henan, where Su Shi lived at one time or another. The symposium received more than 40 papers on the study of Su's poetic art and literary thinking. Many papers dealt with Su's esthetic thinking, his contributions to music and his accomplishments in natural sciences, particularly in medicine. [OW291423 Beijing XINHUA Domestic Service in Chinese 0113 GMT 25 Sep 80]

GUANGXI SONG FESTIVAL REVIVAL--Nanning, 25 Sep (XINHUA)--Songs have resounded throughout Liuzhou City for the past 2 days during a festival of songs of the Zhuang people, the dominant nationality in the Guangxi Zhuang Autonomous Region. On seven stages erected for the occasion, groups of people sang the style peculiar to the Zhuang involving statement-and-response. Yufengzhan Park, site of the main stage, was swarming with the crowds. People sat on mountain slopes and on steps, and crippled people even came in their wheelchairs. There were over 20,000 participants and listeners in all, of all ages and many nationalities, including the Zhuang, Han, Yao, Miao and Tung. [OW291253 Beijing XINHUA in English 1221 GMT 25 Sep 80]

BEIJING COURTEOUS LANGUAGE FORUM--Beijing, 27 Sep (XINHUA)--The Beijing Municipal Linguistics Society sponsored a forum on 25 September to promote the use of courteous language among the people. Veteran educator Ye Shengtao, now 86, spoke at the forum, stressing the urgency and importance of doing a good job in this respect. [Beijing XINHUA Domestic Service in Chinese 0730 GMT 27 Sep 80]

LIAONING MIDDLE SCHOOLS--Liaoning Province has reorganized the distribution of middle schools. The number of the province's senior and junior high schools has declined to about 600 from more than 3,000 in 1978. The total enrollment in senior high schools is set at about 140,000 students. After the reorganization, the number of schools is reduced, but the quality of high school teachers is greatly improved. While many middle schools were abolished, rural areas throughout the province have established 700 vocational and technical schools and 112 key junior high schools. [Shenyang Liaoning Provincial Service in Mandarin 1100 GMT 27 Sep 80 SK]

LIAONING SECONDARY EDUCATION--The Liaoning provincial conference on the work of key middle schools concluded on 20 September. The conference said that in developing middle school education, a tendency of placing undue emphasis on students' preparation for going to universities should be corrected. It contended that key middle schools should be run successfully so as to become model schools in training qualified students for universities and in training outstanding laborers for society. Provincial Deputy Governor Zhang Zhiyuan spoke at the conference. He called for efforts to render manpower, financial and material support to key middle schools. [Shenyang Liaoning Provincial Service in Mandarin 1100 GMT 24 Sep 80 SK]

SHANGHAI MIDDLE SCHOOLS--Shanghai 23 Sep--Beginning with the new school year, 301 schools in Shanghai have extended the duration of senior middle school study from 2 to 3 years. By next fall, all senior middle schools in Shanghai will adopt a 3-year system. This is a concrete step to readjusting and improving primary and secondary school education. [Beijing XINHUA Domestic Service in Chinese 0215 GMT 23 Sep 80 OW]

SHANGHAI COLLEGE ENROLLMENT--According to a JIEFANG RIBAO report, approximately 87,000 students have by now enrolled at 48 higher-learning institutes in Shanghai. With the approval of the municipal party committee and People's Government, 20 institutes this summer enrolled some 3,000 commuting students, who will pay their own tuition. Excluding commuting students, Shanghai has 72,000 students who major in regular and specialized courses, 2,600 graduate students and 8,800 correspondence and night college students. Shanghai's institutes have also sponsored special courses for enterprise management and technical training in order to help local enterprises and factories to raise the level of management and technology. [Shanghai City Service in Mandarin 2300 GMT 28 Sep 80 OW]

SHANGHAI WRITERS', ARTISTS' FORUM--The Shanghai Municipal Federation of Literary and Art Circles on 24 September held a forum on how to uphold and improve the party's leadership over literary and art work and enliven literature and art. The forum participants noted the failure to implement the party policy on letting a hundred flowers blossom and a hundred schools of thought contend on literature and art, criticized the practice of "what I say goes" by some leaders and called for reform in the leadership over literature and art. [Shanghai City Service in Mandarin 2300 GMT 25 Sep 80 OW]

JIANGSU RADIO-TV GUIDE--Additional pages have been added to the JIANGSU GUANGBO DIANSHI JIEMU BAO [JIANGSU RADIO AND TELEVISION GUIDE]. Listeners and viewers are welcome to buy or subscribe to the provincial radio and television guide at local post offices in cities and counties of Jiangsu Province. [Nanjing Jiangsu Provincial Service in Mandarin 1100 GMT 26 Sep 80 OW]

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

'XINHUA' REPORTS AFGHAN, KAMPUCHEAN INVASIONS CONDEMNED AT UN

OW040834 Beijing XINHUA in English 0756 GMT 4 Oct 80

[Text] United Nations, October 3 (XINHUA)--More countries have condemned the invasion of Afghanistan and Kampuchea by the Soviet Union and Vietnam and called for the immediate withdrawal of their troops from the two countries during the general debate of the General Assembly in the past two days.

Prince al Sa'ud al-Faysal, minister for foreign affairs of the Kingdom of Saudi Arabia, said the dangerous situation created by the Soviet invasion and the flagrant military occupation of Afghanistan raised concern and fears among the peoples of the region and posed a threat to regional security and stability. "It is an aggression and an intervention committed by a superpower, which constantly pretended to be pursuing a policy of international peace and friendship and proclaimed itself protector of world peace, against an independent and sovereign state and a full-fledged member of the United Nations organization, the Islamic Conference Organization and the Non-alignment Movement," the prince stressed.

He demanded that Soviet troops withdraw completely and unconditionally from Afghanistan.

Moumine Bahdon Farah, minister of foreign affairs and cooperation of Djibouti, said his government denounced the foreign armed intervention in Afghanistan, the dangerous escalation of tension imposed on an Islamic nation and the violation of the U.N. Charter. "Djibouti demands the immediate and unconditional withdrawal of all foreign forces from Afghanistan in a manner to permit its people to decide their political destiny and exercise the right to have a government of its own choice," he declared.

Moustapha Niasse, minister of foreign affairs of Senegal, emphasized that the war in Kampuchea must be stopped in order to put an end to the suffering of the Kampuchean people. The representative of the Government of Democratic Kampuchea, Ieng Sary, should enjoy the support of the international community as provided for under the U.N. Charter. The independence and sovereignty of countries must be protected.

There must be an independent and non-aligned Afghanistan, he stated. The foreign occupation of that country menaced neighbouring countries and the region as a whole. Members should take action to ensure a return to peace and tranquillity and ensure the independence and non-alignment of that country.

Shaikh Muhammad Ibn Mubarak al Khalifah, minister of foreign affairs of the state of Bahrain, said Bahrain "condemns the Soviet invasion of Afghanistan, a Moslem non-aligned country, as being an outrageous violation of all international norms and rules and the principles of the charter."

Yusuf al-Alawi Abdolla, undersecretary for foreign affairs of Oman, pointed out that the intervention of major powers in the affairs of small ones by force of arms was increasing. The Soviet intervention in Afghanistan was a primary example of this. The Soviet intervention was a threat to regional security; the dimensions of the situation went beyond the borders of Afghanistan.

He noted that the continuing dangerous situation in Kampuchea has also to be considered. Vietnamese forces had to be withdrawn.

M'hamed Boucetta, minister of state in charge of foreign affairs and cooperation of Morocco, stressed that Afghanistan was daily sacrificing the best of its sons to safeguard its freedom and sovereignty. He extended solidarity to the fraternal people of Afghanistan. The United Nations should support the Afghan people's right to determine freely their course of life, he said.

The minister of Morocco stated that the people of Kampuchea were subjected to the will of a "government" imposed on them from outside. The international community should deploy its efforts to help the Kampuchean people in their quest for peace, dignity and free choice.

Australia Provides More Aid

OW061322 Beijing XINHUA in English 1252 GMT 6 Oct 80

[Text] Canberra, October 6 (XINHUA)--The Australian Government will provide a further 10,000 tonnes of wheat and a shipment of nutritional biscuits to help meet the needs of Afghan refugees in Pakistan, announced Australian Foreign Minister Andrew Peacock.

He said that the Australian Government remained gravely concerned about the continued Soviet military occupation of Afghanistan and the plight of the Afghan refugees in Pakistan. The population of Afghan refugees in Pakistan had now reached one million, most of them women and children.

Peacock continued that the Australian Government's aid totalling 2.2 million Australian dollars (including freight costs) was made in response to an appeal from the United Nations high commissioner for refugees.

Earlier this year, Australia provided 10,000 tonnes of wheat valued at nearly 2 million dollars to help the Afghan refugees in Pakistan.

'INDIAN EXPRESS' on Rebel Attacks in Kabul

OW061524 Beijing XINHUA in English 1511 GMT 6 Oct 80

[Text] Beijing, October 6 (XINHUA)--The rebel activity inside Kabul has increased, said INDIAN EXPRESS correspondent Kuldip Nayar in an article published today on his visit to the Afghan capital, according to a report from New Delhi.

In the article entitled "Afghan Rebels More Determined and Bold," he said, "The city is uneasy but quiet. During the six days I have stayed here, I have heard the sputtering of machineguns and the scurrying of heavy vehicles every night."

Four days ago, he wrote, the Indian ambassador and his wife, living not far from the city, were caught in the cross-fire between the rebels and government soldiers in the middle of the night. "A few days earlier, Logur in the suburbs shook from the explosion of an ammunition depot that the Russian Army protected with tanks." "The other day when a top KGB officer was dragged from his car in a crowded locality and killed, the rebels were able to escape and have not been traced."

He noted, "The Afghans have become introverts and quiet. Their faces reflect sadness and they look like the people who are burdened with all the worries in the world. They were sullen when I was here last, now they are resentful."

"However," he said, "forced enlistment continues. Two days ago, I met a person from a nearby village. He said that the night before, some Afghan and Russian soldiers had visited his house and had insisted on seeing his children who had gone to sleep. Despite his protests, the children were woken up. 'Is there anyone above 14 years?' the soldiers asked. They left the house only when they found that no child was above ten."

Soviets Kill Defecting Troops

OW061318 Beijing XINHUA in English 1208 GMT 6 Oct 80

[Text] Islamabad, October 6 (XINHUA)--Soviet tanks and armoured cars opened fire and killed over 100 Afghan soldiers in Kunar Province as they jumped out of a military convoy in an attempt to defect to the attacking freedom fighters, said press reports here today.

The reports said about 90 soldiers sent to repair the Asmar-Birkot road in the province succeeded in running away from the convoy and surrendered to the freedom fighters. The freedom fighters managed to destroy the Soviet tanks during the fray.

It was also reported that most of the Afghan soldiers are kept under constant surveillance by the Afghan Babrak Karmal regime as it is known large numbers of them are looking for any opportunity to defect.

Suspecting the loyalty of its troops, the Afghan Government has restricted their movement and forbidden letter writing even to close relatives. Leave of all types has also been stopped. This has greatly lowered the morale of Afghan troops and led to a prevailing state of uncertainty over the country.

Heavy Soviet Casualties

OW051536 Beijing XINHUA in English 1514 GMT 5 Oct 80

[Text] Islamabad, October 5 (XINHUA)--Heavy fighting is reportedly going on between the Soviet occupation troops and Afghan freedom-fighters in Badakhshan Province north of Kabul and near the Soviet border and the Soviet troops have suffered heavy casualties, according to a spokesman of HEZB-I-ISLAMI of Afghanistan in Peshawar today.

Nine-hundred Soviet troops supported by planes attacked the centres of the Afghan freedom-fighters in the province on September 28. Freedom-fighters fought back very bravely. Over a hundred Soviets were reportedly killed or wounded.

According to another source, Afghan freedom-fighters had several encounters with the Soviet troops in Baharak and Argoo areas of this province three weeks ago, killing 39 Soviet troops, shooting down one plane, destroying 8 tanks and seizing a large quantity of arms and ammunition.

The Afghan freedom-fighters made a surprise attack in Armak, capital of the subprovince of Ghazni Province near Kabul on September 29, killing two government officials, the spokesman of HEZB-I-ISLAMI added. A military training school at Armal [as received] was set on fire by freedom-fighters.

Two Russian military convoys on their way to Wardak from Kabul and Ghazni to attack the freedom-fighters were ambushed by freedom-fighters at Hindusayar of Ghazni Province on September 29. The fighting started at seven in the evening and ended at 3:45 o'clock next morning with two Soviet tanks destroyed, 25 Soviet troops killed, 12 wounded, and a lot of weapons and ammunition captured.

According to Afghan Islamic Society in Peshawar today, several battles had taken place in Kunar Province near Afghan-Pakistan border northeast of Kabul from September 23 to 28. In Barikod, Nalai and Azeergul, 37 Soviet troops were killed by freedom-fighters. Several tanks and trucks were destroyed and various kinds of weapons including heavy machineguns and mortars captured.

Islamic Conference To Draft UN Resolution

OW051902 Beijing XINHUA in English 1850 GMT 5 Oct 80

[Text] United Nations, October 4 (XINHUA)--Foreign ministers and representatives of Islamic countries today decided to set up a 10-nation committee to draft a resolution on the Afghanistan issue for submission to the current U.N. General Assembly session.

The decision was made at an extraordinary session of the Islamic Conference held here today.

Pakistan Foreign Minister Agha Shahi, current chairman of the organization who presided over the extraordinary session, issued a communique at a press conference saying the committee was instructed to bear in mind the principles set forth in the resolution made by the Islamic conference of foreign ministers in May this year. The previous resolution demanded among others "the immediate, total and unconditional withdrawal of all Soviet troops stationed on the territory of Afghanistan."

It was announced that the newly established committee comprises Algeria, Bangladesh, Guinea, Indonesia, Iran, Kuwait, Morocco, Pakistan, Senegal and Tunisia.

Shahi also announced that the extraordinary meeting decided to enlarge the Standing Committee on the Afghanistan question from three members to five members. The two new members are Guinea and Tunisia.

'XINHUA' REPORTAGE ON IRAN-IRAQ WAR

UN Delegates Urge Halt to War

OW070220 Beijing XINHUA in English 0204 GMT 7 Oct 80

[Text] United Nations, October 6 (XINHUA)--More delegates appealed to Iran and Iraq to end their military conflict at the U.N. General Assembly today.

President A.S.U.A. Shagari of Nigeria said that his government deeply regretted the current tragic conflict between the two non-aligned states and appealed for restraint and peace between the two countries.

Joaquim A. Chissano, foreign minister of Mozambique, was worried that the armed conflict between Iran and Iraq "could become generalized and aggravate the threat to international security and peace, as the region is highly sensible and vulnerable."

He expressed the hope that both Iran and Iraq would observe the principles of peaceful settlement of disputes, non-resort to violence, respect for sovereignty and territorial integrity, and non-interference in the internal affairs of other countries.

He urged the international community to be vigilant "so that imperialism will not take advantage of the war situation existing between the two countries to interfere in their internal affairs or to reinforce its zones of influence."

Rashid A'Abdallah 'Ali al-nu 'Aymi, minister for state for foreign affairs of the Arab Emirates, hoped that the efforts of the president of Pakistan would be successful in bringing about a ceasefire and leading to a peaceful settlement of the problems between the two Islamic states.

All nations had to refrain from intervening in the Gulf region. "The safety and security of the Gulf are a region responsibility that belongs to the Gulf states alone,"he declared.

The representatives of Libya and Jordan also joined in appealing for a ceasefire between Iran and Iraq.

Indian Premier on Conflict

OW040904 Beijing XINHUA in English 0810 GMT 4 Oct 80

[Text] Beijing, October 4 (XINHUA)--Indian Prime Minister Mrs Indira Gandhi said in Darjeeling yesterday that the current conflict between Iraq and Iran has not only posed a threat to the economy of India but of all developing countries, according to a New Delhi report quoting INDIAN EXPRESS today.

Addressing a press conference, she said India has to take protectionist measures in view of the recent happenings in West Asia since the oil supply to the country is bound to be affected.

Mrs Gandhi denied that the country was tilting towards the Soviet Union and said: "India had never been and is not presently and will not tilt towards the U.S.S.R. in the future."

'RADIO BA YI' DENOUNCES ORDER OF U.S. POLICE EQUIPMENT

OW050525 Ba Yi Radio (Clandestine) in Mandarin to China 1400 GMT 4 Oct 80

[Text] The decision made by China's leadership to purchase a large quantity of U.S. equipment and technical devices for public security use is by no means a correct one. Just imagine, in a socialist country with good traditions like ours, why should we squander people's money to buy such equipment and devices to intimidate and suppress people at a time when we badly need foreign exchange?

It is said that the purchase of modern U.S. equipment such as mobile laboratories for criminal investigation and fingerprint analyzers is aimed at "dealing telling blows to criminal offenders and rapidly identifying and arresting bandits, thieves and those who committed rape and accepted bribes." However, if we examine the list of equipment and technical devices ordered for public security use, we will realize that there are not too many instruments for criminal investigation such as the fingerprint analyzer. Weapons to intimidate and suppress the people make up a large portion of the order. For example, rubber nightsticks, automatic handcuffs, teargas guns and high-pressure firehoses are weapons used by armed policemen, the watchdogs of U.S. imperialists, to suppress demonstrators, to disperse crowds at rallies and to arrest striking workers or democratic personages.

Why must China buy this police equipment and these devices? Are there persons who plot to suppress the Chinese people with these items? Among the so-called devices for security use, the notorious lie detector is a modern psychological weapon for interrogation. In the United States, the lie detector is being used to confuse victims and extort confessions. As for implements for punishment such as those for electrocution, they are totally satanic inventions used to slowly torture and kill people. Does China need such implements of punishment?

All the comrades in the army pay attention to the following fact: The central authorities issue an instruction saying that those items will be available to the PLA security departments directly. For what purpose would the security departments acquire such devilish devices? It must be pointed out that the purchase of U.S. security equipment is a step in implementing Vice Chairman Deng's "Policy of Cooperation" with the United States.

However, the so-called "Special Agency for Technological Cooperation" between the Kuomintang and the United States made the people suffer miserably. The notorious "Sino-U.S. Special Agency for Technological Cooperation" established in 1942 was a special organization formed by U.S. imperialism and the Chiang Kai-shek bandit clique in opposing the people's struggle for liberation and in butchering China's democratic, patriotic personages. Taught by the policemen of U.S. imperialists, the butchers in the "Agency for Cooperation" used U.S. police devices to ruthlessly torture and interrogate thousands of Chinese. The so-called "Sino-U.S. Special Agency for Technological Cooperation" is the largest prison of the Chinese regime in which people were tortured and imprisoned. It was a devil who killed people without batting an eyelid. Is this fact of "cooperation with the United States" not a bitter lesson?

'XINHUA' NEWSLETTER ON VISIT TO FRENCH MEDITERRANEAN FLEET

OW070919 Beijing XINHUA Domestic Service in Chinese 0759 GMT 5 Oct 80

[Newsletter by Yao Yun, XINHUA correspondent: "A Visit to the French Mediterranean Fleet"]

[Excerpts] Paris, 4 Oct (XINHUA)--At present the Middle East again has become the world's hotspot, and the Mediterranean Sea, so close to the Middle East, has become an even more sensitive region. At a time when the international situation is changing fast, a group of foreign correspondents recently visited the French Mediterranean Fleet and the Toulon Naval Port at the invitation of the French Ministry of National Defense.

The fleet is the main force of the French Navy. It has 21 ships with a full load tonnage of 190,000 tons, about 40 percent of the total tonnage of France's combat vessels. The aircraft carriers "Clemenceau" and "Foch" and guided missile cruiser "(Colbert)," trump cards of the French Navy, are all in this fleet. Supporting the fleet are a flotilla of 18 light vessels and a group of 12 submarines. After the U.S. and Soviet fleets, this is the third major naval force in the Mediterranean.

The correspondents boarded the 30,000-ton aircraft carrier "Clemenceau" and put out to sea to observe the flight training of carrier-borne aircraft. The "Clemenceau" will remain a major ship of the French Navy in the next 10 years.

The next day we visited the guided missile destroyer "(De-gai-si-nei). The 6,090-ton warship was commissioned in 1970. It is characterized by its multiple capabilities, antiaircraft, antisubmarine, combating surface vessels, and so forth.

The correspondents also visited the (Ye-er) Naval Air Base. Various types of naval aircraft were seen at this airbase, about 20 kilometers from Toulon. Toulon Naval Port is important not only because it is the base of the French Mediterranean Fleet but also because there are very large naval shipyards, scientific research institutions and training schools here.

At the end of the visit to Toulon Port, the correspondents were received by Vice Admiral (A-ka-li), commander-in-chief of the French Mediterranean region and concurrently commander of the Third Naval District. Explaining the French Navy's tasks in safeguarding French territory and the safety of sea routes and carrying out the French Government's policies, he emphatically pointed out: "It is very complicated to perform these tasks in the Mediterranean." Warships are crowded here, especially since there are the activities of the fleets of the United States and the Soviet Union, which are not littoral countries of the Mediterranean.

A French naval officer told the correspondents: French naval vessels frequently encounter Soviet warships in the Mediterranean. When French warships are in training exercises, Soviet warships sometimes tail behind. They even get so close that there is danger of collision. Soviet military aircraft also constantly fly over to take photographs. The correspondents asked him: "What measures do the French warships take?" He said: "We take pictures too."

In the face of the ominous international situation, France is constantly strengthening its national defense power. In the naval field, in addition to the decision to build a sixth strategic nuclear submarine, France recently decided to build two nuclear-powered aircraft carriers. In terms of total tonnage, the French Navy ranks fourth in the world, after the United States, the Soviet Union and Britain. The new shipbuilding program will strengthen its deterrent role and fighting capacity.

PICTORIAL 'XIZANG' BEING PREPARED BY PRC, YUGOSLAV PUBLISHERS

OW072022 Lhasa Xizang Regional Service in Mandarin 1100 GMT 7 Oct 80

[Text] A large colored pictorial, XIZANG, depicting the beautiful scene of the Xizang Plateau as well as the long history, fine culture and colorful customs of the people there, is in the making by Chinese and Yugoslav publishers.

Entrusted by the State Publications Bureau, the Shanghai People's Fine Art Publishing House and the Yugoslav Review Publishing House are jointly preparing this large pictorial. The former is responsible for taking pictures and for compiling and editing the text, while the latter undertakes such tasks as the picture layout and the design, printing and distribution of the book.

As early as last July, the Shanghai People's Fine Arts Publishing House sent experienced photographers to Xizang where they spent some 2 months taking pictures. They visited northern Xizang and Shannan and Xigaze prefectures, went deep into the (Motuo) and (Menba) areas and traveled along the Sichuan-Xizang highway. Thus far they have traveled some 6,000 kilometers and have already taken many valuable photographs.

The Yugoslav side has sent its representatives to China on several occasions to consult with the Chinese side on the publication of this pictorial. The Yugoslav side is determined to use the best paper and printing techniques for this project. It has distributed sample pages to publishers of various countries in an effort to solicit orders from them.

To prepare the text, the Shanghai People's Fine Arts Publishing House has asked renowned personages such as Ngapoi Ngawang-jigme, vice chairman of the NPC Standing Committee; (Dong Zuo), associate professor of the central institute of nationalities; (Jiang-Bai-Chi-ye), living buddha of the (Dewang) temple; and (Xia Pei), vice chairman of the Lhasa Municipal CPPCC Committee, to write articles on Xizang's history, culture and arts, religious rituals, customs and habits.

The colored pictorial is divided into several parts: Routes to Xizang; An Ancient City--Lhasa; Beautiful Xigaze; The Place of Origin of the Tibetan People--Shannan; The Wide Expanse of the Northern Xizang Grassland; and The Mountainous Region of Himalaya. The pictorial will be an octavo-page book containing both photographs and text. Besides a large number of colored pictures, the book will contain articles and explanatory notes on various topics, consisting of 50,000-60,000 words. The book will come off the press early next year.

POLISH GOVERNMENT, TRADE UNION FAIL TO AGREE

OW040602 Beijing XINHUA Domestic Service in Chinese 1605 GMT 3 Oct 80

[Text] Warsaw, 2 Oct (XINHUA)--After failing to reach an agreement in the recent talks between their representatives, the independent and self-governing "Unity" trade union in Gdansk, Poland and the Polish government issued a bulletin and a statement respectively to explain their stands. The bulletin issued by the independent and self-governing "Unity" trade union on 1 October said: Deputy Premier Jagielski and representatives of the party and government authorities met with the delegates of the Presidium of the Joint Founding Committee for Independent and Self-governing Trade Unions headed by Walesa in Gdansk. The delegates of the presidium had hoped the government would announce some concrete measures to obviate the difficulties in founding and carrying out the activities of independent and self-governing trade unions by giving them access to mass media and considering their request concerning a basic pay raise.

The bulletin said: However, the plan put forward by the government contained neither any government decision on the questions already discussed nor any promises by the government.

The bulletin continued: The presidium of the joint founding committee is not responsible for the failure to reach an agreement in the talks. The presidium reiterates the independent and self-governing trade union's willingness to work together with the government to overcome the current crisis on the condition that the previously reached agreement is upheld and fulfilled. The independent and self-governing trade union's annoucement on a nationwide 1-hour warning strike is not tantamount to breaking off the agreement; it is a protest against the creation of conditions obstructing the fulfillment of the agreement.

At a press conference held in Warsaw on the afternoon of 2 October, the Polish government press spokesman, (Jay Balayski), read a government statement on the fulfillment of the agreement concerning the resumption of work by the workers. He said: The Polish government has in the past made many decisions toward implementing the agreement. However, some of them have not been carried out because of the following two reasons: First, some decisions which involve laws and decrees, such as the labor law, can be carried out only after the laws and decrees are revised; second, the workers of certain units have put forth a demand which is not included in the agreement.

Concerning the government's policy toward two types of trade unions, (Balayski) said both new and old trade unions are equal and neither one will be discriminated against. It is impossible for the government to consult, in making every decision, with trade union founding committees which represent only a minority of workers.

According to reports, (Balayski) also said at the press conference: "Fulfilling the agreement is one of the fundamental problems that need to be solved by the government." He said the government had already instructed the central and local administrative and economic departments to give due attention to fulfilling the agreement and to regard it as an important task.

BRIEFS

PAKISTAN ON SOVIET DESIGNS IN GULF--Beijing, October 4 (XINHUA)--Pakistan President Mohammed Ziaul Haq claims, "The Soviet Union is trying to break down the back door to the Persian Gulf," according to an UPI report received here today. The agency report is based on an interview with the president in yesterday's NEWSWEEK magazine, during which he pointed out that this "back door opens on Pakistan and Iran." He declared, "Pakistan is only one potential target for the Soviet attackers," and warned that, "strategically and militarily the Soviet Union is now physically capable of interfering--if they wish--in Iran." President Zia drew attention to a recent helicopter gunship attack on Pakistan, which is across the border from Afghanistan. He stated that although the helicopter bore Afghan markings, it was actually carried out by a Soviet crew. He said, "It was not only a clear message but real arm-twisting, telling me to be a good boy." He believes the Russians intend to stay in Afghanistan indefinitely and "they want Pakistan to know that if it opposes their designs, they will come in and sort us out." [Text] [OW060752 Beijing XINHUA in English 0720 GMT 6 Oct 80]

EGYPT, U.S. MILITARY COOPERATION DISCUSSIONS--Cairo, October 3 (XINHUA)--Ways and means of promoting military cooperation between Egypt and the United States are to be the subject of discussions between General David C. Jones, chairman of the U.S. Joint Chiefs of Staff and Mohamed Abdel Halim Abu Gazallah, chief of staff of the Egyptian Armed Forces, during the former's three-day visit which starts today. The Egyptian newspaper AL AHRAM today reports that U.S. official sources state that the U.S. Government is still studying Egypt's suggestion of using military facilities. General Jones' visit to Egypt is a part of his tour of the Middle East region, which is proceeding in the wake of serious forebodings about the implications of the Soviet expansionist attempt under cover of the conflict between Iraq and Iran in the Gulf region. The U.S. general visited Saudi Arabia and Oman before arriving in Cairo and it is believed that he will subsequently visit Israel and Greece. HUBEI NATIONAL DAY COCKTAIL PARTY--On the afternoon of 30 September, the Hubei Provincial People's Government held a cocktail party to mark the 31st anniversary of the founding of the PRC. Participants included French, Canadian, Japanese, U.S. and Dutch experts in culture, education and military affairs who are teaching in institutes of higher education in the province or working in the Wuhan Iron and Steel Company and the Fourth Design Institute of the Ministry of Chemical Industry and Hong Kong and Macao compatriots who are touring the country. Han Ningfu, provincial governor, Li Fuquan, vice provincial governor, Liu Jin, provincial people's congress Standing Committee vice chairman, (Xie Fusheng), provincial CPPCC committee vice chairman, Deng Ken, Wuhan municipal vice mayor, (Shan Yijie), provincial people's government secretary general, (Shi Qun), provincial association for friendship with foreign countries chairman, and (Xie Jinzheng), provincial federation of overseas Chinese chairman, also attended. The tea party was held in (Pingshan) restaurant, Wuchang. Han Ningfu proposed a toast, welcoming and extending greetings to the participants. PARTY AND STATE

AUTHOR DISCUSSES PROBLEMS IN PARTY POLICY

Hong Kong DONGXIFANG [EAST AND WEST] in Chinese No 17, 10 May 80 pp 72-75

[Article by Bi Dingtang [3968 7844 1016]: "From Adoption of Liberalism to Turmoil, to Restriction and then to Prohibition"]

[Excerpts] The Propaganda Department and the Organization Department of the Party Central Committee have demanded that all levels of the party organization "strengthen party member education and invigorate the party's organizational life" and have demanded that rotational training of the whole party be completed in three years.

The vanguard of these activities is the Guangdong Provincial Committee which has determined to strengthen ideological education and rectify party style and party discipline. The Provincial Party Committee held the Third Plenum of the Fourth Congress on April 8th, and resolved that:

In order to implement the spirit of the Fifth National People's Congress, there must be overall, thoroughgoing ideological and political education of all party members and cadres to rectify party style and discipline, firmly grasp collective leadership, oppose arbitrary actions by individuals, promote democracy within the party, welcome and support criticism from cadres and the masses, prohibit attacks of revenge, punish violators of party discipline, overcome aquisition of privileges, overcome the negative tendencies of having only promotions and no demotions, having fears of suffering hardships, seeking only to take one's ease, preferring to stay in the cities, selecting only profitable tasks while avoiding the non-profitable ones, and seeking help from high party officials. There must be special vigilance against corruption by bourgeois ideology and a repression of bourgeois life-style. There must be no delays in making detailed investigations of those who have seriously violated party discipline but have gone unpunished.

The ideology of the "fanshi [0416 2508] faction" has deep, strong roots and in all areas this faction is specially fond of stirring up movements, especially movements which make foolish criticisms of "bourgeois ideology." They ignore the practical faction's central line of not stirring up movements. As soon as any movements starts, the "[fanshi] faction" then has an opportunity, because all political movements more or less have leftist or rightist tendencies, and the hat of "bourgeois ideological" tendencies is then put on your head.

Party Members Are Not Permitted to Hold Differing Political Views

An even clearer example is found in a Shanghai JIEFANG RIBAO [LIBERATION DAILY] commentary titled "Party Members May Not Have Political Views Different from Those of the Party."

This commentary indicates that some party members have gradually developed into "people whose views differ" from those of the party. The commentary says that there is such and such a party member who still is a party worker, but who publically and openly holds non-party views. After the Third Plenum, this person turned against the party organization and secretly established connections to put out his own publication. This publication made the accusation that "Our policital system is inferior to those of the Western nations," and villified the socialist system as a "feudal centralized bourgeois society," characterizing the old cadres as "former bureaucrats" and the new cadres as "new bureaucrats." The old workers have a "narrow peasant" manner, and "only depend on the entry of new youths in recent years to manage things by themselves."

The conclusion drawn by this commentary is that the only way to handle these party members who lightly ignore party rules is to severely punish them according to party laws and without leniency.

The stronger Party Central criticism of places such as Guangdong and Shanghai clearly show the long-term, persistent seesaw battle between the Party Central "practical faction" and the local "[fanshi] faction." The two sides are again treading the same old track of that overturned cart -- "from adoption of liberalism to turmoil, to restriction and to prohibition." At the first sign of any disturbance they become indecisive and then reverse their direction.

The party's political movements have followed this pattern and so have its policies in art and literature.

From Adoption of Liberalism to Turmoil, to Restriction and then to Prohibition

There is a rumor that in May the "fishbone antennas" in Guangzhou were dismantled, and word came down many times that reception of Hong Kong television transmission was prohibited ...even to the extent that homes were entered for verification. What they fear is the influence of "bourgeois ideology." Recently, units of the People's Liberation Army have been required to sing "revolutionary songs," and songwriters have been ordered to compose songs which can be appreciated by the masses.

These chaotic conditions are all caused by contradictions within Party policy, and this, moreover, will continue to be the case. For example, can the policy of issuing strong orders against watching Hong Kong television really solve the problem? The fact that neighborhood organizations illegally enter homes to observe and make records is already contrary to the basic spirit of the new legal code, and also violates the constitutional rights of the people for freedom of discussion and ideology. From another viewpoint, China's television is making an intensely publicized change to international channels (UHF), so it is puzzling how the people who now use the national channels (VHF) will be able to purchase amplifiers (UHF conversion sets). The "fishbone antennas" are now dismantled, but in the future there will a conversion to international channels (Hong Kong programs will definitely be received). Isn't this a clear example of the confusion caused by ideological contradictions?

The only sure method is to produce a large quantity of television sets and invest in the modernization of the equipment in the nation's television stations, produce more programs which are more interesting and more suited to what the people want, vigorously struggle to compete with foreign television programs, use "audience ratings" to verify their own superiority, and if they ever succeed in having "the Chinese people watch Chinese television shows" (heaven knows if that day will ever come), then that is the correct path to follow, because depending on dry programming and government orders certainly will never work.

The [Fanshi]Faction Says that Literature and the Arts Are Too Unrestrained

It has already been seven months since the opening of the Fourth Arts and Literature Conference in October of 1978, however, no special edition of the Conference documents has yet appeared, while those of other conferences have long been available in separate editions. The managers of the publishing organs fear [jie/bei huo][1312/6296 7000] because the pronouncements of art and literature circles, especially those of the conferences, have run into the dangers of "playing lordly, arrogant games." Such words and bold manners are allowed by the authorities in the meetings, but are not to be printed and published. The officials in charge of the various areas have long agreed with the viewpoint that "the arts and literature are too unrestrained," so they have always been just a little afraid of art and literature circles. It is not at all strange that the documents of the Fourth Arts and Literature Conference are so late in coming out or that they may never come out.

In the recent mid-April, 1980 Second Guangdong Provincial Literary Conference, the "authorities" on the one hand used their own power to enforce their views and refute the suggestion of some representatives: "Works should attack the bureaucratism of high level cadres and agitate against special privileges." They labeled the opposition by saying: "There are now some people who are trying their hardest to sow discord in the relations between the people and high level cadres." On the other hand, some person in charge took advantage of control over a meeting during elections to use all his efforts in helping "her": "There is no point in discussing this representative's shortcomings, so let's just concentrate on her good points." [Someone countered,] "If we discussed shortcomings, she would be dismissed. Just what is it that you are talking about"? The purpose in not publishing the documents is to prevent the delegates from revealing their own bad points.

This is sufficient explanation of why the Party leadership, expecially middle and lower level cadres, has recently been so afraid of the reckless speech and actions in art and literary circles, so whenever there is an opportunity they use their authority to interfere.

A New Panegyric Literature Opposes Literature of Exposure

On 8 April 1980, the Ministry of Culture held a huge awards ceremony, and selected 200 dramas, traditional operas, musicals, song and dance numbers, and songs from those presented in honor of 30 years of statehood in 1979. These were awarded grand prizes and first, second and third places. Minister Huang Zhen [7806 6966] presented the certificates and prize money.

There were 63 programs which were awarded first places for creativity and 40 which were awarded first place for performance. (Grand prizes were awarded posthumously to Lao She for CHAGUAN [THE TEAHOUSE], to Wu Han for HAI RUI BAGUAN [HAI RUI IS DISMISSED FROM OFFICE], and to Tian Han for [XIE YAOHUAN].

These posthumous awards also were the only ones for works with any bitterness.) No prizes were awarded to works which exposed evil and none were for the literature of the wounded which has been so popular in recent years. On the contrary, some of the works receiving first prize such as CHEN YI CHUSHAN [CHEN YI LEAVES THE MOUNTAINS], SHUGUANG [DAWN LIGHT], BAO TONG THE NEWSPAPER BOY], DANXIN PU [RECOND OF A RED HEART], XI'AN SHIBIAN [THE XI'AN INCIDENT], HONGDENG ZHAO [THE RED LANTERN], SILU HUAYU [4828 6424 5363 7183] and ZHUNAGLIDE HUNLI [A MAGNIFICENT WEDDING] mostly are all "works created in accordance with commands."

The evaluations made for these awards adequately demonstrate that the Party literary policy hasn't made any new breakthroughs, the art and literature leadership departments have worked hard to present an image of peace and harmony and the "panegyric" faction produced works under the urging of the leading cadres (this is well attested to by the list of first prize works). On the other hand, party leadership in art and leadership appears to use commandism, practically using the selection process (such as the Hundred Flowers Movie Award and the Literary Short Story Award) to weaken the influence of the literature of the wounded and the literature of exposure and thereby repress development of any thinly veiled literary criticism of Mao. Obviously, if a work is not of the new "panegyric faction" it will hardly be chosen for presentation in the great hall. Some were labled in "discsssion meetings" as "critical," some were even prohibited form being performed by administrative orders.

All the above are typical examples of "from adoption of liberalism to turmoil, to restriction and then to prohibition." It appears that the springtime of art and literature has not yet reached the stage of a hundred flowers all in bloom.

'China's Bani-Sadr' Becomes a Figurehead

Although Iran's president Bani-Sadr was formally elected by all the people, he is totally without power, lacking even the power to control the few hundred students who occupy the American Embassy, and in all matters great and small he must consult the views of the religious leader Khomeni. Because of this, the name Bani-Sadr is used to refer satirically to those heads of house who have no real authority. In many organizations throughout the world there are weak structures with their Bani-Sadrs, but Iran is the only country having a popularly elected president with no power. (Bani-Sadr has both learning and talent and would be prominent immediately upon the death of Khomeni.) American vice-presidents are usually of average talents but capable of political stability, this is a fact known to all.

Although the English ruler does not hold great powers, the position is held in great respect by the people. Because of a power struggle in recent years, the Soviet Union troika has had ups and downs. Only in the highest leadership of the Chinese party, government and military is there a single person "heading the list," like the "lead role" in the movies. This is to say that Hua Guofeng is "China's Bani-Sadr."

China's Bani-Sadr has his good and bad points and his place in history will be evaluated by others in the future. The authority of Deng Xiaoping, "China's Washington," is gradually spreading, the second fiddle Hu Yaobang has been promoted to general secretary and Zhao Ziyang [6392 4793 7122] has been promoted to vice premier and member of the party standing committee, so Deng can be at ease and not have to worry about secret manuverings. The unfortunate "China's Bani-Sadr" also gained another nickname "China's Malenkov," and he is gradually being stripped of power and made into a figurehead and sooner or later will resign an premier. It is highly likely that the concentration of party, government and military leadership in one person will become a "vacant position."

The Retreat to the Second Line

After the failure of the Great Leap Forward, Mao Zedong resigned the post of State Chairman (this position is still vacant as no one has dared restore it) admitting his responsibility for the failure, but euphemistically calling it a "retreat to the second line." (This also laid the seeds for the Culutral Revolution, and from that very year when he rose to power, Deng Xiaoping never reported to Mao Zedong, just as he now does not report to Hua Guofeng.) The writer remembers an interesting riddle from those years. It goes, "Retreat to the second line," guess a term from physics. The answer is "capilarity." [A pun on "Mao closely controls things."] Unexpectedly, 20 years later the "capilarity" riddle is now current again. No matter whether it is Deng Xiaoping or Hua Guofeng who will "retreat to the second line," in any case it still is "capilarity." Because of the "ten calamitous years of the Cultural Revolution," whether or not Mao intended it so, plus the blind leadership of Lin Biao and the "gang of four," there can no longer be any naive faith from an ignorant populace and it is as yet unknown what other damage has been done. It is not possible to rely on "heaven's prestige" for shelter in all matters as the bark has been stripped clean from this great tree. Therefore, it is a matter of "capilarity."

Because of his visits to foreign countries, especially capitalist countries such as France, the United States and Japan, in search of "learning," "China's Washington" Deng Xiaoping has experienced "democracy," so he has a more flexible definition of this term. (Even "China's Bani-Sadr" has visited abroad and has a more lively approach to many problems.) Early on, Deng Xiaoping was somewhat supportive of "democracy wall" and in regard to literary conferences said, "literature and the arts should not suffer untoward interference,"...however, he made premature reference to retreating to the second line, and this writer believes there are a few reasons why.

Deng Looks with Foresight to Retreating to the Second Line

(1) The question of health. At age 76, Deng must attend to numerous matters on a daily basis, and this is specially true of the terrible mess of major and minor affairs the "[fanshi] faction" presses on him, just the same as the "gang of four" wore down Zhou Enlai. Deng wishes to enjoy a few more years of his old age and so has broken the communists unwritten rule of not retiring but working until death.

(2) The question of fulfilling one's promises. On the advent of his third restoration, Deng made a written guarantee of his loyalty to Chairman Hua, but only recently has made him into an empty figurehead. The majority of people support his promotion to a higher position, but he is not as old as Ye Jianying, so he uses retirement as a means of advancing, thus accomplishing two goals with one deed, since he will also unseat Ye Jianying, and then permit others to complete his plan of eliminating Maoism.

(3) The question of being right or wrong. Mao Zedong knew long ago that Deng Xiaoping was skilled at reversing decisions, and so wrote down the wise counsel that "reversing decisions does not win people's hearts," which was a severe restraint. To quickly dispose of this "dead-weight" (the viable options are already disposed of) Deng can only retreat behind the scenes to avoid having someone again trip him up and pull his que to make him confess to being "China's Khrushchev." (Great effort was expended in clearing Liu Shaoqi of this very same false accusation.)

(4) The question of obstructions. Deng Xiaoping wishes to take an early leave of the field of contention over right and wrong as the matter is limitless. At present the "Hua-Deng system" is really the "Deng Xiaoping system" and Hua Guofeng has increasingly stood to one side. Deng, however, has been troubled by the obstructions he has encountered on all sides. For example, even foreign reporters ask direct questions about the discrimination against Hua Guofeng, and Ye Jianying's pleasure trip to the south was a negative comment on Deng's anti-Mao

policy. Although Deng has managed to unseat the core group of the "[fanshi] faction," Wang Dongxing, Chen Xilian, Wu De and Ji Dengkui, and replace them with Hu Yaobang and Zhao Ziyang, nonetheless he encountered subtle resistance from those local powers who had benefited from the Cultural Revolution, that is, the middle and lower level cadres. Deng lacks both the spirit of patience and the power to force his views on them. A very clear example is that of the nude female mural of the water splashing festival at the Beijing International Airport. The official in charge at that time was a "cowardly bandit," afraid of [jie/bei huo][1312 6296 7000] and not daring to give permission to show the murals. The artist struggled against official will all the way up to the Party Central Committee and Deng Xiaoping. Deng even made a personal visit to the airport where he observed the mural and commented, "I don't see any problems." This one sentence solved the problem of "official will" which could not be solved through dispute. However, not more than three months later, Deng no longer had enough bite and could not depend on "his teeth as a golden emissary," so this mural of nude women finally was subject to traditional Chinese thought, which actually is the restrictions of dogmatism, and was covered with a "shame covering veil." This shows the many difficulties Deng Xiaoping has encountered in advancing his own policies. Deng is a politician who endures insults and shoulders heavy burdens and makes plans with great foresight, and his retreat from the first line is one stroke that will have many results in reducing the obstacles to his great anti-Mao undertakings.

Western Leaders Should Promptly Extend Invitations to Hu and Zhao

Deng Xiaoping's favorite general, Hu Yaobang, has gradually undertaken Deng's party duties, but he impresses people as a countrified tactician, skilled only in plotting and planning. In speaking to young people he tends to preach, much the same as Mao Zedong laid great guilt on Ma Yinchu [7456 1377 0443] and Liang Shuming [2733 3359 3298]. It is widely known that for 30 years, Ma and Liang were wronged by Mao's "generals." And now, Hu Yaobang speaks the same way: "You should not give any support to starting up any organizations or publications, you should lead youth onto the correct path of serving the people. I have already mentioned Lin Xiling [2651 1585 5044] who 20 years later still has no way out because of such great individual ambitions." (See Hu Yaobang's major internal speech on 17 October 1980, to the party leadership of the Communist Youth League and responsible persons of the ZHONGGUO QINGNIANBAO [THE CHINA YOUTH NEWS and ZHONGGUO QINGNIAN [YOUNG CHINA].)

After 20 years, Hu Yaobang still maintains that the female rightist Lin Xiling is guilty, and that even today she still has no way out. This is really disheartening for those young rightist intellectuals whose cases were reversed. Hu Yaobang as Party General Secretary is full of such official airs, and his grasp of Party policy towards intellectuals still is far behind the effectiveness shown by Zhou Enlai and Deng Xiaoping. It appears that Hu Yaobang's future political life still needs considerable polishing and tempering.

Hu Yaobang has only visited other communist nations and this valuable, new Party General Secretary should not be as countrified as Mao Zedong. He should visit a number of western nations and see something of science, technology and democracy. Zhao Ziyang has been promoted to vice premier, but even as a provincial representative he managed to visit western nations. The heads of western nations should make all possible efforts to invite such "leaders" as Hu Yaobang and Zhao Ziyang to visit their countries. Although "bourgeois ideology" will not corrupt these stalwarts, nonetheless it certainly will have subtle though decisive influences on their breadth of vision and learning, on their character and on the fate of future developments in China's policies. All of those great officials "living in a world of their own" who have visited western nations came back more or less changed in their view of life, this is a matter of record. You leaders of western nations, please do not be miserly in extending your invitations .

GOOD RESULTS SEEN IN TRAINING OF PARTY MEMBERS IN SHANGHAI

Shanghai JIEFANG RIBAO in Chinese 1 Jul 80 p 1

[Article: "Party Organizations at All Levels Throughout the City Pay Close Attention to Rotational Training of Party Members Well"]

[Text] Since the beginning of this year, party organizations on all levels in Shanghai have paid close attention to training of Communist Party members by stages and in groups, and after several months of efforts, they have obtained relatively notable results. At present, in accordance with the requirements of the Fifth Plenary Session of the 11th Party Central Committee and the plans laid down by the municipal party committee, party organizations on all levels are strengthening leadership, continue to pay close attention to and take charge of rotational training for party members, and determinedly build the Shanghai party organization to greet the calling of the 12th Party Congress.

At the end of last year, to suit the shift in emphasis of the work of the whole party and guarantee the thorough implementation of the party line, the propaganda department and organization department of the Shanghai Municipal Party Committee sent joint notices to party organizations on all levels requiring the universal training by stages and in groups for all the party members in the city and the development of a single in-depth ideological and political education. The propaganda department and the organizational department took the lead by holding a series of lectures on "Basic Knowledge of the Party," which had trained more than 1,800 instructors for training courses throughout the city by May. Party schools of all prefectures, counties, and divisions also separately held classes to train the mainstay forces and create conditions for rotational training of party members. Party organizations of all systems and all departments separately adopted various forms, such as spare-time training, short training courses, and assembly classes with separate discussions to carry out the rotational training. According to statistics on the eve of 1 July, 2,786 units at the level of an independent general party branch and above, 85 percent of the total number of such units in the city, had developed training programs and provided rotational training to almost 150,000 party members.

The current rotational training for party members takes as its principal content a thorough study of "Several Criteria Concerning Political Life in the Party" and discussion of the draft revision of the party constitution, with the spirit of the Third, Fourth, and Fifth Plenary Sessions of the Communist Party Central Committee threaded throughout the course of the training. Many new party members, after participating in the rotational training, said excitedly that this was the first concentrated and systematized party education they had received since entering the party, and that the party organization had provided an important class that they needed. Many old party members said they had been deeply hurt by Lin Biao and the "gang of four's" destruction of the party's fine traditions, but that they felt particularly touched by the resumption of study. "Strive to become a qualified Communist Party member" had already, day by day, become the actual activity of both new and old party members.

Judging by the circumstances in various areas, there were three striking characteristics of the current rotational training:

First, it stressed education in the ideological line and the political line, and further unified the thinking of the broad party membership behind the party line. When analyzing some of the party's present internal problems, party organizations on all levels universally recognize that fundamentally, internal party problems are all produced by departure from or opposition to the party's ideological line, political line, or organizational line. Because of this, in the rotational training of party members, all units have made the uniform understanding of the party's ideological line, political line, and organizational line the fundamental objective of the current ideological and political education, and through conscientious study by the broad party membership of the documents of the Third, Fourth, and Fifth Plenary Sessions of the Central Committee and Comrade Deng Xiaoping's important report on "The Present Situation and Mission," further unite the thinking of the party members behind the party line, and raise everyone's determination, activism, and creativity to implement the four modernizations. There are some party members in the Jing'an Ward service company who formerly were very confused about party line and policy; some were affected relatively deeply by the pernicious influence of the ultra-leftist line, their thinking not liberated, erroneously believing that "the party's line has turned to the right, its policies are off center, and the direction is in error." In the party member education, the party committee of the company aimed at this thinking, selected some fundamental questions, organized the party members to study them, and on the basis of this clarification of basic principle, led the party members to integrate it with the reality at their enterprise, making detailed accounts and comparisons, receiving their education from a large amount of facts and recognizing the correctness of the party line and policies. Everyone said that in the future, when they view circumstances, consider problems, or manage affairs, they will certainly uphold seeking truth from facts and will steadfastly implement the party line. One party member at the Shanghai Fourth Construction Engineering Company joined in the activities of the so-called "democratic faction" and "holders of different political opinions" behind the back of the party organization in direct opposition to the four basic principles and the spirit of the Third Plenary Session of the 11th Party Central Committee. The company party committee seized on this question and conducted ideological and political education at an internal party assembly, leading the party members to distinguish clearly between liberation of thinking and upholding the four basic principles, between socialist democracy and bourgeois democracy, and between respect for the rights of party members and rigorous enforcement of party discipline, these three areas, to make the broad membership of the party understand that the minimum condition for being a qualified party member is to maintain political unity with the Party Central Committee.

Second, they developed criticism and self-criticism and reached a practical solution for the problems of being a qualified party member by employing the methods of a minor rectification. Each unit, on the foundation of its organization of document study by party members and the raising of their awareness, also led everyone, on the basis of the content of the draft revision of the party constitution and the provisions of "Several Criteria Concerning Political Life in the Party," to compare and examine their own work, ideology, and style. The broad membership of the party universally took "Criteria" as a mirror and used the standards for party members as a yardstick in conscientiously measuring whether they themselves were qualified or not, or in what areas they were qualified and in what areas they were still not qualified. At the same time, between comrades they carried on a mild and comradely criticism and self-criticism to praise good points and overcome deficiencies, and to correct all manner of unhealthy tendencies. At the same time as they carried on positive education, the rotational training classes of some companies in the foreign trade system adopted a method of "four observations and four examinations," which is: examine the motives for joining the party, look at faith in communist affairs; examine party-oriented self-cultivation, look at signs of factionalism in oneself; examine concern for the party, look at expressions of disorganization and undisciplined behavior in oneself; examine the role of party members and look at oneself to see in which areas one is unqualified. Aiming at the questions raised by the "four observations and four examinations," they led everyone to develop criticism and self-criticism with respect to "Criteria" and the standards for a party member, helping many party members to raise their awareness. Through the rotational training, there was a striking transformation in 16 out of 18 party members in a foreign trade transportation company who had exhibited relatively conspicuous factionalism.

Third, they stressed "Begin with myself, begin with right now," and fully developed the party members' function as vanguard exemplars. In the rotational training, many units combined the conducting of education for party members with the solution of the principal internal party problems and stressed "Begin with myself, begin with right now." After the rotational training, the party members of these units showed notable progress in developing their function as vanguard exemplars. After going through rotational training, the broad membership of the party at Nanxiang [0589 5046] station in the Shanghai Railway Sub-bureau fully developed their party members' exemplar leading function in the employee promotion work this year. Many party members said, "We don't compete in the area of wages, but in what contribution we can make to the four modernizations." All of the party members at the station have completed more than 600 consecutive days of work without an accident. Many units have also proposed, in the course of the rotational training, "Begin with the rotational training, begin with a single drop," and there have been great changes in the mental attitude of many party members. There were 567 party members from Shanghai Cotton Mill No 31 participating in the rotational training, half action and half study, and within 3 months they had performed more than 2,000 good deeds for the collective and for the people.

All of the party organizations in Shanghai are determined to continue to pay close attention to this work in the second half year and secure even better development of the core leadership of party committees on all levels in the socialist modernization, develop the function of the party branch as a fortress, develop the vanguard exemplar function of Communist Party members, continuously improve the fighting strength of the party, and build the Shanghai party organization really well.

PARTY AND STATE

IMPORTANCE OF IDEOLOGICAL, POLITICAL WORK STRESSED

Nanjing XINHUA RIBAO in Chinese 2 Aug 80 p 1

[Article by Gao Shihua [7559 1102 2901]: "A Gratifying Exploration"]

[Text] Under the new circumstances of the four modernizations, how to advance the good administration of ideological and political work is a new subject requiring study and solution that has been placed before our plants and enterprises.

There are no longer very many people who will say publicly that ideological and political work is not necessary or not important, and everyone says that managing affairs according to economic laws is no substitute for ideological and political work; everyone says that ideological and political work is very important, and should be strengthened, not weakened. However, in the actual work, ideological and political work has still been neglected, or pushed to one side, and political work personnel are "impressed" into other work. The occurrence of these circumstances is evidence that some comrades still do not have sufficient appreciation of the importance of ideological and political work in the new period; on the other hand, judging by most of the units, the problem is that since the breaking up of the so-called ideological and political work done by Lin Biao and the "gang of four," we still have not found a method or approach to ideological and political work that suits the requirements of the new period, and we don't know, after all, how we should do it. Because of this, we must change the circumstances under which we give lip service to "importance" and in reality say "not wanted," and on the one hand must raise the appreciation of the importance of ideological and political work in the new period, on the other hand study methods of administering the ideological and political work, establish a relevant system for ideological and political work, and give the ideological and political work a procedure to follow, and that can be used effectively in the actual work.

The key here is that we must study how, under the new circumstances of economic construction, to really insert the ideological and political work into the economic work, to conduct the ideological work well within the economic work, and to solve the new problems that occur in economic activities to get public opinion to support, and prepare the public for, the new economic policies and new economic measures. At present there is also the situation, for example, that when a tributary problem arises in the course of work on such-and-such a new economic measure, some comrades will become heavyhearted and will doubt the new economic measure, believing that the solution of problems must still depend on ideological and political work, as though ideological and political work were to correct deviations in economic work. This view deserves study. Problems that occur because the economic work is still not perfect in some areas or still has some deficiency cannot be solved solely through ideological and political work. Ideological and political work is no substitute for economic work. Problems in economic work can only be solved by adopting appropriate economic policies or economic measures on the basis of a clarification of the reasons for the problems. The task of ideological and political work is to clarify, with regard to theory and with regard to ideological perception, what is the nature of the new problems that appear in the economic work. How should they be perceived? How to solve them? This so as to raise people's ideological consciousness and level of perception, adopt correct methods and attitudes, and promote the obtaining of solutions that accord with economic law. In the course of the four modernizations, the economic work may encounter a great many new circumstances and produce many new problems. The study of new circumstances and the solution of new problems must depend on strong and forceful ideological and political work to unify ideological perception and mobilize positive elements on all sides to insure the successful implementation of the four modernizations.

The enterprise "Political Work Regulations" formulated and given a trial implementation by the Yangzhou Agricultural Chemicals Plant are their gratifying exploration into the new theme of how to conduct ideological and political work in the new period. This spirit of courage in putting into practice is what is needed to accumulate and create new experience in the ideological and political work of the new period and is worthy of strong recommendation.

EXAMPLE OF EMPEROR TAIZONG IN HIRING TALENTED PEOPLE URGED

Nanjing QUNZHONG LUNCONG [MASS FORUM] in Chinese No 1, Jan 80 pp 150-151

[Article by Chen Jiantang [7115 1696 1016]: "On Emperor Tangtaizong's Ability to Hire Talented People and Accept Their Advice"]

[Text] Emperor Taizong of the Tang dynasty was very fond of Wei Zheng. When Wei Zheng died "Taizong came personally and wept bitterly." He decreed that "Wei Zheng be buried close to his own, the emperor's, resting place on Mount Zhaoling." "Taizong went up the Yuanxi tower to watch the funeral and cried. He ordered all his court officials to escort Wei's body beyond the city gates. The emperor personally composed funeral dirges and the inscription to be carved on Wei's gravestone." "Wei Zheng has died, the Emperor never ceases to think of him. He went up to the Lingyange gallery to view the portrait and composed a poem to mourn him." The reason why Taizong so grievously mourned Wei Zheng was not that their relationship was an intimate friendship, but rather that with Wei Zheng's death the emperor had lost a mirror. Taizong had repeatedly told his ministers: "A mirror of copper is useful to adjust one's attire and headgear; a mirror of olden times is useful to impart knowledge of the rise and fall of states; a human mirror is useful in reflecting one's merits and demerits. I have had all these three mirrors to help me guard against adversities. Alas, with the death of Wei Zheng I have lost one of the mirrors!"

It truly deserves our admiration that a feudal lord like Taizong attached such great importance to this kind of mirror and used Wei Zheng as such. Wei Zheng was not a minister from among Taizong's old cronies and also not favored with special patronage. Wei Zheng had originally been an underling of Li Mi, a leader of an army of rebellious peasants in the waning years of the Sui dynasty. After defeat and surrender, he became counselor to the crown prince Li Jiancheng who was a political adversary of Taizong. At that time "Wei Zheng had frequently urged crown prince Jiancheng to do away with Prince Qin (i.e. Li Shihmin)." Jiancheng was assassinated in the Xuan-wu Gate incident, and Li Shihmin assumed the position of crown prince. The second year thereafter, when Li Shihmin became emperor, he not only left Wei Zheng unharmed but appointed him to high offices, namely to be remonstrating counselor, secretary of state, inspector general, and imperial minister, all very important positions. The emperor furthermore enobled Wei Zheng with the titles Grand Tutor to the Crown Prince and Duke of Zheng principality.

That Taizong valued Wei Zheng to such an extent was out of the emperor's consideration for the consolidation and preservation of his feudal dynastic rule. Taizong had seen with his own eyes the destruction of the Sui dynasty and had assessed well the experiences of good and bad government throughout the eight centuries since the Qin and Han dynasties. He had become deeply convinced of the importance of two never-to-be-abandoned principles that could consolidate his own feudal rule, namely that it is imperative to pick out and hold on to able men as assistants and that remonstrances must always be heeded. Taizong was an outstanding personality among all the feudal rulers due to his ability to employ capable men and heed their remonstrances.

The important thing in the employment of men is the ability to evaluate men. A man must be correctly analyzed, his qualities clearly discerned and he must then be placed into the very position where he will function most effectively. Taizong had excellent judgement in this respect. He once said: "Officials must be selected without haste or impetuosity. Once a superior man has been installed, he will draw in other superior men. Once an inferior man has been installed, he will draw in other inferior men." He drew another analogy by saying that raising weeds that look like rice is bound to harm the crop. Handing bounties to scoundrels will drive away good and faithful men. It is therefore essential to recognize men and to be able to place them correctly. On the other hand it is also necessary to open wide all avenues, not to stick to one pattern but to employ men only in consideration of their abilities. Taizong said: "Considering how wide the world is, why be anxious to decide on one single person? I measure and select the talents of the world to handle the affairs of the empire, they are installed in their positions and entrusted with responsibilities, each exerting his best efforts, thus conforming with the principle of reason."

Among the men employed by Taizong there were landlords of various clans, generals of rebellious peasant armies, officials that had come over from the Sui dynasty, even people from poor families and of slave origin, as well as many men from fraternal nationalities. Taizong's opinion on Wei Zheng was: "In those past days when he worked with all his heart in the service of the then crown prince, he was truly detestable," but because "Wei Zheng is a genius in handling state affairs and is also of an unflinching upright character," the emperor did not keep alive the grudge against Wei Zheng and employed him in important positions.

To heed remonstrances was another special characteristic of Taizong. As Sima Guang correctly expressed it: "Taizong would not use great talents of the world at his own private will and whim to eliminate the sources of disaster and turmoil; this can really be called farsighted planning!" Wei Zheng regularly redressed improper actions by Taizong and could talk to the emperor's face directly, remonstrating with him. The reason why Wei could do it was that "if an emperor encourages his minister to speak out, he will dare to remonstrate, but if an emperor will not heed remonstrances, would a minister dare to repeatedly offend his majesty?" It is therefore clear that only when remonstrances are heeded with an open mind, will men dare remonstrate, and only then will enlightenment be gained by seeing both sides of a problem.

In 639 Wei Zheng compared the earlier and the later 10 years of the Zhen-guan era and pointed out that Taizong had not been able to maintain probity and prudence throughout his rule, and that the emperor was gradually developing a moral depravity. Wei then advised the emperor in these extreme terms: "Comparing your majesty's administration with that at the beginning of the Zhen-guan era, there are 10 faults." Wei Zheng made no secret in pointing out the series of faults and his memorial was extremely sharp and biting. After he read it, Taizong said: "Today I was told my faults. I want to change and walk to the end of the road of goodness. If I should break my promise, I would have no face to meet you! Your memorial will be inscribed on a screen which I shall see every morning and every evening. It will also be recorded by the historian to show the proper relationship between rulers and ministers for the benefit of future generations."

In the feudal era of China, the emperor wielded the great power over life and death. If Taizong was exceptional in that he heeded advice and criticism for the long duration of 17 years until Wei Zheng's death and all this time entrusted Wei Zheng with high offices, this is a most unusual occurrence. The "good government of the Zhen-guan era," as it appears in history (627-649), is inseparably linked with Taizong's enlightened measures of employing capable men and of taking heed of their advice.

Times have changed. The work style of members of the Communist Party is to maintain close links with the masses, to carry out a system of democratic centralism, of consulting with the masses in case of any new problems, of widely heeding criticism by the masses, and of speaking out on whatever comes to one's knowledge and say it without reserve, to blame not the speaker but be warned by his words. The party has given supervisory power to the revolutionary masses of 1 billion people. The revolutionary masses of 1 billion people are the "remonstrating counselors" of our days, but there are still a great number of impediments and many blocked channels in the way of effectively handling the relationships between cadres and the masses and between upper and lower ranks, also in the way of appropriately instituting organizational lines for the employment of capable men, etc. We fear that unless much energy is expended, success can hardly be achieved. "Take history as a mirror." Taizong and Wei Zheng, important personalities on the historical stage 1,300 years ago, can indeed serve in our days as examples to help us remedy our defects and rectify abuses.

CHEMICALS PLANT'S 'POLITICAL WORK REGULATIONS' PRAISED

Nanjing XINHUA RIBAO in Chinese 2 Aug 80 p 1

[Article: "Explore the Road of Ideological and Political Work in the New Period"]

[Text] The enterprise "Political Work Regulations" formulated by the Yangzhou Agricultural Chemicals Plant, having been passed by a congress of worker's representatives from the whole plant, were put into trial operation throughout the plant on 1 July. Their implementation for about a month since that time has shown a relatively good effect.

After the emphasis of party work was transferred to economic construction, is ideological and political work still needed? How should it be approached? Early this year, the general party branch of the Yangzhou Agricultural Chemicals Plant discussed this question several times, and they came to the conclusion that not only was ideological and political work still needed after the transfer of the emphasis of the work, it ought to be conscientiously strengthened. However, we certainly can no longer use the methods of the "gang of four" in carrying out ideological and political work, and we must adapt to the requirements of the new period. Then, what must we do after all to make the ideological and political work adapt to the requirements of the new period? The enterprise "Political Work Regulations" is one result of their exploration of this area.

Beginning early this year, these "Political Work Regulations" have been formulated, revised, simultaneously revised and practiced, and most recently passed and put into trial operation, all of which has occupied a period of several months. These "regulations" provide rules for ideological and political work in the plant. The broad masses of cadres say in reaction that with the "regulations," there is a system to be followed in the political work. The reaction of the employees is that now the political and ideological work of the plant can be seen and felt, like a stone roller pressing a stone mill--a real "stone" is used to strike a real "stone."

There are a total of nine articles in the enterprise "Political Work Regulations" formulated by the Yangzhou Agricultural Chemicals Plant, and these include the basic mission of enterprise political work, its status, principal content, form, basic method, organizational structure and duties, concerned systems, staff regulations, etc. The article on principal content of enterprise political work provides: 1. Propagandizing of the party line, guiding principles, and policies, and the regular and oriented conduct of education in upholding the four basic principles and current political affairs, etc, constantly raising the workers' ideological consciousness; 2. Cultivate and develop "honest in three ways and strict in four aspects," arduous struggle, and other such good traditions and style among the workers; 3. Mobilize and organize the workers to study technology, study culture, study vocational subjects, and study science; 4. Manage the plant's public security work well; 5. Strengthen the establishment of the party, manage education in party subjects well, and develop the function of the party branch as a fighting force and the function of Communist Party members as vanguard exemplars; 6. Develop democracy and protect the rights and interests of the workers.

The "Political Work Regulations" formulated by the Yangzhou Agricultural Chemicals Plant have the following two characteristics: One is that the guiding ideology is clear and definite, that it should fit in with the reality of the enterprise. The "Regulations" stress that enterprise political and ideological work must be done in combination with productive work, that what must be done is to center things on the central tasks, center them on production, center them on management of the enterprise, and not do the kind of formalist things or use the "air to air" methods that were used formerly.

The clauses in the "Regulations" come principally from the reality of the plant. Early this year, there were some comrades at the plant who felt that in the future, employees' activism could be motivated by means of awards, and there would be no further need for ideological work. The general party branch at the plant organized everyone to study the concerned party and government stipulations and clarify the relationship between the use of material incentives and good ideological and political work, and to raise everyone's recognition that they must pay attention to good ideological and political work in the course of awarding bonuses. A summary of this experience formed a clause and became part of the content of the "Regulations."

The second striking characteristic of the "Regulations" is that it stresses the central things and demands concreteness. The "Regulations" grasp political work as a matter of individual conduct, stressing a central core of educating people, the problem of liberating people's thinking, and raising people's socialist consciousness, making appropriate definite provisions to assure that the enterprise political work will be regular, systematic, and concrete, and will provide a basis and a standard for examining good and bad. So far this year, in accordance with the concerned provisions of the "Regulations," they have combined the reality of the plant's production and the reality of the masses' ideology and achieved relatively good results with consecutive courses in the proper handling of awards and bonuses, the ideals, future prospects, and morals of young people, and increasing production with economy, increasing return with economy of disbursements.

To guarantee the thorough implementation of "Political Work Regulations," the general party branch of the Yangzhou Agricultural Chemicals Plant established a political work system throughout the plant. The general party branch leads political work throughout the plant, the organization and propaganda section is specifically responsible, each shop is the responsibility of that shop's party branch, and the various offices and work sections selected 58 comrades to be political work and propaganda officers, and the labor union and Communist Youth League organized to coordinate with the political work, carry out political education, study, discuss, and analyze ideological tendencies, so there is someone in charge at every level, someone to manage every affair. They also established, in connection with the political work, a study system, a propaganda system, a system of regular meetings, a system of heart-to-heart talks and interviews, and a system of rewards and punishments, to assure that the "Regulations" will be thoroughly implemented.

ELECTIONS GO WELL IN GUANGZHOU

Large Turnout Reported

Guangzhou NANFANG RIBAO in Chinese 4 Jul 80 p 1

[Article: "Does a Good Job of Managing Things in Electing Representatives, Unites as One To Do the Four Modernizations; Vast Numbers of Voters in Guangzhou City Enthusiastically Elect People's Representatives; Provincial Committee and Provincial People's Government Leadership Comrades Xi Zhongxun [5045 0112 8113] and Yang Shangkun [2799 1424 2492] Cast Ballots Along With Voters"]

[Text] Election work for Guangzhou municipal district and county representatives to the National People's Congress was basically completed on 3 July.

Yesterday morning, the responsible comrades Xi Zhongxun, governor of Guangdong and first secretary of the Guangdong Province Communist Party Committee, Li Jianzhen [2621 1017 6287] secretary of the Provincial Committee and chairman of the Standing Committee of the Provincial People's Congress, and Wu Lengxi [0702 0397 6007] secretary of the Provincial Committee, came to the 137th electoral district in the Dongshan District as ordinary voters and together with the masses listened to the chairman of the electoral district introduce the candidates and amid enthusiastic applause cast their ballots together with the masses.

Yang Shangkun, second secretary of the Guangdong Province Chinese Communist Party Committee, deputy governor of the province, first secretary of the Guangzhou Municipal Chinese Communist Party Committee and chairman of the Municipal Revolutionary Committee, Wang De [3769 1795], secretary of the Provincial Committee and Yin Linping [1438 2651 1627] cast ballots in the electoral districts where they lived.

Election work for representatives to the National People's Congress from Guangzhou city district and county was carried out strictly according to the Election Law. During the deliberations on nominating candidates and voting for representatives, democracy was fully developed and vast numbers of voters exercised their voting rights in accordance with their own will. The voting rate was over 95 percent in the majority of districts and counties. Over 31,960 preliminary candidates were nominated in all electoral districts, which was 11.8 times the number of candidates to be elected, and after going from upper levels to lower levels several times, and through repeated discussions, differential balloting was carried out and 2,713 district and county people's representatives were elected.

On election day in all districts and counties, the red flags were flying, there was a deafening sound of drums and gongs and the masses were jubilant. The municipal power company had over 30 people patrolling the lines in Yingde and Qinguan. On orders to guarantee quality, they intensified work and on the day before the election hurried back to Guangzhou so they could vote on time. Over 50 persons in the Municipal Cantonese Opera Troup were performing in Hong Kong and Macau. They treasure their voting rights and each of them had a relative or colleague vote for them. Some persons who are deaf, dumb and blind and some old people in their eighties and nineties participated in the election. A 75-year-old returned overseas Chinese from Xiaogang Street put on his new holiday clothing and went to the polling place to cast his ballot. Monks from the Municipal Buddhist Association dressed in their kasaya for the first time in over 10 years went to North Chaoyang Street to cast their votes. Many voters who gained their voting rights as a result of policy implementation before this election were even more excited, and participated in the election.

Among the district and county representatives to the people's congress from the districts and counties there were persons from all fronts as well as from all areas of society, and were very representative of all walks of life. The 452 representatives to the Haizhu District People's Congress include 30.97 percent workers, 26.9 percent cadres, 14.4 percent intellectuals, 19.2 percent other laboring peoples and minorities, returned overseas Chinese, relatives of nationals living abroad, former businessmen and religious figures were proportionally represented.

At present, the Longmen, Zengcheng and suburban districts have already convened representative assemblies and established standing committees of the people's congress as well as people's governments. The Haizhu district is currently convening a people's congress and the seven other districts and counties are actively carrying out work preparatory to convening a people's congress.

Meeting To Discuss Elections

Guangzhou NANFANG RIBAO in Chinese 4 Jul 80 p 1

[Article: "Counties and Municipalities (Districts) in Guangdong Complete Election Work; Provincial People's Congress Standing Committee Convenes Meeting To Exchange Experience in Election Work"]

[Text] In the first 6 months of this year, a number of counties and municipalities (districts) in Guangdong Province completed county level direct election work. The standing committee of the Provincial People's Congress convened a meeting in Guangzhou from 27 June to 1 July to exchange experience in election work and the counties and municipalities (districts) which had completed election work told of their experiences.

In the last 6 months of last year, after the Election Law and Organizational Law were made public by the standing committee of the National People's Congress, Guangdong Province conducted tests of direct elections at the county level in the three counties and municipalities of Gaoyao, Fany and Jiangmen. In the first 6 months of this year, some counties and muncipalities (districts) began election work. By the end of June, the following had already completed elections and convened people's congresses: the counties and cities of Chaozhou, Nanhai, Doumen, Donghuang, Longmen, Wenchang, Qiongzhong, Deqing, Huaiji, Zengcheng, and the Huangpu and suburban districts of Guangzhou city. Those which have already elected representatives and prepared to convene a people's congress are: the counties and cities of Zhaoqing, Qionghai, Jiaoling, Yingde, Gaozhou, Conghua, Huaxian, Xinfeng, Jiexi, Gaojiao, Shunde, Kaiping, Enping, Yunfu. Guangning, and the Guangzhou City districts of Haizhu, Liwan, Yuexiu and Congshan as well as the three test sites of Gaoyao, Fanu and Jiangmen. There are now 29 counties and municipalities and 6 districts of Guangzhou City that have completed election work and convened or are ready to convene people's congresses. With the exception of individual counties, the rate of voter participation in the counties and municipalities (districts) which have already completed election was over 90 percent. Counties and municipalities (districts) have convened people's congresses, chairmen and deputy chairmen of county and municipality (district) standing committees of people's congresses have been elected, people's congress standing committees of counties and municipalities (districts) have been established, county chairmen and deputy chairmen and municipal (district) chairmen and deputy chairmen have been elected, and county and municipality (district) people's governments have been established.

When discussing their experiences at the meeting, counties and municipalities (districts) which had completed election work emphasized that to do a good job of election work, first of all the party committee must place election work on the agenda and conscientiously strengthen leadership, and as soon as election work begins, they should provide adequate leadership effort and administrative personnel to establish strong administrative agencies. Next, they should pay attention to establishing a capable election work rank, and have them grasp the basic spirit of the Election Law and understand the important significance of the election work and the specific regulations and methods of election work. Third, they should conscientiously do a careful job of disseminating information on mobilization so that everyone can develop the spirit of being master in his own house and actively participate in the election process.

The conference felt that over the next half year, Guangdong Province county level direct election work should be fully under way, and that this is an important matter for the political life of all the people in the province. Democracy should be fully developed, and things done strictly according to the Election Law and Organizational Law, respecting the will of the people, upholding overcoming the work style of the feudal household head and the work method of running things without consulting others. Party committees and people's organizations can recommend candidates to the voters and guide the masses to regard and measure cadres in accordance with the party's cadre policy, but definitely cannot use administrative orders and other means to force the voters to elect certain individuals, as Concerns choice of persons for leadership teams, we should uphold those who support the party's line, have correct work style and the confidence of the masses, and those who are in their prime and can lead the masses to engage in the four modernizations.

GUANGDONG RESTORES PARTY TRADITIONS, STRENGTHENS FIGHTING POWER

Guangzhou NANFANG RIBAO in Chinese 1 Jul 80 p 1

[Article: "Restore the Party's Excellent Traditions, Strengthen the Party's Fighting Power; For the Past 3 Months Guangdong Province's Party Organizations at All Levels Have Concentrated on the Topic of Strengthening and Improving Party Leadership, Have Carried Out Education Among the Broad Party Membership on the Revised Draft of the Party Constitution and the Guiding Principles With Definite Results"]

[Excerpt] Since April of this year, Guangdong Province party organizations at all levels have started ideological and political education among the party membership on the topic of strengthening and improving party leadership using as the main materials the revised draft of the party constitution and the Guiding Principles with definite results. The party's organizational life has been strengthened, the party's fine traditions are gradually being restored, and the party's fighting power has been greatly strengthened. Now, party organizations at all levels are summarizing experience and resolve to spread party member education even more widely and deeply.

Leadership cadres have taken the lead in studying and giving guidance, and this is an important characteristic of carrying out party member education at this time. In carrying out the education movement, the Guangzhou Municipal Committee leaders took charge, and took charge of leadership, classified responsibility and started classes at all levels. The municipal committee was responsible for training section committees and the leadership cadres of district, county and bureau, and district, county, bureau, company, commune and plant party committees operated training classes for party members of all kinds who belonged to these units. Several important responsible comrades of the municipal committee took the lead in studying basic theory and knowledge of the party and took the lead in giving party classes in district, county and bureau leadership cadre study classes. Leadership comrades from the Shaoguan Municipal Committee individually participated in cadre study classes above the bureau level, and together with the students studied the revised draft of the Party Constitution and the Guiding Principles, together they compared and inspected, helping each other and improving together. Kou Qingyan [1379 1987 1693] of the provincial standing committee participated in the study classes run by the provincial political-legal committee for cadres of office level and above. At the study classes, he was just an ordinary student and ate and slept together with the others, took the lead in discussing knowledge, conscientiously examined the gaps in his own understanding of the party line, direction and policy after the Third Plenary Session of the 11th Party Central Committee, was thorough about the questions in implementation and weaknesses in upholding the principles of collective leadership, and proposed directions for future efforts.

Party committees at all levels conducted an analysis of the situation with regard to party members before they organized study classes for party members and cadres. Because of the disruption and destruction of Lin Biao and the "gang of four," for a long time there has been laxity about party member education, and some old party members are deficient as far as party concepts are concerned, and there are a rather large number of areas of basic party knowledge which new party members who have joined the party since the Great Cultural Revolution do not understand. Thus, when conducting this education, attention is paid to guiding party members paragraph by paragraph to understand the general outline of the draft revision of the party Constitution and the first article of the Guiding Principles. In the rotational study classes run by Foshan City for party members and cadres, party members were led to learn well three special topics: one was that knowing the content and essence of the party's political and ideological line raises the self-consciousness of implementing the party line, direction and policy; second is that knowing the importance of upholding the democratic centralism of the party and observing strictly party law and discipline overcomes fragmentationalism and anarchism, and raises the party's fighting power; third is that strengthening the cultivation of party members and making a Communist Party member who is up to standard. Party members who participated in study compared the revised draft of the party constitution and the Guiding Principles, self-consciously sought gaps and made corrections and strived to make themselves capable of playing a role as model vanguards.

In focusing on the idea of insufficient faith in correcting party style which exists among some party members, party committees at all levels, in holding party member study classes, upheld positive education, summarized experience, both positive and negative, concerning political life within the party, raised high party members' knowledge and strengthened everyone's confidence. Even party training classes run by counties and their subordinate agencies emphasized combining theory and practice to help students get three viewpoints clear: first, historically, for some time our party has had a revolutionary spirit of struggling with incorrect work styles. For example, the rectification of the three styles of the Yan'an period, in 1958 opposed the style of pompous exaggeration, gongchang [0364 3934] style, and blind commandism and throughout won great victories. Second, from the evidence of the past 3 years since the smashing of the "gang of four" one can see that in this regard the Party Central Committee has done a great deal of work, and committees for the inspection of discipline at all levels of the party have dealt severely with cases of violations of the law and discipline. The facts show completely that our party style is fundamentally different from that of the time when Lin Biao and the "gang of four" was running rampant. Third, it can be seen from the Third Plenary Session of the 11th Party Central Committee that the Fifth Plenary Session chose a new Central Standing Committee, and the party's leadership is even more powerful. At the same time, the Fifth Plenary Session also formulated strict party laws and regulations, and if only the leadership and the rank and file are of one mind, make a collective effort, then certainly we can have a good party style and party discipline and improve party fighting power. From looking back at history and summarizing experience both positive and negative within the party, we can further make party members increase their confidence and improve self-consciousness of doing a good job of party style and party discipline. When the Huishan Commune of Huidong County was conducting their rotational training of party members, they emphasized staring with me, starting from now, demanding high standards and strictness of oneself, and not dumping problems on lower levels, but actively launching campaigns of criticism and self-criticism.

TIANJIN FACES PROBLEM OF POPULATION EXPLOSION

Tianjin TIANJIN RIBAO in Chinese 11 Jul 80 p 2

[Article by Wang Zhanguo [3769 2069 2654] of the Tianjin Municipal Planning Committee: "It Is Necessary To Strictly Control the Urban Population"]

[Text] Since the PRC's founding, Tianjin's population has grown too fast. By the end of 1978, the size of the population in Tianjin was 7,394,000, which represents an increase of 3,399,000 over 1949's 3,995,000. This means that Tianjin's average population growth rate was 2.1 percent a year, passing the nation's average mark of 2 percent. By the end of 1979, the number of people who lived in Hedong and Hangu districts was 3,314,000, a net gain of 1,418,000 over 1949's 1,896,000; from the end of 1949 to the end of 1979, the number of people on the outskirts of Tianjin rose from 536,000 to 1,533,000, registering a net gain of 997,000. During the same period, counties under the jurisdiction of Tianjin Muncipality registered an increase of 984,000 in population from 1949's 1,563,000 to 1979's 2,547,000. The population in the downtown Tianjin area was 2,956,000 by the end of 1979, compared with 1.79 million by the end of 1949, indicating a net gain of 1,166,000.

This rate of population increase in Tianjin, which seems to be too high, was reportedly caused by the rapid growth of production, economic prosperity in the urban area of Tianjin, the people's improved standard of living, improvements in medical care, hygiene and sanitation and a drastic decline in the death rate, since Liberation. Other causes for this increase were said to be stemming from Tianjin's failure in the 1960's to undertake the planned parenthood program and to control the population growth. During this period, anarchism led a to a serious baby boom. From 1950 to 1953, an average of 167,600 new babies were born in Tianjin each year; from 1964 to 1979, the new born babies averaged 110,100 a year. Migrations have also been blamed for Tianjin's population explosion. From 1949 to 1979, migrations into Tianjin from other parts of the country exceeded the exodus of local population by 467,000. In 1979 alone, the former exceeded the latter by 139,000.

This population explosion has caused a series of problems for the Tianjin municipal departments in charge of urban development, industrial zoning, and residential housing projects. Today, an average Tianjin resident occupies much less floor space than in the early days of Liberation. Each day, there are approximately 210,000 walkers from their homes to offices within the city limits. City buses are overcrowded with commuters. This reminds us of the urgent need to control Tianjin's population.

It is necessary to strictly control the population in the downtown Tianjin area, which should not be allowed to exceed 3 million. This is really a difficult task to perform. How can we achieve this?

First, our primary task must be to further slow down the birthrate through the implementation of a planned parenthood program under which each couple is encouraged to bear only one child. Further efforts must be made to gradually increase the proportion of families with each raising one child and reduce the number of families each of which wants to bear two children or more. This is the only alternative open for us to cut Tianjin's population, and a fundamental guarantee to maintain the rate to Tianjin's population increase at the present level by the end of this century. In implementing the planned parenthood program, we must back up an ideological education program with an economic incentive measure to commend those couples who limit their family size to one child and punish others who swell their family size to two children or more.

Second, efforts must be made to strictly control migrations into Tianjin Municipality. The past record shows only entries without exodus in the movement of Tianjin's population. This situation should be stopped by all means at our disposal. In order to strictly control migrations into this city, a stringent measure should be adopted to process the mandatory transfer of workers to Tianjin.

Third, in the future, measures must be adopted to ban the building of new factories in the downtown Tianjin area and to move some existing factories and enterprises which pollute the urban environment out of the city. New satellite towns or communities should be built around the metropolitan area in addition to those now under construction in Tanggu, Hangu and Dagang. In the future, all new industrial projects should be located in these towns to be built. Effective measures should be taken to evacuate some residents from the densely populated downtown Tianjin area. A related policy of economic incentives should be adopted to induce residents to move out of there.

AVERAGE LIFE EXPECTANCY PASSES 70 YEARS IN CHINA

Beijing GUANGMING RIBAO in Chinese 11 Jul 80 p 1

[News report: "Life Expectancy Exceeds 70 Years in Most of China"]

[Text] Average life expectancy in most of China has passed the mark of 70 years and has reached the world's advanced levels. According to the incomplete statistics released before Liberation, the average life expectancy in urban and rural China was nearly 40 years. This conclusion was drawn from essays read at the First National Conference of Health Statisticians and Academicians sponsored by the All-China Medical Society.

A total of nearly 50 essays which reflect a marked improvement in the level of China's health statistical work were read at that academic conference recently held in Harbin. Many of these essays resulted from a profound analysis and study of the health conditions of people in urban and rural China. Major subjects of discussion at the conference were how to forecast the future trends of population growth and how to study the health conditions of residents and workers.

Health statistics is a branch of science applying statistical principles and methods to studying the social health conditions and laws governing their changes. Representatives attending the conference also discussed at great length research work to be conducted by the health statisticians in relation to other branches of science. Most of the representatives advocated including medical statistical methods, statistics of the health conditions of residents, and of health institutes in the branch of health statistics. In addition to urging the medical researchers to attach importance to the statistical work, they suggested that conscientious efforts be made by departments concerned with statistical work to carry out the State Council's decision on strengthening the statistical work, and increasing the number of statisticians and on widely disseminating health statistical knowledge among the people.

The conference concluded by adopting a resolution to establish a health statistical group under the All-China Medical Society.

ERROR OF NOT HIRING MOSLEM WORKERS CORRECTED

Beijing MINZU TUANJIE [NATIONALITY UNITY] in Chinese No 1,15 Jul 80 pp 38-39

[Report by Ma Zhenkun [7456 2182 0981] and Yin Guangen [1438 1684 1869]: "North China Oil Field Corrects Error of Not Hiring Moslems During Worker Recruitment"]

[Text] Editor's Note: With the assistance of concerned departments of Hebei Province, North China Oil Field corrected in time the error of not hiring Moslems during its worker recruitment; this solemn and serious attitude of knowing one's mistake and rectifying it immediately is commendable.

Today, practices of discriminating against minority nationalities or violating the Party's nationality policy in student recruitment, worker recruitment, cadre promotion, admission into the army and work of the like still occur from time to time, and some cases have even been rather serious. Will it be possible for leaders of these localities or departments to adopt effective measures and make quick corrections just like the North China Oil Field? We hope that this report can serve the purpose of enlightening them. We think this is a question which touches on nationality equality and nationality unity. So long as we perceive fully the urgency and importance of this question, many problems are not difficult to solve.

From October to December 1979, survey and exploration department No 6 of North China Oil Field dispatched a worker recruitment team to Bozhen township, Jiaohe County, Hebei Province to recruit workers. The target for worker recruitment this time was 160 men, and the qualifications for candidates were that they must have a junior middle school cultural level, good health, and be of 17-25 years in age. At the time, there were altogether 330 youths registered for employment in the whole township; among them 84 were Moslems, and after examination 33 of these Moslems were found to be qualified. Just as these Moslems were about to go through the procedures and start out toward their working posts, the worker recruitment team suddenly threw in a monkey wrench by declaring that the oil field work was located in the wilderness, where conditions were hard and there were no cooking facilities for Moslems; hence Moslems were not going to be hired.

Although local departments concerned expressed pertinent opinions and negotiated with them, the worker recruitment team simply ignored the Party's nationality policy and persisted in refusing the Moslems. In the name of home visits and adopting means of fault-finding and deception, members of the worker recruitment team also went to the concerned streets to pass on the word: "Life at the oil field is hard, and there is no way to take care of Moslems; if they want to go, they must eat in the same way as the Hans do...," etc. After this kind of propagandizing on their part, heads of more than 20 households indicated that their candidates would no longer wish to go. Some said: "In any case, we cannot change our living habits just for the sake of going to the oil field to work." In the case of some who still pleaded repeatedly to go to the oil field to work, the worker recruitment team demanded that each of them must sign a presentable "guarantee" to pledge that "after his arrival in the unit he is going to renege on his Moslem habits and make sure to eat from the same pot as the Hans." In the case of 19 Moslem youths who failed to sign any "guarantee," the team simply openly left them outside of the worker recruitment operation, thereby depriving them of their right to participate in the oil field construction.

After this question became known, strong dissatisfaction was aroused among the local Moslem people. For this reason, the nationality committees of Cangzhou Region and Jiaohe County organized a joint work team and went to Bozhen township to conduct the investigation; an investigation report was also submitted to the provincial nationality committee. When North China Oil Field received the investigation report transmitted to them by the province and also the comments by leading comrades of the provincial party committee, the core group of the Party there immediately convened a meeting to study the matter and thereby decided that the deputy commander in charge of personnel work, Comrade Mao Huahe [3029 5478 7729], should preside and establish a special group to take the responsibility of disposing of the question. After it was found to be true through forum discussion and visits, they attempted neither to shift their responsibility, nor to drag their feet, but immediately adopted decisive measures to solve the question and rectify the situation.

First of all, they proceeded to criticize and educate the personnel of the Bozhen township worker recruitment team, pointing out that their approach violated both worker recruitment policy and nationality policy, encroached upon the equal right of minority nationalities, and sabotaged nationality unity. On the basis of elevating their ideological enlightenment, comrades involved all consciously examined their errors and sincerely accepted relevant criticism. Meanwhile, the commanding headquarters also charged survey and exploration department No 6 with the responsibility of submitting a written self-examination report. In the case of Moslem staff and workers already recruited, they were asked to respect and take care of them as regards their living habits; and all those who were not given the Moslem food subsidies must now be given such make-up amounts according to specifications by the superior level.

Secondly, a four-man group headed by Fan Peilie [2868 1014 3525], deputy director of the production office at the oil field's joint battle commanding headquarters, and Comrade Mai Feng [7769 1496], deputy director of the political department, took a special trip to Bozhen township together with the nationality committee of the Cangzhou Region and held a Moslem representatives forum particpated in by more than 40 people there. At the forum, people on the side of the oil field examined their errors in violating the nationality policy during the worker recruitment and tendered their apology to the Moslem people. All the "guarantees" submitted were returned to their original signatories. Responsible people of Bozhen township also made statements in praise of the conduct on the part of the oil field in learning about and correcting their errors. This made the forum a forum of unity.

In order to win people's confidence, the matter was submitted to the provincial planning commission for approval so that, in the case of the 19 Moslem youths not hired, reviews were carried out respectively. Except in the case of one who was already married and hence unqualified, and who also no longer wished to go elsewhere, all the rest (18) were now hired and they have now already taken up their posts.

Thirdly, seizing this typical example, the oil fied seriously organized the cadres to study the party's nationality policy. In the division-level cadres meeting and basic-level party branch secretaries training class respectively convened, and taking the errors in the worker recruitment as example, the oil field required leading cadres at all levels to take the lead in carrying out the nationality policy and in preventing strictly any recurrence of similar problems. At the same time, they also printed and distributed propaganda outlines concerning the nationality policy, and organized cadres and workers to study and widely propagate them. In order to absorb the relevant lessons, the North China Oil Field's joint battle commanding headquarters wrote an "Examination Report Concerning the Situation of Our Headquarters' Violation of Nationality Policy During Worker Recruitment at Bozhen Township, Jiaohe County" and submitted it to the Petroleum Ministry and the provincial People's Government respectively.

The fact that North China Oil Field learned about and corrected its errors and disposed in time the question of its violation of the nationality policy during worker recruitment aroused vigorous reaction among the minority nationalities and greatly heartened people in general. The mother of new Moslem worker Yang Ruichen [2799 3843 5256], the elderly matron Wang Zhongyun [3769 0022 0061], was deeply moved and said: "In the old society and when the 'gang of four' swashbuckled across the country, we Moslems could hardly express our resentments or raise our heads. Today, because of our efforts to solve our children's employment problems, leaders at the provincial, regional, county and township levels are all prompted to come here personally to proffer the solution, and leaders of the oil field, in particular, even come to our door to extend their apologies; this is all because Chairman Hua of the Party Central Committee has led the country well and because of the superiority of socialism. We must educate our children to devote their strength actively to petroleum exploitation in return for the party's care of the Moslem people."

RICHES OF MINORITY AREAS DESCRIBED

Beijing MINZU TUANJIE [NATIONALITY UNITY] in Chinese No 5, 15 May 80 p 12

[Article by Yang Mu [5017 2606]: "The Abundant Resources and Vast Territory of Our Country's Minority Nationality Areas"]

[Text] Although the population of our country's minority nationalities make up only 6 per cent of the country's total population, the areas of their distribution make up 50-60 percent of the country's total area. Speaking from the point of view of the four modernizations work, the contribution that can be made by the minority nationality areas to the motherland will become increasingly great. People often say: the minority nationality areas urgently need the four modernizations, and the country's four modernizations work absolutely cannot be accomplished without the minority nationality areas; these are by no means empty words, indeed.

The nationality areas have rich water resources; the famous Changjiang River, Yellow River, and Pearl River, and Heilong River, Songhua River, Tarim River, Yalucangbo River, Lu River, Yu River and Ili River, etc., all originate or flow through minority nationality areas. Many famous lakes such as the Qinghai Lake, Lobu Lake, Hulunbir Lake, Namu Lake and Erhhai Lake, etc., are also scattered in the nationality areas. The areas of fresh waters in various autonomous regions and various provincial nationality autonomous districts total more than 46 million MU; deposits of water resources total more than 300 million DU. Power generation capacity in 1978 was more than 17 billion kilowatt-hours, and its utilization rate was about 2 percent.

Nationality autonomous districts have vast and fertile fields. Land areas already planted amount to roughly 300 million MU, and more than 700 million MU of virgin land can still be reclaimed. Some places are important bases of our food crops, such as the Yellow River Loop plain in Inner Mongolia and Ningxia. Among the food crops of these nationality autonomous districts are rice, wheat, rye, soybean, etc.; their yearly yield has already reached more than 30 billion JIN. These places also grow plenty of economic crops; for instance, in 1978 the annual production of cotton amounted to 1.19 million DAN, and the long-wadding variety of cotton is grown mainly in

Xinjiang. Yearly production of sugar cane amounts to more than 100 million DAN, providing more than 360,000 tons of sugar for the state. Besides, the varieties of fruit are numerous; among them are plenty of organes, bananas, pineapples, cocoanuts, apples, pears, grapes, and Hami watermelon.

The nationality areas have large tracts of thick forests totaling more than 45 million hectares and making up 37 percent of the country's forest area; their water-holding capacity amounts to 4.3 billion cubic meters, making up 49.7 percent of the country's total capacity. Over the years, lumber production has been increasing by large margins, with that of 1978 amounting to more than 12 million cubic meters. There are also large tracts of economic forests such as rubber, oil camellia, tong, walnut, etc.

Our country's five major pastoral areas are all located in the minority nationaltiy areas. Total heads of cattle (large animals) in 1978 amounted to more than 166 million, of which there were more than 29 million cows, more than 4.9 million horses, 680,000 mules, 970,000 donkeys, more than 530,000 camels, more than 32 million pigs, and more than 95 million goats. In the same year, the state purchased more than 7.5 million fattened pigs, more than 600,000 vegetable-eating cows, more than 5.2 million vegetable-eating goats, more than 2.1 million cow hides, more than 1.1 million goat hides, and more than 107.9 million JIN of wool. Vegetable-eating goats sold to the state by Xinjiang alone numbered more than 1.79 million, and those by Inner Mongolia, more than 1.39 million. Precious birds and rare animals also abound; the panda bears, Asiatic elephants, dotted deer, Northeastern tigers, golden-haired monkeys, etc., which are known all over the world, are mostly products of the minority nationality areas.

Mineral resources of the nationality areas are even more abundant; their varieties are diverse, their grades rank high, and they have long been well known domestically and internationally. Among those already surveyed today, there are more than 8.4 billion tons of iron ore deposits, more than 41.8 billion tons of coal deposits, and more than 500 million tons of petroleum deposits. In 1978, steel production amounted to more than 1 million tons; coal, more than 60 million tons; and crude oil, more than 5.7 million tons. Nei Monggal has sufficient iron ore deposits. The jasper-iron [4258 4294 6897 4349] mine in Guangdong's Nanhai district is our largest rich iron base today. Oil fields in Guangxi's Baise, Ningxia's Majiatan and Qinghai's Caidamu are all very well known. In 1978, Xinjiang's crude oil production alone amounted to more than 3.5 million tons. Tibet's earth heat resources are already being utilized. There is a complete array of non-ferrous and rare metals with an exploitation value; for example, Guangxi has plenty of tin and its deposits rank first in the whole country, and its bauxite also holds an important position. The Gejiu Municipality in the Hani-Yi nationality autonomous zhou of Honghe, Yunnan has always been called "the tin capital." Resources of mercury in southeastern Guizhou and western Hunan and gold in Xinjiang's Altay are relatively abundant. The deposits of Tibetan copper are plentiful. Mineral deposits such as Inner Mongolia's aluminum, zinc and copper occupy an important position in North China.

Bayan Obo's iron ores also contain rare earth elements; the deposits there rank first in the whole country. As for non-metal mineral resources, Xinjiang's mica, Ningxia's gypsum, Inner Mongolia's alkaloid, iron-alum ores and phosphorous ores, and Tibet's tin calconite all hold important ranks in the country. Apart from these, Yunnan's marble and Liaoning's cavern jade are all sold far away within and without the country.

In a word, our minority nationality areas accommodate a vast territory and diverse products, and hold abundant resources; they constitute an important material foundation for the state to realize its four modernizations. Further exploitation and utilization of these resources are playing a gigantic role in the acceleration of the process of the country's socialist modernization, in the improvement and elevation of the material and cultural life of the country's various nationalities, and in the development and flowering of the economy in the minority nationality areas.

EUGENICS MOVEMENT GAINS MOMENTUM IN CHINA

Beijing GUANGMING RIBAO in Chinese 29 Aug 80 p 4

[Article by Ruan Fangfu [7086 5364 6346]: "Promote Eugenics"]

[Text] Eugenics is not a new branch of science. The eugenics movement was founded in 1883, or nearly a century ago, by Britain's outstanding scientist Sir Francis Galton under the influence of his cousin Charles Darwin's great book "On the Origin of Species by Means of Natural Selection." In this way, he laid the groundwork for this branch of science.

Frankly speaking, why should we promote eugenics today?

The primary reason is that eugenics is a branch of science aimed at improving the human race. Its primary objective is to limit and eliminate the propagation of human breeds judged to have serious hereditary diseases. Another objective is to promote the development of a superior human race by means of mating physically healthy and highly intelligent individuals. The former is called the "negative aspect of eugenics," and the latter the "positive aspect of eugenics." On the negative side of the eugenics movement is a measure to discourage marriage between males and females related by blood, for fear of producing mentally and physically defective children and hence heavy economic burdens on their families and society. Since we have tried to produce fine species of animals and plants by crossbreeding, why can't we promote eugenics with the aim of improving the human breed?

Biological experiments conducted over 10 or 20 years revealed 3,000 or more hereditary diseases, concluding that the genes have undergone changes as a result of the nuclear fallout that has taken place in the postwar period. It can be said that the modern science of medicine has progressed to the point where it can help a child with hereditary disease live until the age of puberty. For this reason, negative eugenic measures should be developed and put into effect to deal with cases of this nature. Today, new ways have been devised to effectively control hereditary and congenital diseases. Among them are "counseling about potential hereditary defects" and prenatal diagnosis." Through "counseling about potential hereditary defects," which includes investigations of families, chromosome tests, and statistical analysis, scientists can guide individuals so as to avoid the propagation of hereditary diseases. "Prenatal diagnosis," or "diagnosis before the birth of a baby" or "diagnosis of the developing child in the mother's womb," is aimed at determining whether the fetus in the mother's womb is male or female, whether its growth is normal, and whether there are any symptoms or manifestations of hereditary or congenital diseases in this child. Through testing, decisions can be made as to whether to let the pregnancy continue or induce an abortion by artificial means. Techniques for prenatal diagnosis include tests of the mother's blood and urine, which will determine whether her baby has contracted hemophilia or albinism; direct observation of the baby in the womb by means of radiation screening and supersonic beam scanning, and by the application of the "fetus mirror" (a kind of optical fiberglass); and laboratory analysis of chromosomes taken from the bag of waters in the womb. Thus far, over 40 structural defects and physical deformities such as babies without a brain and babies with protruding tongue and cracked spine have been discovered as a result of prenatal diagnosis. Other biological laboratory experiments that have been conducted in foreign countries with the aim of improving the human race include the preservation of human sperm and eggs at frozen temperatures, artificial insemination, fetus transplantation, incubation of the fetus in the tubes, and other forms of genetic engineering.

Promoting eugenics also has a significant effect on China's efforts to control its population. We have shifted the focus of the planned parenthood program to persuade each couple to bear only one child. This shift requires us to pay attention to the qualities of population and the health condition of every newborn infant in our country.

Biological experimentation with the aim of improving the human race in our country remains in the infant stage of development. Comprehensive laws governing the study of hereditary characteristics remain to be enacted. Also lacking are programs to systematically and extensively educate the people in eugenics. For the time being, eugenic counseling and prenatal diagnosis are being provided only on a small scale in a few major cities in China, and therefore these services still fall far short of the people's demands. Vigorous efforts must be made to expand these services. Eugenics was a subject of discussion at a forum held in Nanking recently. The forum was attended by medical doctors and specialists, professors, and students of the national prenatal diagnosis study class from 16 provinces. Participants in the forum pointed out" Eugenics is a branch of science which covers a wide range of subjects, including medical science, law, moral beliefs, traditional customs and habits, and family structure. In other words, the study of hereditary characteristics with the aim of improving the human species must be expanded to include sociology, codes of ethics, education, obstetrics, pediatrics, psychiatry, embryology, studies in deformities, and many other related branches of science. To brighten the future of our nation, our entire society must attach importance to eugenics as a subject of study.

REFORM OF HIGHER EDUCATION SYSTEM URGED

Junior Colleges Suggested

Guangzhou NANFANG RIBAO in Chinese 11 Aug 80 p 2

[Article by NANFANG RIBAO correspondent: "Broaden the Avenue of Education Train Personnel to the Maximum"]

[Text] It appears that our present 4-year system of higher education in Guangdong Province is too inflexible and too obsolete to be able to meet the needs of the four modernizations. For this reason, efforts must be made quickly to broaden the avenue of education and to train personnel in various ways. At present, the institutions of higher education must consider it absolutely necessary to develop short-term training programs and correspondence education, and to enroll students who do not live on the campus. This statement was made by professor Luo Xiongcai [5012 7160 2088], assistant dean of the Huanan Institute of Technology, and professors Zhu Fuxi [2612 4395 3556], Wang Mengzhong [3769 1322 6945], and Ceng Jinyi [2582 6602 5030] of the Huanan Institute of Technology and the Huanan Normal College in a recent interview with NANFANG RIBAO's correspondent. They also hoped that the leading organs and leading comrades in charge of higher education will pay attention to this matter.

Generally speaking, there are three different systems of higher education adopted by western countries, as follows:

First, 4-year formal university education offering post-graduation courses which is comparable to education provided by China's major universities mainly concerned with the training of creative scholars and researchers; second, colleges concerned with the specialized training in a general way, which are comparable to our regular 4-year colleges; third, 2-year junior colleges mainly aimed at training technical workers. These professors said: we are in urgent and great need of the aforementioned third category of personnel or junior college graduates who can play a great role in production. More of such short-term colleges should be built in order to provide the quickest solution to the current shortage of technical workers in our country. During the last few years, the world's developed countries have owed their fast progress in the economic field, in science and technology to the successful training of the aforementioned first and third categories of personnel. In the United States, junior colleges account for almost half of the total number of the institutions of higher learning; in Japan, 2-year education has also been greatly emphasized. The three professors considered it not only absolutely necessary but also advisable to build more 2-year short-term colleges in our country while calling on our colleges to do a good job of training the first and second categories of personnel.

Professor Zhu Fuxi said: in the early 1950's, to meet the urgent needs of our First Five-Year Plan for technical workers, the Huanan College of Technology provided 2-year training in civil engineering with emphasis on surveying, industrial and residential construction, and arcitectural structures for industry and homes. The civil engineering department of the Huanan College of Technology succeeded in training over 200 students in 2 years with the same size of cadres and faculty members it had always had. These graduates later formed the backbone of a technical force serving various construction units. Given its present manpower and material resources and with support to be provided by capital construction units, the institutions of higher learning in Guangdong undoubtedly can train similar students in the future. Professor Zhu Fuxi suggested that a comprehensive 2-year junior college be established in Guangdong in the near future as the best answer to the current shortage of needed technical workers.

Professors Luo Xiongcai, Wang Mengzhong, and Ceng Jinyi said unanimously: the institutions of higher learning in Guangdong should pool their resources in offering youths correspondence courses and in enrolling students who do not live on the campus. During the past 3 years or more, following the downfall of the "gang of four," the Huanan Normal College has graduated over 3,000 students who took correspondence courses as compared with 2,900 graduates who lived on the campus. These graduates who took correspondence courses have ever since played an active role in economic construction and on the educational front. With the exception of the Huanan Normal College, correspondence education has yet to be resumed in other colleges. Two years ago, some colleges admitted some students who did not live on the campus. But these students are now required to live on the campus because our leading organs have failed to offer aid in solving their transportation and lunch problems.

The three professors said: an assessment of the present status of the institutions of higher learning in Guandong and their long experiences in education have led them to believe that the prospect of opening many other types of colleges (including evening and spare-time colleges and colleges which charge tuition) in Guangdong Province is bright. But to tap this potential, efforts must be made to resolve a series of problems. For example, the contingent of teachers must be reasonably reorganized in order to put them to good use. Further efforts must be made to implement the policy toward the intellectuals, and to uphold the principles of to each according to his work, and of more pay for more work done by teachers in order to encourage them to work harder than ever. Plans must be adopted to mobilize all social forces and to rally them behind a common endeavor to broaden the avenue of education and to help both schools and students solve their transportation and lunch problems. More important, authorities concerned with education must seriously consider solving the problems of placement of students following their graduation from colleges and how much they should be paid once employed.

Train More Personnel

Guangzhou NANFANG RIBAO in Chinese 11 Aug 80 p 2

[Article by NANFANG RIBAO correspondnet: "Institutions of Higher Learning Are Urged To Pool Resources To Train More Personnel"]

[Text] Chinese language professors Wu Hongcong [0207 1347 5115] and Pan Yunzhong [3382 0336 0022], and philosphy professor Ding Baolan [0002 1405 5695] of the Zhongshan University unanimously urged the insitutions of higher learning to tap and pool their resources to broaden the avenue of education and to develop education in many ways in order to train more personnel to serve the needs of the four modernizations.

In an interview with NANFANG RIBAO correspondent, these professors said: the system of higher education must be revitalized and the avenue of education must be further broadened to serve the needs of the four modernizations and the public interest. At present, institutions of higher learning in Guangdong Province must tap their potentials for broadening the avenue of education. For example, the Zhongshan University now has 1,300 teachers and nearly 5,000 students, a figure which means that its approximate ratio of teachers to students is 1 to 4 compared with its ratio of 1 to 6 during the Great Cultural Revolution, and the ratio of 1 to 10 or more in foreign colleges and universities. Furthermore, its classrooms are used only 3 to 4 hours a day and therefore, reasonable arrangments can be made to increase their utilization to the maximum. The three professors recommended three measures to broaden the avenue of education as follows:

First, quick efforts should be made to improve the quality of teachers and bring their role into full play in education. At present, effective measures must be taken to accelerate the training of teachers who are still incapable of giving classroom lectures and who thus far account for a considerable percentage of college faculty members. Training them to be fully qualified teachers is a key to success in broadening the avenue of education. In this connection, professor Pan Yunzhong said: college teachers should be encouraged to participate in the on-the-job training program on a rotational basis with pay, just as college graduates or professional workers are allowed to take leave of their jobs to receive advanced training. At the same time, qualified teachers should be encouraged to teach as many classes as possible. Nevertheless, many of them have been unwilling to do so because they could receive no extra pay for extra jobs done. It must be noted that many middle-aged teachers overloaded with teaching assignments have found themselves unable to make ends meet with their present incomes. As long as problems of thisnature remain unsolved, the prospect of education will not be encouraging. In 1956, thanks to the efforts of some retired professors, hundreds of students graduated from the Evening College of Literature and

History jointly sponsored by the Guangdong Provincial Committee of the Chinese People's Political Consultative Conference and the Guangdong Provincial Historical Museum. Today, it seems that no difficulties are expected in opening some evening colleges, especially those offering courses in literature and art, because we can count on the support of both active and retired professors in carrying out such training programs. In Guangzhou, there are many retired but capable experts or professors who are deeply concerned with the education of the younger generation. If well organized, they will form a contingent of experienced teachers to alleviate the shortage of teachers for the proposed evening colleges.

Second, socialization of the logistic support for college education is necessary. At present, all full-time colleges and universities in our country have considered it necessary to "monopolize" every student activity on the campus. As the policy now stands, they provide students with not only room and board but also medical care. As a result, a huge contingent of logistic supporters like a "small society within a larger community" has emerged in each college, thus deviating the attention of its leadership away from the more urgent business of broadening the avenue of education. In foreign countries, room and board students account for only a small percentage of student population in every college, and the remainder are students who are bused from their homes to schools every day. Before Liberation, many college students were walkers from their homes to schools in China. Since Liberation, college students have been required to live on the campus. Enormous efforts must be made to change this regulation, which has been in force for 30 years. Some ways must be found to resolve the problems that block the implementation of the plan to broaden the avenue of higher education. For example, colleges can cooperate with urban development and housing administration departments in building dormitories for students on a contract basis in the neighborhood of the colleges; students who cannot live on the campus may feel free to rent these dormitories; the mess halls on the campus should become part of the business operated by the state or commercial enterprises of collective ownership, as has been the case of groceries and candy shops on the campus.

Third, it is necessary to reform the educational structure and the cadre system simultaneously. The reform in the cadre system must be accompanied by a measure to ward degrees and jobs to cadres who have achieved successes through self-education and who have proven their academic achievements comparable to college graduates as a result of examinations. The contingent of cadres usually can be reinforced by drawing fresh blood from among college and middle vocational school graduates under the unified cadre recruiting program. In addition, the personnel employment units should also be authorized to recruit cadres from society. Only in this way can all well-educated people enjoy equal opportunity of employment and all educational systems will flourish in our socialist society.

FBIS FOREIGN BROADCAST INFORMATION SERVICE

NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22161. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Indexes to this report (by keyword, author, personal names, title and series) are available from Bell & Howell, Old Mansfield Road, Wooster, Ohio 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

LUSAKA CONFERENCE CRITICIZES USSR, SRV

OW060121 Beijing XINHUA in English 0102 GMT 6 Oct 80

[Text] Lusaka, October 5 (XINHUA)--The Soviet aggression against Afghanistan and the Vietnamese invasion of Kampuchea were condemned at the 26th Conference of Commonwealth Parliamentary Association (CPA) which ended here yesterday, according to a press release.

The conference, officially opened by Zambian President Kaunda on September 27, was attended by 148 speakers or parliamentarians from 44 countries and regions. "Current threats to international peace and security" and other subjects were debated at the conference.

Speaking as the Southeast Asia regional representative, Lau Teik Soon, MP of Singapore, said "In both cases (Afghanistan and Kampuchea) the aggressors invaded a country, installed a puppet regime and established a large military presence to consolidate its occupation of the country."

"All governments who believe in peace should continue to oppose the new imperialism of the Soviet Union and Vietnam and refuse to recognise the puppet regimes of Karmal and Heng," he stressed.

He pointed out that to seek just and peaceful solutions to the Afghan and Kampuchean problems, "the withdrawal of aggressors" and "the exercise of the right to self-determination by the Afghans and Kampucheans" must be effected.

Malaysian MP Liong Sik Ling said Afghanistan and Kampuchea were "clear examples of foreign intervention in the internal affairs of another." Noting that Malaysia recognised the government of Democratic Kampuchea, he said to do otherwise "would be supporting a regime sustained by a massive foreign military presence." "There is no stability and no popularity of the puppet regime of Heng Samrin," he stressed.

C.S. Chan, MP of Singapore, said Singapore as a small country having an abiding interest in the maintenance of world peace, would not remain mute in face of open Soviet and Vietnamese aggression against small nations.

Australian MP and leader of the Australian delegation J. Corbett said that the strong worldwide condemnation of the Soviet invasion of Afghanistan was supported by the fact that so many Afghans were "making tremendous efforts against overwhelming odds for so long to resist this invasion."

M. Mtine of Zambia said, "We are threatened by the tension and arms race between the two superpowers who claim to be the world policemen." "Lacking reliable allies in the wealthy Gulf area, the Soviet Union suggested to invade Afghanistan," he noted.

Delegates also condemned the South African racist regime for the recent killings of innocent demonstrators and the wanton raids on Zambia and Angola as well as the creation of Bantustans.

Other subjects discussed at the conference included transference of technology from the developed to the developing countries, control of drug trade and race relations in Commonwealth countries.

The next conference will be held in Fiji in 1981, it was decided.

POLISH OFFICIAL URGES MINERS TO CEASE STRIKE ACTION

OW040751 Beijing XINHUA in English 0717 GMT 4 Oct 80

[Text] Warsaw, October 3 (XINHUA)--Jozef Pinkowski, chairman of the Council of Ministers of Poland, called on the coal miners to understand the country's difficulties and not stage any more strikes, because such action, "would aggravate the situation."

He issued the call yesterday during a meeting with coal miners from Katowice, after stating that coal output was four million tons below the target and that it might be 8-10 million tons below by the end of the year.

Over the past few years, the country's pace of industrial development has been markedly on the down grade, and coal mining was the only sector which was able to fulfil its planned targets. The strikes in August seriously affected Poland's biggest national economic sector.

Premier Pinkowski described the domestic political and economic situation as extremely serious and difficult. He claimed that the root cause of this situation was not in the system itself, but in its distortion, and said there were some dishonest persons in the country and the government "put forward unsuccessful ideas and made mistakes." For example, failure to pay enough attention to agricultural development, borrowing too much money from foreign countries, overextended capital construction projects, improper investment structure, ignoring the need to strike an overall balance in planning and so forth.

He said that "the government, the economic leadership at central level, and those who had the final say on the development policies and financial aspect" should bear responsibility for those mistakes.

The premier said that the government was now basing its efforts on three issues: to guarantee the materialization of the agreements reached with the strikers; to grasp production and put the economy back to normal; and to formulate a long-term program for the country's development.

CSO: 4020

POLISH WORKERS STAGE WARNING STRIKE

OW040123 Beijing XINHUA in English 0104 GMT 4 Oct 80

[Text] Warsaw, October 3 (XINHUA)--Polish workers today held a one-hour nationwide warning strike from 12:00 to 13:00 (Warsaw time) demanding that the government fulfill the agreement reached with the workers on schedule.

In Gdansk, a strike announcement at the headquarters of the Independent and Self-Governing Trade Union said the workers want the government to fulfill as scheduled its promises to increase wages, give workers the freedom to set up independent and self-governing trade unions, and give them access to mass media. In the streets leading trade unionists distributed leaflets bearing the slogan "Sympathy today, success tomorrow." Public transport and large stores came to a stop. Strike notices and national flags, symbol of national solidarity during the August movement, were visible everywhere. More policemen patrolled the streets to keep order.

In Warsaw, workers in the Ursus tractor plant, the Zeran automobile plant, the Warsaw steelworks and other large-scale enterprises downed tools. Buses ground to a halt and a number of shops closed. University students declared their support for the strike.

In Poznan, Lodz and other regions, plant workers, shop employees and drivers also went on strike.

On 13:00 sharp, all sirens blew in unison to declare the end of the walk-out and the return of normal life.

The warning strike today was called by the Independent and Self-Governing Trade Union headquartered in Gdansk. On the eve of the strike, Polish Deputy Prime Minister Mieczyslaw Jagielski had held talks with Lech Walesa, chairman of the consultative committee of the union. But the two sides failed to reach any agreement.

Observers here noted that the strike was a symbolic action taken by the new trade union to demonstrate the strength and sense of organization and discipline of the Polish workers.

CSO: 4020

'XINHUA' CITES REACTION AT UN GENERAL ASSEMBLY AGAINST SOUTH AFRICA

OW080758 Beijing XINHUA in English 0742 GMT 8 Oct 80

[Text] United Nations, October 7 (XINHUA)--The South African racist regime and its policy of racism and apartheid has been under vehement condemnation by the overwhelming majority of countries during the debate of the General Assembly over the past fortnight. The African states have been particularly vociferous in their condemnation.

The speakers have firmly supported the liberation struggle of the peoples of Namibia and South Africa and endorsed the United Nations' efforts for the independence of Namibia.

Wilson M. Chakulya, Zambian foreign minister, stated that "the illegal South African regime has intensified its manoeuvres aimed at the consolidation of a puppet regime in Namibia." He declared that South Africa has stepped up its unprovoked acts of aggression against independent African states of Angola and Zambia.

He also drew attention to the fact that the implementation of the United Nations plan in respect to Namibia had not yet begun, saying that the delay was directly due to the negative attitude of South Africa.

He pointed out that the situation in Namibia was but an extension of the apartheid system in South Africa itself.

Siaka Stevens, president of the Republic of Sierra Leone, speaking as chairman of the Organization of African Unity (OAU), stated "Far from withdrawing from Namibia the regime of South Africa has resorted to tricks and manoeuvres, designed to entrench itself deeper in territory to which it has not the slightest legal right."

He noted that "the efforts of the United Nations to achieve a negotiated settlement has led to nothing but frustration because of the chicanery and delaying tactics of South Africa." He hoped that further negotiations would speedily be held and result in success.

The president went on to say, in South Africa itself apartheid remains the cornerstone of the racist regime's policy, and declared that OAU expressed its total commitment to the struggle against apartheid. He said, "We intend to press strongly for total economic sanctions, including an oil embargo."

Simon Muzenda, deputy prime minister and minister for foreign affairs of Zimbabwe, said that Zimbabwe would vigorously fight to end apartheid within the framework of the OAU, adding "We pledge our assistance to the legitimate liberation movements of South Africa in their just struggle to end apartheid and create a non-racial society in that troubled country."

He stressed, "We salute the efforts of SWAPO, the authentic representative of the Namibian people, to liberate Namibia and we pledge our militant solidarity with the people of Namibia."

Tanzanian Foreign Minister Benjamin W. Mkapa reiterated Tanzania's continued support to the armed liberation struggle waged by SWAPO.

Lesotho Foreign Minister Charles Dube Moalpo said that South Africa continued to constitute another major area of world tension and stated that Lesotho registered its support for the struggle of the Namibian people for freedom.

'XINHUA' VIEWS CELEBRATION OF VANUATU'S INDEPENDENCE

OW070750 Beijing XINHUA in English 0724 GMT 7 Oct 80

[Text] Port Vila, October 6 (XINHUA correspondent)--Today is a day of jubilation for the Vanuatu people, who are warmly celebrating the first constitutional day since they achieved independence on July 30 this year.

National flags were fluttering over government buildings, shops and banks. The tropical landscape looks more beautiful after rain. In the early morning, people, young and old, started to gather in front of the government office building. A few have their shirts printed with the national flag or the words "Vanuatu independence." This is their pride, no more will be the name "New Hebrides," given by the socalled "discoverer" British Captain James Cook in 1774.

A guard of honour in new white-top black-trousers uniform stood at attention, with rifles in hands. At 8 a.m. sharp, President of the Republic George Sokomanu, Prime Minister Walter Hadye Lini, government ministers, representative assembly members and the diplomatic corps mounted the rostrum, followed by the singing of the national anthem by a group of girls in red blouses and white skirts.

In his remarks at the ceremony, President Sokomanu briefly reviewed the hard-won struggle against colonial rule, as early as the Rongofuro disturbance in 1914. Amidst warm applause the president designated the government office square "the constitutional place."

Prime Minister Lini stressed the importance of the constitution, which ended the 74 years' colonial condominium by Britain and France.

What makes the Vanuatu people particularly happy is the quick and smooth solution of the rebellion in the country's biggest island Espiritu Santo started by separatist Jimmy Stevens and supported by French-speaking land owners.

In an interview at the Presidential House later today with a group of foreign journalists including this correspondent, President said Stevens and a handful of his followers have been arrested and put in jail, waiting for trial later this month. He called for national unity to build the country.

In his interview given after the ceremony, Prime Minister Lini noted that his government is working on a ten-year economic development program to realize economic independence and self-sufficiency. In foreign relations, he said, Vanuatu will have stronger links and cooperation with Asian countries, those of the South Pacific in particular. "We need a lot of hard work to get the country economically viable," he said.

The newly-independent country, Vanuatu, is situated in the south-western Pacific Ocean and has a population of some 112,000. It is rich in coconut, with a production of 49,000 tons of copra last year. Other resources for exports are beef, fish, cocoa, timber and manganese.

BRITISH LABOR PARTY ENDS ANNUAL CONFERENCE

OW031614 Beijing XINHUA in English 1600 GMT 3 Oct 80

[Text] Blackpool, Britain, October 3 (XINHUA)--Britain's opposition Labour Party ended its five-day annual conference here today.

The conference was featured by a bitter debate within the party over the reform of its constitution and policies on the EEC and defence.

After a series of heated arguments inside and outside the conference, it adopted a resolution that the party leader would be elected by the party as a whole, not by members of the Labour parliamentary group as before. Another resolution passed holds that every sitting Labour member of Parliament should seek re-selection as a candidate at his constituency party committee before fighting a general election. Up to now, all MPs have been automatically renominated before each general election.

The annual conference also approved a resolution demanding Britain's withdrawal from the European Economic Community (the EEC) and a resolution asking for Britain's unilateral nuclear disarmament.

The conference also strongly attacked the current conservative government for its economic and social policies.

Many papers here held that the annual conference showed that the struggle for power between the left-wing and moderate-wing within the party has escalated.

The Labour Party is one of Britain's two largest parties, which has over seven million members and has strong support from the trade union. The Labour Party lost the general election last year.

INTERNATIONAL AFFAIRS

STRIKE IN IRELAND CAUSING FUEL SHORTAGE

OW070742 Beijing XINHUA in English 0718 GMT 7 Oct 80

[Text] London, October 6 (XINHUA)--Troops have been brought in to deliver petrol in Ireland to replace the striking tank drivers so as to ease the fuel crisis caused by their four-week long unofficial strike, according to reports from Dublin.

The strike was triggered off by an industrial dispute with the employers of an oil company who delayed talks with the tank drivers over a new productivity deal. The strike has brought about a severe petrol shortage throughout the country, with the capital worst hit. Because of the oil supply suspension, a number of filling stations have to close down. And some factories have to reduce working hours.

As many as 1,000 tanker drivers are now on strike. They put forward a number of demands including a pay increase of about 40 per cent, a shorter working week and an increase in shift premium.

Recent reports indicated that army operation has so far been successful and, as a result, oil supply has returned to normal. The labour court has put forward one proposal after another to bring the strike to an early end.

The Irish Republic has been in economic difficulties since the beginning of this year. Latest statistics show that unemployment has hit an all time high since 1977 and inflation is running at an annual rate of 20.2 per cent.

NEW PRESIDENT APPOINTED IN ARGENTINA

OW041302 Beijing XINHUA in English 1241 GMT 4 Oct 80

[Text] Buenos Aires, October 3 (XINHUA)--Argentina's ruling junta today officially appointed retired Army General Roberto Eduardo Viola as president for 1981-1984 to replace the present president, Jorge Videla.

Viola, considered to share the same political stand with President Videla, will take office next March.

A communique issued by the junta, formed by the army, navy and air force commanders, said that the three had exchanged views on the designation of the president, which involved mainly the interpretation of the formalities of the designation. They "unanimously agreed that despite the existence of different interpretations, the prime consideration should be given to the supreme interest concerning the institutional future of the country and the maintenance of the indispensable unity among the armed forces so as to effectively obtain the objectives and aims of the national reorganization process."

Viola's designation came four days later than the deadline set by the junta. Official sources ascribed the delay to technical reasons. But observers here believed that the armed forces had differed on the issue.

The selection of a retired high-ranking military officer as the next president was based on the relevant documents issued by the military at the end of last year and in August, 1980. During this period, the armed forces had had heated discussions on the issue and various political parties in the country had voiced criticisms, demands and proposals on the government work.

BRIEFS

DUTCH WOMEN'S DELEGATION--Beijing, 30 Sep (XINHUA)--A women's delegation from the Netherlands had a cordial meeting here this evening with Kang Keqing, vice-chairman of the National Committee of the Chinese People's Political Consultative Conference and president of the All-China Women's Federation. The delegation is led by Mrs. G.J. Kraaijeveld-Wouters, secretary of state of culture, recreation and social welfare. After the meeting, Kang Keqing hosted a banquet in honor of the Netherlands guests. The delegation arrived here yesterday on a friendly visit at the invitation of the All-China Women's Federation. [Text] [Beijing XINHUA in English 1521 GMT 30 Sep 80 OW]

NEW YORK ART EXHIBIT--New York, 1 Oct (XINHUA)--Noted Chinese painter Han Meilin's ink and brush stroke watercolors go on view in New York at a week-long exhibition at the World Trade Center. Introducing Han Meilin's collection, U.S. professor of art history Philip Gould wrote: "The first American exhibition of paintings by Han Meilin is welcomed as the beginning of a new era of East-West cultural exchanges for contemporary artists." Andrew Stein, president of the borough of Manhattan, said that "the exhibition of Han Meilin's work, which is a combination of stylized traditions which date to the 10th century and are influenced by the impressionists, will serve to invigorate the cultural vitality of the borough of Manhattan and help to foster a spirit of international appreciation of the arts." He proclaimed October 1, 1980 as Han Meilin's day in the borough of Manhattan and extended to Han and his wife a warm welcome on behalf of the more than 1,500,000 citizens of the borough. NEW YORK PRODUCTS EXHIBIT--New York, 2 Oct (XINHUA)--More than 500 American friends and Chinese Americans visited the exhibition center of the China Resource Products (U.S.A.) Ltd which opened in New York this afternoon. The company is the agent in the United States for the Beijing branch of China National Arts and Crafts Import and Export Corporation and the Beijing Jewelry Branch. In the 16,000 square foot showroom in midtown Manhattan of New York City, the visitors showed great interest in the beautiful and skillful articles, including artistically wrought gold and silver jewelry, jade and semiprecious stone carvings and embroidery, carpets, lacquer-furniture, cloisonneware and antiques. All the articles on show are distinctive in style and design, exquisitely executed, widely diverse in kind, lifelike, attractively colored and pleasing to the eye. [OW051345 Beijing XINHUA in English 0708 GMT 3 Oct 80 OW]

TIES WITH PHILIPPINE CITY--Manila, 4 Oct (XINHUA)--The city council of Baguio of the Philippines has approved the draft agreement for a permanent sister city relationship between Baguio and Hangzhou of China, according to a PNA dispatch from that city today. The draft agreement was delivered to the city government by Fan Lian, permanent council member of the Chinese People's Association for Friendship With Foreign Countries who is now leading the Chinese broadcasting national music ensenble in a performing tour in the Philippines. Baguio is the most picturesque city in the Philippines. A delegation from Baguio which visited China last year laid the groundwork for the sister city agreement. [Text] [OW051345 Beijing XINHUA in English 1633 GMT 4 Oct 80 OW]

ACROBATIC TROUPE IN TRINIDAD, TOBAGO--Georgetown, 3 Oct (XINHUA)--The Chongqing acrobatic troupe of China arrived here this afternoon on a performance tour after its 12-day visit to Trinidad and Tobago. The troupe gave seven performances in five cities of Trinidad and Tobago and drew about 25,000 acrobatic fans. President of Trinidad and Tobago Ellis Clarke and his wife saw the Chinese acrobatic show in an indoor stadium in Port of Spain, capital of the country, on September 28. The president gave a reception for the Chinese troupe which is the first Chinese, and also the first foreign acrobatic troupe to visit this island country in the Caribbean. [Text] [OW041228 Beijing XINHUA in English 1215 GMT 4 Oct 80]

SHAANXI ACROBATS TO KENYA--Nairobi, 4 Oct (XINHUA)--Kenyan President Daniel Arap Moi this morning received China's Shaanxi acrobatic troupe in the State House here and had a cordial and friendly conversation with the guests. President Moi said, "I am very happy indeed to have so many Chinese friends visiting Kenya. Your visit almost coincides with my return from my visit to China. This shows the daily developing friendship between the people of our two countries." President Moi and cabinet ministers watched the excellent performances of the Shaanxi acrobatic troupe on October 2. [Text] [OW041252 Beijing XINHUA in English 1236 GMT 4 Oct 80]

UGANDAN LEADER VISITS CUBA--Kampala, 4 Oct (XINHUA)--Paulo Muwanga, chairman of the Ruling Military Commission of Uganda, returned home yesterday after a one-week official visit to Cuba, according to UGANDA TIMES today. During his stay in Havana, Muwanga held private talks with Cuban President Fidel Castro and discussions with Cuban Vice-President and Minister of Defence Raul Castro. The two sides signed an economic and technical agreement, but no details of the agreement were disclosed. An earlier report said that Cuba has promised to send doctors to Uganda and help Uganda to rehabilitate its sugar industry. Senior government officials revealed that Cuba has committed itself to the training of Ugandan military personnel. Commenting on his current visit to Cuba, Muwanga said that the two countries "have much in common and their aspirations were similar." He also described his visit to Cuba as the "start of a new era" in relations between the two countries. [Text] [OW041258 Beijing XINHUA in English 1246 GMT 4 Oct 80]

JAPAN'S MERCHANT FLEET TO GULF REDUCED--Tokyo, 4 Oct (XINHUA)--The Japanese merchant fleet going to the Persian Gulf has been reduced to half of its former size because of the war between Iraq and Iran, disclosed sources of transport and shipping circles. Usually, some 60 Japanese merchant ships set out for the Persian Gulf every month to send cars, steel and building materials and other Japanese products to the littoral countries of the Gulf. If the Iraq-Iran war drags on or expands, Japan's foreign trade would be badly hit. [Text] [OW040758 Beijing XINHUA in English 0722 GMT 4 Oct 80]

INDIA ON PERSIAN GULF NAVAL PATROL--Beijing, 4 Oct (XINHUA)--India yesterday described as dangerous the move to introduce an international naval force for patrolling the Persian Gulf area and hoped that the countries planning to do so would desist from their move, according to a report from New Delhi quoting today's TIMES OF INDIA. A spokesman of the Indian External Affairs Ministry said in a statement that certain countries, not belonging to our region, are trying to constitute an international naval force for patrolling the Gulf area, ostensibly to ensure that the Strait of Hormuz is kept open for normal commercial shipping. "However," the spokesman said, "we feel that the armada idea could achieve the very reverse of what their declared objectives are." "In our view any internationalisation of the unfortunate situation caused by the present conflict between two non-aligned countries, by introducing an international naval force into our region, would be a dangerous move carrying with it the risk of further escalation of the conflict," the spokesman added. [Text] [OW040856 Beijing XINHUA in English 0822 GMT 4 Oct 80]

EL SALVADOR EXTENDS STATE OF SEIGE--Beijing, 5 Oct (XINHUA)--The Salvadoran Government yesterday declared that the state of seige in El Salvador would be extended for another month, according to a report from San Salvador. This is the seventh extension of the seige since the government enforced it last March. Official sources said that the suspension of constitutional guarantees was still necessary in the present circumstances. The state of seige rendered ineffectual the freedom of speech, the freedom of passage and the inviolability of correspondence and privacy of domicile. On the night of October 3, anti-government guerrillas clashed with government troops near the headquarters of the National Guards in the capital. A dozen of people were reportedly killed or wounded in the three-hour gun battle. [Text] [OW050843 Beijing XINHUA in English 0839 GMT 5 Oct 80]

SRV ATTACK ON THAI FISHING BOATS--Bangkok, 6 Oct (XINHUA)--Vietnamese gunboats recently attacked and seized Thai fishing boats which were operating in international or Thai territorial waters. Such attacks have taken place on many occasions and seriously jeopardized the life and property of Thai fishermen. THAI RAT reported today that on October 4 a Vietnamese gunboat intruded into the fishing ground where a number of Thai trawlers from Samut Sakhon Province were operating in the international waters south of Kut Island, Trat Province and seized one Thai boat with 12 fishermen on board. On September 14 and 18, Vietnamese gunboats twice intruded into Thai territorial waters off Trat Province. They sank a Thai fishing boat, wounded five fishermen, and seized another fishing boat and over 30 Thai fishermen. [Text] [OW060844 Beijing XINHUA in English 0824 GMT 6 Oct 80]

JAPAN FREEZES AID TO SRV--Tokyo, 6 Oct (XINHUA)--The Japanese Government has no intention of resuming economic aid to Viet Nam so long as the Vietnamese authorities maintain their troops in Kampuchea, Japanese Foreign Ministry sources said today. They said the Japanese position reflects the wishes of the five ASEAN member nations--Thailand, Malaysia, Indonesia, Singapore and the Philippines. The Japanese Government has frozen about 1.4 billion yen ($68 million) in its economic aid to Viet Nam in protest against the Vietnamese invasion of Kampuchea. The aid agreement was signed before the Vietnamese invasion of Kampuchea in January last year. [Text] [OW061908 Beijing XINHUA in English 1849 GMT 6 Oct 80]

SOVIET BEEF PURCHASE FROM COLOMBIA--Bogota, 5 Oct (XINHUA)--Colombian official sources today confirmed that the Soviet Union had recently bought 7,300 tons of beef from Colombia and the first 2,200 tons of frozen beef worth of 5.2 million U.S. dollars would be shipped to the Soviet Union from Barranquilla. This is the first Soviet beef purchase from Colombia. It is reported that the Soviet meat production this year will drop by 5 per cent and the Soviet Union will have to import more meat to meet its domestic demand. CCP LEADERS PREPARE MAJOR REEVALUATION OF MAO

Hong Kong ZHENGMING [CONTEND] in Chinese No 35, 1 Sep 80 pp 34-35, 69

[Article by Jan Jian [0917 1696]: "Hu Yaobang's Comment on Mao Within the Party"]

[Text] Changes in Tiananmen Square

On 23 August, I went to Tiananmen Square and discovered to my surprise that the portraits of Marx, Engels, Lenin, and Stalin that had always hung in the square had vanished.

I believe that there were many other people who, like me, discovered this change in the square at the same time. Noticing the men and women in the square, however, I could not see on their faces the slightest reaction to the removal of these gigantic colored portraits.

I thought: Just a little over 20 days before, when a crane had lifted down from a height of about 20 meters the portrait of Mao Zedong that was hanging in front of the Great Hall of the People, the people in the square did not show the slightest bit of surprise.

Why did the people apparently not react in the slightest to these changes?

CCP officials, in their present raising of the question of "less publicity to the individual," have proposed some concrete measures, the main thrust of them being to oppose the worship and the cult of the individual. This seems to be being done vigorously and speedily. It is said that the CCP Central Committee has issued a directive to the entire party on "less publicity to the individual," one sentence of which is very interesting and has not been seen in the press: "Arrangements already made by each place to commemorate Hua Guofeng, Ye Jianying, and Deng Xiaoping must be abandoned without exception." But, among the broad masses, the cult and the worship of the individual had long ago ceased to exist.

A youth in the square told me that the portraits of Marx, Engels, Lenin and Stalin that had been displayed there were only ornamental items. This sentence is worth deep thought. I immediately made this connection in my mind: the scene in 1978 in Tiananmen Square of Han Zhixiong, hero of the "5 April" incident, and others. Pointing to the portraits of Marx, Engels, Lenin, and Stalin, Han said: Many people opposed to the tyranny of the "gang of four" on 5 April 1976 were beaten and arrested under the likenesses of these teachers of the international communist movement. On that day Han Zhixiong had pasted-up in the square a satirical prose work he had written. Just when he was preparing to collect his bicycle in order to return home, thugs hired to suppress the masses alleged that he was stealing the bicycle and arrested him on the spot. And this crime by the fascist rulers and their hired thugs was committed right under the portrait of Stalin. At that time when I heard what Han Zhixiong had said I thought that this was truly the greatest irony.

In 1978, there was an upsurge of big-character posters in Beijing, and in Tiananmen Square one big-character poster demanded that Mao Zedong be evaluated. At that time to suggest that Mao be appraised was considered treason and heresy. However, ever since Ye Jianjing's National Day speech last year, comments on Mao had been made on the quiet inside and outside the party and among the broad masses of people. Especially in recent times, the CCP leaders have one by one evaluated Mao Zedong's merits and demerits, rights and wrongs, and the idol of Mao has already been toppled. Thus, it is no wonder that the people in Tiananmen Square showed not the slightest surprise at the removal of Mao's portrait (the only portrait of Mao left is the one on the Tiananmen rostrum).

Comments on Mao By the Three Top CCP Members

During June and July, several CCP leaders publicly evaluated Mao's merits and demerits, rights and wrongs. Recently, there was Hu Yaobang's statement to the Yugoslav news agency (TANJUG released this statement on 21 June). Following this, there was Li Xiannian's statement when receiving Salisbury, deputy chief editor of the NEW YORK TIMES, on 25 July. And finally, there was Hua Guofeng's written replies, which included a comment on Mao, on 26 July to the Yugoslav newspaper VJESNIK. The statements by the three CCP leaders were not completely identical and their stress was not completely the same, but their main theme, which was almost identical, was: while affirming Mao Zedong's great contributions, we must also admit that he made mistakes.

So that the readers of ZHENGMING will believe that these important CCP members commented on Mao in speeches that can be read in the press, we will report here the basic content of Hu Yaobang's discussion of the Mao question in his recent speech within the party. Hu Yaobang's report was made at the national conference on propaganda work convened by the CCP Central Committee in Beijing. The date was 14 July.

Hu Yaobang's Discussion of Mao's Contributions

Hu Yaobang thinks that there should be a correct understanding of Mao Zedong and Mao Zedong Thought. He said: We should pay sufficient attention to his merits while clearly recognizing his demerits. Comrade Mao Zedong's merits were the greatest of all the revolutionaries of the older generation. Without Comrade Mao Zedong, the success of the Chinese revolution would have been delayed and would have been attained at a heavier cost. Hu Yaobang said that Stalin made a seven-point evaluation of Lenin, Mao Zedong made a six-point evaluation of Stalin, and we should make several points in evaluating Mao Zedong. These points are:

1. How to find the path for the revolution in colonial and semicolonial China.

2. Building of the party.

3. How to build socialism and transform China.

4. Mao's contributions to revolutionary military theory were even higher than Stalin's.

5. Mao Zedong contributed to the constant replenishment of the treasure house of Marx and Lenin and to the big and small parties in the world. He also added new things to this treasure house (of course, there was a big difference in the creative and comprehensive development of Marxism-Leninism in the past).

Changes in the Way of Describing Mao's Mistakes

After the gang of four was overthrown, there were diffferences in the way Mao Zedong's mistakes were described. At first they were called "shortcomings and mistakes" and later "faults" (last year's National Day speech by Ye Jianying). The Fifth Plenary Session of the [11th] Party Central Committee said that he committed serious mistakes in the Cultural Revolution period. How are they described most recently? Deng Xiaoping instructed the conference on propaganda work that the way of describing Mao Zedong's mistakes should be that in his old age he brought great misfortune to the party and state. Deng Xiaoping said that in Mao Zedong's old age his faults were that, subjectively, he was divorced from the masses, from reality, and from the collective, and that, objectively, he had the final and only say, especially the final say, and no one could change his mind once it had been made up.

Mao Zedong Thought and Deng Xiaoping

When speaking of Mao Zedong Thought, Hu Yaobang said that there are both similarities and differences between Mao Zedong Thought and Mao Zedong, and that Mao Zedong Thought includes the ideas of Zhou Enlai, Liu Shaoqi, and Deng Xiaoping, the revolutionaries of the older generation. The author remembers that in the past when it was said that Mao Zedong was the crystallization of collective wisdom, this meant that it included only the ideas of the proletarian revolutionaries of the older generation or only the ideas of Zhou Enlai and Liu Shaoqi. Deng Xiaoping is a new addition.

Why have the CCP leaders one after another publicly or privately commented on Mao and discussed the problem of evaluating him? The author reckons that this is in order to prepare public opinion for a comprehensive and systematic evaluation of Mao. It is said that the 12th CCP Congress, to be held at the end of this year or in the spring of next year, will pass a resolution on certain historical questions and that the question of Mao Zedong will be the core of this resolution.

In academic circles and theoretical circles, all sorts of judgmental evaluations of Mao Zedong have already become a common practice.

In Beijing the author came into contact with several professors (some who had come to the capital from outlying areas) who, starting with the research on and teaching of the history of the CCP, brought up the question of a new evaluation of Mao Zedong's writings.

They thought that if the problem of the position of Mao's writings in the history of the party was not solved, there would be no way to write a comprehensive, correct history of the CCP. And, in making this point, they said it was necessary to solve the problem of appraising Mao Zedong's writings.

Mao's Writings Should Not Be Revised at Will

An overall new appraisal and a correct treatment of Mao's writings is important and necessary and is also a process of development. The professors think that it should be done, under the present historical conditions, by an overall analysis in the spirit of seeking truth from facts. To say of Mao's writings that "every sentence is true" is unscientific.

Kang Sheng's Revisions Were the Most Abominable

The professors think that it is best not to revise historical documents and that the author himself should not revise them but should preserve their original historical appearance. If one later discovers parts in the document that are not appropriate, one can learn from the attitude of Marx and Engels toward the "Communist Manifesto," i.e., write a foreword or add explanatory notes and clarifications. Marx and Engels in the "Foreword to the 1820 German Edition of the Communist Manifesto," wrote: "Certain parts of the original work could have been revised... but the 'Manifesto' is an historical document and we do not have the right to revise it." This is a scientific attitude that rigorously respects history.

During the 10 years of catastrophe without precedent in history, Kang Sheng's revisions in the "Selected Works of Mao Zedong" was the most abominable example. Kang Sheng cut out from Mao's writings all references to Liu Shaoqi. The result was that the Central Military Commission's order appointing leading cadres of the New Fourth Army after the Southern Anhui Incident only named the acting commander, the deputy commander, the chief of staff, and the director of the political department and did not name the political commissar (at that time Liu Shaoqi was the political commissar); in 1947 the Central Work Committee formed after the withdrawal to Yan'an had no secretary. In order to denigrate Liu, he completely excised from the appendix of "Study and the Current Political Situation" the "Resolution on Certain Historical Questions."

Moreover, on the question of drawing support from foreign capital, after the promulgation in 1979 of the decree on foreign countries investing in jointly run enterprises, many people felt that this was a problem and some people even attacked it as a slavish comprador philosophy, national betrayal, and a violation of Mao Zedong Thought. Actually, the political report drafted and reviewed by Mao Zedong himself at the CCP Seventh Congress clearly affirmed that investment by foreign countries was welcome. The report, when speaking of the question of China's industrialization, contained this passage: "In order to develop industry, we need a large amount of capital, and where is this capital to come from? There are only two possibilities: we will depend mainly on the capital accumulated by the Chinese people themselves. At the same time we will draw support from foreign aid. With the provisos that the investment is in accord with the laws of China and benefits China's economy, we welcome investment by foreign countries, and this investment will benefit both the people of China and the people of foreign countries." From today's perspective we see that this passage was without fault and has stood the test of history. But when the third volume of the "Selected Works of Mao Zedong" was officially published, all passages concerning this question were cut out. The experience of history proves that the arbitrary revision of historical documents does much harm and little good.

Coverups Cannot Last Long

The professors said: "We should adopt the attitude of historical materialism in correctly analyzing and dealing with Mao's writings. Truth exists objectively, and shortcomings and mistakes also exist objectively. Coverups cannot last long."

Their views are convincing. We also hope to see the true features of Mao Zedong's writings restored.

DENG XIAOPING REPORTED IN VIGOROUS HEALTH

Hong Kong ZHENGMING [CONTEND] in Chinese No 35, 1 Sep 80 pp 36-37

[Article by Yu Wen [0060 2429]: "The State of Deng Xiaoping's Health"]

[Text] In recent years, certain people have discussed and observed Deng Xiaoping. Some people worry that when Deng Xiaoping one day succumbs to the natural law of birth, age, illness and death, the state will be thrown into great disorder. These people hope "His Excellency Deng," an old man with heavy party and governmental duties, can live a longer life. No matter what happens, the state of Deng Xiaoping's health is everyone's concern. Recently a friend of the author, who had an opportunity to learn about recent developments in Deng Xiaoping's life, told me in a letter some interesting things. Enclosed in the letter was an article clipped from a mainland publication concerning Mr Deng. I will summarize these materials below.

Why Does He Love To Play Bridge?

In speaking of Deng Xiaoping's life, many people think of bridge. During the "Cultural Revolution," Beijing's "Red Guard tabloids" described Deng Xiaoping's bridge playing as "decadent." These tabloids said: "No matter where Deng Xiaoping goes to inspect, no matter where he goes by aircraft, train, or ship, he plays bridge.... In the sky and on the earth, at sea and on land, at home and outside the home, at the center and in the localities, he plays bridge." The 25 February 1967 issue of NEW BEIJING UNIVERSITY contained a passage "exposing" Deng Xiaoping's bridge playing. It said that, in the summer of 1964, Deng, Yang Shangkun, Bo Yibo, and others went to the northeast on an inspection. On the way, he thought about playing bridge but unfortunately had no opponents. He sent an urgent cable to Wan Li and Wu Han in Beijing, telling them to come. Owing to his involvement in busy government affairs, Wan Li could not get away, so he let Wu Han take two other persons on Yang Shangkun's private plane and fly straight to Harbin in order to make up a bridge foursome for Deng Xiaoping. The truth of the news and the versions of events put out by Red Guard newspapers leave much room for doubt. But, since Deng Xiaoping began playing bridge at the Sichuan Institute in the 1950's, bridge has been his hobby and he has become a "bridge addict." Why does he like to play bridge so much?

There is a secret here.

Originally, Deng Xiaoping looked upon bridge as a true physical sport that helped dispel fatigue and relax the brain.

Wan Li, Peng Zhen Are "Old Bridge Cronies"

In that case, does he still play a lot of bridge? Yes.

In the past 3 or 4 years, owing to his work keeping him very busy, he has been compelled to reduce the time for the walks he loves to take. Also, while strolling, he usually ponders over some problems and cannot get sufficiently rested. In order to regulate his life, he continues to play bridge. He once said: "Only when playing bridge can I stop thinking about other things. When concentrating on the cards, my mind is fully rested." His "old bridge cronies" Wan Li and Peng Zhen, as before, sometimes play bridge with him.

Deng Xiaoping's interest in recreation and sport is not limited to bridge. For example, he likes to play billiards and is quite good at it, being able to make a run of over 100 points.

He has been interested in recreation and sport since he was a youngster.

As a student he loved soccer. When in France on a work-study program, he did all kinds of work, mainly hard work--boiler tending, waiting on tables.... After intensive study and work, he and his fellow students liked to take part in sports and watch matches. Once he pawned his coat to buy a ticket to see an exciting Olympic soccer match. He was very fond of soccer and continued to be fond of it after liberation. In the 1950's, he was a frequent spectator at playing fields. Afterward he more often watched soccer matches on television. His physical exercise in his youth and his trekking across battlefields in later years toughened his feet.

In 1958, he fractured a leg which, after it had healed, was weak. At his doctor's suggestion, he conscientiously underwent therapy and developed the habit of taking a daily walk.

Attacked by the "Cultural Revolution"

In the first 2 years of the "Cultural Revolution," Deng Xiaoping was a target of attack. His sons, daughters, and other family members were all driven out of his house, and he and his wife, Zhuolin, dwelt alone in a small secluded compound in Zhongnanhai. They swept the floor, did the cooking, and managed the household affairs themselves. At this time, although the political currents were constantly changing, he stuck to his long-formed habit of taking walks. Every day, early in the morning, he walked a fixed number--several tens--of circuits around two old locust trees in the compound, and on each circuit he took a fixed number of steps--conscientiously sticking to this regimen.

His Work in a Nanchang Factory

In 1969, Deng Xiaoping and Zhuolin were hurriedly moved from Beijing to a small solitary compound in the suburbs of Nanchang, Jiangxi. Surrounding their house was a bamboo fence higher than a man and there was little room for activity. Besides sticking to his 40-circuit walk around the courtyard, he and Zhuolin cultivated a vegetable plot and raised a flock of chickens. The tap water frequently didn't reach the second story in which they lived. Deng Xiaoping, who was then over 60 years old, often brought the water upstairs himself.

During the time he lived in seclusion in the Nanchang suburb, the upper levels ordered Deng Xiaoping to work at a nearby factory every day. He walked to the factory and back home--a half hour's journey each way. At first he was given light work, but he said he wanted to do heavy work. He then did the strenuous work of filing down screws and gave himself a daily production quota. Even though Deng Xiaoping at this time was doing "penal labor," he was interested in the job he was doing; the workers around him said behind his back: "Deng Xiaoping puts all his strength into the job!"

Unemployed After the Tiananmen Incident

In 1976, Deng Xiaoping was fired from his job and forced to lead a quiet life in an old Beijing-style courtyard. From childhood he had liked to swim and had formed the habit of taking cold baths. For several decades he had stuck to this habit, and only that year, because of old age, did he stop taking cold baths. But, still hale and hearty, he continued to take daily walks and did simple gymnastic exercises that he himself had devised. When summer arrived, the grass under the trees in the courtyard had grown about a foot high. Deng Xiaoping, observing this with interest, told his daughter to buy a sickle, and he then cut the grass in the courtyard every day.

Making the 60-Li Ascent of Mount Huang on Foot

After the gang of four was smashed and Deng Xiaoping had made his comeback, owing to "mountainous problems" he had to attend to numerous affairs of state every day and cut back on his recreational and sports activities. In order to preserve his vigor and health, at the urging of his old colleagues and family, Deng Xiaoping decided to make an ascent of Mount Huang in July of last year.

Mount Huang, 1,800 meters above sea level, is the most scenic of the Five Sacred Mountains. The year that Chen Yi ascended Mount Huang he wrote on an honorary tablet, "This is the number one mountain in the world."

Early in the morning on 12 July, Deng Xiaoping set out from a waterfall-viewing lodge at the foot of the mountain. Facing the morning sun, he began the walk up the mountain on a 60-kilometer trail. Although he had reached the advanced age of 75, he led the way. With good strength in his legs, he climbed 30 precipitous steps without a break, leaving behind his relatives who were accompanying him.... When he reached the Ciguang Pavilion, the face of Deng Xiaoping, who was wearing a short-sleeved shirt, was red and he was dripping with sweat, but he was still enthusiastic. He took a short rest and then, bending down to roll up his trouser legs, took hold of his walking stick and said in a loud and clear voice full of energy: "Let's go!" This gave everybody new strength. Whenever he came to a dangerously steep place, he turned his head back and told everybody to be careful. By noon the party had reached the ancient Banshan Monastery and, after eating lunch and taking a short rest there, resumed its journey, starting out for Yuping Peak. Deng Xiaoping spent the night at the Yuping Lodge.

On the 2nd day, Deng Xiaoping and his party climbed Guangmi peak by a 100-step scaling ladder.

On the third day, Deng Xiaoping and his party began to climb toward steep places from where they could get a magnificent view of the vast, mist-shrouded Western Sea. The mountain trail was precipitous and the members of his party wanted to assist him, but with a smile he rejected their help. Like a youth, he clambered up, holding onto the chain at the side of the steps.... By coming this far, Deng Xiaoping had proved that he had a strong constitution. For 3 days he ascended by the rugged mountain path the peaks of Mount Huang. After drinking in the wonderful scenery of Tiandu Peak and Lianhua Peak, he said with feeling: "After Mount Huang, the other famous mountains would be a cinch to climb."

After descending from Mount Huang, Deng Xiaoping's enthusiasm was not exhausted and he went for a swim at the Qingdao seashore.

From this one can see that the state of Deng Xiaoping's health is very good.

'AFP' CITES SHANGHAI PAPER ON SENTENCING OF GANG FOLLOWER

OW061452 Hong Kong AFP in English 1406 GMT 6 Oct 80

[Article by Francis Deron]

[Text] Beijing, Oct 6 (AFP)--On the eve of the fourth anniversary of the arrest on October 7, 1976 of the gang of four radicals led by Mao Zedong's widow Jiang Qing, the Chinese authorities today announced the death sentencing of one of the leaders of the Cultural Revolution in Shanghai.

The passing of the death sentence suspended for two years on Hu Yongnian has come as a curtain raiser both to the forthcoming trial in Beijing of Jiang Qing and her main associates and to future trials of other Cultural Revolution leaders.

The Shanghai WEN HUI BAO newspaper described the sentence as a "serious warning to the remnants of the counterrevolutionary cliques" of the time, implying such leaders.

Commenting on the sentence passed Saturday, the newspaper said Hu was "only a small fry who became a hooligan" and that his rise to power "was not an isolated phenomenon."

Becoming a member of the revolutionary committee in China's largest city and director of the municipal sports commission Hu was found guilty of acts of "maltreatment, vandalism and looting" and of serious physical abuse sometimes resulting in death against scores of people.

In finding Hu guilty the Shanghai court focused particularly on his relations with then Mayor Zhang Chunqiao, one of the members of the gang of four.

Jiang Qing and the three radical leaders from Shanghai, the cradle of the Cultural Revolution, were arrested less than a month after Mao's death.

The operation was led by then Premier Hua Guofeng, who subsequently succeeded Mao as chairman of the Communist Party, and carried out with the consent of Marshal Ye Jianying, a Long March veteran of great influence in the army.

The arrests were made by the elite units commanded by Mao's bodyguard Wang Dongxing, who was recently relieved of his positions. Now four years later, the leadership set up by Communist Party Vice-Chairman Deng Xiaoping, the highest ranking Cultural Revolution victim still alive, is going through the final formalities preceding the trial of Jiang Qing and nine other former top leaders.

The possibility that death sentences will be passed at the trial has not been ruled out.

On trial with Jiang Qing will be her fellow gang of four members Zhang Chunqiao, Wang Hongwen and Yao Wenyuan, Mao's former secretary Chen Boda and five other figures accused of attempting to assassinate Mao in 1971.

The prosecution brief built up by the Supreme People's Procuratorate is shortly to be handed over to a special procuratorate which it was announced last week has been set up to handle the case.

The procuratorate will put the case before a special court of 35 judges which will begin hearings one week after the 10 accused have been notified of the charges against them.

The authorities have announced that other trials will be held of former associates of Jiang Qing and of former Defence Minister Lin Biao who disappeared in 1971 in mysterious circumstances.

The WEN HUI BAO indicated that investigations were underway at the moment and stressed that justice should not "show magnanimity to those who should be tried for their criminal responsibility" for the disturbances of the Cultural Revolution period.

'TA KUNG PAO' COMMENTS ON UPCOMING TRIAL OF LIN, JIANG CLIQUES

HK040636 Hong Kong TA KUNG PAO in Chinese 28 Sep 80 p 2

[Article by Kung Yao-wen: "Ten Views on the Trial of the Lin Biao and Jiang Qing Counterrevolutionary Cliques"]

[Text] The date for the trial of the Lin Biao and Jiang Qing counterrevolutionary cliques will soon arrive. People throughout China and the whole world have been looking forward to this for a long time.

What should have occurred has finally arrived at long last although 9 years have elapsed since Lin Biao's ignominious death in Wen-du-er-han [3306 6757 3643 3352] and 4 years have elapsed since the arrest of Jiang Qing and other criminals.

Judging from yesterday's announcement from Beijing, the following are some points worth noting:

Two Combine Into One--Jiang Qing Is the Leader

First, the two counterrevolutionary cliques will be prosecuted in one case. This is because during the first 5 years of the "Great Cultural Revolution," they acted in collusion, usurped party leadership and state power together and plunged the country and people into calamities together. Even after the death of Lin Biao, the Jiang Qing counterrevolutionary clique still recruited Lin Biao's followers and carried on counterrevolutionary conspiratorial activities.

Second, although the "gang of four" is still called the second antiparty clique, the names of this clique's leaders are now arranged in a different order. In the past, the name of former CCP Central Committee Vice Chairman Wang Hongwen was always placed before others, thus labeling them as Wang-Zhang-Jiang-Yao. Now the name of Jiang Qing is placed before the others, thus conforming to the actual situation. In his important speech delivered at the recent NPC session, Chairman Hua Guofeng placed the name of Jiang Qing before other members of the gang.

Ten Principal Defendents--Kang Sheng Has Not Been Mentioned

Third, in addition to the four principal defendants, six other principal defendants will also be brought to trial. These are: Chen Boda, a self-styled "very common person" who actually is a big scoundrel; Lin Biao's "four great warrior attendants," namely, Huang Yongsheng who once controlled the General Staff Headquarters, Wu Faxian who once controlled the air force, Li Zuopeng who once controlled the navy and Qiu Huizuo who once controlled the General Logistics Department; and Jiang Tengjiao, a former commander of the East China Air Force, who was involved in the nationally known incident of sending military planes to pursue and attack a special train in an attempt to assassinate Chairman Mao Zedong.

Fourth, no prosecution will be instituted against those others who are deceased. Of course, the deceased include the Lin Biao family, namely, Lin Biao, Ye Qun and Lin Liguo who died during a crash which occurred beyong the Great Wall. It seems that Kang Sheng is among those others who are deceased.

The latest announcement has apparently failed to explain the relationship between Kang Sheng and these two counterrevolutionary cliques. Was he an insider or an outsider of the two cliques? Was he a member or a senior commanding general of the two cliques?

According to a report, the case of Kang Sheng was investigated some time ago as a special case and the results of this investigation will be announced. His counterrevolutionary crimes which violated the criminal law are too numerous to list.

The Others Accused in the Case of the Two Cliques--The So-called "Cultural Revolution"

Fifth, in addition to the 10 principal defendants, the others accused in the case will be tried separately. It is said originally that due to a reduction in the scope, the others accused in the case of the "gang of four" only amount to some 200 people. In addition to the others accused in this case, there are also the others accused in the counterrevolutionary clique of Lin Biao. It seems that the others accused in the case of the two cliques amount to several hundred people. It seems that the others accused in the case of Lin Biao include Zhou Yuchi, a former department head of the air force, who ordered a helicopter to fly to Mongolia and later shot dead a pilot who disobeyed his order; and Ding Sheng who directly assisted the rebel Lin Biao and his son in establishing a base within the southern gate of China. The hands of Jiang Qing and her trusted followers are also stained with a lot of blood. Jiang Qing used as her model "The Count of Monte Cristo" to actively take her revenge. Prior to the execution of a young Liaoning woman, Zhang Zhixin, her larynx was cut off. Her execution was of course carried out under the orders of some people.

Sixth, quotation marks have been added to the term the Great Cultural Revolution which appeared in the report made yesterday by Huang Huoqing, chief procurator of the Supreme People's Procuratorate, at a session of the NPC Standing Committee. It seems that the quotation marks are not used for handling a special term but are used for negating this term's literal meaning. In his recent meeting with that noted Italian woman correspondent, Vice Chairman Deng Xiaoping said that the Great Cultural Revolution brought no benefit whatsoever. The current use of the quotation marks in this terms shows that it is now regarded as the "so-called Great Cultural Revolution."

The Prosecution Against Them Centers Only on Their Crimes and Does Not Deal With Their Political Line

Seventh, in answering questions raised by that noted woman correspondent, Deng Xiaoping said: The prosecution against the "gang of four" centers only their criminal offenses and does not deal with their political line. The latest report made by Huang Huoqing gave more details about the prosecution.

Huang Huoqing said: The 10 principal accused from the two counterrevolutionary cliques will be prosecuted on four criminal counts; simply put, their crimes were those of usurping party leadership and state power and bringing calamity to the country and the people. He added: "The prosecution against Lin Biao, Jiang Qing and company involves only their counterrevolutionary crimes which violated the criminal law and does not deal with their errors in work, including those related to political line."

In his talk with that Italian correspondent, Deng Xiaoping said: The prosecution of them for their criminal offenses is quite sufficient for arriving at a verdict of guilty. However, because of this trial, people cannot very well avoid raising the following questions: Can these criminal offenses be really separated from things related to political line? Is it true that errors related to political line encouraged these criminal offenses?

The Trial--The Appraisal of Mao--The 12th Party Congress

Eighth, that woman correspondent raised this question: Will the trial examine issues concerning Mao? Deng Xiaoping replied: "I can assure you that the trial of the 'gang of four' will in no way damage the image of Chairman Mao. Of course, it will show that he should bear some responsibilities such as assigning the 'gang of four' to some posts."

Judging from the arrangements made by Beijing, we can see that Beijing will also carry out a comprehensive appraisal of Chairman Mao Zedong's contributions and errors so as to promote the criticism of the leftist line and steadily quicken the pace of construction. However, this work will be carried out after the trial of the "gang of four" and during the 12th National CCP Congress. This point was stressed in Chairman Hua Guofeng's talk with a Yugoslav correspondent. It is said that a document concerning the appraisal of Chairman Mao has already been passed around within a certain level for perusal and deliberation.

Oppose Left Deviation and the Pernicious Influence of Feudalism

Ninth, the two counterrevolutionary cliques had two vice chairmen of the CCP Central Committee, namely, Lin Biao and Wang Hongwen. These two vice chairmen were also the "successors" designated by the man who instituted the lifelong appointment system. If Kang Sheng who has not been mentioned is added to the list, the two cliques had a total of three vice chairmen. Moreover, Jiang Qing, head of the clique, had a special status.

These conditions show that since the founding of new China some 30 years ago, there are still many vestiges of feudalism. Therefore, the mainland is not only exerting all its strength to expose the pernicious influence of the leftist line but is also sparing no effort to criticize the pernicious influence of feudalism. This is completely necessary.

Tenth, the Lin Biao and Jiang Qing counterrevolutionary [cliques' trial] will be handled by a special court set up by the NPC Standing Committee. This is another Chinese measure to strengthen the country's legal system. The fate of the 10 principal counterrevolutionary criminals is of course noteworthy. However, the more important thing is the lessons people throughout the country may draw from this case.

PARTY AND STATE

'CHENG MING' CARRIES 'INTERNAL REPORTS' ON TRIAL OF 'GANG OF FOUR'

HK040751 Hong Kong CHENG MING in Chinese No 36, 1 Oct 80 pp 50-52

[Report: "Explanations on the Trial of the 'Gang of Four' Contained in Internal CCP Reports"]

[Text] Deng Liqun and Liao Gailong, who occupy high positions in party affairs and theoretical research in the CCP, explained and analyzed the question of trying the "gang of four" in internal reports delivered several months ago. We now record the relevant parts of their speeches.

Liao Gailong's Internal Report Given in Tianjin (Partial)

"We must clearly distinguish the nature of the problem of Lin Biao and the 'gang of four' and the question of its connection with the extreme 'left' line. What is the problem of Lin Biao and the 'gang of four'? The nature of the activity they wanted to pursue was that of counterrevolutionary restoration. Hence, the struggle between us and them is a question of revolution and counterrevolution. The nature of the problem of Lin Biao and the 'gang of four' was that of carrying out counterrevolutionary conspiratorial activities to usurp party and state power and plot a coup.

"In future we must put them on trial for their crimes. They committed counterrevolutionary crimes. We will soon put on trial 10 bad people: the five confederates of Lin Biao--Huang, Wu, Li, Qui, and Chen Boda--the 'gang of four'--Wang Zhang, Jiang and Yao--and also Mao Yuanxin. We must sentence them for their crimes. Comrade Hua Guofeng has said in his report that we should not sentence them to death but they must be sentenced and put on trial. Some people say, will there be a public trial? I am afraid that would not be easy. How could these people be put on public trial, since they shirk the responsibility for their crimes and pin onto Chairman Mao the counterrevolutionary crimes they committed themselves? However, the result of the trial will be publicly announced. That is probably the way it will be. This is the problem of their counterrevolutionary crimes; this is their counterrevolutionary conspiratorial clique.

"However, they also took advantage of the mistakes made by the party, meaning the errors of certain 'leftist' lines committed by our party's leaders. They took advantage of this error, pushed it to extremes, and pushed 'leftist' things to extremes, that is, the extreme 'left.' They created and carried out an extreme 'left' line. What is the relationship between these two things? The 'leftist' erroneous line constituted a problem of mistakes made by good people and by our party. However, the extreme 'left' line of Lin Biao and the 'gang of four' was an extreme 'left' line created by a counterrevolutionary conspiratorial clique in making use of our errors. The nature of this extreme 'left' line was counterrevolutionary.

"Some people say, how could they be extreme rightists one moment and extreme 'leftists' the next? This is because Chairman Mao said that the problem of Lin Biao was not extreme 'leftism' but extreme rightism. People could not understand how if Lin Biao and the 'gang of four' were extreme 'leftists' he was described as rightist, which would make them more 'leftist' than him. Where then had 'leftism' gone? Again, if he was reckoned to be an extreme rightist, he should have joined up with the landlords, rich peasants, counterrevolutionaries, bad elements and rightists and with the capitalist roaders, so how could he have toppled the capitalist roaders? Does calling him a rightist mean that if he did not join up with the capitalist roaders he was rightist? This point cannot be explained. When we say that he was counterrevolutionary, in general we do not speak of him as 'left' or right; we distinguish between left and right when speaking of the line. It is called rightist to surrender to imperialism and the ruling class. 'Down with everything' is 'leftist'! He precisely pursued 'down with everything.' For instance some people say, why did he overthrow Peng Zhen? Would he say, Peng Zhen is a revolutionary, so I will overthrow him? No. He would say, Peng Zhen is a capitalist roader, he opposes Chairman Mao and has turned Beijing into an 'impenetrable' 'independent kingdom.' He therefore disguised himself as most, most revolutionary. This is how he deceived people.

"If we say that he was counterrevolutionary, how is it that we were unable to see that? Could none of us see it? Quite large numbers of the masses were led astray and deceived by them. When giving his explanation on 25 September, Comrade Hu Qiaomu said, I was led astray at the time and thought that Lin Biao and the 'gang of four' were revolutionary. Comrade Hu Yaobang said, I too was led astray. That was the case with all of us. Who could see things clearly when the business had just started? Lin Biao claimed to be revolutionary, to support Chairman Mao the most, and to be most, most revolutionary. I thought so too. However very soon very many people saw the truth. The older generation of revolutionaries saw it first; they had political experience and analytical ability. They struggled against them right from the start. Did not the older generation of revolutionaries launch a 'February adverse current'? This was a resolute struggle that the older generation of revolutionaries waged against them after realizing their true features. Secondary, the cadres and masses suspected them right from the start, and then boycotted them. The party and CYL members and the masses did not agree with toppling all old cadres and branding people as conservatives. Some people understood the truth and became aware earlier than others. For example Zhang Zhixin understood the truth after taking part in rebellion for less than 1 year. She formed a viewpoint in a systematic way. She formed a complete viewpoint in 1966 and held that Lin Biao and the 'gang of four' were bad, she also realized that certain slogans put forward by Chairman Mao such as 'bombard the headquarters' and his criticisms of Liu Shaoqi were erroneous. She held that our party was pushing a 'leftist' line. She boldly raised the question in this way. There are still many comrades who do not understand that our party has made 'leftist' mistakes and carried out a 'leftist' line. But Comrade Zhang Zhixin formed her viewpoint 11 years ago. She was truly a great trailblazer in our movement to emancipate the mind, and a heroic martyr. She was very wise. Like me, many comrades did not understand the truth after 1972 and 1973, after the fall of Lin Biao, and only gradually came to see through the 'gang of four' after observing the way they were opposing Premier Zhou. That was already very late. Certain comrades cannot understand the truth even now, and are unable to distinguish between right and wrong. Some people still hold that Lin Biao and the 'gang of four' were leftists. Probably they were too 'leftist'! They still do not understand that our party made mistakes. Thus they were deceived by them. So what has criticizing their extreme 'leftist' line and bringing them to trial for their counterrevolutionary crimes to do with us? However, in criticizing their extreme 'leftist' line we should think about ourselves and see whether we have any lingering poison of extreme 'leftism.' We should carry out a good examination of ourselves and wash away the remnant poison. That will be beneficial for everyone."

Deng Liqun's Internal Report Given in the Central Party School (Partial)

"Comrade Peng Zhen holds that we cannot try Lin Biao and the 'gang of four' for their line but only for their crimes. The problem of line is an internal party matter, and problems of line in the party can only be solved within the party, not in court. We should therefore clearly proclaim that Lin Biao and the 'gang of four' were a counterrevolutionary conspiratorial clique; this point should be affirmed first. As for the ultraleftist line, this will not be mentioned at all in court; they will be arraigned and sentenced for their counterrevolutionary crimes.

"Our party has made mistakes. Proceeding from their counterrevolutionary aims, the conspirators and careerists Lin Biao and the 'gang of four' made use of our mistakes and pushed them to extremes. They created and pushed an ultraleftist line, went in for 'toppling everything' and 'fighting all-round civil war,' usurped party and state power and plotted a coup. These counterrevolutionary conspiratorial crimes were totally different in nature from the mistakes made by the party. They are the most ferocious enemies of the people of the whole country. Their problem cannot be solved by applying the method of inner-party struggle.

"Comrade Peng Zhen has said: He is in charge of political and legal work, and the central authorities have assigned him the task of trying and sentencing the counterrevolutionary conspiratorial clique of Lin Biao and the 'gang of four.' What should they be tried for? They cannot be tried for the problem of line; they can only be criticized for that.

"They are counterrevolutionary and we are revolutionary; we want to seize power and they want to counterseize power; they want a restoration and we want to oppose restoration; this is a struggle between revolution and counterrevolution, and so, if we are said to have made mistakes in line, and Lin Biao and the 'gang of four' pursued an ultraleftist line, where does the distinction lie? They camouflaged themselves, waved the banner of 'revolution,' and deliberately created and pushed an ultraleftist line. Those of us who made mistakes in line did not conceal their political viewpoints. People who pursue counterrevolutionary conspiratorial activities want to conceal their political viewpoints and their true features. No matter what mistakes Chairman Mao made during the Great Cultural Revolution, he never concealed his ideas and theories from the party. He opposed Liu Shaoqi and even talked to Snow about what time he would start to topple Liu Shaoqi. Was the big-character poster 'bombard the headquarters' concealed? Although he did not name names, was it not as clear as daylight that he was aiming at Comrade Liu Shaoqi when he mentioned the rightist tendency of 1962 and the 'left' in form but right in essence of 1964? At that time I was regarded as an agent of Liu Shaoqi in the magazine RED FLAG. When I saw this, I became an agent in 'bombarding the headquarters.' (Editor's note: Deng Liqun was Liu Shaoqi's secretary before the Cultural Revolution) The matter became clear as soon as I looked at it. As for the things that Chairman Mao said and did, the things that Lin Biao said and did, and the things that the 'gang of four' said and did, it is necessary to carry out meticulous work and analysis with regard to what problems to deal with and how to draw distinctions... Was there any difference between the ultraleftist line of Lin Biao and the 'gang of four' and the mistakes made by Chairman Mao during the Great Cultural Revolution? The comrades will be able to draw the distinctions so long as they contrast things in a truth-seeking and cool and sober way. This distinction is very important. It is not only a question of whether or not to conceal one's political viewpoint; in addition, what Chairman Mao said and wrote differed on many points from the utterances of Lin Biao and the 'gang of four,' and the distinctions should be made. The chairman also seriously criticized Lin Biao and the 'gang of four' on many issues. Lin Biao talked of and acted for turning the state apparatus of the dictatorship of the proletariat into a target to be completely smashed. As soon as the chairman saw this, he said: It is inappropriate to completely smash this, we can only talk of improving the dictatorship of the proletariat, not of completely smashing it. On the question of factionalism, the chairman pointed out at an early stage: Within the dictatorship of the proletariat, the working class cannot split into two irreconcilable factions, they must unite. However Lin Biao and the 'gang of four' regarded factional activities and factionalism as a legal thing in the party and army. At the time we could not draw clear distinctions; it was very difficult to draw clear distinctions on certain matters at the time. Lin Biao and the 'gang of four' waved banners and said that this was the chairman's instruction and that was the chairman's instruction... Lin Biao and the 'gang of four' were counterrevolutionary double-dealers; they used counterrevolutionary double-dealing methods against the party and people. This is one of the reasons why their ultraleftist line was able to run wild. They adopted a 'most, most revolutionary' pose and made use of the prestige of the revolutionary leader to stir up religious-style fanaticism while describing themselves as 'holding highest,' 'following closest,' 'always loyal to the leader,' and 'always acting according to the principles laid down.' Since they held legal positions in the Central Committee at the time, and also because they used these methods, they indeed led astray for a time quite large numbers of cadres and masses who lacked political experience and analytical ability. Speaking of myself, I never had any doubts about Lin Biao right up to the time of the Lushan conference. Although I felt that certain of his ways of putting things were inappropriate, I believed that he supported Chairman Mao, and I held that it was very good to select him as successor. I also talked to others and cited historical experience to show that a great figure needs to be supported by another great figure. Marx needed the support of Engels, Lenin needed the support of Stalin, and Chairman Mao needed the support of Lin Biao. That was the way I looked at it. After the liberation of the northeast, I thought in my mind, and I also exchanged this view with certain comrades: The chairman originally intended to let Liu Shaoqi be his successor, but after the northeast had been completely liberated, I held that it would be better if Lin Biao rather than Liu Shaoqi became the successor. This was because Liu Shaoqi was politically strong but did not know how to fight a war, and to be politically strong without knowing how to fight a war was a great defect for a successor in China. Lin Biao was both politically strong and also knew how to fight a war; in my view, he would be the most suitable successor. In talking of the 'three great helpers,' I indeed held that Lin Biao was the third great helper. However, no matter how well counterrevolution is camouflaged, it cannot completely camouflage its true features but will always expose them. Certain old revolutionaries boycotted Lin Biao the moment he rose to power. As his features became ever more exposed and his crimes became ever greater, more and more people understood what kind of person he was, and we cannot say that Chairman Mao also deceived us. He openly made his viewpoints and opinions known to the party and people. When he wanted to do something he told everyone about it; he talked within the party about toppling Liu Shaoqi and about his dissatisfaction with the premier. He did not go in for concealment and deception with regard to Comrade Xiaoping. As soon as he saw the letter from the wife of Comrade Liu Jianzhang, Chairman Mao issued a criticism: Who is carrying out these fascist methods in our prisons? In short, we must distinguish between Chairman Mao's errors in line and the ultraleftist line of Lin Biao and the 'gang of four,' drawing strict distinctions; this is indeed a very important issue."

"We must truly understand that if the chairman had not called them the 'gang of four' and said that their problem must be solved, the party Central Committee headed by Chairman Hua would have lacked a legal basis for solving their problem. That would have been much more difficult."

FEUDAL BUREAUCRACY DURING QING DYNASTY SCRUTINIZED

Beijing LISHI YANJIU [HISTORICAL RESERACH] in Chinese No 1, 1980 pp 135-144

[Article by Wang Sizhi [3769 1835 3112] and Jin Chengji [6855 2052 1015]: "The Feudal Bureaucracy in the Early Qing Dynasty, as Seen from the Civilian Covernment at the Time"]

[Excerpts] Bureaucratic politics is an extremely important component of feudal autocracy. It was precisely through such a multilayered pyramid of various levels of bureaucratic organs that the feudal ruling class in China's successive dynasties realized its rule and control over the people of the whole country. This model of bureaucratic rule was called "civil government."

Differentiation between the rich and the noble, the lofty and the lowly, in a strict hierarchy of classes; rampant avarice and random disregard of the law, with bribery publicly practiced; the following of precedent and sticking to convention; corruption and ineptitude--these were several of the outstanding characteristics of feudal bureaucratic politics. In history, such rotten bureaucracy not only played a gigantic negative role in the development of our economy and the advancement of our society, but it also was often the fountainhead of disturbances in society.

Although, as China's feudal ruling class, they were fundamentally incapable of understanding such profound principles as the upper structure and the economic base, in their own ruling practice they felt deeply that whether their civilian government was good or bad, kind or cruel, and honest or corrupt was directly related to whether their rule was to be safe or endangered, happy or sad. They knew that if they should mishandle it, the result would often be a case of "people revolting because of governmental oppression." Consequently, certain emperors in history who wanted to put forth meritorious performance always attempted to begin by rectifying the civil government so as to consolidate the order of their feudal rule. They demanded that bureaucrats at various levels "be loyal and devote themselves to the public well-being, be honest and diligent in their administrative duties, and do their best at their various professions and trades" so as to attain the ideal condition of "the state budget being blessed with increasing surpluses, the citizenry living in households undisturbed, and the country spontaneously achieving universal peace." For this purpose, they either promulgated various strict and cruel laws, rewarded honesty, and eliminated the corrupt, so that treachery would be precluded and workstyles would be rectified, or else they would formulate various rules and systems to exalt the good and punish the evil, in the hope of inspiring the beneficial and uprooting the harmful. But the results of their efforts were often less than expected. This should not simply be blamed on their ineptitude but should be explored from the standpoint of the shortcomings and maladies of such feudal bureaucracy in order to find its causes. In reality, the corruption of civil government was the sure product and tumor of feudal autocracy; it was an incurable chronic ailment and a social, historical phenomenon of the feudal system itself that could never be uprooted. The history of the early Qing Dynasty has provided us with a lively example of this.

I

After they crossed the border and entered China proper, rulers of the early Qing Dynasty, taking into consideration the fact that civil government corruption was one of the reasons for the preceding Ming Dynasty's passing into oblivion, did a great deal of thinking about rectifying the civil government, obviously for the purpose of consolidating their own rule. Emperor Shunzhi said: "Officials of the Ming period usurped eminence, coveted goods, fostered cronies, and resorted to mutual sparring; they took deception and hoodwinking as natural, and treachery and doubledealing as gainful.... In the employment of personnel and the running of the administration, measures were turned upside down in great confusion, so that bandits rose in the country and the people drifted away" ("Authentic Records of Emperor Shizhu of the Qing Dynasty," Vol 18). He regarded this as something to be "profoundly warned against." Several dozen years later, Emperor Kangxi still remembered this without fail, and likewise he took it as a warning while he attempted his own approach to advancement and governance. He said: "Insofar as the evils of slander, misrepresentation, envy, and jealousy are concerned, all dynasties have had their share, but they were especially excruciating at the end of the Ming period. Public affairs were set aside as if they were nobody's business, but no day passed without some partisans banding together to frame, spar against, or accuse others. Thus, after a due period of such cumulative evil practices, ruling authorities of the state themselves also became affected. As I read past histories, I have developed a deep hatred toward such pests who turned their back on the public and misgoverned their country" ("Authentic Records of Emperor Shengzhu of the Qing Dynasty," Vol 153). Through the disturbance and chaos at the end of the Ming Dynasty they came to the conclusion that "the safety of the common people depends on the civil government." Hence, rulers of the early Qing Dynasty formulated a series of regulations on observation, reward and punishment, and promotion and downgrading of bureaucrats, in the hope of setting forth relevant examples and achieving the goal of "total peace within the four seas." For this reason, in certain ways the civil government of the early Qing Dynasty was relatively more honest than the end of Ming. For example, in the middle and late periods of Ming, there were about 100,000 civilian and military officials, more than 100,000 eunuchs, more than 100,000 palace guards and personnel of other special agencies or the like, plus another 100,000 or so members of the royal clan: all of these made up a gigantic, clumsy, aristocratic, bureaucratic apparatus. This situation became considerably altered in the early Qing period. As for the dark politics resulting from the usurpation of power by outside relatives and eunuchs of the royal household and from factionalist struggles, some of it (such as usurpation of power by external relatives and eunuchs of the royal household) was perhaps no longer seen, and some (such as factionalist struggles) definitely were suppressed. Therefore, an analysis of the civil government of the early Qing period, when the feudal rulers vigorously attempted their new approach to advancement and governing, has a more typical meaning in respect to our understanding of the various failings of the feudal bureaucracy.

The most fundamental symptom of feudal bureaucracy was that those who served as officials automatically took promotions in their official ranks and getting rich as their duty, and thereby they "remained oblivious of their public responsibilities." This was also a stubborn disease of the big and small bureaucrats of the early Qing period. Once their ambition for high office and generous remuneration was satisfied, it became a case wherein "from the grand secretary downward and any official with a specified duty upward, none diligently attended to their offices, but all knew only how to get out earlier so as to enjoy some extra leisure and private convenience" ("Authentic Records of Emperor Shengzhu of the Qing Dynasty," Vol 133). Since their minds were not on their daily affairs, they adopted a perfunctory attitude toward their responsibilities, all the while keeping an eye on ways and means to nurture their dignity and superiority and to enliven their status as magistrates and overlords. Very few of them would volunteer to shoulder any responsibility, while all of them took nonchalant attitudes and behavior as the natural approach. Hence, "great officials passed the buck at random, while small officials imitated them and played a waiting game" ("Authentic Records of Emperor Shizhu of the Qing Dynasty," Vol 64). They passed the buck to one another, while those within waited for those outside, thus turning such practices into a habit. There was no efficiency to speak of....

III

Although an attempt was made in the early Qing Dynasty to rectify civilian government, the chronic disease of feudal bureaucracy remained the same, and its various failings were not and could not be precluded. The ultimate cause of this, of course, was determined by the nature of the exploitive class. In the case of the feudal state as an instance of class oppression, its fundamental function was nothing more than the exploitation and oppression of the vast ranks of the people and the maintenance of the rule of the landlord class over the peasants. In such a feudal bureaucratic regime made up of political representatives of the landlord class, its failings in the final analysis were nothing more than the concentrated reflection of the corrupt, muddleheaded, avaricious class nature of the landlord class itself. However, the feudal political system was also an important contributing cause of these failings.

Autocracy was the political system of our long period of feudal society, and it became more and more reinforced in later days. Under the feudal autocratic system, officials of the various levels were all appointed. Great officials were directly employed by the emperor, and lower level officials were appointed by the Board of Civil Service. Control of the various powers of the feudal state was in the hands of none other than such officials, installed one layer after another by appointment from above, who turned it into a bureaucratic system prescribed according to strict gradation of ranks, and who thus made up a pyramidal bureaucratic apparatus, with the one standing at the apex of the pyramid being the emperor himself as ruler of the whole country. The emperor not only "made decisions alone on matters of state" in exercising all major powers of the state but, with regard to his officials and subjects, also wielded incontestable authority over their lives and their possessions. Hence, feudal autocracy was both reflected in the graded powers conferred from above and demonstrated ultimately in the form of the ruler's absolute authority. This feudal autocratic system, reflected in the ruler's absolute authority, naturally gave rise to the concept of "I am the state," so that the "family state" also became the political principle of the time. As a result, the relationship between ruler and ruled became equivalent to the relationship between "master" and "slave." In accordance with such a realistic relationship, "being loyal to the ruler" thus came to be propagated by thinkers of the landlord class as an "axiom" based on "heavenly principles."

The bureaucratic system of feudal autocracy gave rise to problems in the following two facets:

First, the existence of the ruler's absolute authority and the feudal "master-slave" relationship inevitably made it necessary for big and small subjects and workers to do things only in accordance with "His Majesty's will." In officialdom, the practice, by inference, was for everyone to do things by watching the facial expression of his superior, in accordance with the relevant powers of rank they were entitled to exercise respectively. Being responsible to the superior for everything and doing everything one could to please the superior thus became the supreme principle upheld without fail by the bureaucrats. An official at any given level would answer in the affirmative readily in the face of his superior and bow and pay respect to him in the meantime. "Prostrate often, speak little" thus became the secret of serving as an official at the time. Under this system, where officials exercised their powers according to their hierarchical rank, everything was done according to established rules and everybody "took his ancestors' laws" as his ultimate basis. Nobody should dare to take any responsibility upon himself in any venture or resort to renovation and creativity. This therefore also became the orthodox course to follow in feudal officialdom. For this reason, low administrative efficiency was inevitably a great characteristic of bureaucratic politics.

The prevailing of graded powers in the feudal autocracy made it inevitable that the promotion or downgrading, the glory or shame, of subordinate officials depended entirely on their superiors, and not on the merits or demerits of individual officials themselves. In order to butter up their superiors, they would thus "devote only 30 percent of their energy to actual work, and 70 percent to the placating of their superiors. Consequently, even though welcoming or seeing a superior off might ordinarily seem trivial matters, some would somehow be abused because of negligence in this regard. Even though the paying of pure courtesy calls was repeatedly proscribed, some would be exiled far away because of the gradual distance that resulted due to the absence of such calls. The presentation of gifts, too, was strictly warned against, but good or bad appraisals of official performances were somehow determined sometimes according to how often or how rarely the parties involved made such presentations and such attendant strivings. The energy of an otherwise busy official would thus hardly have enough ingenuity to plug up possible loopholes in his superior's direction, so how was he to have any leisure left to devote to his administrative duties!?" ("Authentic Records of Emperor Shizhu of the Qing Dynasty," Vol 118). For the sake of protecting his salary and his job, he would hardly have enough time to fawn to his superior, so how was he to have any thought left to look after his duties? Between bureaucrats, the relationship of a subordinate toward his superior was maintained through nothing more than such welcoming and seeing-off activities, such courtesy calls, and such presentations of gifts. Meanwhile, superior officials also needed the support of some people so that coordinated actions could be taken at their respective levels; in "their attempts to garner goods and bribes and to earn private benefits," they too also needed lateral assistance from their peers. As a result, the ones above and the ones below, plus those in equivalent positions, all came to help one another and strike up pertinent relations with one another, so that they could accommodate the intimate, protect the sensitive, and form a small group on the basis of a community of interests. This was called fraternalization (factionalism). They "all help and work through their respective partisans in order to deceive their superiors" ("Authentic Records of Emperor Shengzhu of the Qing Dynasty," Vol 194). Or they "plot against each other, fight those who differ and patronize those who agree, revenge private grievances against each other, and drag in others in extended chains of vengeance. In some cases, they themselves would harbor a certain grudge against someone but would ask others to avenge it for them, and stay in the background as the instigators; in other cases, they would hint at what they wanted to say but would refrain from directly pointing out the matter in question, thereby entrapping people in their intrigues." Consequently, in the ups and downs of officialdom, such a predilection to resorting to political machinations in order to form or dismantle alliances between friends and foes, and thereby bring factionalism into play and gain advantages deviously, actually became a guarantee for the security and growth of those bureaucrats. An isolated bureaucrat was bound to be shortlived in the rough going of officialdom. In the realistic political life of the time, there were precisely such groups of partisans banding together to "frame, spar against, or accuse" each other, and "even after some suffered dismissals and became pigeonholed, others would continue to find fault with them, have their clansmen implicated, or wreak havoc on their family fortunes and their very lives" (ibid., Vol 153). All of the foregoing [practices] made the existence of factional fights coterminous with the prevalence of feudal bureaucratic politics. In order to prove the rationality of the existence of such a relationship, some in history maintained through blatant words that "a gentleman makes friends but does not recruit partisans." Even under the political pressure of the Qing rulers, who energetically cracked down on factionalists, not only "have the Han banded together to form parties and cliques since the days of antiquity," but, "those of Manchuria, who have always been simplistic, sincere, loyal, and genuine, people of the various Banners as we see them today, are also banding together to form parties" (ibid., Vol 194). And there were even those who openly advocated the organization of parties. For example, Yin Jiachuan, secretary of the Grand Court of Appeals, in the Qianlong period, was of the opinion that "when the theory of factionalism became dominant, the instruction of fathers and teachers was weakened; how can even the ruler enjoy his superior position all by himself?" ("Files on Literary Litigations of the Qing Period," Vol 6). Factionalism was the tumor of feudal bureaucratic politics. It was based on the common status of disciples, former subordinates, participants in imperial civil service examinations of the same year, natives of the same locality, and members of the same class. It was the shelter under which all sorts of ill practices prevailed--practices such as people resorting to corruption and bribery, sparring at and plotting against one another, and fawning and seeking favors from those above.

Second, in accordance with the ruler's absolute authority under autocracy, and the "master-slave" relationship between ruler and ruled in the "family" state, there needed to be, from the emperor's point of view, officials who were docile and obedient and loyal to the ruling house under the given family name; hence "rule by man" was stressed. It was argued that "there can be only man who rules, but no law can do so by itself," and "to have good government therefore depends basically on having good men." Kangxi said: "It is hard to know people, but it is even harder to use them. The way to govern lies precisely in this. I could not help devoting my whole mind to it, even if I wanted to" ("Authentic Records of Emperor Shengzhu of the Qing Dynasty," Vol 41). As for the so-called "having good men," even though many high-sounding criteria were postulated, such as "be loyal and devote yourselves to the public well-being," "people with a selfless and forthright mind," etc, since the point of departure was that "there can be only man who rules, but no law can do so by itself," the use or nonuse and the promotion or downgarding of officials inevitably depended on the emperor's and the superior's likes and dislikes. Once he had ingratiated himself and thus fallen into favor of the emperor or the superior, an official would be emboldened to do whatever he pleased, in disregard of the law or lesser authority in general. Therefore, it became almost routine through history for confidants and favorites of the powerful and the noble to commit all sorts of evil deeds. Using people on the basis of affinity thus also became a criterion for "personnel administration" under feudal bureaucracy. The usurpation of power by external relatives and eunuchs of the royal household originated precisely from this, and the fact that the Qing House put great powers into the hands of Manchu nobles was no exception. The results of officials being used or not used and promoted or downgraded on the basis of the emperor's or the superior's likes and dislikes, and the use of people on the basis of affinity, were just as some pointed out: "The superior would not bother to look into the affairs of the civil government at all. He did what he liked or disliked entirely according to his personal whims. Consequently, his recommendations became less than fair, and officials' appraisals were thrown into confusion" ("Authentic Records of Emperor Shizhu of the Qing Dynasty," Vol 106). Some also daringly pointed out: "today's ills lie with the Six Boards; the ills of the Six Boards rest primarily with the presidents of these boards; the ills of these presidents lie in their passing the buck; the ills of their passing the buck rest in the emperor's failure to select the right people" (ibid., Vol 89). "Failure to select the right people" led to the random use of officials and to all the failings of the bureaucratic system. For this reason, even though Kangxi repeatedly issued strict orders to officials of various levels that "from now on, you must forgo personal activities and impeach and rectify cases of wrongdoing and incompetence on the basis of facts so as to conform to my intention to use good people and achieve governance" ("Authentic Records of Emperor Shengzhu of the Qing Dynasty," Vol 27), these orders turned out to be nothing more than formalistic papers.

To sum up, the political system of feudal autocracy was also a cause of all sorts of chronic diseases in bureaucratic politics. To wish to uproot such diverse ill practices in bureaucratic politics under the prevailing feudal autocracy was not unlike trying to negotiate with the tiger for his hide. "To lover Liu, the fairy-imposed mountain was already far, but now [the goal] is found to be separated from him by even more mountains." Rulers of the early Qing Dynasty continuously groaned about the state of bureaucratic politics under them; This was a reflection precisely of such feelings of helplessness on their part.

SHANGHAI PAPER DISCUSSES ROLES OF EMPERORS' IN-LAWS, EUNUCHS

HK061230 Shanghai WEN HUI BAO in Chinese 22 Sep 80 p 3

[Article by Sha Lu [3097 6424]: "Emperors, Their In-laws and Eunuchs--My Feelings After Reading 'Biography of Liang Ji' in 'Annals of the Later Han'"]

[Text] There were 14 emperors during the Eastern Han dynasty. The first two, that was, Emperors Guangwu and Ming, lived more than 40 years. Emperor Xian, the last, was 39 when he abdicated. He died a natural death. The other emperors died before reaching middle age. A table for easy reference follows:

Name of emperor	Age when mounting the throne	Duration of reign	Age at time of death
Zhang	19	14 years	33
He	10	17 years	27
Shang	100 days	9 months	1
An	13	19 years	32
Shao	Unknown	8 months	Unknown
Shun	11	19 years	30
Chong	2	5 months	3
Zhi	8	7 months	9
Huan	15	21 years	36
Ling	12	22 years	34
Fei	17	5 months	17
Xian	9	30 years	39 (abdication)

Why was it that most of the emperors during the Eastern Han dynasty mounted the throne when they were very young and died before they were of age? Was it because there only were young successors? Was it because the lives of the emperors during the Eastern Han dynasty were extraordinarily short? No. It was because the emperors' in-laws and eunuchs held dictatorial power. To directly manipulate the government, the emperors' in-laws and eunuchs intentionally put the young and innocent emperors to the throne. They would kill the emperors by both open and secret tactics when the emperors grew up and became disobedient. The in-laws played a major role in this regard. Take Liang Ji for example. In the 6th year of the Yonghe period (141 A.D.), he succeeded his father Liang Shang as minister of war when the latter died. Two years later, Emperor Shun died at the age of 30 when he was capable of great achievements. Historical records did not say that he was murdered by Liang Ji. However, there was something fishy about it. After that, Liang Ji insisted on enthroning 2-year-old Emperor Chong, who died 5 months later. Then, Liang Ji again insisted on enthroning 8-year-old Emperor Zhi, who was poisoned 7 months later for calling Liang Ji a "domineering general." Liang Ji put two boys to the throne, who died in less than a year. Who was the third emperor enthroned by him? When Emperor Chong died, Army Chief Li Gu and other officials "recommended Liu Suan, who was prince of Qinghe, to the throne because he was of age and was known for his moral character." Their recommendation was unsuccessful because of Liang Ji's objection. This time, Li Gu again recommended Liu Suan to the throne, but Liang Ji wanted to enthrone 15-year-old Liu Zhi, who was marquis of Liwu and was to marry his younger sister. Liang Ji's intention was self-evident. What Senior Chamberlain Cao Teng said revealed the heart of the matter. One night, Cao Teng called on Liang Ji and told him: "You are the emperor's in-law and are in charge of all important government affairs. You have to deal with so many people. Inevitably, you may have offended some of them. The prince of Qinghe is strict and impartial. A misfortune will befall you if he mounts the throne. It is better to enthrone the marquis of Liwu so that you can keep your eminent position." ("Biography of Li Gu" in the "Annals of the Later Han") Cao Teng pointed out the reason why Liang Ji and the emperors' in-laws and eunuchs wanted to put little boys to the throne and did not like emperors who were of age. Fan Hua, a historian, made a comment on the dictatorial power held by the emperors' in-laws during the Eastern Han dynasty: They "liked boys to be emperors so that they could remain at their posts." He hit the mark with this comment.

In the feudal society, the emperor is the sole agent of the landlord class and represented order in the midst of disorder. Proceeding from the interests of their class, the landlords hoped that the emperor was young, vigorous, wise and capable because this was advantageous to the maintenance of the feudal rule and social order. However, the emperors' in-laws and eunuchs held dictatorial power by weakening imperial power. Weakening of imperial power meant that the feudal rule and social order were in chaos. For this reason, feudal historians generally took the stand of condemning the dictatorial power held by the emperors' in-laws and eunuchs and speaking in favor of imperial power. They saw that the dictatorial power held by the emperors' in-laws and eunuchs was an opposite to the strengthening of imperial power. Their writings therefore showed irrepressible "indignation," which influenced many people through the ages.

Here, a question provides food for thought. Was the dictatorial power held by emperors' in-laws and eunuchs just an opposite to imperial power? In my opinion, we should not let our understanding remain unchanged at this stage. Of course, we should see the opposition between the emperors on one side and their in-laws and eunuchs on the other side. What is more important, we should see the unity of the two sides.

The emperors' in-laws and eunuchs were dependent on imperial power like two melons growing on the same vine. Without imperial power, there was no room for the emperors' in-laws and eunuchs to take roots. Therefore, on the one hand, the emperors' in-laws and eunuchs based their dictatorial power on the weakening of imperial power; on the other hand, they based their existence on imperial power. The former base concerned the question of strength and the latter concerned the question of existence. For this reason, the latter is fundamental.

Liang Ji was the most influential of the emperors' in-laws during the Eastern Han dynasty. He dominated the government for more than 20 years. "He held supreme power. His orders were obeyed throughout the country." "All other officials held him in awe and none dared to disobey him." Even the emperor "showed the highest respect for him and dared not meddle in his work." Did Liang Ji hold sway because he was a man of great ability? In fact, he was neither a capable nor an honorable man. He was a profligate son of the rich. A historical book carried this passage on him: "He had hunched shoulders, wolfish eyes and a glib tongue. A crafty man and a relative of the imperial family, he indulged in pleasure-seeking and drinking when he was young. He was good in archery, chess games, gambling, and playing the shuttlecock. He was also interested in hunting and cockfighting." He was an out-and-out hooligan. What did Liang Ji who was so ugly and incapable rely on to seize power of the Eastern Han dynasty? His only means was that he was the emperor's in-law.

Liang Tong, Liang Ji's great grandfather, rendered outstanding service in founding the Eastern Han dynasty. He became an in-law of the imperial family. So, the Liang family was influential during the Eastern Han dynasty. Liu Xiu, the emperor, married his eldest daughter, Princess Wuyin, to Liang Tong's son, Liang Song, and "had boundless confidence in him." Liang Song's niece was chosen by Emperor Zhang to be a concubine and gave birth to a son who later became Emperor He. She was honored with the title "Empress Dowager Konghuai" after Empress Dowager Dou died. Thereafter, the Liang family won the emperors' favor and trust and became the most influential of the imperial in-laws. The daughter of Liang Shang, Liang Song's nephew, became empress in the first year of the Yangjia period during the reign of Emperor Shun (132 A.D.). Historian Fan Hua said: "Winning the emperor's favor was the essential way to seize power. When a woman won the emperor's favor, whatever she did, she had his blessing. When she was out of the emperor's favor, whatever she did to please him, he would find her ugly. So, when winning the emperor's favor, she had more virtues than the whole world could hold. But, once she was out of his favor, she could find no shelter for herself." What an important access to the emperor the empress meant! Liang Shang grasped this access, became the minister of war and held sway. After his death, his son Liang Ji, who was the empress' elder brother, succeeded as minister of war and monopolized everything. In the feudal society, marital relations meant political relations. To monopolize the government, the Liang family monopolized the right to choose the empress and insured that the empresses came exclusively from the Liang family. Once it lost this right, it would "find no shelter for itself." In a few words, the empress served the lifeline to the emperor's in-laws. This line was important because one end was linked with the emperor. Otherwise, it would have no social value to the emperor's in-laws.

The emperor was separated from the outside world by his in-laws in order that they might hold dictatorial power. Therefore, he could only contact three kinds of people: the first were the women for him to dally with; the second were his in-laws who were in power; the third were the eunuchs who waited on him. If he did not want to be treated as a puppet, the eunuchs were the only people from whom he could seek help. Almost all emperors during the Eastern Han dynasty used the eunuchs to get rid of the dictatorial power of their in-laws. For example, eunuch Zheng Zhong killed the emperor's in-law Yan Xian; eunuch Shan Chao and others killed the emperor's in-law Liang Ji. The "Biographies of Eunuchs" in the "Annals of the Later Han" carried a detailed account of how the eunuchs killed Liang Ji. This was how it happened: Emperor Huan could not bear the pressure which Liang Ji and the empress applied on him. He "resented this" and wanted very much to remove the Liang family's influence. However, he "was afraid that the secret would be divulged, so he did not make an attempt." In the second year of the Yanxi period (159 A.D.), Empress Liang died. He thought that the time was ripe. So, boosting his courage, he summoned eunuch Tang Heng alone, had a secret talk with him in the washroom and bade him time and again to keep the secret. An emperor had to hide in his washroom to talk with his eunuch. What a pity! This showed that the only people the emperor could use were the eunuchs around him. However, how could an emperor who got help from the eunuchs escape the destiny of being manipulated by the eunuchs? After Liang Ji had been killed, Emperor Huan was forced to grant the titles of marquis to Shan Chao and four other eunuchs. Power was shifted from Liang Ji's hands to the hands of Shan Chao and other eunuchs. Thereupon, the dictatorial power of the emperor's in-laws was replaced by the dictatorial power of the eunuchs.

History of the Eastern Han dynasty showed that the dictatorial power of eunuchs was a product of the emperor's use of eunuchs to get rid of the dictatorial power of his in-laws and that the dictatorial power of the emperor's in-laws would give rise to the dictatorial power of eunuchs and these two powers prevailed alternately. In the final analysis, the emperor, the object of support, fell victim to either of these two powers. These two powers "were both opposite and complementary to each other." We shall be confused by the historical phenomena if we only see that "they are opposite to each other" and do not see that "they are complementary to each other." This should be the historical conclusion: To exterminate the dictatorial powers of the eunuchs and the emperors' in-laws, it was necessary to get rid of the emperors and the feudal autocracy on which they based their existence.

'CHENG MING' ARTICLE DETAILS SITUATION IN SHANGHAI

HK060858 Hong Kong CHENG MING in Chinese No 36, 1 Oct 80 pp 54-57

[Article by Chin Ku: "Raise the Heavy Curtain Over Shanghai"]

> [Excerpts] After Su Zhenhua, Ni Zhifu and Peng Chong entered Shanghai, they did not eliminate the pernicious influence of the four pests, implement the principles of the Central Committee and carry out policies. The Shanghai Municipal CCP Committee took an ambiguous attitude toward the discussion on the criterion of truth. Peng Chong cannot be considered a pragmatist. In Autumn 1977, Shanghai executed a Zhang Zhixin-type young man—Wang Shengeng, a student in the school of physics of Huadong Normal University.

While watching the spectacular "double program" consisting of the NPC and the CPPCC in Beijing, I happened to meet an elder whom I have always respected. He is not a controversial person nor a sycophant. He was appointed as a member of the CPPCC because of his position and prestige as a scientist.

He was very happy and said: "Your magazine is very superficial when talking about the situation in Shanghai. You failed to see the great secret of this abysmal sea."

I asked hastily which reports he was talking about. He smiled and said: "You compared Peng Chong to Zhao Ziyang and Wan Li and called him a pragmatist. That is 'missing the larger picture.'"

"Then, can you tell me about the real situation in Shanghai?"

He said: "It is a long story. I am not used to talking about politics and there are things that I cannot explain, but I have a good friend. He is also an 'outsider' but he has always paid close attention to inside stories. Maybe you can go to Shanghai and interview him. He will give you the details."

The next day, I took a Boeing 707 to Shanghai. After unpacking, I immediately hired a car and went to the Jiangwan district. With the address given by my scientist friend and after great efforts, I found Mr C.

He is a political commentator who had been famous decades ago. In the past 20 years or so, he seemed to have become "mellowed" and dissociated himself from the world.

I paid my respects to Mr C and without much ado, went straight to my question. I asked him to solve the puzzle about the "larger picture."

"The 'spring thunder' in October 1976 smashed the 'gang of four' and Ma, Xu and Wang in Shanghai. The people of Shanghai were so pleased and had hoped that order would be restored. However, the new leadership headed by the 'troika' (Su Zhenhua, Ni Zhifu and Peng Chong) has been overcautious, stressing that there must be stability and not upheaval. What kind of 'stability'? Only 4 of the 'gang of four's' 3 chieftains, 8 'lord protectors' and 13 hoodlums in Shanghai who had committed numerous serious crimes were arrested. Even the villainous adviser of the villainous adviser Zhang Chunqiao, Xu Jingxian and Zhu Yongjia, the 'No 1 pen' in the 'gang of four's' principal writing group remain at large. They allegedly made good confessions. As to the close associates and main supporters of the gang which were spread out all over the country, they were basically untouched. Supposedly, they need only 'tell the whole truth.' Actually, what happened was they just put on a show. Some did not tell the whole truth and some did not even confess. They are still occupying their positions, controlling their territories, in charge of important state affairs and personnel departments and persecuting the masses and those who dare to complain.
